IDENTIFIERS *Residential Remodeling

ABSTRACT

The general purpose of the occupational analysis is to provide workable, basic information dealing with the many and varied duties performed in the residential remodeling occupation. The analysis only briefly covers the many areas of residential remodeling. The document opens with a brief introduction followed by a job description. The bulk of the document is presented in table form. Four duties are broken down into a number of tasks and for each task a two-page table is presented, showing on the first page: tools, equipment, materials, objects acted upon; performance knowledge (related also to decisions, cues and errors); safety--hazard; and on the second page: science; math--number systems; and communications (performance modes, examples, and skills and concepts). The duties listed are: performing exterior work on walls; reroofing a house; enlarging a room; and adding a room. The document concludes with two appendixes outlining hiring, professionalism and supervisory qualifications; and basic geometry skills and concepts. (BP)

"The activity which is the subject of this report was supported in whole or in part by the U.S. Office of Education, Department of Health, Education, and Welfare. However, the opinions expressed herein do not reflect the position or policy of the U.S. Office of Education, and no official endorsement by the U.S. Office of Education should be inferred."

TABLE OF CONTENTS

FOREWORD

The occupational analysis project was conducted by The Instructional Materials Laboratory, Trade and Industrial Education, The Ohio State University in conjunction with the State Department of Education, Division of Vocational Education pursuant to a grant from the U.S. Office of Education.

The Occupational Analysis project was proposed and conducted to train vocational educators in the techniques of making a comprehensive occupational analysis. Instructors were selected from Agriculture, Business, Distributive, Home Economics and Trade and Industrial Education to gain experience in developing analysis documents for sixty-one different occupations. Representatives from Business, Industry, Medicine, and Education were involved with the vocational instructors in conducting the analysis process.

The project was conducted in three phases. Phase one involved the planning and development of the project strategies. The analysis process was based on sound principles of learning and behavior. Phase two was the identification, selection and orientation of all participants. The training and workshop sessions constituted the third phase. Two-week workshops were held during which teams of vocational instructors conducted an analysis of the occupations in which they had employment experience. The instructors were assisted by both occupational consultants and subject matter specialists.

The project resulted in producing one hundred two trained vocational instructors capable of conducting and assisting in a comprehensive analysis of various occupations. Occupational analysis data were generated for sixty-one occupations. The analysis included a statement of the various tasks performed in each occupation. For each task the following items were identified: tools and equipment; procedural knowledge; safety knowledge; concepts and skills of mathematics, science and communication needed for successful performance in the occupation. The analysis data provided a basis for generating instructional materials, course outlines, student performance objectives, criterion measures as well as identifying specific supporting skills and knowledge in the academic subject areas.

PREFACE

The purpose of this work is to develop a task analysis in residential remodeling. This field is very broad, crossing many skilled areas. Due to lack of time and ability, a brief part has been covered. It is hoped that this effort might be of some help to the reader.

ACKNOWLEDGMENT

We wish to acknowledge the valuable assistance rendered by the following subject matter specialists. They provided input to the vocational instructors in identifying related skills and concepts of each respective subject matter area and served as training assistants in the analysis process during the two-week workshops.

Rollin M. Barber, Psychology

JOB DESCRIPTION

The job of remodeling covers carpentry, plumbing, electricity, masonry, roofing, painting, and decorating. Many other skilled areas are touched upon. The stress in this occupation seems to fall in the area of troubleshooting, planning procedures, and carrying out the wishes of the customer.

A knowledge of building nomenclature is a must. Much of the trade can only be learned by on-the-job experience.

Duty A Performing Exterior Work on Walls

1 Remove old materials from exterior walls
2 Inspect the rough framing for soundness, replace studs
3 Install siding
4 Apply exterior trim
5 Hang new gutters and downspout (aluminum)
6 Paint exterior

(TASK STATEMENT) REMOVE OLD MATERIALS FROM EXTERIOR WALLS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON

Straight claw hammer
Large screwdriver
Wrecking bars
Off-set bars
Nail pullers
Handsaw
Folding rule
Square
Tri-square
Planes
Miterbox
Chisels
Plumb bob
Electric skill saw
Electric saber saw
Vice grips
Crescent wrenches
Hacksaw
Chalkline
Levels
Tape measure
Pop rivot gun
Tin shears (3)
Shangle knife
Flashlight
Extra light
Sledge hammer
Pipe wrenches
Tubing cutter
Threader
Torch
Staple gun
Nail set
Exacto-knife
Wide putty knife
Corner blaster applicator
Gutters, drains
Trim
Siding

