IDENTIFIERS Program Planning Budgeting Systems; *West York

ABSTRACT

By virtue of the educational process, there exists a literate electorate that wants a voice in what the educational system is producing and that knows how to articulate its demands. Schools are faced with Federal, State, and district expectations. Along with these expectations there are internal and external forces that weigh on the educational decisionmaking process and thus establish priorities regarding the action to be taken. To accomplish the full involvement and accountability of all levels with input into the educational program, the educational plan presented here includes instructional and managerial goals for the following levels: community, district, school, and department/unit. These goals are translated into performance objectives and set out in matrix form with workplans and monitoring criteria. (WM)

Education is experiencing a thrust toward "accountability." The West York Area School District is in philosophical concurrence with this thrust and has taken advantage of it to institute a developmental management system which will accomplish the goals of accountability in education.

Based on our experience with new management systems and rapid program change within the District, and further based on interaction with the local community regarding their educational expectations, a new concept in the field of accountability has emerged.

It is the desire of the staff that this educational plan represent the efforts of the entire team to provide a student delivery system which will be designed to meet community goals.

EDUCATIONAL PLAN

OF THE

WEST YORK AREA SCHOOL DISTRICT

PURPOSE OF AN EDUCATIONAL PLAN

As early as education became part of the public domain through the compulsory attendance laws of the State of Massachusetts, communities have been dealing with the purposes, intent, and expectations of what an educational system should produce in end results. National commissions and committees were formulated by three Presidents, with the White House Conference on Education of 1956 producing the most comprehensive list of expectations.

Education itself has emerged from a transitional period of traditional instruction characterized by the "little red school house" to the era of education via media and individualized instruction. Neither the teacher nor the community can afford to take a step backward. Both educators and the community are becoming more sophisticated in the formulation of an educational program--and each is asking for a more effective voice.

Under the aegis of accountability, the people providing the resources to carry out an educational program are asking for results, cost effectiveness, and improvements in the educational structure. Most educators agree that this type of accountability has been long overdue.

Accountability as it was originally proposed to the educational community was done in a "shotgun" approach with many sectors providing the pressure for the implementation of expected results overnight. What the community was seeking was a new management system which would be able to provide results. Instead, many people jumped onto bandwagons to develop various accountability systems under terms such as:

1. Performance Objectives
2. Program Planning Budgeting Systems
3. Centralized Management
4. Participatory Management

Each represents some of the directions that educators took. In most cases, these early attempts dealt with segments of the problem instead of the whole problem and lacked acceptance of the educational community. Political pressures managed to retain the concepts of accountability in the forefront of educational planning--and now the product is beginning to bear fruit. The end result should be an educational model which is more capable of delivering to community expectations.

EXTERNAL AND INTERNAL PRESSURES ON AN EDUCATIONAL PLAN

A school district can no longer operate in a vacuum, ignoring the soundings formulating in the wings. By virtue of the educational process, a literate electorate exists which wants a voice in what its system is producing and that electorate now knows how to articulate its demands. Schools are faced with a number of forces which must be considered in the decision-making process:

1. Federal Expectations: The federal government is now providing close to 3% of some state and district educational budgets. Due to this backing and legislative pressure or national concern regarding the product of the school, demands are being made on the system which can be felt all the way to the classroom level.
2. State Expectations: The state, in turn, supplies approximately 42% of a district's educational budget. Through the State Department of Education and legislative mandates expressed in law, state expectations are placed upon the schools and felt directly in the operation of classes.

3. District Expectations: The remaining share of the budget comes from local sources. Because of this and the resultant effect that the educational product has on the community, an accountability expectation regarding the school's product has become a potent force.

In processing each of these demand levels, there are internal and external forces which weigh on the decision-making process and, thus, establish priorities regarding the action to be taken:

1. Demands Outside of District (Outside of Education): This would represent input from governmental agencies, the business community, or others who do not have close contact with the District.
2. Demands Outside of District (Inside of Education): This input would come from federal or state educational agencies, professional educational associations, and other educational groups which do not have a direct voice in the District.
3. Demands Inside District (Outside of Education): These groups and persons represent the segments of a local community which will make direct demands on the educational system and its end product.
4. Demands Inside District (Inside of Education): These are the demands on the staff which are based on their own perceptions of all the previous pressures, including the needs of the students themselves.

As illustrated in CHART A, these pressures are hierarchical with the decision-making process or reaction to the demands being weighed against each of these pressures. If these demands are not placed into perspective, the result is chaos. It is for this reason that educational administrators have given their attention to improved management systems which will allow for increased interaction to resolve educational demands.

CHART A

FEDERAL

STATE

DISTRICT

CHART A

4

- A DEMANDS OUTSIDE EDUCATIONAL COMMUNITY)
- B DEMANDS INSIDE EDUCATIONAL COMMUNITY)
- C DEMANDS OUTSIDE EDUCATION)
- D DEMANDS INSIDE EDUCATION)

OUTSIDE DISTRICT

INSIDE DISTRICT

One of the results which can be seen in this management mode is the use of "advisory committees" which can focus on the demands and place them into perspective as they relate to the existing resources and needs of the community and the District.

Advisory committees allow for the study of the demands of the educational system as measured in student outcomes based on community-determined standards. This type of demand might be expressed as "goals" which the community wishes to have achieved. The educator's role then exists in interpreting these goals into instructional programs which reflect the learning patterns of students.

TAXONOMIES OF EDUCATION

THE EDUCATIONAL DOMAIN

A number of behavioral scientists have developed extensive theories about how a student learns, but none have yet discovered exactly what happens when the student reaches the "ah ha" level of true comprehension. The closest we have been able to come has been in the measurement of intelligence or, better yet, achievement when measured against prevailing standards.

One of the most brilliant works of modern education was the classification of levels of learning into a taxonomy of educational objectives. Benjamin S. Bloom and others created the taxonomy while working on the refinement of college entrance examinations where it was felt important to know the levels of attainment reached by the student regarding his ability to learn.

Teachers' later use of the taxonomy proved that very ineffective learning was taking place since most teacher-designed tests did not measure what the teacher expected of the class. This, in turn, led to many changes in attitudes related to instruction, including stated performance objectives, so students knew what was expected of them in the educational environment.

Bloom's original taxonomy is composed of three domains: the Cognitive Domain, first printed in 1956; the Affective Domain, printed in 1964; and the Psychomotor Domain, printed in 1972 and edited by Anita Harrow. Within each of these three classifications are represented

the levels of learning which a student must acquire. These have an effect on two other domains which will be further illustrated. The Cognitive Domain and the Affective Domain as classified have the following hierarchy:

Cognitive Domain¹

1. Knowledge - Knowledge is defined as the learner's recall of previously acquired material, ranging from specific facts to theories. Knowledge represents the lowest level of cognitive outcome.
2. Comprehension - Comprehension is defined as the learner's ability to know what is being communicated and his ability to make use of the communication. Comprehension represents the lowest level of understanding in the cognitive domain.
3. Application - Application is defined as the learner's ability to use abstractions in concrete situations. Abstractions include such things as general ideas, rules, methods, principles, and theories. The ability to apply learned material represents a higher level of understanding than comprehension.
4. Analysis - Analysis is defined as the learner's ability to break down a communication into its constituent parts such that the organizational structure of the communication is made explicit.
5. Synthesis - Synthesis is defined as the learner's ability to integrate parts to form a new whole. It is the process of finding new ways in which facts, rules, and principles can be interrelated.

¹ Richard L. Derr, A Taxonomy of Social Purposes of Public Schools, David McKay Company, Inc., New York, 1973, p. 7.

Affective Domain 2

1. Receiving - Receiving is defined as the learner's willingness to attend to certain stimuli and phenomena. It represents the lowest level of affective outcomes in the learner's behavior.
2. Responding - Responding is defined as active participation on the part of the learner. At this second level, the learner is not only attending to a particular phenomenon but he is reacting to it in some way.
3. Valuing - Valuing is defined as the learner's assignment of value or worth to some phenomenon. It represents a commitment on the part of the learner to behave in a particular manner.
4. Organization - Organization is defined as the establishment of interrelationships among values acquired by the learner. It represents the beginning of the process of building an internally consistent system of values.
5. Characterization by a Value or Value Complex - Characterization is defined as the development of a characteristic life style by the learner. At this highest level of internalization, the values acquired and organized by the individual have controlled his behavior for a sufficiently long time so as to characterize his way of behaving.

