ABSTRACT

This report, fifth in a series, is a collection of information on 1974 state education legislation and activity. The raw data information, rapidly processed for early release, includes 700 legislative items related to general governance and administration of elementary and secondary schools. The legislation from all 50 states reported has been organized into the general categories of accountability, state organization and policy, school district organization and policy, and personnel from chief state school officer to the classroom aide. A list of state education agencies and the survey instrument is appended. (Author/DW)

Vol. 3, No. 6	1975 State Education Legislation and Activity: SCHOOL FINANCE	\$2.50

The above briefs are compilations of information for reference.

Our Crystal Ball

- was cloudy when we projected the expenditures for our 1975 series of research briefs. Inflationary pressures and budgetary restrictions have left us with no alternative other than to cancel publication of all but one of the remainder of the series. *1974 State Education Legislation and Activity*. In addition to this brief, **GENERAL GOVERNANCE AND ADMINISTRATION**, one covering 1974 **SCHOOL FINANCE** Activity will be published.

~~Cancelled are:~~ **CURRICULUM AND INSTRUCTION: SPECIAL PROGRAMS;** and **SCHOOLS, STUDENTS AND SERVICES**. The information ordinarily published in these briefs is available to individual requestors. Just write or call us, tell us the area of your interest, and we will send you the relevant information.

INTRODUCTION

1975 State Education Legislation and Activity: GENERAL GOVERNANCE AND ADMINISTRATION

The Education Commission of the States celebrates its fifth collection of information on state education legislation and activity in a new and smaller sized research brief series, which contains even more information than was collected last year. From hundreds of newsletters and bulletins and the ECS annual Survey of the States, a wide variety of education information has been collected, analyzed and compiled for the current series.

The agencies which provide most of the information in these books are the same agencies which are surveyed yearly by ECS: state education agencies, legislative service agencies, teacher organizations and school board associations. The survey instrument reproduced in the appendix is aimed at (1) validation of information collected during the year by ECS; and (2) additions to this collection.

Essentially, the information in this series is raw data -- rapidly processed to be released in printed form at the earliest possible date. Editing has been kept to a bare minimum: most items appear in virtually the same form in which they were received. All legislation listed in this book has been enacted; space limitations prohibit the inclusion of bills which were vetoed, failed or carried over.

The more than 700 items in GENERAL GOVERNANCE AND ADMINISTRATION have been organized to include the broad areas of state education structure -- accountability, state and local organization and policy, and items dealing with all education personnel from the chief state school officer to the classroom aide.

HOW TO USE THIS BOOK

Many of the information items ECS has collected have multiple subjects and could in all probability be included in several briefs. To avoid such repetition, (except in the school finance area), each book is carefully indexed using the words in the right-hand column of each page. Thus, an item which has been placed under the sub-heading Assessment and Testing and which also deals with reading will be page-referenced in the index in the back of the book under both categories, although the item itself will appear in the entire series only once.

The area of school finance has been handled differently. All finance-related items have been collected in one book, SCHOOL FINANCE; many of them appear in the other books under other subject headings as well.

Most of the items in this series cover the elementary-secondary level. Those items dealing either wholly or partially with postsecondary or community college levels are identified as such in the index column. For a more comprehensive look at postsecondary and community college education, the reader is referred to the ECS periodical, Higher Education in the States.

HOW TO IDENTIFY ITEMS

Each item in this book is identified in the left-hand column by state, bill and/or statute number (identical bills are listed together where practical); or a descriptor: ACTIVITY, PROJECT, STUDY, NOTE. Standard post office abbreviations are used for states; a listing is on the inside back cover of the book. While most state legislatures operate in similar fashions, there are individual differences in the ways in which bills are labeled and handled. Common abbreviations used to identify bills, resolutions and constitutional amendments are explained below:

Bill Identification:

- A - Assembly (same as House). Examples: AB = Assembly Bill, AR = Assembly Resolution.
- H - House (same as Assembly). Examples: HB = House Bill, HR = House Resolution.
- S - Senate. Examples: SB = Senate Bill; SR = Senate Resolution.

Note: Some states use only a single letter to identify bills, i.e. A, H, S.

- L - Legislative. Used in Nebraska's unicameral legislature: LB = Legislative Bill. Used in Maine legislature: LD = Legislative Document.
- F - File. In some states, used instead of Bill.
- CA - Constitutional Amendment. Once adopted, measure must be referred to voters for final approval.
- J - Joint. Example: HJR = House Joint Resolution.

Statute Identification:

- PA - Public Act.
- Sec. - Section.
- Ch. - Chapter.
- RSA - Revised Statutes Annotated.

HOW TO GET MORE INFORMATION

The information in this book is not intended to be more than a guide for the reader to use in exploring his particular areas of interest. Most of the legislative items can be checked out with the appropriate state education agency or legislative service agency; ECS has copies of only a few of the bills listed. The bulk of the activities, projects and studies contain within their descriptive texts the name and address of a resource person to contact for further information.

IN APPRECIATION

At least one organization in every state in the union has provided items for this series of briefs. Many times, several organizations within a state have cooperated to provide us with information. This kind of cooperation has helped us to build our comprehensive information system. Our thanks go to the many individuals who have provided ECS with information, either by placing us on an important mailing list or through much-appreciated personal effort.

GENERAL GOVERNANCE AND ADMINISTRATION
Elementary, Secondary and Postsecondary

ACCOUNTABILITY

AL PROJECT	The state department of education is in its fourth year of requiring an educational program audit for each project funded under Title III ESEA. The educational program audit is one management technique for implementing accountability in education. The educational program auditor, as an external reviewer, attests to the quality and accuracy of the evaluation process and evaluation results of a Title III project, thereby providing the public and other educators with reliable information upon which they can base their decisions regarding continued support of the educational enterprise. Contact: W. H. Kimbrough, Director, Administration and Finance, State Department of Education.	<u>General</u> accountability program audit
AL STUDY	In March 1974, the superintendent's advisory committee for educational planning was organized. The purpose of this committee is to advise the state superintendent of education concerning needs for education. It also informs him about issues of concern to the public and to educational institutions and groups in the state. The committee provides assistance and advice in determining the nature, scope and severity of each issue; assists in determining priorities for addressing issues; and, after plans for resolving issues have been implemented, the committee provides feedback on their impact. This committee is composed of 16 people broadly representative of education and professional and lay groups. It is anticipated that the committee will meet on a regularly scheduled basis. All activities related to the committee are coordinated by the planning and evaluation office, which serves in a staff relationship to the superintendent to provide support services and technical assistance to the committee. Contact: Frank T. Speed, Director, Division of Departmental Services, State Department of Education.	planning needs assessment
CA PROJECT	RISE (reform of intermediate and secondary education) project is designed to develop proposals for reviewing the goals and structures of intermediate and secondary education. Contact: Ernie Hickson, State Department of Education.	goals structure
CA PROJECT	The joint committee on the master plan for higher education published a report to the legislature in September, 1973. The report recommended that the legislature adopt a statement of legislative intent articulating statewide goals for postsecondary education for the next decade. There were 49 recommendations made which included the areas of governance, structure, coordination and planning, access and retention, cooperation between institutions, new directions in education, independent higher education and financing. Contact: Joint Committee, Assembly P.O. Box 83, State Capitol, Sacramento, Calif. 95814.	goals postsecondary
CA STUDY	A staff paper was prepared for the joint committee on postsecondary education of the legislature in August, 1974 entitled <u>Dimensions of Postsecondary Educational Planning: The University of California Academic Plan, 1974-1978' as a Case Study</u> . The essay discusses planning. First, a framework for considering the planning process is sketched. This framework includes the context for planning in the 1970's and some suggested characteristics of the planning process.	planning postsecondary

General

CA STUDY	(Continued) Second, the recent <u>University of California Academic Plan, 1974-1978</u> is discussed in light of this framework. A summary of the plan is included. Approved by the board of regents in March, 1974, this plan will be important on two fronts. The individual campus plans will be developed in consonance with this segmental effort; and the new postsecondary education commission, with the overriding charge of comprehensive planning, must mesh the various segmental plans into a coherent statewide vision. Contact: California Administrative Legislative Reference Service.	
FL HB 2894 Ch 165	Establishes a state manpower services council within the department of commerce and charges the council with the responsibility for development of a state manpower plan designed to guide the use of state and federal manpower resources in coordination with the overall growth policy of the state. The director of the division of vocational education of the department of education is designated as a member of the council and serves as the representative of the commissioner of education.	manpower projection
FL PROJECT	Development of a state land resource planning institute. Contact: Bruce Mitchell, Coordinator Special Studies; William B. Phillips, Director, Science and Engineering; Richard Conner, Coordinator Special Units, Department of Education.	planning land resources
GA HB 1565	This legislation would create the joint legislative committee on performance evaluation and expenditure review. It is similar to SB 468.	performance evaluation finance
GA PROJECT	Program and performance evaluation. Pilot projects to cooperatively, at local level, establish goals for the school system and to develop a program for performance evaluation based on improving instruction, diagnosing needs and prescribing staff development programs to meet needs. This project includes revising, if indicated, curriculum to meet needs of student, the teaching load, and time to teach. Performance means those activities carried on by teachers, other staff and students in the teaching-learning situation. Contact: Lilla L. Carlton, Director, Professional Development, Georgia Association of Educators, 3951 Snapfinger Parkway, Decatur, Ga. 30032.	evaluation goals instruction staff development
GA PROJECT	State leadership conferences. Provide organizational structure for affiliate state and district officers in discipline areas to establish goals for educational improvement and develop plans for achieving objectives to accomplish goals. Approximately 600 elected leaders participate in this continuous program. Contact: Lilla L. Carlton, Director, Professional Development, Georgia Association of Educators, 3951 Snapfinger Parkway, Decatur, Ga. 30032.	goals objectives
GA STUDY	How Georgia ranks. A comparative study of Georgia in relation to the southeastern United States and the nation. Tables provide the state's regional and national rank, and national medians, where applicable, in areas of population, enrollment, attendance, teachers, school revenue, etc. The basic data source is the National Education Association's <u>Rankings of the States</u> .	ranking

Elementary, Secondary and Postsecondary

ACCOUNTABILITY

HI PROJECT	Foundation program, elementary. A project to develop an implementation handbook for the elementary academic foundation program to serve as a guide in interpreting the foundation program at the elementary school level, K-6. It is to help school level personnel relate all of their classroom activities to the attainment of the eight objectives of the foundation program. The foundation program is a plan to fulfill the commitment for equal opportunities in education as stated in the master plan for public education. Contact: Barbara Yamashita, Administrator, General Education Branch, Office of Instructional Services, Department of Education.	<u>General</u> objectives foundation program equal opportunity
IA PROJECT	Revision of educational standards for the approval of school districts to implement the provisions of SF 126, 1974. Contact: Donald Cox, Associate Superintendent, Instructional and Professional Education, Grimes State Office Building, Des Moines, Iowa, 50319.	standards
IN PROJECT	The Indiana State Teachers Association and National Education Association are cooperating with five local teacher associations to implement a professional development needs survey. A pilot survey was conducted in two local associations last year. The purpose of the survey is to identify those professional development needs perceived by classroom teachers. Contact: Ivan D. Wagner, Director, Division of Planning and Evaluation, 120 W. Market, 16th Floor, Indianapolis, Ind. 46204.	needs assessment teachers
KS SB 1012	Establishes an 11 member legislative educational planning committee to plan for postsecondary education included both public, private and vocational-technical education. Committee is directed to make reports and recommendations that include a developmental schedule for implementation of educational goals established by the committee to the legislature and governor. Members of committee are appointed by the legislative coordinating council and serve for terms as designated by it. Must include six members of house of representatives and five senators. At least five members must be of the minority party, with not less than five from each house. The state board of regents and state board of education are directed to provide staff consultants upon request of the committee. Contact: Senator Harder, Chairman, Legislative Educational Planning Committee, State Capitol, Topeka, Kan. 66612.	planning postsecondary goals vocational nonpublic
KY PROJECT	Application of computer concepts for elementary and secondary schools, a Title III ESFA project. Region VII in rural Appalachian eastern Kentucky is conducting data collection, surveys and committee studies of education needs by regional educators and lay citizens. The needs determination process was initiated through the design and administration of an inclusive needs assessment instrument. Also, state needs assessment data were studied to determine priority needs of the region. Results listed in education needs as: (1) individualized instructional services and programs; (2) better school-public relations and understanding; (3) more career information and services; (4) more special services to schools especially comprehensive information and student diagnostic services. To react to the needs of each school district and community, region VII	computers data collection needs assessment accounting management