PERFORMANCE KNOWLEDGE

Remove gutters
Remove trim
Remove siding

SAFETY – HAZARD

SAFETY
Secure ladders well
Wear safety hat and glasses
Wear hard sole shoes
Wear gloves

HAZARD
Falling from ladder
Falling objects
Splinters, nails

DECISIONS

Determine condition of existing structure
Determine how the materials are fastened
Determine starting point
Determine salvagability of materials

CUES

Cracks
Sound test, tapping
Plans of the owner, importance of time
Visual inspection

ERRORS

Main structure is not sound misjudged
Materials cannot be saved
Does not follow correct procedure

TASK STATEMENT) REMOVE OLD MATERIALS FROM EXTERIOR WALLS

SCIENCE	MATH -- NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage Resistance of materials to change in shape BEHAVIORAL SCIENCE Hiring - exhibit capacity to ascertain personal qualities (skills, knowledge, character, flexibility, learning capacity) Professionalism - maintain capacity to foster trust and cooperation; to cope with conflict behavior; exhibit qualities of self-confidence, self-control, self-reliance, self-respect and adaptability Attributes of maximum functioning capacity Conscious awareness of the need for a balance (both physical and mental) between tension and relaxation Conscious awareness of physical expressions basic to peak physical performance Conscious awareness of qualities basic to optimal mental performance Emphasis on awareness of safety, body rhythm, observation, alertness and organization	Set of real numbers [all positive numbers] Use of numbers (without calculation) - counting, coordinate system, ordering, indexing, coding, ratio, measurement, recording Fundamental operations (calculation) - addition, subtraction, multiplication and division algorithms, and order of operations, i.e., use of parentheses in simplifying arithmetic expressions Measurement: geometric - area [square measure]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Viewing	Inspection	Visual analysis, memory, logic, color discrimination, comprehension
Reading		Process report and instructions
Touching	**Manual** Pushing to see if it feels solid	Texture, movement

(TASK STATEMENT) INSPECT THE ROUGH FRAMING FOR SOUNDNESS, REPLACE STUDS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Standard tool kit	Visually inspect wood Test by hammering on each stud Use tape measure to check diagonally for square Remove bad stud cautiously Use level to check plumb	SAFETY Wear hard hat. safety glasses, hard soled shoes, and gloves HAZARD Falling objects Splinters Stepping on nails
DECISIONS Determine condition of rough framework Determine replacement of studs, etc. Determine squareness and plumb	**CUES** Cracks, rot, strength Diagonal measurements are not equal Level bubble is off center in vertical or horizontal checks	**ERRORS** Read tape or level wrong Disturb structure while putting in new studs

41

TASK STATEMENT) INSPECT THE ROUGH FRAMING FOR SOUNDNESS, REPLACE STUDS

SCIENCE	MATH NUMBER SYSTEMS
PHYSICAL SCIENCE Composition of matter Relationship of force to distortion in an elastic body Resistance of materials to change in shape BEHAVIORAL SCIENCE Hiring - exhibit capacity to ascertain personal qualities (skills, knowledge, character, flexibility, learning capacity) Professionalism - maintain capacity to foster trust and cooperation; to function efficiently when encountering fast changing, multiple, personal or situational variables; exhibit qualities of self-confidence, self-control, self-reliance, self-respect and adaptability Supervision - maintain customer's illusion of privacy by avoiding excessive noise or movement; communicate pride in establishment Attributes of maximum functioning capacity (see Appendix A)	Basic arithmetic skills and concepts Estimation Ratio and proportion Basic measurement skills and concepts Measure sense/role of unit Instrument - tape Measurement: geometric - linear Deductive/inductive logic

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Listening	Tapping on wood	Auditory discrimination, noise discrimination
Viewing	Inspecting	Visual analysis, memory, logic, color discrimination
Touching	Cracks, rot	Texture, consistency, movement

