**ABSTRACT**

The Denver Public Library (DPL) conducted a market analysis of its success in meeting the information needs of three segments of the population of Denver, Colorado: households, business firms, and city government and quasi-government agencies. Information was sought on current DPL usage and nonusage practices of these three groups, their levels of awareness and attitudes toward the DPL system, and their principal information needs and sources. The project's data collection phase consisted of three surveys conducted concurrently between February and June 1974. Personal interviews were conducted in a sample of households, while questionnaires were mailed to businesses and government agencies. The data analysis phase of the project produced a number of recommendations for specific actions by the DPL to make the system more responsive to its current and potential users. The bulk of this report consists of presentation and analysis of the survey responses of the three population segments under study. (Author/SL)

The function of the DENVER PUBLIC LIBRARY is to: (1) provide information needed by the citizens of Denver in their daily lives; (2) encourage and facilitate self-directed learning; (3) enhance the quality of life for Denver citizens.

The DENVER URBAN OBSERVATORY was established in January 1970 to perform urban research. As one of a number of urban observatories in the National Urban Observatory network, the establishment and continued operation of this Observatory is made possible with the support of the National League of Cities; Department of Housing and Urban Development; Department of Health, Education and Welfare; City and County of Denver; University of Denver; Metropolitan State College; Community College of Denver; and the University of Colorado.

The study was initiated and supported by the Denver Public Library, the Denver Urban Observatory, and supported by the Colorado State Library through the Library Construction and Services Act with assistance from the Department of Housing and Urban Development. The research and studies forming the basis for the report were conducted pursuant to a contract between the Department of Housing and Urban Development and the National League of Cities. The substance of such research is dedicated to the public. The authors and publisher are solely responsible for the accuracy of statements or interpretations contained herein.

### REPORT HIGHLIGHTS

Denver Public Library (DPL) users. DPL's registered citizen users tend to be young, well-educated, caucasian women in households whose annual earnings total \$9,000 or more. The 7,000 Denver businesses using DPL usually are the older firms employing fewer than 250 persons who work mainly in the service and retail/wholesale industries. Fifty-eight of Denver's 84 local government and quasi-public agencies use DPL; heaviest government use is by small agencies working in the planning and management and public protection areas. *The most popular DPL services for citizens, business, and government involve the lending of publications and the provision of reference services. The single most important reason given for nonuse by all three segments is lack of knowledge about what DPL services are available (Chapter II.)*

Public knowledge and attitudes. The data reflect a fairly widespread lack of knowledge concerning what library services are available. Most citizens regard the Denver Public Library as a convenient establishment to get to, but one that is cold, unfriendly, unpleasant to visit, and not a place where it is easy to get what is wanted. Despite these feelings, citizens at home and at work give the Library an overall "excellent" rating for the services it provides (Chapter III).

Information needs. Citizens most often want information about news and current events, medical and health care, and consumer products and services. For business firms, the most mentioned areas of need are science and technology, management, and government activities. For government agencies, the greatest demand is for census and demographic data, plus information on budgets, legal matters, personnel management, and physical planning and development. *The prime barrier to adequate definition and resolution of Denver's information needs is a widespread lack of awareness of what information exists, who has it, and how it can be obtained.*

### Recommendations

1. DPL management should review the nature and scope of Library efforts to familiarize Denver citizens, business firms, and local government agencies with Library services.
2. Librarians responsible for managing major DPL services should place greater emphasis on identifying just who in the Denver population can benefit from operation of their services.
3. Three special DPL consulting committees--one representing households, another business, and the third government--should be established to provide assistance in evaluating the quality of current services, and in generating ideas for upgrading present services or adding new services.

## BEST COPY AVAILABLE

4. DPL management should delay for one year implementation of any of the possible future services reviewed during this survey.

5. DPL management should introduce any of the proposed new services strictly on an experimental basis to allow for appropriate cost-benefit analysis.

Specific steps that could be taken to implement these recommendations are presented in Chapter V of this report.

### Acknowledgements

Many persons in Denver government, industry and the academic community contributed greatly to this project. In addition to all the citizens at work and at home who participated, many librarians gave generously of their time and expertise. In particular, we acknowledge the contributions of Henry Shearouse, Jr., City Librarian, and his associates in the Denver Public Library, as well as the encouragement and assistance of William Heiss of the Denver Urban Observatory.

Within the University of Denver, we value the assistance provided by George Bardwell, Sandra Bleistein, Carole Cristiano, Elizabeth Dodds-Scott, Beverly Doyle, Linda Elliott, Susan Grosheider, James May, Harold Mendelsohn, Gerald Schafer, Jean Tilsley, and John Welles.

## CHAPTER I

### INTRODUCTION

#### Background

The problem area. Effective management of a metropolitan public library system requires periodic review of questions concerning library services. Which services should be continued as currently operated? Which services should be modified or terminated? Which services might be added?

Answering these questions adequately, within limitations of available funding, personnel, and facilities, requires that administrators of metropolitan public libraries attend to the following more specific issues:

- Library usage: How many people of what types make what uses, or fail to make what uses, of the metropolitan public library with what frequency? How does library use affect, and how is it affected by, the use of other locally available information sources?
- Library image: What do different people know about various library services? What attitudes, opinions, and beliefs do current and potential users have concerning library services? Why do particular segments use, and other segments fail to use, specific library services?
- Information needs/problems: What kinds of information are wanted by different types of persons living in the area served by the library? How much competition or cooperation exists among various sources in delivering information to various persons? What information needs currently are not being met or are being met only poorly?
- Future services: What options exist for making the metropolitan library system more responsive to its various constituencies?

DPL response. Considering the complexity and importance of these issues, the administrators of the Denver Public Library (DPL) have attempted in a variety of ways over the past few years to find answers that have been used to design and redesign the services provided to the community. In one of the latest efforts, DPL and the Denver Urban Observatory commissioned the Denver Research Institute early in 1974 to assist in analyzing these issues. This report highlights the principal results of that particular evaluation activity.

Objectives and Procedures

Objectives. The research project was aimed at assessing the status of public library service in the City and County of Denver, Colorado. To this end, the study was conceived as a kind of "market analysis" for library services to meet the information needs of three segments of the Denver population: (a) households, (b) business firms operating in the City, and (c) City government and quasi-government agencies.

The study had four specific objectives:

1. To determine current DPL usage and nonusage practices of the three population segments;
2. To assess the levels of awareness and attitudes of these three segments concerning the DPL system;
3. To identify the principal information needs and problems of these three segments; and
4. To formulate a number of specific actions DPL might take to make the system more responsive to the current and potential Library users.

Procedures. The research project proceeded through these phases: backgrounding, data collection, and data analysis. The backgrounding phase involved a literature review, interviews with key DPL personnel, and a pilot project to develop appropriate data collection instruments.

The data collection phase consisted of three surveys conducted concurrently between February and June 1974. The first survey involved a sample of Denver's 197,000 households. Personal interviews were conducted with members of 439 households out of 609 households selected on a random, block-sampling basis. Contact with nonrespondents produced data for an additional 36 households, bringing the total household sample size to 475. Seven percent of the households were vacant. Appendix A contains the interview schedule used, as well as the data generated, in the household survey.

The second survey of the data collection phase was a mail questionnaire of a randomly selected, stratified sample representing the 26,119 commercial firms operating in Denver. Altogether 110 of the 165 firms originally contacted cooperated by completing the questionnaire that is reprinted in Appendix B. Follow-up with nonresponding firms produced data from 32 more firms, resulting in a total business sample size of 142. Five percent of the firms in the original sample were no longer in business.

The third survey of the data collection phase consisted of a mail questionnaire of the 84 Denver City government agencies and quasi-public institutions whose main function is serving the needs of the

Denver community. Eighty (95 percent) of the 84 agencies participated fully in this study. The questionnaire used in this "government" survey is reproduced in Appendix C along with the responses to each question.

Data analysis, the final phase of this project, extended through the entire study with special concentration during July and August 1974.

### Outline of Report

Chapter II presents the findings on DPL usage and nonusage by citizens, business, and government. The question of why they use, or fail to use, DPL services then is addressed: Chapter III profiles the knowledge and attitudes of the three segments concerning DPL, and Chapter IV explores the character of the information needs that prompt different segments to use DPL and other information sources. Finally, the principal recommendations growing out of this study, along with some suggestions for implementing the recommendations, are included in Chapter V.

## CHAPTER II

### LIBRARY USE AND NONUSE

This chapter treats the following question: How many people of what types make what uses of the Denver Public Library with what frequency? The analysis is presented by major population segment: citizens, business and government. Users are defined as those persons or organizations whom respondents claim used a DPL service at least once during the past twelve months.

