ABSTRACT

The guideline for program development for administrators, supervisors, and teachers is to be used in making decisions regarding home economics education programs in Arizona schools. It will also serve as the basis for the initiation of an extensive curriculum development at all levels and give directions as to how programs may be established, continued, and financed. The topics discussed are: home economics education in Arizona schools (with objectives), administrator concerns (for various levels), curriculum in transition (guidelines for development), centers designed for contemporary home economics curriculum (facility requirements), and evaluation procedures (sample evaluation instruments). Appended to each of these topics are supplemental materials in the form of graphs, charts, and evaluation forms.

NOTICE

The materials in this booklet have been prepared over a period of two years. They include information helpful to administrators and teachers in local districts in organizing, initiating, conducting and evaluating home economics education programs in Arizona schools.

The booklet is organized and designed to be put into a loose leaf notebook and used. From time to time, you will be sent replacements as the originals become obsolete. This applies especially to the Appendix section. Space is provided in the Table of Contents for you to list additions as you receive them.

We trust these materials will answer many of the questions which you have had. This is the purpose for which it was designed.

CLIO S. REINWALD, State Supervisor
Home Economics Education

BARBARA A. BORDER, Home Economics
Education Specialist

LETTIE B. CALE, Home Economics Education
Specialist

FOREWORD

The major role of home economics education has been to teach the knowledge and skills which would prepare youth and adults to assume the responsibilities of good home and family living. The Vocational Act of 1963 has broadened the scope of home economics education. It also includes the responsibility of offering programs which develop occupational competency relating to the knowledge and skills of home economics. The vocational funds appropriated under P. L. 88-210 were used for educational programs preparing people for employment in any occupational field which relates to home economics with requirements of less than a baccalaureate degree. The Vocational Amendments of 1968, P. L. 90-576 gave direction to greater emphasis of certain areas when Part F Consumer and Homemaking Education was added. Home economics education programs may be conducted in comprehensive or specialized secondary schools, area vocational-technical schools, junior or community colleges or universities offering terminal or associate degree programs.

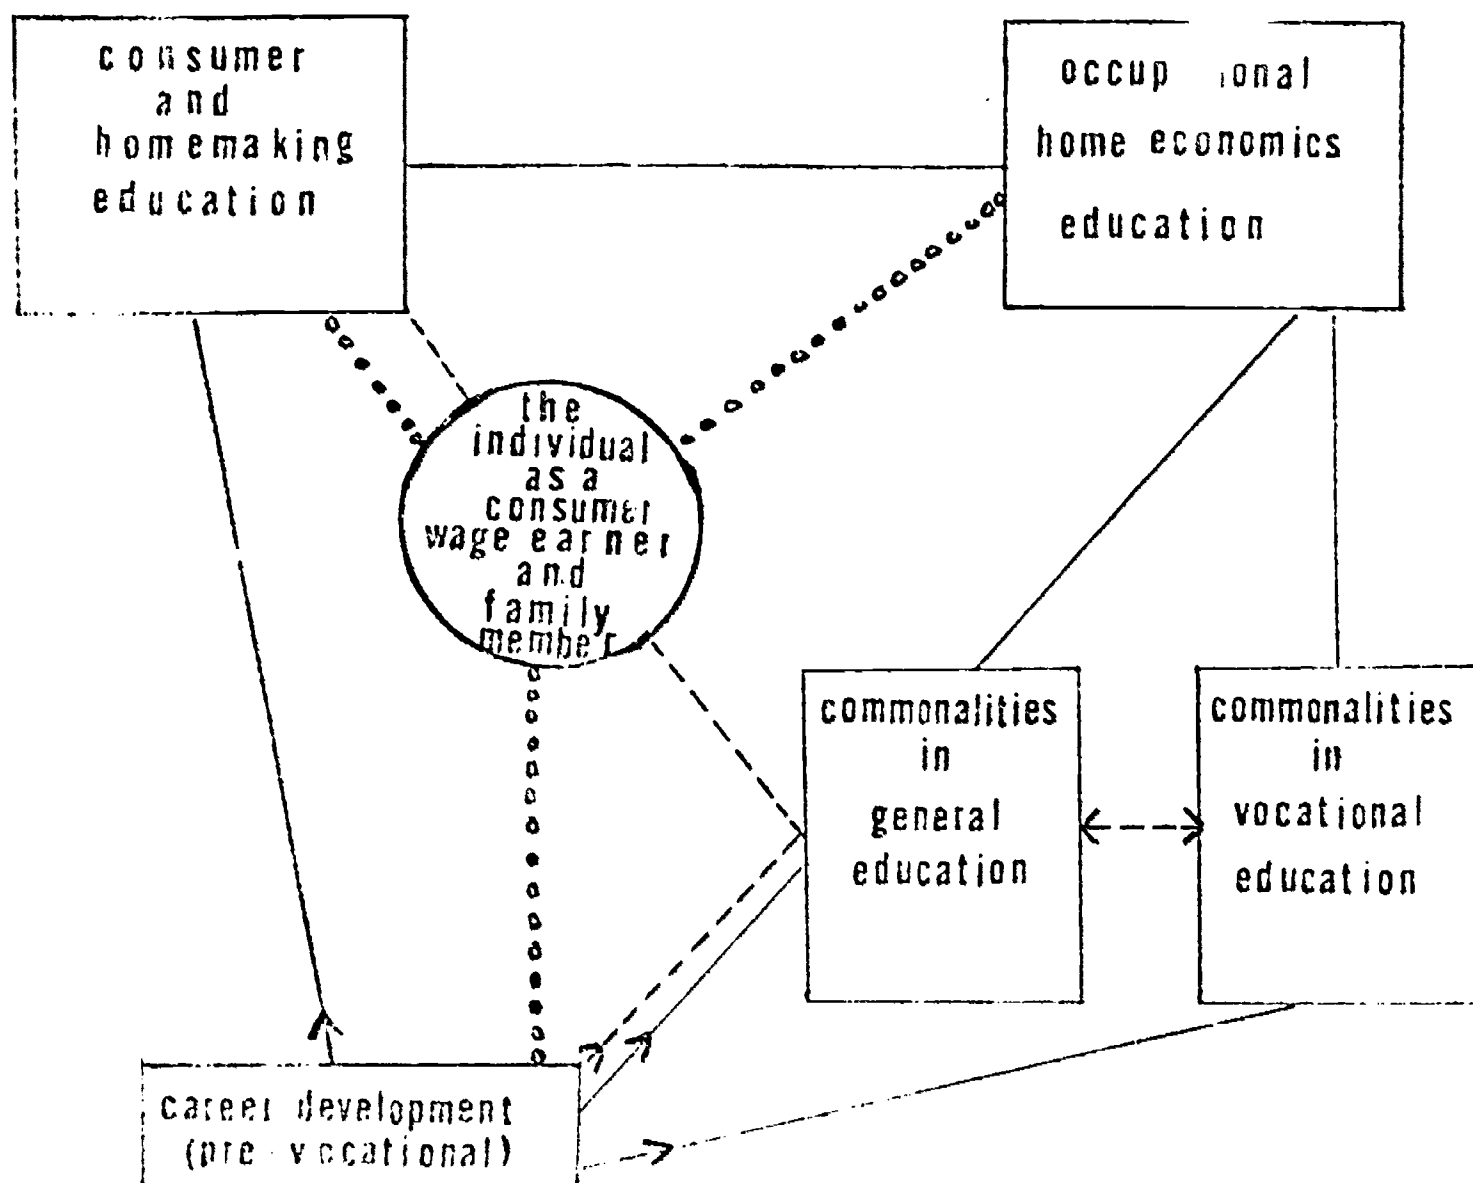

In 1961 the Home Economics Education Branch of the U. S. Office of education initiated a nationwide project to re-examine home economics in the secondary schools. Extensive and intensive work on the part of classroom teachers, supervisors, school administrators, teacher educators and subject matter specialists brought about the identification of basic concepts in the home economics field. This conceptual structure defines the content and serves as the basic source for developing the emerging curriculum in home economics in the next decade. Since 1964, the conceptual structure organized in the five subject matter areas of Human Development and the Family, Home Management and Family Economics, Foods and Nutrition, Textiles and Clothing, and Housing has served as a basis for curriculum development. The outlines of concepts and generalizations serve a significant purpose in defining curriculum content and in revamping established programs as well as developing new programs.

This material is prepared for administrators, supervisors and teachers to use as a guide in making decisions on home economics education programs in Arizona schools. It will also serve as the basis for the initiation of an extensive curriculum development program at all levels and give directions as to how programs may be established, continued and financed.

HOME ECONOMICS PROGRAMS IN ALL LEVELS OF SCHOOLS

Home economics education in the contemporary education program is concerned with the whole individual and the process of self-actualization. It has a triple purpose: first, the preparation of youth and adults for home and family living in a consuming society; secondly, the preparation of some youth and adults for gainful employment in occupations using the knowledge and skills of home economics; and lastly, to plan articulation in the career development concept. Several types of programs may be offered in the lower or elementary, middle or junior high school, the upper or comprehensive high school, the area vocational-technical school, and the junior or community college.

PROGRAM PATHS IN HOME ECONOMICS EDUCATION

To provide direction for home economics education in the light of contemporary needs and issues, the following objectives have been formulated:

- . Establish a program of continuous evaluation which will serve as a guide for program development

- . Offer programs which provide education for consumer and homemaking education with special emphasis on meeting the needs of the disadvantaged and preparing people for the dual roles of family member and wage earner

- . Prepare men and women, girls and boys, for employment in home economics related occupations including cooperative work experience and with emphasis on meeting the special needs of handicapped and disadvantaged persons

Develop curricula based on the evolving needs of society and individuals in their quest for self-actualization.

Provide functional facilities which meet the needs of the emerging curriculum.

Enrich the learning situation through effective and discriminating use of social and technological development in instructional techniques.

The basic content areas are the source for planning both types of home economic programs. By adapting content, methods, goals and experiences, the curriculum becomes effective instruction for those preparing for the vocation of homemaking or for those preparing for gainful employment in occupations using the knowledge and skills of home economics. The organization of home economics subject matter identifies the following five areas in its conceptual structure¹

Human Development and the Family
 Home Management and Family Economics
 Food and Nutrition
 Housing
 Textiles and Clothing

The major characteristics as shown below will help to identify the differences in the two types of home economics programs:

| Consumer and Homemaking Education | Occupational Home Economics Education |
|--|--|
| Total curriculum is broad in scope and content. | Curriculum is based on the job description of a specific occupation. |
| Attitudes and behavioral development necessary to strengthening family well-being are stressed. | Emphasis is placed on the development of attitudes and behavior necessary to secure and hold a job. |
| All students are accepted because of the belief they can benefit from the program. | Qualities and aptitudes are the basis for selecting enrollees in a specific job-oriented program. |
| Marriage and homemaking are common to practically everyone, so programs are justifiable in all communities. | Programs are established only when evidence shows sufficient job opportunities are available for placement of trainees. |
| Personal counseling is important and desirable in all programs. | Vocational counseling service is necessary to help the teacher in determining needs, employment opportunities, and placement of students in the most satisfactory program. |
| Advisory committees are recommended for a more functional program. | The required establishment of local advisory committee helps determine work available and to advise and evaluate the specific emphasis of the training program |
| Evidence shows youth and adults are strengthened in the role of consumer, homemaker, wage earner and family life member. | Placement in a job for which training was given shows success. |

¹ American Home Economics Association: Concepts and Generalizations - Their Place in the High School Home Economics Curriculum Development Report of a National Project Washington, D. C., 1967

CHAPTER II

Administrator Concerns

The administrator faced with the need to plan programs in home economics education may ask: What is consumer and homemaking education and occupational home economics, and how do we plan for program development? How are they inter-related? How do they differ?