(TASK STATEMENT) INSTALL SIDING

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Standard tool kit Scaffolding Siding Fasteners	Measure Strike line on wall Position the siding to line Secure siding Complete installation to manufacturer's specifications	SAFETY Wear hard hat, gloves, hard soled shoes Check scaffolding for strength HAZARD Splinters Flying metal off nail heads Falling boards Falling off scaffold

DECISIONS	CUES	ERRORS
Determine if the level is certain Determine if the butt ends are square Determine where the breaks should occur	Visually looks wrong Ends are not running vertically square with rough structure	Square has been damaged Level is off Rough structure is not plumb or square

(TASK STATEMENT) INSTALL SIDING

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Resistance of materials to change in shape Simple machines used to gain mechanical advantage [hammer] Work input, work output, friction and efficiency in simple machines Relationship of force to distortion of an elastic body BEHAVIORAL SCIENCE Hiring - exhibit capacity to ascertain personal qualities; to accurately reflect environment and job expectations Professionalism - maintain capacity to foster trust and cooperation; to cope with conflict behavior; to generate integrity; to function capacity to function efficiently when encountering fast changing, multiple, personal or situational variables Supervision - maintain customer's illusion of privacy by avoiding excessive noise or movement; grant appropriate regard for customer's unique needs; communicate pride in establishment Attributes of maximum functioning capacity (see Appendix A)	Basic arithmetic skills and concepts Reduction of fractions Ratio and proportion Properties of the real number system - commutative, associative and distributive Measurement: geometric - linear Knowledge of geometric relationships [parallel] Geometric constructions [perpendicular to lines] Deductive/inductive logic

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Book	Comprehension, instructions–process report
Viewing	Inspection, checking	Visual analysis, memory, logic, detail/inference

(TASK STATEMENT) APPLY EXTERIOR TRIM

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Standard tool kit Scaffolding Fasteners Trim for windows, doors, corners	Layout trim Mitercut ends, trim corners Position trim Secure trim	SAFETY Hard hat, safety shoes, safety glasses, gloves
DECISIONS Determine if existing doors and windows are square Determine how much to trim off corner pieces Determine how to hit a stud when nailing	**CUES** Square fits window - no light showing Test nails by striking stud	**ERRORS** Misread structure detail plan

(TASK STATEMENT) APPLY EXTERIOR TRIM

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage [hammer] Work input, work output, friction and efficiency in simple machines [size of hammer] Relationship of force to distortion in an elastic body Resistance of materials to change in shape [bending nail] BEHAVIORAL SCIENCE Hiring - exhibit capacity to ascertain personal qualities; to foster trust; to accurately reflect plant environment and job expectations Professionalism - Maintain capacity to foster trust and cooperation; to generate integrity; to cope with conflict behavior; exhibit qualities of self-confidence, self-control, self-reliance, self-respect and adaptability Supervision - maintain customer's illusion of privacy by avoiding excessive noise or movement; grant appropriate regard for customer's unique needs; exhibit capacity to ascertain best service for the particular request Attributes of maximum functioning capacity (see Appendix A)	Use of numbers (without calculation) - counting, ordering Fundamental operations (calculation) - addition algorithm [rule] Fractions Ratio and proportion Basic measurement skills and concepts Measure sense/role of unit Instrument - tape Measurement: geometric - linear [feet, inches] Read and interpret tables, charts and graphs [scale drawing] Knowledge of geometric relationships - parallel Deductive/inductive logic

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Viewing	Inspect, measure, select (miter)	Visual analysis, memory retention, logic, detail/inference, recognition of symbols, codes and emblems, movement
Touching	Plan reading	Discrimination of size and shape

(TASK STATEMENT) HANG NEW GUTTERS AND DOWNSPOUT (ALUMINUM)

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Standard tool kit Scaffolding Electric drill and bit Gutter Ferrule Spike Connectors End caps Starting collar Downspout	Layout pitch Mark with chalk line Nail first length of gutter Drill and insert large spike and ferrule Put on connector Pop rivot Continue until job is finished to specifications	SAFETY Hard hat Safety glasses Hard soled shoes Gloves HAZARD Falling objects Flying objects from drilling or hammering Tripping on debris Sharp edges
DECISIONS Determine slant needed Determine whether to preserve the styling	**CUES** Length to be traversed Drop possible, yet still look good	**ERRORS** Sag in gutter Too long a span