#### Citizen Users/Nonusers

How many citizens of what types? Employing the "DPL user" definition just given, roughly one out of two (53 percent) of Denver's 197,000 households can be characterized as a user household. When the number of DPL users--2.2 persons--in each user household is considered, slightly over two in five (43 percent) of the City's 530,000 residents use DPL services.

The following profile of these users emerged during data analysis. On a proportionate basis, DPL citizen users are more likely to be young, well-educated, married, caucasian women in households whose annual earnings total \$9,000 or more. Citizen users also tend more often than nonusers to own their own automobiles, to be more active in community life, and to vote more frequently in municipal elections. Finally, DPL citizen users rely far more heavily than nonusers on newspapers, and much less heavily on television, as major sources of information about what is happening in the world. (Relevant data regarding DPL citizen users and nonusers are presented in Tables D1-3, Appendix D.)

Thus, the citizen "public" that the DPL serves consists primarily of Denver's upper-middle class, a situation that is true for many other large metropolitan public libraries (Berelson, 1950; Martin, 1969; Mendelsohn, 1967; Warner, Murray and Palmour, 1973).<sup>1</sup>

The lower income citizens, whose household annual earnings total less than \$9,000, appear to use the DPL in disproportionately lower numbers because they are less literature dependent, more inclined to obtain information from television, less well-educated, and less mobile than middle income families.

Use what DPL services? Of all DPL services, (a) the circulation of books and other documents for home use, and (b) the operation of reference services to look up particular facts represent by far the major

---

<sup>1</sup>References are listed on the final page of this report.

**BEST COPY AVAILABLE**

public services provided. Three out of four household users cited document circulation, and two out of three mentioned reference services, although rather sharp differences exist on these points when comparing usage of the main DPL downtown facility with the use of branch locations (see Table 1 below and Table D4 in Appendix D).

A number of DPL household services seem surprisingly underutilized, including bookmobiles, files of newspaper clippings, films, and special programs. Least used of all are DPL-provided meeting facilities, tapes and cassettes, and large print books. With regard to large print books for people who have serious eyesight problems, the relatively low level of usage is not difficult to understand: the Denver citizens who cannot see well enough to read make up less than .01 percent of the 530,000 residents of the City and County. This finding points up the fact that relatively little use of a DPL service does not necessarily equate with its unimportance: importance should be understood in terms of the proportion of usage by the population segment(s) that can be expected to benefit from the use of the service.

Besides the DPL there are various other sources where residents can go for information. In this survey, citizens were also queried regarding their use of eleven other major information sources in addition to the DPL. The findings reveal that no significant differences exist between men and women in terms of their use of the other information sources, including DPL. Major differences exist, however, among Denver citizens when compared on the basis of race, household income, years of formal education and age.

White and black Denverites most frequently use the mass media to obtain needed information; Spanish Americans, in sharp contrast, depend much more on locally available authorities and experts for information and guidance.

The data point up the fact that the DPL is a major information source to all three segments of the Denver population (see Table D5, Appendix D). It is interesting to note that regardless of race, Denverites strongly prefer using DPL to all other types of libraries operated in metro Denver.

A strong correlation exists between household income and the variety of information sources used: the higher total household income, the greater the variety (see Table D6, Appendix D). Only one-half of the lowest income households report using DPL, whereas four out of five of the highest income households frequently use the Public Library.

A strong association exists between number of years of formal education and the variety of information sources Denverites use to obtain information (see Table D7, Appendix D). The better educated depend far more heavily on many more sources, including DPL, than the less well-educated.

Denver citizens aged 65 or older generally do not use DPL as heavily as persons in younger age groups. On a proportionate basis, only two out of five older citizens use DPL, compared to roughly three out of four DPL users in the 18-64 age groups (see Table D8, Appendix D).

With what frequency? For analytical convenience, DPL use frequency is divided into two categories: frequent use (11 or more times during the past 12 months) and infrequent use (from one to ten times). *The largest proportion of frequent users are caucasian women in families owning two or more cars who prefer to use the main DPL location in downtown Denver.* The data in Table D9, Appendix D, suggest that no significant differences exist between infrequent citizen users and nonusers in terms of sex or preferred DPL location. (Table D10, Appendix D, presents detailed breakdowns on Library use and nonuse.) Nonusers, however, differ from users--infrequent or frequent--in two important areas: race and mobility. *Citizen nonusers tend disproportionately to be Spanish Americans owning one automobile.* Not surprisingly, DPL cardholders are much heavier users of the Library than noncardholders. Four out of five cardholders use

## BEST COPY AVAILABLE

the Library, whereas only one out of eight noncardholders use DPL. (Additional data concerning cardholders are shown in Table D11, Appendix D.)

Why citizen nonuse? Citizens not using the DPL in the past 12 months cited *four main reasons: usually too busy to use a library (34 percent); never think of going to the Library (23 percent); not having a Library card (21 percent); and not reading very much (19 percent)*. Only a very small percentage (i.e., fewer than ten percent) mentioned such reasons as paying fines, not being able to get to the Library, inconvenient hours, or being able to get wanted books from non-DPL sources. No one mentioned having problems with Library personnel, poor telephone response, or feeling uncomfortable or embarrassed. (See Table D12, Appendix D.)

### Business Users/Nonusers

How many firms of what types? *Approximately one in four (27 percent) of Denver's 26,000-plus firms use the DPL.* The data reveal that, on a proportional basis, *DPL business users are smaller (employing fewer than 251 employees), rather than larger, and operating mainly in the service and retailing/wholesaling industries (see Table 2).*

*Despite their numerical dominance, service and retailing/wholesaling firms, many of which employ fewer than 25 persons, are substantially underrepresented among DPL business users considering the proportions of firms within both industries which currently use DPL services (see Table 3).* This finding may reflect a basically different dependence on literature among Denver firms. DPL business users may simply require more literature to conduct their day-to-day work. Alternatively, these data may result from DPL initiatives to attract only certain segments of the total business community to the ranks of Public Library users.

Another fact related to DPL business use is worth noting: *the longer-established firms--those that have been located in Denver for ten years or more--are substantially heavier DPL users (by a two to one ratio) than more recently located firms.* This finding may reflect the smaller size and highly specialized nature of many new firms, plus their lack of sufficient resources to become familiar with and use local information sources. It also may involve a lack of attention by appropriate DPL personnel to the task of contacting younger firms and/or providing them with adequate user-orientation materials.

Business dependency on DPL vis-a-vis locally available information sources varies dramatically by size of firm. The data in Table E1, Appendix E, reflect a substantial difference between large and small firms in their use of DPL services: *DPL ranks as second most depended-on source of external information for large firms, but only fifth most-used by smaller firms.* Large firms place only business and trade publications ahead of DPL among a set of 12 major external information sources. Small firms rank DPL fifth in use after business and trade

## BEST COPY AVAILABLE

publications (which they, like large firms, also list as most-used), equipment suppliers, business and trade associations, and academic and scientific groups in that order.

Another interesting finding related to DPL business usage: *DPL business users are much more reliant on other external information sources than DPL nonusers.* DPL services cannot be considered "competitive" with other locally available information sources: heavy DPL users often are heavy users of other sources.

Use what services? If usage of a service is accepted as a guide to its relative value to a client, then *Denver businesses find two DPL services most valuable: the provision of business and industry directories, and lending books related to different business fields.* Interestingly, only two in five of the firms using DPL services request assistance in finding extensive information; and fewer still, only one in four, seek DPL help in answering short, factual questions. Least used among the 17 DPL business services examined are the loaning of 16 mm films: only seven percent of the business firms using other DPL services borrow films, and then only rarely. (Table E2 in Appendix E presents additional data on the usage of 17 business services operated by the DPL.)

With what frequency? Sharp differences exist among large and small DPL business users on the frequency with which they use different Library services. The data in Table E3, Appendix E, suggest strongly that *large firms are the only regular users of DPL services.* Large firms listed five DPL services as "regularly used": providing catalogues and indices (31 percent of the large firms use this regularly); lending science and engineering books (22 percent); circulating government documents (21 percent); furnishing science and engineering magazines (20 percent); and supplying self-service copying machines (20 percent). Of these five services, 16 percent of the small firms listed DPL's lending of science and engineering books as the only one they use regularly.

Not surprisingly, small firms (12 percent all told) are the only ones to list themselves as regular users of DPL-furnished business and industry directories. Most firms purchase such documents for routine, in-house use since they often are essential in conducting business.

Why business nonuse? *Lack of awareness of what DPL services are available stands out as the most significant reason why more Denver businesses do not use the Public Library.* Forty-six percent of the nonusers gave this as their prime reason. Size of firms was not significant on this point.

