ABSTRACT

The booklet on home economics student and program evaluation presents a variety of measuring instruments for teachers in learning about students and assessing their academic growth. Brief. opening sections discuss the philosophy and objectives of evaluation, plans for evaluation programs, test construction, and construction of checklists or score cards, rating scales, and questionnaires. The majority of the booklet contains sample evaluation instruments with suggestions for their use in the following areas of home economics: child development, clothing and textiles, consumer education, foods and nutrition, family relationships, housing and home decorating, health of the family and home care of the sick, interpersonal relations, and occupational home economics. Suggestions for evaluating the total program cover the topics of general evaluation devices, Future Homemakers of America, home experiences, evaluating teaching and the program, and adult groups. A list of references includes books, pamphlets, and commercial evaluative instruments. (Author/JR)

Documents acquired by ERIC include many informal unpublished * materials not available from other sources. FOREWORD

The first edition of Evaluation in Home Economics was published by the Indiana Home Economics Association in 1942. The content of the original publication was compiled from materials collected and developed by the Evaluation Committee of the Indiana Home Economics Association. High school and college home economics teachers and leaders of adult groups sent evaluation instruments to the committee to be selected. This committee included: Louise Braxton, Marguerite Downing, Frances Eilar, Emily Huntting, Mildred Johnson, Chestina Williams, Ida B. Wilhite and Frances Schneider, chairman.

The 1957 edition was developed following a survey made by a special committee which pointed up the need for revising the booklet. The following committee was appointed to revise it: Frances Eilar, Alice McKeehan, and Pauline Stark, Phyllis Kinnison and Muriel McFarland as co-chairman. This the 1957 edition was developed.

The 1964 edition was the third edition of Evaluation in Home Economics, published by the Indiana Home Economics Association. Many persons contributed to the materials included in the 1964 edition. Graduate students in Education 650, Evaluation in Home Economics Education, Purdue University, developed some of the instruments and teachers tested most of them. The names of the authors of the various instruments are indicated in appropriate places throughout the booklet. Using these materials as a nucleus, the publication was revised and largely rewritten by Dr. Phyllis Kinnison Lowe, Associate Professor of Home Economics Education, Purdue University, and Mrs. Suzanne Field and Miss Muriel Sutherland, two graduate students working under her direction.

This is the fourth edition of <u>Evaluation</u> in <u>Home Economics</u>, published by the Indiana Home Economics Association. Most of the additional instruments were contributed by graduate students in Education 650, Evaluation in Home Economics Education, Purdue University. The current publication was revised by Mrs. Lucille Frick, Instructor of Home Economics Education, Purdue University.

The contents of this booklet were selected in terms of the current philosophy of evaluation. The authors have included suggestions for planning a program of evaluation, and a variety of instruments appropriate for evaluating to some degree the progress toward attainment of objectives in the several areas of home economics for junior and senior high school students, adults and out-of-school youth. The objectives at the top of each instrument are written in broad terms in some cases and in more specific, behavioral terms in other cases. In addition, instruments for evaluating the total program and teaching are provided. No one area has been treated comprehensively nor has any attempt been made to show all the possible uses for the evaluative instruments included.

References listed at the end of this booklet are highly recommended to readers who wish more information about current methods of evaluation. Also included is a list of available commercial instruments.

The contents of this booklet may be used in any way desired, either duplicated just as they are presented or changed to make them better fit the needs of the situation. The authors and the Indiana Home Economics Association hope that the booklet will be of value to teachers and other group leaders in planning and implementing a broad and varied program of evaluation in home economics.

PHILOSOPHY

The primary purpose of evaluation should be to promote the optimum development of the whole person. The chief function of evaluation should be to ascertain how the individual is growing and developing and to evaluate the adequacy of his educational environment. Possibilities of the future should be considered as well as what the individual is like now and why he is as he is. Not only what the pupil is doing with the school work should be evaluated, but also what the school program is doing to the pupil.

Evaluation involves a continual process of formulating goals, working to attain them, evaluating progress, and formulating new goals. This process can be likened to a continual circle, a constant process—never ending. It is an integral part of teaching and learning, and its instruments are tools or means of determining the extent to which educational objectives have been attained. Evaluation is a process which is perhaps utilized more continuously than we realize; however, it should be performed consciously and constructively.

It is desirable that a positive student attitude is encouraged and achieved to assist a natural evaluative process. The need for thorough evaluation is apparent in that home economics closely relates to interpersonal relationships and subject-matter area vital to living. As the influence of home economics extends itself, it is essential that evaluation be conducted effectively at college, high school, junior high school, out-of-school youth, and adult levels.

Educational leaders have learned to state goals and objectives clearly and precisely in terms of what is to be accomplished before attempting to plan their work. An important first step in evaluation is to use these objectives as guides in planning the means by which to determine the attainment of goals. There should follow mutual understanding by teachers and pupils of the characteristics associated with the goals and the behavior characteristics for each goal.

Evaluation for only part of the objectives is not enough. It should be comprehensive in that there is an assessment of growth toward knowledge, comprehension, application, analysis, synthesis, and evaluation. Other changes indicating attainment such as those of attitudes, interests, and skills which would assist in assessing the whole child should be measured, although results obtained from some instruments are not appropriate for assigning letter grades. Many different procedures and instruments should be used.

To be at its very best, evaluation should be a cooperative enterprise with everyone concerned - pupils, teachers, parents, administrators and others - contributing to the program. Together with the cooperative aspect, self-appraisal of progress makes for growth and self-direction. As pupils learn to compete with themselves rather than with others, they learn to positively judge their progress on the basis of their achievements rather than their failures. When an individual shares in the evaluation process, he becomes more aware of his needs and it follows that he understands his capabilities more. Self-evaluation promotes self-understanding. Participation in the evaluation process supplies the learner with intrinsic motivation. Motivation coming from within is more effective than extrinsic motivation.

If one of the purposes of evaluation is to serve as a basis for guiding and counseling pupils, then a variety of measuring instruments must be used to learn about the pupil and to assess his growth.

OBJECTIVES

the objectives of their curriculm. Many teachers use such familiar terminology for objectives In order to plan learning experiences and evaluation devices, teachers need to classify $oldsymbol{ec{\sim}}$ of standard classifications, of stating objectives, a taxonomy with three domains, has been developed to help teachers see the range and level of possible objectives. The cognitive domains, has been developed to help teachers see the range and level of possible objectives. ing, all intellectual skills. Two other parts of the taxonomy are the affective domain, inas + appreciation, recognition, understanding, knowledge, and the like. A more precise set he cognitive domain involves thinking, recalling, remembering, creating, and problem solvearning has not been completed in these two domains, they are important to home economics. difficult to describe and evaluate, and although the classification according to levels of volving changes in interest, attitude, appreciation, values and the like, and the psychonotor domain*, involving manipulative or notor skills. The latter two domains are more

Most curriculum development has taken place in the cognitive ective goals which are easily understood, fit the needs of the group, and are arranged in below, arranged in the sequential hierarchy. The chart shown is based on the Taxonomy of domain: When objectives are precisely defined, evaluation can also be done with greater B; using the three domains, the teacher can build curriculum with a wide range of ob-Objectives are based on the levels of learning are presented Education Objectives: Cognitive Domain, edited by Benjamin S. PLANNING THE EVALUATION PROGRAM-

The evaluation program should be one which measures the student's total learning gains and accomplishments and which is based on the planned objectives. The program, as an integral part of the learning experience, should be comprehensive and continuous, flexible yet well timed. There should be provision for self-evaluation, cooperatively planned; and finally the total evaluation program should be motivating and stimulating, leading to new objectives and new learning experiences.

The steps involved in planning the evaluation program include:

1. formulating objectives for the course

2. cooperatively planning class objectives

3. defining the outcomes of attaining each objective in terms of observable pupil behavior

4. planning fearning situations in which the behavior can be exhibited

5. devising means for evaluating the behavior and interpreting the results

Following is an over-all plan for one area of home economics at one grade level for evaluation showing pupil objectives, behaviors, situations in which the behavior can be observed and evaluative methods and instruments. This brief plan for child development illustrates the steps in evaluation, the progressive hierarchy of the cognitive domain, and certain areas of the affective domain.

TEST CONSTRUCTION

Paper and pencil tests are only a small part of evaluation, and if not carefully planned may not determine the learning that has taken place. Since constructing good tests is a difficult and time consuming job, some suggestions for test construct are included here. A teacher can save time as well as have better items if she includes, with each lesson she plans, test items that might be used later along with other means of evaluation from day to day.

An important beginning in test construction is the preparation of a grid or table of specifications, keeping the time spent on subject matter content in proportion with corresponding test items. Careful planning will aid in precise determination of the learning that has taken place. Following in condensed form are suggestions for the construction of better tests.

Planning a Test: The grid is part of planning a test.

The effective test is thoroughly planned. The purpose of the test should be kept clearly—in mind. Is the test to measure how well pupils have learned material studied? Is the purpose to rank pupils accurately according to their abilities? Is the test to diagnose the strength and weaknesses of individual pupils? 'Is the test to measure the creativity of the pupils?

If the test is to measure how well pupils have learned the material studied, the test should parallel the work in class and should not be too difficult. If the test is to rank pupils accurately according to their abilities, the test items should be on critical points of learning. Items on critical points of Yearning often require application of information, synethesizing data, comprehending implications. If the test is to measure creativity, tasks should be given so creativity can be exhibited, and the objective scoring method used.

The Grid -- From the objectives and/or the content for the test, the teacher can quickly and easily construct a grid or as some authors refer to it, a table of specifications in order to plan the test so that it is comprehensive and well balanced in its emphasis. In order to do this, the following steps indicate one way of building the grid.

Preparation of a Grid

- 1: List concepts to be tested (derived from objectives) in the first column.

 For Example: The concepts to be bested are:
 - a. knowledge and care children require.
 - comprehension of methods of guiding children in growth-physical, mental, social.
 - e. recognition of babysitting problems. 🛰 🖰
- 2. Figure the percentage of time that has been spent in Aass on each of the concepts listed, by figuring the number of days spent on each area divided by the total number of days spent on all concepts to be tested. (e.g. 33%, 40%, 27% in table below).

- 3. List the levels of objectives to be measured as they have been verbalized in the objectives. For example: from above sample we wish to measure knowledge, comprehension, and application.
- 4. On the basis of the total objectives included, figure the percentage of each kind of objective included in material to be tested. (e.g. 38%, 32%, 30% in table below). At this point the grid might look like this:

	Knowledge (38%)	Comprehensic (32%)	(30%)
Care Children require (33%)			
Guiding children in growth (40%)		. \	
Problems of bab sitting (27%)	* * *		
1 TOD LEMO OF SEC.			. 7

- 5. Make a rough copy of the test.
- 6. Figure the percentage of the items that measure each of the objectives. For example: Total of 60 test items, if 9 matching items measure knowledge of care children require, then 15% of the rough test would measure progress toward this objective. This procedure should be followed for all items on the test. In general, when properly constructed, constant alternatives and matching items measure knowledge and changing alternative items measure conprehension.

		Ca .		
	Knowledge (38%)	Comprehension (32%)	Application (30%)	Total
Care children require (33%)	15%	10%		25%
Guiding children in growth (40%)	10%	20%	· ·	<u> 30%</u>
Problems of baby sitting (27%)	10%	Marie Marie	35%	45%
Total	35%	30%	35%	· 100%

- 7. Compare the percentage of time spent in class on each concept with the percentage of the test used to measure each concept. If these percentages vary, the teacher should be able to justify the difference; for example: in the chart above although 40% of the time was spent on guiding children in growth, only 30% of the test was devoted to this concept. The teacher may rationalize that this is desirable since she had many other opportunities to evaluate this concept and thus does not need to spend as much of the test on it. The reverse might be true for the concept of babysitting. On the other hand, if the teacher cannot justify these differences then test items should be added or deleted.
- 8. Compare the percentage of objectives that were of different types with the percentage of the test that measures these objectives. If a difference cannot be justified, a change should be made in a similar manner as for step 7.

9. In light of the grid analysis made by the teacher, the test should be either revised, or reproduced and administered.

The following or tors should be considered when planning a test:

discrimination - A good test should cull the high achieving pupils from those who achieve at a low and average level.

objectivity - The test should be impersonal and free from personal bias. This can be achieved by providing an inflexible key, clear directions, and accurate scoring.

ease of administration and scoring - An inflexible key and mechanics that require as little writing by the pupils as possible makes for ease in administration and scoring.

comprehensiveness - Fair emphasis to all areas. This can be assured by the construction of a well-planned grid.

validity - Measure what it is supposed to measure.

Grid aids this.

reliability - Measures consistently what it does measure.

Suggestions for increasing reliability.

- Construct a long test that covers everything.
- 2. Construct a test that samples important aspects.
- 3. Include usually as a rule not more than three types of items.
- 4. Use 'cushions'. Place the easiest items first and then introduce more difficult items. Construct the majority of items to be of average difficulty.
- 5. Provide clear, concise directions.
- 6. Construct an inflexible key.
- 7. Plan and reproduce the test so that it is easily read.
- 8. Strive to include discriminating items.
- 9. Maintain a rigid time limit.
- Provide comfortable physical aspects in the testing situation.

Include only the number of items which can be completed by all or nearly all of the group during the class period.

As a guide for estimating length of test, allow approximately one minute of pupil time for four constant alternatives items, or three changing alternatives items, or two completion items.

Planning and constructing objective test items to measure progress toward different kinds of objectives does not complete the task of using the objective test. An equally if not more important aspect of the job is analyzing the results. Earlier, it is pointed out that the test should be discriminating. This can be fully ascertained only after the test has been constructed, administered and scored. Then an interpretation of the test results must be made.

Item Analysis - There are various ways in the current literature to analyze a test. The purpose of the procedure is to identify those items that discriminate between the pupils scoring high on the test and low scoring pupils as well as to identify those items of greater and lesser difficulty. As easy may to obtain this information for many teachers is as follows:

Score all of the tests and arrange them in rank order from highest score to lowest score.