²Ibid., p. 8.

The psychomotor classification was not available to the District at the time of this writing. The domain has importance particularly in light of the increased demands for saleable skill preparation which often call upon learning levels from this domain.

The expertise supplied to the educational system in assisting students to develop these learning levels formulates the classroom teacher and curriculum designer's most important roles in education. The community itself expresses its expectations in two other domains (learning & social).

THE LEARNING DOMAIN

Communities have often called this domain the "three R's," and many traditionalists feel that these are the only areas the schools should deal with. Modern classification systems now place the learning domain into what is called the "four C's."

1. Communications - All the processes of learning which involve reading, writing, speaking, and visual communications with each other.
2. Comprehension - The processes of understanding what we have learned, including the ability to relate that information to life situations in a positive manner.
3. Computation - The ability to deal with simple and complex figures as they relate to daily activities and work.
4. Coping - The ability to interact with peers, adults, and critical life situations in a changing environment.

The above areas can be considered processes which interlace themselves throughout all subject matter areas that are offered in a school system. In addition, education is carried out by a man to pass on his heritage. The community reflects its desires of the educational system in this area through the "social domain."

THE SOCIAL DOMAIN

More and more, the school system has been asked to assume the burdens of society which were previously assumed by the family unit or the church. Education has been expected to provide the panacea for all the social ills. Although the relevancy of this approach can be challenged, the demands still exist. Until recently, no domain existed in this area to assist educators in structuring educational programs.

In the previously cited text written by Richard L. Derr of Case Western Reserve University, A Taxonomy of Social Purposes of Public Schools, the rudiments of a taxonomy have been structured. Since a taxonomy usually places a hierarchical level on the terms thus classified, this work is incomplete. It is Derr's contention that the actual classification using his system has to be completed at the local school level. The text still represents a monumental piece of work providing the following four "individual-in-society" educational purposes:

1. Citizenship - The student acquires the elements of heritage, learns responsible citizen roles, and respects the rights of others as elements of this domain.
2. Worker - The student develops a work ethic which is consistent with changing technology and continued learning. It includes the acquisition of career competencies in a productive society.
3. Family Membership - The student develops attitudes appropriate with family unity, moral values, and a social ethic which recognizes the dignity of others.
4. Leisure Time Use - In changing times when extensive leisure time may be available to the student during his life, he needs to develop a life style which is consistent with his career choice and which will allow him to return benefits to the society he serves.

Each of the three principal domains listed, Educational, Learning, and Social, interact on the student in the educational process. How this is achieved can be expressed in an Educational Plan as part of the total learning process. CHART B illustrates the interaction of these domains on the student in this process.

THE TEACHER AS A MANAGER

The role expectation of the modern teacher is far removed from the profile which is remembered from the days of the "Little Red School House." Although the teacher time is dedicated to the instruction of students, educational theory and economic necessity have changed roles significantly. The modern teacher is also a manager--more and more the expectations of the educational community are providing for him to become a member of the management team.

This does not mean that administration of schools is being usurped or replaced by teacher teams, but that the resources available to teachers and the need for participatory development in accomplishing a variety of goals calls for a more effective team management approach. These management changes are being experienced by educators in many ways:

1. Self-Directed Management (SDM) - A management system where the employee and supervisor plot out a course of action for specific goals and objectives in a manner agreed upon by the person to perform the duties.
2. Implementation - A system of teacher evaluation which draws upon the principles of accountability.
3. Participatory Management - An opportunity for all the participants who provide the end product to have a voice in determining how they will achieve the educational program goals.