### Government Users/Nonusers

How many agencies of what types? *Seven out of ten local government agencies use DPL during the course of their work. DPL government users are small agencies working in the planning and management (31*

## BEST COPY AVAILABLE

percent) and public protection (16 percent) areas (see Table F1, Appendix F). The smallest number of users are larger agencies in the areas of public transportation (four percent) and welfare (four percent).

An interesting series of discrepancies exists when the question is raised about the use of DPL services within each of the mission areas. Thus, for example, 100 percent of the welfare agencies use DPL, while only 82 percent of the planning and management agencies are listed as DPL users. An even greater disparity exists in the public protection agencies, where only 54 percent of the public protection agencies are DPL users. (Relevant data are presented in Table F2, Appendix F.)

Use what services? Government agencies most often use DPL's document lending service (89 percent), and the Library's supply of catalogues and indices (88 percent). The data in Table F3, Appendix F, suggest that a majority (58 percent) of the government users find much use for the Municipal Reference Service and for the telephone request service. Among the least-used DPL services government's relative nonuse of interlibrary loans, the delivery of library materials, and routing lists of new government documents should be noted.

With what frequency? Larger agencies (those employing 200 or more persons) are proportionately the most frequent users of DPL services. Twice the proportion of large agencies compared to medium and small agencies used DPL services over ten times during the past 12 months.

Why government nonuse? Two reasons are given most frequently for government nonuse: simply no need (47 percent) or not knowing what services are available (37 percent).

### Summary

Denver Public Library usage and nonusage by three segments of the City of Denver population--citizens, business, and government--have been presented. Across all three segments, it appears that usage is concentrated in the large subgroups of each segment. Thus, the "publics" served are the ones controlling the greatest amount of resources. The most popular DPL services expectedly involve the lending of documents and the provision of reference services. The single most important reason for nonuse is lack of knowledge about what DPL services are available. Just how significant is this lack of awareness? Chapter III addresses this question.

# BEST COPY AVAILABLE

## CHAPTER III

### PUBLIC KNOWLEDGE AND ATTITUDES

Understanding what Denverites know about the public library and how they feel about what they know is a vital first step toward deciding what actions might be taken to make DPL a more vital information resource to different segments of the community. Decisions within different segments to use or not to use DPL are dependent fundamentally on what people know and feel about the Library. Individuals in any segment of the Denver population are not likely to try out or continue to use the Public Library if they are unaware of what services are available or are disgruntled with the quality of services that are provided.

#### Familiarity with DPL Services

What do citizens know? *The data reveal a fairly widespread lack of awareness among citizens concerning what specific Library services are available.*

In reviewing ten special DPL programs and services, for example, the majority of citizens sampled had never heard of any of the programs (Table 4). In the best cases, 42 percent had heard of the Library's Vacation Reading Program, 36 percent of the Black Awareness Program, and 32 percent of the Right to Read Program. In the worst case, 94 percent had never heard of the Portfolio Strategy Today Program. Many of these programs, of course, are targeted for very special citizen subgroups, a fact reflected in the use data in Table 4. Any decision concerning the significance of low general public awareness must be conditioned by that fact.

Major differences were found between different racial and age groups regarding their awareness of and participation in DPL's ten special programs. A substantially higher proportion of black citizens, for example, are aware of the Black Awareness Program than either white or Spanish American citizens (see Table D13, Appendix D). Middle aged citizens tend to know more about and participate in these programs than either younger or older citizens (see Table D14, Appendix D).

No significant difference in terms of program awareness or use were found between men and women in this survey with one exception, the Vacation Reading Program, where nearly twice as many women as men have heard of or participated in this program. Middle-to-upper income families tend to be more aware of and interested in these programs than do lower income families; similarly, levels of awareness and participation are much higher among the segment of Denver's population having over 12 years of formal education.

\*Read: Four in ten of the citizens surveyed had ever heard of DPL's Vacation Reading Program

\*\*Percentage did not equal or exceed .5.

Citizens using DPL services differ markedly from each other in terms of their familiarity with the full range of DPL services. *The most familiar services, which also are the most heavily used, are document lending and reference services.* Nine out of ten citizens are familiar with document lending, and three out of four use this service. At the other end of the scale, *the least familiar services are providing meeting rooms for people and typewriters for public use.* (Relevant data are presented in Table D15, Appendix D.)

What do business people know? *Roughly two-thirds (68 percent) of all business respondents in this survey claimed they are "not at all familiar" with DPL business services.* Business lack of awareness is particularly prominent among smaller firms, many of which are located in the retail/wholesale and service industries (Table 5).

What do government agents know? Government familiarity with DPL services varies by agency mission and physical proximity to the main downtown DPL location, but not by number of employees (see Table 6). *The most knowledgeable government agencies appear to be those in the areas of planning and management, parks and recreation, and public protection, many of which are located geographically near DPL's downtown facility.* Ranking as least familiar with DPL services are agencies in the health and hospitals and public transportation areas.

Attitudes Toward DPL

How do citizens view the DPL? *Most citizens regard the Denver Public Library as a convenient organization to get to, but one that is cold, unfriendly, unpleasant to visit, and not a place where it is easy to get what is wanted. Citizens generally did not select such adjectives as cheerful, efficient, modern, fun, or stimulating to describe the Library. (Relevant data are presented in Table D16, Appendix D.)*

Lower income citizens, particularly those households with total annual earnings between \$5,000 and \$10,000, tend to have a more negative image of DPL than those in higher income households. (See Table D17, Appendix D.)

Thirty-eight percent of Denver's white citizens describe DPL as usually having what they want; in sharp contrast, substantially fewer blacks and Spanish Americans express this feeling (see Table D18, Appendix D). The data in Table D19, Appendix D, reveal that younger and older citizens, in contrast to middle-aged Denverites, are more predisposed to think of the DPL as an "unfriendly" organization.

Only one major difference exists between men and women in their views of the DPL: women are more inclined than men to describe DPL as a "friendly" organization. The better educated also tend far more than the less well-educated to express stronger positive and negative feelings about the DPL.

Despite their feeling that the Denver Public Library is not an enjoyable place to visit, nevertheless just about eight in ten (78 percent) of the citizen users give the Library an overall "excellent" rating for the services it is providing. The Library excels in three particular areas according to most citizen users: the helpfulness and expertness of personnel, having specific materials that are wanted, and the wide variety of services that are offered. Citizen users who give the DPL a performance rating below excellent cited some 46 reasons for doing so. The largest portion (33 percent) of their difficulties relate to a perceived inadequacy of materials and services; the remainder of their reasons for lower ratings are scattered across nearly two dozen categories and do not appear to represent serious problems. Tables D20-22, Appendix D, provide further information on Library ratings by age, race, and income characteristics.

How does business view the DPL? *Just under one-half (45 percent) of the firms using the DPL during the past 12 months give the Library an overall excellent rating for services rendered. The data in Table 7 underline the fact that business ratings of DPL performance differ sharply across different industries: Firms in retailing and wholesaling, finance, and service industries are much more pleased with DPL services than manufacturing companies and firms in other industries. Not surprisingly, firms that report consistent satisfaction with DPL services give the Library much higher overall ratings than less satisfied firms.*

**BEST COPY AVAILABLE**

This finding is somewhat ironic in the sense that retailing and wholesaling firms are substantially underrepresented among DPL business users considering the relatively large number of such firms (see Table 3, Chapter II). Manufacturing firms, in contrast, are the best represented category, percentagewise, of Denver firms and they tend to regard DPL's performance as being only fair. *Their most frequently mentioned reason for giving the DPL lower performance ratings is their own insufficient knowledge about what the Library is doing.* In a few cases, businessmen commented that they feel their information needs are so specialized that no public library--DPL or otherwise--could meet their requirements.

TABLE 7

\*Footnote 2 in Table E1, Appendix E, explains the basis for calculating these percentages.

\*\*Read: Three-fifths of the retail/wholesale firms using DPL services give the Library an overall excellent rating for services rendered.

How do government agencies view the DPL? Overall DPL ratings by City agencies produced the following evaluation profile: *Highest DPL performance ratings by government users come from small-to-medium-sized agencies whose missions mostly are in the areas of parks and recreation, public protection, and planning and management.* Lowest ratings came from agencies geographically remote from the main DPL location, whose responsibilities fall mostly in the areas of public works, public transportation,

## BEST COPY AVAILABLE

and welfare. Predictably, agencies whose employees are "always satisfied" with DPL services give the Library significantly higher performance ratings than agencies that are not always satisfied (Table 8).