(TASK STATEMENT) HANG NEW GUTTERS AND DOWNSPOUT (ALUMINUM)

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage [hacksaw, pop rivot gun] Centrifugal forces developed by bodies in rotation [drill] Work input, work output, friction and efficiency in simple machines BEHAVIORAL SCIENCE Hiring - exhibit capacity to ascertain personal qualities; to foster trust; to accurately reflect plant environment and job expectations Professionalism - maintain capacity to foster trust and cooperation; to generate integrity; to cope with conflict behavior; to function efficiently when encountering fast changing, multiple, personal or situational variables; exhibit qualities of self-confidence, self-control, self-reliance, self-respect and adaptability Supervision (see Appendix A) Attributes of maximum functioning capacity (see Appendix A)	Set of real numbers [all rational numbers] Fundamental operations (calculation) - addition, subtraction, multiplication and division algorithms, and order of operations, i.e., use of parentheses in simplifying arithmetic expressions Basic measurement skills and concepts Measure sense/role of unit Measurement: geometric - linear Knowledge of geometric relationships - symmetry, congruence, similarity, parallel, perpendicular, skew Deductive/inductive logic

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Plan	Comprehension, process report-instructions
Listening	Electric drill (when hole is finished)	Noise discrimination
Viewing	Overview	Visual analysis, memory, logic, detail, recognition of symbols, codes and emblems
Touching	Drilling, nailing	Depth, movement, shape

(TASK STATEMENT) PAINT EXTERIOR

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Scaffolding Paint brushes Scrapers Ladder (steps and extension) Sealer Paint	Prepare surface [caulking, etc.] Seal surface Apply paint evenly Clean tools immediately after finishing	SAFETY Hard hat Safety glasses Hard soled shoes Gloves HAZARD Falling objects Paint in eyes Step on debris Skin disease from paint Ladder slipping
DECISIONS Determine type wood and its condition Determine type paint desired	**CUES** Open joints Open to weather	**ERRORS** Wood bleeds Nails are not sunk

TASK STATEMENT) PAINT EXTERIOR

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage [brush] Work input, output, friction and efficiency in simple machines BEHAVIORAL SCIENCE Hiring - exhibit capacity to ascertain personal qualities (skills, knowledge, character, flexibility, learning capacity); to foster trust; to accurately reflect plant environment and job expectations Professionalism - maintain capacity to foster trust, confidentiality, cooperation; to generate integrity; to cope with conflict behavior; to function efficiently when encountering fast changing, multiplie, personal or situational variables; exhibit qualities of self-confidence, self-control, self-reliance, self-respect and adatability Supervision - grant appropriate regard for customer's unique needs; communicate pride in establishment Attributes of maximum functioning capacity (see Appendix A)	Set of real numbers [all rational numbers] Fundamental operations (calculation) - addition, subtraction, multiplication and division algorithms, and order of operations, i.e., use of parentheses in simplifying arithmetic expressions Basic measurement skills and concepts Instruments [tape] Measurement: geometric - linear, area (square feet) [for figuring paint coverage]

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading	Paint label	Comprehension, detail/inference, instructions
Viewing	Painting	Visual analysis, memory, logic, color discrimination

Duty B Reroofing House

1 Remove old roofing
2 Inspect and replace roof boards
3 Put on building paper
4 Flash edges, valleys, and chimney areas
5 Lay shingles (self-sealing)

24

(TASK STATEMENT) REMOVE OLD ROOFING

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Standard tool kit	Begin at the top (cap) using small nailpuller and screwdriver, remove cap shingles Remove shingles systematically row by row from the top Clean the roof surface of nails, or any upward protrusions	SAFETY Ladder safety: Check condition of ladder Set bottom out at least ¼ of the ladder length and tie it off Should extend at least 2 inches beyond need Safety-general: Wear soft-soled shoes Be careful near edges Keep walking area clear of debris Do not go near the edge HAZARD Hard soles slip easily on the incline Cracks in ladders, often become breaks under vibration and stress

