ABSTRACT

The Oshkosh Career Development Guide provides a framework on which to build a career development program. The first 20 pages of the document include an introduction, a diagram of the career development model, a career development scope and sequence model chart, and a brief description of the program's three components: self, the world of work, and career planning and preparation. The remaining 112 pages comprise lesson plans, presented under the first two headings for grades K-3, and under all three headings for grades 4 and 5. Each lesson is based on a general concept and objective, further divided into behavioral objectives with accompanying suggested learning activities, resources and materials, and evaluation procedures to be used by the teacher. The document concludes with a local resource guide, a glossary of career education terms (K-12), sample teacher worksheet and evaluation forms, and resource materials evaluation forms. (BP)

PREFACE

Currently, public concern is focused on the inadequate attention schools are giving to the career developmental needs of youth. Educators are beginning to appreciate the need for developmental programs of career awareness and exploration activities for all students at all levels. Too often programs to facilitate career development have been ad hoc and incidental rather than carefully planned programs composed of logically organized, sequential learning experiences.

Responding to the career development needs of youth through effective programs is the responsibility of all educational personnel at all levels. Meeting this task will require that career development be assigned a high level priority and be approached in a manner commensurate with other major educational goals. The Oshkosh Career Development Guide provides an excellent framework on which to build a meaningful career development program. It offers an effective basis for encouraging the involvement and commitment of all school personnel in the implementation of its goals and objectives. The Guide is a positive response to public concern and has the potential of being a major force in making education relevant for today and tomorrow.

INTRODUCTION

"No two persons are born exactly alike, but each differs from each in natural endowments, one being suited for one occupation and another for another . . . all things will be produced in superior quantity and quality and with greater ease, when each man works at a single occupation in accordance with his natural gifts."

Plato

" . . . we must decide what manner of men we wish to be and what calling in life we would follow; and this is the most difficult problem in the world."

Cicero

The age of the two quotes listed above speaks of the concern that man has had over the years regarding a suitable vocational choice. Over these years, various writers have delineated differing theories of vocational choice. From these theories a common note appears: that is, that vocational choice is complex and does not simply take place suddenly, out of the clear blue sky. Rather, it involves a developmental process over a period of years, and primarily during the years spent in school. Certainly, educators have been made aware of this fact and efforts have been expended in an attempt to provide guidance in vocational choice. However, these efforts have often lacked coordination and a systematic approach.

Some students have received information necessary to the process of vocational development, others not. Some students are engaged in career education activities during one semester but not during the next. Some teachers have embraced career education and some have disdained its use. It is just such concerns that the concept of career education attempts to alleviate. Career education is a planned approach to providing the necessary concepts, facts, and activities to all students in a sequential and continuous format during their school years, K-12. This guide, which all educators in the Oshkosh Area Schools can use in their curriculum planning, is just that - a guide. It is not a recipe book, but

in fact is written so that any teacher may exercise his individual training, experience and creativity in determining the thrust of career education in his classroom. This is not to say that it lacks in content. Its contents are rich in basic concepts related to career development, goals to strive for, activities to assist in the achievement of these goals, and evaluation techniques. It is a comprehensive document, and, as a result of the current emphasis on relevancy, wherein each school system is challenged with the responsibility to provide continuous sequential career education opportunities for all students, one which can be of tremendous value to all educators in the Oshkosh Area Schools. One last word. The results of a program of career education are not easily evaluated. Unlike a single unit or even a semester's work, the effect of career education cannot be measured over a short span of time. Rather, the effects will become evident only after the plan has been implemented over a period of years. It requires faith and patience, but the satisfaction of future citizens in their lives is worth the wait.

SELF

The Career Development Model views SELF or SELF-UNDERSTANDING as a process in which an individual internalizes personal perceptions of his characteristics -- how others perceive him in the surrounding environment. This component of the guide deals with, to what and how an individual thinks about himself -- his attitudes, feelings, perceptions and evaluation of himself. SELF is then the individual's own frame of reference. When he looks at himself or is viewed by others he is using this internal frame of reference. What and how the individual views himself is determined by his relationship with his e-viornment that he is in from which he extracts perceptions of his attitudes, feelings, and evaluations. Through the Career Development efforts of educators the student will receive sufficient counsel and guidance to increase his knowledge, acceptance and affirmation of what and how he thinks about himself. This ultimately is the goal of the Wisconsin Career Development Model.

Vital to the acceptance and usefulness of programs emerging from this model rests on the ability and willingness of educators and parents to provide the continuing assistance to students efforts to know, accept and affirm understanding of themselves and the world of work. Students will vary in their ability to structure their self-concept in a positive way. This only makes our job that much more complex but not impossible. No matter what level the individual is perceived, placing him increasingly in touch with "SELF" is important and represents a sound concept for Public Education.