The prime reasons given for "excellent" ratings by government users revolve mainly around the competence and friendliness of Library staff. Lower ratings were explained principally as stemming from *lack of knowledge of what services DPL provides* or that specialized information needs in areas like law, data processing, and medicine are not met by the Library. Commenting on his low rating of DPL performance, one government employee observed, "Our rather limited use probably results from a lack of knowledge of what services are available. The Denver Public Library is not doing a particularly strong job of informing City agencies regarding their services."

### Summary

In the effort to assess the status of Public Library services in Denver, it is essential to understand why people use or fail to use services that are offered. Decisions to use Library services are based partly on what different segments of the population know about what services are available, and how they feel about those services. *The central finding reported in this chapter is that fairly widespread lack of awareness throughout all three segments of the community--citizens, business, and government--concerning what services DPL provides.*

Factors other than people's knowledge and attitudes concerning DPL affect their decisions to use the Public Library or any other information source. One of the most significant factors is the character of their information needs, the subject treated in the next chapter.

## CHAPTER IV

### INFORMATION NEEDS

Determining who in Denver needs what kinds of information is not an easy task, although it is an essential one for planning future public library services. The central difficulty in this area is that people quite often are unable to say what information they need; frequently, in fact, they do not even know how to state the problem or reason that lies behind some need they feel to obtain information.

Profiling Denver's information needs was approached through a two step process. First, people at home and at work were asked just what types of information they ordinarily want and use; their routine use of, say, scientific and technical information would indicate a continuing need for that particular type of information.

Second, efforts were made to identify barriers people confront in their attempts to obtain information. Such barriers can provide important clues to information need in the sense that they are interrupting to the need-defining process itself. In other words, information needs often are clarified in the very act of seeking information. To the extent that the search activity is delayed or frustrated by whatever barrier, the process of understanding what information is needed can be frustrated.

#### Information Wants

What information do citizens want? *News and current events, medical and health care, and consumer products and services are the topics about which Denver citizens most often want information (see Table 9). These topics are followed in close succession by home repairs, music for enjoyment, education, and gardening.*

The survey revealed significant, but not surprising, differences among Denver citizens on four selected consumer oriented topics about which they want information (see Table D23, Appendix D). The strongest demand for money management and budgeting guidance, for instance, comes from black and Spanish American women aged 18-20. In the area of what to do when cheated, Spanish Americans voice a much greater concern than either whites or blacks. Retired and elderly citizens show much less interest in these subjects, perhaps because they have already solved the problems inherent in the need for information on these topics.

What information does business want? *Larger firms express consistently higher demand than smaller firms for all classes of work-related information, but are particularly dominant in the areas of scientific and technical, management, and governmental information. These findings*

\*Read: Four in ten of the citizens surveyed mentioned news and current events as an important topic about which they want information.

undoubtedly are due primarily to large firms' more extensive division of labor, and greater resource control.

The type of industry of which a firm is a part also provides an important indicator of business information need. *Manufacturing firms, for instance, create the strongest demand for all types of business information* (see Table 10). Financial, insurance, and real estate firms, however, concentrate their demand in the categories of government, management, and financial information. Retailing and wholesaling firms, which display the lowest overall demand for business-related information, nonetheless share other firms' need for scientific and technical, and marketing information.

One measure of business concern over the problem of meeting information needs is the fact that roughly four in ten (43 percent) of all firms maintain some form of library or other type of information center. Interestingly, three-fourths of the firms using the DPL maintain an in-house library of their own. This suggests that a firm's use of the Public Library often complements rather than competes with employees' use of an in-house library.

What information does government want? Since local government agencies are involved in almost all facets of Denver's community life, those agencies collectively require an enormous amount and variety of information. *Local government agencies most frequently need census and demographic data, followed in order by information on budgets and finances, legal matters, personnel management, physical planning and development, environmental concerns, and public administration.* Government's least frequently mentioned information needs occur in the areas of technological development, minority economic development, consumer affairs, and voting.

*Eighty-six percent of Denver's government agencies maintain their own library or other type of information center.* This suggests that very substantial resources are committed to information processing (i.e., acquiring, storing, retrieving, using information) by these agencies. Behind such investment, of course, lies the widespread array of government's evolving information needs.

### Barriers to Obtaining Information

Learning what information is needed often becomes a cooperative problem-definition and searching activity involving both end users and the people operating information services. Citizen, business, and local government usage of the Denver Public Library was examined in Chapter II; so, too, were the reasons given for nonuse of this community information service. While the findings reported below summarize both user and non-user difficulties with information sources in general, they echo the now-familiar difficulties reported initially in Chapter II and repeated in Chapter III.

*The primary reason Denverites give for not using potentially relevant information sources is simple ignorance: not knowing what information exists, or who has it, or how it can be obtained.* Six out of ten Denver business firms, for instance, cite inadequate knowledge of information sources as a major concern, whereas only four in ten mention not having enough time, and one in four find it too inconvenient to use external information sources.

> 250	66%**	57%	39%	31%	22%	19%
1-250	40	21	20	23	14	16

\*Footnote 2 of Table E1, Appendix E, explains the basis for calculating these percentages.

\*\*Read: Two-thirds of the Denver firms employing over 250 employees require scientific and technical information to do their work.

*Compared to the widespread lack of awareness, therefore, other difficulties appear to be much less significant. This does not mean such difficulties are trivial; on the contrary, they must become matters of paramount concern to managers of information services once the knowledge barrier has been broken.*

### Summary

This review of citizen, business, and government information needs grew out of two procedures: first, learning what information is most wanted by people at home and at work and identifying barriers they encounter in the process of defining and obtaining the kind of information

## BEST COPY AVAILABLE

they want. Citizens most often want information about news and current events, medical and health care, and consumer products and services. For business firms, the most mentioned areas of need are science and technology, management, and government activities (e.g., regulations, laws). For government agencies, the greatest demand is for census and demographic data, plus information on budgets, legal matters, personnel management, and physical planning and development. The prime barrier to adequate definition and resolution of Denver's information needs is a widespread lack of awareness of what information exists, who has it, and how it can be obtained. Some recommendations for making the Denver Public Library a more useful community resource in resolving these problems are presented in the next chapter.

STRENGTHENING THE DPL AS  
A COMMUNITY INFORMATION RESOURCE

Numerous ideas for strengthening the Denver Public Library's position as a community information resource emerged during this project. The ideas are divided here into two categories: (a) those dealing with DPL's fairly low profile in the three community segments examined; and (b) those related to the possible introduction of several new Library services currently under consideration.

Upgrading DPL's Visibility

The study results clearly show that *citizen, business, and government awareness of potentially useful DPL information services is low*. This finding is not unique to the Denver Public Library. Recent surveys of public library use by Block (1970), Mendelsohn (1967, 1968), Meyer (1969), Parker (1973), Voos (1969), and Warner et al. (1973) point out the generally low visibility of major metropolitan public libraries.

*Recommendation 1: DPL management should review the nature and scope of Library efforts to familiarize Denver citizens, business firms, and local government agencies with Library services.* The review, among other things, should identify what promotional activity occurs, who is involved, what current and potential user segments are reached by which media, how those segments react, and how much the activity costs the Library. Once strengths and weaknesses in current familiarization efforts are pinpointed, appropriate action should be developed and implemented to overcome the lack of familiarity with DPL services currently existing in Denver. The business sector may offer the most promising opportunities for fulfilling unmet needs.

*Recommendation 2: Librarians responsible for managing major DPL services should place greater emphasis on identifying just who in the Denver population can benefit from operation of their services.* It is desirable of course, that any Denver citizen should be able to use any service provided by the Library. Only a small proportion of the population, however, will find any particular Library service to be of interest at any point in time. The point of this recommendation is not to get program managers to serve only a limited, restricted segment of the taxpaying public; rather, the point is to improve the librarians' understanding and service of the segments that can reasonably be expected to be interested in given programs. Improved understanding implies such things as knowing what information services a given segment is likely to use, how much time and energy that segment devotes to obtaining specific kinds of information, and what difficulties they encounter in the process. Developing techniques to carry out this recommendation would require a special effort by Library

## BEST COPY AVAILABLE

management. If implemented well, these techniques should enable program managers to set reasonable goals--within their resource limitations--for serving more clients more adequately.