Select the top one fourth and the bottom one fourth of the test

papers to analyze. Nothing is done with the middle half.

3. Tally the number of incorrect responses for the top fourth for each item and beside it tally the number of incorrect responses for the lowest fourth of each item.

4. Compute the percentage of each group that got the item right.

- 5. Average the upper and lower percentage to get the difficulty index. (upper one fourth plus lower one fourth divided by two)
- 6. Subtract the lower percentage from the upper percentage to get the discrimination index.
- 7. Interpret the results in terms of objectives

Interpreting the Results

Discrimination when an item is found to be discriminating, this means that it is an item that the best pupils get correct, but less able pupils probably miss. It can be readily seen, then that the teacher will want many good discriminating items on her test, but will probably not want more than about a third of her items to be of this discrimination because the test could be too frustrating to less able pupils if too great a percentage of the items were highly discriminating. If she finds reversals, she may perceive that the item was ambiguous and needs rewording or should not be used again in another test. If a history of each item is kept, before long any teacher can acquire much information regarding her stems and can develop a test that discriminates about to her liking. Thirty or more test papers should be acquired on a test before too much confidence is placed in the discriminating power of an item by the item analysis.

In general the discrimination index should not fall below 10-15%; however, the teacher should use judgment. Lower indexes may be justified at times.

Difficulty Obviously the greater the percent, the easier the item. teacher may notice here that a particular item is most difficult and also is highly discriminating, and she would expect only the very best pupils to do well on this item. On the other hand, she might find an item most difficult by non-discriminating and she would then expect most pupils to miss it, and may feel she needs work on this item before using it again. Some easy items are desirable to provide encouragement for all students; in contract some very difficult items are desirable to serve as a challenge to the better students.

In general the difficulty index should average about 50% and range

from about 20-80% in achievement tests. If low difficulty index and low discrimination index occur in one item, that item should be carefully studied.

Some cautions in using item analysis are:

- The value of an item is not directly proportional to either its difficulty level or its index of discrimination.
- Item analysis data are specific to the particular group and to the particular test on which obtained.
- Internal consistency data do not indicate validity of total test.
- If a test is speeded, item analysis data may be misleading.

P ↔1	Inflexible key, mech- anics that require as little writing as possible	Same as above	Same as above	
y	This type of item is abused more than others. Correctly stated items should about equal incorrect ones in number. Numerous variations available.	Correctly verbalized questions limit the possibility of guessing. Beginning stem of question or incomplete statement should be meaningful itself. Distractors should be plausible and could be obtained from completion type items, recall tests, class answers, common misconceptions. 4-5 distractors for each item. Letter the distractors and number the items.	There must be homogeneity for response alternatives and items to be matched. Reduce guessing chances by providing some distractors than items or vice-versa. Clear basis for matching. Number of response alternatives should not be more than 10-12. Distractors should be lettered and items numbered.	
	knowledge of facts	knowledge comprehension application analysis synthesis evaluation	knowledge of specifics recognition of relationships	
	B. SELECTION TYPE ITEMS 1. Constant alternatives (True, false items and variations)	2. Changing alternatives (Multiple choice items)	items. Two items. Two or more sets of items to be associate ed on some basis given in direct- ions	

SCORING REARRANGEMENT ITEMS

Many teachers find the scoring of a rearrangement item most difficult. If the number of parts to be rearranged is four or less, one point should be given for a correct answer. However, when more than four parts are to be arranged the following system is favored:

Record the correct order. e.g. Record the worst possible order			3 4			
Subtract the two	5	3	1	1	3	5
Square the differences	25	9	1	1	9	25
Subtract the pupil's order			-	-		
from the correct order	1	2	3	4	5	6
	2	1	4	3	5	<u>6</u> -
Square the differences	1	1	1	1		

Subtract this from squared difference of worst possible

25 9 1 1 9 25 1 1 1 1 0 0 24 8 0 0 9 25

This student then received 66 out of a possible 70. To reduce weighting this item too heavily, the square root of the score (in this case 66) can be used for a fair score.

CONSTRUCTING CHECKLISTS OR SCORE CARDS, RATING SCALES AND QUESTIONNAIRES

There are several instruments appropriate for evaluating pupil's achievement on performance tests and pupil's behavior, attitudes, values, interests, and personal characteristics. Check lists or score cards are often used to describe different levels of quality. Rating scales best show the gradations of quality and represent a continuum from the undesirable to the desirable. They are used often for pupil self-evaluation which stimulates superior achievement because of personal motivation and greater learning that takes place when students see immediate results of evaluation.

In order for rating devices to be the most useful, they should:

- (1) have clear directions with important phrases underlined.
- (2) have two or three levels describing objectively the quality or ability of a product.
- (3) use descriptive, concrete terms for each level. Carry one idea through each level.
- (4) provide for scoring of each individual item.
- (5) be of reasonable length. .
- (6) provide for rapid scoring, with space for each subscore in the right-hand margin and the total score in the lower right-hand margin.

Questionnaires are useful for collecting information when it is desirable to make an extensive sampling and when sources of information are not easily accessible to the teacher. Often times the terms check list and questionnaire are used interchangeably. Check lists usually require answers to be checked while questionnaires require replies written in some detail. The check list requires less space and more objective date.

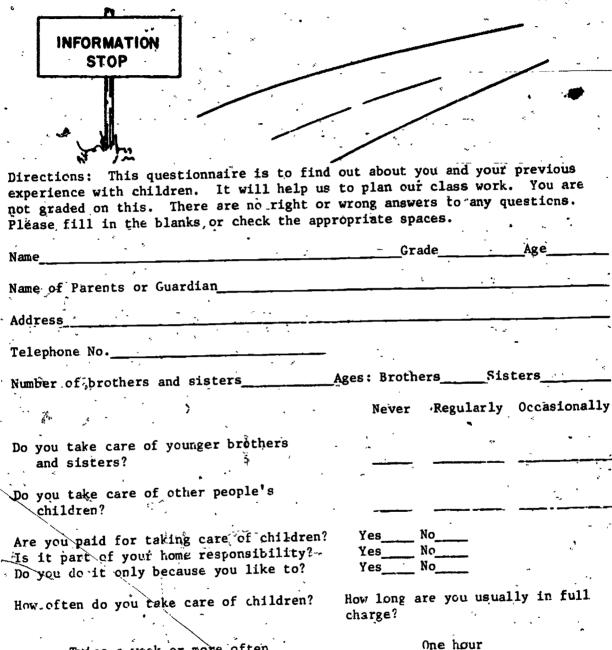

- Questionnaires and check lists can be made more effective in these ways:
- (1) the appearance should be attractive, with accurate typing, adequate margins, and spacing between sections.
- (2) the length of the questionnaire should be reasonable.
- (3) statements and questions must be clear and essily understood.
- (4) replies should be objective and recorded by checking or by quantitative terms, unless opinions are wanted. Even then, the teacher should write the questions which will get reactions to specific points, not vague generalizations. The more objective the replies are, the easier the paper will be to evaluate.
- (5) if replies are to be anonymous, provision should be made for including personal information; such as sex, age, and class.
- (6) written or verbal explanation explaining purpose and importance of opinions should precede the questionnaire.
- (7) all items should be numbered. Replies on check lists should be recorded in space in the same margin. Ample space should be provided for writing remarks, if this is desired.
- (8) plan for tabulating replies should be set up in advance. Organize like items together.

Child Development

Questionnaire « (Carolyn Penner)

Objective: Identifies and stimulates an interest in children.

Twice a week or more often Once a week. _Once a month _Only occasionally

Two hours Entire afternoon All evening All day

Explain why you take care of children.

-16-

Which of the following do you do when you take care of children? Make 2 checks for those which you do often. Make 1 check for those you do occastionally. Leave blank those you have never done.

Read stories	Play outdoors (swings, sand pile)
Tell stories	Get ready for bed
Listen to children tell stories	Dress child
Sing to children	Attend to toilet training
Do finger play	Prepare meals
Use clay, crayons	Play with group of children
Supply materials to play with dolls	Bathe child
Supply materials and play 'make	List others, please
believe', such as school, store	, · · · ·
	•

Go back and star (*) those you especially enjoy doing.

Instrument 2. Thematic Apperception Test (Catherine Cecil)

Objective: Identifies values and attitudes of students regarding parents' roles.

In the administration of a Thematic Apperception Test, a type of projective instrument, the subject is presented with a picture or series of pictures composed of people in various situations—in this case a picture of a man and a picture of a woman. The situation is not clearly defined and the subject is requested to tell or write a story about the picture.

The test is based on the theory that in the construction of the story about the ambiguous picture the subject will organize material from his personal experiences; partly the immediate perceptions of the picture and partly the associations to those perceptions selected from his concious and subconcious mind. Therefore it is possible for an interpreter to gain some insight into the attitudes and feelings of the subject. In analyzing the stories - does the person run away from his problems; fight them or try to deal with them? What seems to be his problems or what is important to him by virtue of his saying much about it or by his omission of the obvious?

-17-

THEMATIC APPERCEPTION TEST

Directions: Study the picture. Tell a story about the picture including these points:

- 1. What has led to the event in the picture?
- 2. Describe the situation at the present.
- 3. What are the feelings of the individuals involved?
- 4. How could the situation be improved?
- 5. What are the possible consequences which might arise from the situation?

Instrument 3. Observation Guide for Out-of-Class Experience (Wyolene Cody)

Objective: Comprehension of the various routines of children at different age levels:

Your Name _____ Date of observation _____

Directions: Observe a child in these routines: mealtime, toilet, resting,

dressing or undressing, and washing. Observation can be done
at home or other place. Answer the questions listed below.

- What evidence of independence did the child show in the routines observed? Give examples.
- 2. How did the adults help the child complete his routines with a happy attitude?
- 3. How did the adults help the child to assume responsibility for care of himself?
- 4. Was his clothing designed to help him become independent?
 - A. In which ways?
 - B. In which ways were they not?
- 5. How did the child accept rest or nap time?
 - A. How was the child prepared for resting?
 - B. What was the child's behavior during rest?
- 6. Describe the child's behavior at meal time.
 - A. Describe any evidences that the child liked or disliked the food.
 - B. What evidence of independence did you see?
 - C. What part of the meal time did he need help?
 - D. Why did he need adult help?
- 7. Comments and Questions.

Instrument 5. Matching Item on Play Materials

Objective: Knowledge of the contribution various play materials make to the child's development.

<u>Directions:</u> Different phases of a child's development are listed on the right and certain play materials are listed on the left. In the blank beside each play material write the letter corresponding to the development to which the play material contributes. The numbers tell you if more than one answer is needed.

ERIC

OBSERVATION GUIDE ON CHARACTERISTICS OF CHILDREN FROM 1 to 5 (Marilyn R. Moore)

Objective: Comprehension of characteristics, of children.

<u>Directions</u>: Observe an incident that took place in Play School, Nursery School, Kirdergarten, or other similar setting. Describe the situation in detail in writing. Indicate which of the following three categories the incident illustrates. (One incident may illustrate all three categories or you may need to describe three different incidents.)

I. Children enjoy:

- 1. Activity with motion
- 2. Using their feet and arms
- 3. Making noise
- 4. Making-believe
- 5. Imitating adults and animals
- 6. Repeating catchy phrases

II. From these activities, they:

- 1. Develop muscles
- 2. Develop coordination
- 3. Learn to get along with others
- 4. Learn to follow directions
- 5. Learn to play with others
- Learn to listen to adults and other children

III. An adult can help a child by:

- 1. Trying to understand him
 - 2. Playing with him '
 - 3. Giving simple directions in a friendly way not demanding
 - 4. Doing group activity with several children
 - 5. Having several interesting activities in mind
 - 6. Having necessary play equipment
 - 7. Talking to him seriously about subjects that he considers to be serious although we may not
 - 8. Keeping peace by helping to provide pleasant activity

Instrument 7. Essay Test (Justine Crum)

Objective: Comprehension of the needs of children of different ages.

You have been asked to baby sit-for the neighbor's three children from 5 o'clock to 12 o'clock in the evening. Their names and ages are: Debbie - 8 months, Tommy - 3 yrs., and Sharon * 5 yrs. Tommy has just recently broken his arm by falling from a treehouse. He is able to be out of bed and play.

Write out the things you think are important for you to know about babysitting for these particular children and tell why these are important. List at least three activities which you could have Tommy do so that he might enjoy himself.

Kev

5 pts. Time each eats

5 pts. Food each eats

5 pts. Bedtime and bed-clothing, pajamas, diapers, etc.

5.pts. Where parents are going. Phone number.

5 pts. Doctor's phone number.

5 pts. for each reason.

3 pts. for each activity.

OBSERVATION OF CHILDREN (Pat Derival)

Objective: Comprehension of the physical, emotional, and social development of children.

Directions: Observe different aged children in single and group play during noon and recess for three days. Record your observations on the sheet provided and then interpret this behavior in light of age, physical stature, emotions, and social behavior. Base these interpretations on your knowledge and readings. Some items you might look for are leadership, sociability, sharing, type play, and reactions to others. Be prepared to discuss ways adults may guide these children. Add more sheets as needed.

INTERPRETATION
Jane has not learned to shar
`
8

Suggestions for Use: This could be used as a means of evaluating each student's understanding of behavior of children. Another way of using this instrument is to use the observations as a basis for class discussion to further understanding.

SCORE CARD FOR THE SELECTION OF CHILDREN'S CLOTHING (Wyolene Cody)

Objective: Knowledge of factors to consider in selecting clothing.

<u>Directions</u>: Score the garment given to you by listing your score in the student's column. The highest possible scores are listed under the heading, perfect score. Use the numbers at the right.

HAVE YOU SELECTED THE BEST STORY FOR TELLING Checklist

Objective: Comprehension of factors to consider in selecting a story for telling.