KY PROJECT	(Continued) is employing a computer to create a system of total student accounting and management to provide the base for more sophisticated and comprehensive computer programs of student profiles and decision making information. Project application of computer concepts for elementary and secondary schools has three facets: (1) student oriented records for education provides educators with student profiles consisting of computerized grade reporting; (2) traditional and phase-elective student schedule; (3) teachers' register for attendance accounting; and (4) career and college information. Leadership study and development furnishes administrators an orientation reference base for planning and development of other model programs. Various administrative reports are also provided. Computerized planning and budgeting system generates aids administrators in determining district compliance with federal, state and local legislation. Contact: Edwin R. Jones, P.O. Box 1269, 925 Winchester Ave., Ashland, Ky. 41101.	
KY STUDY	Goals of education and accountability. Contact: Jerry Trammell, Legislative Research Commission.	goals accountability

MA STUDY	Legislation enacted in 1973 provided for the establishment in 1974 of an equal education opportunity commission. The newly formed commission has met twice and will be considering such issues as school finance reform, metropolitanism and the expansion of vocational education programs. Contact: Constance W. Kaufman, Staff Researcher, Committee on Education, State House, Boston, Mass. 02133.	equal opportunity urban vocational
MN PROJECT	The Roseville objectives system in education, a council on quality education project for 1975, is designed to formulate and implement a comprehensive model for identifying goals and objectives for all personnel in a school district. Using outside expert consultants, the project has concentrated on pilot testing and inservice training in approaches including management t, objectives and other methods of increasing organizational clarity and accountability. The project is also attempting to extend its approach to classroom and instructional points of implementation and to develop a component identifying program component costs. Contact: Dale Schneiderhan, Project Director, 1251 W. County Road B-2, Roseville, Minn. 55113.	management-by- objective goals personnel training
MN STUDY	Philosophy, purpose, goals and objectives for education for the future in Minnesota. The goals of this project are to: (1) gain legislative passage, in the form of resolution, intent or policy, of statements specifying what the general and uniform system of education will provide for all residents; and (2) gain state board of education adoption of statements of state education agency values, philosophy, purposes and goals coupled with a model for agency decision making. Contact: Wayne Erickson, State Department of Education.	goals objectives legislation

GENERAL GOVERNANCE AND ADMINISTRATION
Elementary, Secondary and Postsecondary

ACCOUNTABILITY

- MO PROJECT** Self-evaluation guidelines as part of new regulations developed to implement new comprehensive state special education law, school districts are required annually to complete a checklist of self-evaluation criteria to determine strengths and weaknesses in program development. Contact: Don Cox, Division of Special Education, Elementary and Secondary Education, State Department of Education, Jefferson City, Mo. 65101.
- NB LR 161** Study by appropriation committee of: (1) systems of human services; (2) systems of higher education; (3) progress of management information systems; and (4) improvement of capital construction. Referred to legislative appropriations committee for further study.
- NB PROJECT** Learning accountability. Teacher reward system for teachers whose students master certain specific objectives. Contact: Majorie Hansen, Omaha Public Schools, 3902 Davenport St., Omaha, Neb. 68131.
- NJ ACTIVITY** Thorough and efficient (formal revision of administrative code). The branch of special education and pupil personnel services is developing a position to conform with the constitutional mandate of "thorough and efficient". The new position will conform to legal mandates (as evidenced in existent litigation), field philosophy and model legislation requirements. Elements include: (1) mandated early childhood education; (2) continuum of education services; (3) required planning by local school districts; and (4) "no reject system" (all handicapped required to have an education) no exclusionary category, etc. Contact: Daniel Ringelheim, Branch of Special Education and Pupil Personnel Services, Department of Education.
- NJ PROJECT** The cooperative planning project (C.P.P.), a part of New Jersey's Title V ESEA, is an attempt to form a loose coordination among people doing the same things, with the hope that duplication can be eliminated. The C.P.P. aims to make a case for planning process and to verify the success of the process. To meet this goal 14 advanced planning districts (those which had initiated some component of the comprehensive planning process such as goal development, or needs assessment) were invited to participate. These districts will be provided with various resources such as workshops on various problem areas they have selected as being troublesome, to help them continue their planning and eventually to complete a full cycle from goal development to evaluation. Next year these advanced districts will assist other districts just starting to develop planning strategies. Contact: Kenneth Pack, Bureau of Planning, Department of Education.
- NC STUDY** Channels for changing secondary schools. Includes recommendations on curriculum reform, teacher evaluation, rights of students and facilities for adolescents. Contact: A. Craig Phillips, Superintendent, Task Force on Secondary Education, State Department of Public Instruction.

Education review committee. Joint legislative committee to review the school foundation formula, the efficiency and effectiveness of educational programs, and the policies of school boards respecting the use of school facilities by civic groups. Contact: William Harrison, Staff Director, 20 E. Broad St., Columbus, Ohio. 43215.

OK PROJECT

The ARTA project (A Road to Accountability) a Title III ESEA project is an experimental accountability program to establish in-house performance contracting to make teaching more effective via an incentive payment system to teachers for above gains of students. The variables of the project, which were the basis for teachers' incentive payments, were students' achievement, self-esteem and average daily attendance. The objectives were: (1) to provide instruction to students in grades two, five and eight in math and tenth grade language arts which will improve cognitive achievement grade score gains beyond one year's growth; (2) to increase average daily attendance over the previous year; and (3) to improve the self-esteem of the target population of students. The 30 ARTA teachers were given inservice training to meet individual learner needs; establish a positive learning environment; improve self-esteem of students as related to peers, self and school and have parental conferences with parents to learn the histories, attitudes and needs of students. Contact: Raymond E. Koblyer, Project Director, Minco Public Schools, Minco, Okla. 73059.

OR PROJECT

The state board of education adopted a planning statement on community colleges, Within Reach, and directed the staff to develop priorities and accomplishment measures from which the board could determine the progress being made on the planning statement. After continual review from April-June 1974 the following priority needs were adopted. For instruction they were: (1) expanding career education; (2) enhancing student transfer opportunities; (3) improving adult and continuing education programs; (4) expanding opportunities for persons with special needs; and (5) improving student services. The management priority needs are: (1) improving articulation for life-long learning; (2) assessing program performance systematically; (3) continuing to improve financing of community colleges; (4) improving opportunities for institutional diversity and innovative management; and (5) improving staff development programs. Contact: C. M. deBroekert, Associate Superintendent, Community Colleges, State Board of Education.

OR PROJECT

The board of education has said that districts can more readily respond to the changing needs of students and the rising expectations of their communities if they move toward a goal directed planning system. Such a system will be implemented through district compliance with the new minimum standards and graduation requirements. A catalog of promising practices in Oregon education is one way in which the state department of education can keep teachers and administrators informed about the most promising ways to carry out the processes of goal based planning. In addition, the catalog is

OR PROJECT	(Continued) intended as a channel of communication through which educators can be made aware of the many new practices being developed in Oregon or can find promising solutions for particular problems. Contact: Department of Education.
OR PROJECT	"Emerging trends for educational planning" is a monthly newsletter from the office of assistant superintendent, planning, development and evaluation. Its purpose is to provide educational planners with information about recent or unpublicized research, assessment and statistical studies that can provoke new insights. It is intended as a vehicle for sharing information, ideas and problems. Contact: Evelyn Gunter, Dissemination Specialist, Program Management Support, State Department of Education.
OR STUDY	Identifying needs and assisting small schools. Contact: Don Miller, Department of Education.
PA PROJECT	Regionalization. The state board of education has endorsed the principle of regional cooperation among institutions of higher education. To achieve this goal, ten higher education planning regions have been established. In two cases in which two regions have merged, eight higher education planning councils have been formed. They are conducting studies of needs and of resources, planning a pilot flexible length baccalaureate and exploring the feasibility of a "paper" community college. Each council is concerned with local problems and with striving to prevent unnecessary duplication of programs by: sharing information; forming consortia; and planning together or reviewing one another's plans. Contact: Charles Bilmore, Higher Education Associate, Bureau of Academic Programs, Department of Education.
PA PROJECT	Redefined mission of the state colleges and universities. The 14 state owned institutions of higher education have been involved in an 18 month long planning process, aimed toward diversifying their missions and program offerings. Faculty, students, administrators, community members, board of directors and central agency personnel have worked in large and small groups to prepare conceptualizations and specific action plans. The planning process is continuing. The state board of education and board of state colleges and university directors have approved a broader mission for the system as a whole. Curriculum is from teacher education and liberal arts education to the inclusion of preparation for occupations in health and human services, public services, business and technology, mostly at the baccalaureate or professional masters level. Contact: Kathleen Kies, Director, Bureau of Academic Programs, Department of Education.
PA PROJECT	Equal educational opportunity is a report prepared by the department of education to develop recommendations concerning affirmative action for higher education institutions in the commonwealth. This 11 month study is designed to recommend policies and describe approaches to equal opportunity. A summary of laws, directives and others is contained in the document to accommodate mandated federal and state laws. Recommendations address themselves to affirmative action office, affirmative action councils, institution affirmative action plans and timetables;

ACCOUNTABILITY

- AL PROJECT The development of a pupil information system which will provide teachers and others with data to determine the learning needs of individual students, to help provide a basis for the prescription of appropriate learning activities, to check on the progress of students as they proceed through the school program and to check on the extent to which learning activities are being met. The state department of education will work with a smaller local school system in developing the pupil information system. Pupil data is an important segment of total data needs and concentrating on it will allow a model system to be developed at a reasonable cost. A manual or semiautomated system which does not require computer support is anticipated. However, the information system will be constructed to facilitate adaptation by those school systems which use automatic data processing. After development and trial, the model information system can be adapted by local school systems throughout the state. Contact: Frank T. Speed, Division of Departmental Services, State Department of Education.
- AL STUDY Student performance in local school systems. Contact: D. B. D. Whetstone, Coordinator, 818 S. Perry St., Montgomery, Ala. 36104.
- AL STUDY The Alabama needs assessment study is specifically designed to obtain information that will be of assistance to local school systems in improving the quality of educational programs for children and youth. The major purpose of the study is to determine the critical educational needs. All subject areas must be assessed and examined in relationship to each other to establish those subject areas which have the most critical needs. In addition, by assessing a subject area over a period of time, it will be possible to determine if changes have occurred. Contact: W. H. Kimbrough, Director, Administration and Finance, State Department of Education.
- AK PROJECT Development of statewide student assessment program in reading and mathematics. Development of a student assessment system based on criterion-referenced test instruments which is sensitive to cultural differences of students. Contact: Frank Nelson, Student Assessment Administrator, Department of Education.
- AZ HB 1255 Ch 38 All students enrolled in the fifth grade will be given a standardized mathematics achievement test adopted by the state board of education. This test will be given annually in the first week of October, which is the same time period when the standardized reading achievement test is given.
- AZ HB 1261 Ch 38 Requires annual fifth grade mathematics test.
- CA ACR 79 Res. Ch 162 Requests criteria development for evaluation of mathematics tests and establishment of minimum standards for elementary level computation skills.

