ABSTRACT

A broad educational background is necessary to meet ever changing occupational fields, and career education is an approach incorporating career information within the regular school subjects. For the elementary level, career awareness is the main thrust in this ongoing program to integrate students and community. Self-development and understanding is stressed, and activity and student involvement is the theme. The format for the kindergarten level, major objectives, evaluation rationale, a brief description of creative dramatics, and resource list are outlined in the introduction. In selecting specific jobs, the occupational clusters list was utilized. The two methods of study for kindergarten are: (1) the development of self-understanding through inquiry, discussion, and listening, with a variety of activities (role playing, puppetry, group discussion, problem situations, music, art, and readings); and (2) the learning activities integrating subjects with careers. The five units: self-awareness (eight activities); developing good health habits (nine activities); group member (three activities); school workers (nine activities); definition of work (seven activities); jobs in the community (55 activities divided into transportation, marketing and distribution, health and hygiene, and public service); and seven culminating activities, are organized under concept, objective, and materials headings. INTRODUCTION

Why Career Education?

Young people of today are leaving school and facing an ever increasingly complex industrial world. In many instances, though they have taken the prescribed curriculum, they are not adequately prepared to meet the demands of this complex industrial world. Students for the most part are unaware of the many career opportunities that are available to them. They are unaware of those areas that best fit their particular talents and personality. They are unaware of what is necessary to be successful in an occupational field. Students are also unaware of how choosing a career can affect the facets of a person's life such as his leisure time activities, where he lives, his friends, etc. A broad educational program is necessary to meet the ever changing occupational needs. However, students often fail to see the relationships between the courses they are taking in school at the time they are making their major life world choice. Education can be a most effective means of meeting the needs of these young people.

One of the major goals of education is to provide each student the opportunity to acquire the skills and attitudes necessary for a successful livelihood. Unless at which level of the educational system the teacher in a public school has a unique role to play in the development of these skills and to assist in the process of career development for each individual.

Career education is an integrated planned approach of incorporating career information within the regular school subjects. It will relate the school subject to the world of work in such a way the student can best see an additional need and purpose for the subject. It should help provide further incentive for that student to get the most out of every discipline in his school day. In addition, it can be a focus on the need for further study in related subject areas which will prove helpful for eventual career choices, interests, and life styles.

Career education is not a program for high school seniors in their last semester before they face the world of work. Choosing a career begins with knowing what is available, studying the possibilities, and experiencing the work situation first hand.