WORK OF WORK

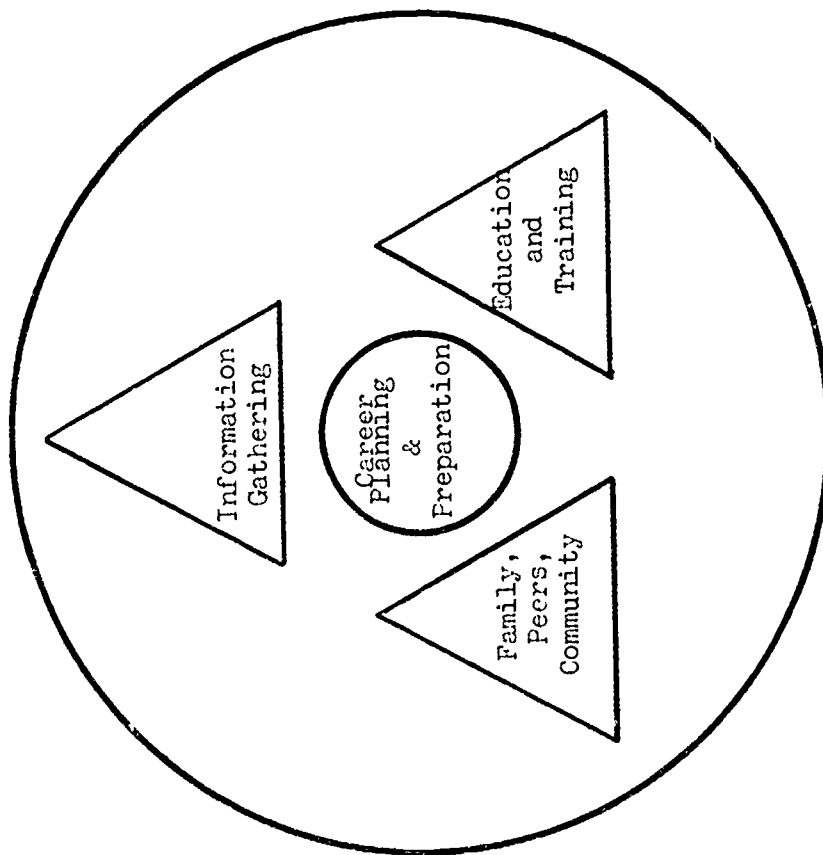

During their lifetime, probably one half the children in school will be employed in occupations that are non-existent today. Therefore, instead of emphasis being placed upon an existing occupation, more attention should be devoted to understanding the world of work, attitudes toward work, and recognition of the need for continued occupational growth. Emphasis should also be placed on the fact that realization of potential requires continuous growth. Additionally, society operates within an economic atmosphere that affects each individual and his opportunities. Economic conditions not only influence his food, shelter and clothing but also his educational setting, occupational life, leisure time, and self-expression time. Because of the fact that economic conditions affect each person in many ways, it is important that this information be provided as well as the occupational information.

In the 20th Century, scientific discoveries have affected the world of work. Scientific discoveries and their applications in industry and business technology have changed organization functions and tasks, and thus have changed the nature of the world of work. As industries change, so do the manpower needs. The number and kinds of new jobs created are large, but also a large number of jobs are discontinued as a result of scientific discoveries.

The composition of the labor force has changed from one in which goods producing industries predominate. Moreover, occupational requirements have changed in favor of jobs needing more education and training. Education then needs to change toward helping individuals gain the kinds of skills and attitudes needed to find jobs that will assist them in finding fulfillment of self. At the same time the individual needs to see the relationship of his present job to a family of jobs into which he may move in the future.

Changing Role of Work in Life of Individual

Work must be perceived as being an integral part of self expression and self realization. Work should be regarded as an opportunity for expression, growth and development. If work is to be viewed as an expression of oneself and if one is ever changing, then his job and probably his occupation should change -- maybe more frequently during some periods of his life than other stages of his development. Perhaps the frame of reference should be one in which the normal development of an ever-maturing individual includes a succession of jobs during the course of his lifetime in which each job contributes to his growth and self improvement in preparation for the next.

