ABSTRACT

IDENTIFIERS

This report presents statistical data on students at Southwest Texas Junior College in an attempt to provide insight into the characteristics of the student population. The data is presented in tabular form with no effort to draw conclusions or to suggest possible implications. Fall 1974-75 enrollment figures are broken down by class, full-time or part-time study, sex, on-campus or off-campus, and day or evening attendance. Headcount enrollment from 1946-47 through 1974-75, vocational-technical course enrollment from 1959 to 1974, and evening school enrollment from 1959 to 1974 are presented. Admissions data include method of admission, residence by county, out-of-state students, and high schools attended. The personal characteristics noted for the student populations of 1972. 1973, and 1974 are sex, ethnic group, family income, marital status, age, work situation, scholarship and loan information, veteran enrollment, student vehicle use, and major fields of study. Academic ability test scores on the Nelson-Denny test, ACT composite and individual subject scores, and scholastic rank in high school are given. Appendixes include three followup studies which investigate transfer students, student persistence, and student opinion of the college. (Author/AH)

A Statistical Summary of Selected Characteristics of the Student Population of Southwest Texas Junior College

> Compiled by the Staff of the Registrar's Office Southwest Texas Junior College Uvalde, Texas 78801

> > November, 1974

PREFACE

The statistical data that is included in the body of this paper has been compiled to provide a greater knowledge of the characteristics of the student population of Southwest Texas Junior College. It is hoped that this information will make us more aware of the needs of these students and help us to meet them more effectively. The data is presented in tabular form with no effort to draw conclusions or to suggest implication. The implications, however, should be readily apparent.

FOLLOW-UP STUDY, NO. 1

PURPOSE:

During the Fall and Spring Semesters of the 1970-71 school year, a follow-up study was conducted involving all full-time second year academic students who were enrolled at Southwest Texas Junior College during the Spring Semester 1970 and who did not re-enroll for the Fall Semester 1970-71.

The study was carried out in order to answer four questions.

- 1. What percentage of the second year academic students leaving Southwest Texas Junior College continue their education at senior institutions?
- 2. Is there a difference in the rate of persistence in school between second year students who receive the A.A. degree and those who do not?
- 3. To which senior colleges do most S.W.T.J.C. students transfer?
- 4. How do these students perform academically during their first semester at a senior college in comparison to their performance during their last semester at the junior college?

METHODOLOGY:

A list was compiled of all the full-time second year academic students who were enrolled at S.W.T.J.C. during the Spring Semester 1970. Altogether, there were 212 students involved in the study. These students were then divided into two groups: Group I which consisted of students having received the A.A. degree and Group II which included those students not receiving the A.A. degree. Each student's permanent record was checked to see whether or not a transcript had been sent to a four-year school. A second list was compiled, dividing the students into groups based on the schools to which they had sent transcripts. At this point, the Registrars' Offices at the senior colleges listed were contacted and asked to verify the students' enrollment, thus establishing which students actually did transfer. During the Spring Semester, transcripts were requested from these schools, and the students' grade-point averages were figured for their first semester at the senior college. This was compared with their last semester's grade-point averages at the junior college. Not all the senior colleges would release transcripts without the consent of the students. However, it was possible to obtain transcripts for 79 of the students (those which attended the University of Texas, Angelo State, Southwest Texas State, Our Lady of the Lake, Texas A & M, University of Houston, Texas Woman's University, West Texas State, and Howard Payne). As a result it was possible to make some generalizations about student performance.

31

FINDINGS:

As a result of the study, the following information was revealed.

- 1. Seventy-two percent (153) of the second year students transferred to a senior college.
- 2. There was slightly higher transfer rate for students receiving the A.A. degree than those not receiving it. Seventy-three percent (87 students) of the A.A. degree recipients transferred compared to sixty-four percent (66 students) of the non A.A. degree students.
- 3. Students transferring from S.W.T.J.C. spread out geographically in their choice of senior colleges, but the vast majority of them go to four schools as illustrated in the table below.

TABLE 1

Senior Colleges Receiving S.W.T.J.C. Transfers, Fall 1970

Place Transferred	Number of Students
Southwest Texas State University	46
Texas A & I University	43
The University of Texas, Austin	14
Sul Ross State University	10
Sam Houston State University	2
West Texas State University	2 4 2 3
Stephen F. Austin State University	2
University of Houston	3
Tarleton State College	1
Abilene Christian College	1
Texas Tech University	4
Texas A & M University	5
Angelo State University	2
East Texas State University	1
Texas Woman's University	1
Lamar State College of Technology	1
Texas Christian University	1
Huston-Tillotson College	1
Howard Payne College	1
St. Mary's University	1
Our Lady of the Lake College	2
Baylor University	2 3
Texas A & I University, Laredo	3
Moorehead State College, Moorehead, Minnesota	ĺ
Southwestern State College, Weatherford, Oklahoma	1

4. Seventy-eight percent (60 students) experienced decreases in their grade-point average during their first semester at the senior colleges. These decreases ranged from a high of 2.5 grade points to a low of less than .10 grade point. The mean decrease was .88 grade points.*

Twenty-one percent (17 students) experienced increases in their grade-point average ranging from 1.3 grade points to less than .10 grade point with a mean increase of .43 grade point.