Directions: Check your story by placing a check in the space for No or Yes.

- 1. Can the story be understood by children who are 3 or 4 yrs. old?
- 2. Do I thoroughly enjoy the plot and characters?
- 3. Is the story one that will not lose meaning when told without pictures?
- 4. Is the story one that will be improved by not using the book?
- 5. Is the story one that fits my personality and ability?
- 6. Can the story be easily adapted to telling without losing its charms
- 7. Will the story make the children happy?
- 8. Is the story of a length suited to the attention span of the children or can it be adapted?
- 9. Is the story one I can tell over and over without tiring of it?
- 10. Is it easy for me to visualize the action and characters?
- 11. Will the story teach a lesson?
- 12. Is the story a good choice?

RATING SCALE FOR EVALUATING STORY TELLERS

Objective: Application of principles of story telling.

Directions: A Rate the telling of the story according to the descriptions in the 3 columns. If you can't decide between the two descriptions, use the number between as the rating. Add the score.

			<u> </u>	•
	1 2	3 4	5 .,	Score
1.	No introduction or poor one.	Introduction was average in quality.	Good introduction established mood of story.	**
2.	A major part of the story sounded memorized.	Some parts sounded memorized.	Told was ily and conversationally.	ė
3.	Did not look at children much.	Looked at children only part of the time.	Looked directly at the children.	
4.	Poor posture	Average posture	Good posture .	
5.	Little variety of emotion shown.	Some variety of a	Voice showed good variety.	,
6.	Mumbling or over- precise pronuncia- tion much of the time.	Some words not clear Some words too clear		
7.		Little difference in amount of emphasis of words.	Important words receive proper em- phases.	1
8.	No gestures	Some gestures	Good use of gestures	,
9.	Story told too fast or too slowly	Tempo OK, but story	Tempo and length suited to children.	
10.	understandable or	Some words need ex- planation or para- phrasing	Unfamiliar words were explained adequately.	
11.	Children were not encouraged to participate	Children were encour aged to participate but didn't	Children participated	
12.	Many comments of children were - ignored.	Teller shows some skill in handling comments.	Children's comments * were used to add to the story.	

B. CLOTHING AND TEXTILES

ATTITUDE INVENTORY ON SEWING

Objective: Identifies students' interest, experiences, and needed guidance in sewing. (by teacher)

AT

ATTITUDE INVENTORY ON SEWING

PLEASE TELL ME

<u>Directions</u>: Please complete each of the following statements by writing the <u>first</u> thing that comes into your mind as you read the statement. If any of the statements do not apply to you, place an X in the space provided for writing the respnse.

1.	If I had my choice to sew or not to sew I would
ż.	I responded to the above statement as I did because
3.	When I sew at home my mother
4.	When I have sewn in home economics class before I have
	My sewing ability is
6.	The thing I enjoy doing most in sewing is
	The thing I least like to do when sewing is
8.	The article of clothing which I have enjoyed making the most was
9.	My sewing ability is
10 -	My wardrobe

Suggestions for Use: More space should be provided for each item. Select open-end statements that will provide information that you are interested in knowing about your students. This instrument can provide the teacher with insight into the experiences of her students with sewing and give indications of guidance that may be needed. Names may be placed on the paper if individual responses are preferred rather than broad, over-all class responses.

PERFORMANCE TEST FOR FOUR METHODS OF MARKING FABRIC (Phyllis Kramer)

Objective: Application of the principles of marking fabric

<u>Student Directions</u>: You will need the following equipment:

tracing wheel shears tracing paper needle

tailor's chalk 12" ruler contrasting thread pins

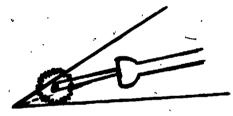

Teacher Directions: Tear as many pieces of 8" x 11" muslin samples as students. Prepare a bodice front with 4 darts as illustrated.

Score each student's markings on the checklist below.

Cut out the pattern piece attached to this sheet and pin it to your square of fabric furnished by the teacher. Be sure that the sample of fabric is grain perfect. Cut out the sample bodies piece. Before removing pattern, mark the darts as follows: #1 with tracing wheel; #2 with tailor tacks; #3 with chalk; #4 with the clipping method as demonstrated by the teacher. When you have finished marking all the darts, score your sample on the attached checklist. Then attach your sample to the checklist and put it on the teacher's desk.

SCORE CARD FOR FOUR METHODS OF MARKING FABRIC (Sherry Peck)

Directions: Place a check in the appropriate column for each procedure listed below. Score as follows: 8-9 yes, excellent; 6-7 yes, good; 4-5 yes, fair.

		TUDE	NT_	1	EAC	HER
	PROCEDURE	No	Yes		lo_	Yes
#1.	Dart is marked clearly with straight lines and no stray marks.			ŀ		
_ `_	Point of dart is clearly defined	<u> </u>				
#2.	Dart has at least 5 tailor tacks which are directly on the lines and across from each other			٠	•	,
	Point of dart is clearly marked	<u> </u>				·
#3.	Dart has straight chalk lines and no stray marks					
	Point of dart is clearly defined	<u> </u>				
#4.	Dart has 1/4" clips on edge of fabric directly on pattern lines					
	Point of dart marked accurately with straight					
A11	darts are marked on wrong side of fabric			.[

FABRIC AND PATTERN PREPARATION, LAYOUT, AND CUTTING CHECKLIST (Ita Richardson) cutting Objective: Knowledge of factors to complete before cutting fabric. layout WATCH YOUR STEP!! pattern preparation . fabric 4 preparation Directions: Place a check in the appropriate column. If you answer any question "no", correct the item so you can answer it "yes" before you. proceed with the next section. Indicate such corrections in the COMMENT Column. Make additional comments to clarify your answers also. COMMENTS PREPARATION OF FABRIC 1. Is the fabric shrinkage free? 2. Is the fabric grain perfect?_ 3. Are the ends even? 4. Are the right sides folded together? PREPARATION OF PATTERN 5. Have I selected the pattern pieces Is my name on all pattern pieces, instruction sheet and envelope?_ Is my pattern pressed? 8. Have I made the needed alterations? LAYOUT OF PATTERN 9. Have I circled the appropriate layout on the instruction sheet? 10. Have I followed the correct layout? 11. Are the pattern pieces placed on grain? Are the pieces placed on the fold when necessary? If napped fabric is used, are the pieces placed with top of the garment in one direction? 14. Have I saved fabric by placing the pieces close together? 15. Are the pins perpendicular to the cutting edge and diagonal in the corners? Is the pattern pinned securely? HAVE THE TEACHER CHECK THE ABOVE BEFORE CUTTING STOP Did I use long smooth strokes with 17. the shears? Did I cut notches outward from seamline? 18.

ERIC

Did I cut with the grain when possible?

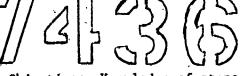

STEPS IN CONSTRUCTION AND SETTING IN SLEEVES TEST (Diane Azpell)

2831315

LET'S GET

SOME

ORDER HERE!

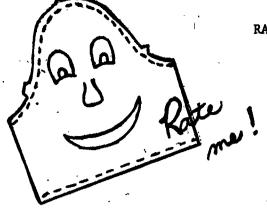

Objective: Knowledge of steps in construction and setting in sleeves.

Directions: Below are listed the steps in the construction of and the

<u>Directions</u>: Below are listed the steps in the construction of and the joining of set in sleeves. Read through the steps carefully and then place them in the proper order from 1 to 13 writing 1 in the blank space provided to the left of the step that would be first in the procedure. Proceed step by step until all are numbered.

	Turn bodice wrong side out and sleeve right side out
	Pin sleeve in place in armhole
	Press sleeve using sleeve board and pressing hem
1	Machine stitch at $1/2^{11}$ across the lower edge of armhole sea between notches
*	Pull up gathering threads so sleeve fits armhole
	Construct underarm seams
	Machine stitch sleeve into armhole
<u> </u>	Edge finish armhole seams
	Pin sleeve to armhole, matching notches and underarm seam
	Sew two rows of machine gathering stitches
	Test sleeve for fit and easing of gathers
·	Baste armhole seam

Scoring may be done according to the procedure on page 13.

RATING SCALE ON SLEEVES (Diane Azpell)

Objective: Evaluation of sleeve construction

Directions: Rate your sleeves according to the descriptions in the three columns below. If you feel that they fall between the columns, use the numbers 2 or 4 as your rating. Place your rating in the appropriate column to the right.

5

Student Teacher

<u>.</u>				
Sleeve is placed too far forward or back; does not fit naturally	Sleeve pulls around armhole; curved seam fits irregularly	Curved seam fits smoothly		· ·
Sleeve seam width zig zags back and forth across seam line	Sleeve seam width is straighter but is still uneven	Sleeve seam width is an even 5/8"		•
Sleeves have sev- eral large tucks at top of sleeve cap	Sleeves have small gathers at cap	Sleeves are free from tucks and gathers	*	
Sleeve is not double stitched at bottom of armhole and is not trimmed	Sleeve is double stitched but not trimmed	Sleeve is double stitched and trimmed to correct width		
Hem depth is too deep or too narrow for garment	Hem depth is cor- rect but is uneven	Hem depth is correct and even		
Hand stitches show on right side	Hand stitches are visible and in- visible on right side	Hand stitches are invisible on right side		
Sleeve is not pressed		Sleeve is pressed using sleeve board and pressing ham	3	
Underarm seams do not match; seams not pressed open	Underarm seams do not match, but seams are pressed open	Underarm seams do match; seams are pressed open	,	

Scoring; If you scored:

35 - 40 Sleeves look nice!

30 - 34 Sleeves look okay but could be improved

25 - 29 I think I need come work!

NAME THAT FABRIC BINGO GAME (Wanda Buck)

Objective: Knowledge of fabric names

<u>Directions</u>: This is to be played like <u>Bingo</u>. As a fabric is shown, students write the correct name of the fabric in the square corresponding with the letter and number called. Fabrics to be chosen should be those representing those used in their projects as well as interfacings. The first person to have all the squares filled correctly vertically, horizontally, or diagonally is the winner. Points could be given for each fabric correctly identified.

CLOTHING TERMS CROSSWORD PUZZLE (Mary Alice Nebold)

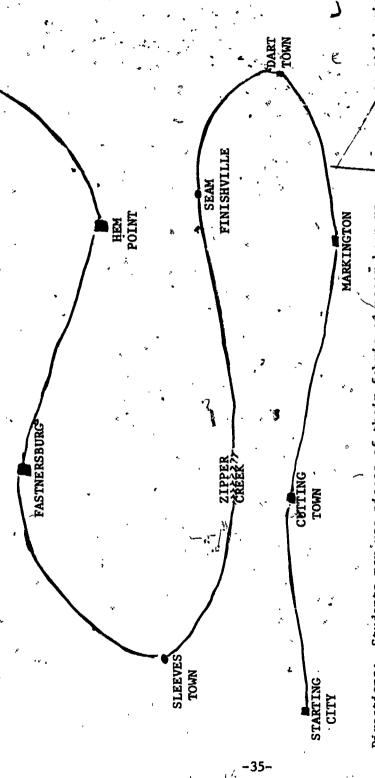

Objective: Knowledge of clothing terms.	
Directions: Place the terms used in clothing in the proper blanks at the right. The definitions are given below:	
Y - Process used to keep the pieces of a garment from stretching	U
0 - Waist portion of pattern	
U - A fold in fabric, stitched at an even distance from the edge	
R - Fraying of the threads in the fabric along unfinished edge	4611
C - A piece of fabric used to finish edges of the garment at neckline and armseye	
L - The two finished lengthwise edges on woven fabric	
0 - The crosswise, or filling, threads of a fabric	
T - A fold in fabric usually stitched to a point at one end	
H - A way of controlling fullness in a garment by pulling	
basting threads	'
selvage is parallel to crosswise threads	-
N - Apfanish on a woven fabric which gives an "up and down"	
G - Lengthwise and crosswise threads run at right angles	
	▗▗▗▗▗▗▗▗ ▗ ▗ ▗▄▘ ▘ ▄╏▀▐▀▀▀▀
T - Cut outward marks for matching	
E - Stitching used to mark or hold two pieces of Cabric to-	
gether until permanent stitching is done R - Lengthwise threads of a fabric	· []- -
M - 5/8 inch allowed for joining two pieces of fabric; distance between the cubting edge and seamline	
Detween the cooring edge and securities	
S - Lock-stitching	,
P - A fold in the fabric to add or control fullness and decorate	•
garment	•
U - Sanforized	
Z - Free	7 · ▼ · · · · · · · · · · · · · · · · ·
Z Free 7	<u>, e</u>
L - Uncut edge of fabric formed when two selvages are put togeth	jer
E - Process of smoothing with grain, seams, darts, and other par	rts .
E - Process of smoothing water	* *
of garment	· · · · · · · · · · · · · · · · · · ·

ROAD TO SUCCESSVILLE (Bulletin hoard or Poster)
Progress chart

SUCCESSVILLE

Objective: Identifies own progress toward completion of project

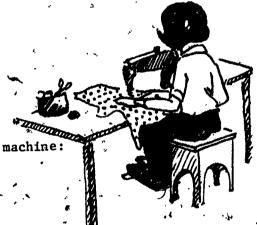

on stick pins Directions: Students may use pieces of their fabric of paper banners to record their progress toward completion.

Adapted from Patricia Wenzel

Instrument 10. Performance Test

Objective: Application of principles of how to thread and operate sewing machine.

Suggestions for use: When the following requirements for operating the sewing machine are met, the Sewing Machine Operator's License may be issued to the pupil. It would be desirable to list the requirements on the back of the license.

Requirements for operating the sewing machine:

- 1. Naming parts of the machine.
- '2. Winding bobbin.
- 3. Threading the machine.
- 4. Inreading the bobbin.
- 5. Bringing up the bobbin thread.
- 6. Regulating the stitch.
- 7. Stitching straight line using guide.
- 8. Tying threads at end and start of stitching in three ways:
 - a. Hand tying.
 - b. Machine knotting.
 - c. Back stitching.