CAREER PLANNING & PREPARATION

Information Gathering	Family	Peers	Community	Education and Training
Awareness that information on the world of work is available and where to obtain it	Awareness that one's family plays a critical role in structuring values and attitude towards one's career plans	Awareness that one's friends influence the individual's attitudes and values toward the work world	Awareness that the community may have impacting environmental elements that could affect career choice	Awareness that different workers need varying degrees of educational preparation for success
Awareness of a system for the collection and use of occupational information	Realize what family influences are being applied (Positive or Negative)	Understand what friends are now having an impact on the individual's decision making (Reasons)	Begin to identify some of the elements in one's environment that are having impact on one's decision making	Realize that occupational competency requirements influence the kind and degree of one's educational preparation
Develop occupational research skills and understand present and future employment trends	Understand the influence one's parents are having on career choice	Ability to screen positive and negative information offered from friends	Understand the community influences and prepare to deal with their impact	Understand the necessity for obtaining employability skills and where to obtain these skills
Identify tentative career objectives based upon accurate and pertinent occupational and self information	Evaluate the expectation family has for you and how it might affect your decision	Realize what individuals can assist one in career planning and preparation	Recognize that career choice could be influenced by opportunities in his community	Know where and how to apply for a job

CAREER PLANNING AND PREPARATION

Career planning and preparation is an informational and decision-making process. Personalized information is essential for one's growth and development. The facilitator makes the information available when the individual is ready to enter into the convenience of the provider of information. His information is available over a life time as the individual utilizes information pertinent to areas of concern and at a depth that has meaning to him. Information flows, serves the purpose of keeping the individual abreast of changes; but, even more important, it can also help him be prepared for change. The development of the individual in all states of change and development. This development of the individual occurs in all areas — the educational, the occupational, the personal, and the social. The developmental approach calls for the collecting and utilizing of information sequentially by individuals over an extended period of time. Their state of readiness and their desired purposes are crucial. Decision making at each stage of development may be regarded as the end result of acquiring and processing information.

Recent occupational changes in America require new skills, techniques and knowledge. Certain occupations are being replaced with new ones and workers are being re-trained or their education broadened for new roles. Education and training are major factors in determining job opportunities. The rate of change in new jobs and new machines is governed to some extent by the rate workers can be educated or retrained. An industry cannot afford to install new machines nor create new jobs at a faster pace than individuals can be educated. The educational potential (including training) of available individuals is a major determinant of the rapidity of change for each business or industry. Therefore, education is becoming more of a determinant of occupations than occupations are of education. The education possessed by an individual, his potential, and his willingness to obtain more education may be a key to his occupational maturity, or lack of it, throughout his life.

There is little question regarding the tremendous influence that friends and family play in occupational decisions of young people. Value and attitude transmittal and formation are centered in family and peer relationships. It becomes imperative for the individual to determine which information is pertinent to him and how to personalize it.

Grade 1Subject/Dept. Music

Concept: An understanding and acceptance of self is important throughout life.

General Objective: Begin to recognize the need for continuous self appraisal in a diversified society.

Behavioral Objective	Suggested Activities	Resources & Materials	Evaluation Procedures
The child will be able to identify an "incorrect" singing sound from a "good" singing sound.	<p>Child is presumed to know that the quality of voices differ.</p> <p>Teacher begins by making incorrect singing sound and leads child to tell how it could be better.</p> <p>For young children obvious examples used could be -</p> <ol style="list-style-type: none">Voice too loud-- like screaming.Voice has breathy sound in it.Sound isn't clear because mouth and throat aren't open. <p>Older children may be able to hear more subtle differences.</p>		Children can correctly identify incorrect from correct sound in singing voice and verbalize why it is correct or incorrect.

SELF

Grade 1 - continuing

Concept: An understanding and acceptance of self is important throughout life.

Subject/Dept. Music

General Objective: Begin to recognize the need for continuous self appraisal in a diversified society.

Behavioral Objective	Suggested Activities	Resources & Materials	Evaluation Procedures
<p>Child will be able to produce correct and in-correct singing sounds with emphasis on continual production of the correct sound in individual and group singing.</p>	<p>In early elementary grades children can make a game in which one child produces correct or in-correct sound and others tell which it is and <u>why</u>.</p> <p>Discussion can be held on the physical production of sound - what actually happens in your mouth and throat when you produce both types of sound.</p> <p>Vocal exercises on syllables with the different types of vowel sounds are useful if done correctly--open throat, unified shape of lips, focused sound.</p> <p>(These activities are progressively more advanced)</p>	<p>Tape Recorder</p> <p>Songbooks</p> <p>Vocal Exercises (ascending and descending scales and arpeggios)</p> <p>Mirrors may be helpful in noticing position of tongue and lips.</p>	<p>Identification of the kind of vocal production is usually done by teacher on the children as a group. A noticeable improvement of the group's vocal sound as identified by the teacher and students themselves (using a tape recorder) is the ultimate goal of the objective.</p> <p>Checklists could be used for individual students to evaluate themselves in sound production.</p>

Concept:General Objective:

Behavioral Objective	Suggested Activities	Resources & Materials	Evaluation Procedures
The child will be able to identify the music of other countries and recognize the musical elements within it that make the difference by (written) recording the country and element.	Teacher will select key songs from Japan, Latin America, etc. that have peculiar characteristics. Children will listen to, sing, and analyze the music.	Rhythm instruments Melody bells (use in pentatonic scale) Music books with songs from different countries. <u>Making Music Your Own</u> Silver Burdett Co.	Teacher presents a piece of music representative of Japan or Latin America and observes if child can identify song correctly and point out their respective characteristics.