CHART B

EDUCATIONAL DOMAIN INTERACTION

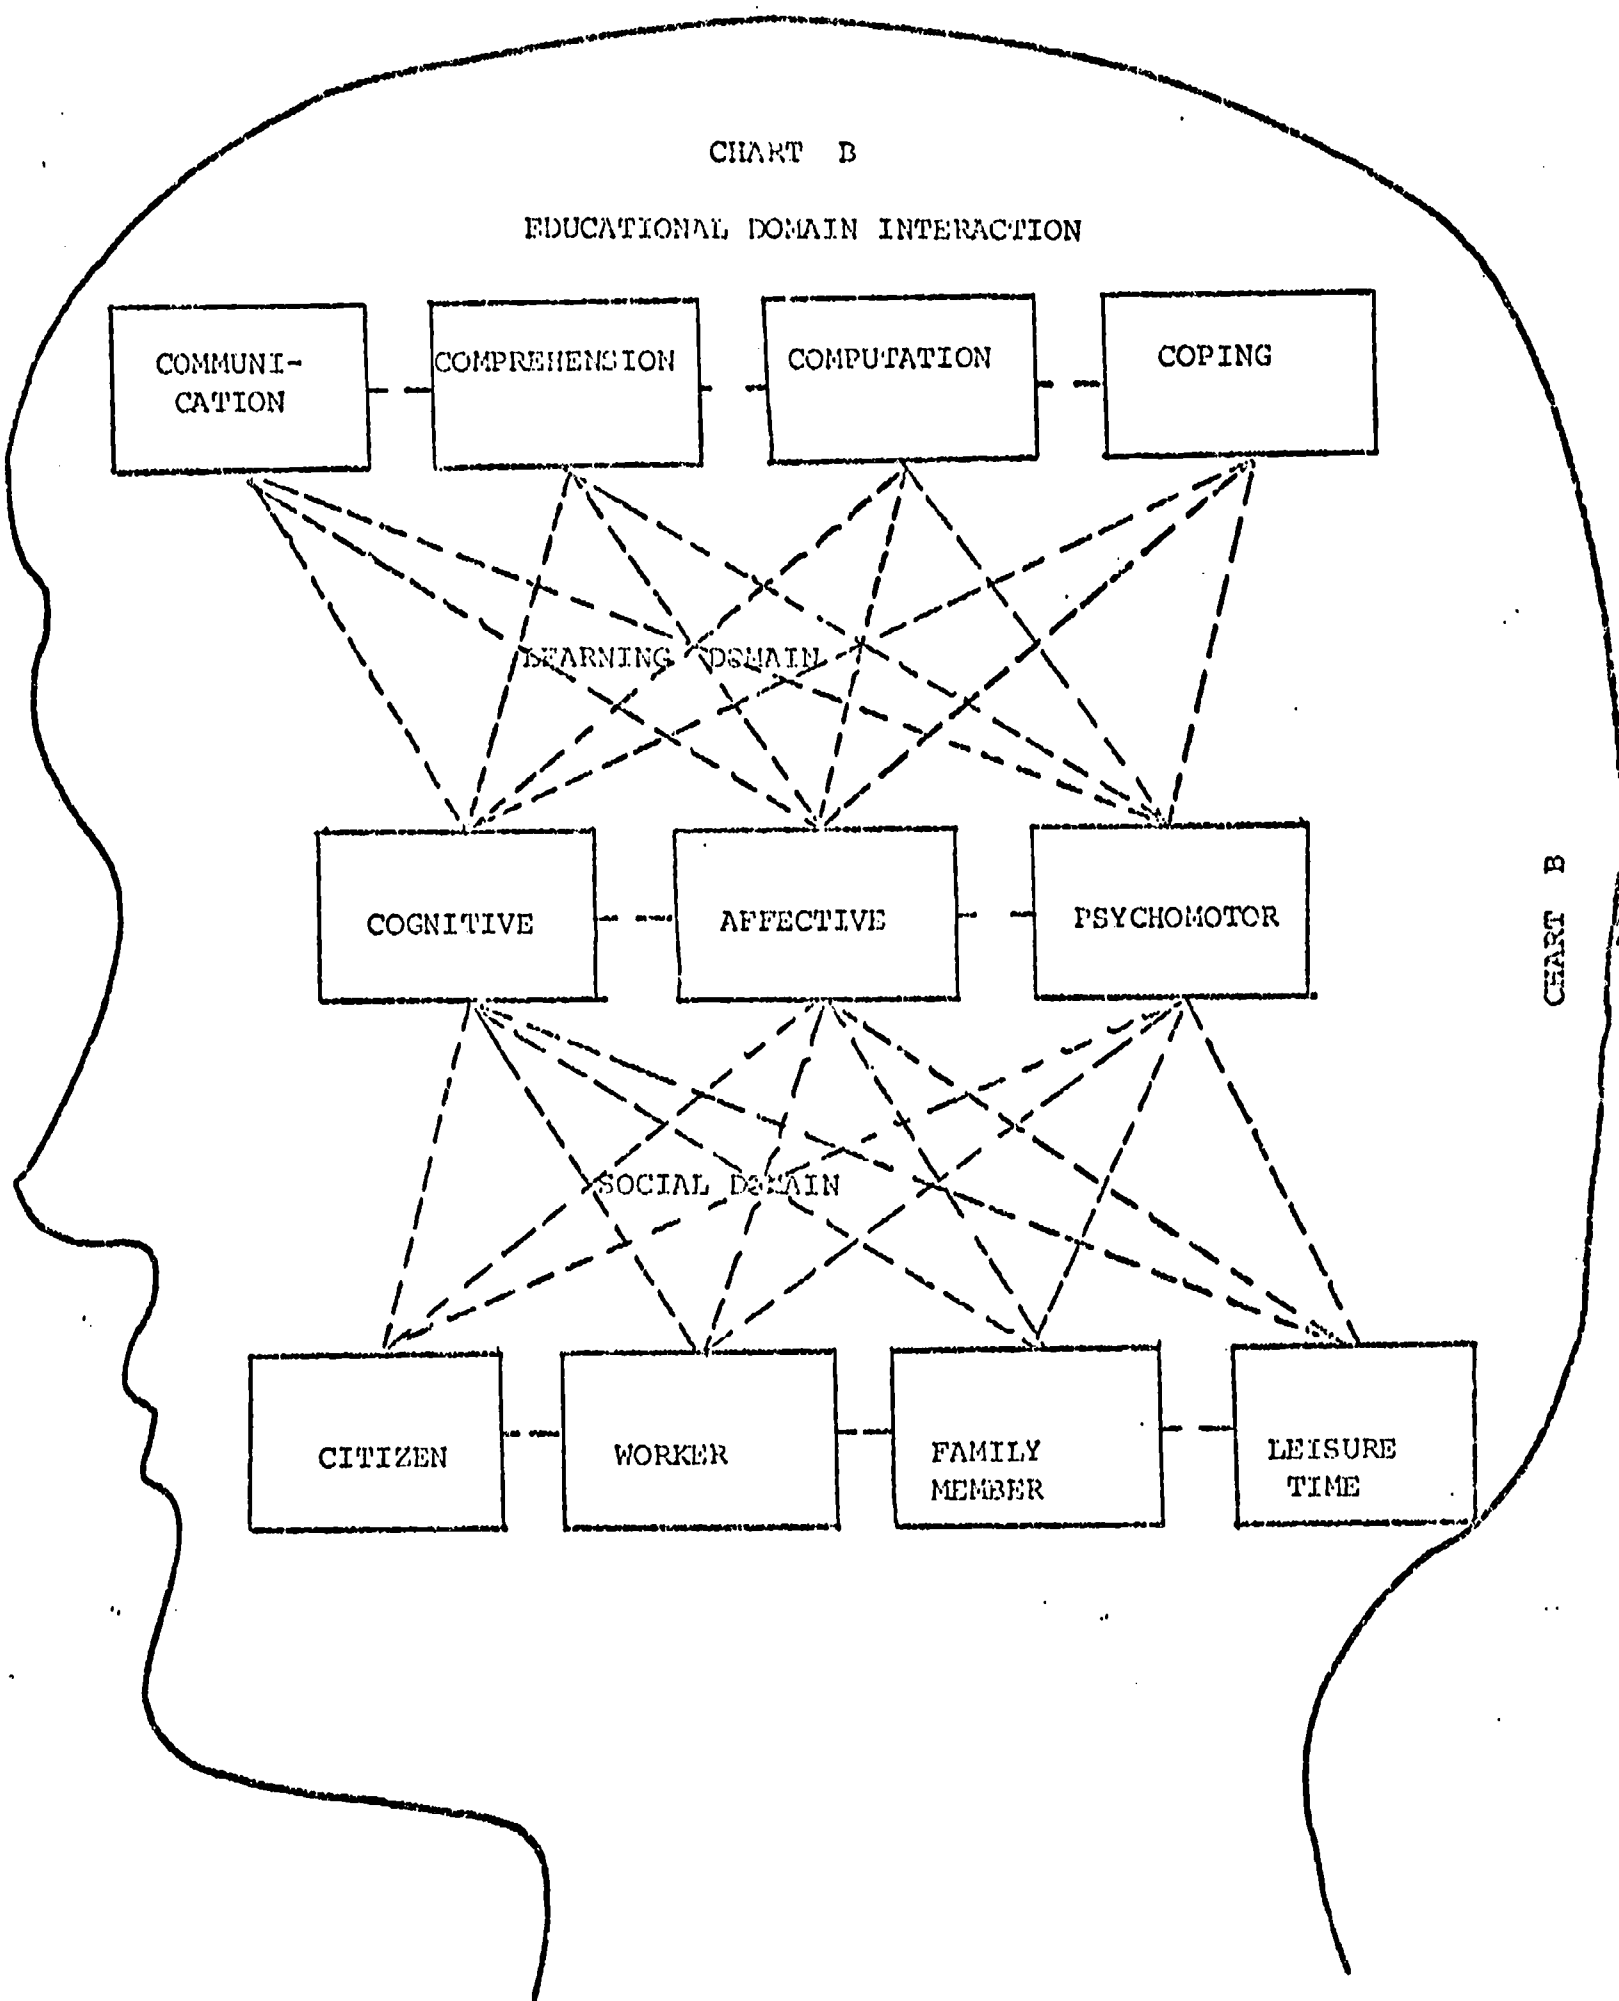

CHART B

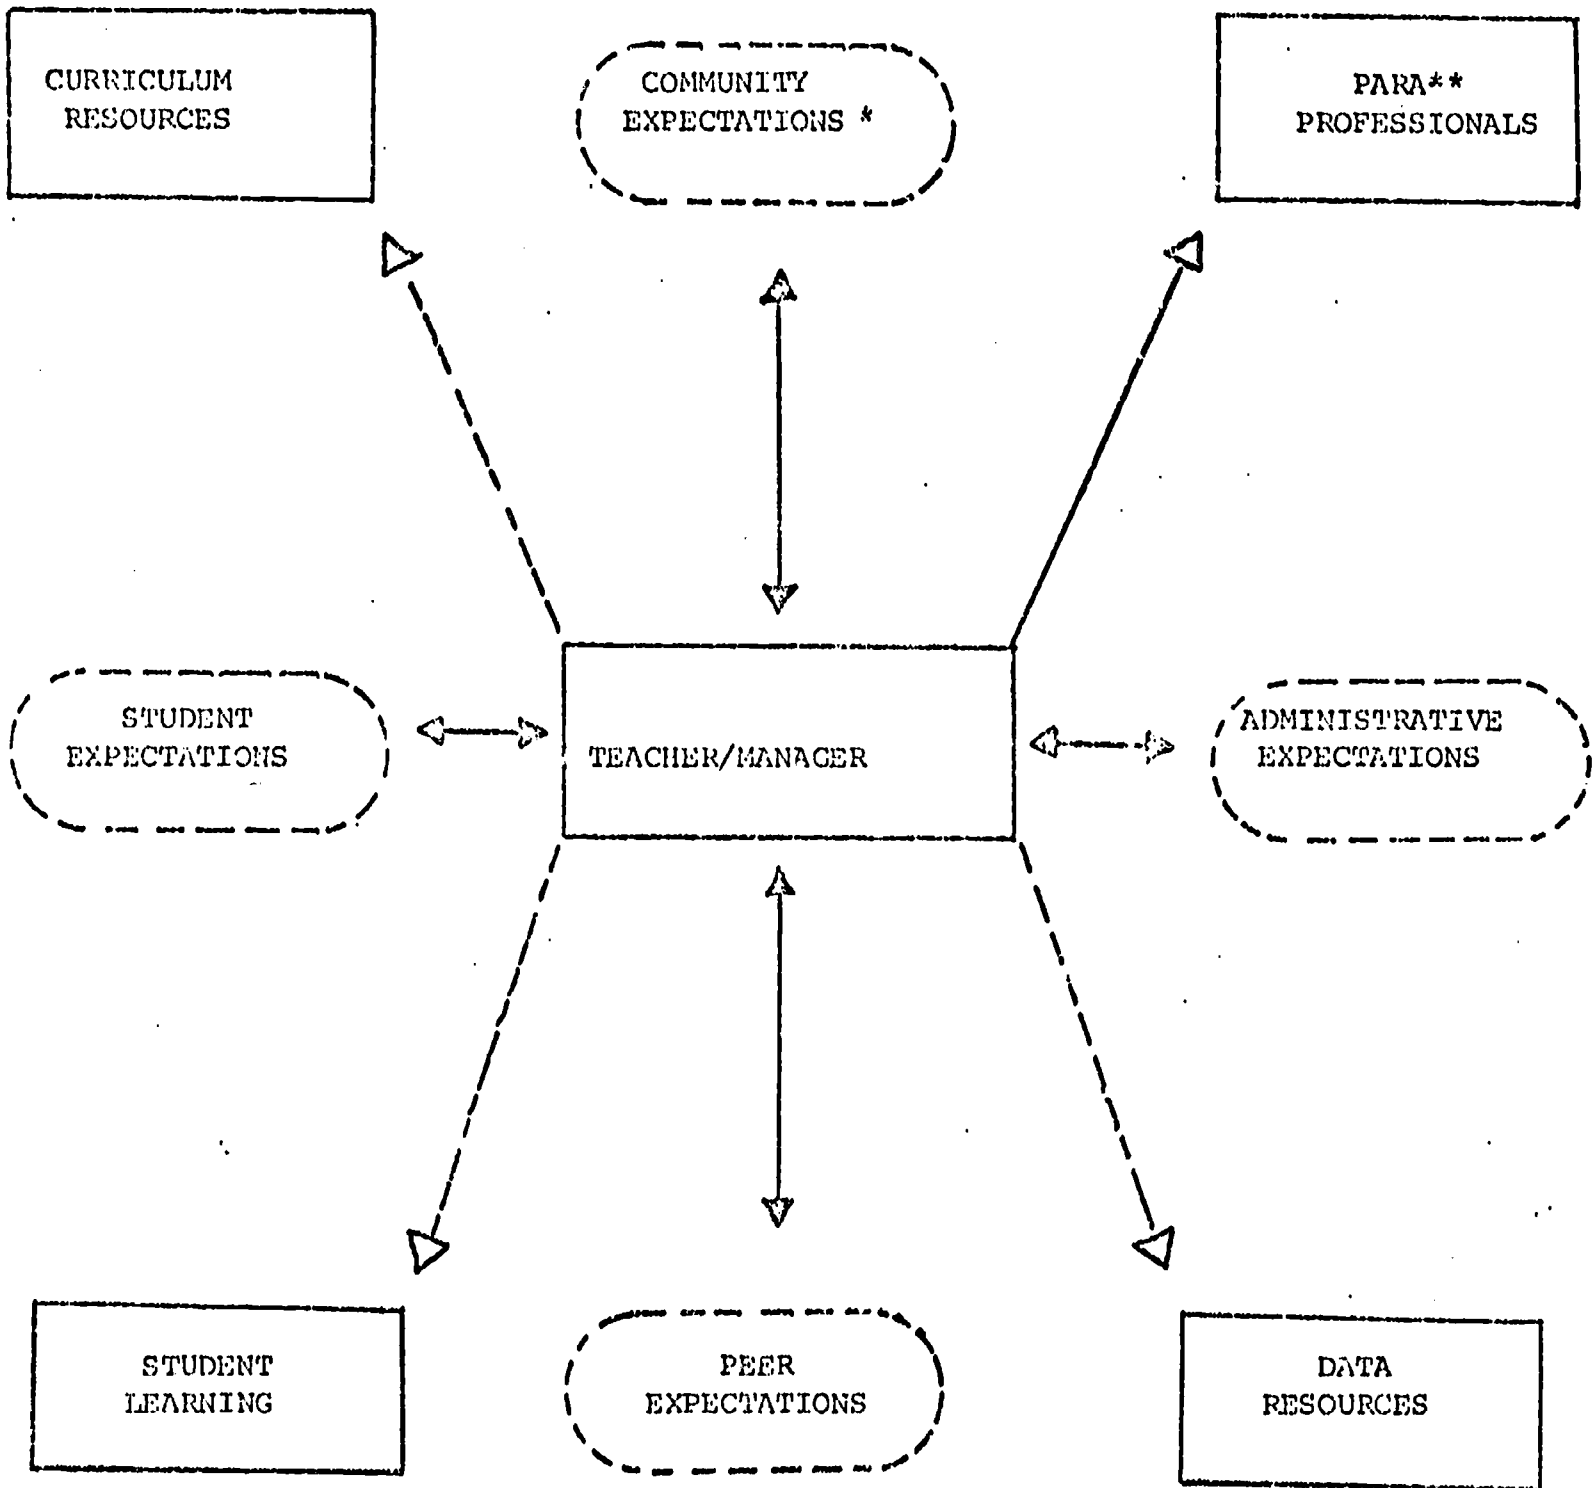

As illustrated in CHART C, the teacher in modern decision-making processes has to deal with a number of outside pressures which affect him more directly than the internal/external pressures related earlier. These include:

1. Community Expectations - as they relate to the specific subject matter being taught by that teacher.
2. Student Expectations - regarding the services and the quality of instruction which will be provided in the class.
3. Administrative Expectations - regarding the operational functions of the school plant.
4. Peer Expectations - as they relate to the total teaching environment and individual economics.

Participatory management takes place in modern education for the teacher in dealing with:

1. The Educational Plan - and the means by which he or his department can make a contribution to the end product.
2. Curriculum Resources - assistance in the selection, monitoring, and maintenance of effective curriculum resources for his subject field.
3. Para-Professionals - the use of para-professionals to assist in the instruction is growing. This provides a means of offering more individualized instruction to students.
4. Data Resources - the management and retrieval of data relative to learning will be more commonplace in the classroom in future years. With the inception of baseline information and instructional information on the computer, the instructor will have the capability of identifying priorities and providing more effective instruction.

CHART C
MANAGERIAL PROFILE

* EXTERNAL PRESSURES
** PARTICIPATORY MANAGEMENT

5. Student Learning - With all the advances in learning practices and the tearing down of barriers which previously existed between disciplines, the management of student learning as it relates to an educational plan or to learning theory will demand increased management skills.

THE ACCOUNTABILITY MODEL

Teachers and administrators have become more accountable for the product they produce. We have discussed Self-Directed Management and Participatory Management as elements of an accountability model. Further illustration is shown through CHART D of the two directions accountability takes in the system to achieve student results.

1. Individual Accountability - Each member of the educational team is answerable to a supervisor in relation to his assignment. Individual accountability encompasses all members of the team.