The major role of home economics education has been to teach the knowledge and skills which would prepare youth and adults to assume the responsibilities of good home and family living. The Vocational Act of 1963 and the Vocational Education Amendments of 1968, P.L. 90-576, broaden the scope of home economics education and give new emphases to the total program. These include the responsibility of offering programs which develop occupational competency relating to the knowledge and skills of home economics, but with increased emphasis to assist consumers and to help improve home environments and the quality of family life. The vocational funds appropriated under P.L. 90-576 may be used for educational programs preparing people for employment in any occupational field which relates to home economics with requirements of less than a baccalaureate degree. In Part F., Consumer and Homemaking Education, Section 161, it specifically states that at least one-third of the funds appropriated shall be used in economically-depressed areas or areas with high rates of unemployment.

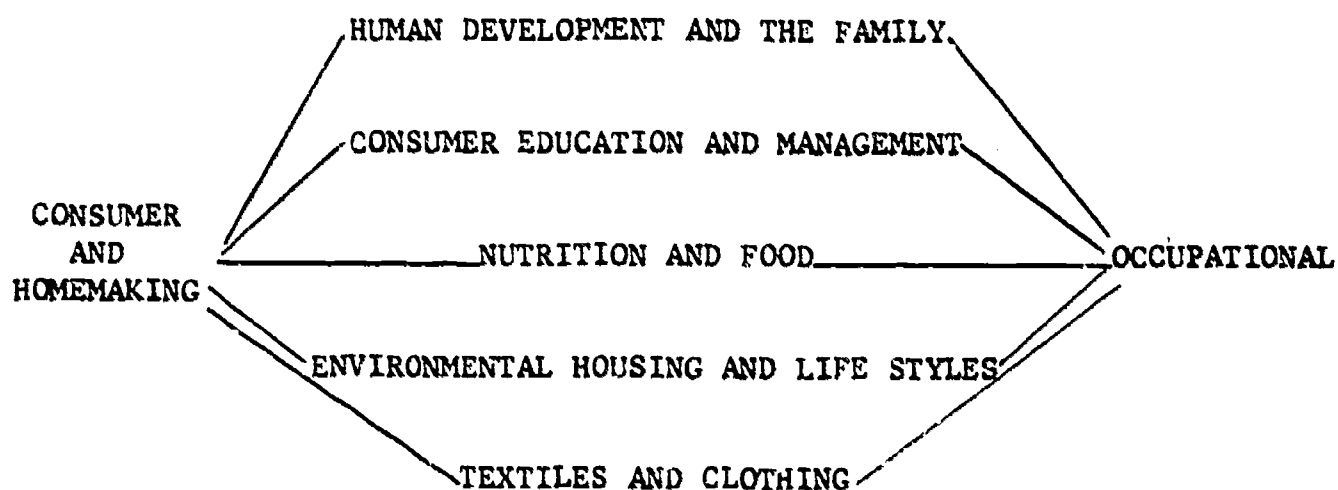

Arizona Senate Bill 5, 1971, provides funding for Career Education. Home economics education has definite contributions to make at the Awareness, Exploration and Skill Preparation levels.

Home economics education programs may be conducted in elementary, junior high, comprehensive or specialized secondary schools, area vocational-technical schools, junior or community colleges or universities offering terminal or associate degree programs, and community centers.

BEST COPY AVAILABLE

The term "home economics education programs" used throughout this material refers to all programs offered which are based on the content embodied in the conceptual structure. (See Chapter III) This includes both types of programs whether they are designed for consumer and homemaking or occupational home economics. The conceptual structure of home economics education in Arizona identifies the five basic content areas as shown in the diagram below which has been adapted from Concepts and Generalizations¹ developed under the leadership of the U. S. Office of Education:

CONCEPTUAL STRUCTURE OF HOME ECONOMICS EDUCATION

The definitions of the two types of programs are as follows: (1) Consumer and homemaking programs are designed to help individuals and families improve home environments and the quality of personal and family life, and includes instruction in food and nutrition, child development, clothing, housing, family relations and management of resources with emphasis on selection, use and care of goods and services, budgeting, and other consumer responsibilities. (2) Occupational home economics programs are designed to prepare persons for gainful employment in recognized occupations for which persons normally receive a wage, salary, fee or profit. The knowledge and skills of home economics may be drawn upon to educate students to earn a living in related occupations.

¹ Ibid, page 4.

The administrator planning to initiate or expand a total program for home economics needs to:

- . Determine the groups for whom the program is to be designed;
- . Plan to meet the needs of the maximum number of girls and boys, men and women;
- . Understand the types of programs which are possible;
- . Consider the type of programs to be offered at instructional levels involved;
- . Select the types of programs best suited to meet the needs of students;
- . Arrange the scope and sequence of program offerings to assure emphasis in desired phase or in all phases, and continuity of learnings to assure learnings from K - 14; (See Chapter III)
- . Provide a guidance program which interprets the opportunities in home economics education; and
- . Consider and recognize the value of organized youth groups such as the Future Homemakers of America (FHA) and home economics related occupations (HERO Club) as an integral part of the program.

The chart which follows shows the characteristics of the two types of home economics programs. Even though consumer and homemaking as well as the occupational program content draw from the same conceptual structure, the student's objectives differ considerably for the two types of programs.

HOME ECONOMICS PROGRAM CHARACTERISTICS

CONSUMER & HOMEMAKING OCCUPATIONAL

LEVELS OF HOME ECONOMICS PROGRAM OFFERINGS

The two distinct phases of home economics (see chart in Chapter I) may contribute to each individual's development as he strives to achieve self-identity in his progression through the educational system. Varied program offerings from preschool through adult levels serve these purposes:

- . Prepare youth and adults for home and family living in a consuming society;
- . Prepare some youth and adults for employment in home economics related occupations; and
- . Plan articulation in the career development concept.

The following descriptions of offerings at various educational levels give ideas and suggestions for integrating or emphasizing home economics:

| NURSERY SCHOOL - PRESCHOOL - CHILD CARE CENTER | | |
|--|--|-----------------------------------|
| CONSUMER AND HOMEMAKING | Nursery schools and preschools operate as a part of the home economics program in many Arizona high schools and colleges. Their purposes are to provide experiences for students studying child development, family relationships, and child care, to understand behavior and care of younger children. Recent federal legislation indicates this may become one of the fastest growing emerging occupational areas. | OCCUPATIONAL HOME ECONOMICS |

This level serves as a laboratory for students in secondary, post-secondary, and adult home economics programs. Students enrolled in such programs not only learn to give their own children better care but gain knowledge, understanding, and skill by which they can earn a living as a child development worker, child care assistant, elementary teacher's aide, special needs aide, child development professional, and other related occupations. Other related occupations include such fields as food service, institutional care, and merchandising.

| ELEMENTARY SCHOOL (K-6) | | |
|-------------------------------|---|-----------------------------------|
| CONSUMER AND HOMEMAKING | The home economics teacher serves as a consultant and does team teaching in the elementary classrooms. Advanced high school students may conduct special projects in teaching simple skills and learnings. Some schools schedule classes in basic elementary home economics | OCCUPATIONAL HOME ECONOMICS |

Home economics education has value as an integrated part in the lower or elementary school curriculum. Curriculum materials related to home life experiences may function effectively in the development of career education units of work. Contributions may be made to social studies units centering about home life, food, clothing, family customs, the community, frontier life, and world cultures.

Several ways in which home economics education may contribute to the enrichment of the elementary program are:

- . The regular home economics teacher may work through conferences with the elementary teachers on ways to integrate home economics with everyday living;
- . Children may go to the home economics department for classes, or the teacher of home economics may develop units in family living in the elementary classroom;
- . Home economics curriculum guidelines are being released to assist home economics teachers in working with the elementary level; and
- . A full-time coordinator of home economics education may devote a portion of her time to working with the teachers to integrate home economics or family living with the elementary program.

| UPPER ELEMENTARY (7-8) - MIDDLE SCHOOL (6-8) OR JUNIOR HIGH SCHOOL (7-9) | | |
|--|--|-----------------------------------|
| CONSUMER AND HOMEMAKING | The suggested conceptual structure and objectives for each level in the curriculum guides are designed to be adapted to the needs of local districts. The curriculum materials developed for use in the state are based on developmental characteristics of youth. Learning activities for this level are identified as "BEGINNING" in the curriculum guidelines. Materials are designed to be adapted for use by LEA's. | OCCUPATIONAL HOME ECONOMICS |

BEST COPY AVAILABLE

The middle school is changing what has traditionally been known as the upper elementary or junior high school. Reorganization of this segment of the educational structure will bring about decided changes in curriculum offerings since younger and less mature students will be enrolled. Programs may follow the Scope and Sequence Chart in Chapter III. Emphasis at this level is exploratory and should include broad offerings to meet the needs of adolescents. Such phases of home economics as personal development, decision-making, consumer buying, and simple homemaking skills are recommended.

| SECONDARY | | |
|-------------------------|---|-----------------------------|
| CONSUMER AND HOMEMAKING | Program content is based on the needs of students and provides for guided electives, homemaking, pre-professional subject matter courses, and home economics related occupations courses. | OCCUPATIONAL HOME ECONOMICS |

The home economics education program offerings for the high school are designed to meet the needs of the following groups:

- . Pupils planning to enter college in the field of home economics or related fields
- . Pupils planning to enter college in other fields
- . Pupils whose major concern in life will be homemaking
- . Pupils becoming homemakers as well as wage-earners upon completing formal education
- . Pupils planning to enter the world of work in jobs using the knowledge and skills of home economics
- . Pupils with academic, socio-economic or other handicaps that prevent them from succeeding in the regular vocational home economics education program

Four types of home economics education programs suggested for senior high schools are:

- Guided Electives in Home Economics
- Consumer and Homemaking (Comprehensive)
- Home Economics Related Occupations
- Home Economics for Pupils with Special Needs

See Chapter III for the detailed explanation.

| POST SECONDARY | | |
|--------------------------|---|-----------------------------|
| CONSUMER AND HOME MAKING | Terminal education in such areas as child care supervisors, food service supervisors, food service workers, fashion merchandisers and designers, and household equipment and food demonstrators. Learning activities for this level are identified as "Advanced" in the curriculum guides. See chart <u>Home Economics - the Basis for Two Types of Programs.</u> | OCCUPATIONAL HOME ECONOMICS |

Home economics education may be offered in the junior or community college or in the associate degree program of a university. Specialized programs in the area of family living are especially suited as offerings in these situations. New programs in middle management level occupations related to the knowledge and skills of home economics are appropriate for terminal education as one or two-year programs. Some examples of these are: Food service supervisor, assistant to dietitian, assistant to nursery school or day care center director, and teacher aides, etc. (See Career Ladders in Appendix C.) Many of these programs could be planned so that students would be eligible for an associate degree.

Three alternative types of programs make it possible for a student to complete a:

- Two-year associate degree program
- . One-year or less certificate program
- . Two-year transfer program

Cooperative education or an approved simulated work experience is an integral part of occupational programs at this level.