Assessment
and Testing

CA PROJECT	California has initiated a new statewide educational assessment program in grades two, three, six and twelve. Reading achievement is measured in grades two and three while for the upper grades four areas are tested: reading, spelling, effectiveness of written expression and mathematics. The tests are constructed by the state department of education to state specifications taken from objectives submitted by all school districts. The majority of the test items, with national normative data, have been selected from those submitted by major test publishers. A matrix sampling procedure is employed so that every student in the grade level tested takes one of ten-18 forms. Testing time is approximately 35 minutes for each grade level. Scores are then calculated for each school, for the district and for the state. Equating procedures allow a comparison of statewide performance to national norms. At both the school and district levels, two kinds of scoring comparisons are available: percentile rank in state and predicted score range derived from a multiple regression analysis of numerous background factors. Many of these background factors are the usual socioeconomic indicators and school factors, but there is one which is unique: an entry level test, developed especially for California, which is administered during the initial month of school to all first graders. This gives a measure of readiness for learning or a baseline against which to compare reading results in grades two and three. Contact: Alex Law, Office of Program Evaluation and Research, State Department of Education.	testing
CA STUDY	High-low study attempts to compare overachieving and underachieving schools as determined by standardized test results. Schools are matched for student and community characteristics and differences in staff, support, organization, etc. sought. Contact: William Webster, State Department of Education.	testing underachievers
CT PROJECT	A cooperative evaluation center, in its third year, assists local school systems in the evaluation of their educational programs. A Title III ESEA project, fiscal year 1975. Contact: Phillip S. Saif, Capital Region Education Council, 443 Windsor Ave., Windsor, Conn. 06095.	evaluation programs
FL HB 1145 Ch 205	Limits educational accountability program to subject areas of reading, writing and mathematics, removing current requirement for other subject areas by 1973-74. Amends the educational accountability act to require that procedures shall be comparable to national systems and indicators. All third and sixth graders are to be tested by the 1974-75 school year and all third through sixth graders the following year in the basic areas of reading, writing and mathematics. Annual reports of school progress are to include an interpretation of the test results.	testing basic skills
FL PROJECT	Needs assessment development project is in the beginning stages of designing, developing and producing a self-contained needs assessment procedure which can be utilized by school districts as a major component of comprehensive planning. Development of the needs assessment procedure will involve	needs assessment planning postsecondary

FL PROJECT	Evaluation of performance of students awarded credit on the basis of the college level examination program. The articulation coordinating committee, which is comprised of representatives of the state university system and the community colleges, is undertaking through an interinstitutional task force to evaluate the subsequent academic performance of students who have been awarded academic credit on the basis of college level examination program. The project involved students from the 28 community colleges and the nine state universities. Contact: Myron Blee, Bureau of Program Support and Service, Division of Community Colleges, Department of Education.	performance evaluation postsecondary CLEP
GA PROJECT	The statewide testing program, initiated by the state board of education in 1971, annually tests approximately 240,000 students in grades four, eight and 11 using standardized, norm-referenced instruments. Test results provide information about the achievement of students in basic skill areas. They may also be used to determine the current status of Georgia students compared to national, state and local norms. However, they do not provide information on student mastery of specific objectives. Therefore, the state board has contracted with educational testing service for the development of criterion-referenced tests of reading, mathematics and career development for fourth and eighth grades. These tests will evaluate the progress of Georgia students toward the state board's goals for education in Georgia. Completion of field testing and refinement of these instruments is scheduled for February 1975; their use in the 1975-76 statewide testing program is anticipated.	criterion- referenced testing basic skills
GA PROJECT	Needs assessment. Pilot projects on needs assessment for purposes of cooperative involvement at local level for developing program in instruction, staff development and others which the data from the assessment indicated. and Testing

GA PROJECT The Atlanta assessment project, funded under Title III ESEA, exemplifies cooperation in education between federal, state and local authorities. Funds made available through the U.S. Office of Education have been granted by the Georgia Department of Education to the Atlanta Public Schools to operate the project. The project is designed to answer two questions: (1) What will Atlanta area young people need to know, be able to do, and value in order to cope successfully with life in the society of 1985 and thereafter? (2) Are young people in the Atlanta area making progress toward achieving these things? Thus far the project has: (1) established educational goals for the Atlanta of 1985 through a series of studies involving nearly 1,100 community leaders, educators and high school students; (2) developed specific objectives to determine each goal, through the participation of over 90 teachers, curriculum specialists, professors, state department of education staff and representatives of various social agencies; and (3) contracted with a test development agency to develop criterion-referenced tests of these objectives. Project personnel are working closely with the contractor in reviewing test items, refining objectives and planning for a pretest of evaluation instruments and procedures. When the test development phase is completed early in 1975, the project will administer the tests to three sample groups: high school seniors, 17 and 19 year old students at lower grade levels, and 17 and 18 year old non-students, including both graduates and dropouts of the Atlanta system. Assessment results will then be available for use in improving education for young people in Atlanta. Project number 602-1-74-078. HI PROJECT The foundation program assessment and improvement system (FPAIS) consists of two major components: needs assessment and program improvement. FPAIS is conceptualized on the basis of the Department's need for: (1) statewide information about the progress of students toward achieving the foundation program objectives; and (2) systematic program improvement procedures and improved curriculum management. (1) The assessment component is designed to pull together heretofore separate departmental attempts toward obtaining data on learner performance, learner needs and program effectiveness measures. The assessment component is also expected eventually to provide for the department of education a repository of assessment exercises, test items and procedures for various program and project evaluation needs at the state, district and school levels.

and Testing

III PROJECT (Continued) Departmentwide use of such assessment materials and procedures is also expected to eventually help systematize school level assessment efforts. (2) The improvement component is designed to clarify and systematize curriculum development activities and procedures at the state, district and school levels for the purpose of improving learner performance through program efforts. An administrative and organizational structure is required to implement any statewide change in instructional programs. Such a structure will have to provide for: (a) analysis of learner performance data in relation to educational objectives to determine learner needs; (b) analysis of ongoing program strategies to determine the kinds of program changes necessary for the alleviation of learner needs; (c) programming involving planning of alternative strategies that appear potentially practical and effective in alleviating learner needs, with cost implications; (d) teacher training to be required in relation to program change plans; (e) pilot testing of the program change strategy; (f) documentation of the field tested and refined change strategy as demonstrated to be effective and accepted for dissemination installation in the schools; (g) supervision and control of the installed program change strategy; and (h) ongoing evaluation of the change strategy installed and modified as necessary. Contact: State Department of Education.

III PROJECT The foundation program is a plan to fulfill the commitment for equal opportunities in education as stated in the master plan for public education. The foundation program establishes a minimal but variable program of academic experiences designed to achieve the following objectives: (1) develop basic skills for learning and effective communication with others; (2) develop positive self-concept; (3) develop decision making and problem solving skills at his proficiency level; (4) develop independence in learning; (5) develop physical and emotional health; (6) reorganize and pursue career development as an integral part of his total growth and development; (7) develop a continually growing philosophy such that he is responsible to himself as well as to others; and (8) develop creative potential and aesthetic sensitivity. Contact: Janet Sumida, Staff Specialist, Evaluation Section, Office of Instructional Services, Department of Education.

ME PROJECT	The Maine Assessment of Educational Progress (MAEP) is a ten year program to provide specific information about the knowledge, skills, understandings and attitudes of students in various subject areas. A probability sample of all students attending public and private schools is given exercise items by trained administrators from the state department of educational and cultural services. In each assessment phase, the assessment instrument is composed of selected items from those used in the National Assessment of Educational Progress with some specifically for Maine students. Thus, the results can be compared to those of the northeast region and to the nation as a whole. The first phase of cycle I assessed 17 year olds in citizenship and writing; the second phase assessed 17 year olds in reading and science; and the third phase assessed nine year olds in reading and writing. The fourth phase now in planning stages will assess understandings and skills in mathematics for 13 and 17 year old students. The remaining subject areas to be examined are career and occupational development, literature, music, art and social studies. Subject areas will be reassessed in cycle II to provide a measure of educational progress over time. Contact: Horace P. Maxcy, Jr., Educational Planner, Department of Educational and Cultural Services.	assessment
MD STUDY	Educational accountability program. In response to a state law mandating an accountability system, a program in the assessment of achievement in the basic skills has been implemented and a report to the governor, the general assembly and the public will be published in early January of 1975 and each year thereafter. To avoid specious comparisons by the school buildings with diverse socioeconomic populations, achievement will be controlled for ability, income level and education of parent. Other factors such as salary and teaching experience of teachers, salary and administrative experience of administrators, present expenditure, etc. will be reported in conjunction with the controlled achievement data. AL PROJECT The state department of education is working toward the implementation of an integrated data base management information system (MIS). This effort is funded under a Title V ESEA section 505 grant. A new approach to data management is being designed and tested as a prerequisite to the implementation of the MIS. The new approach is based on the logic that: (1) data is a resource; (2) data can be classified and given unique numeric and/or work description identity; (3) data can be stored and accessed on the basis of that identity; and (4) data can be used for many applications from a single storage area. The U.S. Office of Education's "State Educational Records and Reports Handbook Series" (handbooks II through VI) are being used for data element definitions, word descriptors and numeric identity assignments. The word descriptors and/or number identities will be used as keys for the "addresses" of the data elements in the integrated data base. An operational integrated data base of limited scope is expected by late 1975. Contact: Frank T. Speed, Director, Division of Departmental Services, State Department of Education.

AR PROJECT A planning, programming, budgeting and evaluation system demonstration project, a Title III ESEA 1974-75 project is to improve the efficiency and effectiveness of the district's total educational program through the use of this management system. Objectives include: (1) to implement the program planning and budgeting system consisting of the basic elements required to collect, store, maintain and retrieve operating budget data in both line item and program format; (2) to implement the program accounting system based on the code structure contained in the U.S. Office of Education handbook II revised; (3) to implement curriculum planning and development system to selected components of the pilot elementary reading program; and (4) to implement the achievement data system which will provide a cost effectiveness view of selected programs. Activities include implementing the above objectives using computer programs. Helping students improve in reading by identifying and sequencing reading skills, using criterion-referenced test to determine the specific skills needs of the individual student, setting up specific objectives, then with teacher assistance, the use of specific skill oriented material by the student and analyzing data from the program accounting system and the curriculum development system to determine the cost effectiveness of the selected programs. evaluation

AR PROJECT A planning proposal for implementing state school systems financial accounting handbook II, revised, a Title III ESEA 1974-75 project is to investigate the feasibility of small to medium sized school districts implementing financial accounting as required by the financial accounting handbook II, revised, through the use of computer services on a shared time basis. Major goals are: (1) to determine if small and medium sized schools can implement the above system; (2) to determine the problems associated with a county unit concept of independent school districts pooling their resources to establish the above accounting system; and (3) to develop a high quality operational proposal for a pilot project establishing a county unit computer center for implementing financial accounting and other educationally related services. Activities include: investigate accounting systems and procedures and plan for project implementation; visit selected school systems using handbook II and computer services; investigate other computer services for schools, write specifications for appropriate computer equipment, develop an operational plan, negotiate lease bids on proposed computer systems, select and/or develop record forms and computer programs and establish procedures for implementation. CA STUDY

The Hi-Lo or school effectiveness study is a relatively new approach to the question of whether schools can make a significant contribution toward determining children's academic success. After controlling for socioeconomic and other nonschool factors, the study attempts to identify and describe the financial, curricular and administrative variables which distinguish pairs of schools. Each of the 22 pairs identified consists of two schools which are matched for students' socioeconomic status, percentage of minority students, percentage of bilingual students, urbanity and school size, yet whose students' sixth grade achievement scores differ dramatically from each other and from their predicted range. For each matched pair, one school's students scored far above the prediction, while the second school's students scored well below their prediction. The Hi-Lo research design will evaluate data from the paired schools to determine the factors which might account for the differences. R. Odor, Chief, Bureau of Research and Information,
Systems and Services, Division of Community Colleges,
State Department of Education.
- FL PROJECT Development of an automated faculty resource
inventory of faculty competencies. Contact:
William B. Phillips, Director, Science and
Engineering, Department of Education.
- FL PROJECT Information system for internal planning. This is
a management information system for planning and
monitoring the use of department of education
resources. It is designed for both multi-year
planning and for management within the fiscal year.
At present, the system is being used primarily to
monitor activities supporting six department of
education priorities. Personnel from several
administrative units within the department are
assigned to carry out coordinated activities
addressing each priority. Contact: Fred Daniel,
Room 125, Miles Johnson Building, Department of
Education.