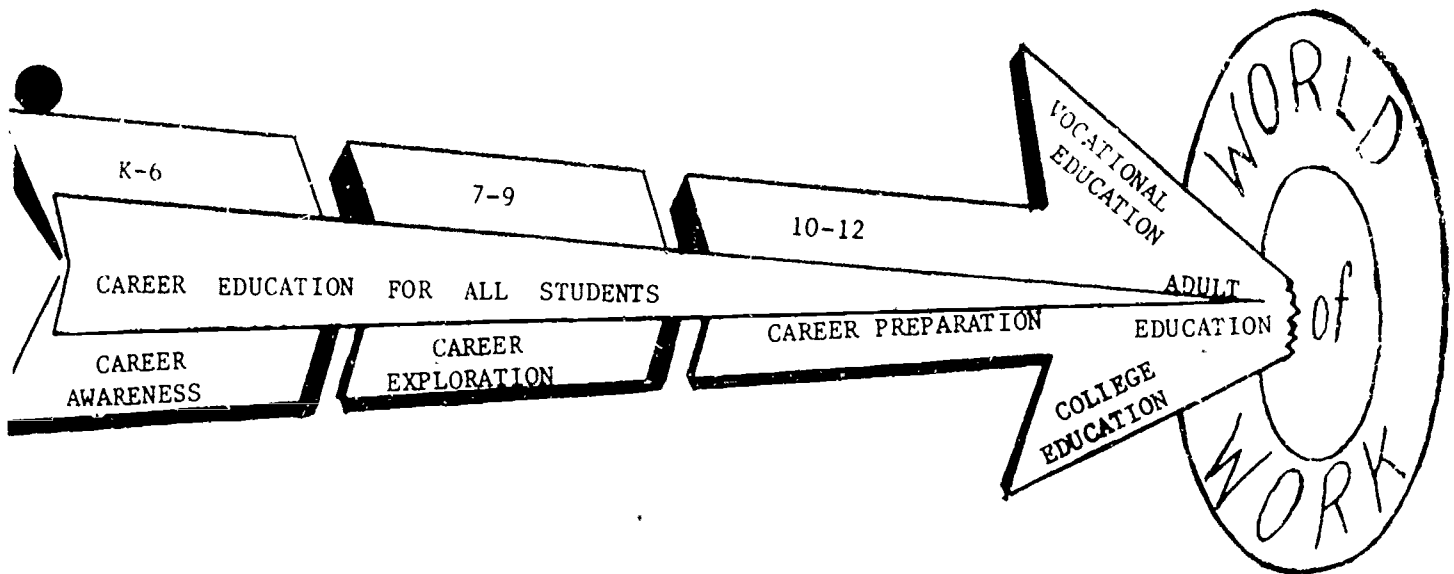

WACAPIS State Department of Education, Olympia, Washington

Pre-school children's play revolves around work roles, they are curious and open-minded to all possibilities. Elementary school is the period to make children aware that there are more possibilities than the fireman, policeman and postman. It is the beginning step in the developmental process of career choice. Junior high school students can explore areas of work in some detail that most interest them. They should be able to look at a job first hand, try it out, decide if it is what they assumed it would be. Through looking into these areas through regular school subjects, students will be able to make more realistic choices of high school subject areas, - those that will be most beneficial to their future aspirations.

Career education, then, focuses upon the importance of introducing adequate work-related experiences for children from the time they enter school. The intent is not to force a student into an early decision, but to give him a wide base of experience so that when he does make a decision, it will be a realistic one supported by a background of many experiences.

The program involves individual and group counseling opportunities throughout the students' schooling. Since most people who lose their jobs do so through interpersonal relationship problems, the counseling component will stress self awareness and understanding, cooperation and many other aspects necessary for social and occupational fulfillment. Specific occupational guidance is only one portion of the program objective. The larger goal is the student's understanding of those attributes necessary for a successful life.

The aim of career education is not to add to an already crowded curriculum, but to provide a way in which skills that are already taught can be associated with the world of work.

ELEMENTARY

CAREER AWARENESS: An on-going program integrated into the regular school curriculum utilizing all disciplines. The major emphasis is to take students into the community and to bring the community into the classroom. Self development and understanding is stressed. Activity and student involvement is the theme.

JUNIOR HIGH SCHOOL

CAREER EXPLORATION: Implementation of an interdisciplinary "hands-on" Career Exploration and Orientation program. Utilization of a Career Guidance Center, community exploration and major subject area involvement.

SENIOR HIGH SCHOOL

CAREER PREPARATION: Skills training, an on-going program with classes in the following cluster areas:

- Food Service
- Marketing
- Health Occupations
- Mechanical and Repair Service

A Career Guidance Center involving students, faculty and community in the career decision making process.

CAREER AWARENESS FORMAT - KINDERGARTEN

The purpose of Career Awareness is to develop an appreciation for the entire world of work throughout the United States. To insure a broad coverage of all aspects of work, the clusters developed by the United States Department of Health, Education and Welfare are employed. These are:

- Business and Office
- Consumer and Homemaking-Related
- Communications and Media
- Fine Arts and Humanities
- Hospitality and Recreation
- Environmental Control
- Personal Service
- Manufacturing
- Transportation
- Health
- Public Service
- Agri-Business and Natural Resources
- Marine Science
- Construction
- Marketing and Distribution

Within these clusters a range of specific jobs is covered which are representative of similar jobs in other occupational areas and can also lead to discussion of other jobs in that specific industry. The intent is to show the relationships of these occupations with the specific job being studied.