*Recommendation 3. Three special DPL consulting committees--one representing households, another business, and the third government--should be established on an experimental basis to provide assistance in evaluating the quality of current services, and in generating ideas for upgrading present services or adding new services. These user feedback panel members could be paid a minimal fee as consultants and chosen on a stratified, but random, basis to represent a reasonable cross-section of each major segment. For example, the citizen user panel could consist of enough householders to represent proportionately the major age, income, racial, and sex subgroups in the Denver population. The reasons for considering payment of a minimum consultant fee are to recognize their expert knowledge in very specific areas, and to enhance their motivation for participating in this project. The use of such committees might be tried on an experimental basis, perhaps for a period of one year, to test the utility of this concept as a means for providing Library management with feedback and new ideas.*

### New Library Services Currently Under Consideration

To assist DPL management in planning for future Library services, members of all three population segments were asked during the surveys to review and assess the potential utility of several possible new services.

*The establishment of a consumer referral service is by far the most popular potential service. A majority (54 percent) of the citizens interviewed said they would use such a service if it were introduced. Least appealing of the potential citizen services considered are the babysitting (22 percent would use) and the leased wire news services (14 percent). See Table D24, in Appendix D.)*

Spanish American citizens exhibit a much stronger interest than either white or black citizens in many of the potential DPL services (see Table D25, Appendix D). This is particularly true of their expressed willingness to use a consumer referral service and catalogues of DPL holdings of a general nature. The data also point up substantially greater interest in the new services among younger Denverites (Table D26, Appendix D), and persons with more years of formal education (Table D27, Appendix D). Major differences among different income groups exist only for two potential services: Citizens in households with annual incomes totaling \$15,000 or more express much stronger interest than others in a possible consumer referral service and the introduction of several telephone numbers where people can be connected

## BEST COPY AVAILABLE

directly with specific DPL departments without first having to go through the central switchboard. No major differences exist between men and women on the array of possible new DPL services.

Major differences exist between current DPL business users and non-users on the potential utility of possible Library services. Predictably, *current business users see significantly greater usefulness than nonusers in such possible services as providing fee-paid literature searches, assigning a library specialist to assist the business community, and developing a current awareness program. Current business users also would be quite willing to give the Library copies of company-produced documents, as well as surplus publications; three out of five of these users approve the idea of the Library providing Denver businesses with orientation brochures. (See Tables E4-6 in Appendix E.)*

*Most (86 percent) of the government agencies would find Library orientation brochures useful. They also would be interested in having a library specialist assigned to deal with government agencies, and in seeing the DPL established as a data bank clearinghouse on urban problems. They would not find useful late evening or extended weekend services. (See Table F4 in Appendix F.)*

*Recommendation 4. DPL management should delay for one year implementation of any of the possible future services reviewed during this survey. The primary reason for this recommendation is to provide the lead-time that will be needed to implement the first three recommendations made above; furthermore, it would permit Library managers who would be responsible for introducing the new services to integrate the new with the old in a meaningful way.*

*Recommendation 5. DPL management should introduce any of the proposed new services strictly on an experimental basis to allow for appropriate cost-benefit analysis. Treating the proposed services as "experiments" will emphasize two important matters: (a) that the objectives, intended users, and cost-benefit measures will be agreed upon before hand; and (b) that the mere initiation of a service will not guarantee its continuation. The intent of this recommendation is to develop a realistic basis for assessing the impact of any new service. As with many institutions, libraries generally have tended to introduce new services with great expectations and to allow them to continue (a) without adequate evaluations and (b) without termination once they have outlived their usefulness. This recommendation is particularly critical considering the trends in inflation and professional salaries. Experimental introductions of new programs can increase appreciably the potential for improving the Denver Public Library's position as an important community information resource.*

CARD C

- A. I don't ever think of going to the Library.
- B. I'm usually too busy to use a Library.
- C. The Library is just too far away for me to use.
- D. There isn't much at the Library that I need.
- E. I have difficulty getting materials I want from the Library.
- F. Transportation to the Library is a problem for me.
- G. I'd rather buy materials than borrow them from a Library.
- H. If I can't buy materials I want, I usually can borrow them from someone I know.
- I. I do very little reading.
- J. The people at the Library are usually unpleasant or discourteous.
- K. The people at the Library are not helpful.
- L. The hours the Library is open are not convenient for me.
- M. I use a library other than the Public Library.
- N. I just don't like using a library due to all the problems like finding things, bringing them back, and paying fines.
- O. The Library makes me feel uncomfortable and a little embarrassed.
- P. I don't have a Library card.
- Q. To tell the truth, I don't know much about the Denver Public Library and I haven't bothered to find out about it.
- R. Whenever I have telephoned the Denver Public Library, I have had difficulty in getting through.

(New Card)

Case No.  
 [ 4 ] [ ] [ ] [ ]  
 1      2      3      4

16. The Denver Public Library is planning a number of new services which it believes will be helpful to the citizens of Denver. Whether or not the Library goes ahead with these services will depend on two things--(1) the usefulness of these services, and (2) the willingness of citizens to have their taxes increased somewhat in order to pay for them.

For each service I am going to read you, please tell me whether you or your immediate family would make use of it if it were available, bearing in mind that the cost of each of these services would have to come out of some increases in your taxes.

(INTERVIEWER: Read each item listed below, starting with red-checked item.)

- 1. Would use
- 2. No
- 3. Maybe/It depends/DK

Books-by-Mail. A catalogue of paperback books would be printed and orders taken to have these mailed to the Library user. They would be returned by mail when due and other selections made. Library user pays "book-rate" postage one way. [ ] 5

Bibliographies. The Library would provide on request a list of books, periodical articles, pamphlets, films, and cassettes in the Denver Public Library on a particular subject. [ ] 6

Scholar-in-residence. A person who is recognized as an authority in a subject field would be at the Library for a month. He would present a series of lectures and hold conferences for small groups or individual rap sessions. [ ] 7

BEST COPY AVAILABLE

- Several telephone numbers where people can be connected directly with a specific department of the main Library in downtown Denver without having to go through the central switchboard first. [ ] 8
- Catalogues of library materials of general interest put in a number of public places besides libraries or mailed to individuals so that it would not be necessary to go down to the Library if you wanted to see if they had a particular book. [ ] 9
- A reference service using cable television so that you could call the Library and they could show you a page, map, or whatever you asked about on your television screen. [ ] 10
- Television rooms in libraries for regular programming and with closed-circuit TV which could show special educational programs or movies. [ ] 11
- Lending a variety of materials for study, such as games, toys, and sculpture. [ ] 12
- Libraries using a channel of cable TV system to talk about new books and services they offer. [ ] 13
- Videotape facilities. [ ] 14
- A wire service printer, like in a newspaper, television, or radio station that would be available to the public so that you would get news and stock market quotations as fast as possible. [ ] 15
- Lending of audio-visual equipment. [ ] 16
- A consumer referral service which would refer individuals to appropriate agencies for consumer advice and assistance. [ ] 17
- A snack bar or coffee shop in the main Library in downtown Denver. [ ] 18
- A babysitting service for Library users. [ ] 19
- And now, I'd like to finish up with a few questions which will help us compare your answers with those we get from other people in the survey.
17. Are you single, married, divorced, widowed, separated, or what? [ ] 20

1. Single

16. The Denver Public Library is planning a number of new services which it believes will be helpful to the citizens of Denver. Whether or not the Library goes ahead with these services will depend on two things: (1) the usefulness of these services and (2) the willingness of citizens to have their taxes increased somewhat in order to pay for them.

For each service I am going to read you, please tell me whether you or your immediate family would make use of it if it were available, bearing in mind that the cost of each of these services would have to come out of some increases in your taxes.

	Percentage		
	Would Use	No	Maybe, It Depends
Books-by-Mail. A catalog of paperback books would be printed and orders taken to have these mailed to the library user. They would be returned by mail when due and other selections made. Library user pays "bookrate" postage one way.	27	67	6
Bibliographies. The library would provide on request a list of books, periodical articles, pamphlets, films and cassettes in the Denver Public Library on a particular subject.	50	50	8
Scholar-in-residence. A person who is recognized as an authority in a subject field would be at the library for a month. He would present a series of lectures and hold conferences for small groups or individual rap sessions.	26	63	11
Several telephone numbers where people can be connected directly with a specific department of the main library in downtown Denver without having to go through the central switchboard first.	31	62	7
Catalogues of library materials of general interest put in a number of public places besides libraries or mailed to individuals so that it would not be necessary to go down to the library if you wanted to see if they had a particular book.	34	61	5
A reference service using cable television so that you could call the library and they could show you a page, map, or whatever you asked about on your television screen.	25	67	8
Television rooms in libraries for regular programming and with closed-circuit TV which could show special educational programs or movies.	31	59	10
Lending a variety of materials for study, such as games, toys, and sculpture.	27	65	8
Libraries using a channel of cable TV system to talk about new books and services they offer.	22	71	7
Videotape facilities.	28	65	7
A wire service printer, like in a newspaper, television, or radio station that would be available to the public so that you would get news and stock market quotations as fast as possible.	13	80	6
Lending of audio-visual equipment.	30	64	6
A consumer referral service which would refer individuals to appropriate agencies for consumer advice and assistance.	33	51	16
A snack bar or coffee shop in the main library in downtown Denver.	30	64	6
A babysitting service for library users.	22	74	4

APPENDIX B  
BUSINESS QUESTIONNAIRE AND DATA

BEST COPY AVAILABLE  
UNIVERSITY OF DENVER  
DENVER RESEARCH INSTITUTE  
UNIVERSITY PARK • DENVER, COLORADO 80210

COLORADO SEMINARY

**Industrial Economics Division**

May 15, 1974

Dear Sir or Ms.:

The University of Denver Research Institute and the Denver Urban Observatory will appreciate your help in completing the attached questionnaire and returning it to us.