- FL PROJECT Continuing study to develop alternative bases for funding of the state university system and evaluation of their feasibility and their impact on existing standards and methods. Contact: Kenneth Boutwell, Vice Chancellor for Administrative Affairs, Board of Regents, 107 W. Gaines St., Tallahassee, Fla.
- FL PROJECT Revision and implementation of an accounting manual for Florida's public community colleges conforming to the principles and procedures contained in the American Institute of Certified Public Accountants new audit guide, Audits of Colleges and Universities and incorporating the changes contained in National Association of College and University Business Officers administrative services manual. This manual provides for correlating the systems, procedures and reports with the latest trends nationally to develop more uniform accounting reports and procedures for colleges and universities and adapting the accounting system to meet the requirements for preparation of program budgets. A significant feature of the manual is that it includes a functional classification of accounts which conforms to the National Center on Higher Education Management Systems program classification structure. This feature will enable the colleges to collect data in the functional categories required for program budgeting, eliminating the need to crosswalk data to meet the specific requirements of this budgeting process. Contact: Kenneth E. Jarrett, Consultant, Financial Affairs, Division of Community Colleges, State Department of Education.
- IN PROJECT The department of public instruction is proceeding on schedule with the implementation of a statewide planning, programming and budgeting system by July, 1977. Four pilot projects have been established and have used the system for approximately two years. The department of public instruction and the state teachers association are preparing a program of instruction for Uniserve directors and state teachers association members in the spring of 1975. Two of the four projects have been successful in implementing each component of the planning, programming and budgeting system, (needs assessment, goals, objectives, program identification, program budget, program reports and evaluation). Contact: Ivan D. Wagner, Director, Division of Planning and Evaluation, Indiana State Teachers Association, 120 W. Market, 16th Floor, Indianapolis, Ind. 46204.
- IA STUDY Teacher supply and demand study for Iowa 1973. The purpose of the survey was to investigate problems of teachers supply and demand and to collect information from the local school districts to be used as baseline data on the current employment of teachers. Objectives were: (1) to ascertain the number of vacancies; (2) to interpret the expected change in each major subject area for the next school year; (3) to collect, analyze and compare vacancy information with data on teacher supply and demand for teachers; (4) to analyze and

IA STUDY	(Continued) interpret responses on questions concerning personal characteristics of new personnel hired; and (5) to summarize findings of investigation and present an overview of teacher supply and demand for 1973-74. There has been an adequate supply of teachers except for problems due to declining enrollments, budget restrictions and uncertainties of federal funding for special education. There was an increase in teacher aides and associates. Iowa is insufficient in graduating agriculture, business education and industrial education teachers. Interpretation of data on teacher vacancies this fall seems optimistic. Contact: Trevor G. Howe, Professor of Education, Iowa State University, Ames, Iowa; Orrin Nearhoof, Director, Teacher Education and Certification, Department of Public Instruction; John J. Wagner, Graduate Research Assistant, Iowa State University, Ames, Iowa.	
KY PROJECT	Study of feasibility of using centralized computer with terminals in each of 15 regions to provide data processing service to all local school districts. This will include implementation of a double entry accounting system with program budgets. Advisory committee consists of chairman of the board of directors from each of Kentucky's educational regions. Contact: James Melton, Assistant Superintendent, Bureau of Administration and Finance, Department of Education.	computers PPBS
KY PROJECT	The bureau of vocational education has undertaken a system of management by objectives for fiscal year 1974-75. The system consists of broad goals and objectives for the bureau as a total, objectives for divisions and units and objectives and activities for individual staff members. While the system was designed for the major objectives to be established at top bureau level, all staff members have been actively engaged in the developmental process with many negotiating sessions being conducted to clarify the roles of individual staff members. It is anticipated that the system will reduce any duplication of effort and assist the total staff reach predetermined and agreed upon objectives. Contact: Floyd McKinney, Director, Program Supporting Services Division, Bureau of Vocational Education, 20th Floor, Capital Plaza, Frankfort, Ky. 40601.	management-by- objectives vocational
KY STUDY	Kentucky's information for training and education system (KITES). The department of education, through the assistance of ten other agencies, has undertaken the development of a comprehensive manpower data system. This system will provide information to all levels of manpower planners concerned with planning for the development of the state's human and economic resources. The need for a centralized information system was originally recognized by those agencies of state government which make up the Kentucky Manpower Council. The 11 agencies represented on the council are the department of health, department of commerce, department of natural resources and environmental protection, department of personnel, department	manpower assessment information system

KY STUDY (Continued) of child welfare, department of corrections, cooperative extension service, department of mental health, department of labor, department of economic security and the department of education. The bureau of vocational education and the state department of education was selected as the unit through which the system would be administered. Although unable to meet all data needs, the conceptual design of the system is one which will allow it to become the basic information system of the state by providing data on manpower requirements by state and substate planning districts. The data generated by the system will ultimately provide a sounder basis on which program planning can be carried out. Contact: Janie Jones, Director, Occupational Information Unit, Bureau of Vocational Education, 20th Floor, Capital Plaza, Frankfort, Ky. 40601.

MD ACTIVITY Handbook II revised. Development of a revised financial reporting manual according to handbook II revised guidelines has been largely completed to meet the anticipated needs of the U.S. Office of Education and to meet the requirements of the Maryland accountability law. Contact: Ronald Meyers, Specialist in Research, Division of Research, Evaluation and Information Systems.

MD PROJECT Data retrieval. The automatic data processing center, the statistical services section and the management information system unit, all of the division of research, evaluation and information systems have completed the first year for providing data to staff members of the state department of education from data banks that already exist. Data are being retrieved, manipulated and reported for special onetime reports without additional data collection in some cases. Contact: William S. Scott, Jr. Management Information System Unit, Division of Research, Evaluation and Information Systems.

MD PROJECT Automated data collection and reporting. The automatic data processing center, the statistical services section and the management information system unit, all of the division of research, evaluation and information systems, have completed the first year of a pilot study to collect data (reports) from school districts on magnetic computer tape or in punched cards. Sufficient experience has been gained to prove the procedure feasible and working. Activities related to this study will continue to be performed until a state policy is developed. Contact: William S. Scott, Jr., Management Information System unit, Division of Research, Evaluation and Information Systems.

MD PROJECT Forms administration. The statistical services section and management information system unit, both in the division of research, evaluation and information systems, are implementing a forms administration procedure centralizing the approval of all data collection documents distributed by the state department of education. A complete centralized forms inventory has been compiled. Activities

S 966
Ch 23
- NJ ACTIVITY Program, budgeting and accounting. The department project began two years ago with Willingboro, South Plainfield, Newton and Essex Fells preparing their 1973-74 budgets using program budgeting concepts. July 30, 1974 marked the completion of a year where their expenditures were reflected using a program accounting format. Department guides were developed. Additional districts prepared their 1974-75 budgets using the program budget guide and are now accounting for these expenditures using the program accounting guide. Contact: James Oszfok, Chief Auditor; Harold Y. Bills, Acting Assistant Commissioner, State Department of Education.
- NJ STUDY The state supreme court on April 3, 1973, upheld the decision of Superior Court Judge Theodore I. Botter in the case of Robinson vs. Cahill which said that the current method of financing public education was unconstitutional under the state constitution and that the system must be changed. The supreme court said that the financing method failed to provide the "thorough and efficient" system mandated in the state constitution. Recognizing that the ultimate responsibility for developing a financial scheme that will fulfill this obligation rests with the legislature, the state board of education has undertaken the mission of defining "thorough and efficient" education. To direct the department of education's activities in this regard, the state board appointed a task force, chaired by board member Dr. Allen G. Potter and consisting of three other board members, the commissioner and the department's division heads. The department's first step was to review pertinent literature and conduct a survey of all other states' efforts at defining or setting state standards for "quality education". Based on this work, the board task force then made two major decisions: (1) to develop a functional definition of "thorough and efficient" through the state's administrative code;

NJ STUDY	(Continued) and (2) to involve a broad spectrum of educational and civic groups as well as the public in the process of developing that definition. The suggested code revisions set forth the responsibilities of the local district in planning and carrying out its school program and of the state board and department of education in monitoring and auditing that program. Chapter 6:27 of the recommended code defined educational process and program standards and the district and school approval process. That process couples: (1) a comprehensive self-study and state evaluation for approval every tenth year; with (2) an annual approval based upon evaluation of the district and school report of its progress and plans for improvement each year. Contact: William Brooks, Deputy Assistant Commissioner, Division of Curriculum and Instruction, Department of Education.	
NJ STUDY	State aid plans. On April 3, 1973, the supreme court ruled in the matter of <u>Robinson vs. Cahill</u> that the present method of funding elementary and secondary education was unconstitutional. The legislature was given until December 3, 1974 to enact a new funding plan to be effective July 1, 1975. To date, many studies have been made and alternative funding plans have been formulated. Contact: Harold Y. Bills, Acting Assistant Commissioner, State Department of Education.	finance

PA PROJECT	(Continued) approved guidelines which are based on the <u>Guidelines for the Collection, Maintenance and Dissemination of Pupil Records</u> prepared by the Russell Sage Foundation. In order to assist school districts in the implementation of the regulations, the department of education has been sponsoring 29 workshops covering all geographical areas of the commonwealth. Contact: Robert Cox, Guidance and Counseling Coordinator, Bureau of Instructional Support Services, Department of Education.	
TN HB 1486 Ch 442	Provides for open meetings of governing bodies except as provided by the state constitution; notice of regular meetings and special meetings; open minutes. Provides penalties for violation. Declared unconstitutional by lower court on basis of vague working "adequate public notice of such meeting". Supreme court overturned the lower court ruling and this is now law in Tennessee. Adequacy of notice will be judged on a case-by-case basis.	open meetings
VA HB 3 SB 96 Ch 332	The general assembly approved substantive changes to the freedom of information act, particularly in provisions defining "official records" and providing for public inspection of these records. Under the amended act, many of the governmental bodies which are exempt from the general provisions of the act must now take final votes in open meetings. Two amendments to the act directly affect institutions of higher education. First, memoranda, working papers and correspondence held by the "president or chief executive officer of any state supported institution of higher education..." are not official records open to public inspection under the act. Second, meetings of boards of visitors are not required to be open, but following the meetings, announcements of actions, not including those excluded by 2.1-344 are to be made available immediately with membership of the board available for discussion of actions taken. As under the previous act, official minutes of the board meetings must be made available to the public not more than three working days after such meetings.	open records
VA SB 345	Requires all school boards to furnish the state board of welfare and institutions promptly with any information from its files which the state board deems to be necessary in the classification, evaluation, placement or treatment of any child committed to the state board.	student records school boards
WI AP 573 Ch 254	A pupil, or the parent or guardian of a minor pupil, shall, upon request, be shown and provided with a copy of the pupil's progress records. An adult pupil or the parent or guardian of a minor pupil shall, upon request, be shown, in the presence of a person qualified to explain and interpret the records, the pupil's behavioral records. Pupil records may be made available to licensed persons employed in the school and progress records may be provided to a court.	students parent rights

