ABSTRACT
                 Activities of the final ten months of a 30-month
project to establish a statewide information service network for
Pennsylvania as a model for other states are reported and analyzed.
Major objectives are said to have been accomplished with
establishment of the network serving 468 local school districts
through 24 intermediate units, and through cooperative activities
with four other states. Final activities of the project in line with
each objective are described, and major departures from the
objectives explained. Appendixes include survey forms and other
relevant documents. (SK)

Training Project

FINAL REPORT

GRANT #OEG-0-71-3879

PERIOD 6/15/71 - 12/31/73

2

TABLE OF CONTENTS

INTRODUCTION

This final report concludes the Research and Information Services for Education Training Project (OEG-0-71-3879) which began under the auspices of the National Center for Educational Communication of the United States Office of Education and was subsequently transferred to the National Institute of Education. While the original project was initially scheduled for 18 months beginning June 15, 1971, at a cost of $65,000, the project was subsequently extended to December 31, 1973 (total project period of 30 months) with an increase of $13,000 for a total cost of $78,000.

In addition to frequent phone contacts between the project director and the federal government's project officer, as well as meetings at mutually attended conferences, activities of this project have been reported in previous Progress Reports as follows:

Progress Report I: submitted August 30, 1971; 26 pages including appendices

Progress Report II: submitted December 31, 1971; 56 pages including appendices

Supplement to Progress Report II: submitted December 31, 1971; 196 pages

Interim Report on Training Provided to Washington, D.C.: submitted February 29, 1972; 34 pages

Progress Report III: submitted February 15, 1973; approximately 200 pages

In addition to these reports, other documentation on overall R.I.S.E. developments including the R.I.S.E. Monthly Report on Utilization were submitted regularly. Important special publications included:

Notes on Establishing an ERIC Educational Information Center (ED 065 736)

Center Sources: A Collection of Materials Currently in Use by
    Educational Information Centers (ED 076 222)

Profiles of Educational Information Centers; September 19, 1972

Because these documents are presently on file with N.I.E. and because
they were incremental in development, this Final Report reflects project
activities in the last 10 months of the project.

In our estimation, the major objective of the R.I.S.E. Training Project
was the establishment of a state-wide information service network using the
Intermediate Units. This has been accomplished. For the 1974-75 school
year, 24 Intermediate Units and, through them, 468 local districts are
participating in R.I.S.E. services and paying for a portion of the costs.
Growth in usage has approched a consistency of 80% increase per year.

The second major objective of the project was the provision of
training assistance to other states as they built their capacity to provide
information services. While the direct effects of R.I.S.E. efforts in
this area are more difficult to ascertain, it is apparent that activities
in Kansas, Texas, Iowa and at A.C.E.S. in Connecticut have benefited from
R.I.S.E. experiences. A much larger potential audience was undercut by the
aborting of the proposed Extension Agent system of N.C.E.C. in June of 1972.
However, new initiatives from N.I.E. for fiscal years 1975 and 1976 may assist
in providing a belated but fertile ground for the use of R.I.S.E. training
materials.

SUMMARY

MAJOR ACTIVITIES OF THE TRAINING PROJECT

Objective 1 - "To design and implement an information needs and characteristics

analysis, directed toward educators in the Commonwealth of Pennsylvania."

Emphasis upon the User Analysis component (Objective 1) was to have been the introductory thrust of this project. Having learned that the National Center for Educational Communication had scheduled a national conference, upon the agenda of which was included User Analysis, we limited initiatory activities to consideration of - and decisions concerning - the logistics of data collection and analysis, population determination, and related areas. Consultation with, and assistance from, the Pennsylvania Department of Education's Bureaus of Educational Quality Assessment and Research permitted the determination of a state-approved sample population. In addition, R.I.S.E. conducted an in-house search of the literature concerning user needs and analysis (See Appendix A, Progress Report #1). In view of the state-oriented component of the project, Intermediate Uni Resource Utilization Specialists were the logical choice as field agents for the collection of data.

Following discussions with Colin Mick (Institute for Communication and Research, Stanford University), during and after the N. C. E. C. Silver Spring (Md.) Conference (September, 1971), procedural and cost feasibility considerations led to the decision to establish a data base by separate analysis of Pennsylvania data collected for, and used in, the Stanford University National Information Sensing Project study (See Appendix I, Progress Report #2).

Our participation in, and coordination with the Stanford study gave us a functional data base, which we received in late September, 1972. Timing problems (detailed in Progress Report #3) caused us to be concerned about the depth of detail contained in the Pennsylvania findings--and concurrent apprehension concerning the extent to which they permitted us to fulfill our obligations to the Training Project contract. (See related items in Appendix I, Project Report #3.) That apprehension led to the inclusion of follow-up user analysis activity as an objective for the agreed extension of the Training Project contract.

The user analysis follow-up was conducted during the extension phase of the Training Project. The resultant updated and expanded data base allows a higher confidence level concerning developmental and growth activities at R.I.S.E. As well, it removes any doubts R.I.S.E. has concerning the fulfillment of contract obligations. Appropriate materials and reports related to the R.I.S.E. "Information Needs Survey" are included in Appendix I of this final report.

In addition to that activity, R.I.S.E. has implemented an informal "user evaluation response" procedure which permits periodic updating, and assures increased item accuracy for future user needs analysis surveys (See Appendix I).

Objective 2 - To provide for the extension and expansion of an existing model information center (Project R.I.S.E.) to a wider geographical service area - providing leadership in the delivery of responsive information services throughout the Commonwealth of Pennsylvania.

Project Report #3 submitted a complete growth history, in verbal

format. The reader is referred to that document. Non-participating

Intermediate Units have been reduced from seven to five in the interim

period.

Submitted herewith (Appendix II) is a tabular record of the growth

of R.I.S.E. services to school personnel in Pennsylvania.

Objective 3 - To develop and execute a training program with appropriate

materials and simulations for acquainting Resource Utilization Specialists

from each Intermediate Unit with the processes of Information storage and

retrieval, and to enable each Specialist to carry out the "question

negotiation" services for the local school districts in his Intermediate Unit.

The following chronology of progress toward this objective summarizes

the specific descriptive reporting of Progress Reports #1, #2 and #3:

1971

June 22-25 - Project Director outlined proposed "Responsive Information
Services Network" to Executive Directors of Pennsylvania's
29 Intermediate Units.

Aug. 2 -   Don Carroll, Assistant Commissioner, Basic Education, Pennsyl-
vania Department of Education (P.D.E.), officially announced
the establishment of a "state-wide educational information
network" - and the Resource Utilization Specialist (RUS)
Training Program.

Aug. 11 -   R.I.S.E. made presentation to Intermediate Unit (I.U.) #16

personnel (staff and superintendents) in order to acquaint

district personnel with the information network, and RUS concepts.

Aug. 20 -   Official participation invitation was sent to each I.U. reques-

ting appointment of candidate for RUS training and announcing

intent to conduct three 1½ day RUS training sessions. (See

Appendix B, Progress Report #1).

October -   First RUS Training Workshop conducted. (See "Supplement to

Progress Report #2.)

Dec. 6 -   Presentation of Position Paper regarding services to Intermediate

Units, to I.U. Executive Directors, and establishment of costs

for such services. (See Appendix II, Progress Report #2.)

Dec. 8 -   Position paper was submitted to RUS's, intra-group discussion

was requested, and deadline for preliminary "intent to participate"

was established. (See Appendix III, Progress Report #2.)

1972

April 13, 14 Twin RUS Training Workshop(s) #2 conducted (See Appendix III,
17, 18   Progress Report #3).

May/Dec. - Onsite (I.U.) Workshops for key I.U. personnel and local district

representatives as invited and/or nominated by the I.U. (See

Appendix III, Progress Report #3).

During the contract extension period, two additional RUS Training

Workshops were conducted.

(A)   On January 23 and 24, 1973, R.I.S.E. conducted a program which

concentrated upon orientation and introductory training of new RUS personnel

as well as selected personnel from the Pennsylvania Department of Education, and upon reinforcement and extension skills activity for others. The program for that session and related materials are included in Appendix III. Note that specific invitations were sent to Executive Directors of the seven I.U.'s which were not as yet participating, urging that each send an observer to the session(s).

(B) A new feature was included in the RUS Training Workshop on July 17-18, 1973. R.I.S.E., responding to a need expressed by several RUS's, included their secretaries in the session, and conducted program activities geared specifically to their needs. One highlight of the workshop was a presentation by Dr. Charles Mojkowski, Project Manager, Rhode Island Education Information Center. Dr. Mojkowski discussed the Rhode Island "extension agent" model, and the integration of information services into the agent's field service activity. Program and related materials are included in Appendix III.

Subsequent to the terminal date of the contracted Training Project, R.I.S.E. has conducted two additional RUS workshops. We intend to continue this service to I.U.'s and the P.D.E. to the extent that time and budget permit. Orientation visits to R.I.S.E. by personnel from those agencies will be accomodated as need dictates.

Objective 4 - To provide site visit and training services for system operators from other states in order to assure better acquisition of materials and development of broader kinds of expertise in user needs analyses, acquisition of resources, technical processing of information, storage and retrieval, literature searching, question negotiation, evaluation of information services and products, and management services.

Progres' toward this objective was reported extensively, and in depth, in Progress Report #3.

The major problem cited by R.I.S.E. in that report was related to this objective. Though the Downingtown "National Conference of Educational Information Centers" merited and received high evaluation, the nature of participants' needs and the progress levels of the centers represented were such that a complete operations manual could not be created -- although a "Center Resources" document provided a guide for problem solution during the formative activities of emerging centers, as well as for those in the early operational stages (Full materials on the Conference were included in Progress Report #3).

The value of the interpersonal and problem-centered discussion activity of the Downingtown conference, coupled with uncertainty concerning duplication of "operations manual" effort by the R.I.S.E. and Stanford Training Projects, led to the decision to concentrate project activity and resources during the extension period upon a follow-up conference of state center personnel, on-site assistance to developing centers, and hosting out-of-state center personnel for general orientation and inquiry-negotiations training.

(A)   R.I.S.E. hosted the second National Educational Information Center Conference on December 11-12, 1973 at the Holiday Inn, King of Prussia, Pa. Nineteen persons, representing thirteen different state and local centers, and Dr. John Coulson, representing National Institute of Education (N.I.E.), were present.