2. Program Accountability - In relation to the expectations of the community, specific programs have been designed to achieve the stated goals. Accountability for these program goals is measured in a "program mode." To communicate this mode to the community and to provide for assessment, the Educational Plan has been developed.

DEVELOPMENT OF THE EDUCATIONAL PLAN

One of the tenets of Participatory Management is that "program expectations" will be followed by "program fulfillment," with each member of the organization being responsible for his "piece of the action." Since a case has already been established for full community involvement, any model to carry out the expectations must include input from all segments interacting in the model.

CHART D
ACCOUNTABILITY MODELS

INDIVIDUAL

SUPERVISOR

ASSIGNMENT

TEACHER/ADMINISTRATOR

UNIT

PROGRAM

COMMUNITY

STUDENT RESULTS

CHART D

15

To accomplish full involvement, the Educational Plan which is being presented includes levels as illustrated in CHART E. These levels are:

1. Community - many individuals who establish thrusts relating to the Community Instructional and Managerial Goals.
2. District - which must provide the support services and resources to carry out and manage the Plan.
3. School - which through its sub-community and administrative resources must provide for the overall goals as they relate to that school community.
4. Department/Unit - which in reference to the community expectations provides for its contribution.

At this time, this constitutes the educational plan levels which will support the program accountability aspects of the program. The individual class could make program contributions but due to the cross-referencing of activities by teachers in more than one area of responsibility, the class level as a level of the program has been assigned to the accountability model for individual accountability.

CHART E

DEVELOPMENT OF EDUCATIONAL PLANS

PHILOSOPHY

The West York Area (School District) believes that the schools and the community are partners in the education of youth, but that the primary responsibility rests with the schools. The West York Area School District believes that the schools and the community should provide an atmosphere where there is an active commitment to further each individual's natural desire to learn, realizing that the ultimate responsibility for the education of any individual rests with the individual himself.