Kindergarten will employ two methods of study. First, the class will use the American Guidance Service kit Developing Understanding of Self and Others (DUSO). The kit is described as follows: "The DUSO activities focus upon helping children understand themselves and others and, toward this end, make extensive use of a listening, inquiry and discussion approach to learning. The variety of activities includes role-playing, puppetry, group discussion, problem situations, supplementary reading suggestions, music and art." This kit is designed to provide activities every day or as often as the teacher desires. It can be used during the entire school year.

The second part of the Career Awareness study will begin the first semester with the units covering the "Introduction" and "School Workers". These might be used simultaneously as the teacher chooses. The class may use any of the remaining units throughout the school year. There is no set schedule and each teacher should decide when she/he wishes to use the materials.

CAREER AWARENESS FORMAT - continued

Each unit in this curriculum has from five to fifteen activities. The activities are flexible and can be worked on a one-a-day basis or however the teacher wishes to introduce them. You as a teacher are to choose from among the activities those that best fit your teaching style and present curriculum. It is not anticipated that you will use all activities as time will probably not allow this, but it is hoped you will consider many of them. It is emphasized that one of the main purposes of the program is to show a relationship between school subjects and careers; therefore, the activities are designed to be taught within subject areas. Creating a "career subject" is discouraged.

The materials for these units are in your classrooms or may be requested at the Career Awareness office, 336-0945. If you wish resource speakers in any of your study areas, contact Boise School Volunteers, 336-1370, Ext. 281.

The Career Awareness curriculum is in a constant state of revision. If you have tried a successful activity that is not in this guide, let the Career Awareness office in on it. In turn, we will inform others. We are also looking for materials which enhance the educational program.

The success of any classroom-centered program depends on the involvement in your classroom. The purpose of our services is to help you become involved with a minimum of extra work. If we are not adequately providing this service, bring it to our attention.

SELF-AWARENESS -- OBJECTIVES

KINDERGARTEN

1. To develop a positive attitude of self worth.
2. To develop an awareness of others' rights and needs.
3. To develop an awareness of basic human values.
4. To develop ideas that respect, fairness and consideration contribute to effective living.

7. To develop positive attitudes toward the world of work.
8. To develop the attitude that all work contributes to society and humanity.
9. To develop the attitude that cooperation in jobs at home leads to better family relationships.
10. To become familiar with jobs performed by members of the family.
 - a. To be able to identify what father's work is and some of the tasks he performs at his job.
 - b. To be able to identify what mother's work is and some of the tasks she performs on this job.
 - c. To be able to identify other family members' work and some of the tasks they perform on their jobs.
11. To have some degree of knowledge of the work performed by parents of classmates.
12. To become familiar with the jobs of all employees of this school and the work they perform.
13. To become familiar with the vocabulary connected with job areas discussed.
14. To present appropriate occupational information for the models who promote health and hygiene.

EVALUATION RATIONALE

The questions below may be used with any of the materials presented in the "Evaluation of Children" section of the Boise Public Schools' Kindergarten Handbook beginning on page 134.

1. Are the students learning to cooperate?
2. Are the students growing in self-confidence?
3. Are the students developing, inquiring and exploring attitudes?
4. Have students learned new vocabulary?
5. Did students ask questions freely?
6. Did students show leadership qualities?
7. Are students learning to use a variety of new materials?
8. Does the class show a greater interest in concepts presented?
9. Are pupils gaining facility in vocabulary?
10. Did students' interest increase as the units progressed?
11. Is there a marked degree of respect for jobs others do for us?
12. Are the children beginning to see the difference between fact and fantasy?
13. Do students realize the relationship of workers and those they render services for?
14. Is there an increasing awareness of the importance of work?
15. Are the members of the class showing an increased interest in class discussion?
16. Did the children enjoy the learning activities?
17. Do the children participate in role-playing and dramatizations?
18. Do the children speak of work in a positive manner?
19. Did the children enjoy the field trips?
20. Were there evidences of an improvement in study skills?
21. How many times did boys and girls change their choice of jobs?
22. Are the students able to work in small groups?
23. Do the children share props and job tools?
24. Do pupils' play habits reflect their pleasures of working together?