BEST COPY AVAILABLE

These programs are structured for flexibility and adaptability:

- . Each plan may be used in sequence or in combination;
- . Specialization with greater depth in one interest area may be made available for students beyond the regular schedule of classes;
- . All four plans are eligible for reimbursement from vocational funds when the minimum requirements are met as established in the State Plan for Vocational Education and in compliance with Department of Education regulations;
- . Occupational home economics courses may be established as a sequence including skill preparation and cooperative education courses;
- . Home economics courses may be offered under the provisions of the area school concept; and
- . For students with special learning needs, programs are possible in both occupational and consumer and homemaking phases.

| ADULT - OUT-OF-SCHOOL YOUTH | | |
|-------------------------------|--|-----------------------------------|
| CONSUMER AND HOMEMAKING | Short term courses may be offered for young adults based on the needs of beginning families, also for senior citizens in creative activities and for others interested in the development of skills in areas related to home economics. These may be part time employment or as a leisure time activity. | OCCUPATIONAL HOME ECONOMICS |

A variety of home economics programs may be provided for out-of-school youth and adults. Such programs may include courses which prepare for the responsibilities and activities involved in homemaking and in achieving family well being. In some communities provision needs to be made for instructional programs which prepare for successful entry into occupations using the knowledge and skills of home economics. (See chart Home Economics - the Basis for Two Types of Programs.)

All home economics programs for adults or out-of-school youth which qualify may be reimbursed from vocational funds. Any district planning to initiate such a program submits a Vocational Adult Application Form for approval.

The chart, Home Economics - the Basis for Two Types of Programs illustrates the potential offerings in home economics education.

The center portion of the chart shows the organization of the areas in the conceptual structure as the basis for both programs in home economics.

On the left-hand side, the "Concepts" column of the chart shows examples of the multiplicity of concepts as related to consumer and homemaking.

On the right-hand side, the "Careers" column of the chart deals with the home economics related occupations which may serve as the basis of course offerings.

The two columns identified as "Funding Provisions" show that home economics programs may be funded in a variety of ways.

PROVISIONS
PROVISIONS

Administrators interested in having either the consumer and homemaking education or occupational programs funded must have on file an application to operate such a program which has been approved by the Division of Vocational Education. In order to be eligible for funding, minimum requirements need to be met as follows:

CONDITIONS PERTAINING TO THE APPROVAL OF HOME ECONOMICS EDUCATION PROGRAMS

Consumer and Homemaking Education

1. New Programs

A new program may be approved by the Division of Vocational Education when the application form #103 or #104 indicates

- . There is a need for the program;
- . Adequate learning centers are provided;
- . The program plans are developed in accordance with regulations of the Department of Education, Division of Vocational Education, and the State Board of Vocational Education.

2. Continuing Approval

Continuing approval to operate consumer and homemaking programs will be given from year to year when the following criteria are met by the local school district:

- . Facilities are provided which meet the minimum standards for a quality program to be offered;
- . Adequate funds are budgeted for equipment, supplies, and travel for conducting the program;
- . Current teaching materials and references are available;
- . Equipment is maintained in good condition and is replaced when wear or obsolescence reduce its educational value;

BEST COPY AVAILABLE

- . Consumer education is a part of all courses offered;
 - . Properly qualified and certificated teachers are provided;
 - . The quality and methods of instruction fulfill the needs of the students of the community;
 - . Preparation for the dual-role of homemaker and wage earner is a part of the curriculum;
 - . The equivalent of at least one period daily is scheduled for the teacher to use for planning and conferences with students, parents and community agencies; and
 - . Average daily membership is ten (10) or more.
3. Direction and Supervision
- . All programs will be accountable and under the supervision of the State Division of Vocational Education.
 - . Courses shall carry credit and be accepted toward fulfillment of program requirements. At the secondary level a unit of credit shall be given on the same basis as for any major subject.
 - . Programs of varying lengths may be developed provided objectives and activities have been approved by the Division of Vocational Education.
4. Additional Recommendations
- . Teachers may be employed beyond the regular school term for making home contacts and doing follow-up work of enrollees, and conducting summer classes.
 - . An advisory committee will be composed of representatives of the community.
 - . A chapter of Future Homemakers of America will be organized and maintained as an integral part of the program.

1. Program Development and Approval

A new program may be approved by the Division of Vocational Education when the application forms #100, #101, or #102 indicates:

- . There is a need for a program.
- . Adequate learning centers are provided. (See Chapter IV)
- . The program plans are developed in accordance with regulations of the Department of Education, Division of Vocational Education, and the State Board of Vocational Education.
- . Home economics occupational programs operate and are funded on the same basis as other vocational areas. (See Home Economics O.E. Instructional Program Code Chart and Home Economics Funding Information Chart.)

2. Continuing Approval

Continuing approval of home economics related occupations programs is on a yearly basis using the following criteria:

- . Curriculum is based on sequential development of skills as necessary for specific occupations;
- . Advisory committee is organized and functions for program direction;
- . Cooperative education programs meet standards as established by the State Division of Vocational Education;
- . Instructor must be properly certified to teach the occupational phase;
- . Opportunities for work experience are provided through cooperative education or simulated work experiences;
- . Extended teacher time and travel will be budgeted;
- . Up-to-date references, materials and supplies will be available;
- . Evaluation will be an integral part of the program and based upon the objectives; and
- . HERO Club is integrated with the instructional program.

3. Guidelines for Planning and Developing Occupational Programs

The local school administrator and members of his staff interested in initiating a home economics related occupations program may find the following suggested procedures helpful:

- . Become acquainted with local employment needs, through the Bureau of Employment Security, business organizations, and lay leaders.
- . Organize a local advisory committee.
- . Develop a job analysis, identifying the functions the course will serve and define the responsibilities of the job so the content will be relevant.
- . Develop a curriculum specifically for a certain occupation and to meet local needs by identifying the goals and anticipated learnings;
- . Carefully plan the learning experiences to be challenging but practical.
- . Make arrangements to use available resources pertinent to the training for the specific occupations being learned.
- . Plan for the length of the course, considering prerequisites and follow-up.
- . Consider the qualifications necessary for the teacher.
- . Survey present school facilities for space and then plan for additional equipment.
- . Estimate the cost of the course and plan the budget.
- . Select students on the basis of interests, abilities, and attitudes.
- . Arrange for an actual work experience with business, industry, or institutions outside the school, considering hours, working arrangements, supervision, insurance, and other problems which may develop in cooperative work programs.
- . Establish criteria for determining when a student has developed to a place that the teacher or supervisor would consider recommending him for employment.
- . Organize a plan for follow-up of students to determine the effectiveness of the program.
- . Plan for a sound public relations program.

Reinwald, Clio. The Bulletin of the National Association of Secondary School Principals--A NEW LOOK AT HOME ECONOMICS - EDUCATION FOR EMPLOYMENT. Volume 48, Number 296, December 1964.