The study is a survey of Denver business and industry designed to aid in the future development and planning of the Denver Public Library System.

All returned questionnaires will be handled confidentially. This means that the name of your company will not be released; nor will your answers be identified with you or with your firm in any way. All answers will be analyzed and reported in statistical form.

Your answers should be representative of your entire firm, and not limited to one functional area within your firm. Your answers should be based on business usage, rather than your own personal usage or non-usage of the Denver Public Library.

Some businessmen may wish to designate someone other than themselves to complete the questionnaire. Should you choose to select someone within your business to complete the questionnaire, we have found the following guidelines to be helpful:

- For small companies, generally the owner or the manager should fill in the requested information.
- For medium to large companies, anyone responsible for the following operations probably would be best suited to filling in the requested information: planning, research and development, market research, or the library. It may be necessary to have a brief meeting, attended by personnel from such departments, who can provide a total company perspective.

The questionnaire has been designed so that most of the questions can be answered simply by placing an "X" in the appropriate box. Please disregard the numbers below the boxes which will be used for computer tabulation purposes only.

Won't you give the questionnaire a few minutes of your time right now, while it has your attention?

We would appreciate you returning the questionnaire in the enclosed postage-paid envelope within the next seven days.

Thank you for your cooperation.

Sincerely,

Eric F. Jaeckel  
Industrial Economics Division  
753-2611

41 □	42 □	43 □	44 □	Government documents
45 □	46 □	47 □	48 □	Assistance in using library resources
49 □	50 □	51 □	52 □	Assistance in finding extensive information
53 □	54 □	55 □	56 □	Answering short factual questions
57 □	58 □	59 □	60 □	Business telephone directory service (answers requests for information available through city, telephone, and business directories)
61 □	62 □	63 □	64 □	Investment service (e.g., Moody's, Standard and Poors, etc.)
65 □	66 □	67 □	68 □	16 mm films
69 □	70 □	71 □	72 □	Obtaining books, materials, etc., for company purposes from other libraries because materials were not available at the Denver Public Library.

15. Check the manner in which your company most often contacts the Denver Public Library for information? Check *one* box only.

- 73 □ telephone
- 74 □ personal visits by employees
- 75 □ messenger service
- 76 □ correspondence

15A. IF MOST OF YOUR COMPANY CONTACTS WITH THE DENVER PUBLIC LIBRARY ARE VIA TELEPHONE, how would you rate the service the Denver Public Library provides by telephone in meeting your company's information needs?

- 77 □ Excellent
- 78 □ Fair
- 79 □ Poor

16. In your opinion is the Denver Public Library doing an excellent, fair, or poor job of serving companies such as yours?

- 5 □ Excellent job
- 6 □ Fair job
- 7 □ Poor job

16A. What specifically is the reason for your rating?

- 8 □

17. As far as speed in acquiring information from the Denver Public Library is concerned, which one of the following statements applies to your particular company most often?

- 9 □ We generally need the information in a few hours, in most cases.
- 10 □ We could wait 24 hours for the information, in most cases.
- 11 □ Two-day or three-day service would be acceptable, in most cases.
- 12 □ One-week service would be acceptable, in most cases.

**18. How useful would your company find it if the Denver Public Library provided the following kinds of services?**

We would find this:			
<u>Very</u>	<u>Fairly</u>	<u>Not</u>	
<u>Useful</u>	<u>Useful</u>	<u>Useful</u>	
13 <input type="checkbox"/>	14 <input type="checkbox"/>	15 <input type="checkbox"/>	Literature searches would be provided for a nominal fee on all sources of materials on a particular subject, and the Library would provide any of the materials from its collection or through copy from other libraries.
16 <input type="checkbox"/>	17 <input type="checkbox"/>	18 <input type="checkbox"/>	Provide a current awareness program in which a company would list its key areas of interest. Each month, the Library would provide the company with a list of all new books, articles, and other publications received.
19 <input type="checkbox"/>	20 <input type="checkbox"/>	21 <input type="checkbox"/>	Provide information services during the late evenings and weekends.
22 <input type="checkbox"/>	23 <input type="checkbox"/>	24 <input type="checkbox"/>	Provide summaries of articles and books on specific subjects.
25 <input type="checkbox"/>	26 <input type="checkbox"/>	27 <input type="checkbox"/>	Provide a library specialist specifically to work with companies in the Denver area.

**18A. What services not on this list would your company find useful if provided by the Denver Public Library?**

28

**19. Here is a list of several methods through which the Denver Public Library might better inform the local business community of its business services. Bearing in mind that the addition of the services listed may necessitate nominal fee charges to your firm, please check the *one* service which in your opinion would be most useful to your particular company.**

- 29  Provide a brochure listing the business information services and materials of the Library.
- 30  Provide conducted tours of the Library's business collection and services.
- 31  Provide a monthly list of new business books and materials added to the Library.
- 32  Providing instruction and orientation in the use of the Library by conducting seminars at company offices.

**20. Please indicate the willingness of your company to participate in the following:**

<u>We would</u>	<u>We would</u>	<u>We would</u>	
<u>be very</u>	<u>be fairly</u>	<u>not be</u>	
<u>willing</u>	<u>willing</u>	<u>willing</u>	
33 <input type="checkbox"/>	34 <input type="checkbox"/>	35 <input type="checkbox"/>	Giving to the Library copies of materials your own firm publishes and/or distributes for public use (such as catalogs, annual reports, etc.)
36 <input type="checkbox"/>	37 <input type="checkbox"/>	38 <input type="checkbox"/>	Giving surplus books and publications to the Library.
39 <input type="checkbox"/>	40 <input type="checkbox"/>	41 <input type="checkbox"/>	Purchasing a subscription to a newsletter published by the Library containing information on national trends, new books, and new activities in business.
42 <input type="checkbox"/>	43 <input type="checkbox"/>	44 <input type="checkbox"/>	Paying a charge for each special service or transaction such as lengthy literature searches.
45 <input type="checkbox"/>	46 <input type="checkbox"/>	47 <input type="checkbox"/>	Making grants or gifts to the Library.
48 <input type="checkbox"/>	49 <input type="checkbox"/>	50 <input type="checkbox"/>	Paying an annual membership fee for special library services.
51 <input type="checkbox"/>	52 <input type="checkbox"/>	53 <input type="checkbox"/>	Establishing your company as a reference source to be consulted by the Library in helping to answer questions from other firms.

May 15, 1974

Dear Denver Government Official:

The University of Denver Research Institute and the Denver Urban Observatory will appreciate your help in completing the attached questionnaire and returning it to us.

The study is a survey of local governmental agencies in the City and County of Denver designed to aid in the future development and planning of the Denver Public Library System.

Information derived from your answers to the questionnaire will be used by the Library in an effort to improve their services to local government agencies.

Your answers should be representative of the city organization that you supervise. Your answers should be based on professional usage, rather than your own personal usage or non-usage of the Denver Public Library.

If you do not have personal knowledge of your organization's use of the services of the Denver Public Library, please assign a member of your staff to gather this information in order that you will be able to complete the questionnaire.

The questionnaire has been designed so that most of the questions can be answered simply by placing an "X" in the appropriate box. Disregard the numbers below the boxes which will be used for computer tabulation purposes only.

Won't you please give the questionnaire a few minutes of your time right now, while it has your attention?

We would appreciate you returning the questionnaire in the enclosed postage-paid envelope within the next seven days.

Thank you for your cooperation.