CREATIVE DRAMATICS

While dramatic play is spontaneous improvisation on the part of the children based on their social emotional experiences, creative dramatics is a more formal mode of role-playing. The basic difference between the two is that in creative dramatics there is much more teacher guidance. The teacher may need to choose a book and discuss the characters with the children. The story is read or perhaps told to define narration and help recall the sequence of events. Then parts are chosen and ways of portraying the characters are discussed. Equipment needs to be decided upon: costumes, props, puppets, masks, etc.

It is wise to begin with a simple story and a limited number of characters. Children should not be made to feel "put on the spot" or be asked to "perform" for others. The dramatic activity should be as natural as possible wherein the teacher gathers a group of children together in one section of the room while others are busy working and playing. It could be done with the whole group if children who do not have a particular role at the moment can have the opportunity to contribute suggestions. In this way all children can feel involved and some are not just sitting and watching a performance.

The goal is not perfection or a polished skit, but rather the development of rich language experiences. Personal enjoyment on the part of the children should be a primary consideration.

Stories for simple dramatization:

Just Me, Ets)
Play with Me, Ets) mostly pantomime
Caps for Sale, Slobodkin)

The Three Bears, Brooke
The Three Little Pigs, Brooke
The Three Billy Goats Gruff, Blair

ACTIVITY 7

MATERIALS

"On Any Saturday": After showing the students the action pictures, discuss what part of the body is being used in each activity. Lead a discussion with your students so they understand that their choices of activities are examples of physical characteristics; i.e., bike riding, painting, playing with trains, building sand castle, playing baseball.

ACTIVITY 8

A Shape Game: Fold in half a square. Draw a shape on one side of the folded paper. Cut out the shape. (Students should have two shapes exactly the same.) Use a box to collect one shape from each student. Students write their names on the shape they still have. Pass the box around and let each child remove one shape from the box. Allow each child to move around the room to find the child who made the shape that he/she selected from the box.

1B. INTRODUCTION--DEVELOPING GOOD HEALTH HABITS

KINDERGARTEN

ACTIVITY 1

Cut a large circle from tagboard and divide it into pie-shaped segments with a felt marker. In each segment place a "Health Rule" that could be applied to everyday hygiene and care. For example: 1) brush teeth, 2) take a bath, 3) wash face and hands.

MATERIALS

Tagboard

Place tagboard spinner in center of circle and let one student spin it each day. This student asks the "Health Rule of the Day" of all the others in the classroom to see if they have followed it themselves.

ACTIVITY 2

Sing about health rules to the tune of "All Around the Mulberry Bush":
"This is the way we brush our teeth", etc.

"What I Do All Day"

ACTIVITY 3

Act out good health habits around the theme "This Is How We Get Up in the Morning". Children lying down and take turns waking up and acting out a health rule. Others try to guess the rule.

ACTIVITY 4

Make group charts to show health rules studied. Children mark next to their name if they used the health rule that day. Examples:

- "I brushed my teeth."
- "I combed my hair."
- "I washed my hands and face."

	<p><u>ACTIVITY 3</u> Pose situations to the class group related to classroom work situations and let them evaluate how they worked together. Here are some suggested discussion questions:</p> <ol style="list-style-type: none"> 1) What would happen if Paul built a tall building he was very proud of and David came in the block room and knocked it over? 2) Sally and Bonnie were playing in the house area and at clean-up time Sally didn't want to help Bonnie straighten up the area. 3) What would happen if you were selfish and didn't share any trucks? 4) Would you like it if someone painted on your picture? 5) Can you get more work done as a group or by yourself? Why? 6) How can we help each other?