5. Keep my personal supplies and books in the space	1			Γ_1	1	I
provided?		\perp	1	Ш	┙	
6. Keep my work on the table when sewing?		$oldsymbol{\perp}$	L	Ш	┙	
7. Have all my equipment and supplies for sewing?		┢	\perp	Ц	┙	┙
8. Keep my sewing supplies in order?		4	┸	Ц	┙	
9. Have good posture while working?		4	1	Ц	\sqcup	4
10. Do my housekeeping assignment?		4	4	Ш	┙	_
1. At the close of the period care for:		4	1	Ц	ᅵ	┙
a. my machine and supplies?		\bot	4	Ц	Ц	_
b. my work space?		4	\bot	Ц	4	싵
c. my storage space?		丄	L	Ш		┙

Suggestions for use: After reading resource materials and discussing personal experiences, the class and teacher may develop a checklist on laboratory techniques and habits similar to the one above. This instrument is especially useful for large classes where individual supervision is limited. It may be useful for evaluation at intervals as needed.

CREDIT CHECKLIST (Judy A. Knauer)

Objective: Differentiales between advantages and disadvantages of credit

OR

Credit Card 2 845379 455209

Alin house

Directions: Read each of the statements below. If it describes an advantage of using credit, place a check (V) in the "A" column. If a disadvantage of credit is described, check the "D" column. If it depends on other factors not given, check the "DF" column.

1. Products may be used while the consumer is paying for them

2. Credit costs the consumer

3. Shoppers need not carry large amounts of money

4. Credit encourages buying more than one can afford

5. Credit causes heavy indebtedness

6. Small loan companies charge higher credit rates than banks

7. Agencies have formed to protect the consumer

8. Borrowing helps one to establish a credit rating

9. Consumers can have items that they would otherwise have

10. Impulsive buying may be encouraged

to do without

Draw Conclusions: "Is credit good or bad?"

ADVERTISING PROBLEM (Judy A. Knauer)

Objective: Distinguishes between factual and emotional advertising information

<u>Directions</u>: Below you will see the wording from several newspaper ads. Read each one carefully. <u>Circle</u> the words or phrases which are intended to have emotional appeal. <u>Underline</u> the words or phrases which give helpful information about the product or service.

- 1 7 Corduroy coat and dress ensemble just the ticket for the fall football games! Also ideal for the gal on campus or in the office. Autumn brown or green. Sizes 5 13 \$80.00.
- 8 20 Notice! Solid Vinyl Siding will-last a life-time. It does not peel. It does not dent. Never needs paint: Easy to clean, Safe from fire. It does not mar. Stays beautiful. Insulates against cold or heat. Muffles outside noises.
- 21-25 Socially speaking . . . living at (Name) says something for you, and by comparison its cost is so reasonable. Limited selection of new apartments with balcony overlooking the river. Superb kitchen featuring (Name) appliances.

"IS THE COST OF CREDIT A PUZZLE?" (Martha Nall)

Objective: Knowledge of the cost of credit

<u>Directions</u>: Fnclosed in the envelope are eight puzzle pieces. On the back of five of the pieces are reasons for credit costing so much. Three other pieces have <u>false</u> reasons. Draw a puzzle piece and if it is one of the five correct reasons place it with the others to solve the puzzle.

<u>Suggestions for use</u>: Prepare several sets of puzzles for the class to use in group work; each group could then develop a generalization incorporating the principles indicated in the puzzle.

Correct reasons for credit costs

QUOTABLE QUOTES (Martha Nal1)

Objective: Responds verbally or in writing to values in the use of credit

Directions: The following statements are quotes from different sources. The teacher could write them on the board, on a transparency, etc., and have the students react to them orally or in writing. Others could be added.

- "Credit has done a thousand times more to enrich mankind than all the gold mines in the world." Daniel Webster /
- "Credit serves those who don't need it and haunts those who do."
 Country Parson
- 3. "Neither a borrower nor a lender be." Unknown
- 4. "It isn't difficult to buy on time; it's that paying on time...."
 Unknown

BANKS AS A SOURCE OF CREDIT
Study Guide for use with a Resource Person
(Martha Nall)

Objective: Knowledge of credit terminology

<u>Directions</u>: Instruct the students that a guest speaker from the local bank will speak to the class tomorrow. The questions below will be answered during his talk; complete the study guide for the day following the speakers talk.

1.	What is the current interest rate?
	Who may borrow?
3.	Is collateral needed?
4.	If collateral is needed what types of things may be used?
	How much money could be borrowed?
	Are references needed?
7.	How does a bank differ from a credit union as a lending institution?
8.	Does the bank want to know how the money will be spent?
	If so, why?

SHOP FOR CREDIT STUDY GUIDE (Vivian Summeier)

Objective: Comprehension of sources of credit. Directions: Select a product with a value of at least \$400.00. Visit four different sources of credit in the community. Compare the credit arrangements poss-Product ible in paying for this product. Answer the questions at the bottom of this page. Cash Price SOURCE CREDIT LENGTH REPAYMENT CONDITIONS RATE OF DOLLAR OF LGAN ARRANGEMENT CHARGE OF CREDIT INTEREST COST OF CREDIT Questions: Which sources provides the lowest DOLLAR cost of credit? Which sources have loans available for specific purposes only? What relationships exist between the following conditions and loans? a. size of loap risk of loan c. collateral required

-49-

length of repayment

Instrument 8. Objective Test, Items

Objective: Knowledge of different kinds of credit.

<u>Directions</u>: Place the letter of the kind of credit that best fits the description given in the blank at the left. The letters may be used more than once.

•	Description of Credit	Kin	ds of Credit
1.	The cheapest for a cf credit.	A. (Cash loans
2,	Carries no extra charge on goods.	В.	Charge accounts
3.	Requires a down payment.	c.	Installment buying
	Balance is paid in regular payments.		
5.	Goods purchased are not legally yours until all payments are completed.		
6.	A form of convenience to the customer.		· X
7.	Secured from bank or private loan agencies	3.	÷

THEMATIC APPERCEPTION TEST (Pat Zwaagstra)

Objective: Describe, in writing, your feelings about the pictures below.

<u>Directions</u>: Write below a story about this picture. Try to include what brought the situation about, what is happening, how the persons involved feel and what will probably result.

<u>Suggestions for use</u>: Refer to page 16 for further explanation of the TAT: instrument. The teacher might use additional pictures selected to suit specifically the class objectives.

12.	Amount of credit advanced
13.	Add one to number of payments
14.	Multiply line 12 times line 13
15'.	Annual interest rate (divide line 11 by line 14)

CONSUMER PROBLEM (Judy A. Knauer)

Objective: Knowledge of installment buying

<u>Directions</u>: Tom and Bea have selected a sofa for their new apartment. The cost is \$300.00. Since they were recently married, their savings have gone for "setting up housekeeping". They will have to finance their purchase economically; what would you recommend? Select the best choice of the three plans suggested by placing the letter of the choice in the blank to the left... Then, from the list below, check (*) those statements which are true and would influence your decision.

- Installment buying would require a down payment of \$100.00 and monthly payments of \$12. for 18 months. A \$10.00 service charge would be added.
- B. A charge account would require no downpayment. Credit charges are made on unpaid balance after 30 days. Monthly payments would be \$30. Total credit charge would be \$12.00.

Borrowing from a small loan company at an advertised rate of 9% is one possibility. They would make 18 monthly payments of \$20.46.

	2.	The plan I selected is the least expensive.
	3.	Tom's salary influenced my decision to a large extent.
	4.	The payment plan that I selected extends over the longest period of time.
	5.	The true interest rate is often higher than the stated rate of interest.
	6:	Tom and Bea probably could not make a down payment at this time.
	7.	Tom and Bea would hold title to the sofa while they were paying for it if they choose to use the installment plan.
	8.	Borrowing from independent loan companies is the most expensive of the three methods given.
	9.	Tom and Bea would not have use of the sofa until it was paid for if they purchased it on open-charge account.
<u> </u>	ιο.	There is no charge for the type of credit you have selected for Tom and Bea to use.

Draw conclusions about the wise use of buying on credit. 🕟

TESTS FOR CONSUMER KNOWLEDGE (Sara Porter)

Objective: Knowledge of Federal Trade Commission Directions: Below are statements concerning the power and responsibilities of the Federal Trade Commission. Place a (4) in the blanks to the left if the statement is true; place a (0) in the blank if the statement is false. 1. Has responsibility for encorcing the Wool Products Labeling Act. 2. Keeps the public informed as to current schemes being used by unscrupulous businesses. Can prosecute furniture retailers for removing manufacturers' labels which disclose information of construction. Cannot act on behalf of an individual consumer. _ 5. Responsible for enforcing Kennedy's Consumer Bill of Rights. Responsible for the enforcement of the Textiles Labeling Act. Can prosecute businesses for deceptive practices in situations in _ 7. intrastate commerce. 8. Does not actively participate in consumer education programs. Can stop deceptive selling but cannot stop the offenders from collecting debts. Objective: Knowledge of consumer education problems Directions: Answer each problem by placing a check (V) in either the Yes or the No column. Problems <u>Yes</u> No A woman received a trinket in the mail with a request for a \$1.00 donation. Must she mail the donation or return the trinket? A customer signed a contract that the salesman insisted upon. Can the Better Business Bureau help her cancel the contract? Company B claimed that their salve would cure cancer of the skin. Can the Food and Drug Administration prosecute the business firm? A salesman said, "The Better Business Bureau recommended my company." Is this true? Mrs. X called a TV repairman but before he arrived her husband made the repair. When the repairman arrived she sent him away. Does she have to pay for the service call? A cler, in a store tried to sell you a gadget that would develop your bustline. Should this be reported to the Food and Drug Administration rather than to the Better Business Bureau? The salesman wrote "As Is" on a sales slip for a used car he sold to Mr. Y. Two days later Mr. Y discovered the car needed

extensive repairs. Can Mr. Y force the dealer to either make

the repairs or take the car back?

MEAL PREPARATION PROBLEM TEST (Eleanor Lord)

Objective: Plans a nutritional meal with specified food items.

CAN SUSAN D 0 I T ?

Directions: Susan's mother called and said she would be late from work. She told Susan to prepare supper for the family using the left-over pork roast in the refrigerator and whatever else she could find. Susan has one hour and fifteen minutes until supper time.

Left-over pork Rice Canned tomatoes Cream of mushroom soup Lettuce Unbaked refrigerator cookies

Following are the foods that Susan found: Canned green beans Canned peach halves Box of gelatin dessert Staples

I. Plan a good menu for the family using the foods. (Note: you cannot use any food other than those listed including staple items.)

II. State three reasons why the menu you inned did or did not make good use of the left-over pork. Support your statements.

> HOW DID YOU SOLVE SUSAN'S PROBLEM? Score card

Directions: The following score card will be used to evaluate how much help you were to Susan. Read before you solve de problem.

		Point	s Score
1.	Is the menu nutritionally balanced?	5	
2.	Is the menu form correct?	3 /	
3.	Are there three reasons stated for use of	pork? 9	and the same of th
4.	Are the reasons soundly supported?	9	
5.	Is the spelling and grammar correct?	2

Comments:

NUTRIENT BINGO GAME (Kathryn Van Fleet)

Objective: Knowledge of, food nutrients.

Directions: The teacher will ask questions about nutrients. If you find an answer on your card, cover the square with a piece of the construction paper provided to you. When you get five answers in a straight line (vertically, horizontally, or diagonally) say, "Bingo".

Amino Acids	Vitamin A	Iron	Vitamin E	Calcium
Vitamin '	Thiamine	Sugar `	Iodine	Starch
Cellulose	Water	FREE	Riboflavin	Niacin
Carotene	Vitamin C	Tryptophan	Vitamin B	Fluorine
Vitamin D	Folic Acid	Phosphorus	· Fat	Oxalic Acid

Suggestion to the teacher: The "Bingo" directions and blank card could be duplicated as above. The nutrients can then be written in the blanks, making each card with a different order, so students will not "Bingo" at the same time. Prepare questions on cards so that they may be shuffled and drawn at random.

MEETING YOUR HEALTH PROBLEMS ESSAY (Ruth E. Sproat)

- I. List the foods in each meal which should be eliminated?
- II. List the foods in each meal which should be eaten in only small servings.
- III. Plan a nutritious snack which will help Jane feel satisfied and maintain a well balanced menu without adding many calories.

Crossword Puzzle (Betty Rice)

Objective: Knowledge of tood terminology.

Directions: Place THE PROPER WORDS IN THEIR PLACES AND THE PUZZLE WILL BE COMPLETE. The words are common terms used in foods. The definitions are *given on this page. Write them into the puzzle on the next page. The key is the underlined word in each case and should be omitted when given to the

ACROSS

- 1. Scallop To bake food, usually cut in pieces, with a sauce or other liquid. The top is commonly covered with crumbs, and the food and sauce are arranged in alternate layers with or without crumbs between layers. A baking dish is used.
 - 2. Dough A mixture of liquids and dry ingredients stiff enough to knead.
 - Beverage A drink such a coffee, tea, cocoa, etc.
 - 4. AuGratin A scalloped dish made with cheese.
- 5. Toss To mix by lifting with two forks or a fork and a spoon- to mix together without crushing the ingredients.
- 6. Marinate To season by soaking in French dressing, or to make tender by soaking in a solution of vinegar, spices and water (meats)..
- 7. Cream To work one or more foods until soft and creamy by using a spoon or other implement. Usually applied to combining shortening and sugar in place of blend.
- Melt To change from solid to liquid by using heat.
- Steaming To cook above water; to cook in live steam.
- Drain To remove liquid from food.
- Broil To cook directly over or under the direct flame.
- Pare To remove outside covering. 12.
- Panfry To cook in a small amount of fat in a frying pan.