In preliminary discussions with potential conferees, R.I.S.E. found commonality of a felt need to discuss, with colleagues, certain current

issues of concern related to operation, data bases, other resources, etc.
This led to our decision to concentrate activities in that direction, and
no outside speakers or presentational activities were planned. In preparation, R.I.S.E. distributed an open-ended list of potential discussion areas
-- in the same mailing as the conference plans, arrangements, and registration
forms -- to be rated on an interest scale and returned with registration
materials. The responses, prioritized, determined the conference agenda
and are listed in "Highlights of Proceedings" (See Appendix IV).

The opening review of new center activities, as reported by each Director,
provided new operational ideas to peers -- including private industry as a
"fertile" new client base, and coordination with local and TV cable and computer
resources. Significant preliminary decisions -- including that to support and
assist ERIC by document submission and other efforts, shared resource development and exchange, and product standardization -- are also reported in "Highlights of Proceedings".

One development of the conference was a "conference phone" discussion
with Mr. Ray Peterson, Secretary to the CCSSO, who was unable to attend, and
a representative group of directors, headed by Mr. Greg Benson (NYIC). The
call was initiated because of certain expressed needs related to coordination
of continuing dissemination efforts. As well, the group recognized the need
for an established (or newly created) agency to promote and coordinate a
network of educational information centers. An edited transcript of a tape
of that activity is included with this report. (See Appendix IV.)

(B) On December 5, 1973, a group of R.I.S.E. personnel visited North Haven,
Connecticut and conducted a one-day orientation and training session for

personnel from the Area Cooperative Educational Services unit. A. C. E. S.

Educational Resources Center personnel were given a DIALCG demonstration,

a review of the question negotiation process, and an opportunity to play

roles as a (a) client and (b) RUS. Each   n a critique of his/her

performance in those roles.

An outline of activities is included in Appendix IV of this report.

(C)   As well, R.I.S.E. hosted several out-of-state groups at the R.I.S.E.

site.   The expressed needs of the visiting groups determined the activities.

However, general orientation, techniques of question negotiatic , and

information search skills development - or reinforcement - were modal.

Objective 5 - To design a strategy to establish a network of educational

"change agents" at the state, regional, and local levels of education in

Pennsylvania.   (Revised in Addendum to Original Proposai.)

As indicated in Progress Report #3, the programmatic thrust changes

which resulted from transfer of N. C. E. C. to N. I. E.. and the still

unresolved preliminary decision, by the Secretary of Education of Pennsylvania,

to explore the potential for use of the linker/extension agent role for his

regional field officers, have created the necessity for R.I.S.E. to maintain

a "be prepared" posture concerning this objective. R.I.S.E. is, we believe,

prepared to make some concrete moves at such time as substantive decisions

are made at state level.

<u>Objective 6</u> - (Original Proposal) To provide a field setting for the pilot testing of varied storage and retrieval hardware and software in order to enable system operators to make empirical judgments regarding cost-effectiveness of available system components. (Revised in Addendum.)

Microfilming - R.I.S.E. acquisitions were reported in Progress Report #3. Since acquiring microfilming and related duplication hardware, R.I.S.E. has generated several packages for microfiche and/or hard copy duplication (including instructional UNIPACs, indexed search inventories and updates, etc.) (See Appendix V.) The distribution of microfiche copy to RUS in the various Intermediate Units has, however, been inhibited by the absence of hardware at I. U. level which will convert microfiche to hard copy when desired. The practice shows promise, however. Having reviewed information in microfiche form, the client is able to be exclusive as he/she requests hard copy duplication by R.I.S.E. This equipment is, in our opinion, cost feasible - and an operational necessity!

RemKard Retrieval System - As previously reported, R.I.S.E. acquisition of a RemKard Retrieval System unit made a significant contribution to search and duplication activities. This unit stores abstracts of ERIC documents (and others), locates and displays abstracts upon keyboard call, and generates a hard copy print upon operator request. Time spent in retrieval and duplication was reduced dramatically when the unit became operational. The system (examined, quite often, by visitors to R.I.S.E. from other information systems) enabled other information center personnel to make value judgments concerning its desirability for inclusion in operational configuration.

As RemKard usage progressed, R.I.S.E. found two major problem areas-- one anticipated, the other not.

R.I.S.E., as it considered installation, anticipated that the storage limit of the unit was not compatible with the rate of ERIC abstract growth. The manufacturer's representative assured us that an expansion of storage capacity would be possible, when needed. Now, after approximately three years of operation, with ERIC abstracts increasing at an approximate 1000 per month (10 microfiche units) rate -- maximum storage has been reached and each new monthly abstract issue requires the deletion of an equivalent number of earlier issue microfiche. The suggested remedies are not entirely satisfactory. (A) The addition of another print-capable unit is not cost feasible. (B) The addition of one or more "read only" units to work in conjunction with one "read-print" unit is of questionable operational efficiency.

Note: We continue to use the single "read-print" unit, but the incidence of demand for deleted abstracts increases in proportion to the accumulation of microfiche deletions. Each month's update precludes a decrease in operational efficiency. Eventually, the decrease in system efficiency will force us to add a "read only" unit; that addition will -- at least for a period of time -- solve our "search" resource depletion probl-- However, the "work flow" interruptions (posed by the necessity to use a separate printer for the abstracts which are stored "read only") will continue to increase in monthly increments.

The technical-mechanical efficiency of the "print" phase of the System has not been completely satisfactory. Upon occasion the microfiche negative has been damaged in the process. Generating "hard" copies has been interrupted by frequent mechanical failures -- and service delays.

MAJOR DEPARTURES

Major departures in the project were reported in Progress Reports #2 and #3. No major departures were necessary during the project extension period. Departures noted over the life of the project were:

(A) The revision of Objectives 5 and 6 to allow the project to coordinate more closely with the developments in the United States Office of Education and the Pennsylvania Department of Education. (Reported at length in Progress Report #2.)

(B) R.I.S.E. expanded its activities, with U.S.O.E. concurrence, to include provision of logistic and moderator support for a conference, held August 15-16, 1972, in Washington, D.C. which aimed toward the development of an evaluation protocol for educational extension programs. (Reported in Progress Report #3.)

(C) R.I.S.E. also, with approval, initiated the development of a "primer" for establishing and ERIC collection in conjunction with the establishment of an information center. After editing, the document was included in the ERIC collection as <u>Technical Notes on the ERIC Collection</u> (ED 065 736). This was also reported in Progress Report #3.

PROBLEMS

<u>Actual</u> - R.I.S.E. was fortunate to have completed the project funding period with no major problems related to current project operation. Certain adjustments had to be made because of policy uncertainties at USOE and PDE levels, but nothing that constituted a serious impediment to the general mission of the

project. We wish that the linker/extension agent sub-thrust of the project
could have included more developmental activity and less planning activity.
However, R.I.S.E. is prepared to initiate implementation activities should
the Pennsylvania Secretary of Education decide to move on his preliminary
plans to implement a network of PDE Field Agents.

Anticipated - Two problem areas dominate our thinking concerning continued growth
of Educational Information Services Centers, generally, and the continued
growth of such services in the Commonwealth of Pennsylvania, in particular.
(A)   The two national Conferences of Educational Information Centers were, by
participant evaluation, extremely helpful, both to emerging centers and to
those which were in varying stages of continuing operation. It is highly
desirable th.t the problems of development and operation be discussed among
center personnel from all areas of the nation, in order that there be a
coordinated approach toward problem solutions and shared refinement of on-
going center operations. Should this coordination and communication not be
provided for, in some manner, we fear that the development of a network of
cost-feasible educational information centers will suffer.
(B)   In Pennsylvania, the RUS program to implement educational information
services through the several Intermediate Units has progressed very satis-
factorily under "project" leadership. It has continued under R.I.S.E.
leadership, with cooperation from PDE, beyond the project period. Field
demands for educational information continue to grow, but the growth is
concentrated in less than a majority of the I.U.'s. RUS's, as a rule, are
handling their information-related duties in addition to full previously
assigned work loads. R I.S.E. fears that current budget realities will

preclude I.U. acquisition of adequate personnel to handle growing demands
for information services across the state. The pattern appears to be
developing.

R.I.S.E. is confident that, given an opportunity to develop more
universally, and over a longer period of time, the value of information
services will be sufficiently well recognized to allow them to compete with
more established functions for the I.U. budget dollar. We fear, however, that
adequate geographical coverage will not eventuate, given the present stage
of development. We believe that another year or two of partially subsidized
development and implementation activities -- involving progressive withdrawal
of non-local fiscal support -- would eliminate geographic coverage uncertain-
ties, as well as those related to local fiscal value-judgments.

SIGNIFICANT FINDINGS AND EVENTS

Other than the findings submitted in Progress Report #3 (and developed
further in this report) concerning the practicality of statewide educational
information dissemination networks, R.I.S.E. wishes to report only one item
which surfaced during the extension period.

Discussions and developments at the "follow-up" National Conference,
conducted on December 11-12, 1973, at King of Prussia, verify the existence
of a tendency for individual centers to become overly idiosyncratic. The fact
that this tendency could be expected does not negate the necessity for
preventive coordination. Arrangements for continuing inter-center communication

and collaboration are prerequisite to optimum national network effort results --
and should be so considered!

The most significant of the events which transpired during the extension
period was the December 11-12, 1973 "follow-up" National Conference of
Educational Information Systems.

DISSEMINATION ACTIVITIES

Dissemination activities were reported at length in Progress Report #3.
Extension period activity continued the same patterns of personal contact,
direct personal communication, and printed dissemination materials. In
addition, R.I.S.E. personnel made significant "awareness" contributions to the
needs which surfaced during the December Conference, and which precipitated
certain dissemination-related follow-up effort and activity -- in conjunction
with NIE and CCSSO.

PLANNED ACTIVITY FOR THE NEXT THREE MONTHS

The project having been terminated, no direct "project" activities
are planned. R.I.S.E. will, however, continue the development and refine-
ment of project-initiated and project-precipitated activities to the extent
that budget and other fiscal considerations permit. R.I.S.E. believes that

maintenance of existing levels of service and training within the state were
assured by project strategies. We will continue to seek further avenues of
support in order to permit extension of existing levels.