ACCOUNTABILITY

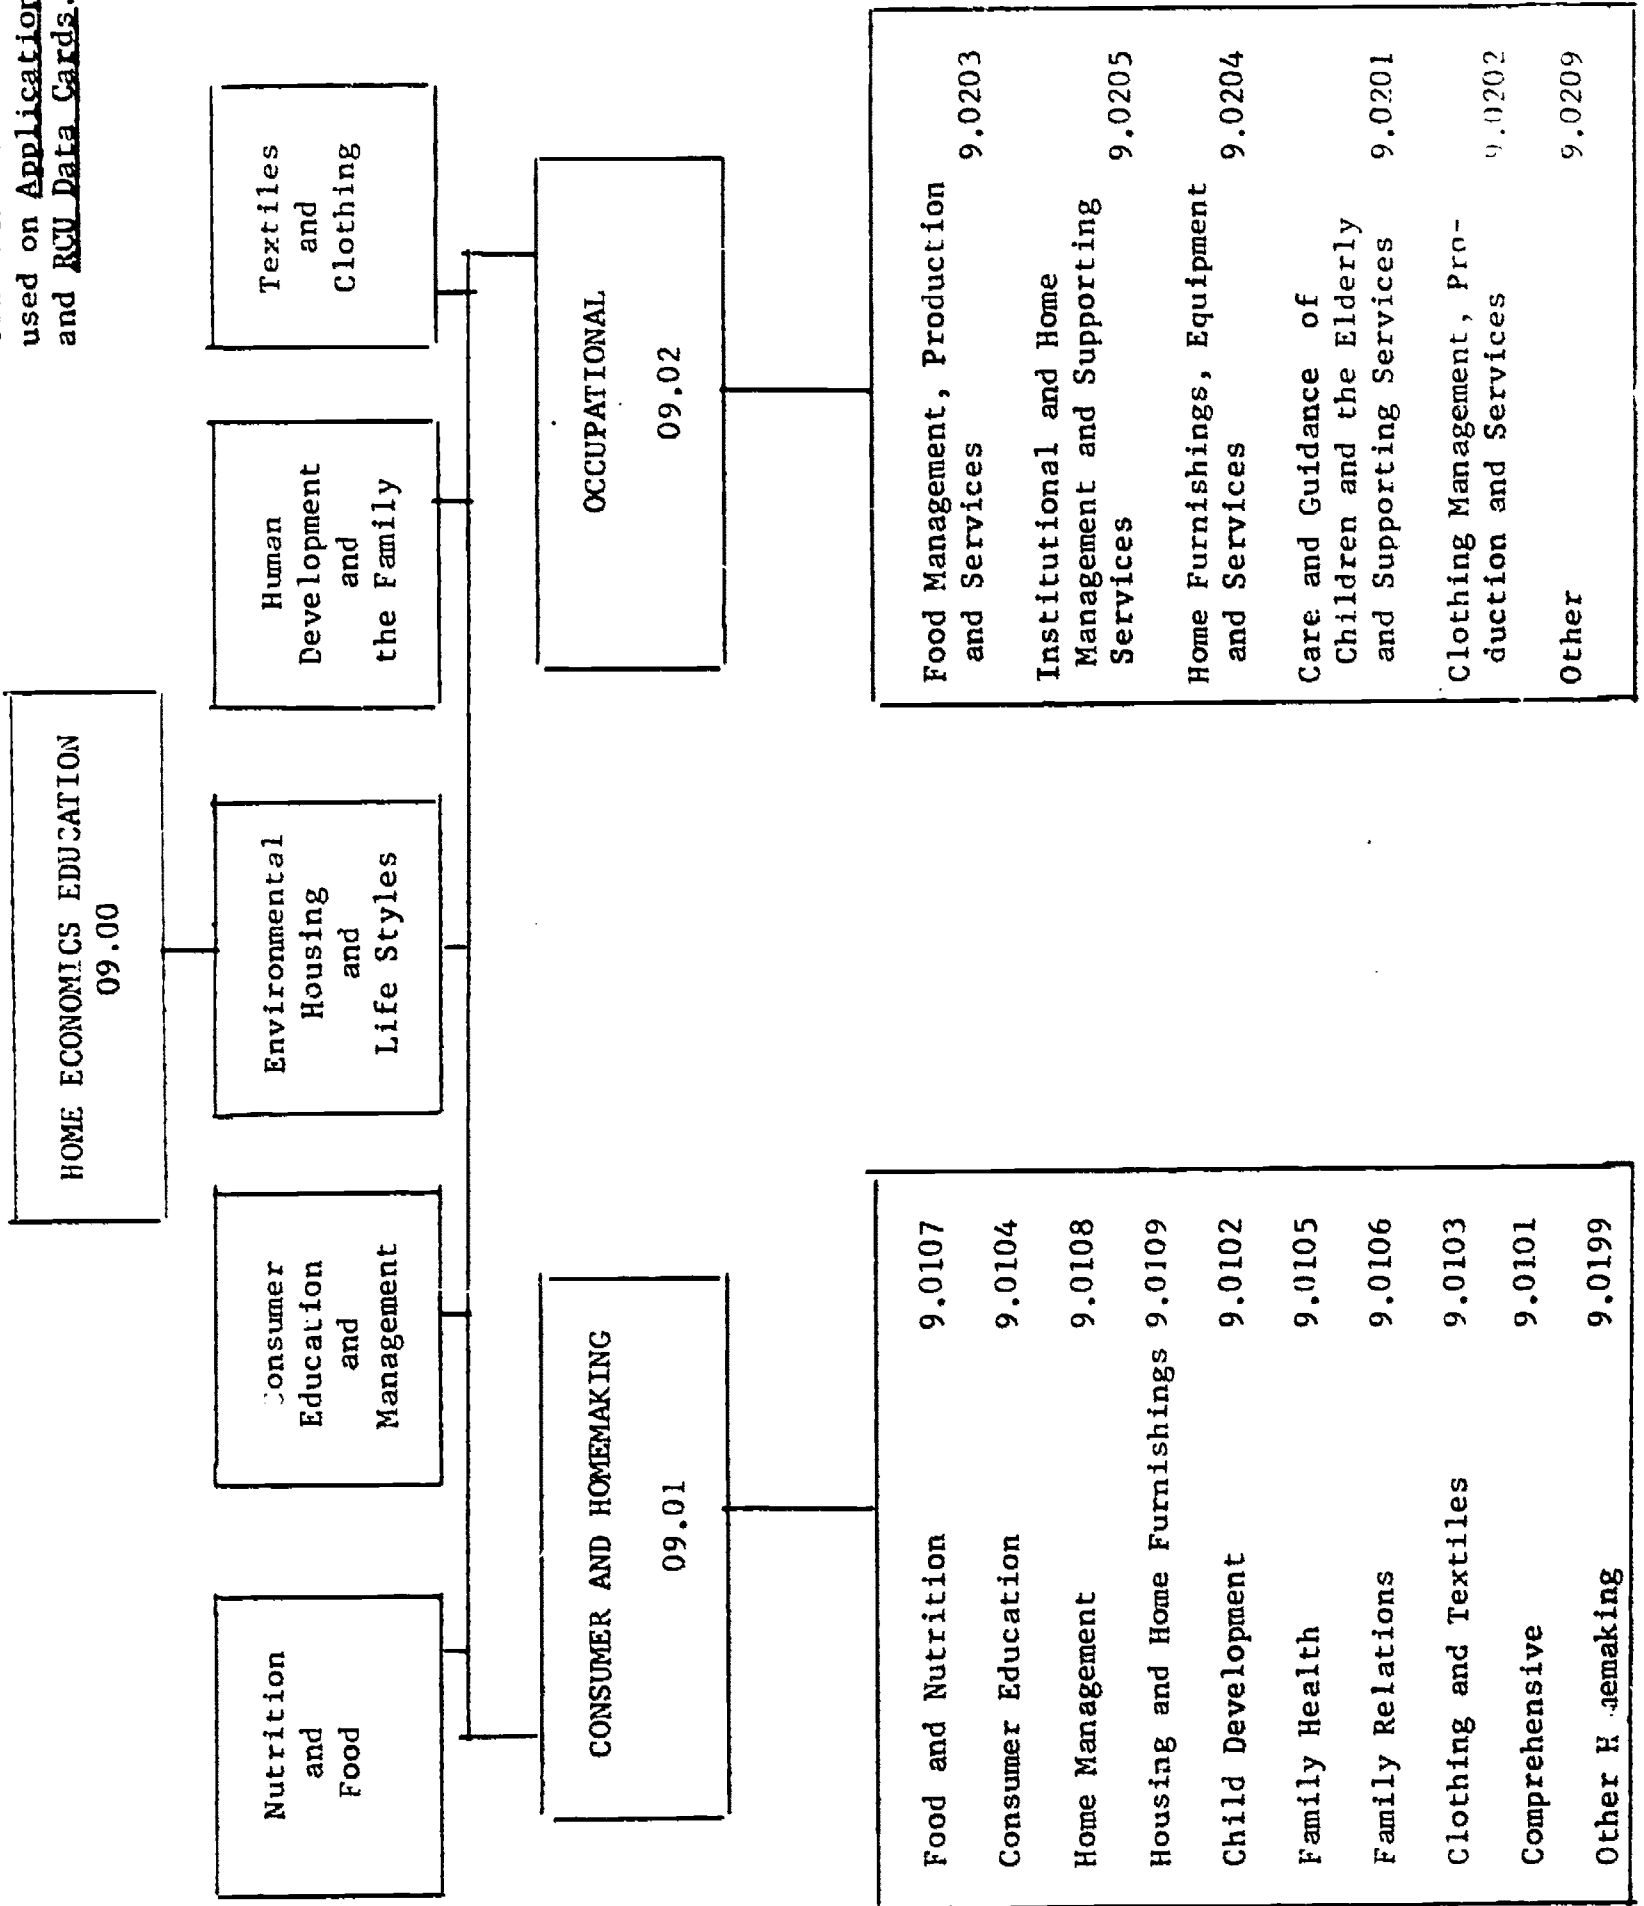

The L.E.A. will be responsible for the following:

- . Application has been submitted and approved before initiation of program;
- . Data records and forms requested by the Division of Vocational Education and the Research Coordinating Unit will be accurately completed and returned by deadline dates;
- . Records will be kept on file of any equipment purchased with Division of Vocational Education funds;
- . L.E.A. has evidence that measurable objectives for the program have been achieved; and
- . Supporting information and data must be on file for any claims submitted to the Division comptroller.

The charts which follow are designed for the convenience of the L.E.A. in completing report forms. The information includes code numbers for programs, classes and students to be used in completing the R.C.U. data cards and forms.

CHAPTER III

Curriculum in Transition

"The American....school curriculum is in transition, and it is necessary to see it as a moving force with a past, a present, and a future."¹

Curriculum planners and developers need to ask themselves many questions, some of which might be:

Are learning experiences compatible with objectives?

Does the instructional program stimulate student inquiry and interest?

Do objectives provide for articulation within the total home economics program as well as with other disciplines?

Are alternative learning experiences provided to meet the needs of varied learning abilities, cultures, economic levels, and geographical settings?

Does it provide for exploration as well as in-depth study?

Does curriculum provide experiences which lead to the development of decision-making capabilities?

Is there provision for an individual to learn to appreciate himself as well as others and to live and work cooperatively in our society?

Do real-life experiences add meaning to the instructional program?

In 1961, the Home Economics Education Branch of the U. S. Office of Education initiated a nationwide project to re-examine home economics in the secondary schools. Extensive and intensive work on the part of classroom teachers, supervisors, school administrators, teacher educators, and subject matter specialists brought about the identification of basic concepts in the home economics field. This conceptual structure defines the content and serves as the basic source for developing the emerging curriculum in home economics in the next decade.

Arizona has modified this conceptual structure in the following manner:

| <u>National Model</u> | <u>Arizona's Titles</u> |
|--------------------------------------|---------------------------------------|
| Human Development and the Family | Human Development and the Family |
| Home Management and Family Economics | Consumer Education and Management |
| Food and Nutrition | Nutrition and Food |
| Housing | Environmental Housing and Life Styles |
| Textiles and Clothing | Textiles and Clothing |

¹Wiles, Kimball. The Changing Curriculum of the American High School. Prentice-Hall, Inc., Englewood Cliffs, N. J. 1963.

BEST COPY AVAILABLE

These major concepts become the five content areas for home economics curriculum. A curriculum guide for each of these areas has been developed or is in the process of being revised.

In each of the five areas, the conceptual structure is supported by generalizations which define content, principles, and methods of inquiry. Briefly, the skeletal structure as developed in a nationwide project by the U. S. Office of Education is:

HUMAN DEVELOPMENT AND THE FAMILY²

- I. Universality of individuals and families
- II. Uniqueness of individuals and families
- III. Development and socialization of the individual
- IV. Challenge and creative possibilities of change

HOME MANAGEMENT AND FAMILY ECONOMICS

- I. Environmental influence on individual and family management
- II. Managerial processes
- III. Effective elements in management

FOODS AND NUTRITION

- I. Significance of food
- II. Nature of food
- III. Provision of food

TEXTILES AND CLOTHING

- I. Significance of textiles and clothing to the individual in society
- II. Nature of textiles and clothing
- III. Acquisition and use of textiles and clothing

HOUSING

- I. Influence of housing on people
- II. Factors influencing the form and use of housing
- III. Processes in providing housing

²American Home Economics Association. Concepts and Generalizations. Washington, D. C. 1967.

BEST COPY AVAILABLE

The preceding structure includes only the "big" ideas. The total structure as released will serve to plan for broad courses or for depth courses in both the homemaking and the employment phases of home economics education.

In Arizona, curriculum in home economics education becomes a custom-designed product. The question, "What shall we teach and to what end?" raised in The Process of Education³ is most appropriate in the field of home economics education. Curriculum planners need to consider not only the subject matter content, but the content of other disciplines as well as to the place and contribution which home economics education may make in the total educational program of the school, home, and community. And most importantly, what happens to students enrolled in the program, is it meeting their needs?

As one considers the relationship of home economics education toward achieving the nine Imperatives of Education, as stated by the Educational Policies Commission of the NEA, one finds the possible contributions to each to be of some magnitude. They are as follows:

- 'Make urban life rewarding and satisfying
- Prepare people for the world of work
- Discover and nurture creative talent
- Strengthen the moral fabric of society
- Deal constructively with psychological tensions
- Keep democracy working
- Make intelligent use of natural resources
- Make the best use of leisure time
- Work with other peoples of the world for human betterment"⁴

As administrators, supervisors, teachers, guidance counselors, lay advisers, and others interested in curriculum development in this discipline, examine current programs in light of the contributions presently being made and in terms of new commitments to be made, decisions concerning curriculum come into focus.