The West York Area School District believes that each individual student, regardless of sex, race, color, religion, ability, wealth, or background, must be prepared for effective living as a contributing citizen in a rapidly-changing society where life-long learning must be viewed as a normal expectation.

The District believes that the educational program should promote excellence based upon the optimum fulfillment of each individual's capabilities as determined by his experiences, needs, and incentives. It accepts the responsibility to provide the maximum opportunity for its students to acquire the basic skills and knowledge to be intellectually curious and aesthetically aware, to think and work creatively, to live healthfully, to achieve self-discipline and economic efficiency, to understand the obligations of democratic living and learn to live in harmony with nature and with others.

In the accomplishment of its philosophy, the District shall strive for constant improvement of the educational program; help each student develop into a well-adjusted, useful, intelligent, contributing citizen; maintain constant involvement with all segments of the community; and provide efficient and effective management and utilization of human and financial resources.

COMMUNITY INSTRUCTIONAL GOALS (cont'd.)

The following goals were adopted in order to provide more specific direction in the implementation of District philosophy. They fall into four major categories: Self-realization, Human Relationships, Economic Efficiency, and Civic Responsibility.

In listing these goals, no priority order is intended.

1.0 SELF-REALIZATION

1.1 Adaptability - To provide an educational program which encourages each student to learn how to think and develop modes of inquiry in order to adapt to any of life's challenges with confidence and effective behavior.

1.2 Accumulation of Knowledge - To provide the opportunity for each student to acquire the basic skills, information, and concepts in order to be intellectually curious; to develop habits of listening, observing, and reasoning effectively; and to think and work creatively.

1.3 Communication and Transmission of Knowledge - To provide each student the opportunity to develop both verbal and non-verbal skill in communication.

1.4 Use and Evaluation of Knowledge - To provide each student the opportunity to develop skill in intelligent, constructive, critical, and creative thinking so that he may develop the ability to analyze situations, recognize resources, evaluate alternatives, make judgments, accept responsibility, and take intelligent action.

1.5 Desire for Knowledge and Continuing Education - To provide each student the opportunity to recognize the value of developing intellectual curiosity and of acquiring a positive attitude toward learning as a life-long process by engaging in educational experiences which are relevant to his present and future needs.

COMMUNITY INSTRUCTIONAL GOALS (cont'd.)

1.0 SELF-REALIZATION

- 1.6 Aesthetics - To provide each student the opportunity to cultivate an appreciation for beauty in various forms and to encourage the development of individual creative self-expression and talent through various media.
- 1.7 Avocational and Leisure - To provide each student the opportunity to pursue and develop personal interests and to develop skills which will encourage a creative, projective, and enjoyable use of leisure time.
- 1.8 Physical Health and Safety - To provide each student with an awareness of the importance of physical fitness and sound personal habits of health and safety, and the opportunity to develop positive attitudes toward the conservation of human resources, both for the individual and for society.
- 1.9 Mental Health - To provide an atmosphere conducive to good mental health and to provide each student the opportunity to develop his individual feelings of self-worth, self-understanding, and self-confidence.

2.0 HUMAN RELATIONSHIPS

- 2.1 Character Development - To assist the home in providing for each student the opportunity to develop a sensitivity to moral standards which will provide firm support for ethical behavior.
- 2.2 Inter-relationships of Peoples - To provide each student the opportunity to develop an appreciation and respect for the cultural heritages of other peoples of the world, a respect for the worth and dignity of each person in a society, and an awareness of how each enriches the world.
- 2.3 Peer Relations - To provide each student the opportunity to increase his understanding and acceptance of himself so that he will learn to accept, understand, and appreciate others.

COMMUNITY INSTRUCTIONAL GOALS (cont'd.)

2.0 HUMAN RELATIONSHIPS

- 2.4 Home Life - To provide each student the opportunity to appreciate the significance of a stable family unit to an enduring society so he can develop wholesome and responsible attitudes and skills necessary for functioning within the family structure.

3.0 ECONOMIC EFFICIENCY

- 3.1 Economic and Consumer Efficiency - To provide each student the opportunity to understand economic principles; to become a well-informed consumer; and to develop an understanding of the effective use of economic, human, and natural resources.

- 3.2 Career and Occupational Selection and Preparation - To provide each student the opportunity to make mature and appropriate educational and occupational choices and to develop the skills and flexibility necessary for economic competency in a rapidly-changing society.

4.0 CIVIC RESPONSIBILITY

- 4.1 Democratic Principles - To provide each student the opportunity to develop an understanding and appreciation of our American heritage and the corresponding civic obligations, responsibilities, and laws of our governing bodies.
- 4.2 Individual Relationships with Government - To provide each student the opportunity to develop an awareness and appreciation of an individual's rights and responsibilities toward all levels of his government and to encourage each student to exercise those rights through individual participation and involvement to the fullest extent.

COMMUNITY MANAGERIAL GOALS

This list of goals includes the thrusts of the District in providing operational efficiency to better attain the educational goals of the District and to provide the mechanism whereby diverse talents can work as a team to reach common objectives:

1.0 ADMINISTRATIVE SUPPORT

- 1.1 Self-Directed Management (SDM) - To develop and consolidate a management system which will provide top-down direction while allowing bottom-up development.
- 1.2 Evaluation - To consolidate the personnel evaluation instruments which will measure effectiveness in reaching performance objectives.
- 1.3 Affirmative Action - To develop and implement a program of affirmative action which will ensure the fair and impartial selection and treatment of all employees.
- 1.4 Public Information - To expand the public information network of the District involving in better staff and community communications within the schools, between the schools, and between the District Office and the schools.
- 1.5 Governmental Resources - To improve the cooperative relationships between the District and other governmental units leading to program sharing, operational efficiency, and instructional growth.
- 1.6 Board and Administrative Policies - To consolidate and revise the District's Board and administrative policies, thereby increasing managerial effectiveness.
- 1.7 District and School Procedures - To study and consolidate District and school procedures of various types to improve administrative efficiency.

22

COMMUNITY MANAGERIAL GOALS (cont'd.)

2.0 INSTRUCTIONAL SUPPORT

- 2.1 In-service Education - To improve and consolidate the in-service education programs for all personnel of the District leading to more effective utilization of individual talents.
- 2.2 Counseling and Guidance - To develop a counseling and guidance operation in the District oriented to increased student service and support.
- 2.3 Educational Plan - To develop an articulated and comprehensive educational plan for the District.
- 2.4 Community Involvement - To utilize the talents of individuals and organizations within the community in the educational process of the District and the schools.
- 2.5 Educational Evaluation - To develop an educational evaluation system which identifies, analyzes, and reports data for educational planning.
- 2.6 Year-Round School - To study and implement possible designs for year-round school operation along with other alternatives providing instructional flexibility.

3.0 OPERATIONAL SUPPORT

- 3.1 Centralized Budget - To centralize the budget operation and to allow supervisors more voice in determining budget development and control as it affects their school operation.
- 3.2 Cost Effectiveness - To develop a cost accounting procedure for the District to further measure effectiveness of educational programs in relation to operational costs.

COMMUNITY MANAGERIAL GOALS (cont'd.)

3.0 OPERATIONAL SUPPORT

- 3.3 Housing Needs - To provide adequate housing needs for the educational programs through internal development and utilization of community resources.
- 3.4 Transportation Network - To provide a cooperative and efficient transportation system for school educational programs through data information and sharing of transportation systems.

UNIT IMPLEMENTATION OF THE MODEL

For the purposes of the Educational Plans, each of the levels illustrated in CHART E are referred to as Units. Following this pattern, a Goal Matrix has been developed which will include the implementation of each unit's contribution to the community expectations. (See CHART F.)

Each unit studies its resources to deliver the community instructional and managerial goals: staff competencies, student population, operational resources, and existing programs and student evaluation information, including baseline data. Based on this needs assessment, the unit will select specific goals to which it can make a contribution and state that contribution on the Educational Plan Goal Matrix.

Upon completion of a unit plan, I will have shown my contribution to the community expectations; and the community will have a means of knowing what to expect in end results. These individual units are combined into a package (District Educational Plan and individual school Educational Plans) to show a total team effort.

GOAL : _____ (modified from community statements to align with unit operation.)