OTHER COMMENTS

(A)   We are pleased with the progress achieved under this grant. The value
of educational information centers has been recognized at the state level --
and in several other states. Two additional years of developmental service
should "establish" the concept, and permit it to become a firm part of the
state system.

(B)   We urge that N.I.E. continue developmental and implementation support
for an educational information center network -- either directly, or through
an agent. The "concept" has been proven. More "seed" support, with synergistic
guidance, would -- we believe -- assure a visible research usage component
in the total national educational effort.

YOU'RE RIGHT, ANOTHER SURVEY BUT PLEASE . . .

- Goals
- Objectives
- Priorities
- Needs

R.I.S.E.
Educational Information Needs
Survey

Education is continuously faced with an expanding spectrum of roles and responsibilities, whether sought by educators or thrust upon them by society. Because of contraints on human and financial resources, educators must frequently choose from among a variety of endeavors. This process results in the establishment of goals, objectives, priorities, and/or needs.

In Pennsylvania, this process operates at the local district, intermediate unit and state levels. For example, at the state level, the Ten Goals of Quality Education and Secretary Pittenger's Priorities serve as the current basis of educational policy-making and activities.

R.I.S.E NEEDS YOUR HELP!

As a recipient of the R.I.S.E. newsletter, you are aware of R.I.S.E. services in the area of educational information dissemination. We need your help in identifying specific educational issues of broad general interest, i.e, help us set priorities. On the basis of your input we tentatively plan to create a series of special information packages which will provide information usable by a broad clientele. In this way we feel we can more efficiently meet the information needs of educators in the Commonwealth.

Won't you please take a few minutes to complete the following survey and return it as soon as possible in the enclosed pre-addressed envelope? We thank you in advance for your cooperation.

Richard R. Brickley
Project Director

R.I.S.E. Educational Information Needs Survey

Directions: For each question below, please check those of which you need more information. Space has been provided for you to add your own topics/issues. Please return the completed survey to R.I.S. in the enclosed pre-addressed envelope.

1. For which five of the following do you need a general information package?
   ____ (a)   Bilingual Education, ESL
   ____ (b)   Educational Accountability
   ____ (c)   In-service Education of School Personnel
   ____ (d)   Evaluation of Professional Staff
   ____ (e)   Programs to Improve Performance on Educational Quality Assessment

(over)

——— (f)   Open Space Education
——— (g)   Year Round Schools
——— (h)   Community Involvement
——— (i)   Field Experiences/Alternative Programs/ Learning Outside the
            Classroom
——— (j)   Competency Based Curriculum
——— (k)   Student Rights and Responsibilities
——— (l)   Law and Consumer Education
——— (m)   Environmental Education
——— (n)   Career Education
——— (o)   Needs Assessment
——— (p)   _____
——— (q)   _____
——— (r)   _____

2. Which five of the following types of materials would be useful to you in re-
   ference to information needs checked above?
   ——— (a)   bibliographies
   ——— (b)   reviews of the literature
   ——— (c)   state-of-the-art papers
   ——— (d)   descriptions of programs in operation
   ——— (e)   lists of materials (commercial)
   ——— (f)   sample units
   ——— (g)   sample lessions
   ——— (h)   LAPS (learning activity packages)
   ——— (i)   mini-courses
   ——— (j)   behavioral objectives
   ——— (k)   classroom activities
   ——— (l)   research reports
   ——— (m)   list of human resources (consultants or people experienced in the
             topical area)
   ——— (n)   concept paper (brief definition papers)
   ——— (o)   evaluation designs
   ——— (p)   _____
   ——— (q)   _____
   ——— (r)   _____

3. Have you ever used ERIC (Educational Resources Information Center)
   materials?
   ——— yes   ——— no

4. Have you ever used R.I.S.E. services? ——— yes   ——— no. If yes, what
   type?
   ——— original search
   ——— duplicate search
   ——— selective response

WHAT INFORMATION DO EDUCATORS NEED?

A Summary of an Informal Educational
Information Needs Survey of Selected
Educators in Pennsylvania

February 1974

TABLE OF CONTENTS

25

INTRODUCTION:

This document seeks to provide interested persons with an amplification
of the results of an informal educational information needs assessment con-
ducted by Research and Information Services for Education (R.I.S.E.) in the
Fall of 1973. The reader is cautioned from generalizing toward universal
conclusions from the data; the survey is understandably open to criticism
regarding its statistical and empirical rigor. Nevertheless, R.I.S.E. has
had a number of requests relating to the survey, generally from those who
reviewed the brief summary in the January 1974 R.I.S.E. newsletter (Vol. 5,
No. 3). Because we plan to conduct similar surveys in the future, comments
and suggestions are welcomed.

PURPOSE:

The purpose of the survey was to enlist the aid of practitioners in
identifying specific educational issues of broad general interest to assist
R.I.S.E. staff in selecting topics appropriate for a series of special
information packages to be made available on a mass basis. Unlike many
other information centers around the country, R.I.S.E. has not, in the
past, concentrated on pre-packaged information products for off-the-shelf
dissemination to users, concentrating instead on individualized tailored
responses drawn from current educational literature and existing practice.
R.I.S.E. had previously participated in a national needs survey conducted
by William Paisley et al., Stanford, in conjunction with the National In-
stitute of Education (Final Report on file at R.I.S.E.). Though that study
corroborated a number of assumptions of R.I.S.E. staff, it provided only
limited directions for R.I.S.E. staff on the questions at hand. In brief,
the purpose of the R.I.S.E. Educational Information Needs Survey was to
answer the following primary questions:

> 1. What are the current high-interest topics of the broad
>   user community served by R.I.S.E.?
>
> 2. Is there a clear difference among the types of
>   interests indicated by practitioner role type?
>
> 3. From the currently feasible range of product formats,
>   which seem to be preferred?

SURVEY QUESTIONNAIRE AND PROCEDURE:

A number of constraints impinged on the survey procedure. R.I.S.E.
was sensitive to the saturation of most practitioners with surveys of all
types from national, state, regional, and local sources. (Indeed, in
the previous Stanford study, it was revealed that some teacher groups are
attempting to make responding to questionnaires a negotiable issue, i.e.,
extra pay for extra work). Therefore, brevity and informality along with
a clear, concise rationale and a straight-forward plea for help were con-
sidered in developing the instrument. Because of time constraints and
lack of budget, efforts were made to keep the directions simple; tabu-
lation was to be done manually; no follow-up of non-respondents was
planned. Respondents were not asked to identify themselves personally,
though they were asked to indicate their Positions (teacher, administrator,
etc.) and their Institutional Affiliation (IU, elementary school, middle
school, etc.).

The questionnaire consisted of five questions (See Figure 1). The first question asked the respondents to choose five (not ranked) topics for which they needed a general information package. The question provided fifteen topics with space for three write-in topics. The fifteen topics were chosen subjectively by R.I.S.E. staff to reflect currently popular or controversial issues based on ad hoc analysis of field contacts, contact with the Pennsylvania Department of Education, R.I.S.E. request history, and ESEA Title III funding priorities; further topics were chosen because they reflected recently announced priorities of the Secretary of Education. No attempt was made to rigorously define the topics, but terms of current usage in Pennsylvania were preferred over more national terms.

The second question required the respondent to identify types of materials (information product formats) which would be useful in relation to topics identified in question one. Terms used in this question were not defined but were limited to those in current usage by R.I.S.E. and representative of existing formats feasible for future expansion and within the capability of available R.I.S.E. data bases and/or human and financial resources. Again, opportunity for write-in was provided.

Questions 3, 4, and 5 were simply added to gather general information on the respondents' awareness of ERIC, past use of R.I.S.E. services, and microfiche receptivity and access to a complete ERIC fiche collection.

TARGET AUDIENCE:

The audience for the survey consisted of those 3000 educators on the R.I.S.E. newsletter mailing list as of September 1973. Though no attempt was made to apply sampling procedures, or to carefully control geographic or role type distribution, it was decided that the mailing list was sufficently broad to insure an acceptable (if unscientific) random selection of practitioners across the Commonwealth. Origin of the mailing list might be of interest here; two types emerge: those, who by virtue of belonging to a specific group for whom R.I.S.E. could easily acquire existing lists, and those who had had prior contact witn R.I.S.E. either as visitors to the center, or recipients cf R.I.S.E. services. Examples of the former include all chief school administrators of local districts (approximately 500), all ESEA Title III Directors (approximately 200) all Bureau of Planning and Evaluation, PDE, staff (approximately 50) etc., of the latter, requestors of original searches (approximately 500), graduate students from Philadelphia area universities who had visited R.I.S.E. as a class or as individuals (approximately 150), etc. It is important to note that many respondents may have fallen into a number of sub-groups and further that current procedures for updating the mailing list are primitive at best. R.I.S.E has experienced over the last 12 months an increase in contact with teachers and other non-administrative staff at the local level; 85% of services go to field personnel as opposed to state department, contract customers, higher education, and graduate students. The sub-group analysis as presented in the tables of this report are not intended to be representative of the Commonwealth as a whole.

Figure 1 - R.I.S.E. EDUCATIONAL INFORMATION NEEDS SURVEY

YOU'RE RIGHT, ANOTHER SURVEY, BUT PLEASE . . .

R.I.S.E.
Educational Information Needs
Survey

- Goals
- Objectives
- Priorities
- Needs

Education is continuously faced with an expanding spectrum of roles and responsibilities, whether sought by educators or thrust upon them by society. Because of contraints on human and financial resources, educators must frequently choose from among a variety of endeavors. This process results in the establishment of goals, objectives, priorities, and/or needs.

In Pennsylvania, this process operates at the local district, intermediate unit and state levels. For example, at the state level, the Ten Goals of Quality Education and Secretary Pittenger's Priorities serve as the current basis of educational policy-making and activities.

R.I.S.E. NEEDS YOUR HELP!

As a recipient of the R.I.S.E newsletter, you are aware of R.I.S.E. services in the area of educational information dissemination. We need your help in identifying specific educational issues of broad general interest, i.e., help us set priorities. On the basis of your input we tentatively plan to create a series of special information packages which will provide information usable by a broad clientele. In this way we feel we can more efficiently meet the information needs of educators in the Commonwealth.