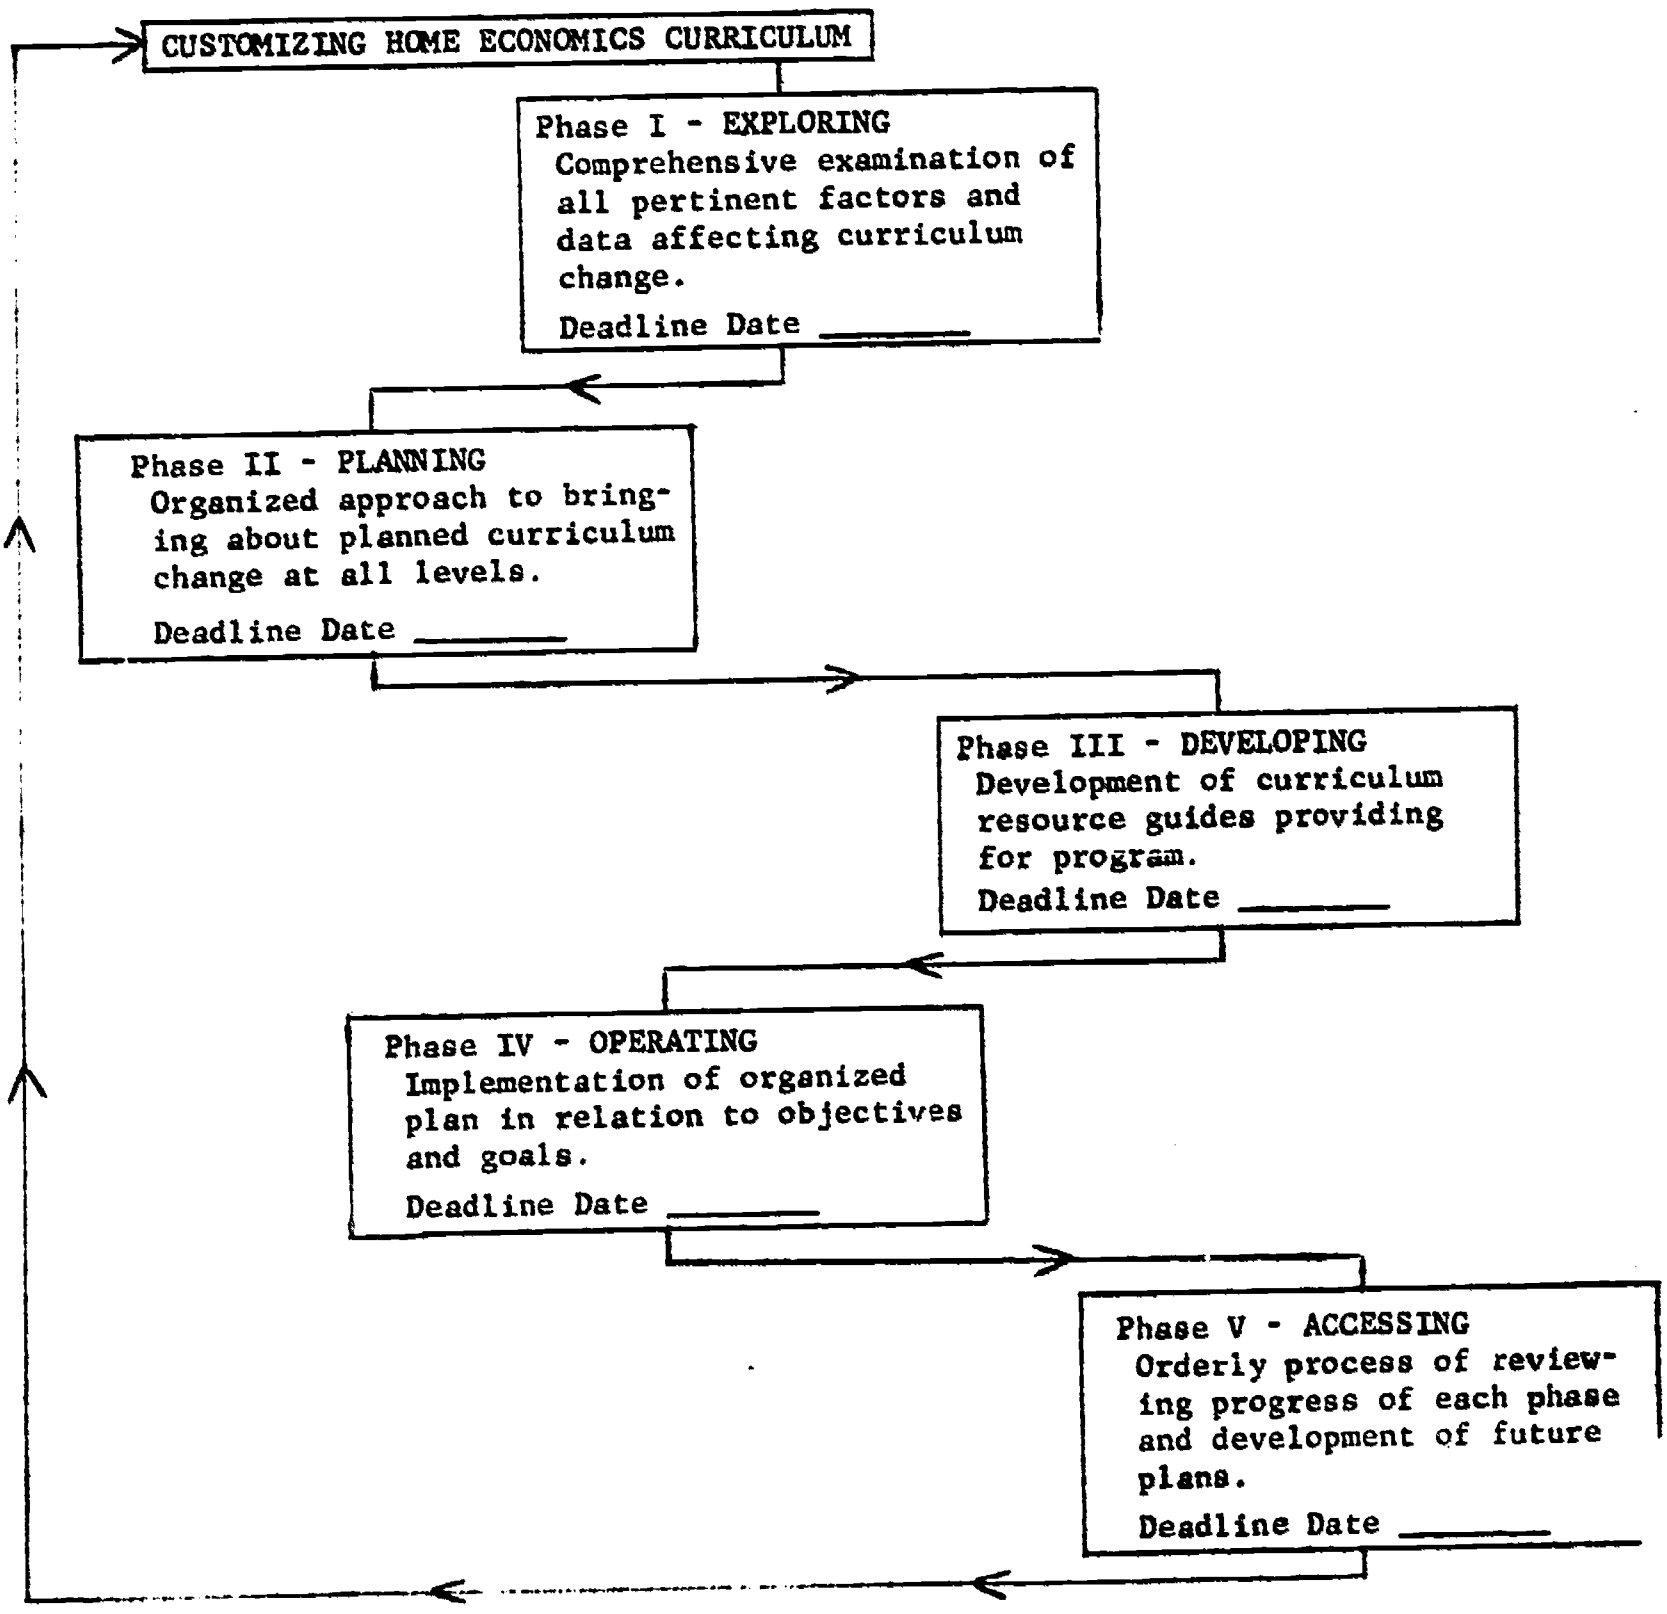

³Bruner, Jerome S. The Process of Education. Harvard University Press, Cambridge, Massachusetts. 1960.

GUIDELINES FOR CURRICULUM DEVELOPMENT AND IMPLEMENTATION

"In approaching curriculum improvement in any school, it is important to recognize that changes should be made in terms of the needs of that particular community and the inadequacy of the present program in meeting those needs."¹ How can curriculum facilitators best move to resolve the discrepancy between the rate of technological change and society as it relates to the home economics programs in the school community? Modern technology applied to development of curriculum in terms of adapting a system's approach, provides the needed vehicle for improving home economics curriculum in the local school district.

Local curriculum change agents may find the following five phases helpful in organizing a system's approach to:

BEST COPY AVAILABLE

Curriculum development is facilitated when those who are to participate have reached a state of readiness and recognize the need for change.

- . Initiate a self-evaluation of the present program. Leadership for this process may need to be provided by outside advisers or consultants.
- . Arrange field trips to new and different type programs.
- . Encourage staff to enroll in curriculum and evaluation courses.
- . Provide time and expense money for staff members to attend conferences sponsored by organizations concerned with the improvement of curriculum.
- . Provide time and expense money for teacher to work with state staff and appropriate teacher educators in program and curriculum development.

An understanding of community needs and resources is basic to curriculum development.

- . Establish a steering committee representing the community.
- . Conduct community surveys to provide needed data.
- . Survey graduates to determine what learning experiences should have been offered for present roles.
- . Encourage staff to become acquainted with community needs and resources.
- . Interview a sampling of student body for reaction to new and recent offerings.

An understanding of the basic concerns of youth (and adults) is basic to curriculum development.

- . Project competencies needed by students in 5 years.
- . Recognize individual differences and needs of people in their search for self identity.
- . Involve guidance in identifying the basic concerns of local youth.

BEST COPY AVAILABLE

Competent leadership is essential for successful curriculum development.

- . Identify individual as leader for curriculum development.
- . Involve all members of the local home economics staff.
- . Provide outside leadership if local leadership is inadequate.
- . Include participation in career education projects, district curriculum development, and state level curriculum projects and meetings.
- . Plan for longitudinal and lateral articulation.

Curriculum development is a continuous process which provides for evaluation and revision.

- . Develop both long-range and short-range goals in curriculum development.
- . Plan for a continuous integration of planning, evaluating, and revising.
- . Emphasize the ever-evolving nature of curriculum.

Curriculum development requires adequate time and resources.

- . Provide time in the teachers' annual schedule for curriculum work.
- . Provide money in the budget for resources.
- . Provide secretarial assistance for recording and editing material prepared by staff members.
- . Provide, if needed, consultant services.

Curriculum development is more successful when the participants have achieved a certain degree of concurrence regarding educational beliefs and practices.

- . Plan experiences which assist teachers to clarify self-understanding of their beliefs.
- . Assist teachers to be more articulate concerning their beliefs.
- . Stress points of agreement.
- . Make use of the techniques of group dynamics in clarifying curriculum.

BEST COPY AVAILABLE

Curriculum designed with student oriented objectives and learning activities geared to different levels provides the basis for content selection, as well as assessment of student progress and teacher success.

- . Select objectives based on the needs of local students.
- . Design or select learning activities appropriate to individual student needs.
- . Use objectives as the basis for evaluating student progress.
- . Evaluate teacher success in terms of teacher progress.

The phases of career education can make a sizable contribution to the total home economics curricula plans and goals.

- . Identify the commonality factors between home economics and career education.
- . Identify objectives in light of overall home economics goals for development of career activities.
- . Participate in area and district career education projects.

Youth group organization activities are a planned, integrated part of the instructional curriculum.

- . Relate activities to instructional program objectives.
- . Involve students in planning organization programs, and where appropriate, parents, employers, and other interested adults.
- . Provide activities which contribute to individual goals and growth.

State curriculum guides, in-service small group meetings, and Teacher's Idea Exchange provide ready resources for local districts to customize home economics curricula.

- . Explore all available resources such as curriculum guides, new books, and media.
- . Participate and become involved in the statewide curriculum developmental process.
- . Make contributions to Teacher's Idea Exchange.
- . Be selective and imaginative in adaptation and incorporation of ideas into local curriculum.

SUMMARY:

Customized curriculum in a local district is designed to provide a comprehensive home economics program from the Orientation, to Beginning, to Intermediate and Advanced Levels of Concepts in all five content areas for that special locale.

LEVELS FOR CURRICULUM DESIGN

In the Arizona curriculum guides the structure includes topical outline, objectives, conceptual statements, and learning experiences. The topical outline or conceptual structure for each subject matter area provides a source of concepts for planning at all learning levels. Adaptation of some objectives and learning experiences make it possible to develop courses to meet the needs of all ages, abilities and interests. This framework also provides for articulation of individualized instruction.