DECISIONS	CUES	ERRORS
Determine method of collecting old shingles until able to haul them away	Condition of shingles	Littering of surrounding area

TASK STATEMENT) REMOVE OLD ROOFING

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage [wrecking bar, small nail puller and screwdriver] Work input, output, friction and efficiency in simple machines BEHAVIORAL SCIENCE Professionalism - exhibit qualities of self-confidence, self-reliance, self-control, self-respect, adatability Supervision - maintain customer's illusion of privacy by avoiding excessive noise or movement; communicate pride in establishment All attributes of maximum functioning capacity Conscious awareness of the need for a balance (both physical and mental) between tension and relaxation Conscious awareness of physical expressions basic to peak physical performance Conscious awareness of qualities basic to optimal mental performance	Set of real numbers [all rational numbers] Use of numbers (without calculations) - counting, coordinate system, ordering, indexing, coding, ratio, measurement, recording Fundamental operations (calculations) addition, subtraction multiplication, division algorithm, and order of operations, i.e. use of parentheses in simplifying arithmetic expressions Measurement: geometric - linear, square

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Viewing	Pattern of shingle	Visual analysis, logic, detail/inference

(TASK STATEMENT) INSPECT AND REPLACE ROOF BOARDS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Standard tool kit 1 x 12 inch sheathing boards	Visually distinguish rot or cracks Test for soundness by tapping Remove and replace bad members	SAFETY Gloves Soft soled shoes Carefully approach roof edge Keep path clear of nails HAZARD Burns and cuts Slipping Fall off roof, board breaks Step on a nail, puncture wound
DECISIONS Determine if the crack actually weakens the structure Determine if the member can be removed safely	**CUES** Plan indicates support wall Discoloration–indicating rot	**ERRORS** Surface appears solid, but is not Remove a crucial member without temporary support

(TASK STATEMENT) INSPECT AND REPLACE ROOF BOARDS

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage [hammer wrecking bar] Relationship of force to distortion in an elastic body Resistance of materials to change in shape BEHAVIORAL SCIENCE Hiring - exhibit capacity to accurately reflect plant environment and job expectations Professionalism - exhibit qualities of self-confidence, self-control, self-reliance, self-respect, and adaptability All attributes of maximum functioning capacity Conscious awareness of the need for a balance (both physical and mental) between tension and relaxation Conscious awareness of physical expressions basic to peak physical performance Conscious awareness of qualities basic to optimal mental performance	Set of real numbers [all rational numbers] Use of numbers (without calculations) - counting, ordering coordinate system, indexing, coding, ratio, measurement, recording Basic measurement Measure sense/role of unit Instruments - tape Measurement: geometric - linear

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Reading Viewing	House plan Inspection	Comprehension, detail, process report Visual analysis, memory, logic, color discrimination, recognition of code

(TASK STATEMENT) PUT ON BUILDING PAPER

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Standard tool kit Materials: roofing nails, roofing paper, tar	Clear boards of nails Install building paper 1 inch overhang Continue to peak 4 inch — overlap Tar edges of each strip Nail every 6 inches	SAFETY Ladder safety Soft shoes Gloves HAZARD Faulty ladders Falling off roof Burns from tar
DECISIONS Determine time	**CUES** Weather	**ERRORS** Chose wrong day – loss of time

ASK STATEMENT) PUT ON BUILDING PAPER

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage [hammer] Work input, output, friction and efficiency in simple machines BEHAVIORAL SCIENCE Exhibit qualities of self-confidence, self-reliance, self-respect, self-control and adaptability All attributes of maximum functioning capacity Conscious awareness of the need for a balance (both physical and mental) between tension and relaxation Conscious awareness of physical expressios basic to peak physical performance Conscious awareness of qualities basic to optimal mental performance	Set of real numbers [rational numbers] Use of numbers (without calculations) - counting, coordinate system, ordering, indexing, coding, ratio, measurement, recording Fundamental operations (calculation) - addition, subtraction, multiplication, and division algorithms, and order of operations, i.e., use of parentheses in expressions Rule of thumb Measure sense, tape measure