COMMUNITY INSTRUCTIONAL GOAL REF NOS: (1.0)

COMMUNITY MANAGERIAL GOAL REF NOS: _____

PERFORMANCE INDICATORS:

1. _____ (what is to be measured)

2. _____

3. _____

30 PERFORMANCE OBJECTIVE	WORKPLAN AND MONITORING	July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May	June
1.1 (statement showing expected outcomes) (C.I.G. 1.2) BEST COPY AVAILABLE	(TITLE OF PROGRAM) (Description of workplan and evaluation.) (CHART F)			X	X	X							
(date of implementation)													
BEST COPY AVAILABLE													

The units are further identified in this manner:

DISTRICT UNIT:

1. Business/Educational Services
2. Certificated Personnel
3. Educational Services & Research
4. Management and Operations
5. Pupil Personnel Services

SCHOOL UNIT(S):

1. Administrative Unit (management team)
2. Departmental Unit(s)

PERFORMANCE OBJECTIVE EMPHASIS

As a writer is preparing his Educational Plan unit, the role he plays in the implementation of the Plan will determine the emphasis upon which he writes his objectives. Roles are identified as:

1. Instructional
2. Managerial

All make contributions to the community instructional and managerial goals in reference to their assignments. An administrator (who provides a support service) might prepare an objective and work plan designed to interact on an instructional goal in managerial terms. Conversely, a teacher might express a managerial goal in terms of how it would affect instruction.

CHART G is included to illustrate this emphasis and shows that it is difficult to have a pure managerial or instructional goal--each relates to the other. However, for clarification of plan writing and referencing of the activity, this separate identification system becomes necessary.

Because of the broader roles of units as they affect the management chain, it may appear some program features are omitted. Each unit has taken on full commitment to the total list of 17 instructional goals and 17 managerial goals via the needs assessment. The stated District "thrusts" emphasis in a given year will be oriented to the specific programs which are shown on the goal matrix.

EFFORTS TOWARD "CONSOLIDATION"

For the last few years, the District has been experiencing rapid change as well as growth. The development of an Educational Plan will give us a chance to consolidate efforts of each of the units interacting to provide a more efficient delivery system for students--a delivery system meeting community expectations. It will give us a chance to focus on programs and to provide district-wide unity of effort.

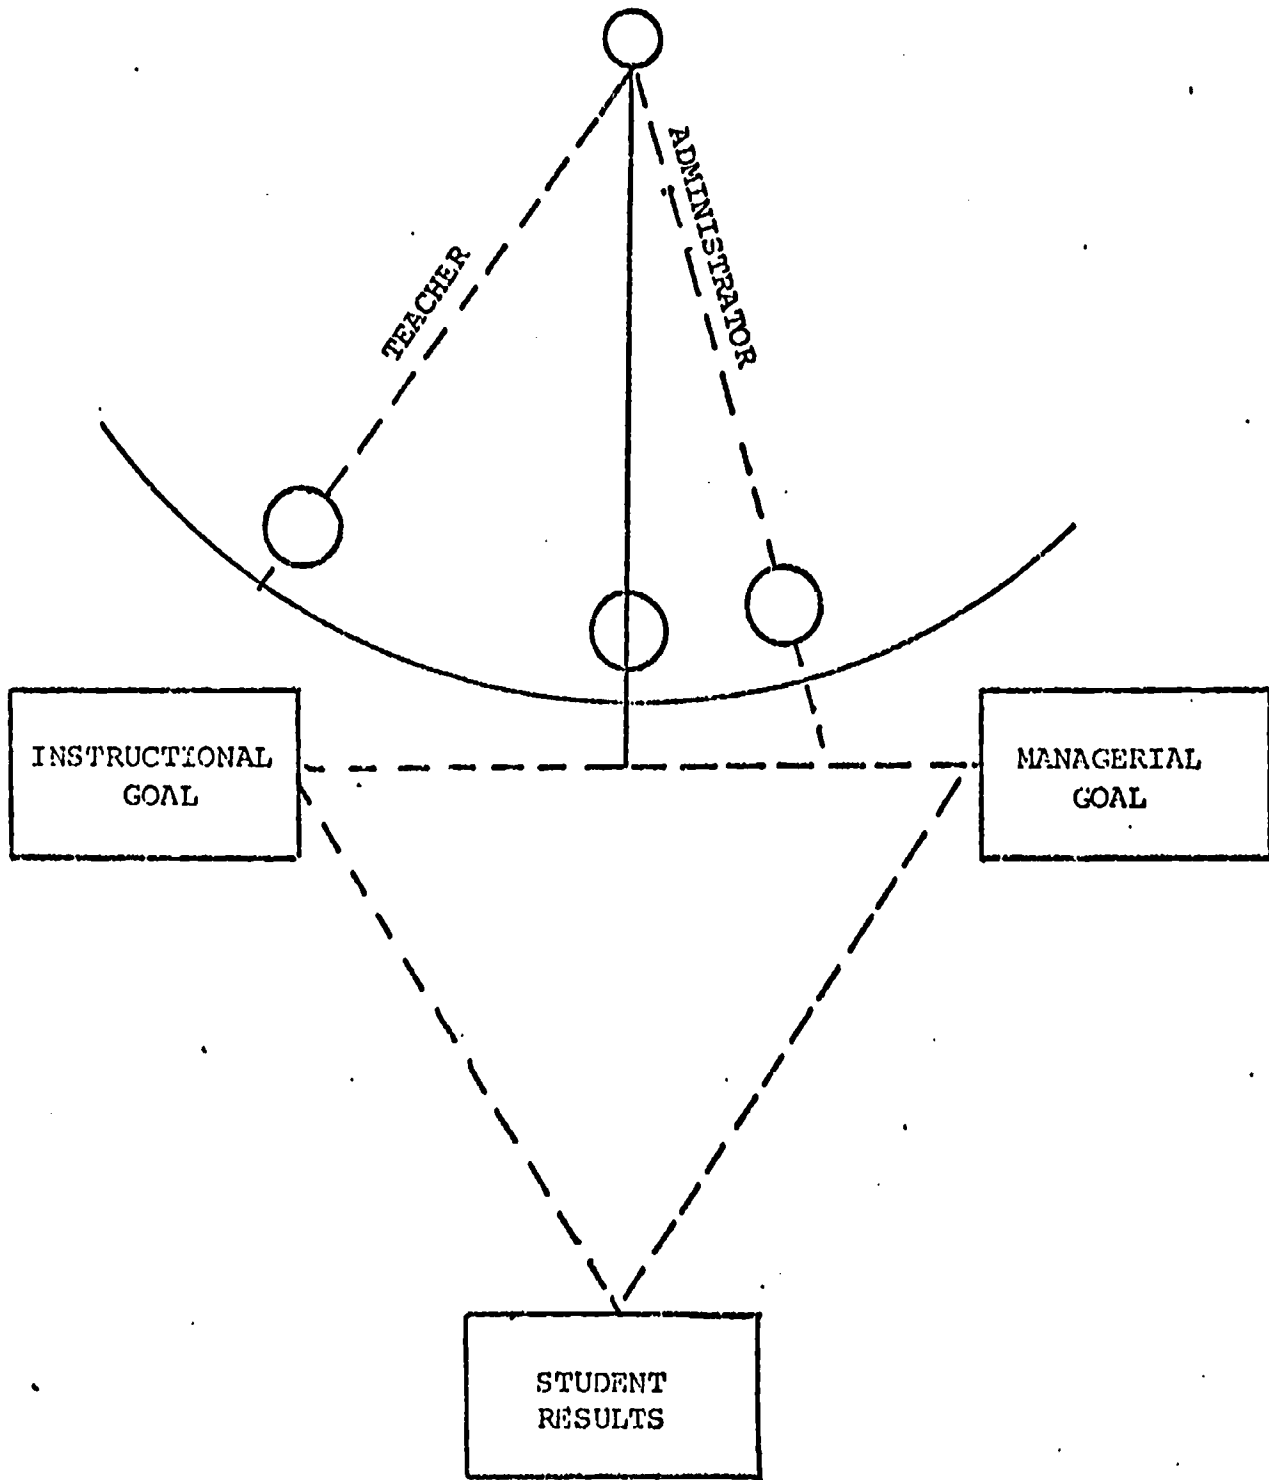

Future assessment of the Educational Plan will provide a base for cost effective operation as schools and departments share their methodology to meet community commitment.