DOWN

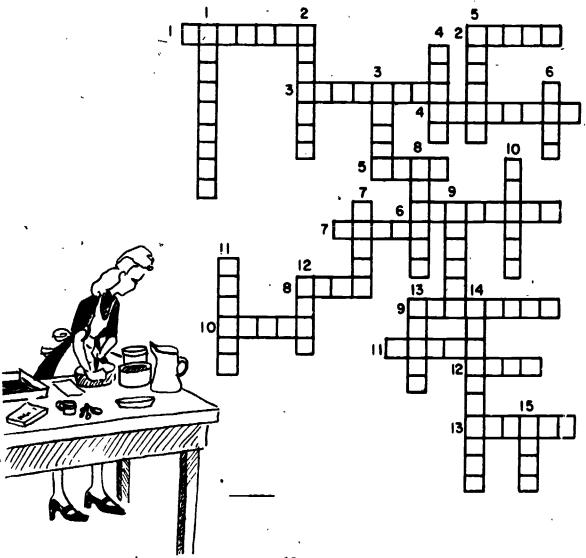

- Casserole A combination of foods, usually with cream sauce, baked in 1. an earthenware, glass or metal dish.
- Parboil To boil until partly done or half done.
- 3. Roast To cook over direct flame, or to cook in dry heat, as in oven, in an uncovered pan.
 - Knead A method of mixing dough by stretching and folding.
 - Dredge To coa with flour.
 - Sift To pass through a sieve as with flour.
- Frost To cover cake or cookies with icing.
- Simmer To cook slowly just below the boiling point on top of the stove.

-68-

- 9. Recipe Direction for mixing foods.
- 10. Braise To brown in fat, then cook in a small amount of liquid in a covered vessel.
- 11. <u>Curdle</u> A change in milk in which solids of the milk separate from the watery part. When cooked at too hot a temperature custard may do this.
- 12. Menu A list of foods for a meal.
- 13. Shred To cut or slice paper thin in strips.
- 14. All Purpose Flour that may be used for making any baked product.
- 15. <u>Fold</u> To turn over and over lightly so as not to force air out of the mixture. It can be done with a spoon, or by operating an egg beater or mixer very slowly.

Performance Test With Score Cards (Alice Lutkus)

Objective: Comprehension of levels of quality in canned goods.

This will also serve as a self-evaluation device.

Score Card 1:

Identification and comparison of grades of canned and frozen products. Before the test, the instructor measures the product with USDA grade standards. After the students examine and taste the product, they will score and assign a grade to it. The instructor then reports the actual grades and the class discusses the USDA grade standards.

Dessert Peach Halves	Color	Uniformity	No. per 10 can	Absence of Defects	Texture	Flavor	My Score	My Grade	My Grade
x	-

	The habits I need to develop are:				•	
	<u>-</u>					
_	·	<u> </u>				

Suggestions for use: This instrument would be ideally used by the pupil for self-evoluation at the conclusion of a laboratory period. It could also be used by the teacher or, in part, by another pupil if a pupil evaluator is designated. It is important that it be used on the day of the laboratory in order to make correct judgments.

Performance Test on Family Meals

Objective: Ability to apply knowledge of how to plan, prepare and serve well-balanced meals to the family with efficient use of time and within a limited cost allowance.

Suggestions for use: May be used as a pre-test and/or as an achievement test at end of the unit.

<u>Directions</u>: From the foods on the supply table (or in unit kitchen) prepare a low cost lunch. Two girls prepare for four.

Foods on table might include:

Potatoes	Can of green beans	Whole wheat bread	American cheese
Lettuce	Can of pineapple	White bread	Instant pudding
Carrots	Can of peaches	Cottage cheese	Soda crackers
Cabbage	Can of tomatoes	Peanut butter	Macaroni
Eggs	Can of tuna fish	Butter	Noodles
Milk	Can of milk	Mayonnaise	Tea bags

Give the other two girls a score card for the meal or give one a score card and ask the other to keep a record of unnecessary steps and motions. Summarize in the space below.

Score as follows: 3 = Could not be improved, 2 = less than half needs improvement, $1 \neq m$ more than half needs improvement.

	Score Card for Family Meal	Score	Record of Unnecessary Steps and Motions

TOTAL

Test of Creative Ability*

Objective: Synthesis of knowledge of family relationships in solving problems.
Creativity can be measured in the area of family relations. The following
test has 5 parts. One example is given for each of the five parts. The teacher
would need to add about four additional items for each part.
Name Date
Age Education (circle one) 8 9 10 11 12 13 14 15 16 17 1
<u>Directions</u> : On the inside pages there are 5 parts of a test of creative ability.
You will take the test one part at a time beginning when the examiner gives the
signal and stopping when the examiner says 'Stop'! The length of time allowed
will be found at the top of the page where that part of the test begins. Pace
yourself so that you have enough time to try all of the problems in each part.
DO NOT SPEND ALL OF YOUR TIME ON ONE OR TWO PROBLEMS!
If you should be writing when the signal to stop is given, time will be allowed
for you to complete the item upon which you are working.
DO NOT TURN THIS PAGE UNTIL THE EXAMINER GIVES THE SIGNAL.
PART I. 20 Minutes Q X U X V
Below are listed five situations which might occur in a family setting. After
each situation, please indicate as many possible consequences as you can. You
can supply any information or details that you wish. In other words, you are
to think of all the things that might happen as a result of the situation. To

MATRIMONY QUOTATIONS Problems (Lois j. Holmgren)

Objective: Comprehension of problems involved in marriage

<u>Directions</u>: The following quotations are bits of wisdom written as advice to married couples. Following each quotation write (in your own words) what you think the author is trying to say. Give an example in each case of how this advice could be meaningful in certain situations in a marriage.

George Ade has a precious bit of philosophy of marriage in his <u>Fable of Slang</u>, in which he says, "If one embarks on the sea of matrimony, he should not jump overboard in the first squall. Storms come and waves are higher, perhaps than we expected, but good seamanship conquers."

Rev. Rasmussen, minister of the church, read this short poem in his sermon entitled, "Building a Happy Marriage":

"Be to her virtues very kind Be to her faults a little blind"

Answer the next questions as indicated:

A young man said, "I want a girl who is good-looking, a good dancer, and a good swimmer." In contrast to this statement, Oliver Goldsmith said he chose his wife as she chose her wedding dress--for qualities that would wear well. With which of these statements do you agree? Give your reasons.

Mr. Wood, in his book, <u>Making A Home</u>, lists ten points for a successful marriage. The tenth one states: "Take God into your homemaking plan". List the ways that God can become a part in the plans.

"As the home goes, so goes the world." Do you believe this statement? Why or why not?

CHILDREN'S BEHAVIOR INDICATE ADJUSTMENT Checklist (Rita Jane Atkinson)

Objective: Discriminates between well or poorly adjusted behavior of children

<u>Directions</u>: By merely observing children's behavior we can often determine whether they are well adjusted or not. Webster defines adjustment as the "establishing of satisfactory relationships." Mark with a (/) in the yes column those behaviors which indicate a well adjusted child; mark with a (/) in the no column those behaviors which indicate a poorly adjusted child.

No Yes

1. Complains that he "never gets a square deal." 2. ives in the present rather than in the past: 3. Enjoys doing things and is not afraid to show his enjoyment. 4. Has some bad hours and some bad days, but his over all attitude is optimistic. 5. May become angry when other children get gifts or compliments. 6. Cooperates well in most group activities. 7. May express jealousy at the success of others. 8. May feel things are done especially to cause him trouble. 9. Recognizes unfair treatment and stands up for his own rights. 10. Defends an individual idea or belief, even if it conflicts with the ideas of those whose approval he wants. 11. Accepts without question other people's evaluation of himself. 12. Tries to get out of doing things because he feels that others can do them so much better. 13. May enjoy causing embarressment or pain to others. 14. Is not afraid to ask for help when he feels he needs it.		• • • • • • • • • • • • • • • • • • • •
3. Enjoys doing things and is not afraid to show his enjoyment. 4. Has some bad hours and some bad days, but his over all attitude is optimistic. 5. sacrificing his own.	15.	

DO GOOD PARENTS PROVIDE A GOOD HOME FOR THEIR CHILDREN? Essay Test (Lois J. Holmgren)

Objective: Knowlege of qualities of parents for providing a good home.

Directions: From the following list of statements choose five that you think most important. Write an incident about a child in the home to illustrate each statement you choose.

- 1. He is loved and wanted -- and he knows it.
- 2. He is helped to grow up by not having too much or too 1 ttle done for him.
- 3. He has some time and some space of his own.
- 4. He is part of the family, has fun with the family, and belongs to it.
- 5. His early mistakes and "badness" are understood as a normal part of growing up; he is corrected without being hurt, shamed, or confused.
- 6. His growing skills -- walking, Lalking, reading, making things -- are enjoyed and respected.
- 7. He plans with the family and is given real ways to help and feel needed throughout childhood.
- 8. He has freedom that fits his age and his needs; he has responsibilities that fit his age, abilities and freedom.
- 9. He can say what he feels and talk things out without being afraid or ashamed; he can learn through his mistakes as well as successes, and his parents appreciate his successes rathan than dwell on his failures.
- 10. As he grows older, he knows his parents are doing the best they can; they know the same about him.
- 11. He feels his parents care as much about him as they do about his brothers and sisters.
- 12. His family sticks together and the members help one another.
- 13. He is moderately and consistently disciplined from infancy, has limits set for his behavior, and is helped to take increasing responsibility for his actions.
- 14. He has something to believe in and work for because his parents have lived their ideals and religious faith.

F. HOUSING AND HOME DECORATING Rating Scale (Marilyn Moore)

Objective: Evaluation of a floor plan making judgments in terms of external . criteria.

Suggestions for use: This rating scale was designed to use as a guide for evaluating various floor plans. The statements should serve as an objective means of arriving at a final score.

Directions: Score the house plan according to the descriptions in the three

columns. If you feel rating. Add your sco	res.			,1

Instrument 5. Performance Test With Score Card (Marilyn Moore)

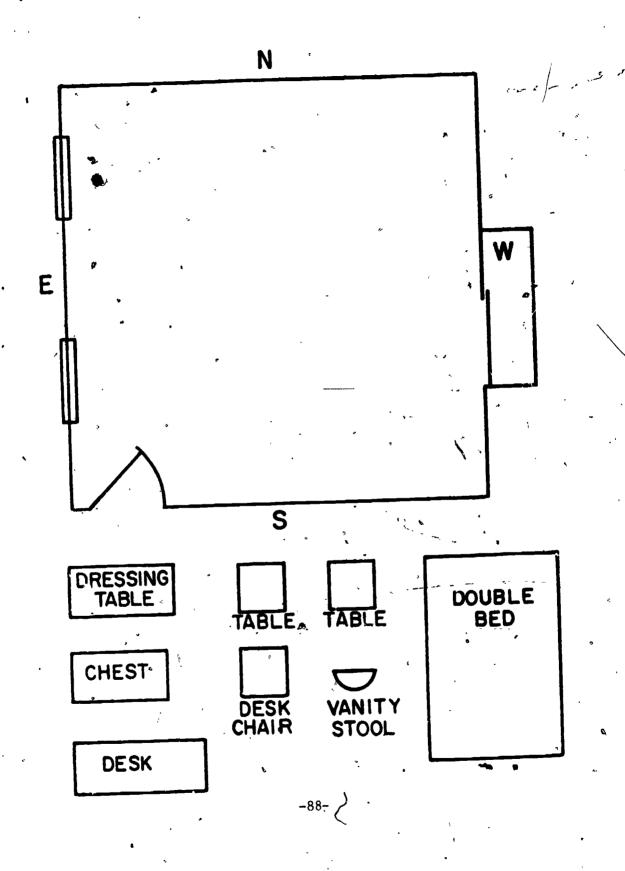

Objective: Application of knowledge of how to arrange furniture for the best use of space and natural lighting as well as for convenience for family members.

Suggestions for use: This test may be used as a pre-test or as a test at the end of a unit on furniture arrangement. Each student should be provided with scissors and glue. The score card is to be used by the teacher.

<u>Directions</u>: Cut out furniture pieces, and place them on the drawing of the room. When you have them arranged as you think they should be, glue them to the paper.

UPHOLSTERY FABRIC PROBLEM TEST (Judy A. Knauer)

Objective: Knowledge of upholstery fabrics.

<u>Directions</u>: Attached are two samples of upholstery fabrics. Give brief answers to the following questions based on these fabrics and weaves in general.

Attach fabric sample here

*Attach fabric sample here

SAMPLE B

- 1. Which of the samples is the more luxurious?
- 2. In general, is a tight; closely woven fabric more or less durable than a loosely woven fabric?
- ____ 3. What type of weave is used in Sample A?
- ____ 4. What type of weave is used in Sample B?
- ______5. Which/sample would probably be more durable?
- 6. Which of the samples would you expect to be more expensive?
- ______7. What characteristic of the satin weave makes it less durable than most other weaves?
 - __ 8. Which of the above samples would be easier to keep clean?
 - 9. Name a fabric finish which might alter a characteristic with which a weave is usually associated, such as resistance to soil.
 - 10. Which sample would be more practical for a family with children.

TEST ON JOINTS USED IN FURNITURE CONSTRUCTION

Objective: Knowledge of furniture construction terms.

<u>Directions:</u> Study the diagrams of joints on the right. Place the corresponding letter of the correct diagram in the space at the left of its name.

NAME OF JOINTS

1. Dovetail
2. Doweled
3. Butt
4. Rebated
5. Mortise and Tenon
6. Tongue and Groove

CROSSWORD PUZZLE ON SELECTION AND PURCHASING OF HOME FURNISHINGS (Judy A. Knauer),

Objective: Knowledge of terms used in the selection and purchasing of home furnishings.

