ABSTRACT

This document lists chapters or sections from books and handbooks to assist inservice teachers in developing their verbal interactive skills in the classroom. Minicourse lessons and plans are referred to frequently. After an initial diagnosis of the teacher's performance level, a training counselor meets with the teacher and utilizes such a list to suggest specific learning activities to help the inservice improve his/her performance. Roger Pankratz, Western Kentucky University
John Williams, Emporia Kansas State College

The following list is an example of prescriptions for helping inservice teachers develop their verbal interactive skills in the classroom. After an initial diagnosis of the teacher's performance level, a training counselor meets with the teacher and suggests specific learning activities to help the inservice teacher improve his/her performance.

This method of identifying a set of prescriptions for a given area of teacher performance is being expanded to other areas of need for inservice professional development. A prescription list of this type is used only after an assessment of a teacher's present performance to suggest specific learning activities that would be the most useful to the teacher.

Reference numbers from 0-25.9 are reserved for reference to Minicourse chapters or lessons. For instance, the reference number 9.6 stands for Higher Cognitive Questioning, Minicourse number 9, chapter 6. It is felt that such a strategy will help the training counselor and the inservice teacher to more easily interpret the diagnosis evaluation sheet. Therefore, the reference numbers are not continuous. Reference numbers 26.0 and above are for references other than Minicourses and, in general, the first two digits refer to a specific book, paper or module cluster and the third digit to a specific portion of the book, paper or module cluster.