2. SCHOOL WORKERS

KINDERGARTEN

CONCEPTS

Schools have many people who help children. Children can help school workers do their jobs more easily. Teachers help children learn about their world. Counselors help children understand themselves better. The principal helps the teachers and makes sure the school runs properly. The secretary helps the principal; she types letters and answers the phone. The custodian keeps the school neat and clean. The librarian keeps our library in order, checks out books, reads stories and orders new books. Special teachers help children with special subjects or children who need special help. The cooks prepare and serve food. Bus drivers bring children to school, take them home and take classes on field trips. Each school worker has an important part in helping make the school a good place for children to learn. Each school worker must learn how to do his/her job well.

OBJECTIVES

To allow the children the opportunity to familiarize themselves with the teaching and nonteaching people in the school. To allow the nonteaching help to explain to the children what their jobs are in school.

4. JOBS OF THE COMMUNITY--INTRODUCTION

KINDERGARTEN

CONCEPT

Many workers provide goods and services to our families.

OBJECTIVE

To give the children an opportunity to see community workers on the job and to let children role-play a variety of job roles.

MATERIALS

<p>4A. JOBS OF THE COMMUNITY--INTRODUCTION</p> <p><u>ACTIVITY 1</u></p> <p>Show the class the urban panorama and discuss parts of the picture that show where people work. Ask children if Boise has any of these working places. After discussion, invite children to make a city in the block area to include working places discussed. Be ready to add signs to the children's buildings.</p> <p><u>ACTIVITY 2</u></p> <p>Refer to urban panorama and ask children to locate ways people in the city move: train, plane, bus, taxi, car, foot, bike. Have children identify "transportation" workers. Let them incorporate "transportation" into their block city.</p> <p><u>ACTIVITY 3</u></p> <p>Have children share sounds of the city. If they think they can "hear" any sounds when looking at the urban panorama, have them share them with the class.</p> <p><u>ACTIVITY 4</u></p> <p>Mount a large piece of white chart paper (2 widths taped together) with blue chart paper, along the top. Tell the children that they are going to make a map of a city. Discuss what needs to be put on the paper to make it a city. After the teacher draws one road, let the children come up and add several.</p> <p>At an activity center let the children draw and cut out buildings, people, workers and transportation vehicles to be pasted on the large mural.</p> <p>This activity can be elaborated on daily. Numerous map reading skills can be incorporated.</p>	<p>KINDERGARTEN</p> <p><u>MATERIALS</u></p> <p>Urban panorama available free from Idaho Dairy Products Commission Unit blocks</p> <p>Cars, trucks, buses People figures</p> <p>Record: "Sounds of the City" --Osco Drug, 984</p>

4B. JOBS OF THE COMMUNITY--TRANSPORTATION, Airport

KINDERGARTEN

ACTIVITY 1

Arrange for a field trip at a time when a flight is due to land.

Have the children look for jobs people are doing at the airport. If possible, take pictures of workers.

Have a list of workers printed up for each mother who has a group of children and ask her to point out the workers: parking lot attendant, taxi cab drivers, ticket agents, security police, pilots, restaurant workers, baggage men, etc.

If time allows, let each child draw a part of the airport he/she liked while still at the airport. The pictures can be colored at school, then mounted to show various aspects of the airport.

31

MATERIALS

Manilla paper
Pencils

ACTIVITY 2

Let children construct an airplane from a large refrigerator box. First have them list what they need to do to the box to change it into an airplane.

Refrigerator box

4D.. JOBS OF THE COMMUNITY--HEALTH AND HYGIENE, Barbers, Hairdressers

KINDERGARTEN

ACTIVITY 1

Discuss the work of the barber and the hairdresser or beauty operator.

Consider: How do these workers help people?

Why do people go to barbers and beauty snops?

What do these people do?

(Let children share their experiences.)

Let children play at being a barber or hairdresser. Stress the importance of using their own combs, washing hands when they are finished. It will be important for the teacher to keep combs, brushes and rollers clean.