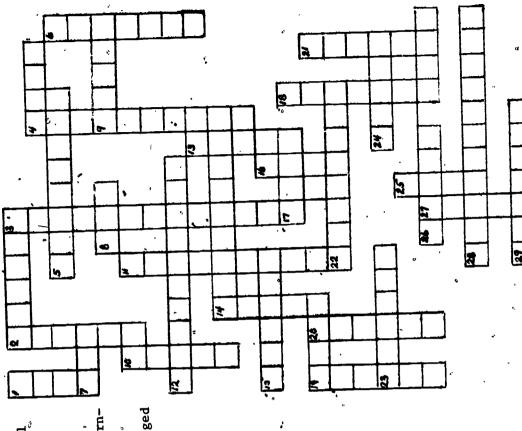

Directions: Follow the clues given below and you will be able to complete this puzzle. The missing words are related to our study of the selection and purchasing of home furnishings.

ACROSS

- 2. Buy now; pay later
- Spiral springs
- From leaf bearing trees
- Damage
 - Stain
- Leather-like
- Fabric covering Topic of puzzle
- Sofas and davenports
- Furniture made of wood Twelve, o'clock
 - Interlocking joint Rubbed wood finish
 - Related pieces of
 - furmiture
- Stain repellant finish Styles from past years Various styles of 28. 26.

furniture

- Common cushioning material Reddish toned wood
- Style made by colonial settlers (two words)
- Materials for stuffing furn-Flat, arched springs
 - iture
- Artifically antiqued or aged Natural wood texture Light colored wood . 10.
 - Hardwood skeleton of. furniture 14.
- Major concern in buying 16.
 - Cording 18.
- Floor covering 19.
- Hardwood sliced thin and Love seat laminated
 - Used in construction of furniture.
- A seat for one

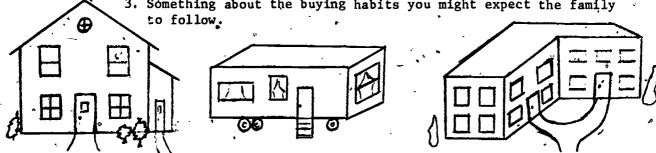

STYLE OF HOME ESSAY TEST (Judy A. Knauer)

Objective: Comprehension of factors to consider in selecting the style of home.

Directions: . Below are three styles of homes and brief descriptions of the families who occupy them. From the information given, tell:

- 1. In what kind of activities would you expect the family to participate?
- 2. What type of furnishings would you expect the families to have?
- 3. Something about the buying habits you might expect the family

Mr. and Mrs. Bowman live in & suburban area. Mr. Bowman is a civil engineer employed by the city. Mrs. Bowman works part time as a bank teller. They have three children, ages 3, 6, and 8. They are buying their home.

Mr. and Mrs. Carroll are both students at the University. They are renting a mobile home. Mr. Carroll works part time at a service station. Mrs. Carroll works several hours a week at the library. They have no children.

C. Mr. and Mrs. Brown just set up housekeeping in their apartment home. Laura works as a clerk at a downtown department store. Tim has just been released from service and is working at the telephone company. They have no children.

G. Health of the Family and Home Care of the Sick

Instrument 1. Performance Test

Objective: Application of various nursing procedures necessary for the sick at home.

Situations for use: These performance tests might be used near the end of the unit as a means of self evaluation, class evaluation, or teacher evaluation. Slips of paper would be prepared in advance on which assignments of nursing procedures would be listed. These might include such things as:

- a. Bathing the patient in bed.
- b. Assisting the patient to sit up in bed.
- c. Providing a back rest with pillows or other improvised equipment.
- d. Filling a hot water bottle and placing it on the abdomen of the patien:.
- e. Taking the temperature of the patient.
- f. Arranging an attractive tray for an invalid.
- g. Selecting and arranging the contents for a medicine cabinet.
- h. Making the bed with the patient in it.

The teacher would have all necessary supplies ready and each pupil or small groups of pupils would 'draw' the assignment, assemble the equipment and supplies and present the demonstration with explanations of the procedures. The teacher and other class members would observe the demonstrations and evaluate the performance using an instrument such as the following:

Subject of demonstration				`
Pupil(s) giving demonstration				
Date *				
. ,		•	•	
i. Old files.	Yes	No	Evidences	
1. Assemble all necessary supplies and	1	1		
equipment before starting?	<u></u>	L		
2. Use good posture at all times?	<u></u>			
3. Work in an efficient manner avoiding		1	•	
unnecessary steps and excess motions	1			
4. Follow the method set up in class	1	1 1	•	
for this procedure?		1		
5. Show consideration for the patient	1	1 1		
at all times?	<u> </u>			
6. Observe safety precautions?	ľ			

Constant Alternatives (Mary Lou Buck)

LET'S SEE WHAT YOU KNOW ABOUT FIRST AID

	Name	Class My Score
	Date	Possible Score 4
	ments. If blank at in the blank	This part consists of true and false state— f the statement is correct, place a in the the left; if the statement is false place a 0 ank. Explain why you marked the statement as The first one is done correctly.
	<u>+</u> la.	Milk is given in case of poisoning to cause vomiting.
	•	Reason: Milk coats the lining of the stomach to
	``.	prevent damage to the tissue.
	1-2	Only a small percent of all accidents occur in the home. Reason:
	3-4	A tourniquet should be used as a last choice in case of severe bleeding. Reason:
	7-8	Headaches, pale face, and high temperature, are symptoms of a sunstroke. Reason:
	9-10	Burns are classified according to the depth which the body tissue is injured. Reason:
N. S.	11-12	There is greater danger of infection from a puncture wound than from other types of wounds. Reason:

Instrument 5. Creative Problem - Improvements (Muriel Sutherland)

A ten year old boy is recuperating from a broken shoulder and must stay in bed for two weeks. List all of the possibilities you can think of for making this boy's room more comfortable for the boy and his family during this time.

CHECKLIST FOR RECOGNIZING SYMPTOMS OF ILLNESS (Janet Roush)

Objective: Recognizes symptoms of illness.

<u>Directions</u>: Below is a list of symptoms or signs of illness. If the patient possesses the symptom check (/) in the "yes" column if the patient does not possess the symptom check (/) the "no" column. For each symptom checked "yes", describe the condition in the space provided at the right.

Yes	Йo	SYMPTOM .	DESCRIPTION .
		1. General Appearance - poor posture, unusual movements, slurred speech, incoherent sentences	
		2. Face - unusual facial expression, flushed or pale color	
,		 Skin - changes in color, texture, dryness, moisture, reddened areas, rash, sores, itching, swelling, cold-to-touch, hot- to-touch 	
		4. Eyes - dull, bright, discharging, puffy, red, sensitive.	
		5. Nose - Discharging, stopped up, sneezing, bleeding	,
	1.	6. Throat and Mouth - red, swollen, spotted, sore, bleeding, coughing, hoarseness	
	• • •	7. General Behavior - fatigue, irritability, upset, sleepiness, listlessness, crying	
		8. <u>Digestion</u> - no appetite, nausea, vomiting	<u> </u>
		9. Elimination - constipation or diarrhea, dark or blood-tinged stools, continued dark or blood-tinged urine, malodorous urine, frequency of urination, profuse sweating - especially at night	
	•	10. Temperature - above normal (when other signs or symptoms are present - 99.6 degrees by mouth indicates a fever); chills	
		11. Pain - note location, severity, time of onset	
		12. <u>Pulse and Respiration</u> - changes in rhythm, rate, volume	
	_′	13. Other symptoms - describe symptoms such as dizziness, headache	

H. INTERPERSONAL RELATIONS

ME, MYSELF, AND I Inventory About Self (Nelda Sollenberger)

Objective: Analyzes desirable and less desirable qualities about oneself.

<u>Directions</u>: Two incomplete sentences are given below with the opportunity to complete each statement in a number of different ways. Finish the statements as if you were writing to yourself, not to someone else. Do not worry about logic or importance, but write whatever comes to your mind. Move along rather quickly, jotting lown the first ideas that come to your mind.

I like myself because I am	,	I dislike myself because I am
1. 8	\int	1
2	•	2
3	•	3
4	,	4

Note to Teacher: Prepare a sheet with 20 blanks. Place a time limit so that students will be forced to think quickly and jot down those items that come to mild at first. Students could be asked to pick out those items that cannot be changed and those that could be changed. They could suggest ways of doing something about those items that they dislike that could be changed.

CHECKLIST ON FEELINGS (Deborah G. Nîxon)

Objective: Identifies own feelings

<u>Directions</u>: Read the following questions. Place a check (\checkmark) in the appropriate column. If the answer is <u>maybe</u> place a question mark (?) in the <u>Yes</u> column.

		No	Yes
1.	Do you get your feelings hurt at the slightest excuse?	T	T
2.	Do you cry over trifles?	+	+
	Do you try to be optimistic and happy?	-	
4.	Are you very shy and retiring?	<u> </u>	-
	Are you aggressive, constantly seeking attention?	+	
6.	Are you the "bossy" type?		<u> </u>
7.	Are you the arguing type?	-	
8.	Do you brag about your achievements and your possessions?	•	
9.	Do you compliment others on their successes?		
10.	Can you be a good loser?	+-	
	Is your sense of humor good enough to take a joke on yourself	[?	
12.	Are you a show-off?	-	
13	Do you control your temper?	-	
14.	Do you sympathize with other's problems?	+	
15.	Are you tolerant of other races and religions?	+	- ·
, 16.	Do you accept older people's judgments, realizing that experience is greater than yours?		
17.	Do you refrain from making alibis for yourself?	+	
18:	Are you reliable when you make promises?	•	
19.	Are you generous to other people with your possessions, your time, and in your thoughts?		c
20.	Are you honest in words and deeds?		
	Do you respect the property of others?	L_	

VALUES, GOALS, AND STANDARDS Forced Choice Value Test

Objective: Awareness of one's values.

Directions: Circle the number opposite the one statement in each pair which most appeals to you. You MUST choose one number in each pair.

1--to be reasonably sure about the future for myself and my family. 12--to do things well.

3--to have people think well of me.

5--to have as much freedom as possible to to do things I want to do.

11--to have as many good things as possible. 12--to do things well.

6--to do new and different things often 11--to have as many good things as possible.

7--to have friends.

10--to have things neat, orderly, and organized.

6--to do new and different things often.

8--to create an atmosphere that makes for satisfying family living.

3-to have people think well of me.

9--to do what is right according to my beliefs. .

8--to create an atmosphere that makes for satisfying family living.

10--to have things neat, orderly and organized.12--to do things well.

4--to do things for my family and others. 11--to have as many good things as possible

10--to have things neat, orderly and organized.

12--to do things well.

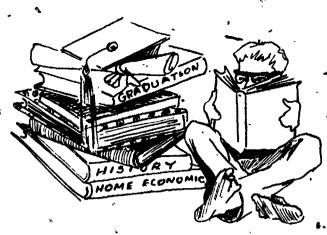

2--to have influence with people.

11--to have as many good things as possible.

4--to do things for my family and other's 10--to have things neat, orderly and or-

ganized.

2--to have influence with people 12--to do things well.

4--to do things for my family and others. 12--to do things well.

4--to do things for my family and others. 7--to have friends.

5--to have as much freedom as possible to do things I want to do.

8--to create an atmosphere that makes for satisfying family living.

2--to have influence with people

3--to have people think well of me.

7--to have friends.

8--to create an atmosphere that makes for satisfying family living.

5--to have as much freedom as possible to do things I want to do.

3--to have people think well of me.

11--to have as many good things as possible.

6--to do new and different things often.

12--to do things well.

9--to do what is right according to my beliefs.

12--to do things well.

1--to be reasonably sure about the future for myself and my family.

10 -- to have things neat, orderly, and organized.

- 3--to have people think well of me. 8--to create an atmosphere that makes for satisfying family living.
- 5--to have as much freedom as possible to do things I want to do.
- 6-to do new and different things often.
- 6--to do new and different things often 10--to have things neat, orderly and organized.

- 3--to have people think well of me.
- 5--to have as much freedom as possible
 - to do things I want to do.
- 9--to do what is right according to my beliefs.
- 1--to be reasonably sure about the future for myself and my family.
- 9--to do what is right according to my beliefs.
- 7--to have friends.
- 12--to do things well.

DIRECTIONS FOR SCORING THE FORCED CHOICE VALUES TEST

- 1. Count the number of times you circled number 1 on the Values Test and insert the number counted in the blank to the left of the statement number 1 below. Do this for each of the items through number 12.
- 2. Rank the items in the column to the right by assigning number one to the item that you circled the most times, number two the item circled the second highest number of times, et cetera. In case of a tie give the items all the same rank, but allow a full number count for each item. For example, if there is a tie on number 3, assign two number threes, which take up the three and four spots, making five the next rank.
- 3. When you have completed ranking, you may look at the key to the left of the ranking and determine the highest to lowest values. Example: If #10 is ranked 1, that means your highest value is "orderliness."

Be sure to check with your teacher if you have any questions on scoring or ranking.

No. of times			Statement		Rank

Objective: Knowledge of personal appearance and grooming habits

-QUESTION

Adapted from Co-Ed, September 1965.

How many of the grooming basics and keys to charm have you mastered? Test yourself by checking the answer that most closely describes you.