Won't you please take a few minutes to complete the following survey and return it as soon as possible in the enclosed pre-addressed envelope? We thank you in advance for your cooperation.

R.chard R. Brickley
Project Director

R.I.S.E. Educational Information Needs Survey

Directions: For each question below, please check those of which you need more information Space has been provided for you to add your own topics/issues. Please return the completed survey to R.I.S.E. in the enclosed pre-addressed envelope.

1. For which five of the following do you need a general information package?

__ (a) Bilingual Education, ESL
__ (b) Educational Accountability
__ (c) In-service Education of School Personnel
__ (d) Evaluation of Professional Staff
__ (e) Programs to Improve Performance on Educational Quality Assessment

__ (f) Open Space Education
__ (g) Year Round Schools
__ (h) Community Involvement
__ (i) Field Experiences/Alternative Programs/ Learning Outside the Classroom
__ (j) Competency Based Curriculum
__ (k) Student Rights and Responsibilities
__ (l) Law and Consumer Education
__ (m) Environmental Education
__ (n) Career Education
__ (o) Needs Assessment
__ (p) _____
__ (q) _____
__ (r) _____

2. Which five of the following types of materials would be useful to you in reference to information needs checked above?

__ (a) bibliographies
__ (b) reviews of the literature
__ (c) state-of-the-art papers
__ (d) descriptions of programs in operation
__ (e) lists of materials (commercial)
__ (f) sample units
__ (g) sample lessons
__ (h) LAPS (learning activity packages)
__ (i) mini-courses
__ (j) behavioral objectives
__ (k) classroom activities
__ (l) research reports
__ (m) list of human resources (consultants or people experienced in the topical area)
__ (n) concept paper (brief definition papers)
__ (o) evaluation designs
__ (p) _____
__ (q) _____
__ (r) _____

3. Have you ever used ERIC (Educational Resources Information Center) materials?
___ yes ___ no

4. Have you ever used R.I.S.E. services? ___ yes ___ no. If yes, what type?
__ original search
__ duplicate search
__ selective response
__ bibliography
__ ready reference
__ UNIPAC
__ other

5. Do you have convenient access to the following?
a microfiche reader ___ yes ___ no
a complete ERIC collection ___ yes ___ no

Position (teacher, administrator, etc.) _____

Institutional Affiliation (IU, elementary school, middle school, etc.) _____

GENERAL FINDINGS:

The general findings of the survey are most fully represented in the tables included in this report. Of greatest interest to R.I.S.E. were the following indications:

- In-service, Evaluation, and Educational Accountability were of general high interest regardless of position type or agency affiliation.

- Though descriptions of operating projects ranked highest in terms of formats, literature based documentation with an evalutive or research orientation was also an acceptable format.

- As expected, the respondents to the questicnnaire were generally aware of information services rather than novice users, with over 2/3 indicating awareness of ERIC, access to microfiche equipment and prior users of R.I.S.E.

CONCLUSIONS:

Based on the results of the survey, R.I.S.E. is planning to produce at least three prepackaged information products on the topics of In-Service Education, Evaluation of Professional Staff and Educational Accountability. The packages shall provide review of the literature and descriptions of programs in progress, particularly in Pennsylvania. The results of this survey will be shared with Federal and State officials and other interested parties. It is likely that a similar, but improved survey will be conducted in the Fall of 1974.

Table I: Ranking of Topic Choices for General Information Package by Role of Educator

Topics	Aggregate ranking	Role Classification					
		A	T	RS	C	AS	SD
		(297)	Number of respondents

RESEARCH AND INFORMATION SERVICES FOR EDUCATIO

WHAT INFORMATION DO EDUCATORS NEED?

In a recent issue of the R.I.S.E. newsletter, recipients were asked to complete a survey on their information needs. Approximately 500 educators of all types responded to the questionnaire; an analysis of the results are summarized below:

Though only about 1/5 of the respondents indicated they had convenient access to a complete ERIC microfiche collection. 3/5 of the educators surveyed had used ERIC. Approximately 3/5 indicated they had convenient access to a microfiche reader or reader/printer and the same proportion had used at least one R.I.S.E. service format (i.e. original search, duplicate, etc.)

Dissemination studies conducted by various researchers have suggested that educators need information in different formats for their various purposes. Apparently the respondents, regardless of their role or agency affiliation share a preference for the following types of materials in rank order:

1. Descriptions of programs in operation
2. Reviews of the literature
3. Search reports
4. Evaluation designs
5. Sample (instructional) units

Sample lessons and lists of commercial materials were least preferred. One might hypothesize that in the case of the former instructional staff accept the professional responsibility for designing specific instructional activities, though they seek external ideas as to organizing such instruction. In the latter case, respondents apparently place little priority on sources of materials or have adequate means of determining the availability of same.

Of greatest interest to R.I.S.E. staff were the survey results relating to the topical areas for which the respondents indicated a need for more information. The results were analyzed according to position type as follows:

Position Type	Topics of Highest Interest
Administrators	Evaluation of Professional Staff; Inservice education of School Personnel; Educational Accountability; Field Experiences, Alternative Programs; Competency Based Curriculum
Teachers	Inservice Education of School Personnel; Competency Based Curriculum; Evaluation of Professional Staff; Field Experiences, Alternative Programs; Open Space Education
State Department Personnel	Programs to Improve Performance on Educational Quality Assessment; Inservice Education of School Personnel; Educational Accountability; Evaluation of Professional Staff, Needs Assessment
Regional Service	Evaluation of Professional Staff; Com-
Personnel (I.U.'s)	petency Based Curriculum; Needs Assessment; Inservice Education of School Personnel; Educational Accountability
Coordinators (Department Head - Supervisors)	Evaluation of Professional Staff; Inservice Education of School Personnel; Educational Accountability; Field Experiences, Alternative Programs; Competency Based Curriculum
Ancillary Services (Librarian, psychologist, guidance counselor)	Inservice Education of School Personnel; Career Education; Open Space Education; Year Round Schools; Evaluation of Professional Staff

As revealed above, inservice and staff evaluation are high interest topics among all the respondents. Interestingly, the latter also was indicated as the highest inservice need in a recent survey conducted among 8000 staff members by Montgomery County Intermediate Unit.

R.I.S.E. plans to follow-up on the results of this survey and will announce the availability of information packages on the high priority topics in future issues of the R I.S.E. newsletter. A more detailed analysis of the results is available on request from R.I.S.E. Thanks to all our readers who responded to the survey.

REQUESTING SERVICE:

Schools in participating Intermediate Units should place their request through the Resource Utilization Specialist in their respective Intermediate Unit. Montgomery County I. U. educators should call or write Mrs. Carolyn Trohoski at R.I.S.E. Please indicate your choice and enclose payment (if outside client) when ordering materials.

Outside clients are those who are not K-12 educators in participating Intermediate Units (examples - clients from higher education, educators in non-participating Intermediate Units, clients from other states.)

The options for obtaining search materials are as follows:

Duplicate search - Client receives complete duplicate of search package. Outside clients will be charged $25.00 or ten cents a page whichever is greater.

Selective Response - Client receives ten articles which he chooses from the search bibliography. Outside clients should remit $12.50 (10.00 for the selective response and $2.50 for the bibliography.)

Bibliographies - Client receives the search bibliography. Outside clients pay $2.50 per bibliography.

▽	▽	▽	▽	▽

1. To what extent did you find it easy to specify your topic with the person
handling your request?
   ☐   ☐   ☐   ☐   ☐

2. To what extent was your topic adequately covered by the R.I.S.E.
information package?
   ☐   ☐   ☐   ☐   ☐

3. To what extent did the information sent by R.I.S.E. increase your understanding
of the requested topic?
   ☐   ☐   ☐   ☐   ☐

4. To what extent do you consider the literature searching service (in general)
of R.I.S.E. to be useful for your professional functioning?
   ☐   ☐   ☐   ☐   ☐

5. Which part of the information package do you consider most valuable?
   ☐   copies of documents   ☐   R.I.S.E. bibliography

6. You would rate the copies of documents that were sent to you as:

   ☐   too technical
   ☐   technical, but useful
   ☐   well-balanced between technical and non-technical
   ☐   non-technical, but useful
   ☐   too non-technical

7. The information sent to you arrived:

    ☐ much earlier than expected
    ☐ slightly earlier than expected
    ☐ in time for your purposes
    ☐ late but still useful
    ☐ too late for your purposes

8. Your original intent (check only the single most pertinent intent) for the information package was:

    ☐ making a decision concerning an educational issue
    ☐ planning a program that currently is not available
    ☐ modifying or improving a program that currently exists
    ☐ increasing professional background knowledge about a topic
    ☐ other (please specify) _____

9. Do you think you could have done as good a literature search as the one received from R.I.S.E. if given ample time?

    ☐ yes   ☐ no

10. Did you look up any of the citations on the bibliography for which no copies of the document were provided?

    ☐ yes   ☐ no

11. What part of the literature search would you have done alone if the service had not been available from R.I.S.E.?

    ☐ all   ☐ little
    ☐ most   ☐ none
    ☐ some

12. After receiving the R.I.S.E. information package, how was it actually used (please use other side if necessary)?

    _____

APPENDIX III

RISE

December 12, 1972

R.I.S.E. is planning an orientation meeting for new Resource Utilization Specialists and an informational meeting for both old and new RUS's. These meetings will be held on January 23 and 24, respectively. Fees for travel, lodging, and meals will be paid by R.I.S.E. upon receipt of a properly executed expense statement. Forms for this will be provided at the meeting.

This particular meeting is extremely important for RUS's in all stages. Many new procedures, materials and response modes have been developed at R.I.S.E. since our last meeting. Many of you will, I am sure, want to browse the UNIPAC collection, one of our latest additions. Some time will be spent discussing needs you as a group have generated, airing of problems, both at our end and yours, and future plans for responding to your requests. Please bring with you any techniques and procedures you have developed to aid educators in utilizing R.I.S.E. services through your Intermediate Unit.

If your Intermediate Unit has identified a new RUS, please indicate his or her name, I. U. position, and some background information on the enclosed green form. New and current RUS's should indicate their availability for this conference, their travel plans, and their need for overnight accommodations on the pink sheet. A reservation card attached to the pink sheet should be completed and returned to the Holiday Inn if such overnight accommodations are needed.