MATERIALS

- Pocket combs
- Hand mirrors
- Rollers and clips
- Empty hair spray cans
- Empty shampoo containers
- Towels
- Large hood dryer
- Empty shaving cream cans
- Razor (without blade)
- Scissors made from heavy construction paper

ACTIVITY 2

Invite a barber to come and talk about his/her work, maybe even trim a student's or another teacher's hair. (If you have a student's hair trimmed, be sure to get parent's permission first.) Encourage children to ask questions.

Resource person: barber

ACTIVITY 3

Invite a beauty operator to come and talk to the children, maybe set or comb one student's hair. Discuss grooming for children.

4E. JOBS OF THE COMMUNITY--PUBLIC SERVICE

KINDERGARTEN

CONCEPTS

Firemen are important people who work hard to protect us from fires. We can help them by observing fire safety rules. Workers in the postal service provide a valuable service in making it possible for us to correspond with people who live far and near.

OBJECTIVES

To give the children a better understanding of the service performed by the firemen and postal workers.

MATERIALS

5. CULMINATION PROJECTS

KINDERGARTEN

CONCEPTS

There is a great variety of occupations in each community. Some involve work indoors and some outdoors. Some have special costumes and some have special tools. The variety of jobs in the community is what makes it possible for a community to provide all the goods and services its people need.

OBJECTIVES

To review and remind children of the various workers studied, the jobs they perform and their importance to the community.

MATERIALS

Materials for puppets

Paper for worker costumes

<p>5. CULMINATION PROJECTS</p>	<p>KINDERGARTEN</p>
<p><u>ACTIVITY 1</u></p> <p>Make puppets of various jobs studied. Give each child a puppet and have him/her tell students what jobs it does and how it helps people.</p>	<p><u>MATERIALS</u></p>
<p><u>ACTIVITY 2</u></p> <p><u>"What's My Line?":</u> Whisper an occupation to a student and have the class guess what it is by means of questioning the "worker".</p>	
<p><u>ACTIVITY 3</u></p> <p><u>Worker Day:</u> Have a costume day. Children may come dressed as workers. (You may invite mothers in one afternoon to make paper costumes for their children.)</p>	
<p><u>ACTIVITY 4</u></p> <p><u>Indoor-Outdoor:</u> Name an occupation and have the children determine whether it involves work indoors or outdoors or both.</p>	
<p><u>ACTIVITY 5</u></p> <p>Explain to the children they are to pretend they are where you say they are. They must tell you all the things that the people there are doing and who the people are who are doing them. Present the following situations:</p> <p>You are at a grocery store. You are in a post office. You are at a laundromat. You are in a cafeteria You are in a dentist's office. You are in a hospital. You are in (name a local attraction such as museum, park, etc.).</p> <p>Use as many as time and interest permit.</p>	

5. CULMINATION PROJECTS

KINDERGARTEN

ACTIVITY 6MATERIALS

Trade Tools: Tell the children they are going to think of things people might use in their occupations. Ask them what a barber might use besides hair clippers. Call on a volunteer and ask him/her to name all the things he/she can think of and to make complete sentences: "A barber also uses hair tonic, shampoo, a comb, a brush and scissors." Continue to ask questions similar to the following:

1. Name some things a farmer might use besides a pitchfork. (rake, bucket, hoe, tractor, plow, fertilizer, combine)
2. Name some things a musician might use besides a drum brush. (music stand, sheet music, instrument case, piano, trumpet, trombone, drums)
3. Name some things a doctor might use besides a doctor's bag. (cotton, thermometer, scale, pencil, paper)
4. Name some things a maid might use besides a vacuum cleaner. (dust-cloth, broom, dustpan, scap, bucket, iron)
5. Name some things a gardener might use besides a rake. (hoe, hedge clippers, shovel, bucket, flower pot)

ACTIVITY 7

Play "Community Minus One". Dramatize by having children choose occupations. Take away one occupation. What effect does this have on the community?