WORK WORLD

WORK WORLD

Grade _____ 1

Concept: Individuals differ in their interests, abilities, attitudes and values.

Subject/Dept. _____

General Objective: Begin to differentiate oneself from others.

Behavioral Objective	Suggested Activities	Resources & Materials	Evaluation Procedures
<p>The child will be able to identify the rhythmic pattern of different names and produce physically and through some form of notation the correct pattern of a given name.</p>	<p>Individual names are chanted by the children in rhythm. Teacher then says a name and children clap it. Show how this clapping pattern may look in a series of short and long lines. These lines may in turn become notes of varying values if children are knowledgeable in their use.</p>	<p>Rhythm instruments</p>	<p>The child is able to identify and show physically and visually rhythmical patterns as they vary from name to name.</p>
	<p>Each child's name is shown in a series of lines or notes. Now teacher names a child and any student may show this name by clapping the way it sounds - or putting the sound on the board.</p>		
	<p>Teacher gives child two names and claps the pattern of one. Child tells which name fits that pattern. Children discover how many names have the same pattern. Rhythm instruments can be used in showing name patterns also.</p>		

Concept: Individuals differ in their interests, abilities, attitudes and values.

General Objective: Become aware of the various ways individuals differ. (Interests, abilities, attitudes, values, aptitudes.)

Behavioral Objective	Suggested Activities	Resources & Materials	Evaluation Procedures
<p>The child will be able to differentiate aurally between man's, woman's, and young child's voice and verbalize why they sound different.</p>	<p>Pictures of a man, a woman, and a child can be put on the board. A tape recording of the voice of each singing a simple song is played.</p> <p>Children are asked how they sound different, which one's sound most alike -- and then identify the type of voice heard.</p>	<p>Picture of man, woman, child.</p> <p>tape recording of different voices.</p>	<p>Teacher observes if children can tell the difference between the voices and can verbalize the characteristics of each.</p>

WORK WORLD

Grade 4-5Subject/Dept. MusicConcept: Job specialization creates interdependencyGeneral Objective: (Str. & Nat. Fact.) Recognize that jobs are coordinated in the production of goods and performance of services.

Behavioral Objective	Suggested Activities	Resources & Materials	Evaluation Procedures
The child will become aware of the need for all people to work together through listening to a recording, discussing the sound, and viewing a demonstration.	List all instruments commonly used in band and an approximate number you would find of each. Listen to a recording of a band selection and pick out spots in which certain instruments are more important. Discuss the importance of all players working together to achieve the best sound.	1. Recording of band selection - other than a march, if possible. 2. Band director 3. Instrument player	Written paragraph on the necessity of band members working together.
	a. how can one person spoil the group's sound? b. who is in charge of coordinating all the sound? Perhaps the band director could give a talk on the importance of this.		
	Invite 3 junior high instrument players to demonstrate their instruments and show how it sounds if they don't work together, starting at different times, etc. and how it sounds when they do.	4. Junior high instrument players	

Concept: Individuals can learn to function effectively in a variety of occupations.

Subject/Dept. _____

General Objective: (Infer. Cath. Factor) Realize that individuals have assets and limitations as they relate to job requirements.

Behavioral Objective	Suggested Activities	Resources & Materials	Evaluation Procedures
The child will be able to identify qualities that may be an asset or a limitation in relation to a specific musical task.	<p>Instrumental music teacher brings in a variety of horns and demonstrates embouchures which are an asset or a limitation in playing these instruments.</p> <p>Note: Stress the fact that although certain characteristics are helpful, they are not necessary for accomplishment in an area of interest.</p>	Instrumental music teacher	The children will list qualities that may be an asset or a limitation in relation to a specific musical task.
	<p>Students discuss other musical activities and related individual qualities that are helpful.</p> <p>What qualities are an asset to a music teacher</p> <p>what qualities are an asset to a tuba player</p> <p>what qualities are an asset to a piano player</p>		

CAREER PLANNING & PREPARATION

Grade 5-6

Concept: Career development requires a continuous and sequential series of choices. Subject/Dept. Music

General Objective: (Infor. Gath. Factors) Aware that career development is a life-long process which unfolds from the interplay of their past experiences and decisions.

Behavioral Objective	Suggested Activities	Resources & Materials	Evaluation Procedures
The child will show awareness of the early training and experiences of musicians.	<ol style="list-style-type: none"> Group projects in class or the musical background and training.