* Studies have shown that this type of performance occurs nation-wide. Most junior college transfer students experience decreases in grade-point averages for their first semester at four-year schools. These same studies, however, revealed that by the completion of their fourth semester at four-year institutions, the junior college transfer students have increased their averages to the level they were at the time of transfer.

FOLLOW-UP STUDY, NO. 2

PURPOSE:

During the 1971-72 school year a follow-up study was conducted involving all Freshman students who were enrolled at Southwest Texas Junior College curing the Fall Semester 1970. This study was carried out to answer three questions:

- 1. What percentage of these first year students failed to return to S.W.T.J.C. for second, third, and fourth semesters?
- 2. Are there differences in the percentages of Mexican-American students failing to complete four semesters in comparison to Anglo-American students not completing four semesters?
- 3. What percentages of these Freshman students completed requirements for graduation in May, 1972?

METHODOLOGY:

All Freshman students listed in the student directory for the Fall Semester 1970 were counted and subdivided into two groups: Anglo-American Freshman students, which included 513 students, and Mexican-American Freshman students numbering 362 students. The total of both student groups was 875.

The names of the Freshman students enrolled during the Fall Semester 1970 were checked against the student directories for the Spring Semester 1971, Fall Semester 1971, and Spring Semester 1972. This comparison made it possible to ascertain the number of students failing to re-enroll for the respective semesters and to calculate a percentage of attrition from semester to semester.

FINDINGS:

As a result of the study the following information was revealed:

- 1. 26.0 per cent of the Freshman students enrolled at S.W.T.J.C. for the Fall Semester 1970 did not re-enroll for a second semester (Spring 1971).
- 2. 52.5 per cent of these Freshman students failed to re-enroll for a third semester (Fall 1971).
- 3. 57.0 per cent of the Freshman students did not re-enroll for a fourth semester (Spring 1972).
- 4. 24.0 per cent of the Freshman Mexican-American students enrolled at S.W.T.J.C. for the Fall Semester 1970 did not re-enroll for the Spring Semester 1971 compared to 28.0 per cent of the Anglo-American Freshman students enrolled who did not re-enroll for that semester.

34

- 5. 46 per cent of the Freshman Mexican-American students did not re-enroll for the Fall Semester 1971 compared to 57 per cent of the Anglo-American Freshmen who failed to return.
- 6. 51.6 per cent of the Freshman Mexican-American students did not re-enroll for the Spring Semester 1972 compared to 62.3 per cent of the Anglo-American students who did not re-enroll.
- 7. 18 per cent of the Freshman Mexican-American students enrolled in the Fall Semester 1970 completed graduation requirements compared to 16 per cent of the Anglo-American students studied.

TABLE 1

Freshmun Anglo-American Students	Number	Percentage
Enrolled in S.W.T.J.C. for the Fall Semester 1970	513	100
Enrolled in S.W.T.J.C. for the Fall Semester 1970 not re-enrolling for the Spring Semester 1971	146	28.0

SURVEY OF 1968 STUDENT BODY

The following are questions that are constantly being asked concerning students at Southwest Texas Junior College. The student body of 1968 was surveyed to arrive at partial answers. The students who remained in a four-year academic program received baccalaureate degrees in May, 1972.

1.	Total number of students included on survey		1038
	 A. Students in academic program B. Students in Farm and Ranch Mgt. Program C. Students in Automobile Mechanics Program D. Students in Aviation Technology Program E. Students in Vocational Nursing 	931 53 34 10 10	·
2.	Total number of freshmen students		676
	 A. Students in academic program B. Students in Farm and Ranch Mgt. Program C. Students in Automobile Mechanics Program D. Students in Aviation Technology Program E. Students in Vocational Nursing 	601 34 24 7 10	
3.	Number of freshmen graduating from S.W.T.J.C. with dropping out	out	145
	 A. Students in academic program B. Students in Farm and Ranch Mgt. Program C. Students in Automobile Mechanics Program D. Students in Aviation Technology Program E. Students in Vocational Nursing 	108 15 13 2 7	
4.	Number of semesters attended by freshmen		
	 A. One semester B. Two semesters C. Three semesters D. Four semesters 	117 147 89 236	
5.	Number of freshmen who attended four or more semester not complete a program	rs and did	153