COMMUNICATIONS

Touching	Shingles	Depth, consistency, texture, movement

Duty C Enlarging A Room

1 Inspect supporting wall areas
2 Install temporary support
3 Remove old partition wall
4 Install new partition frame
5 Modify plumbing (copper)
6 Enlarge electrical capacity
7 Insulate the wall (batting)
8 Install wall covering (plaster board)
9 Paint

(TASK STATEMENT) INSPECT SUPPORTING WALL AREAS

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY -- HAZARD
Standard tool kit Blueprints (house plans)	Read house plan Revise house plan Inspect under structure Inspect over structure Formulate plans	SAFETY Hard hat Hard soled shoes Good light HAZARD Falling [through ceiling lathe] Tripping
DECISIONS	**CUES**	**ERRORS**
Determine cost Determine efficiency Determine risk to existing structure	Support areas General condition of structure Observations [plumbing, heating, wiring]	Mathematical error [setting]

TASK STATEMENT) INSPECT SUPPORTING WALL AREAS

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Composition of matter Inertia and momentum Resistance of materials to change in shape BEHAVIORAL SCIENCE Hiring - exhibit capacity to ascertain personal qualities (skills, knowledge, character, flexibility, learning capacity) Professionalism - maintain capacity to function efficiently when encountering fast changing, multiple, personal or situational variables Supervision - maintain customer's illusion of privacy by avoiding excessive noise and movement Attributes of maximum functioning capacity Conscious awareness of the need for a balance (both physi- and mental) between tension and relaxation; conscious awareness of physical expressions basic to peak physical performance; conscious awareness of qualities basic to optimal mental performance	Set of real numbers [all rational numbers] Use of numbers (without calculation) - counting, coordinate system, ordering, indexing, coding, ratio, measurement, recording Fundamental operations (calculation) - addition, subtraction, multiplication and division algorithms, and order of operations, i.e., use of parentheses in simplifying arithmetic expressions Reduction of fractions Ratio and proportion Rule of thumb Properties of the real number system - commutative, associative, distributive, identity of one, identity of zero, multiplication by zero, transitive, inverses-multiplicative and additive Measure sense/role of unit; instruments, precision/tolerance; measurement: geometric - linear and angular; read and interpret tables, charts and graphs [scale drawings] Basic logic - deductive/inductive, implications

41

(TASK STATEMENT) INSTALL NEW PARTITION FRAME

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Standard tool kit Two by four's	Pre-cut parts Position plates Position studs Position headers Secure Raise Secure to old walls	SAFETY Hard hat Safety glasses Gloves HAZARD Falling objects Metal or flying wood splinter

DECISIONS	CUES	ERRORS
Determine if partition is square Determine if partition is plumb	Check with level (vertical and horizontal)	Not thorough enough check

42

(TASK STATEMENT) INSTALL NEW PARTITION FRAME

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage [hammer, saw] Work input/output, friction and efficiency in simple machines Relationship of force to distortion in an elastic body Resistance of materials to change in shape BEHAVIORAL SCIENCE All attributes of maximum functioning capacity Conscious awareness of the need for a balance (both physical and mental) between tension and relaxation Conscious awareness of physical expressions basic to peak physical performance Conscious awareness of qualities basic to optimal mental performance	Set of real numbers [all rational numbers] Basic measurement skills and concepts Instrument: tape Measurement: geometric-linear Knowledge of geometric relationships - symmetry, parallel, perpendicular

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Viewing	Inspection	Visual analysis, memory, logic, detail/inference, recognize codes and symbols
Touching	Nailing	Size, shape, depth, movement

(TASK STATEMENT) MODIFY PLUMBING (COPPER)

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY - HAZARD
Standard tool kit Propane tank Modifying existing plumbing	Isolate system (closing strategic valves) Draw modified sketch Make cuts Sweat on fittings Continue to completion according to sketch	SAFETY Gloves Safety glasses HAZARD Burns Cuts

DECISIONS	CUES	ERRORS
Determine condition of existing plumbing Determine placement of new controls convenient to customers	Inspection - amount of deposits built up in tubing Have new plumbing, cabinetry available for measuring	One area not viewed has heavy deposits Breakdown in communications concerning new installation

TASK STATEMENT) MODIFY PLUMBING (COPPER)