The levels for curriculum design as used in this material are:

Orientation

The orientation level curriculum includes concepts and objectives which are utilized at the elementary level by various subject matter areas. Concepts are not organized into a total home economics program. Units are introductory in nature providing a first exposure to home economics content.

Beginning

A broad exploration of the total home economics program is provided at the beginning level. Basic concepts in each of the five content areas serve as a foundation for future courses.

Intermediate

Courses at this level provide greater depth within a specified content area, and are built upon preceding units or classes. This level is designed to prepare students sufficiently so that they may fulfill their role in this area successfully.

Advanced

Special courses designed for specific individual interests and needs are offered at this level. Concepts are complicated with far-reaching implications. Practical application of concepts is also stressed.

The chart PLANNING FOR A COMPREHENSIVE HOME ECONOMICS PROGRAM which follows, is designed to give a quick and easy review of concepts in all five areas organized to show the continuum from K through adulthood.

RELATIONSHIP OF HOME ECONOMICS TO CAREER EDUCATION

"Career education," as defined by the U. S. Office of Education, "is the total effort of public education and the community aimed at helping all individuals to become familiar with the values of a work-oriented society, to integrate their values into their personal value systems, and to implement these values in their lives in such a way that work becomes possible, meaningful and satisfying to each individual."¹

*Adapted from Career Education: A Handbook for Implementation

Home economics has a two-fold contribution to make in career education curriculum, first as consumer and homemaking education, and secondly as vocational preparation. The diagram, modified from Career Education, A Handbook for Implementation, shows the relationship of home economics to career education. Consumer and homemaking education has long used the career education themes-- self-awareness, economic awareness, decision-making, attitudes and appreciation as the basis for subject matter areas in consumer education, individual and home management, and human development and the family. Recently, with the

¹ U. S. Office of Education, Career Education, A Handbook for Implementation, p. 8. U. S. Government Printing Office, 1972.

addition of occupational home economics, the preparation phase of career education has been implemented. However, further clarification of career education themes in the home economics programs must be established before an articulated effort toward preparation for careers by all individuals can be accomplished.

The Developmental Program Goals for the Comprehensive Career Education Models, Ohio State University, Center for Vocational and Technical Education, recognizes the following themes as the basis on which to develop goals and objectives for career education:

| | |
|-----------------------|----------------------------|
| Self Awareness | Economic Awareness |
| Educational Awareness | Beginning Competency |
| Career Awareness | Employability Skills |
| Decision Making | Attitudes and Appreciation |

Furthermore, the U. S. Office of Education has identified occupations in fifteen clusters as follows:

- Consumer and Homemaking-Related Occupations
- Business and Office Occupations
- Marketing and Distribution Occupations
- Communications and Media Occupations
- Construction Occupations
- Manufacturing Occupations
- Transportation Occupations
- Agri-Business and Natural Resources Occupations
- Marine Science Occupations
- Environmental Control Occupations
- Public Services Occupations
- Health Occupations
- Hospitality and Recreation Occupations
- Personal Services Occupations
- Fine Arts and Humanities Occupations

Together, the themes and clusters provide home economists with the tools needed to assist individuals in becoming self-fulfilled persons reaching the maximum of their potential in pursuing lifetime careers.

The chart, "Relationship of Home Economics to Career Education" illustrates the concepts of career education in relation to the content areas of home economics and learning levels. Outcomes relate to the various careers in home economics as established in the Career Ladders for Home Economics, Appendix C. Concepts identified in the matrix relate to the themes identified and goals established by the Comprehensive Career Education Models and the Technical Education Center for Vocational Education.

| | | K-6 | BEGINNING |
|--|-------------------------|--|--|
| CONTENT AREAS | DIVISION | CAREER AWARENESS | BROAD CAREER EXPLORATION |
| NUTRITION AND FOOD | CONSUMER AND HOMEMAKING | Recognizes relationship of food to feeling of well being and health Becomes aware of relationship of health and work Recognizes general careers associated with food and nutrition | Explores broadly skills required from food management, production, and services Explores types of jobs making up food and nutrition cluster - occupational requirements - educational requirements - career rewards - life styles |

Home Economics has two youth organizations. They are (1) Future Homemakers of America related to consumer and homemaking, and (2) HERO Club for home economics related occupations.

Arizona HERO Club

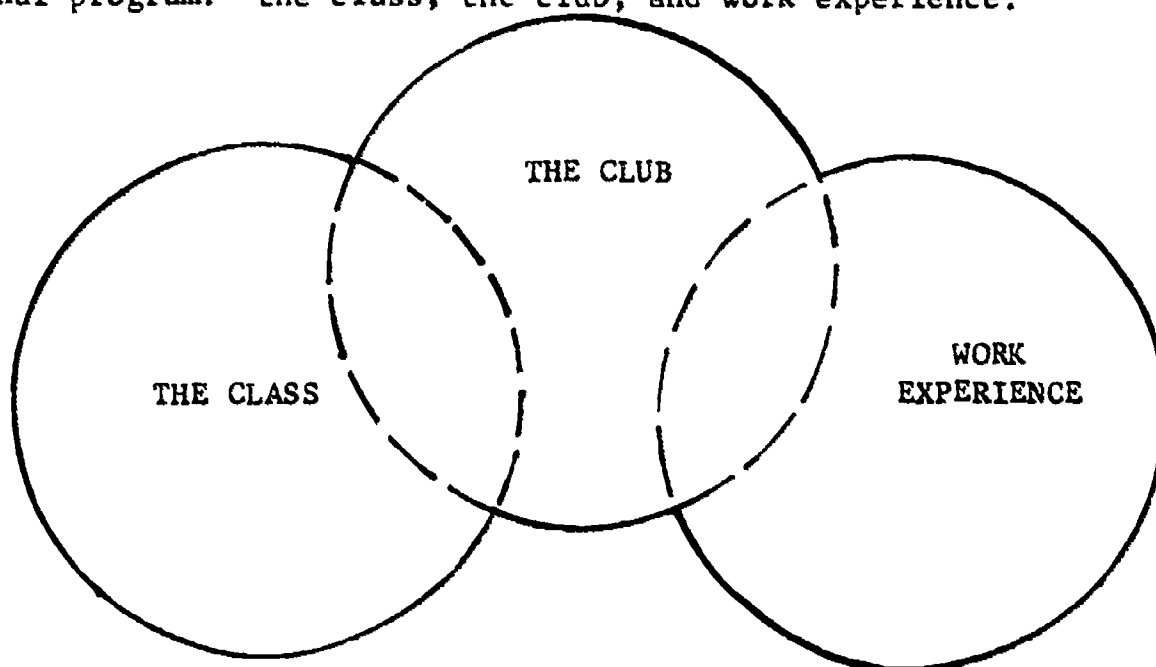

The Arizona HERO Club was organized during the 1971-72 year for students in home economics related occupations courses. Local, state, and national affiliations are possible. It is a co-curricular organization which further develops skills and attitudes necessary for career goals as well as providing opportunities for community involvement with professionals, para-professionals and business people.

Activities should relate directly to the course and training plan objective.

Goals to be emphasized include:

- Development of leadership ability in individuals
- Development of effective public relations
- Encouragement of para-professional activities with trade and professional organizations
- Further development of skills and attitudes necessary for career success

The club itself represents one of the three integral parts of the total occupational program: the class, the club, and work experience.

Each works as a member of the team to assist the individual toward his career goals.

"FHA has strengthened for me the aspect of homemaking one cannot learn in a class. As a member, I have learned leadership, appreciation of individual worth, how to organize and how to get along with others. This organization has made me realize the importance of good relations and communications in the family."¹

These words by an FHA member illustrate the contribution that Future Homemakers of America makes to the Consumer and Homemaking program. Since its inception in 1945, FHA has been an integral part of the home economics curriculum, providing a means to extend and expand classroom instruction.

A Future Homemakers of America chapter provides:

- . an opportunity for students to develop leadership abilities through participation in offices and committees at the local, state and national level
- . greater relevancy of classroom instruction through application of learnings in real life situations
- . promotion of self-actualization through achievement of self-selected goals and recognition of accomplishments
- . improved communication and relationships between youth, parents and other community members through joint participation in planning and carrying out chapter activities
- . a means to publicize the home economics program and its contribution to the total education program
- . enrichment of student-teacher relationships through working together in an informal setting
- . increased interest and enthusiasm for the total home economics program as its contribution and value becomes more evident

The FHA chapter program of activities is built upon the needs and interests of students, and is closely related to classroom instruction. In planning chapter activities, in-depth projects which are continuous, home economics related, and attempt to solve actual problems and get real results, need to be developed. Activities of several types--service, educational, social and business--are needed to serve a variety of student interests. Examples of FHA activities related to each of the home economics content areas appear on the accompanying chart.

¹ "It's Happening," PULSE Kit, National Future Homemakers of America, Washington, D. C.

| Content Area | CONCEPTUAL STATEMENTS | OBJECTIVE | FHA ACTIVITY |
|---------------------------------------|--|--|---|
| NUTRITION AND FOOD | When the responsibility for adequate nutrition is accepted by the individual, family and the community, a contribution to health and wellbeing is made. (1.45 - Nutrition and Food working papers) | <p>APPLICATION The student applies information about food assistance programs to help individuals and/or families obtain needed food.</p> | Students hear resource speakers or use reference to find out about food assistance programs. Students develop project to help residents who are eligible, such as providing transportation for grocery shopping, helping incapacitated people apply for stamps, conducting educational programs on food stamps and nutrition. |
| CONSUMER EDUCATION AND MANAGEMENT | Today's consumer must choose intelligently from the various available credit sources in order to purchase effectively. (Pg. 160 - Consumer Education and Management) | <p>COMPREHENSION The student describes various sources of available credit and the type suited to individual and family needs.</p> | A representative of a bank or other authority presents a talk at a chapter meeting on the advantages and dangers of credit and installment buying. Invite parents to attend the meeting. |
| ENVIRONMENTAL HOUSING AND LIFE STYLES | When one recognizes available resources, this may tend to encourage improvement in areas where housing fails to meet the needs of individuals. (Pg. 76 - Environmental Housing and Life Styles) | <p>APPLICATION The student is able to use available resources to improve housing situation for himself or others.</p> | Chapter adviser or resource person displays items which improved a housing situation. E.G., dried flower arrangements, wall hangings, brick and board bookcases, etc. Members suggest other items and develop a project for personal use or volunteer services for community improvement. |
| HUMAN DEVELOPMENT AND THE FAMILY | When one examines a variety of life styles, the contribution home economics education makes to each becomes evident. | <p>COMPREHENSION The student describes various life styles of women and the value of home economics education in each situation.</p> | A panel composed of a full-time homemaker, a married career woman, a single working woman, and a single parent discuss the problems, satisfactions and their feelings about their particular situation at a chapter meeting. Members consider how home economics education would be helpful in each situation. |
| TEXTILES AND CLOTHING | Comparative shopping may aid the consumer in making the best use of his available resources. | <p>ANALYSIS The student analyzes clothing purchases for quality in relation to price.</p> | Members conduct a survey of clothing buying practices in their school; i.e., shoes, sweaters, coats or grooming aids. Summarize findings, evaluate and draw up guidelines to help students in shopping. |

CHAPTER IV

LEARNING CENTERS DESIGNED FOR CONTEMPORARY
HOME ECONOMICS CURRICULUM

Introduction

"Learning Centers" as used in this material refers to functional facilities designed to meet the needs of the emerging curricula in both consumer and homemaking programs and employment programs in occupations related to home economics.