Looking forward to seeing you in January,

and

Wishing you a happy holiday season,

Carolyn Trehoski

RE: RUS Conference

Enclosed please find a tentative agenda for the RUS meeting to be
held on July 17-18, 1973. Because of the short notice we will call your
office within the next few days to verify your intention to attend and
to arrange for your motel accomodations if necessary (i.e. your expected
arrival time, room needs, etc.). If you are not going to be in your office
during the next few days, please leave the information with your secretary.

RE: RUS Meeting July 17-18, 1973

1 - Charlie Majowski, Director of Educational Information Center, for the
    State Department of Education - Rhode Island - will be the luncheon
    speaker on July 18th. He will speak on the dissemination functions of
    his center with the use of extension agents.

2 - For those not attending the meeting, summaries of the various workshops
    will be sent in late July.

3 - The Psychological Abstracts Data Base will be available on computer at
    R.I.S.E. beginning in mid-July. Requests from I.U. and school district
    psychologists are encouraged to use this new data base.

4 - Walk-in-clients from nearby geographic area Intermediate Units. On
    selective responses mode, we will serve these clients for school based
    question and will send you a record of their requests. Clients doing
    graduate work will be charged for reprints and microfiche. Other types
    of response modes, searches, etc. will be referred to the RUS for full
    negotiation and quota records.

RE: SUMMARY REPORT OF RUS CONFERENCE JULY 18-19, 1973

The rather lengthy dissertation which follows is a summary of the discussions and presentations from the RUS Conference held July 18-19, 1973 at the Stouffer's Valley Forge Inn.   Hopefully it will aid in jelling the recommendations of those present and informing those who because of one reason or another were absent.

Several items on the agenda were requests made of the RUS's by R.I.S.E. These are as follows:

1. Identification of Alternative Schools or programs within the I.U.

2. A record of re-use of a R.I.S.E. product housed within the I.U.

3. Documents and instruments used in inservice activities.

4. A statement of the programs and services of the individual I.U.

5. Placing R.I.S.E. on the individual I.U. mailing list.

6. Information regarding programs in Career Education within an individual I.U.

Item #1 - Forms for Alternative Schools and program identification were placed in the conference folder and discussed by attending RUS's. Absent RUS's will find their materials enclosed in this packet of materials. The letter and forms are self-explanatory and should be returned to R.I.S.E. by August 15, 1973.

Item #2 - It was noted in the workshop for RUS secretaries that many I.U.'s are duplicating materials sent to their constituents and creating mini-R.I.S.E. centers. It is important for R.I.S.E. to know how many times a particular product was used and its impact. While this may seem like a paper task for the RUS it means federal $'s for your services. To let R.I.S.E. know how a product was re-used, simply fill out the proper response form and indicate that the client already received service. This may be filled out and sent at the end of each month.

A Service of the Montgomery County Intermediate Unit.

Item #3 - R.I.S.E. would like to have on file any position papers, policies or needs assessment instruments used by the I.U.'s for inservice activities. Please mail these to Dick Brickley. Since this seems to be moving in the direction of a major thrust for the I.U.'s--why not share the efforts, etc.

Item #4 - R.I.S.E. would also like to have on file the statement of programs and services of each individual I.U. In this way we can better serve your needs by being on the watch for materials which may be of interest to you. Please mail these to Dick also.

Item #5 - R.I.S.E. would like to receive newsletters from each I.U. Several I.U.'s are already cooperating in this matter. Again, it aids us in knowing better what your particular interests are.

Item #6 - As was noted at the Conference, R.I.S.E. is being considered for a Career Resource Center for Montgomery County I.U. and as such would like to gather programs from all over the state. Any resource center at R.I.S.E. in the long run benefits all I.U.'s since we draw upon all the information in the center to serve your needs. Any material which you could send to Carolyn would be greatly appreciated.

(R.I.S.E. has also been asked by the state to become a resource center for bilingual education).

The second major portion of this summary details what R.I.S.E. has promised to the I.U.'s. These are as follows:

1B) The slide/tape presentations.

2B) The 1972-73 R.I.S.E. Bibliographies.

3B) Data on UNIPAC orders to individual school districts within each I.U.

4B) Catalogs for I.U.'s and constituent school districts.

5B) Consolidation of the UNIPAC catalog with the two new catalogs (Learning Center and Individualized Instruction).

Item #1B - The slide/tape presentation should be in your hands the first part of September. The kit which accompanies this material will contain a search, a DIALOG bibliography, publications and a publications list, sample UNIPACs and ERIC microfiche, catalogs, and a simple handbook suggesting a program and equipment needs. (All that's missing is Carolyn).

Item #2B - At the conference, a simplified and alternative method of handling the selective response mode was adopted by the conferees. A chart of this mode is enclosed with this summary report (See attachment B2). This new method (which should save the RUS time and postage) means that R.I.S.E. will supply each I.U. with the copies of bibliographies completed for each month. When a selective response request comes in, the RUS can then copy the bibliography and send it along to the client. (The Chart in B2 explains the process). The RUS should indicate the client's name and address and I.U. number in the upper right hand corner of the bibliography as well as specific directions for handling if there are any. Each RUS should indicate to Carolyn whether or not he wants the materials sent to the I.U. or the client as a general practice.

To overcome the problem of old bibliographies, R.I.S.E. will copy and send to each RUS all the 1972-73 bibliographies. Bibliographies compiled before 1972 should be requested in the old manner. Suggestions for preparation, housing and cost of xeroxing the bibliographies appears in attachment B2.

Item #3B - Several RUS's requested a list of school districts within their I.U. that have received UNIPACs. Since this information already exists in the monthly report, the RUS can determine this listing himself by reviewing his particular I.U. section of the report.

Item #4B - R.I.S.E. will provide each RUS with one updated catalog each month. Lists of additions and deletions will continue to be sent should the RUS desire to distribute this list to constituent school districts. It was originally discussed that each I.U. would receive enough catalogs (on a one and done basis) for each school district within its jurisdiction. The Level III I.U.'s, however, feel that they pay more and so should receive more in service. Therefore, R.I.S.E. has devised an equitable plan for the allotment of the catalogs. Level III I.U.'s will receive a catalog for each district; Level II's will receive catalogs for 2/3 of their districts, and Level I's will receive catalogs for 1/3 for their districts. (At any rate no I.U. will receive less than six catalogs--the allotment given last year). Additional catalogs may be purchased from R.I.S.E. at the cost of $3.00 per copy.

Item #5B - At the conference, two additional UNIPAC formatted catalogs were distributed and their usage explained. The Learning Center catalog indexes titles for microfiche which contain materials for particular learning or interest centers (usually found in open concept--open learning classrooms). The Individualized Instruction microfiche are additional UNIPACS. It was recommended that R.I.S.E. consolidate these three catalogs into one. This will be done at the next printing which is anticipated in the fall.

One matter which was not resolved was the issue of the distribution of micro-fiche duplicates of the fifty most widely requested searches. Several RUS's stated that I.U.'s that want these should pay for them and that perhaps the 50 selected by R.I.S.E. may not be the ones that a particular I.U. wants. R.I.S.E. will take the problem under advisement and provide a solution in the near future.

The DIALOG generated bibliography concept was explained to the participants. This form of response will be used for bibliographies not existing in the system. It will also be used for graduate students requesting R.I.S.E. service. The students are charged $10.00 for each file searched on the computer. Details concerning the computer bibliographies were spelled out in the last R.I.S.E. newsletter. Forms for requesting these bibliographies are included in attachment C1.

A new data f e, Psychological Abstracts, is now available on the computer and will automatically be investigated in the search effort. A sample of notice to the psychological community is enclosed in attachment C2 should you wish to alert them to this new resource.