Sincerely,

Eric F. Jaeckel  
Industrial Economics Division  
753-2611

# QUESTIONNAIRE

1 2 3 4 5 6 7 8 9 10

**1. First, may we have a few facts about your agency?**

Name of agency \_\_\_\_\_ Location: Within Civic Center complex \_\_\_\_\_  
Outside Civic Center complex \_\_\_\_\_  
Job title of person answering this questionnaire \_\_\_\_\_  
Total estimated number of agency or division employees at this location \_\_\_\_\_  
Estimated number of employees engaged in the job of gathering information in your agency or division \_\_\_\_\_

**• WRITE AN "X" IN THE APPROPRIATE BOXES IN THE FOLLOWING QUESTIONS •**

**2. Does your agency maintain a library or special collections of information and references?**

- 11  Yes
- 12  No
- 13  Don't know

**2A. (IF YES) Is this library or special collection available to all professionals employed by the City of Denver?**

- 14  Yes
- 15  No
- 16  Don't know

**2B. IF YOUR AGENCY MAINTAINS A SPECIAL LIBRARY OR SPECIAL COLLECTIONS, how would you rate the overall adequacy of your agency's own library and/or special collections in providing for the information needs of the agency?**

- 17  Excellent
- 18  Fair
- 19  Poor

**3. Overall, in which of the following categories do most of your agency's information needs fall? Check as many boxes as apply.**

- |   |  |   |
|---|--|---|
| 20 <input type="checkbox"/> Aged                              | 35 <input type="checkbox"/> Health planning                        | 50 <input type="checkbox"/> Public utilities            |
| 21 <input type="checkbox"/> Budgets and finances              | 36 <input type="checkbox"/> Health and health services             | 51 <input type="checkbox"/> Public safety               |

- 56  Other sources \_\_\_\_\_

8. Would you say that your agency is very familiar with the various governmental services that the Denver Public Library provides, fairly familiar or not at all familiar with the Denver Public Library's governmental services?

- 57  Very familiar
- 58  Fairly familiar
- 59  Not at all familiar

9. About how many times in the past 12 months has your agency made use of the Denver Public Library for information relating to your agency's work?

- 60  None
- 61  Once or twice
- 62  3 to 5 times
- 63  6 to 10 times
- 64  Over 10 times

9A. IF YOUR AGENCY USED THE DENVER PUBLIC LIBRARY DURING THE PAST TWELVE MONTHS, how often were the information needs of your agency satisfied by the Denver Public Library during the past 12 months?

- 65  Always
- 66  Sometimes
- 67  Hardly ever

10. IF YOUR AGENCY HAS NOT USED THE DENVER PUBLIC LIBRARY IN THE PAST 12 MONTHS, What is the *one* main reason for your agency not using the Denver Public Library? Check one box only.

- 68  We just don't know what services the Denver Public Library can provide an agency such as ours.
- 69  We only have an occasional need for the services provided by the Denver Public Library.
- 70  We are able to satisfy our needs without using the Denver Public Library.
- 71  We have tried using the Denver Public Library in the past and for one reason or another have not been satisfied with its service.
- 72  To tell the truth we never considered the Denver Public Library as a source that might be useful for us.

10A. What other reasons might your agency have for not using the governmental services of the Denver Public Library?

- 73

69 <input type="checkbox"/>	70 <input type="checkbox"/>	71 <input type="checkbox"/>	72 <input type="checkbox"/>	Public meeting rooms, auditorium

**12. Check the manner in which your agency most often contacts the Denver Public Library for information? Check one box only.**

- 73  Telephone
- 74  Personal visits by employees
- 75  Messenger service
- 76  Correspondence

**12A. IF MOST OF YOUR AGENCY'S CONTACTS WITH DENVER PUBLIC LIBRARY ARE VIA TELEPHONE, how would you rate the service the Denver Public Library provides by telephone in meeting your agency's information needs?**

- 77  Excellent
- 78  Fair
- 79  Poor

1 2 3 4

**13. In your opinion is the Denver Public Library generally doing an excellent, fair, or poor job of serving agencies such as yours?**

- 80  Excellent job
- 81  Fair job
- 82  Poor job

**13A. What specifically is the reason for your rating?**

83

**14. As far as speed in acquiring information from the Denver Public Library is concerned which one of the following statements applies to your particular agency most often?**

- 84  We generally need the information in a few hours, in most cases.
- 85  We could wait 24 hours for the information, in most cases.
- 86  Two-day or three-day service would be acceptable, in most cases
- 87  One-week service would be acceptable, in most cases

**BEST COPY AVAILABLE**

**16. How useful would your agency find it if the Denver Public Library provided the following kinds of services:**

- We would find this:
- | <u>Very useful</u>          | <u>Fairly useful</u>        | <u>Not useful</u>           |   |
|-----------------------------|-----------------------------|-----------------------------|---|
| 13 <input type="checkbox"/> | 14 <input type="checkbox"/> | 15 <input type="checkbox"/> | Literature searches would be provided for a nominal fee on all sources of materials on a particular subject, and the Library would provide any of the materials from its collection or through copy from other libraries. |
| 16 <input type="checkbox"/> | 17 <input type="checkbox"/> | 18 <input type="checkbox"/> | Provide a current awareness program in which an agency would list its key areas of interest. Each month, the Library would provide the agency with a list of all new books, articles, and other publications received.    |
| 19 <input type="checkbox"/> | 20 <input type="checkbox"/> | 21 <input type="checkbox"/> | Provide conducted tours of the Library's governmental collection for city agency employees.   |
| 22 <input type="checkbox"/> | 23 <input type="checkbox"/> | 24 <input type="checkbox"/> | Provide information services during the late evenings and weekends.   |
| 25 <input type="checkbox"/> | 26 <input type="checkbox"/> | 27 <input type="checkbox"/> | Provide summaries of articles and books on specific subjects.   |
| 28 <input type="checkbox"/> | 29 <input type="checkbox"/> | 30 <input type="checkbox"/> | Provide a library specialist to specifically serve local city governmental agencies and to act as liaison between the library and city agencies.  |
| 31 <input type="checkbox"/> | 32 <input type="checkbox"/> | 33 <input type="checkbox"/> | Provide city agencies with a brochure listing the governmental information services and materials of the Denver Public Library.   |

**15A. What services not on this list would your agency find useful if provided by the Denver Public Library?**

34

**16. In your opinion should the Denver Public Library serve as a data bank clearinghouse and access point to other data banks throughout the country in providing information on urban problems?**

35  Yes

36  No

37  Not sure

**16A. IF YOU THINK THE DENVER PUBLIC LIBRARY SHOULD SERVE AS A DATA BANK CLEARINGHOUSE, how much use of such a data bank would your agency make – if, say, the bank could circulate updated weekly or monthly reports. Would your agency use such a service very frequently, fairly frequently, or rarely?**

38  Very frequently

39  Fairly frequently

40  Rarely

**17. Please indicate the willingness of your agency to participate in the following:**

- | We would be <u>very</u> willing | We would be <u>fairly</u> willing | We would <u>not</u> be willing |   |
|---------------------------------|-----------------------------------|--------------------------------|---|
| 41 <input type="checkbox"/>     | 42 <input type="checkbox"/>       | 43 <input type="checkbox"/>    | Giving copies of your agency's publications to the Library?   |
| 44 <input type="checkbox"/>     | 45 <input type="checkbox"/>       | 46 <input type="checkbox"/>    | Giving surplus books and publications to the Library?   |
| 47 <input type="checkbox"/>     | 48 <input type="checkbox"/>       | 49 <input type="checkbox"/>    | Purchasing a subscription to a special information type of newsletter on urban problems for public agencies?    |
| 50 <input type="checkbox"/>     | 51 <input type="checkbox"/>       | 52 <input type="checkbox"/>    | Paying a charge for each special service or transaction, such as lengthy literature searches?                   |
| 53 <input type="checkbox"/>     | 54 <input type="checkbox"/>       | 55 <input type="checkbox"/>    | Paying an annual membership fee for special Library services?   |
| 56 <input type="checkbox"/>     | 57 <input type="checkbox"/>       | 58 <input type="checkbox"/>    | Serving as expert sources to be consulted by the Library in serving the information needs of others?            |
| 59 <input type="checkbox"/>     | 60 <input type="checkbox"/>       | 61 <input type="checkbox"/>    | Transferring your own library either entirely (or partially) over to the Denver Public Library to be run by it? |

\*Read: One in five of Denver citizens having less than an eighth grade education say they would use DPL-developed catalogues of library materials of general interest.