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage [tubing cutter] Effects of heating and cooling on expansion of materials Composition of matter [copper] Transfer of heat from one body to another BEHAVIORAL SCIENCE (see Appendix A)	Set of real numbers [all rational numbers] Use of numbers (without calculation) - counting, coordinate system, ordering, indexing, coding, ratio, measurement, recording Fundamental operations (calculation) - addition, subtraction, multiplication, division algorithms and order of operations, i.e., use of parentheses in simplifying arithmetic expressions Reduction of fractions Measure sense/role of units Instruments - rule and tape Measurement: geometric - linear and area Basic logic - deductive/inductive Basic geometry skills and concepts (see Appendix B)

Duty D Adding A Room

1 Layout for addition
2 Dig for and build foundation forms
3 Pour concrete
4 Lay block foundation (crawl space)
5 Build subfloor
6 Put up shell (walls)
7 Install ceiling joists and roof rafters, sheathing
8 Extend heating ducts
9 Wire the structure
10 Install windows
11 Install plumbing
12 Install ceiling
13 Install floor, covering (kitchen carpeting)

54

(TASK STATEMENT) LAYOUT FOR ADDITION

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Standard tool kit Materials: stakes, string	Establish lot lines Consult code Square building - a. continuance of building line. b. diagonal method c. 6-8-10 method Set up batter boards Install lines on batter board Establish footer level on batter boards	SAFETY Safety glasses HAZARD Flying objects
DECISIONS	**CUES**	**ERRORS**
Determine if addition fits code Determine if the original structure is level and square	Checking structure level Checking overall measurement Spot checking inside and out for square	Siding is out, frame is square Mathematical error in computation

55

SCIENCE	MATH – NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage [sledge hammer] Resistance of materials to change in shape [stretching line] BEHAVIORAL SCIENCE (see Appendix A)	Set of real numbers [all rational numbers] Use of numbers (without calculation) - counting, coordinate system, ordering, indexing, coding, ratio, measurement, recording Fundamental operations (calculation) - addition, subtraction multiplication, and division algorithm. and order of operations, i.e., use of parentheses in simplifying arithmetic expressions Measure sense/role of units; instruments - rule and tape. Measurement: geometric - linear and area Geometric relationships - symmetry, congruence, similarity, parallel, perpendicular, skew Understanding and use of the Pythagorean theorem, based on the right triangle ($a^2 + b^2 = c^2$) Basic logic - deductive/inductive Reduction of fractions

(TASK STATEMENT) INSTALL FLOOR, COVERING (KITCHEN CARPETING)

TOOLS, EQUIPMENT, MATERIALS, OBJECTS ACTED UPON	PERFORMANCE KNOWLEDGE	SAFETY – HAZARD
Standard tool kit Carpet knife and mastic spreader Straight edge Materials: wood putty, ¾'' plywood 4' x 8', spiral nails, carpet (kitchen), mastic	Cut and secure plywood Fill cracks with putty Lay down carpet Rough cut carpet Roll back carpet Spread mastic 4' or 5' square Roll out carpet (position) Trim edges Roll back carpet (except center area) Apply mastic and roll out Roll over entire carpet in all directtions with a no. 50 roller	SAFETY Safety glasses General caution HAZARD Flying nail head Bumping head Cutting hands
DECISIONS	**CUES**	**ERRORS**
Determine room size, offsets	Inspection, measuring, memory of past experience	Cut off too much on rough cut

TASK STATEMENT) INSTALL FLOOR, FLOOR COVERING (KITCHEN CARPETING)

SCIENCE	MATH -- NUMBER SYSTEMS
PHYSICAL SCIENCE Simple machines used to gain mechanical advantage [hammer] Work input, work output, friction and efficiency in simple machines Resistance of material to change in shape [pressure on carpet knife, balde may break] BEHAVIORAL SCIENCE Hiring - exhibit capacity to ascertain personal qualities; to foster trust; to accurately reflect plant environment and job expectations Professionalism - maintain capacity to foster trust, confidentiality, cooperation; to generate integrity; to cope with conflict behavior; to function efficiently when encountering fast changing, multiple, personal or situational variables; exhibit qualities of self-confidence, self-control, self-reliance, self-respect and adaptability Supervision (see Appendix A) Attributes of maximum functioning capacity (see Appendix A)	Set of real numbers [all rational numbers] Use of numbers (without calculation) - counting, coordinate system, ordering, indexing, coding, ratio, measurement, recording Fundamental operations (calculation) - addition, subtraction, multiplication, division algorithms, and order of operations, i.e., use of parentheses in simplifying arithmetic expressions Reduction of fractions Measure sense/role of units Instruments - rule and tape Measurement: geometric - linear and area Basic logic - deductive/inductive