AZ SB 1121 As enacted this bill defines standards of conduct for all elected and appointed public officers in Arizona. It covers four main areas: (1) Public officers or employees excluding members of the legislature are prohibited from representing another person before the agency where formerly employed for one year and disclosing confidential information for a period of two years and misuse of his official position for illicit financial gain; (2) Members of the legislature are prohibited from misusing their official power for personal gain as defined in the preceding paragraph. Special exemptions are made for legislators to appear at judicial proceedings which are advisory in nature and appear before state agencies on behalf of constituents. Additionally, a legislator is prohibited from: (a) accepting outside employment which will conflict with his official duties; (b) participating in any way in legislation in which he has a substantial personal interest (subject to rules of the legislative body of which he is a member); and (c) selling goods to the state worth more than \$1,000 from a firm in which he has more than ten per cent interest except under competitive public bidding; (3) All elected officials, including judges, shall file a detailed financial disclosure with the secretary of state. This statement shall be filed by all candidates for public office by September 1, 1974 and thereafter on January 31 of each year. Every incorporated city, town or county shall adopt financial disclosure provisions similar to this chapter. Penalties for failure to disclose or incomplete disclosure are provided; and (4) The governor will appoint an eight member ethics board which has the power to: (a) initiate and receive complaints against public officers; (b) investigate information and financial statements filed on public officers; (c) hold hearings and give notice of hearings to all parties involved; (d) recommend legislation and render advisory opinions; and (e) report its findings to the officials involved, the governor and appropriate law enforcement agencies for further action.

AZ SB 1138
Ch 197

Requires each candidate for public office and each campaign committee to file itemized campaign financial statements. The first to be filed not more than 15 nor less than ten days to a primary election. Statements to include each contribution in excess of \$25, names and addresses of contributors and all expenditures. In addition, candidate must file a report containing the name and address of each person who has received contributions on his behalf, has made an expenditure on his behalf, or will expend or collect money on his behalf. Contributor giving over \$25 must also report contribution within five days. Limit on amount of money which may be spent to aid candidate: not more than ten cents for each person residing in the election district. However, a person may spend up to \$500 if the ten cent computation is less than \$500. Violators guilty of misdemeanor are fined from \$100 to \$2,000, imprisonment for six month-one year or both. Falsifying a campaign statement punishable by fine from \$25 to \$500. In addition, the person will be barred from office.

CA ACTIVITY	Legal doubt regarding applicability to school board members of the mandatory financial disclosure provisions of section 3700 of the government code (SB 716) is clarified by a legislative counsel opinion issued November 12, 1973. The opinion states that the disclosure provisions of section 3700 do not apply to school board members and that the optional or permissive provisions of section 3704 are applicable to school board members. Legislative counsel offers the additional opinion that the entire division 4.5 of Title 1 containing the full contents of SB 716 is of doubtful constitutionality. Because of the frequently expressed concern of school board members throughout the state, the <u>Sacramento Report</u> quotes verbatim and in full the question submitted to legislative counsel, the opinion of the legislative counsel and legislative counsel's analysis of his opinion. 1973.
CO SB 28 Ch 49 Art 27	Enacting the campaign reform act of 1974 and making provisions for accurate accounting and reporting of campaign contributions and making an appropriation to the secretary of state for implementation thereof.
FL HB 2346 Ch 176	Establishes nine member commission on ethics with power to initiate, to receive and to investigate complaint of violation of code of ethics for public officers and employees.
FL HB 3419	(Substitute) Provides standards of conduct for all public officers and employees prohibiting accepting of gifts, owning material interest in business doing business with agency of which officer or employee is employed, requiring public officers (all elected officials, school superintendent, district school board members, community college presidents and trustees, board of regents members of state universities, directors of division) except members of advisory boards with no authority to spend funds, to file annual statements disclosing sources of income by percentages. Makes intentional violation grounds for dismissal from employment, removal from office or removal from the ballot.
OH SB 46	(Amended substitute) Revises Ohio campaign finance laws to: require all of a candidate's campaign finances to be handled through a single campaign committee; prohibit any person from spending more than \$25 for a candidate without the candidate's permission; change the limitations on campaign spending for various elected offices (for board members, \$250 or ten cents per pupil, whichever is greater); restrict the amount of cash contributions; regulate the price of political advertising charges for candidates; require the reporting of campaign receipts and expenditures before elections (except for candidates spending \$1,000 or less); permit an employer to deduct political contributions from an employee's paycheck if requested by the employee; create the Ohio Elections Commission with power to investigate campaign finance complaints; and prohibit the granting of non-bid public contracts to certain campaign contributors.

- OK SB 534** Campaign contributions act applies to school board elections. Requires reports of contributions from candidates or organizations; requires financial disclosures; violations of provisions of act are a misdemeanor, and final conviction of any provision could result in forfeiting office.
- OR HB 3304** This bill is for the: (1) establishment, implementation and enforcement of code of ethics for all public officials; and (2) requiring the filing of a statement of financial disclosure by certain public officials. Defined prohibited actions are: (1) use of official position or office to obtain financial gain other than salary; (2) to solicit or receive gifts or favors with \$100 value from person known to have interest in any governmental agency; (3) to solicit or receive any pledge or promise of future employment based on understanding that public official's vote would be influenced; and (4) to further personal gain by use of confidential information gained by official position. School board member must announce in public nature of conflict before taking action. Superintendent must notify school board in writing of nature of conflict and request board to dispose of matter. Creates Oregon Governmental Ethics Commission. Seven members, three appointed by governor and one each by majority and minority parties of legislature. It has powers to investigate violations and issue advisory opinions at request of any public official regarding whether or not an action constitutes conflict of interest. Commission also to have enforcement powers. Can give penalties up to \$1,000 plus require forfeiture by a public official of twice the amount of financial benefit to the public official or any other person. Requires certain state level public officials to file a statement of economic interest which includes specified information. Allows a local option so that by resolution of the governing board, school districts may require its public school officials to file a verified statement of economic interest.
- SD HB 785**
Sec 13-34 Adds a new section prohibiting a school officer or employee from interest in sale, proceeds or profit of books, apparatus or furniture used in schools of this state; provides misdemeanor clause.
- SD HB 828**
Ch 121 Provides for disclosure of close economic interest by certain candidates; value of such interest need not be reported; includes school board member in districts with 2,000 students or more; defined as ten per cent, if greater than \$2,000 of total income of the family; file statement with county auditor within 15 days after filing nominating petitions; violation a misdemeanor punishable by fine of \$2,500 or 30 days in jail.
- WA SB 3003** Makes it a felony to use voter registration information for advertising or solicitation mailing purposes. Imposes a fine and/or prison sentence for violators.

STATE ORGANIZATION AND POLICY

AL PROJECT In 1971 the state department of education spent several months in a process of reorganizing the department. The American Management Association served as advisor. The directors of the five divisions agreed to commit the services of their specialists to work on teams and the team approach service was set as a top priority. During the intervening time and until May 1, 1974, the project was evaluated, altered and consulting teams scheduled for each school year. As the project grew, an assistant coordinator and two professional development specialists were assigned to the project. Contact: J. C. Blair, Director, Division of Instruction, State Department of Education.

AK HB 180
Ch 78

(Amended substitute) Creates 13 member commission on postsecondary education including five public members appointed by the governor subject to legislative confirmation, two legislators and six individuals representing agencies and institutions concerned with postsecondary education. Conforms to requirements of and qualifies state for federal grants for postsecondary educational planning, particularly for vocational education and for community college programs under the education amendments of 1972 (PL 92-317). The commission will act in an advisory capacity to the governing bodies of both the University of Alaska and the two private institutions of higher education in the state as well as to the governor and the legislature by coordinating the development of postsecondary educational planning in the state, reviewing the functions and purposes of both the public and private colleges and universities, including a review of the annual budgets and capital outlay programs of each and overseeing the ongoing higher education consortia organized in Anchorage and Sitka. Transfers to the commission the administration of postsecondary education programs now scattered throughout a number of state agencies, including: the student financial aid program (scholarship loans and tuition grants) by serving ex-officio as the student financial committee, the regulation of postsecondary, degree granting educational institutions (the state anti-diploma mill law) and the state's participation in the Western Regional Higher Education Compact (WICHE); the commission also will serve as the state agency for several federally funded higher education programs (e.g., higher education facilities act) and is charged with resolving any disputes that exist or arise under the higher education consortia or other cooperative agreements between institutions of public and private higher education in the state. Requires the development of a comprehensive statewide plan for coordinated postsecondary education, establishment of a statewide advisory council on community colleges; designates the commission to serve as a data collection center for information concerning higher education costs, student enrollments and other related statistics. The commission may appoint an executive officer and staff; however, the commission and its staff are located in the department of education for administrative support services only, are independent of the department and not subject to the direction either of the commissioner of education

AK HB 180 (Continued) or the state board of education; stipulates that authority for operation and management of the statewide university system remains with the University of Alaska's Board of Regents and for other postsecondary educational programs, with the governing boards of the private nonprofit or proprietary institutions in the state. Effective date July 1, 1974. Amendments include the following: The university may enter into a cooperative agreement with an agency of the federal government, a school district or municipality for the establishment, operation and maintenance of public postsecondary and continuing educational programs in community colleges, extension centers or by other means. A community college may be established by the board of regents. Establishes criteria for creation of community colleges and extension centers and requires a feasibility study of practical need before it is established. Extension center is authorized as alternative to community college where community college not needed. State responsible for funding, but community college may also be funded by school district, municipality or federal agency. Requires university to prepare complete program budget for each community college showing all sources of revenue. All funds administered by board of regents. President will assign executive vice president to be liaison with community college or extension centers working through the regional administrators. The president is responsible for all appointments. Graduate courses may be offered through the community college by the university. A community advisory council for each community college consisting of seven-15 members is created. Term of office for members is three years and no member can serve more than two consecutive terms. The board of regents shall appoint members. The council acts in advisory capacity to administrator of community college or extension center and serves as a communications link between the community served by the college and the University of Alaska. Also review budget for community college and make recommendations relating to operation and management of community college.

AK HB 849 (Amended substitute) Authorizes issuance of a public license for sale of beer and wine on campuses of universities, colleges or community colleges in the state. Permits only one such license to be issued per campus, subject to other provisions of alcoholic beverage code and administrative regulations governing control and sale of alcoholic beverages in the state. Annual fee is \$300. Limits licensure to those colleges and universities accredited by Northwest Association of Secondary and Higher Schools, but the accreditation of the University of Alaska is not applicable to the community colleges of the university not separately accredited by the Northwest Association.