I. FIRST IMPRESSIONS OF YOU	II. GROOMING HABITS
1. My over-all appearance is:	6. My skin care routine is:
a. as good as possible on ordinary	a. based on good diet, enough sleep,
days as well as special occasion	and regular care of my skin.
b. usually good; but I could not	b. off-and-on (sometimes I forget to
face a camera every school day.	remove make-up at night).
c. generally in need of improvement	c. just once-a-day washing with soap-
but I'm not sure how to begin.	and water.
222 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2	and water.
2. My hair is:	7. I take a shower or bath, use a de-
a. styled to enhance my features	odorant, and wear fresh underwear:
and figure.	a. every day.
b. sometimes quite flattering, but	b. almost every day but sometimes
I have trouble styling it neatly	I run out of time.
every/day.	c. whenever I think of it, but not
c. not really an asset because I	daily.
haven't done much with it.	,
	8. My teeth are brushed:
3. My weight is:	a. at least twice a day and checked
a. about right for my height and of	periodically by a dentist
frame	b. always in the morning but rarely
b. several pounds off the prescribe	ed at other times.
 norm for my height and frame 	c. whenever I' have time.
c. difficult for me to control be-	
cause my eating habits cannot be	9. My sleeping habits are:
changed easily.	Ta. regular on week nights since I
	realize how sleep affects one's
4. My posture is:	, looks and performance daily.
a. erect and relaxed from constant	b. not always the same since I stay
practice.	up late on week nights sometimes
b. not too picturesque at times	c. fewer than eight hours' sleep
since I'm afflicted with "study	nearly every night.
hall slump" and a less-than-	
perfect walk.	10. I buy grooming products on the basis of
c. not likely to win any awards, bu	
I don't know what I do wrong.	tigation of the products.
5. My nails are:	b. impulse sometimes, or great faith
	in an overnight miracle - but
a. manicured regularly and of prope length.	, , , , , , , , , , , , , , , , , , , ,
b. manicured for special occasions	c. whatever mood I'm in.
only	Scoring: Total the A's, B's, and C's.
	If mostly C's, study carefully; if B's,
c, mistreated by biting or other bad habits.	you're in the majority; if A's, keep up
	the good work.

WHAT IS YOUR PERSONALITY RATING? Rating Scale (Donna Miller)

Objective: Identifies own personality traits

You are constantly making impressions upon people, and these impressions help people to form an opinion of you. They may say that your personality is interesting or dull, charming or unpleasant, stimulating or depressing, aggres etiring. Your appearance, behavior, conversation and interests influence y ality.

Check your personality traits in the chart below. Score them according to the key given. Write your scores in pencil now, and at the end of the course check yourself again, using a red pencil. If your score is above 240, you have a personality that naturally attracts people to you. If your score is above 180, you have a pleasing personality. If your score is under 120, you should strive for a better rating.

POOR - 0

FAIR - 1

GOOD - 3°

EXCELLENT - 5

EMOTIONAL MATURITY CHECKLIST (Cynthia Franklin)

Objective: Knowledge of characteristics of emotional maturity

<u>Directions</u>: These questions are designed to raise points about emotional maturity and immaturity. Check (\checkmark) either the Yes or the No column depending on your feelings about each question. There are no right or wrong answers.

		NO	YES
1.	Even though you want something very much, can you still weigh various courses of action objectively?		
2.	Can you feel satisfied to make important decisions without having them approved by some person important to you?		
3.	Are you willing to put controls on yourself to avoid advantage-taking rather than requiring the other person to draw the line, e.g.,-satis-fying sexual desires, sharing the work, spending the money?	ρ	-
4.	Have you developed a consistent philosophy of human values which you use in making right-wrong decisions?		_
5.	Do you judge a person on his qualities of character rather than by some predetermined quality, e.g., skin color, height, place of residence?	-	
6.	Are you able to talk without embarrassment of being disturbed about emotionally charged subjects, e.g., deaths, sex, racial membership, religion?		
7.	Are you usually able and willing to say whether you are or are not capable and well-qualified to do something you are asked to do?		
8.	If you believe in a principle are you willing to say this even though you may meet disagreement or disapproval?		
9.	Are you able to say what your values are and which are more important to you than others?		٠,
10.	Do you sometimes find yourself using sarcasm, anger, or hurt feelings to get your way or to punish others?		
11.	Is it hard to accept a situation in which you have been in error without trying to excuse or justify yourself?		
12.	Are you quite self-conscious when you are thrown with people who are older or younger than yourself?	<u> </u>	
13.	Are you uneasy or unsure of what to say or do when meeting an uncommon situation, e.g., a crippled person, a person who is bereaved?		
14.	Do you find that sometimes you can hardly account for the amount		3

<u>Teachers note</u>: This checklist should be followed by a discussion of the items. -- deciding which characteristics are signs of maturity.

JUST HOW ADULT ARE YOU? Rating Scale

Objective: Knowledge of characteristics of emotional maturity.

Directions: After each of the following statements you will find columns representing 5 scoring columns; 0, 1, 2, 3, 4. Check (V) the column that represents your answer to each statement on this basis:

- 0 "not at all", "never" 1 "somewhat", "sometimes", "a little"
- 2 "an average amount", "about as often as not"
- 3 "usually", "a good deal", "frequently"
 4 "entirely", "practically always"

		0	1	2	3	4
1.	You are genuinely grateful to anyone who points out a mistake you have made				1	_
2.	You keep your temper under control	-			-	\dashv
3.	You have "sales resistance" and cannot be persuaded into action by emotional appeals, but only by your judgment			ŀ		
4.	Your decisions are clear-cut; if you stick to a job you do so without regret; if you give up a plan you do so entirely without brooding over it or resentfully hanging onto it		-			
5.	You deal with the other sex on a basis of complete equality	+	+	ŀ	-	
6.	You accept the consequences of your actions fully, not attempting to evade responsibility or to make excuses	+	1	+	<u> </u>	
7.	You are not upset or distracted when obliged to face a new situation or reorganize an old one to which you have become accustomed	1			_	\\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \
8.	When facing a problem, your first thought is to solve it for yourself instead of turning to someone else to help you'	1	+	-	-	+
9. ~	You make your plans, not for immediate personal satisfaction, but for the greatest possible long-time satisfaction of all concerned	\downarrow	1	1	}	<u> </u>
10.	to an injustice you do not cherish a desire to	\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\		1	1	<u> </u>

Scoring: Total the scores in each column and add these together. If you score 40 you are perfect (perhaps a perfect liar!) Probably few persons can justly claim a score of more than 30. If you are very low on any point; take that as a cue to improve your behavior on that point.

-108-

YOUR ATTITUDE TOWARD SEX Maturity Checklist (Cynthia Franklin)

Objective: Awareness of own attitude toward sex

<u>Directions</u>: Read each of the questions below and respond by placing a check (\checkmark) in either the Yes or No column depending on how you feel about the question. There are no right or wrong answers.

	,	NO	YES
1.,	Do you see a clear distinction between "funny" sex jokes and "sexy" jokes?		
2.	Do you feel embarrassed about and somewhat ashamed of your own sexual impulses?	<u> </u>	
3.	Would you be able to talk freely about your own sexual behavior with a counselor?	Ŀ	
4.	Do you feel embarrassed over the normal or common childhood sexual experimentation in which you may have engaged?	L	,
5.'	Are your sexual standards based upon a set of principles which are clearly rooted in human values?	_	·
6.	Was, or would the initiation of marital sexual relations for you be embarrassing, offensive, or surrounded with fear?	<u> </u>	
7 .	Do you feel factually well-informed about normal childhood experimentation, the significance of masturbation, prostitution, and similar matters?	<i>_</i> .	
8.	Do you have strong feelings of disgust or revulsion when you hear of homosexuality or some uncommon sexual practices?	_	
9.	Do you accept the idea that the two sexes are equally responsible for setting sex standards?		
10.	Do you find yourself fascinated by or preoccupied with an interest in techniques for sexual intercourse, genital size, or some other manifestations?		
11.	If there was a good purpose could you talk freely and objectively about sex in a mixed group?	_	_
12.	Do, you feel, even though objective and for the purpose of understanding, that extended discussions of sex had better be avoided because of what they may lead to?		,
13.	Do you feel that people in general (society) have a right to be concerned about the sex standards of individuals?	_	_
14.	Would it embarrass you to go into a library or a bookstore and ask to see a book on sex?	<u> </u>	L
15.	Would you feel at ease in answering any questions about sex your own child might ask?	_	L
16.	Will aspects of your own sexual behavior be likely to embarrass or bother you when you try to give sex education to your own children?	<u> </u>	_
17.	Can and should marital intercourse sometimes be simply for fun or enjoyment?	<u> </u>	ļ.
18.	Should contraceptive information be carefully restricted to married?		Ľ

Teacher's Note: Yes answers to odd-numbered questions and No on even-numbered questions are expected to be in the direction of maturity.

DECISION MAKING PROBLEM TEST (Lela Hewlett)

•	Name
	Score
Objective:	Knowledge of the five steps of the decision making process
Directions:	Listed below are the five steps of the decision making process, be they are not in the correct order. Put them in order placing the number which corresponds to the first step, second, et cetera.
٨	DECISION MAKING STEPS
•	selects one alternative
	seek alternative solutions
	define the problem
	accept responsibility for decision
	think through alternatives
Directions:	mary, who is single and lives in an apartment, has only one and one-half hours to eat, shower, and dress for an important date. It takes her an hour to shower and dress. Should she eat at home or go out?
e a	Her date comes on time and she is almost ready. While he waits he says "Let's go out for steaks before the show."
·	Mary only has 45¢ in her purse which would limit her to one taco or a hamburger and a coke. But at home she only has milk, bread, and leftovers.
1	Mary could fix a quick sandwich at home. She could walk down the block and have a hamburger or tacos. She could ask her date to take her out to dinner.

I. OCCUPATIONAL HOME ECONOMICS

CHILD CARE AIDE SKILLS Checklist (Paulette Roth)

Objective: Identifies the necessary skills of a child care aide.

Directions: A child care aide needs to acquire many skills in order to be efficient on the job. Taking into consideration your knowledge and opinions about child care aides, place a check () beside the following skills that are necessary for a child care aide. If a skill listed is not needed by a child care aide, leave the space blank.

,	*			_		
1.	Ability to	greet guests		,		,
2.	Ability to	get along with people	,			
3.	Ability to	make introductions		,

ERIC*

CHILD CARE AIDE RATING SCALE

Objective: Comprehension of the desired qualities of a child care aide.

Directions: The following rating scale is to be used during a participation period by a teacher.

Rate the student for the issued according to the following scale: 1 - Not Acceptable, 2 - Poor, 3 - Acceptable, 4 - Good, 5 - Superior. If there is no evidence observed for a particular time, place a "N" in the rating box on the right. Place your ratings in the solumn on the far right.

Key	Not Acceptable Poor	Acceptable Good	Very Good Rating	80
Appearance	Slovenly	Satisfactory grooming	Exceptionally well- groomed	
	Unpleasant	Pleasant	Sparkles Smiles	٠
	Soiled and wrinkled clothing	Clothing meets minimum requirements of job	Clothing is attract- ive, clean and well pressed	-
Relation-	Resists criticism and direction from teacher	Accepts supervision follows directions	Invites criticism quickly, under- stands directions	
	Seems unconcerned for safety of pre-schoolers	Seems to recognize need for safety procedures. Knows steps to take in case of emergency.	Seems actively concerned for safety of pre-schoolers. Alert to hazards; corrects them if possible. Can take responsibility in case of emergency.	-
	Inappropriate language and vocabulary is used Communication is not at level so pre-schoolers can understand.	Language and vocabulary is appropriate.	Language and vo- cabulary is always appropriate. Speech is on a level that pre-schoolers can understand.	
#	Seems to be disliked by the majority of the preschoolers.	Generally accepted by the pre-schoolers.	Has very good rapport with most of the preschoolers.

PREPARATION BEFORE THE INTERVIEW:

CHECKLIST FOR INTERVIEWS (Sara Porter)

Objective: Knowledge of factors to consider in conducting an interview.

<u>Directions</u>: Given below is a criteria for the pre-paration, conduction, and the follow-up of an interview. Place a (/) in the appropriate column as to whether you did or did not accomplish each. Make any comments you would like at the end.

No Yes

1.	Learn in advance about the culture or background of the group under study.		
2.	Contact the proper person to ask permission for the interview.	_	_
3.	In the initial contact give name and state the purpose of the interview.		_
. 4.,	Arrange the date, time, and place for the interview.		
5.`	Compile a list of specific questions to ask.		-
6.	Plan what to wear that would be appropriate.		
CONDÙ	CTION OF THE INTERVIEW:	6	- ,
7.	Introduce self and briefly restate purpose of interview.		
8.	Maintain a pleasing manner.		
9.	Remain a good listener.		
10.	Speak clearly and enunciate properly.		
11. ^	Follow a fixed order of questioning.		
12.	State the questions so that they are geared to the respondent's level of comprehension.		

Mention when last question is reached to indicate the closing

16.

13. Allow enough time for the interviewer to express his ideas.

14. Use minimum time for taking notes.

15. Record exact wording of responses.

of the interview.

- 18. Adapt to different kinds of situations.
- 19. Express appreciation for interviewer's cooperation and helpful responses

FOLLOW-UP OF INTERVIEW:

- 20. Interpret Wesults.
- 21. Form a summary.
- 22. Write a report that followed the planned outline.
- 23. Select the most important parts of the report to present to the class.
- 24. Write a thank you letter to the interviewee.

COMMENTS:

A ...

Instrument 2. Pretest in Management

Objective: Knowledge of good management practices.

Suggestions for use: Use at the beginning of a clothing construction unit to introduce the management phase of this area. The same type of problem could be used for foods or to introduce a separate management unit.

Sally rushes into clothing class just as the bell rings. She drops her books on a table and hurries to get her sewing box. She goes to her table with her supplies and takes her books to the shelves near the door where she came in. Going back to the table, she lays her various blouse pieces on the table, hunts for her guide sheet and finds it in the pattern envelope. She looks around to see what the other pupils are doing next, raises her hand to ask the teacher but the teacher is busy. She searches in the guide sheet for help. Her partner reminds her of their decision the day before that Sally was to use the sewing machine the first half of the period. Sally gathers up her blouse pieces, guide sheet, and thread and goes to the machine. She returns for her bobbin and pincushion. After picking out the two pieces of her blouse that she needs, she stitches a seam. She returns to her table and gets her scissors. Her partner reminds Sally that she has used her share of the time at the machine and her partner is ready to use it for the rest of the period.