COMMUNICATIONS

PERFORMANCE MODES	EXAMPLES	SKILLS/CONCEPTS
Speaking	Discuss customer's wants to teamworkers	Clarity of expression, logic, gestures
Reading	Directions on mastic	Comprehension, detail/inference, informational reports, instructions
Listening	To customer, to teammate	Recognize opinions, concentration, logic
Viewing	General, inspection	Visual analysis, memory, describing, logic, detail/inference, color discrimination
Touching	On carpet (smoothing)	Texture, movement

APPENDIX A

HIRING

A. Exhibit capacity to ascertain personal qualities (skills, knowledge, character, flexibility, learning capacity)
B. Exhibit capacity to foster trust
C. Exhibit capacity to accurately reflect plant environment and job expectation

PROFESSIONALISM

A. Maintain capacity to foster trust
B. Maintain capacity to foster confidentiality
C. Maintain capacity to foster cooperation
D. Maintain capacity to generate integrity
E. Maintain capacity to cope with conflict behavior
F. Maintain capacity to function efficiently when encountering fast changing, multiple, personal or situational varibles
G. Exhibit qualites of self-confidence, self-control, self-reliance, self-respect, and adaptability

SUPERVISION

A. Distribute personnel with regard to leadership qualities and experiences for optimum team performance
B. Maintain customer's illusion of privacy by avoiding excessive noise or movement
C. Grant appropriate regard for customer's personal space (convenience and special interest)
D. Grant conscious attention to smoothly flowing team work
E. Maintain regard for differing views on maximum efficiency of the operations
F. Grant appropriate regard for customers unique needs
G. Exhibit capacity to ascertain best service for the particular party type requested
H. Show and describe facilities with appropriate speed and clarity
I. Communicate pride in establishment

APPENDIX A CONTINUED

ATTRIBUTES OF MAXIMUM FUNCTIONING CAPACITY

A. Conscious awareness of the need for a balance (both physical and mental) between tension and relaxation. Relates to: Comfort, Caution, Safety, and Physical, emotional, and intellectual health

B. Conscious awareness of physical expressions basic to peak physical performance: Body rhythm, Breathing coordinated with body movement, Body balance and posture, and Movement from tension to relaxation and vice versa

C. Conscious awareness of qualities basic to optimal mental performance: Attention, Observation, Concentration, Mental alertness, Mental quietude, Mental clarity, and Organization

APPENDIX B

BASIC GEOMETRY SKILLS AND CONCEPTS

1. Recognize and identify basic geometry figures, plane and solid
2. Knowledge of geometric relationships
   a. symmetry
   b. congruence
   c. similarity
   d. parallel
   e. perpendicular
   f. skew
3. Understanding and use of the Pythagorean theorem, based on the right triangle ($a^2 + b^2 = c^2$)
4. Determination of area and altitude of triangles
5. Determination of area, perimeter and diagonals of polygons with more than four sides
6. Determination of the area and circumference of circles
7. Use of arcs or chords in determining facts about a circle or its parts
8. Determination of the area of rings
9. Determination of facts involving sectors of a circle
10. Determination of area and perimeter of an ellipse
11. Determination of facts involving lines tangent to circles
12. Determination of area, perimeter and diagonals of quadrilaterals (4-sided figures)
13. Determination of area and volume of rectangular, cube and right triangular prisms
14. Determination of area and volume of cylinders
15. Determination of altitude, area and volume of a right circular cone
16. Determination of lateral area, total area and volume of frustums of pyramids and cones
17. Determination of the surface and volume of a spheres
18. Determination of the volume of a ring
19. Geometric constructions