The information provided in this chapter is based on the objectives for home economics as stated in Chapter I. In designing learning centers for local school districts, it will be important to plan and equip facilities to attain these objectives and meet the needs of the local district.

The administrative staff developing plans for the learning center will consult with the home economics staff, advisory committee members and the local and state home economics supervisors. This group will cooperatively establish philosophy and program needs relating to home economics education. The combined efforts of this group will help to develop a functional facility.

The following questions will assist the planning group to determine the type, size, location and arrangement of the facility.

What are the present trends in home economics education?

What community needs affect the course offerings?

What types of home economics programs will be offered? (See Chart)

- . Education for Consumer and Homemaking
- . Education for Employment

What age groups will use the facility?

- . Pre-school pupils
- . Elementary pupils
- . Secondary pupils
- . Out of school youth and adults including elderly
- . Community or other school groups

What special groups will be enrolled in addition to regular classes?

- . Handicapped
- . Disadvantaged

BEST COPY AVAILABLE

What equipment and facilities are needed to teach pupils the emerging curricula?

What equipment and facilities are needed to provide a variety of learning experiences for all age groups to be served?

Development of Functional Facilities

Learning centers provide for the five areas of instruction included in the conceptual structure of home economics. These areas are:

Human Development and the Family

Home Management and Family Economics

Food and Nutrition

Housing and Home Furnishings

Textiles and Clothing

Within each of the above areas, provision must be made for a variety of learning experiences. Special consideration needs to be given to space and equipment required for class discussion, demonstration, experimentation, conference, skill development, and individual study and reference.

With the facility designed around the types of educational experiences which occur in each learning center, it is important that all space and equipment provide for flexibility to meet the new demands in education resulting from the rapid technical and sociological changes. A flexible facility provides the opportunity for many varied learning experiences in the contemporary curriculum. Some ways in which flexibility may be achieved are:

Provide movable room dividers to create areas for individual study, conference, and varied size activities;

Provide equipment and furniture to adapt the room for a variety of learning activities;

Provide mobile storage units which may serve multiple purposes;

Provide accessible storage space for equipment not currently in class use; and

Provide for easy replacement of equipment.

Combination of Learning Centers

The number and type of learning centers within a school is determined by the projected program. There may be a center for each area or combination of areas of instruction within the learning centers depending upon curriculum to be offered, the projected enrollment, and the number of teachers employed. The following are suggested combinations:

Secondary (9-12) and Adult

5 teachers

1. Human Development and the Family
2. Nutrition and Foods
3. Home Management and Family Economics
4. Housing and Home Furnishings
5. Textiles and Clothing

4 teachers

1. Human Development and the Family
2. Home Management and Family Economics - Housing and Home Furnishings
3. Nutrition and Foods
4. Textiles and Clothing

3 teachers

1. Human Development and the Family
2. Home Management and Family Economics - Nutrition and Foods
3. Housing and Home Furnishings - Textiles and Clothing

2 teachers

1. Home Management and Family Economics - Nutrition and Foods
 2. Housing and Home Furnishings - Textiles and Clothing
- Living center used by both teachers for Human Development and the Family

1 teacher

One room to provide for all areas of instruction

Middle School (5-8)

Junior High School (7-9)

Same combinations of learning centers for 1, 2, or 3 teachers as indicated for the secondary and adult level may be employed; however, the exploratory nature of this age group requires a greater variety of learning experiences. A curriculum developed around the project method of teaching necessitates multiple use of each learning center and reduces the number of similar work stations required. Communication with the other practical and fine arts departments promotes the development of the unified arts program.

Elementary School (1-6) or Primary (K-4)

In some instances a homemaking facility is provided but portable equipment may be used in the elementary classroom or all purpose room if a homemaking facility has not been included. Provide storage for equipment and supplies.

Nursery or Pre-school

Use the suggested facility for Human Development and the Family.

BEST COPY AVAILABLE

Factors Affecting the Architectural Design

Learning centers designed by the criteria developed in this material will have space for learning - space that will survive changes in learning as well as changes in teaching techniques.

If the department can be located in a wing with an outside entrance, the department may be closed off from the remainder of the building for adult classes and community uses. Such an arrangement saves the expense of heating and lighting other parts of the building. A separate entrance for the play school does not disturb other areas.

In Arizona, maximum space allotments are determined by the local district and are subject to change. However, it is recommended that at least 1000 square feet be allocated for each learning center. A multiple of this would be the basis for the total space. Program offerings as established by the community planning group may necessitate additional space. Realistic planning for future enrollments and programs may indicate the need to locate the department where expansion can keep the entire facility as a compact unit.

It is generally accepted that the class size for effective learning in home economics varies from 10 to 24 pupils. The number of pupils, the placement and use of equipment and the varied activities during class periods require consideration. Skill development areas may be more effective if even a lesser enrollment is maintained. Ease of supervision of the entire area by the instructor affects arrangement within the learning center. These factors of class size, the number and identification of learning centers and the arrangement of equipment in each center are paramount decisions to be made by the local planning group. The facility can then be designed to meet the established program objectives.

The following factors should be considered in the development of facilities for the home economics department:

Location

A first floor location facilities:

1. delivery for supplies and equipment and removal of waste,
2. accessibility to adults and adult use,
3. accessibility to a safe play area for nursery school,
4. accessibility to utility installations.
5. exterior exit as safety precaution.

Heating, cooling, ventilation and plumbing

Adequate heating, cooling and ventilation must be provided for all possible room arrangements. Where movable walls are used, special consideration must be given to each identifiable area for both heat and ventilation. A temperature of 70° at a 30" height should be maintained for the entire time classes are in session. A relative humidity of 45 percent is recommended.

Type of heating and cooling systems used need to be recessed in the walls, if possible, to permit maximum use of wall space.

BEST COPY AVAILABLE

Ventilation should provide for sufficient air change as determined by each area. Areas of excess grease, steam or fumes may require a separate system. (Kitchen, workroom, powder room, laundry).

Plumbing should be readily accessible for maintenance.

Lighting, electrical outlets and gas supply

Adequate illumination without glare or shadows is essential in all areas. The brightness balance must be related to the range of activities requiring close attention for both day and evening classes.

Areas requiring special lighting are display, demonstration, and special work centers.

Both 220 and 110 electric lines should be available as needed in predetermined locations.

Electrical outlets should be placed on all sides of the room and on work counters to accommodate movable appliances.

Both gas and electricity supplied to all applicable stations permits flexibility in choice of equipment and appliances.

Utility lines must be permanently installed.

Walls and floor finishes

The entire area should receive a harmonious treatment.

The floor and wall finishes should be selected on the basis of maintenance required as well as aesthetic effect desired.

Windows and doors

Fenestration should be planned to provide for its best use of wall space.

Fenestration presents no problem if adequate ventilation and lighting are provided.

Doors should be of adequate size to permit movement of equipment and flow of traffic.

Entrances may be designed to create a homelike atmosphere.

If located on the ground floor, an exit to a court or lawn area facilitates the use of ground as a play area for the nursery school program or for teaching certain phases of the program such as patio cooking and entertaining.

Sound Control

Sound control is necessary when facility planning is developed around the concept of changing room sizes for various activities.

Movable or demountable partitions should have the acoustical properties of fixed, conventional walls.

Storage

Sufficient storage is defined in each selected learning center should be an integral part of the department.

Portable storage units may be considered to increase the use of space.

Additional storage space may increase flexibility in use of space within the department.

Visual Aids

Facility should be so planned that the teacher may be able to use any instructional material or equipment that will make for the best learning experience.

Installation of cables for closed circuit television should be considered.

Supplemental Information on Learning Centers

The charted material which follows is designed for easy use in planning learning centers for teaching:

Human Development and the Family
Home Management and Family Economics
Foods and Nutrition
Housing and Home Furnishings
Textiles and Clothing

The charts are divided so as to answer questions on planning, designing and equipping the facilities to be used in teaching both homemaking and the home economics programs for employment. Special emphasis is given to provide areas in both types for:

| | |
|---------------|--------------------------------|
| Discussion | Individual Study and Reference |
| Demonstration | Experimentation |
| Conference | Skill Development |

The diagrams of layouts for home economics facilities in each area (see appendix) give suggestions for planning learning centers.

HUMAN DEVELOPMENT AND THE FAMILY
LEARNING CENTER

| CONSUMER AND HOMEMAKING EDUCATION | | OCCUPATIONAL HOME ECONOMICS EDUCATION | |
|-----------------------------------|-----------|---------------------------------------|-----------|
| Description | Equipment | Description | Equipment |

Conference Area
Individual and small group conferences are an important consideration in this Curriculum Area. Privacy should be possible.

Teacher's desk and one or two comfortable chairs. Round (or two trapezoidal) tables seating six with chairs. File cabinets.

The conference area is especially important for occupational training in child care services. Conferences will involve parents as well as the teacher and pupils.

Teacher's desk and one or two comfortable chairs. Round (or two trapezoidal) tables seating six with chairs for small group conferences. File cabinets.

Skill Development Area

Kitchen facilities should be provided where students may prepare food for hospitality, for "family" occasions, and for the short-term nursery school. The addition of a breakfast nook would serve for small group discussions, planning conferences and individual work,

Attractive living room and dining room furniture of a flexible type which will lend itself to various arrangements.

Unit kitchen with double bowl sink dishwasher double oven range (or equivalent in surface units and wall ovens) refrigerator with sizable frozen food compartment breakfast nook

Skill Development Area

The skill development area will need to be developed to fit the needs of the occupational training program which is to be offered. For instance, training for a Family Dinner Specialist would require emphasis on kitchen and dining facilities, dishes, silver, linens, etc.

The addition of a nursery school for child care services would require:

- . Kitchen & menu planning area
- . Reception area & toilet facilities
- . Indoor & outdoor play areas
- . Indoor play area should have radiant heating in floor unless floor has heated room underneath
- . Clothing Care Center
- . Observation booth with one-way glass panel
- . Individual work area
- . Additional storage area

For more specific suggestions on furnishing and equipping a nursery school, see "Preparing for Employment in Child Care Services in Pennsylvania Schools" issued by the Department of Education, Box 911, Harrisburg, PA 17126 Cash (25¢) a copy.

Development Skill development of management in:

- Meal planning and preparation.
- Care and repair of household furnishings and equipment.
- Caring for clothing and household linens.
- Home care of the sick.
- Household accounting.

One Kitchen Unit:
Large appliances--dishwasher, refrigerator-freezer or separate units, gas and/or electric range. Portable appliances: toaster, mixer, frying pan, can opener, waffle iron. Sink, counter tops (36" and 32" from floor). Storage--to include base and overhead cabinets with special storage for trays, cups, silver, and small appliances.

Skill development of management in the same areas as listed under family centered program with application to related home and institutional occupations: (executive housekeeper, homemaker's assistant, maintenance worker, hotel-motel aide, laundry worker.)

The equipment listed under family centered would be utilized with the following additions:

Household Care and Repair Unit:
Upright cleaner, canister type cleaner, hand type cleaner, scrubber-polisher, mops, brushes and brooms, storage for cleaning utensils, work bench, storage for household tools and paint, fire extinguisher and blanket.

Cleaning cart.
Linen cart of type used in motels and other institutions.
Heavy duty cleaning equipment.

Description

Equipment

Description

Area

Equipment provided in the preparation area may be used.

An area where various methods of preparation can be tested, time and motion studies conducted, and sanitation methods evaluated.