KS HB 1626

Abolishes the state school fund commission and transfers its remaining powers, functions and duties to the state board of education. Provides that a board of education may make application to the state board on its own motion for additional bonding authority. The state board must hold hearings on each application. If approved, the state board will notify the county election office to authorize the holding of an election.

KS HB 2021

Permits the state board of education to contract with any state agency or institution, board of trustees of a community junior college, school district board of education or governing authority of any nonpublic school to provide computerized information search services. The state board is authorized to establish an appropriate fee schedule for providing such services. Receipts to the state board from contracts and available federal funds are to be deposited monthly in the state treasury and credited to the information search services fee fund.

KS SB 366

Adds a statutory division of services to children and youth within the department of social and rehabilitation services to the three divisions created by a 1973 executive order. The new division is to be under the administrative direction of a director appointed by the secretary of social and rehabilitation services with the consent of the senate. The division director is to be in the unclassified service under the Kansas Civil Service Act. Also provides for an advisory committee to be composed of the director of services to children and youth, the director of health, the commissioner of education, the director of social services, the director of mental health and retardation services, the director of vocational rehabilitation, the executive director of the governor's committee on criminal administration, the commissioner of labor and two members of the senate and three members of the house of representatives.

KS SCR 122
Art 6
Sec 2

Relates to the powers of the state board of education: (1) makes it clear the legislature has the power to prescribe and limit the power of the state board of education; and (2) includes a provision that community junior colleges are to be operated, supervised and controlled as provided by law. The change proposed under (1) above resulted from the Kansas v. Board of Education of United School District 398, the Peabody case, wherein it was

STATE OF VIRGINIA AND POLICY

General

VA SB 121 (Continued) (3) new academic programs proposed by institutions; (4) establishment of any department, school, college, branch, division or extension of any public institution; (5) proposed changes in the institutional inventory of educational and general space; (6) discontinuing existing non-productive academic programs; (7) developing a comprehensive data system and uniform standards and systems of accounting; (8) providing advisory services to private colleges; (9) developing formulae and guidelines for budgetary purposes; and (10) reviewing institutional budget requests to make recommendations to the governor and general assembly. These budget responsibilities include ones in which the council was not previously charged with duties and ones in which former responsibilities have been broadened. The statute explicitly states the long standing fact that faculty selection and student admission policies are a function of the individual institutions. In the areas of changes in institutional mission statements, discontinuance of existing non-productive academic programs and proposed institutional changes in space inventory of educational and general facilities, the council's actions become effective 30 days after the adjournment of the next scheduled session of the general assembly.

VA SB 122 Pursuant to requirements of the revised state constitution, standards of quality for public schools first became effective on July 1, 1972. Standards for 1974-76 were enacted by the general assembly as follows: (1) each school division shall employ with state basic and local funds at least 48 professional instructional personnel for each 1,000 students in average daily membership; (2) each school division shall provide a program of special education for handicapped children that is acceptable to the board of education and a program designed to enrich the educational experiences of gifted and talented children; (3) each school division shall provide vocational education or make progress acceptable to the board of education toward achieving the plan submitted to the board of education on June 30, 1973; (4) each school division shall provide a supplementary program in reading and mathematics skills development for low achieving students in grades K-6 acceptable to the board of education; (5) each school division shall provide kindergarten education for all eligible children whose parents wish them enrolled or be prepared to offer this program by September, 1976; (6) each school division shall develop by July 1 of the ensuing school year an acceptable plan to meet accrediting standards for any school that is unaccredited or accredited with a warning by the board of education; (7) each school division shall involve the staff and community in revising and extending annually the five year school improvement plan to be submitted to and approved by the board of education on July 1, 1974. This plan shall include: (a) the objectives of the school division stated in terms of student performance; (b) an assessment of the extent to which the objectives are being achieved, including follow-up studies of former students; and (c) strategies for

STATE ORGANIZATION AND POLICY

WI AB 300
Ch 90

This bill causes changes in the following areas: (1) state trust fund loans; (2) teacher retirement and social security payments; (3) county elementary aid; (4) tuition claims for handicapped children to include building charge; (5) state reimbursement of salaries for psychologists and social workers; (6) state aid to cooperative educational services agencies; (7) agency school committee expenses; (8) date for certifying the tax levy; (9) certification of tax levy to reflect changes in equalized valuation resulting from reorganization and annexation; (10) adjustment of tax levy by unified districts; (11) school district classification; (12) equalized valuation for aid computation; (13) cost to be shared in the general aid formula; (14) two levels of state support; (15) two levels of guaranteed valuations; (16) state aid payment to school districts; (17) payments by certain districts to the state; (18) transitional payments; (19) flat aids repealed; (20) summer school membership; (21) property tax relief and cost control for 1973-74; and (22) exemption from cost controls. The state budget provides for an increase in state general aids to school districts. Part of this increase is intended to provide for property tax relief. To insure that a portion of the additional state aid does result in property tax relief rather than be used to fund increased expenditures, a limit is imposed on the amount by which a school district may increase the 1973-74 shared cost over 1972-73.

AZ SB 1240 Ch 69	Allows a county attorney, at his discretion, to represent a school board member in an action brought against the member in his individual capacity until it is established as a matter of law that the alleged activity or events were not performed or not directed to be performed within the scope or course of the board member's duties.	<u>Liability and Insurance</u> school board lawsuits
IN HB 1068 PL 142	Intends to limit the extent of liability of any governmental entity. The act comes as a result of the breakdown of sovereign immunity and the mushrooming number of suits for liability. It has major implications for all units of government and its content should be known.	liability sovereign immunity
IA HF 462 Ch 1263	Clarifies the law with respect to tort claims and legal actions brought against a local municipality (school board) and/or its officers, employees and agents. By definition, tort is expanded to include acts occurring under errors and omissions, and provisions call for the governing body (school board) to defend and save harmless and indemnify against such claims, including errors and omissions, except cases of malfeasance in office or willful or wanton neglect of duty. Also provides authority to purchase and pay from the general fund, insurance to cover such claims, etc. Six months time limitation within which to bring any action.	tort liability school board insurance
ND HB 1294 Ch 792	Defense of sovereign immunity reaffirmed as it applies to public education.	sovereign immunity
MA H 5762 Ch 547.	Gives school committees the authority to make recommendations relative to insurance of buildings and personal property under their control.	insurance facilities school board
MN Ch 472	Extends governmental immunity from tort liability for certain towns and authorizes purchase of insurance and making a levy of taxes thereof.	tort liability insurance taxes
MS H 472	Allows county boards of education to purchase liability insurance to cover their official action.	liability insurance school board
NC H 1879 Ch 1209	Enabling local boards to purchase liability insurance for members and administrators.	school board personnel liability insurance
SC S 835	Provides for liability insurance for all state and local governmental employees including school districts so as to protect such personnel against liability arising in the course of their employment.	liability insurance personnel
TN SB 2077 HB 2227 Ch 780	Allows any governmental entity that had exempted itself from the tort liability law to elect at any time by resolution, to come under the law. Also this amendment would allow the governmental entity to purchase any tort liability insurance, without public bidding, if such insurance is purchased through a plan authorized and approved by any organization of governmental entities representing cities and counties.	tort liability insurance

KS HB 1540	(Continued) the state board, whose decision is final. Once a student establishes residency outside his sending district, the original sending district is no longer liable for the payment of the student's tuition. Controversies relative to the determination of residence can be appealed for resolution to the state board of education.	
KS HB 1711	Allows any two or more school districts having a combined total enrollment of not less than 15,000 students to make and enter into agreements for the purpose of operating and maintaining data processing centers. Creates an administrative fund to finance the cooperative.	interdistrict cooperation data processing
KS SB 59	Authorizes any two or more local governmental units to consolidate or jointly perform any administrative procedure or function performed by such governments individually. In addition, the bill provides that any one local governmental unit may provide for the consolidation of administrative operations, procedures or functions within the governmental unit itself. However, in either case, if the elimination of an elective office is involved, such consolidation would be subject to the approval of a majority of the electors of the local governmental unit served by such office. Also includes a petition procedure which provides that ten per cent of the qualified electors may initiate any such consolidation.	interdistrict cooperation
KS SB 641	Relates to appeals by school districts to the state board of tax appeals for increases in their legally adopted budgets. The bill: (1) adds a new budget appeal reason relative to enrollment changes; (2) makes permanent the appeal reason for mandated student transportation; and (3) repeals the appeal reason relating to special education cooperative programs.	budgets
KY HB 327 ARS 160.190	Requires any school board vacancy having an unexpired term of one year or more to be filled by an election at the next regular November election.	school board elections

Elementary, Secondary and Postsecondary

SCHOOL DISTRICT ORGANIZATION AND POLICY

- WY HB 16A
Ch 24 Change in election code to change terms of school board members from four to three years. Corrected inequities that might arise as a result of electing majority of members every other year. Now provides for annual elections. The cost of a school or community college district election, or equitably proportioned shares of a concurrent election as determined by the county clerk shall be paid by the appropriate board from the funds of the school district or community college district. A qualified person may be nominated for the office of school district trustee or member of a community college board by filing an application for election in the office of the county clerk not more than 95 nor less than 45 days prior to the election.
- WY HB 27
Ch 15 Relating to the foundation program; providing for emergency closures of schools; providing that school districts involved in reorganization contests may levy taxes in the same manner as unified districts pending final decisions; providing an increase in the classroom unit value; altering the mill factor in the supplemental entitlement formula and providing an effective date.
- WY NOTE Teachers may not serve on board in same district. The supreme court has ruled that a teacher may not legally serve on the school district board in which the teacher is employed. Said the court: "There is a present conflict of duties of the two positions (school board member and teacher) which constitutes an incompatibility which is not in the best interest of the school district or the general public and which, under properly interpreted principles of common law, should not be permitted to exist."

GA HB 577
PA 278

(Substitute) Directs superintendents of schools to make evaluations of teachers based upon guidelines which have been established by the state board of education for the development of evaluation programs and upon any additional guidelines as may be established by mutual agreement between the local board of education and the teachers representative. The act deletes the requirement that superintendents of schools make evaluations of teachers based upon minimum performance criteria, which were to be established by the state board of education and upon any additional local board of education criteria established by negotiation. Directs the superintendent of schools to continuously evaluate each teacher. Teacher is defined as each employee of a board of education below the rank of superintendent, who holds a certificate or permit issued by the state board of education. Such evaluations must be reported to the local board of education before June 1 of each year. Provides for renewal of teacher contracts for a second, third or fourth year. If a dismissal occurs in writing after which a teacher is to be renewed yearly, with evaluation.

AL PROJECT

The continuous professional development program is a part of the state board of education resolution on teacher education of January, 1972. The program states that each school system must provide for the continuous professional development of each staff member by having them submit a plan each year to the local school system stating what they plan to do to improve themselves during that coming year. Each teacher must be evaluated by the local school system at least once each year. The local school system will develop a comprehensive development program for each person in that school system based on the stated needs of the teachers. The professional development section of the state department of education is available to assist local school systems. Staff members refer persons to assist the local teachers. This requirement has caused many school systems to implement different innovative plans for professional development. Contact: J. C. Blair, Director, Division of Instruction, State Department of Education.

AL PROJECT

During 1973-74, the Alabama Association of Classroom Teachers, a division of the Alabama Education Association, sponsored two instructional labs where teachers taught teachers. More than a thousand teachers attended these sessions. Because of the apparent success of these labs, the Alabama Association of Classroom Teachers has entered into an agreement with the University of Alabama in Birmingham to offer these courses for college credit. The course content will reflect an emphasis on inservice training. Contact: Jane Moon, Route 1, Box 40, Guntersville, Ala. 35976.