A summary report on the conference could have been less voluminous if more of the RUS's would plan to attend such meetings. More detailed explanations have been included in this report for just that reason.
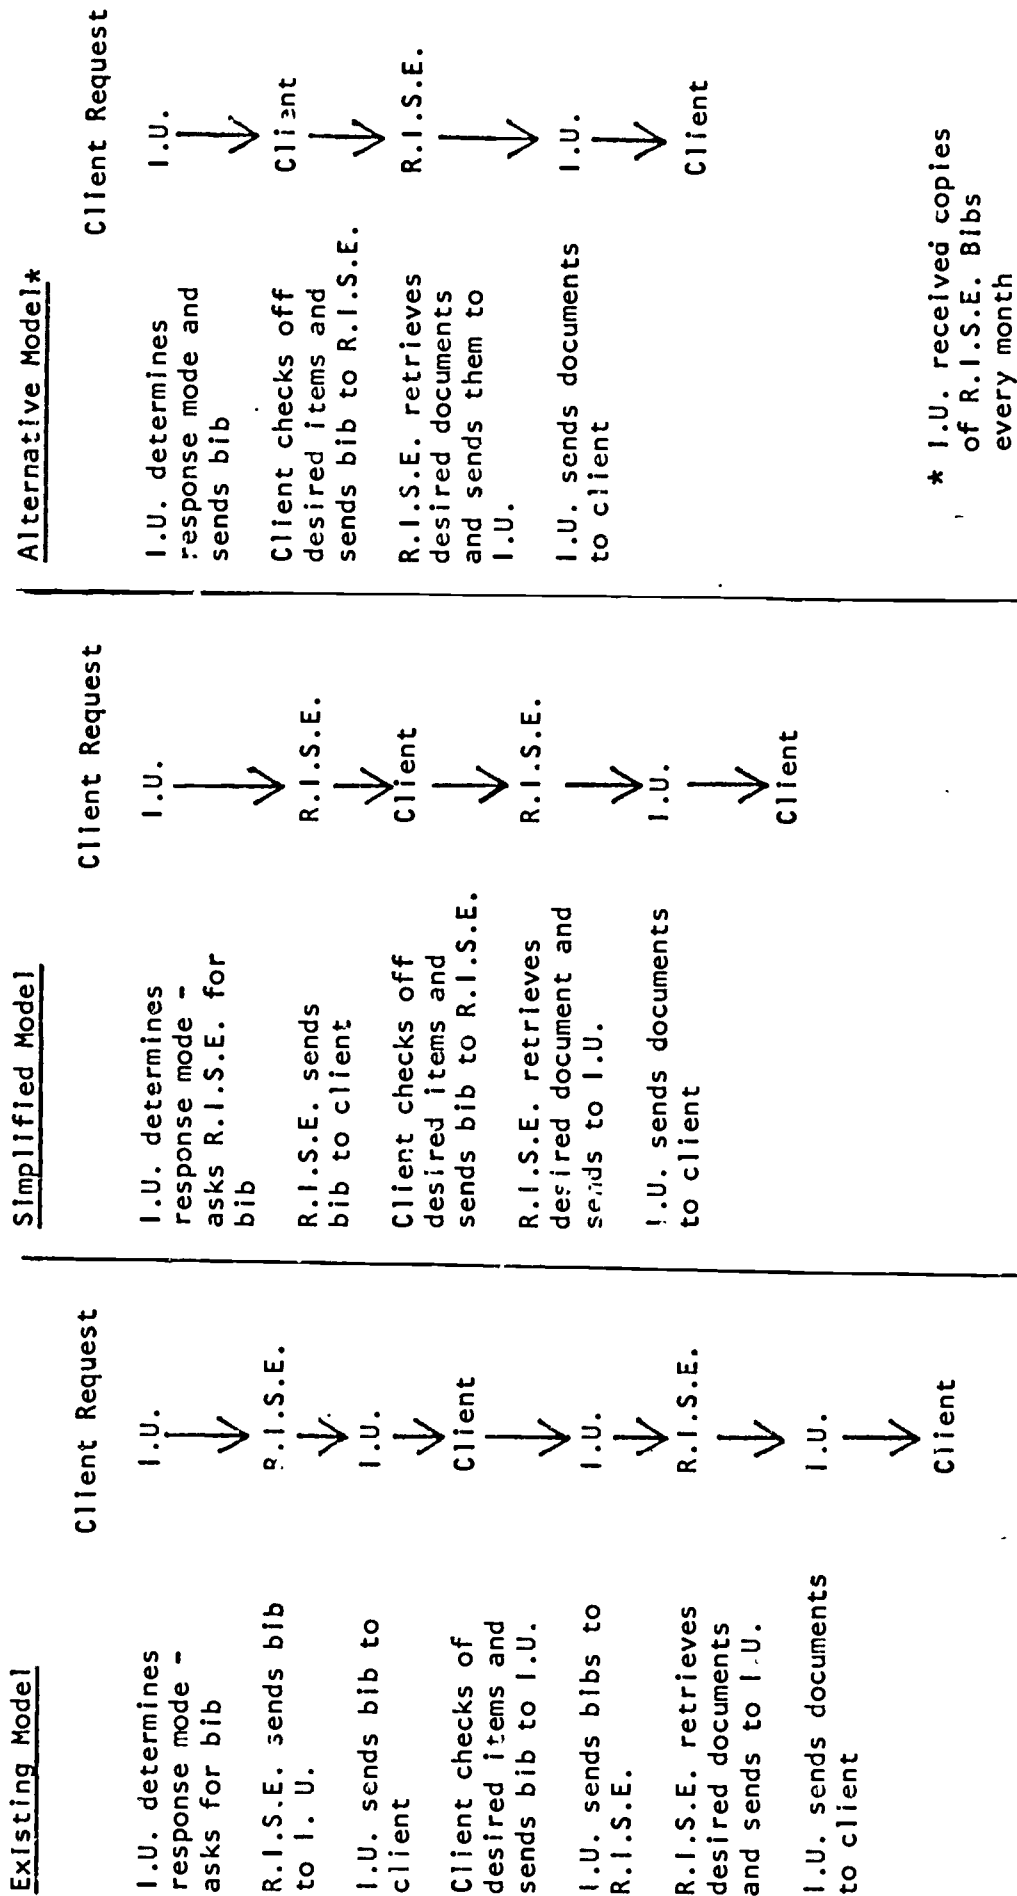

Housing for R.I.S.E. Bibliographies

At the present time, the number of bibliographies that will be sent will take approximately 1/2 of a drawer of a four drawer filing cabinet. It is suggested that if possible the bibliographies be kept in acetate folders to prevent everyday wear and tear. Many stationery stores carry these folders-- one brand name that R.I.S.E. uses is C-Line Products Inc., Mylar Sheet Protectors in 11x8-1/2.

The I.U. should expect xeroxing costs to run about 2.5¢ a page depending on the machine used.

Suggestions for Operation

Simplify selective response mode

Existing Model

Client Request

I.U. → R.I.S.E. → I.U. → Client → I.U. → R.I.S.E. → I.U. → Client

1. I.U. determines response mode - asks for bib
2. R.I.S.E. sends bib to I.U.
3. I.U. sends bib to client
4. Client checks of desired items and sends bib to I.U.
5. I.U. sends bibs to R.I.S.E.
6. R.I.S.E. retrieves desired documents and sends to I.U.
7. I.U. sends documents to client

Simplified Model

Client Request

I.U. → R.I.S.E. → Client → R.I.S.E. → I.U. → Client

1. I.U. determines response mode - asks R.I.S.E. for bib
2. R.I.S.E. sends bib to client
3. Client checks off desired items and sends bib to R.I.S.E.
4. R.I.S.E. retrieves desired document and sends to I.U.
5. I.U. sends documents to client

Alternative Model*

Client Request

I.U. → Client → R.I.S.E. → I.U. → Client

1. I.U. determines response mode and sends bib
2. Client checks off desired items and sends bib to R.I.S.E.
3. R.I.S.E. retrieves desired documents and sends them to I.U.
4. I.U. sends documents to client

* I.U. received copies of R.I.S.E. Bibs every month

TO: Dr. Mann

FROM: Carolyn Trohoski

RE: Psychological Abstracts

      R.I.S.E. has recently received permission from the National Institute of Education to search an additional file on the DIALOG computer system. The new data base contains the American Psychological Associations - Psychological Abstracts collection from 1965-1973. Material can be retrieved by author, subject heading, title and conjunctive searching of words in the subject heading field and the title field.

      R.I.S.E. would like to test the feasability and usefulness of this data base and is, therefore, encouraging the psychological community to take advantage of the information. Upon receipt of a well defined question, R.I.S.E. will prepare the strategy and run the search. In approximately one week's time the requester should receive his output in abstract form-- paper copy.

      Further questions concerning this service should be directed to Mrs. Carolyn Trohoski, Director of Information Services, R.I.S.E., 265-6056.

November 12, 1973

It has been over a year since many of us gathered together at
Downingtown to discuss educational information efforts. At that time,
some information centers were just beginning operations and other more
established centers were exploring diversity in procedures and products.
Since then a number of events have occurred which have altered the national
perspective on educational information services as a vehicle for improved
educational practices at the state and local level. Informal discussions
with some of the Downingtown participants have indicated a desirability
for a reconvention of those involved and others interested in educational
information dissemination functions. As a result, R.I.S.E. will sponsor a
two day working conference to discuss the collective and individual issues
affecting our organizations, and also to bring together a variety of
educational resources which are available throughout the nation. (See
attached materials.)

The conference will be held December 11-12, 1973 at the King of
Prussia Holiday Inn adjacent to the King of Prussia Plaza and one block
from the R.I.S.E. facility in King of Prussia, Pa. Through a grant from
NIE, R.I.S.E. will be able to support a limited number of conferees to help
defray costs incurred in participation. Travel information is enclosed, as
is a tentative time frame of the conference sessions. Financial restraints
require R.I.S.E. to limit participation to a maximum of twelve information
centers. R.I.S.E. reserves the right to further limit participation based
on fiscal and programmatic constraints.

Should you have any questions about the conference, please contact
me. Preliminary registration forms must be returned to R.I.S.E. by
November 28, 1973.

Yours truly,

Richard Brickley
Director   61

Note: Though this meeting is primarily for information center directors, some directors have requested permission to bring 1 or 2 other center staff, specifically information specialists. These people will have the opportunity to observe R.I.S.E. operations and though no formal workshop sessions are planned, they will be able to interact with R.I.S.E. staff on a one-to-one basis. If you have discussed the attendance of such additional staff with Mr. Brickley, please indicate names and positions of those attending below. If not, please call Mr. Brickley to arrange this before submitting the registration form.

Additional Staff:

on_____Monday, December 10th

_____Tuesday, December 11th

at approximately_____AM/PM.

Please return this two-page registration form to:

Richard Brickley
Director
Research and Information Services for Education
198 Allendale Road
King of Prussia, Pa. 19406

Lodging and Meals

Room reservation information must be sent with the preliminary registration form. For planning purposes, room rates will be approximately $18.00 for a single room, $24.00 for a double. These costs and Tuesday and Wednesday Luncheons shall be paid by R.I.S.E. contract. If breakfast and dinner are eaten at the Holiday Inn, these may be charged to your room up to a maximum of $10.00/person/day.

Transportation

Recognizing the fiscal difficulty in which most Centers find themselves, R.I.S.E. can support transportation costs up to $150.00 per Center and will reimburse up to that maximum for real costs upon receipt of full expense record.

Airplane

Limousine service is available to King of Prussia Holiday Inn from Philadelphia International Airport on a regular basis. (Travel time is approximately 1 hour.) Walter's Limousine Service will transport participants to the motel.

Automobile

King of Prussia Holiday Inn can be reached via the Pennsylvania Turnpike, Schuylkill Expressway and Route 202 via I-95 from most southern points. See attached maps.