- 1. In what ways did Sally manage fairly well?
- 2. In what ways was her management poor?
- 3. How would Sally benefit from being a better manager?

-121-

B. Future Homemakers of America

The Future Homemakers of America, national organization of students studying homemaking in high schools, is an important facet of the total homemaking program. Although many of the instruments given with the subject matter areas would be adaptable for use in evaluating pupils' project work for the degrees of achievement, it is also important to ascertain the effectiveness of the chapter as an integral unit of the program.

			4	Are you presently enrolled in a home economics course? If "yes", give the course number
	Yes	No	2.	Programs for regular monthly meetings are planned by the executive council before the opening of school.
	Yes	No	3.	Your chapter has written a constitution.
				The executive council prepared a chapter handbook and distributed it to all members.
	Yes	No	.5 .	Your chapter handbook includes projects selected from the state and national program of work.
	Yes.	No	6.	The opening and closing ceremony is used regularly at chapter functions.
	Yes	No	7:	The majority of members participate in chapter activities which promotes the goals and purposes of the state and national association.
	Yes	'No	8.	The state and national magazines are used as a source for ideas useful in planning programs and individual projects.
				Parliamentary procedure is encouraged and practiced at chapter meetings.
,				Through your participation in FHA projects you have interpreted to the school and community the high school homemaking program.
	Yes	No	11.	Your chapter has selected chapter parents who assist in carrying

- Yes No 12. You believe that high standards must be met and maintained to earn a Degree of Achievement.
- Yes No 13. You are working on or have earned either a Junior, Chapter, or State Degree of Achievement.
- Yes No 14. Your chapter has a degree committee which guides you in planning projects and evaluating plans and final reports.
- Yes No 15. Chapter officers and committee chairmen have developed qualities of good leadership. They have poise and assume duties conscientiously.

- Yes No 16. FHA membership encouraged you to take additional home economics courses.
- Yes No 17. You have invited resource people to give chapter programs and they have helped explain opportunities in the many home economics professions and occupations.
- Yes No 18. Chapter programs have been planned to which you invited persons such as parents, principal, faculty members, community leaders, boys, or girls who are not FHA members.
- Yes No 19. By having been involved in FHA activities, you have done a project in your school, community and at home.
- Yes No 20. Some FHA activities have given you more understanding of family situations, such as caring for older people, enjoying small children, using leisure time wisely, and handling money.
- Yes No 21. By being an FHA; er you have had an opportunity to serve at banquets, act as a hostess, or care for children at special school functions.
- Yes No 22. You believe that chapter officers and members make the major decisions about what chapter activities will be carried out.
- Yes No 23. Chapter members and/or chapter activities encouraged you to want to join the FHA. If "no", who influenced your decision?
- 24. As a chapter member rate how well your chapter functions by writing in either Excellent, Good, Fair, Poor in the line to the left of the statement:

 Programs are well planned and most members attend.

 Social functions are fun and are learning experiences.

Social functions are fun and are learning experiences.

Chapter meetings are regular, well planned and educational.

Many members participate in chapter meetings and social occasions.

Members use chapter handbooks.

- 25. What additional activity or social function would you like to see added to the chapter program? Why?
- 26. Additional Comments:

Copied from North Carolina Evaluation of Home Economics Department, State Department of Public Instruction, Raleigh, North Carolina, 1971.

HOME EXPERIENCES

Instrument 1. Evaluating My Home Experience -- Before and After

'I Evaluate'

Directions: Ask yourself the questions below regarding the home experience which you think you will choose. In the blank at the left of each question, answer "Yes, Somehwat", or "no", depending upon the degree to which the home experience meets the criteria indicated by the question. AFTER you have completed the home experience, ask these same questions again. In the blanks at the right of each question, place the appropriate word: "Yes, Somewhat", or "No".

My Home 1	Experience:		_
Will it		Did it	
1.	Help me solve a problem of concern to me?		
2.	Give me a chance to learn something new?		
3.	Have the approval of mother and dad?		
4.	Prove to be difficult enough for me, but not too difficult?		
5.	Give me an opportunity to apply what I already know in a different situation?		
<u> </u>	Show me the connection between what we do at school and what we do at home?		
7.	Bring me into closer relationship with other members of the family?		
8.	Teach me to accept responsibility?		
9.	Teach me to make good use of my time?	,	•
10	Provide experience in planning and management?		
11	. Give me a feeling of satisfaction?		

Instrument 2. Profile Chart

The Home Experience Achievement Sheet is to be used by the teacher in evaluating every home experience completed by each pupil. After the first home experience of the pupil has been checked on the achievement sheet, make a graph by connecting the check marks. Go over the results with the pupil in an individual conference, pointing out the progress made. Plan with her for desired improvement in the next home experience.

Home Experience Achievement Sheet

Directions: In the columns at the right indicate by an X the degree of achievement reached by the pupil on each of the criteria listed. Then on the lines below give evidences to support your judgment.

Degree of Achievement:

D -- None

C -- Questionable

B -- Definite

A -- Optimum

Example:

1. Chosen by pupil because it was the best means of reaching her goal. (Checked under A) Evidences: Pupil expressed the need for learning to take responsibility at home.

		_				e of
	Criteria for a Good Home Experience				evér B	ent
		•	۲	<u> </u>	B	Ť

D. EVALUATING TEACHING AND PROGRAMS

Checklist for the Buzz Session

<u>Directions</u>: Mark (X) in the appropriate column to the right for each situation that <u>was</u>, <u>was not</u>, <u>or was partly exhibited</u>.

		Yes	No	Partly
•		<u>l</u> .	-	
1.	Was the selection of the problem:		1	
	a. About a real situation where real problems could be examined?			
	b. Based upon a situation which was interesting and challenging to the group?			
	c. One that is common to pupils' experience?	 	 	
	d. Done in a democratic manner where the number of proposed problems were presented?			
`	e. Within the range of the student's experiences and			
	abilities so that all members could contribute?	1		,
2.	Was the setting of the problem:		┝	
٠.	a. Fully understood by the group so they could imagine	l		
•	themselves as alive to this problem?		,	
	b. Stated so that the students could find facts or	1	1	
_	evidences to solve the problem?		<u> </u>	
3.	Was a careful assignment:	ŧ	Ì	
	a. Made before the group broke up into the different groups?	7"		•
	b. Made so the group could volunteer or work with a frole of their choice?		-	1
4.	Were the mechanics of the buzz session so explained that: a. Each sub-group could organize effectively?			
	b. The session proceeded with evidences of reasoning toward the conclusion of the problem?			·
5.	Did the teacher:		\vdash	
	a. Give sufficient details to arouse interest and	ł		
	alert participation of the group in the buzz session?			
	b. Raise questions about points being neglected?			
	c. Challenge thoughtfulness on the part of the group when questions were asked?			4.
	d. See to it that the summarizing discussions were clear and concise?			
	e. Stimulate the group to understand the implications of			
	the conclusions and the next steps to be			٠
,	accomplished?			
•	Was the room?		ĺ .	
	a. Arranged for best possible buzz session participations?		├	
	b. Large enough/so resource materials could be made available?			1
	100		_	

LET'S BRAINSTORM!

Teacher's Checklist For Brainstorming Session

Directions: Place a check () in the column which best describes this session.

Add comments that clarify or explain your responses when desired or necessary. Comments may include citations of evidences that support your response.

- Did all members of class participate?
- 2. Were any members made to feel inferior during the discussion?
- 3. Did reticent members have a chance to talk?
- 4. Were all opinious given a fair consideration?
- 5. Were too many snap judgments made?
- 6. Did personal experiences hinder critical evaluation?
- 7. Was depth of thinking shown?
- 8. Was there an enthusiastic participation.
- 9. Was the discussion such that further thinking was stimulated?

-	3 4 1	137.0	0

	Į.		

Four basic rules to follow in the brainstorming session:

- 1. Criticism is puled out. (Do not criticize any ideas.)
- Free-wheeling is welcomed. (Contribute any idea which comes to your head, regardless of how wild it is.)
- 3. Quantity is wanted. (The more ideas the better.)
- 4. Combination and improvement are sought. (As well as contributing new ideas, make suggestions for combinations and improvements of ideas already suggested.)-

Instrument 3. Checklist on Questioning.

Record the rating of each item in the blank to the right. CONSUMER AND HOMEMAKING EDUCATION PROGRAM OF VOCATIONAL INSTRUCTION EVALUATION

INSTRUCTIONS: Check the statement most appropriate to your program of vocational instruction. Add comments where necessary to clarify a statement. (Designed to be used by both coop and in-school programs) 1. The minimum and maximum program enrollments are in accordance with facility and vocational program characteristics for providing realistic instruction and safe conditions. The student enrollment is ideal B. The student enrollment is excessive. Additional students should be enrolled to justify continuation of the program. Comments: An advisory committee appropriate to the program of vocational instruction is organized and functioning. A. Periodic meetings are conducted each school year for each PVI. Committee is organized and minutes are recorded. * B. An advisory committee is formed with no meetings conducted. C. A general advisory committee is established with no advisory committee for program of vocational instruction. Comments: 3. Objectives for the program of vocational instruction are identified and are compatible with the overall philosophy and purpose of the school. The objectives are written to include skills, knowledges and attitudes in a sequential approach with specific attention to individualized instruction. Attempts are being made to develop behavorial objectives for programs of vocational instruction. Consideration of objectives of vocational education is not provided. Comments: ____

A. A youth organization is functioning as a co-curricular activity is affiliated with a state and national organization and is available to every student. B. A youth organization is offered to students as extracurricular, with no affiliation. C. A youth organization is not a part of the vocational education program. Comments: Textbooks and instructional materials are up-to-date, readily accessible and utilized with specific reference from the instructor. A. A budget item is allocated each year for the program of vocational instruction for purchasing instructional materials. The instructional materials are available in a laboratory, classroom and/or resource center. B. Instructional materials and related textbooks are purchased from a common allocation and placed in school library. C. Funds are not allocated for instructional supplies and textbooks on a year-to-year basis. Comments: Business and industry resource people in the community are used in the instructional program. A. A list of potential presenters is maintained. Presentation of materials to a program of vocational instruction relates to curriculum outlined. Travel to the business and industry setting is utilized as a means of instruction. B. Contacts with business and industry are non-structured.	instru	h organization is functioning in each program of vocational ction.

STUDENT QUESTIONNAIRE ON INSTRUCTIONAL METHODS

Coun	ity _		School
Teac	her		Home Economics Course
Date	·		Male Female
<u>Dire</u>	ctio	<u>ns</u> :	Please respond to the following statements by circling "yes" or "no".
Yes	No .	1.	This year you have been encouraged to express some of your needs and interests as topics of study, and helped decide when and how some topics would be studied.
Yes	No ·	2.	The teacher lets many students answer each question instead of same one or two of the students.
Yes	['] No	3.	The teacher encourages a student to explain why she thinks her answer is right.
Yes	No	4.	The teacher asks questions which lead to the basic idea being studied, rather than getting involved in small details.
Yes	·No	5.	You have had adequate opportunities to carry out activities in home economics laboratory when studying the
•			Yes No a. foods unit
			Yes No b. clothing unit
	٠		Yes No c. housing unit
			Yes No d. home care of the sick unit
Yes .	No	6.	Opportunities have been provided for you to review your test papers and other work with the teacher.
Yes	No	7.	You have been given the opportunity to give reports on various topics throughout the year.
Yes	No	8.	You have helped put up bullentin boards, displays and/or exhibits.
Yes	No	9.	Visual aids, such as films, filmstrips, slides and transparencies have been used in all topics you have studied.

-141-

No 10. For some topics studied, students have acted out some

situations.

- Yes No 11. Occasionally the members of this class have been asked to get into small groups, discuss a given subject, and present reports to the total class.
- Yes No 12. Homework and reading assignments have been meaningful to you.
- Yes No 13. Class members have been encouraged to show others how to do something in front of the class.
- Yes No 14. The teacher demonstrates ways of doing new things.
- Yes No 15. The class has been on field trips to observe real situations.
- Yes No 16. Guests have been invited to your class to give talks or demonstrations.
- Yes No 17. You have a feeling that each day's classes and activities have been well planned.
- Yes No 18. You have helped care for the home economics department.
- Yes No 19. You have been encouraged to use what you learned in one topic while studying another topic area.
- Yes No 20. You have been encouraged to express your ideas creatively either by writing, speaking, or drawing.
 - 21. Additional Comments:

Copied from North Carolina Evaluation of Home Economics Department, State Department of Public Instruction, Raleigh, North Carolina, 1971.

ADULT GROUPS

In evaluating the work of adult groups, the instruments suggested on the preceding pages may be used. For example, the instruments included in the Clothing and Textile section may be used by the members of an adult class in clothing construction as appropriately as by the pupils in a high school class in evaluation their knowledge and skills in clothing construction. Likewise the preceding Consumer and Homemaking Education Program of Vocational Education Evaluation will provide guidelines for one wishing to evaluate the total program, including adult education.

In addition to using the above mentioned evaluative instruments, the teacher, administrator, the advisory group, and others may wish to consider the following aspects more closely.

The Community:

Is there evidence of interest and cooperation in the development of adult education by community leaders and organizations?

Is there cooperation on the part of the local and school press and radio medias?

The Program:

Does the program incorporate many phases of education relating to family living?

Is it adapted to community characteristics and needs?

Is it flexible so that it may be adjusted and adapted to changes in living?

Does it stimulate and develop the ability in adults for active, intelligent participation in the solution of the social-civic problems?

The Students:

Is there evidence of an increasing interest of those enrolled in meeting the responsibilities of home and family living?

Is there evidence that those enrolled are bringing to class their individual problems for solution?

Is there evidence that those enrolled work independently and use the instruction intelligently in the class and in their homes?

The Teacher:

Does the teacher use the methods and techniques best adapted to the ability and current practices of the group?

Are the students aided in developing initiative in both thinking and doing?

Has the teacher an understanding and appreciation of the present needs and problems of class members?