Work space with a protective covering.
Quick heating electronic range.
Sink
Lower counter with stools and chairs.
Titration table
Gram scales
Portion scales
Microscopes
Test tubes
Petri dishes
Bunsen burner
Animal experimentation unit.

An area where a student or group of students could conduct simple food analysis, taste and test new foods, test small equipment and utensils, conduct time and motion studies, animal feeding and other nutritional experiments and studies related to bacteriology.

Institutional ranges
Deck or convection oven
Steamer
Steam jacketed kettle
Work tables
Sinks
Refrigerator
Bins for storage of dry ingredients
Utensil rack or cabinet
Mixer
Scales

A facility designed to provide instruction in commercial and institutional food service prior to a cooperative work experience.

Work counters and portable tables
Ranges-electric or gas with ovens
Sinks
Waste disposals
Refrigerator-freezer
Dishwasher
Storage for dishes, utensils and supplies.

Modified home kitchen units where students can work individually or in groups

Tables of a variety of sizes and shapes
Server
Waitress station

An area where several groups of varying sizes could be served. The facility should provide for serving at least 25 persons.

Tables
Chairs
Server or buffet
Storage for linens, china, silverware, etc.

A serving area where family sized groups can be served in a variety of ways.

For more specific suggestions on furnishing and equipping, see "Curriculum Guide for Food Service Instructional Programs in Pennsylvania," Dept. of Education, Box 911, Harrisburg, PA. 17126

CHAPTER V

EVALUATION

Evaluation is a continuous process by which each individual and group checks progress toward recognized, desirable, clear-cut goals. The 1967 ASCD publication, Evaluation as Feedback and Guide, (Part One, Page 1)¹ raises the question which faces each person involved in education, "How to use evaluation as a positive force toward better teaching, better learning and a better balanced curriculum.....What is evaluation, really? What does it have to contribute to the fundamental tasks of education? Where does it fall short? How do we get from where we are to where we want to be?"

The technologies of automation and cybernation have introduced new methods and terminology into the evaluative or assessment process. One term being used concomitantly with evaluation is "feedback". Regardless of the methods used to secure feedback on educational programs the use is the same - it gives direction as to where and what the next move is. It shows what happens to the learners. Decisions are made on what the perceptions are on progress being made and in terms of what is hoped to be achieved. In other words, do the evaluative methods being used give, "the feedback that is needed when it is needed, to the persons or groups who need it."

CONCEPTS FOR EVALUATING HOME ECONOMICS EDUCATION PROGRAMS

1. Self-evaluation is fundamental for development of a valid and healthy self-image of both students and teachers.
2. Total school philosophy and objectives are considered in evaluating the home economics education program for continued growth and improvement.
3. Learning and teaching are moved forward by constant probing and diagnosing of the instructional program by both students and teachers.
4. Records provide accountability for making judgments in terms of predetermined goals.
5. Continuous evaluation provides relevant answers for making decisions on curriculum development and educational policy.

An organized plan for collecting and channelling data to the right centers at the right time becomes an important responsibility of each person involved in the development of programs. The five previously stated concepts were used as the basis for the development of the evaluation devices for assessment of present program and for future curriculum development. The devices are designed to be used for occupational, adult, consumer and homemaking regular and depressed programs. In addition to these evaluation techniques the Research Coordinating Unit of the Department of Vocational Education acts as a clearing house for vocational data. Districts may wish to avail themselves of the data and utilize in terms of current program status.

These evaluation devices may be used by administrators, teachers, supervisors, advisory committees and other resource persons

CURRICULUM

| | YES | NO | SUGGESTIONS FOR CHANGE |
|---|-----|----|------------------------|
| 1. Is the curriculum organized around knowledge and skills required for specific occupations? | | | |
| 2. Is the curriculum based on a logical sequential development of skills? | | | |
| 3. Is the curriculum geared to all ability levels? | | | |
| 4. Is the curriculum based on <u>both</u> knowledge and skills? | | | |
| 5. Is sufficient time allotted to develop the necessary competencies? | | | |
| 6. Is the curriculum sufficiently broad in scope to train for a cluster of jobs? | | | |
| 7. Does the curriculum help the student develop an understanding of the world of work? | | | |

COOPERATIVE WORK EXPERIENCE

| | YES | NO | SUGGESTIONS FOR CHANGE |
|---|-----|----|------------------------|
| 1. Are students selected for the program by career interest? | | | |
| 2. Does teacher-coordinator have the necessary occupational experience, occupational course, and coop course to be certified? | | | |
| 3. Does the advisory committee function on a regular basis to support and advise on the program? | | | |
| 4. Does the teacher-coordinator visit each training station once every two weeks to provide the student with supervision and liaison with the training sponsor? | | | |
| 5. Is a training plan and agreement established for each student with respective training sponsors? | | | |
| 6. Is the number of students in the program limited to 20-25? | | | |

INSTRUCTIONAL PROGRAM

| | YES | NO | SUGGESTIONS FOR CHANGE |
|---|-----|----|------------------------|
| 1. Does classroom instruction reflect the objectives and philosophy of the training program? | | | |
| 2. Do the techniques develop standards of performance acceptable for job entry level? | | | |
| 3. Is there a variety of teaching techniques? | | | |
| 4. Are field trips used as a planned learning experience? | | | |
| 5. Are resource persons utilized? | | | |
| 6. Are federal and state regulations related to the occupation an integral part of the program? | | | |
| 7. Is the work experience organized in compliance with regulations? | | | |
| 8. Is the work experience planned, coordinated and evaluated by the instructor? | | | |
| 9. Is there adequate supervision of classroom activities? | | | |
| 10. Does the classroom climate encourage self discipline and self direction? | | | |

PHILOSOPHY AND OBJECTIVES

| | YES | NO | SUGGESTIONS FOR CHANGE |
|---|-----|----|------------------------|
| 1. Is there a program philosophy for the course which is consistent with that of the total school? | | | |
| 2. Are program objectives clearly defined? | | | |
| 3. Are program objectives realistic in terms of pupil needs and employment opportunities? | | | |
| 4. Has the local advisory committee assisted the educational staff in developing philosophy and objectives? | | | |

INSTRUCTIONAL MATERIA * AND SUPPLIES

| | YES | NO | SUGGESTIONS FOR CHANGE |
|---|-----|----|------------------------|
| 1. Is a textbook used in the course? Name _____ Author _____ | | | |
| 2. Are appropriate instructional materials available and used? i.e., magazines - visual aids | | | |
| 3. Are the necessary supplies available? | | | |

SPACE AND EQUIPMENT

| | YES | NO | SUGGESTIONS FOR CHANGE |
|---|-----|----|------------------------|
| 1. Is space provided for group activities such as: Skill Development Demonstration Discussion Individual Study Conference Experimentation | | | |
| 2. Is the equipment adequate to provide for a planned sequence of learning experiences? | | | |
| 3. Has sufficient equipment been provided to develop the needed competencies? | | | |
| 4. Is all the equipment being used to develop the needed competencies? | | | |
| 5. Is the equipment provided the kind that is used in industry? | | | |
| 6. Is the equipment available and utilized during the regularly scheduled class periods? | | | |
| 7. Is storage space provided for supplies and equipment? | | | |
| 8. Is the storage area convenient to the classroom and easily accessible for deliveries? | | | |
| 9. Is the equipment maintained in good working condition? | | | |

EVALUATION

| | YES | NO | SUGGESTIONS FOR CHANGE |
|---|-----|----|------------------------|
| 1 Is the program evaluated in relation to its philosophy and objectives? | | | |
| 2 Are program objectives evaluated periodically and adjusted to meet changing industrial and educational needs? | | | |
| 3 Is the growth and development of the student the central focus of the program? | | | |
| 4 Is the developmental progress of enrollees used for guidance and placement? | | | |
| 5 Is there a plan for job placement and follow-up? | | | |
| 6 Are follow-up records of drop-outs and graduates available? | | | |
| 7 Do pupils participate in the evaluation of their progress? | | | |
| 8 Is evaluation achieved through the use of a variety of techniques and devices? | | | |

| | YES | NO | SUGGESTIONS FOR CHANGE |
|---|-----|----|------------------------|
| 1. Is the program broad including all areas of home economics: human development and the family, consumer education and management, nutrition and foods, housing and home furnishings, and clothing and textiles? | | | |
| 2. Is consumer education included in all courses? | | | |
| 3. Is there a separate consumer education course offered as part of the home economics curriculum? | | | |
| 4. Is special emphasis placed on preparation for the dual role of family member and wage earner? | | | |
| 5. Is nutrition education strongly emphasized? | | | |
| 6. Is the course content and learning experiences realistic, based on needs of students in the community? | | | |
| 7. Is a chapter of Future Homemakers of America organized as an integral part of the program? | | | |

PHILOSOPHY AND OBJECTIVES

| | YES | NO | SUGGESTIONS FOR CHANGE |
|--|-----|----|------------------------|
| 1. Is the program articulated from all age levels, providing for increasing complexity and depth of learnings? | | | |
| 2. Are programs, when appropriate, provided which give special emphasis to meeting the needs of the disadvantaged student? | | | |
| 3. Does scheduling permit students to enroll in elective as well as comprehensive home economics programs? | | | |
| 4. Are parents and other community members, such as an advisory committee, involved in planning, implementing and evaluating the curriculum? | | | |
| 5. Is home economics education available to out-of-school youth? | | | |
| 6. Is home economics education available to adults? | | | |
| 7. Are the objectives of the home economics program clearly stated in measurable terms? | | | |
| Are various means used to inform students, faculty, parents and community of the home economics program? | | | |

EQUIPMENT AND SPACE

| | YES | NO | SUGGESTIONS FOR CHANGE |
|--|-----|----|------------------------|
| 1. Are the furnishings and equipment practical, keeping within community standards of living, and also offering a challenge for improvement? | | | |
| 2. Is the department attractive, inviting, clean and orderly? | | | |
| 3. Is adequate storage available for equipment, utensils, supplies, books, audio-visual aids, and other teaching materials? | | | |
| 4. Is maximum use made of all facilities and equipment? | | | |
| 5. Are class enrollments appropriate for facilities available? | | | |
| 6. Are equipment, facilities and instructional materials available for teaching each area of consumer and homemaking education? | | | |

EVALUATION

| | YES | NO | SUGGESTIONS FOR CHANGE |
|---|-----|----|------------------------|
| 1. Is the teacher able to cite evidence that the consumer and home-making program is improving the quality of home and family life? | | | |
| 2. Is the program continuously evaluated and the information obtained used as a guide for future program development? | | | |
| 3. Does the teacher submit enrollment data and other reports as requested to the state office by the date indicated? | | | |
| 4. Does the teacher hold a vocational home economics certificate? | | | |
| 5. Does the teacher keep up-to-date through course work and in-service training? | | | |
| 6. Does the teacher participate in professional meetings and other activities for professional growth? | | | |

INSTRUCTIONAL PROGRAM, TECHNIQUES AND MATERIALS

| | YES | NO | SUGGESTIONS FOR CHANGE |
|--|-----|----|------------------------|
| Is the learning situation enriched through use of effective instructional techniques and materials? | | | |
| 2. Are up-to-date references and instructional materials available? | | | |
| 3. Are funds budgeted for supplies, equipment and travel? | | | |
| 4. Does the teacher make yearly, weekly and daily plans for the instructional program? | | | |
| 5. Has a scope and sequence been developed for the total home economics program? | | | |
| 6. Has the teacher at least one period daily for conference and planning? | | | |
| 7. Are audio-visual media and other instructional materials easily accessible to the home economics personnel? | | | |
| 8. Are student aides and/or other auxiliary personnel available for teacher assistance? | | | |