Train

Participants arriving by train will have to make several connections. A local commuter service from the Penn Central Station at 30th Street Station Philadelphia will provide passengers with service to Paoli, Pa. From there, taxi service would be needed to King of Prussia, Pa. Transportation by train is not recommended.
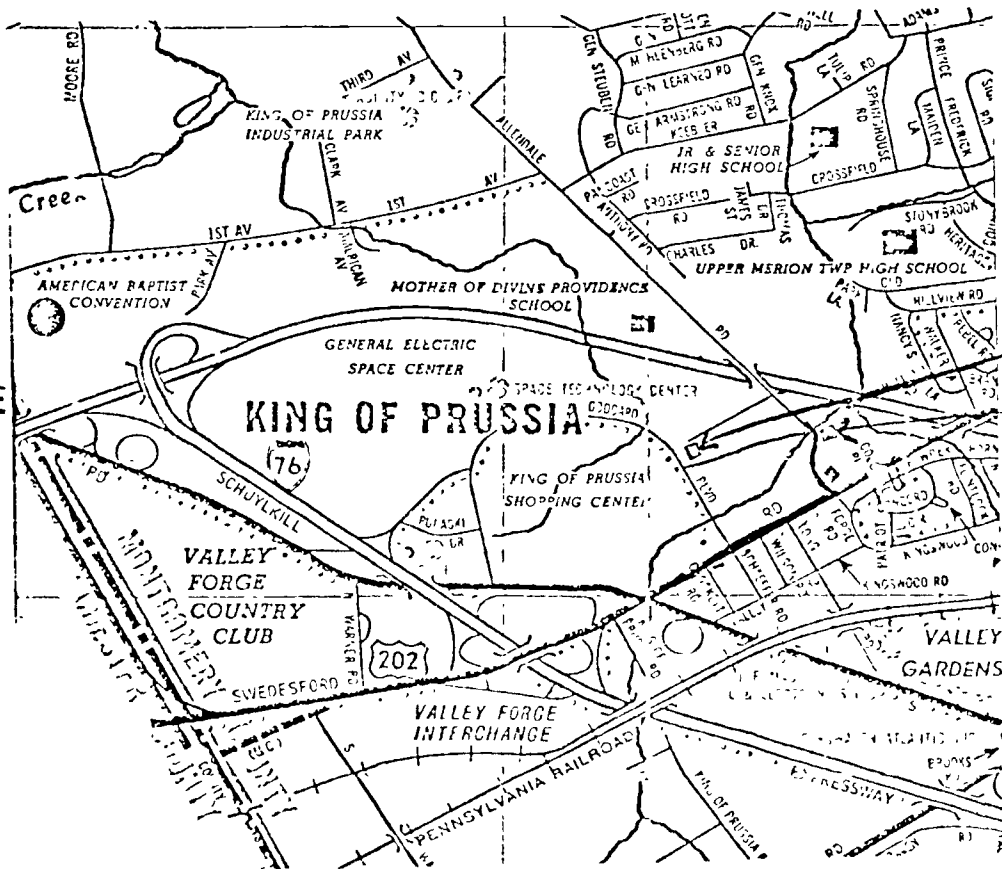

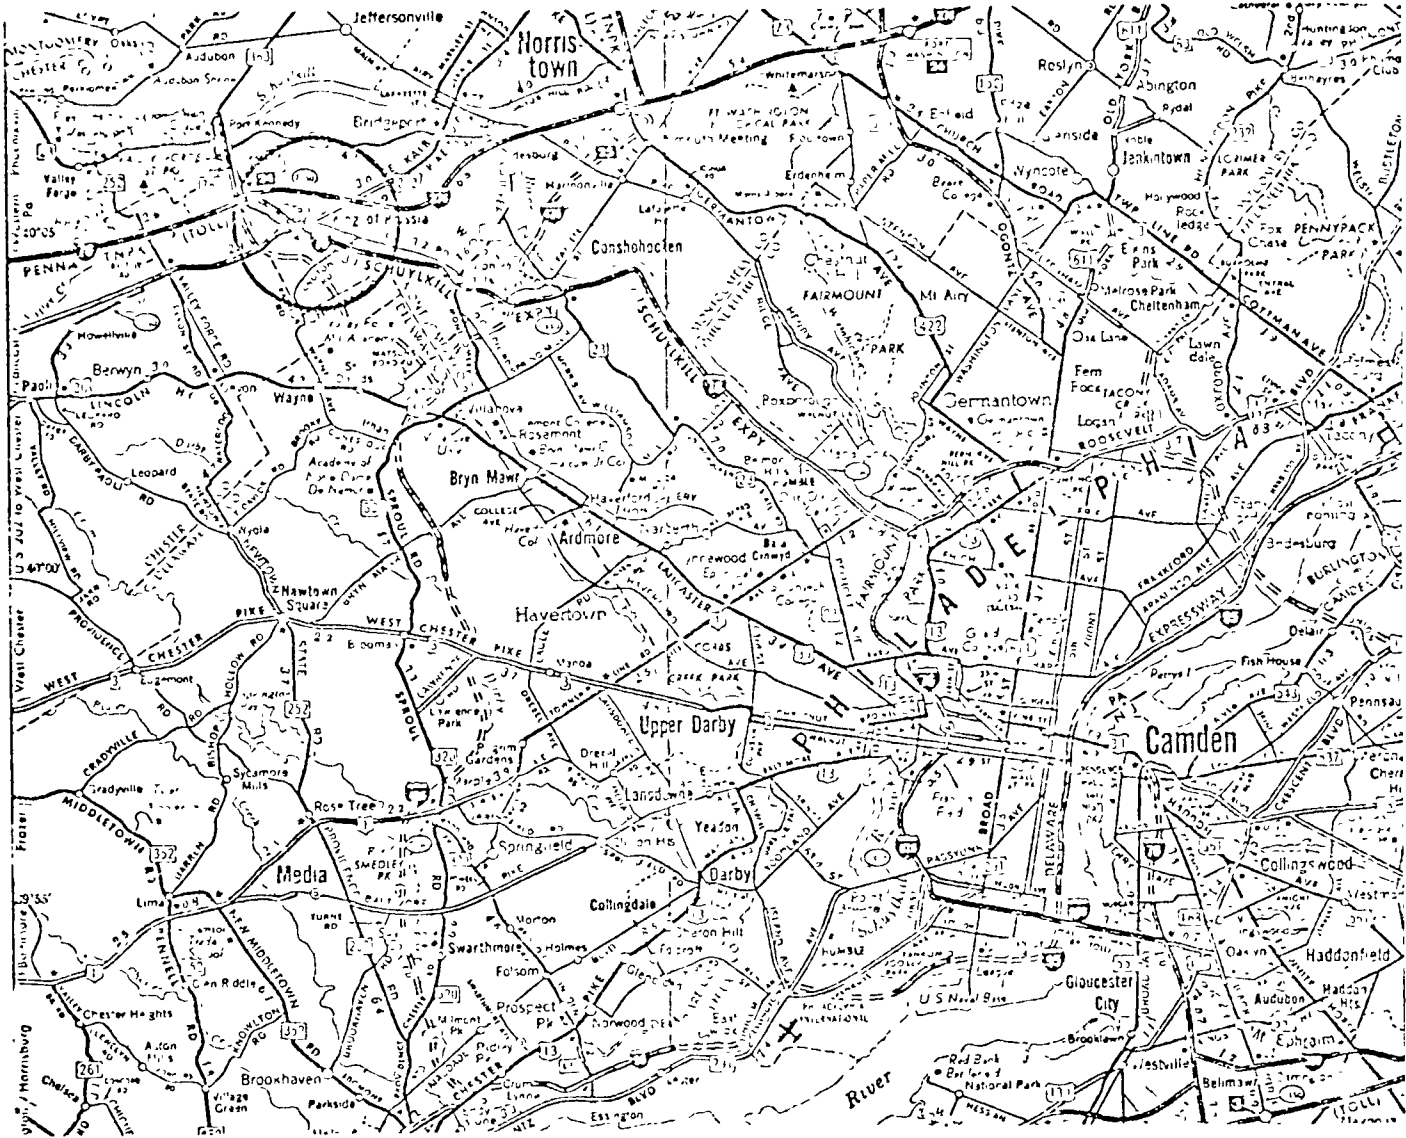

Holiday Inn

R.I.S.E.

Tentative Conference Schedule

December 11 and 12, 1973

Discussion sessions will be held

         Tuesday   -   9:00 a.m. - noon

                         1:30 p.m. - 4:30 p.m.

                         7:00 p.m. - 9:00 p.m.

         Wednesday -   9:00 a.m. - noon

                         1:30 p.m. - 2:00 p.m.

All discussion sessions will be held at the Holiday Inn.

There will be a scheduled luncheon on Tuesday and Wednesday.

Observation sessions at R.I.S.E. will run simultaneously

except for the Tuesday evening session. Conferees attending

the sessions will be invited to both luncheons. The above

time frames are subject to modification based on expressed

needs of the conferees.

Educational Information Center Conference
King of Prussia Holiday Inn

December 11-12, 1973

In planning this conference, several of the potential conferees expressed a
reed to discuss with their colleagues current issues of concern relative to
operation, resources data bases, etc. Therefore no plans have been made for pre-
sentational sessions or outside speakers. Furthermore, though NIE will be re-
presented by one observer, no presentations are expected by either the Dissemination
Task Force or the ERIC staff. Listed below are some of the issues to be discussed.
We recognize that some of these may not be of interest to the total group; however,
it is hoped that the majority will see constructive irvolvement in the discussion
of the following. Please rank 1 through 6 based on your interest.

Ranking
_____ A. National Information Center Network
            1. Should there be one? Why?
            2. Should it be formal or informal?
            3. What about "membership"?
            4. How do we relate to NIE? Other specialized information
                  networks like NDDC, SEIMC, Environmental Agencies, etc.?
            5. Telecopier sharing?

_____ B. Supporting the Center
            1. Other sources of funds?
            2. Costing and fee schedules?

_____ C. Sharing Resources
            1. The future of ERIC and its implications?
            2. Hot Topics - can we share the burden of current awareness
                  pre-packaged information preparation? How?
            3. How can we trade acquisitions? Should we all try for a
                  single computer compatible system?
            4. What about primary document sharing?
                  How? What about cost?
            5. Can we partition journal holdings and share by photo-
                  duplication?

_____ D. Territorial Imperatives
            1. Who serves whom?
            2. Out of state contract - open competition or collaborative
                  cooperation?
            3. Serving special interest groups - political implications?

_____ E. Politics of Information Services
            1. Censorship?
            2. Service or change agentry or both?

_____ F. Evaluation
            1. How do you know your client is satisfied?
            2. How do you know your client uses the information you provide?
            3. How do you measure how information service affect institution
                  change? Staff changes? Student Outcomes? Cost/Benefits?
            4. The numbers game, "what is a search" and national evaluation/
                  policy?

The sequence and extent of discussion of the above will depend on conferee
interest. If your center has operational procedures or documents on the above please
bring about a dozen copies to the meeting for sharing. R.I.S.E. as host will suggest
some procedural ground rules at the beginning of the conference to encourage effective
dialogue. If you have other issues please list them below with "pump-primer"
questions for consideration.