AL PROJECT

The 1973-74 school year was the first of two years to be devoted to the operation of the first year teacher pilot program. The year had special significance as the beginning of a joint effort by the state department of education, local education agencies and the University of Alabama in Birmingham. They have formed a task force to develop a support system to guide and assist first year teachers. The program has sought to maximize the beginning teacher's success and thereby to improve the teaching-learning situation for students. The second year's study will be a more controlled effort to examine student attitude and achievement as well as teacher attitude and competency. The instruments in the developmental stage and first year will be revised and made more reliable to identify and clarify the best practices. The teacher center will begin operation in 1974-75. Contact: J. C. Blair, Director, Division of Instruction, State Department of Education.

- AR PROJECT (Continued) ment; (2) at the end of the planning period, 80 per cent of the teachers will respond with 85 per cent accuracy to a project developed instrument designed to measure their understanding of the theoretical basis of affective development. Participants will: (1) refine an instrument to measure students' affective behavioral change; (2) administer informal assessment instruments; (3) plan and practice writing behavioral objectives; and (4) understand the human relations program and their relevance. The emphasis is on inservice education. Contact: Blanche Graddy, Warren Dupree Elementary School, Gregory St., Jacksonville, Ark.
- AR PROJECT A humanistic junior high school instructional program, a Title III ESEA 1974-75 project is directed toward staff development, provision for individual differences, with emphasis upon learner-centered rather than subject centered class activities. Objectives include to have the staff: (1) increase their personal and interpersonal skills and understanding of others; (2) increase their knowledge and potential for strengthening students' desirable behavior; (3) become more learner-centered; (4) increase provision for individual differences and use methodology that stimulates students more than control groups; (5) be involved in writing their own performance objectives reflecting humanization and attempting to be part of a team effort toward the larger project goals. Students will show more positive attitudes toward school, teachers and education; show higher self-concepts and attain greater achievement gains. Activities include a two week summer workshop with several consultants for the staff, weekly scheduled small group session with junior high staff and periodic staff meetings with consultants. A model classroom for the socially maladjusted and the emotionally disturbed student is being developed. Contact: Joe Mathias, Rogers Public Schools, 220 S. 5th St., Rogers, Ark. 72756.
- CA SB 1335
Ch 1096 Inacts bilingual-crosscultural teacher preparation and training act of 1973. Provides for career ladder programs to allow bilingual aides to become certificated and for language and cultural curricula in public teacher training institutions to train already certificated teachers. Provides for grants for bilingual aides and teachers.
- CA PROJECT Improvement of evaluation skills at the local level. A network of eight evaluation improvement centers has been established. These centers are administered by the state through the county offices of education in which they are located. The centers are responsible for the development of inservice education materials and the utilization of these materials in scheduled workshops in their geographical areas. This year the target audience is management personnel of local education agencies, next year, pending appropriation funding, the training will be expanded to others. Contact: Alex Law, Chief, Office of Program Evaluation and Research, Department of Education.

GA PROJECT	Staff development. During 1974-75, a new approach to educational improvement through staff development was implemented by the department of education. More than 75 per cent of the 188 school systems elected an alternative to the state grant in aid program which assists teachers to attend colleges for additional study. Under this alternative, school systems may choose instead to use the state money to implement local staff development programs. School systems may develop their own programs or programs may be developed in cooperation with universities or intermediate units, but they must meet specific educational needs identified by each system. Approximately 20,000 teachers and administrators from 148 systems are involved in these staff development programs.	staff development
GA PROJECT	IDEALS concept strategy training program, Title III ESEA, 1974-75. Adoption of a program in educational planning and problem solving developed at the University of Wisconsin. It features staff development training in problem solving, needs assessment and selecting innovative solutions to educational problems. Project #795-1-74-095, West Point City. Contact: William C. Bozeman, Director, West Point High School, West Point, Ga. 31833.	personnel training
IL PROJECT	The major goal of teacher oriented, teacher operated teacher center, Title III ESEA, is to establish a teacher operated teacher center that meets the self-identified needs of all district 34 teachers through adapting the British model to the American educational system. The teacher center itself is planned as a multipurpose facility where teachers will meet formally and informally to exchange ideas, work together, attend meetings, develop materials and meet other identified needs. It will also house the latest in instructional materials and methodologies for teacher use. The procedures being followed include assessing teacher needs and developing the programs to meet them. All Glenview teachers received a questionnaire last year to assess the need for teacher center and the services it would provide. The response was overwhelmingly positive for the center. Contact: Cheryl Christensen, 1401 Greenwood Road, Glenview, Ill. 60025.	teachers education needs assessment
KY PROJECT	Project RISE, regional innovations and services for education, has two components: (1) regionwide inservice; and (2) exemplary programs. The regionwide inservice component offers inservice activities to introduce recent innovations in curriculum and staff development to meet needs of individual schools. These activities are planning and conducted on both regionwide and local district levels. Consultative help is available from the RISE staff in interaction analysis, self-enhancing education, self-motivation seminars, both basic and advanced behavioral objectives, communication skills, transactional analysis, education leadership and values clarification. There are 12 exemplary programs.	personnel training regional

KY PROJECT (Continued) Prescriptive reading inventory is regionwide in scope. Eleven are being developed in local districts whose proposals were approved by the RISE board of directors. These include environmental education, computer assisted instruction for math, audio-lingual foreign language instruction, career education, inservice teacher training to diagnose reading problems and individualizing instruction in communication skills, a Title III ESEA project. Contact: Juanita Jones, Tenth and Clark Sts., Paducah, Ky. 42001.

MD PROJECT Competency-based teacher education was adopted as one of the five major priorities by the state board of education. The state department has sponsored a seminar series for state educational leaders and there have been conferences between the state department and all individual school districts. Training models are being developed at Maryland Institute of Art, Frostburg State College, Towson State College and University of Maryland, Baltimore County. Identification of competencies is being conducted by elementary and secondary public school teachers in workshops for determining areas of consideration in competency-based teacher education programs and identification of competencies for cooperating teachers is being done by cooperating teachers and college personnel to serve as a guide for competency in teaching. A state team of public school, college, teacher association, lay and state department persons is examining a nationally recognized competency-based teacher education program for one week. The team was sponsored by the state department of education to shadow and study students in a competency-based teacher education program. The state department of education has funded a state college to develop a state dissemination center for competency-based teacher education materials in conjunction with the college's implemented competency-based teacher education program. A state task force will be organized by the end of 1974 to appraise the advantages and disadvantages of competency-based teacher education to define guidelines for the direction of competency-based teacher education and the state anticipates contractual funding to support colleges implementing competency-based teacher education programs. Contact: Howard C. Allison, Assistant State Superintendent of Certification and Accreditation, State Department of Education.

OR PROJECT

Mutuality of planning project, Title V LSLA, state department of education, Portland School District, Northwest Regional Educational Laboratory. The project sets out to develop, test and model for training principals, teachers, students and people in the community in assessment and planning skills to identify program needs. The project involves students K-12 at Marshall High School and two feeder elementary schools. The Northwest Regional Educational Laboratory served as a coordinating and consulting agency and provided a final evaluation report. Task forces in each school consisted of the building principal, laymen, instructional staff members and students. Participants were trained in systems planning and in use of a modified delphi technique for reaching consensus. Procedures were developed for making a learner-based needs assessment at the eighth and 12th grade levels. The task forces used the results of learner-based needs assessments as a data base for identifying priority problems, objectives and learner activities. A learner-based needs assessment instrument was developed. Career education is used as the delivery system for the data, with basic education and special education providing support. Contact: William Thornton, Mutuality of Planning Project, Marysville School, 7733 SE Raymond St., Portland, Ore. 97206.

Districts may use problem solving techniques for classroom teachers for inservice training in techniques for defining, analyzing and solving problems. Materials are provided for conducting 27 and one-half hours of instruction in an inservice workshop or college course and for two three-hour follow up sessions. The leader's manual is designed for use by a qualified instructor. The manual lists procedures for each unit, resource materials and participant exercises. Materials are provided for each participant. An audiotape presentation of a simulated problem to be solved is included, along with a science research association publication for each participant, diagnosing classroom learning environments. Units include: using research about the classroom; diagnosing using field force techniques; diagnosing teamwork relationships; force field analysis and data gathering; spotting the major results in data; gathering data on team building relationships; the concept of feedback; deriving implications and action alternatives from research findings; and small group dynamics. Using a simulated problem situation, participants practice a five step method of problem solving: (1) identify the problem; (2) diagnose the problem situation; (3) consider alternative actions, (4) try out plan of action; and (5) adopt a plan. Funded by Northwest Regional Educational Laboratory. A technical evaluation is available. OR PROJECT

The instructional aide development program is designed to assure that aides acquire 11 skills identified as necessary to function adequately as an instructional aide. South Umpqua conducts a summer school session for preschoolers, entering first graders and elementary school pupils who want or need extra help. Prior to these sessions, a two week training course for 20 aides was conducted by members of the district teaching staff and by outside consultants. In addition, aides receive on-the-job clinical supervision as they work with teachers and students. The training focuses on 11 skills: (1) administering standardized and criterion-referenced diagnostic instruments; (2) scoring and interpreting results of criterion-referenced instruments; (3) participating with teachers and parents in prescribing learning activities; (4) conducting drills in skill building activities; (5) managing small groups of children in special learning activities; (6) using techniques that elicit more than recall type responses from children; (7) assisting in the evaluation and accurate recording of student progress; (8) explaining objectives associated with an assigned instructional task; (9) assisting in the collection and preparation of materials for use in individualized programs of instruction; (10) demonstrating awareness of the ways children learn, grow and develop; and (11) becoming proficient in interpersonal relations with professional staff, parents and pupils. At the conclusion of the initial training program, teacher ratings and trainee self-analysis ratings indicated that all trainees had acquired at least 90 per cent of the desired skills. Funded by the education professions development act, 1965. Contact: Sam Nutt, Director, Instructional Aide Development Program, South Umpqua School District, P.O. Box 649, Myrtle Creek, Ore. 97457.

PA PROJECT

The aim of acquisition of competence through affective learning in Churchill Area School District is to train teachers to implement a systematic curricular-based, affective education program from K-12. This program is a preventative mental health project to develop greater competence in students to deal with emotional stress, increase cognitive achievement by affective participation and decrease students developing psychological and social disturbances. The commitment of classtime for sequential learning in affective development has been accomplished and will remain a part of the school system from K-12 because 100 per cent of the elementary teachers are implementing the program at an adequate level for the first year. Local personnel are prepared to train additional teachers as they move into the system, insuring program continuation. Contact: Joan Carnevale, 4240 Greensboro Pike, Pittsburgh, Pa. 15221.