A BEGINNING EFFORT

This Plan as presented is a beginning document in a rather rough and formative stage. The District and school plans will require review and input to polish these efforts. The press of time in getting the effort off the ground has restricted completion of many of the desired components in the development of a complete educational plan. It is intended, as we prepare for the 1974-75 Educational Plans, that the staff will be able to implement the following improvements:

CHART G

PERFORMANCE OBJECTIVE EMPHASIS

1. Increased Needs Assessment - Each of the schools should base its educational plan on the assessment of data which shows to what degree they are accomplishing community goals and thrusts. Since we are just developing evidence and baseline data during the first writing, new data should provide better input.
2. Total Staff Input - Beginning documents are difficult for a total staff to react to, since it is difficult to perceive the finished product. In the next year, the staff will have an opportunity to assess and revise their unit contributions.
3. Program Accountability - Until the first two steps are completed, it will be difficult to arrive at true accountability for the product. Further refinement will develop program levels for which the team can measure its program progress and report back to the community at a level where they can accept responsibility for the end result.
4. Community Identified Managerial Goals - By next year, we hope to have a committee on Goals input to verify or validate the community managerial goals which are to be used in the development of educational plans.

The timeline from this report is to start the interaction and planning to produce the 1974-75 Educational Plan in January. This will provide the staff with the capability of:

1. Knowing the community expectations upon which programs must be developed.
2. Having the program input developed and compared before individual self-directed management plans are completed upon which individual evaluation will be based.

It is not the intent of the Educational Plan to become the instrument upon which individual accountability will be completed. The merit in having the Educational Plan is to provide focus and team work on the total educational program--an effort which is long overdue.

SUPERINTENDENT'S ROLE

The role of the Superintendent in the Educational plan has been to provide the leadership for its development by:

1. Bringing about the community elements which provide the input to the program.
2. Providing the resources through which the Plan can be developed and implemented.
3. Interpreting the Plan to the community and to the Board of Education.
4. Providing an administrative atmosphere conducive to the type of team effort which will make this Educational Plan effort effective in providing a delivery system attuned to community needs.

As the Superintendent is accountable directly to the Board of Education for the entire educational program of the District, the entire Plan represents the effort of the Superintendent and his team to implement the community expectations. The specific District Goals for the 1974-75 school year are:

DISTRICT GOALS

This series of goals represents the District's goal emphasis in meeting the community goals. As the District administration accepts the responsibility for all the goals established in the community instructional and managerial phases, these goals represent the direction and emphasis for the 1974-75 school year

DISTRICT INSTRUCTIONAL GOALS:

1. Self-Realization - The District will provide an educational atmosphere whereby students can accumulate knowledge, communicate effectively, develop mental and physical competency, and rationally determine their needs for leisure time activity and continuing education.
2. Human Relationships - The District will assist the home and the student in the development and understanding of cultural heritage, peer relationships, moral values, and individual contributions each student can make to the community.
3. Economic Efficiency - The District will provide each student with skills which will lead to economic efficiency, including saleable skills, consumer knowledge, and assistance in career selection.
4. Civic Responsibility - The District will provide an opportunity for students to become aware of the democratic process and their relationship to that process and government.

DISTRICT MANAGERIAL GOALS:

1. Administrative Support - The District will provide leadership whereby the diverse talents of its educational team will be able to participate in the decision-making process; whereby communications, equal opportunity, and governmental resources will contribute to the viable operation of the schools.
2. Instructional Support - The District will contribute to the school resources, assist in evaluation, provide in-service education, and develop means of support to achieve the educational plans.
3. Operational Support - The District will provide for the housing needs of the schools, transportation efficiency, and an effective fiscal operation to the end that the schools will have a voice in fiscal management as it relates to their contribution to the educational product.

SUPERINTENDENT'S THRUSTS

This needs assessment takes into account the managerial roles which will emanate from the office of the Superintendent in fulfilling his contributions to the Educational Plan. No plan would be accurate in its structure if it did not take into account student results. Student results, on the other hand, are expressed in the quality of instructional program being offered. In this behalf, the thrusts being presented are oriented to improving the instruction provided in the West York Area School District:

1. Research and Development - The District has assumed leadership in providing funds and resources for a research and development program. School administrators and staff should develop systems that will carefully monitor and evaluate programs in this area. (C.I.G. 1.1 - 4.2)*
2. Learning Development Program - We must look carefully at the way we implement self-directed management, how we allocate and manage our resources, and how we find the balance between self-direction and management--or better, what is the role of participation in management. (C.M.G. 1.1)**
3. Staffing Units - District administrators have been working on a new staffing unit concept for the schools and the District. Plans called for the finalization of this task by the middle of the first semester. (C.M.G. 1.2)

*Community Instructional Goal #

**Community Managerial Goal #

4. Affirmative Action Program - Tremendous progress has been made in the improvement of community relations. The District's Affirmative Action Program is noted as one of the finest in the state. It is being used as a model by not only other school districts, but by municipal governments as well. We must continue to maintain the quality of this program (C.M.G. 1.3)
5. Classification Study - The Classification Study for non-instructional personnel was negotiated in early December. It is hoped that this new pay plan can be kept up to date annually and that it will create higher morale among all employees. (C.M.G. 1.3)
6. School Community Relations - The areas of committee participation, governmental liaison, and public information all assist us in being able to improve the effectiveness of the instructional program at the local school. We will continue the effort in this direction. (C.M.G. 1.4, 1.5)
7. In-Service Education - The quality of a district's performance is measured by the quality of its staff. It is imperative that an effective in-service program be provided for the members of the team. Efforts to further develop this service will be a major staff concern. (C.M.G. 2.1)
8. Improvement of Guidance Services - Several new methods of providing guidance services are to be assessed by the schools this next year. We plan to concentrate time and resources in an effort to bring quality services to all students. (C.M.G. 2.2)

9. Educational Plans - We have to analyze ways of accomplishing our general instructional goals. Included are how we develop and carry out educational plans, school and district goals, identification and communication of performance indicators, and how we coordinate the implementation of our plans efficiently and effectively. (C.M.G. 2.3; C.I.G. 1.1 - 4.2)
10. Evaluation Systems - Both programs and personnel, if they are to be effective, must have continuous evaluation. Through the expansion of the performance indicator base, new input into the baseline data bank, and the improvement of the educational processing system, we should be able to account for our efforts and place improved insights on future program growth. (C.M.G. 2.5)
11. Management Accounting Information - The District will be moving to project cost down to specific classes and, thus, provide more meaningful data upon which to base instructional program growth. (C.M.G. 3.1)
12. Building Program - We will continue the building programs which have been approved and which are within the resources of the District. (C.M.G. 3.3)

This series of thrusts does not negate the responsibility of any member of the team to work toward full implementation of the community instructional and managerial goals which have been developed. It does provide a focus of emphasis upon which the local schools and their portion of the community can contribute for the 1974-75 school year.

The administration and staff is proud to present the West York Area School District's Educational Plan for the 1974-75 school year.

I. UNIT PHILOSOPHY:

Members of the Central Administration Services carry as a prime thrust the ability to provide maximum support services to the local schools to increase their effectiveness in individually meeting community expectations and District thrusts, resulting in innovative approaches to education which will improve student results.

II. UNIT INSTRUCTIONAL GOALS: (List in priority)

- 1) The Central Administration Services will provide an educational atmosphere whereby students can become adaptable, accumulate knowledge, communicate effectively, develop mental and physical competency, and rationally determine their needs for leisure time activity and continuing education.
- 2) The Central Administration Services will provide the necessary support for the administration and teaching staff at each school in order that students will develop to their fullest capability an understanding of their cultural heritage, peer relationships, moral values, and community contributions.
- 3) The Central Administration Services will provide support to the schools in order to ensure the development of students' saleable skills, economic efficiency, consumer knowledge, and career selection.
- 4) The Central Administration Services will assist in providing an instructional program where students will gain a knowledge, understanding, and appreciation of their American heritage, their civic duties, and a sense of responsibility to their government.

III. UNIT MANAGERIAL GOALS: (List in priority)

- 1) The Central Administration Services Division will provide assistance to the schools in implementation of Self-Directed Management (SDM), the public information program, Board and administrative policy, and District and school procedures.
- 2) The Central Administration Services will increase support services to the schools to assist in evaluation of instruction, to provide and encourage in-service activities, and to develop other means of support which will assist the schools in achieving their educational plans.
- 3) The Central Administration Services will assist in determining and providing optimum educational facilities, services, and fiscal management information required to meet the instructional needs of our youth.