Other Issues for Consideration:

December 20, 1973

Dear Conference Participant:

Since the meeting, we understand that the CCSSO and NIE have some concerns about whether the national conference is an appropriate forum for the issues and concerns raised at our meeting. Greg has been asked to justify the need for the full steering committee to review these issues in preparation for the conference.

Your prompt attention in reviewing and reacting to the enclosed summary of the discussion would be appreciated. Please pass on any additions, deletions, or corrections to Greg Benson by phone by Jan. 4, 1974. So he can be prepared to express our concerns should the steering committee meeting be called in early January.

Know I'll hear from you soon,

Carolyn

P. S.   Please forgive the formal-rather impersonal tone of this letter.
        In this case, social niceties took a back seat to expediency.

Educational Information Center Conference
King of Prussia Holiday Inn

December 11-12, 1973

In planning this conference, several of the potential conferees expressed
a need to discuss with their colleagues current issues of concern relative to
operation, resources data bases, etc. Therefore, no plans were made for pre-
sentational sessions or outside speakers. Furthermore, though NIE was represented
by one observer, no presentations were expected by either the Dissemination Task
Force or the ERIC staff. Listed below are some of the issues suggested by R.I.S.E.
as agenda items and their pre-conference ranking by potential conferees.

Ranking

1st Priority - Sharing Resources

2nd Priority - Supporting the Center

3rd Priority - Evaluation

4th Priority - National Information Center Network

5th Priority - Territorial Imperatives

6th Priority - Politics of Information Services

Because the sequence and extent of discussion depended on conferee interest
the agenda was not limited to the above. R.I.S.E. as host suggested some pro-
cedural ground rules at the beginning of the conference to encourage effective
dialogue.

What follows are a series of summaries of tapes, notes, and impressions as
edited by R.I.S.E. Conferees are encouraged to suggest additions, deletions or
corrections.

Discussion I "Status Reports"

Each conferee was asked to briefly describe changes in his center's operation
since the Downingtown conference.

Fertile "new" client base found in private industry, especially those in
instructional material development and management consulting (Mattas)...Expanded
service area, a training manual for EIC's produced (Lambert)...Home-grown computer
search system(Tally)...Study available on "Role of Extension Agents and Information
Utilization", 6 volume set of ERIC Curriculum Guides, abstracts arranged by subject
area, escrow account approach to fee for service (Herlig)...Statewide expansion,
use of state department specialists for pre-package development (Bruett)...Impact
study developed (Mojkowski)...Cable Television/DIALOG experiment (Osgood)...State
Commitment to Dissemination, legislative support (Melton)...Refocus of information
dissemination to SEA priorities, development of planning resource packet (Evans)...
In and out of DIALOG, possible development of ERIC Search delivery system through
state library network (Casey)...Just getting started (Moughon).   Decentralizing

some center activities in pilot, i.e. local districts provide part-time professional
staff for search/retrieval/dissemination function (Benson)

Ed. Note: It seems that use of ERIC and a "service/change" tie us together. But
we grow more idiosyncratic as we expand.

Discussion 2 "Sharing Resources"

General Items:

Some question regarding future of ERIC. NIE seems to be suggesting movement
toward media, MIS data, etc. However, ERIC is not now expanding proportionately
with information explosion or user needs in the limited area of programmatic
fugitive data. Too much invested in system to tolerate radical modification.
We would encourage additions in format and content.

Consensus for putting our efforts into strengthening ERIC by document submission,
encouragement of ERIC to improve holdings and technical processing rather than
formalizing an alternative informal national acquisition system. No single
center could afford such an operation in a centralized manner. However this
should not preclude some sharing of primary documents among centers.

Center resources of the following types should be shared:

Catalogs or other surrogate inventories of each center's holdings.

Primary documents i.e., fugitive documents, unique "finds", locally
produced materials, in hardcopy or microfiche.

Journals indexed by C.I.J.E. could be partitioned so that each center
maintains a core collection but each would hold a discrete peripheral
collection and share by photo-duplication and transmission by telecopier.

Pre-packaged/PREP-type Information Analysis Products to avoid duplication
of effort on "universal need" consensus.

Search strategy compilation could assist in "difficult" searches; though
diversity of computer retrieval software may deter this; at least attempts
should be made to share unique descriptor set usage for "tough searches"

Standards for products/services may need to be established to insure quality control
and also assist in effective articulation among centers (i.e., What constitutes
a "pre-pak", "UNIPAC", etc.) as well as to provide uniform reporting referents
to policy-makers.

Because of the diversity in staff and skill resources among the various centers
regarding sophistication some centers may have more to "give" than others; a
feeling was expressed that "reciprocal trade-offs" may be possible, but that
centers might best buy resources from each other, thereby eliminating inequalities
of contributions. However, about half of the centers indicated they were presently

Highlignts c Proceedings

unable to accept payments for products because of bureaucratic restrictions.

Operational and managerial concerns also suggest sharing process (i.e., training, evaluation, fee-structure, and P.R. policies and techniques). This could well include frequent interchange of forms, questionnaires, etc.

Specific Items:

Centers represented agreed to place each other on their newsletter mailing list.

South Carolina, New York and Florida, as members of the steering committee of the CCSSO/NIE Secretariat Project agreed to press for CCSSO being responsible for a newsletter to all state representatives and centers through which resource could be announced and thus shared. Dick Herlig (Kansas) agreed to serve as volunteer editor. (See Discussion 3 below).

Each conferee will immediately inventory their center's resources and provide to Dick Herlig by December 15th, entries in the following areas for the first issue of the newsletter:

    Resources: Acquisitions, etc.
    Products: Center created material, i.e., resource packets, special indexes,etc.
    Processes: Operational strategies, etc.
    Plans: Major efforts on pre-package, etc.
            Anticipated to avoid duplication, etc.

SMERC agreed to collaborate on production of joint publication, including printing, with appropriate tailored covers; also, fiche duplication from FIDO data base at 3 fiche/$1.00.

Regarding credit to originating center for re-use of that center's products, the receiving center shall acknowledge source of document in reprint; this would hold true regardless of whether the product(s) was bought or "traded" for; in the case of sub-files or collection of materials, particularly microfiche banks, these would not be reproduced en bloc, without prior approval from originating center.

It was agreed that this group of centers will actively explore the pooling of resources and expertise for the preparation of pre-packages (trans-formation) following agreed upon standard, the need was expressed for a sub-committee to (1) define the standard, (2) identify 12 "hot topics", (3) assign them to the center; centers not represented at this conference interested in cooperating in this venture should be welcomed. Mary Jo Bruett (Iowa) agreed to chair a committee for this purpose with the possibility of testing the standard as part of the CCSSO national meeting agenda.

Discussion 3: NIE, CCSSO, and "operating centers"

The conferees agreed that they should actively support NIE's Dissemination Task Force though provision of information about their efforts to their respective SEA's, whether the center is state agency based or not, and whether or not the center serves as the state liasion to the CCSSO

Highlights of Proceedings

Secretariat. However, the group felt that communication from CCSSO had been limited at best and sought a return to the openess characteristic of NCEC.

Reason demands that if NIE anticipates changes in ERIC that centers should be given the opportunity to react to plans along with other ERIC USERS;

NIE has a responsibility to provide leadership in improving dissemination practice; this includes a role of arbitrating disputes among centers over intrastate service areas, protecting developmental activities from excessive commercialization and specifically to provide early in 1974 a report on what has resulted from and what has been learned from experiences to date in national education information dissemination activities.

We need to pursue how NIE and CCSSO plan to respond to information centers as a group, particularly regarding ERIC changes and other plans for dissemination;

The whole concept of networking of information centers on a national scale is a proper area of concern for us, perhaps through CCSSO.

We will strongly encourage CCSSO, through the steering committee to undertake a coordination role of sharing of resources among centers. The first step in this process is to have CCSSO provide a communication vehicle through a newsletter, and input to the agenda for the national conference.

There is a need for a mechanism for operating centers to provide feedback to NIE through some committee or group that will be acceptable as being representative.

We will pursue with CCSSO the formulation of a sub-group within CCSSO for the special interests of information centers. Failing that contingency plans will be developed with such options of formulation under ASIS or establishing an independent group.

We may need to establish a professional organization/association to deal with such matters as standards and to further the development of a national network - or to pursue our group becoming a special interest group under ASIS umbrella.

Services and Education
193 Allendale Road
King of Prussia, Pennsylvania 19406

Dear Dick,

I feel obliged to write you to convey my appreciation for your national leadership in bringing the directors of existing information centers together at your center on December 11 and 12. In my judgment, the meeting was the most valuable one I have attended with respect to information dissemination.

As a result of that meeting, it appears that education information systems have reached a new plateau of sophistication at which we can pursue more substantive issues than have been addressed in the past. It is unlikely that such a plateau would have been reached without your meeting.

It is for all of us now to insure that we continue to move ahead in this area.

Sincerely yours,

Charlie

EDUCATIONAL RESOURCES CENTER

December 14, 1973

Mr. Richard R. Brickley
Director - Project R.I.S.E.
198 Allendale Road
King of Prussia, Pennsylvania

Dear Mr. Brickley:

This letter is a follow-up to the conference held on the 11th and 12th of this month at R.I.S.E. I share the view that the conference was the most productive that I have attended in the area of information-dissemination. I particularly found the format to be such that participants were given ample opportunity to share both expertise and concerns.

Such a gathering of those involved in information services across the country has been necessary, I believe, for some time. I feel that need was perceived by all attendees.

I hope that one major outcome will be that the ground has now been broken for the beginnings of a national network aimed at the very savings in time, effort and expense for which we have each, individually, organized.

I would also commend your very capable staff for a job well done. You are very fortunate to have such a cooperative and enthusiastic staff with which to work. Please extend to all both my regards and greetings for a happy holiday season.

Sincerely yours,

Harry W. Osgood
Director - Educational Resources Center

Dear Dick:

Congratulations on an excellent dissemination conference. I thought that the meeting in King of Prussia on December 11-12 was one of the best in recent memory.

I am hopeful for the future of the dissemination interests and efforts we share.

Please extend my best wishes and sincere appreciation to Mrs. Trohoski and all of your fine staff.

Sincerely,

John J. Casey
Director, Office of Management Information
(Acting)