AL PROJECT	In January, 1972, the state board of education adopted a number of significant resolutions designed to improve teacher certification and teacher preparation. Pilot programs were established and included the state department of education, Auburn University and ten local school systems. Four objectives were identified for the first year teacher pilot project as follows: (1) to provide professional assistance to first year teachers to enhance opportunities for success; (2) to assist the school district in which the first year teachers are located in developing and implementing the systemwide professional inservice development program which the state board of education requires; (3) to utilize evaluative data gained through the pilot project and inservice program to improve preservice and inservice teacher education at Auburn University, employing performance-centered models in so doing; (4) to develop a model or models for assisting other school systems and teacher education institutions as they carry out the state board mandates. Contact: J. C. Blair, Director, Division of Instruction, State Department of Education.	teachers certification training
AL PROJECT	The approved program approach to teacher education and certification has been in effect since August, 1973, when the state board of education adopted standards to review programs. The state superintendent of education appoints review teams representing various segments of the profession to conduct evaluative studies of teacher education programs. Advisers in the teacher education and professional development section provide consultative and liaison services as institutions develop self-studies and coordinate the onsite visits of review teams. The review teams use the standards for direction in the development of evaluation reports. A companion guide composed of analysis forms was formulated to assist the education staff in developing the institutional self-study to which the standards are applied. Contact: J. C. Blair, Director, Division of Instruction, State Department of Education.	teacher certification education

CT HB 5050
PA 331 (Substitute) An act concerning teacher certification to establish a system of teacher certification based on demonstrated competency. Concerning teacher certification providing for the regular observation, guidance and evaluation of teachers holding provisional certificates and establishing requirements for provisional and standard teaching certificates. State board of education authorized to issue certificates of qualification. Establishes requirements for ten year provisional teaching certificate rather than five years. Holder to be evaluated regularly during period of employment. Standard certificate requirements include 30 credit hours beyond baccalaureate degree, (may consist of graduate, undergraduate or inservice training and may be taken at different institutions) including approved inservice programs as approved by provisional teacher's supervisor, state board, superintendent or his agent. Standard certificates granted to those fulfilling educational requirements above and competency recommendation from superintendent or district. In addition, the act gives a teacher who is denied a standard certificate the right to appeal to the state board of education and lists the causes for which a standard certificate may be revoked. This act adds to the statutes certain provisions defining provisional and standard certificates previously contained in department of education regulations and directs the department to issue new regulations. Reference to alternate paths to teacher certification is deleted from the statutes.

GA PROJECT Competency-based teacher certification. In 1972,
the state superintendent announced that one of the
23 missions of the department of education was to
certify educational personnel on the basis of
demonstrated competency. The December, 1973 report
of the minimum foundation program of education study
committee recommended that a competency-based tenure
system be established for teachers. In 1974, the
general assembly added the concept of competency
to the certification and classification section of
the adequate program act authorizing the state board
to classify teachers and other certificated pro-
fessional personnel on the basis of academic,
technical and professional training and experience
and competency. During 1974, the department of
education funded six projects concerned with
identifying, verifying and validating competencies,
and with developing assessment procedures for
educational personnel.

- SC ACTIVITY The state board of education voted unanimously to discontinue using National Teacher Examinations scores as one of several salary factors, effective in 1974-75. The board adopted all major recommendations of a 37 member study committee. The National Teacher Examinations, or a similar test, will be retained as a requirement if initial certification. The board also approved the use of national standards in approving teacher education programs. The state department of education established a new education personnel information service for school districts. The system is designed to give districts and prospective teachers timely information about employment needs and opportunities throughout the state.
- SD HB 518 Adds a new section to professional practices
Sec 13-13 commission to appoint an executive secretary and
et al other personnel. Reenacted to provide for professional practices commission of 11 members, five teachers, one state board of education member, one superintendent, two principals, one from general public not one of the above, but a parent of a school child. Reenacted to place professional practices commission in department of elementary and secondary education but retaining its functions including administration; requires reports as required by the state board of education, at least annually. Reenacted to set staggered three year terms; no member can succeed himself more than once; appointed by the governor. Repeals professional practices local committee. Reenacted to provide for rules and regulations under 1-26 (administrative procedures act) and to adopt a code of ethics; may make recommendations to state board of education or local school boards to promote improvement in teaching profession. Reenacted to require local school board to adopt evaluation policy for teachers, copy to department of elementary and secondary education; if board does not comply by July 1, 1975, professional practices commission will promulgate an evaluation policy for such board. Repeals section that is contained in 13-43-26 as reenacted, but also omits merit pay and incentive pay study requirement on local committee. Reenacted to provide notice and hearing in contested case under 1-26 (administrative procedures act); professional practices commission has authority to reprimand or to recommend a disciplinary action which may be implemented by a governing body when teacher violates code of ethics. Complete rewrite of the original bill submitted by the interim education committee. Authority for certification has been removed and the responsibilities of the state commission were redefined. Gives authority for an evaluation policy to the state professional practices commission instead of the state board of education.

IN IWR 431 The advisory council on teacher education and certification, the state board of education and the certification study team funded in the education budget are requested to give serious consideration to the merits of the following: (1) changing the certification standards for elementary teachers to require an increased amount of training in the techniques and skills of teaching reading; (2) requiring students seeking certification to perform meaningful duties in an internship capacity in lieu of or in addition to the present student teaching program; (3) requiring students seeking certification to teach at the elementary and secondary levels to perform their student teaching no later than their junior year in college; (4) reducing the emphasis on theory and methods courses and increasing the emphasis on the number of courses in the teacher's particular subject area, especially for those preparing to become junior high and senior high school teachers; (5) requiring college instructors who are teaching students to become teachers to have considerable personnel experience in the areas which they teach others; (6) establishing some type of exchange program requiring college instructors who are teaching students to teach to periodically spend a year actually teaching in the public schools; and (7) establishing a meaningful certification program for college instructors.

Instead, public employment relations board may conduct a hearing on the fact finder's report and the school board may then exercise its statutory authority to determine terms and conditions of employment for the next school year.	personnel school district collective bargaining
PA	ACTIVITY	A collective bargaining agreement between the Association of Pennsylvania State College and University Faculty and the Commonwealth of Pennsylvania (effective September 1, 1974) include the following provisions: (1) distinguished faculty award programs for teaching excellence and exceptional academic service that involve, as evaluators, distinguished educators from faculties other than those of the state colleges. This replaces a traditional merit awards program that simply added extra base salary to 10 per cent of the faculty each year; (2) a two year nonretrenchment policy for regular full time faculty that commits the faculty to a redistribution of existing faculty resources for new academic programs aimed at increasing	collective bargaining tenure evaluation postsecondary

PA	ACTIVITY	(Continued) enrollments; (3) a new function focused on equal opportunity in sports especially insuring complete equity for women students; (4) new promotion policies and procedures that make public the differentiating characteristics of academic rank in the various disciplines; (5) a tenure commission that will document the current tenure decision making processes and issues an advisory report with recommendations for change for future use by the presidents; (6) a totally new process of faculty evaluation involving peers, students and administrators that covers both tenured and nontenured faculty and uses the most successful modern techniques of performance review. Contact: Robert Gaylor, Director, Labor Relations, Department of Education.	
PA	STUDY	Pennsylvania School Boards Association research and management studies. Annual surveys are conducted in the following areas: strike survey which includes number of strikes, duration, number of students affected, number of man days and student days lost; salary studies: (a) professional staff salary data by district, (b) salary distribution for position classification, and (c) currently underway is a survey of classified staff salary data. Contact: Joseph V. Oravitz, Director of Research, Pennsylvania School Boards Association, 412 N. Second St., Harrisburg, Pa. 17101.	personnel strikes salaries
RI	SB 236-4 Ch 113	Allows school committees to hold closed meetings when discussing collective bargaining matters.	personnel school board collective bargaining closed meetings
RI	SB 2445 Ch 189	Allows wage assignments as a result of collective bargaining agreement; permits wage deductions as a result of collective bargaining contracts for purposes of defraying legal fees or contributions to a prepaid legal plan.	personnel collective bargaining
SD	HB 600	Provides for continuous recognition of a employee organization until questioned or challenged as provided in the public employees negotiations law. It shall be unlawful to discharge or otherwise discriminate against an employee for the exercise of such rights and the governmental agency shall be required to meet and negotiate with the representatives of the employees at reasonable times in connection with such grievance procedures and conditions of employment. It shall be unlawful for any person(s) to intimidate or coerce any public employee to join or refrain from joining a labor or employee organization.	personnel collective bargaining discrimination
SD	SB 141	Provides collective bargaining rights and responsibilities for employers and employees not covered by the National Labor Relations Act, replacing SDCL 3-18-1 to 3-18-8.1 inclusive and 3-18-15.2 of the public employee's negotiations law but retaining the basic language and provisions of the current law.	personnel collective bargaining

WA SR 271

Community college collective bargaining. Committee on higher education requested to conduct a study of this issue, including, but not limited to: (1) the unique process of faculty negotiations at the community college level, in light of the dual authority structure of the system; (2) the appropriate roles of trustees, administrators and negotiating units in the community college district, as well as that of the state board of community college education; and (3) the question of the possible state interest in a statewide salary schedule. Committee on labor requested to cooperate in the study, bringing to bear its expertise in the broader field of labor relations in general. Committee on higher education authorized to hold hearings, take testimony and seek the expression of views from the full range of interests on this issue. Committee on higher education reports its findings, together with appropriate legislative recommendation before the convening of the legislature.

WA STUDY

Teacher negotiations. This subcommittee will prepare legislation for the 1975 legislature attempting to remedy the current labor strife in the common schools. They shall be meeting with the collective bargaining subcommittee of the house committee on labor. Contact: Edward Ellis, Chairman, Washington House Research Center.

WI AB 1543
Ch 236

Ratifies the tentative agreement negotiated between the state, department of administration and the Wisconsin Federation of Teachers covering employees in the education bargaining unit under the provisions of chapter 111 of the statutes.

WI STUDY

Special committee on collective bargaining impasses in public employment is studying ways to resolve contractual collective bargaining impasses between management and public employees. Contact: Dan Fernbach, Staff Attorney; Bonnie Reese, Executive Secretary, Wisconsin Joint Legislative Council.

Please address questions about this survey to Doris M. Ross, Department of Research and Information Services. (303) 893-5200

INSTRUCTIONS The descriptions of legislation on both sides of the attached pages have been Xeroxed from ECS file cards. We have filled in the boxes above each description with the information we have on hand. Please add the missing information for each description, using the example below as a guide (correct the description if necessary). If your organization publishes an education legislation summary, a copy of that document with appropriate additional information (per example) will serve in lieu of filling out the legislation part (SECTIONS I & Ia) of this survey. If you send us a summary, please return all of SECTION I with it, along with your responses to SECTIONS II & III.

ECS Research and Information Services

STATE	BILL NO.	STATUTE NO.	YR.	E	F	V	C	OTHER	No.	Fid.	Descriptor	Code
NJ	S 1196		74							I		
DESCRIPTION: Prescribes the procedure for negotiations in the event of a failure to resolve an impasse by mediation between a public employer and an exclusive representative.											governance	
											collective bargaining	
										III		
										IV		

EXPLANATION OF TERMS IN EXAMPLE ABOVE

STATUTE NO. If possible, please fill in this box with correct statute number of bill enacted.

E = ENACTED. Please check this box if bill was enacted, or if resolution, memorial or initiative was adopted.

F = FAILED. Please check this box if bill failed for any reason and will *not* be carried over to next year under the same bill number.

V = VETOED. Please check this box if *total* bill was vetoed by the governor.

C = CARRYOVER. Please check this box if bill will be carried over to next year under the same bill number. Do *not* use this box for bills which will be reintroduced next year under another number.

OTHER means any other disposition of the bill. Please fill in with appropriate word.

No. - Fid. - Descriptor - Code. Ignore this, it is for inhouse use only.

DESCRIPTION. The bill descriptions on the following pages are necessarily brief. However, if you feel any of them to be inadequate or if a request for more information appears at the end of a description, we would appreciate your additions or corrections.

Education Commission of the States

The Education Commission of the States is a nonprofit organization formed by interstate compact in 1966. Forty-five states, Puerto Rico and the Virgin Islands are now members. Its goal is to further a working relationship among governors, state legislators and educators for the improvement of education. This report is an outcome of one of many Commission undertakings at all levels of education. The Commission offices are located at 300 Lincoln Tower, 1860 Lincoln Street, Denver, Colorado 80203.