SPECIAL SERVICES

I. UNIT PHILOSOPHY:

The Special Services of the West York Area School District are oriented to assisting students to become self-actualized. Toward that effort the resources and staff of this Division are dedicated to assisting schools in helping students reach their goals.

II. UNIT INSTRUCTIONAL GOALS:

- 1) To provide a program design through Pupil Personnel Services whereby students can become adapted to life's challenges, acquire attitudes appropriate to life-long learning, develop personal interests to enjoy leisure time, and develop effective mental health concepts.
- 2) To provide program support to the schools whereby students can develop sound character traits, awareness of the worth and dignity of others, effective peer relationships, and an understanding of the wholesome roles of the family unit.
- 3) To provide program support whereby each student will gain the opportunities to make mature and appropriate educational and occupational choices and to develop skills and flexibility necessary for economic competence in a rapidly changing society.

III. UNIT MANAGERIAL GOALS:

- 1) To provide the administrative support to the Pupil Personnel Services Program which will enable the counseling staff to function efficiently, effectively, and cooperatively as a member of the Pupil Personnel Services team.
- 2) To assist the counseling staff in personal development, program development, community liaison, and program evaluation oriented toward the established educational plan.
- 3) To participate with all members of the educational team in providing the highest quality Pupil Personnel Services Program at the lowest possible cost.

NOTE: COMPLETE A MATRIX ON EACH GOAL

GOAL : TO PROVIDE A PROGRAM DESIGN THROUGH PUPIL PERSONNEL SERVICES WHEREBY STUDENTS CAN BECOME ADAPTED TO

LIFE'S CHALLENGES, ACQUIRE ATTITUDES APPROPRIATE TO LIFE-LONG LEARNING, DEVELOP PERSONAL INTERESTS

TO ENJOY LEISURE TIME, AND DEVELOP EFFECTIVE MENTAL HEALTH CONCEPTS. (SELF-REALIZATION)

COMMUNITY INSTRUCTIONAL GOAL REF NOS: 1.0

COMMUNITY MANAGERIAL GOAL REF NOS: _____

PERFORMANCE INDICATORS:

1. Improved special education programs.

4. Changes in SAM Program.

2. Accreditation

3. Growth of the TMR curriculum.

PERFORMANCE OBJECTIVE	WORKPLAN AND MONITORING	MONTHS													
		July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May	June		
1. By June of 1975, all schools will have identified students with exceptional needs and the students will have been placed in the proper program. (C.I.G. 1.1)*	IDENTIFICATION OF SPECIAL EDUCATION STUDENTS a. Develop procedures for monitoring individual school's work plan which is in progress. b. Establish priorities based on housing availability. c. Develop strategy to strengthen specific special education programs. d. Establish a system of liaison with elementary schools.				X	X		X	X		X				

PERFORMANCE OBJECTIVE	WORKPLAN AND MONITORING	July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May	June
e. Establish a regular ongoing in-service training for all teachers involved with exceptional children.				X	X			X	X				
f. Conduct a comprehensive workshop for teachers, counselors, and administrators interested in students with exceptional needs.			X		X	X		X	X				
g. Design a program to meet the needs of potential drop-outs that is suitable for other than students qualifying for title I compensatory education.		X	X	X	X	X	X	X	X	X	X	X	X
h. Design a program to meet the learning deficiencies of the students profiled by the guidance department and outline the requirements, including methods and equipment.		X	X	X	X	X	X	X	X	X	X	X	X
i. Develop alternatives to deal with disruptive students and disruptive behavior, including suspension, exclusion, expulsion, etc.		X	X	X	X	X	X	X	X	X	X	X	X
j. Develop a systematic analysis of data that is related to the mobility problem of students and the drop-out problem of students:		X	X	X	X	X	X	X	X	X	X	X	X
a. Obtain													
b. Analyze													
c. Report													

GOAL : TO PROVIDE PROGRAM SUPPORT TO THE SCHOOLS WHEREBY STUDENTS CAN DEVELOP SOUND CHARACTER TRAITS,

AWARENESS OF THE WORTH AND DIGNITY OF OTHERS, EFFECTIVE PEER RELATIONSHIPS, AND AN UNDERSTANDING

OF THE WHOLESOME ROLES OF THE FAMILY UNIT. (HUMAN AWARENESS)

COMMUNITY INSTRUCTIONAL GOAL REF NOS: 2.0

COMMUNITY MANAGERIAL GOAL REF NOS: _____

PERFORMANCE INDICATORS:

1. Effective Health Council

2. Home Teaching Program.

3. Effective Reading Program

PERFORMANCE OBJECTIVE	WORKPLAN AND MONITORING	HEALTH COUNCIL												
		July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May	June	
1. 80% of the students, teachers and parents will express satisfaction with the District Health Program. (C.I.G. 2.1)*	<p>a. Develop an instrument to survey student, teacher, parent, and community attitudes toward the school's health service program.</p> <p>b. Administer the survey.</p> <p>c. Analyze the data, form conclusions, and make recommendations for changes in the program.</p> <p>d. Conduct in-service training program to study new techniques for school health program.</p>				X	X	X		X	X		X	X	

PERFORMANCE OBJECTIVE	WORKPLAN AND MONITORING	July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May	June
<p>2. Conduct a Home Teaching Program for all homebound students that meets the legal requirements. (C.I.G. 2.4)</p>	HOME INSTRUCTION												
	e. Monitor new programs in each school.				X	X	X	X	X	X	X	X	X
	f. Conduct monthly meetings with school nurses				X	X	X	X	X	X	X	X	X
	a. Identify the homebound student.			X	X	X	X	X	X	X	X	X	X
	b. Evaluate his educational needs.			X	X	X	X	X	X	X	X	X	X
	c. Assign appropriate teacher to students.			X	X	X	X	X	X	X	X	X	X
<p>3. As a result of pre and post-tests in reading, the net gain of every student receiving instruction in reading will be recorded. The average net gain for the reading area will be 1.5 grade levels. Whenever possible, objectives should be developed with all students and articulation should be translated to either English or the language arts at the secondary level.</p>	d. Complete and submit State reports for reimbursement.										X	X	
	a. Analyze and determine the community's educational needs in reading and the desired levels of student performance.	X	X	X	X	X	X	X	X	X	X	X	X
	b. Identify skill areas that have a high correlation with success in reading and help teachers impart these skills through the use of activities and exercises.	X	X	X	X	X	X	X	X	X	X	X	X
	c. Increased performance in the area of reading will contribute directly to increased performance in the areas of social studies and math.	X	X	X	X	X	X	X	X	X	X	X	X

GOAL : TO PROVIDE PROGRAM SUPPORT WHEREBY EACH STUDENT WILL GAIN THE OPPORTUNITIES TO MAKE MATURE AND

APPROPRIATE EDUCATIONAL AND OCCUPATIONAL CHOICES AND TO DEVELOP THE SKILLS AND FLEXIBILITY

NECESSARY FOR ECONOMIC COMPETENCE IN A RAPIDLY CHANGING SOCIETY. (ECONOMIC EFFICIENCY)

COMMUNITY INSTRUCTIONAL GOAL REF NOS: 3.0

COMMUNITY MANAGERIAL GOAL REF NOS: _____

PERFORMANCE INDICATORS:

1. Growth in adult programs.
2. Expansion of counselor/student contact.
3. Reduction in program changes.
4. Improved career testing services.

PERFORMANCE OBJECTIVE	WORKPLAN AND MONITORING	COUNSELOR/STUDENT CONTACTS												
		July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.	May	June	
1. An increase of 25% of counselor/pupil contacts will occur. (C.I.G. 3.2)	a. Collect baseline data on the number of pupil/counselor contacts during 1973-74.			X	X	X	X	X	X	X	X	X	X	X
	b. Analyze the data and in conjunction with Guidance Chairman, devise a program to increase counselor/pupil contacts.							X	X	X	X	X	X	
	c. Quarterly, monitor the program and implement changes as needed.						X	X			X			
2. Student program changes will be decreased over the 1973-74 school year by 15% based on improved career counseling. (C.I.G. 3.2)	PROGRAM CHANGES													
	a. Collect baseline data on the average number of program changes per student for 1973-74.			X	X	X	X	X	X	X	X	X	X	X