**BEST COPY AVAILABLE**

**APPENDIX E**  
**SELECTED BUSINESS SURVEY DATA**

## APPENDIX E

TABLE E1. RANK ORDER OF 12 MAJOR EXTERNAL INFORMATION SOURCES  
USED BY LARGE AND SMALL DENVER BUSINESS FIRMS  
DURING THE PAST 12 MONTHS (IN PERCENT)

OUTSIDE INFORMATION SOURCE	FIRM SIZE*	
	Large (N=110)**	Small (N=26,009)
Business/trade publications	58%	51%
Denver Public Library	52	18
Business/trade associations	48	26
Equipment suppliers	43	42
University libraries	43	15
Government agencies	36	7
Other firms' libraries	31	13
Fee-paid information services	26	10
Academic/scientific groups	22	19
Chamber of Commerce	22	10
College professors/laboratories	12	1
Small Business Administration	6	5

\*Large firms employ over 250 persons; small firms employ 250 or fewer persons.

\*\*Based on the stratified sample of 142 firms, the number of firms per size category was computed. Each respondent firm then was assigned a numerical weight appropriate for its particular stratum. In analyzing data for the weighted respondent firms, percentages were calculated that reflect the number of small firms and large firms in each category under this and other questions related to DPL business use.

## APPENDIX E

TABLE E2. DENVER BUSINESS USE/NONUSE OF 17 DPL SERVICES BY FREQUENCY OF USE DURING THE PAST 12 MONTHS (IN PERCENT)

DPL BUSINESS SERVICE	USE FREQUENCY*			
	Never	Rarely	Occa- sionally	Regularly
Business and industry directories	7%**	17%	65%	11%
Books on business fields	11	26	48	15
Magazines on business fields	33	32	35	--
Books on science and engineering	34	11	39	16
Business telephone directory	40	14	40	6
Assistance in using Library resources	42	28	25	5
Specialized business newspapers	48	--	51	1
Magazines on science and engineering	49	17	34	--
Catalogs and indices	52	33	15	--
Government documents	60	8	32	--
Assistance in finding extensive information	60	19	15	6
Investment service	67	19	14	--
Interlibrary loan service	68	19	12	--
Self-service copying machines	74	--	26	--
Answering short, factual questions	76	--	17	7
Equipment for reading microfilm and microfiche	81	6	13	--
16 mm films	93	7	--	--

\*The number of business firms using DPL services in the past 12 months is estimated to be 7,137. See footnote number 2 on previous page for basis of this estimate.

\*\*Read: Seven percent of the firms who used DPL services claimed never to have used "business and industry directories" during the past 12 months; 93 percent of the user firms indicated they did use these directories.

## APPENDIX E

TABLE E3. REGULAR USAGE OF 17 DPL SERVICES  
BY LARGE AND SMALL FIRMS (IN PERCENT)

DPL BUSINESS SERVICE	FIRM SIZE*	
	Large	Small
Catalogues and indices	31%	--%
Science/engineering books	22	16
Government documents	21	--
Science engineering magazines	20	--
Self-service copying machines	20	--
Answering short, factual questions	17	7
Business magazines	14	--
Business books	12	15
Assistance in using Library	12	5
Special business newspapers	3	1
16 mm films	7	--
Interlibrary loan	4	--
Business and industry directories	--	12
Business telephone directory	--	6
Assistance in finding extensive information	--	6
Investment service	--	--
Microfilm equipment	--	--

\*See footnotes in Table E1 in this appendix for an explanation of terms and the basis for calculating percentages.

TABLE E4. BUSINESS REACTIONS TO FIVE POSSIBLE LIBRARY SERVICES

POSSIBLE SERVICE	POTENTIAL UTILITY		
	Very Useful	Fairly Useful	Not Useful
Literature searches for a nominal fee	12%*	22%	66%
Library specialist assigned to deal with Denver business	10	16	74
Current awareness program	9	24	67
Late evening and weekend service	7	20	73
Summaries of materials on specific subjects	4	33	63

\*Read: One-eighth of the businesses in Denver would find a fee-paid literature search service very useful. *Note: Current DPL business users are substantially more interested than current nonusers in these possible services.* The basis for calculating these percentages is explained in footnote 2 of Table E1 in this appendix.

## APPENDIX E

TABLE E5. BUSINESS WILLINGNESS TO PARTICIPATE IN SEVEN NEW LIBRARY-RELATED ACTIVITIES

BUSINESS ACTIVITY	WILLINGNESS		
	Very Willing	Fairly Willing	Not Willing
Giving the Library copies of company-produced documents	22%*	17%	61%
Giving the Library surplus documents	16	33	51
Paying a charge for special services	13	20	67
Subscribing to a Library newsletter	12	20	68
Making the company available as a reference source	3	38	59
Paying an annual fee for special Library services	3	30	67
Making grants or other gifts to the Library	1	15	84

\*Read: Approximately one in five businesses would be very willing to give the Library copies of company-produced documents. Note: Current DPL business users are substantially more willing to participate in the activities than current nonusers. The basis for calculating these percentages is explained in footnote 2 of Table E1 in this appendix.

APPENDIX E

TABLE E6. REACTION<sup>c</sup> OF CURRENT DPL BUSINESS USERS TO FOUR METHODS OF FAMILIARIZING BUSINESS WITH AVAILABLE SERVICES

METHOD	CURRENT USERS' REACTIONS	
	Approve	Do Not Approve
Provide brochures	60%*	40%
Provide monthly list of new acquisitions	29	71
Conduct seminar at firm	7	93
Provide tours of Library	4	96

\*Read: Six out of ten current DPL users approve the idea of the Library providing Denver businesses with orientation brochures. The basis for calculating these percentages is explained in footnote 2 in Table E1 of this appendix.

	Users (N=58)	Nonusers (N=22)	SAMPLE (N=80)
<u>Mission Area</u>			
Planning and management	31%*	18%	27%
Public protection	16	32	20
Urban renewal	14	--	10
Public works	12	27	16
Parks and recreation	12	5	10
Health and hospitals	7	9	8
Public transportation	4	9	5
Welfare	4	--	4
<u>Number of Employees</u>			
< 50 (Small)	42	47	43
50-199 (Medium)	34	43	36
>200 (Large)	24	10	21

\*Read: Thirty-one percent of the government agencies using DPL services work in the planning and management area.

TABLE F2. PERCENT OF GOVERNMENT AGENCIES WITHIN EACH MAJOR CATEGORY USING DPL SERVICES DURING THE PAST 12 MONTHS

TYPE OF AGENCY	AGENCY	
	User (N=58)	Nonuser (N=22)
<u>Mission Area</u>		
Urban renewal	100%	--%
Welfare	100	--
Parks and recreation	87	13
Planning and management	82	18
Health and hospitals	67	33
Public protection	54	46
Public works	54	46
Public transportation	50	50
ALL AGENCIES	72	28
<u>Number of Employees</u>		
< 50 (Small)	70	30
50-199 (Medium)	68	32
>200 (Large)	87	13
ALL AGENCIES	72	28

APPENDIX F

TABLE F3. DENVER GOVERNMENT USE/NONUSE OF 17 DPL SERVICES BY FREQUENCY OF USE DURING THE PAST 12 MONTHS (IN PERCENT)

DPL GOVERNMENT SERVICE	USE FREQUENCY*			
	Never	Rarely	Occa- sionally	Regularly
Lending books, magazines, and other publications	11%**	21%	53%	15%
Catalogues and indices	12	34	43	11
Assistance in using Library resources	24	33	37	6
Assistance in finding extensive information	36	30	27	7
Government documents	38	23	28	11
Response to telephone requests	42	24	30	4
Municipal reference service	42	17	39	2
Science and engineering department service	57	13	24	6
Public meeting rooms	58	29	13	--
Business division service	60	2	33	5
Equipment for reading microfilm/microfiche	60	35	5	--
Self-service copying machines	63	21	16	--
Interlibrary loan	71	16	9	4
Delivery of Library materials	72	9	12	7
Routing journals to city government employees	73	2	16	9
16 mm films	73	16	9	2
Routing lists of new government documents	80	7	11	2

\*The base number on which the percentages within each service category are calculated is 58, i.e., the number of agencies identified as being DPL users.

\*\*Read: Eleven percent of DPL government users never use the Library's document lending service; 89 percent do use this service.

TABLE F4. GOVERNMENT REACTIONS TO EIGHT POSSIBLE LIBRARY SERVICES

POSSIBLE SERVICE	POTENTIAL UTILITY		
	Very Useful	Fairly Useful	Not Useful
Provide agencies with brochure listing services	50%*	36%	14%
Library specialist assigned to deal with City agencies	40	37	23
Establish DPL as a data bank clearinghouse on urban problems	39	59	2
Current awareness program	29	44	27
Literature searches	21	27	52
Provide tours of Library	16	34	50
Summaries of materials on specific subjects	13	55	32
Provide evening and weekend Library service	5	20	75

\*Read: One-half of the City government agencies would be very willing to see the Library distribute to government agencies a brochure describing available services.
