ABSTRACT

The Kentucky state plan for the collection of data concerning the cognitive, affective and psychomotor needs of school children is discussed. The plan entails: (1) identification of the needs of learners to be served, (2) determination of the criticality of the learner needs that are identified by applying judgmental values, (3) establishment of performance goals for the alleviation of critical needs and development of programs to meet these critical needs, and (4) application of measures of accountability based upon performance goals, to the progress of such programs. In this context, the Needs Assessment Study is but the first step toward comprehensive planning. This report synthesizes and displays the findings of a year spent in setting the stage, creating an awareness of the need for the effort, establishing an appropriate organizational framework, and implementing a state-wide study of learner needs. ## FOREWORD

Kentucky was challenged in 1969 by the U. S. Office of Education to develop a state plan that would provide for the systematic collection of data concerning the cognitive, affective, and psychomotor needs of the learner. The data had to be current, reliable, valid, and appropriately treated. The evidence generated by the data obtained had to be refined into clear-cut statements of critical needs in terms of learner needs.

To meet the recommendations of the Office of Education, the Kentucky Department of Education instituted a needs assessment study seeking to obtain a significant sample of professional and lay citizen opinion concerning the criticality of learner needs in Kentucky and to use the data generated from the sample in validating the representativeness of opinions expressed by a selected population. In addition, the Department of Education developed from this data regionalized and state profiles of critical learner needs which should have utility in developing performance goals. This study reports progress made in the development of where Kentucky students "ought to be" and sets forth tentative plans for translating the value judgements of a large cross-sectional sample of the population regarding the criticality of needs into statements of performance objectives which can be used as an "ought" model.

The Needs Assessment Study is but one phase of the total effort in which Kentucky is engaged. The long-range objective is to identify appropriate performance goals for comprehensive program planning so that planning may be more thorough, orderly and accelerated. The identification of performance goals, ranging from the individual school to the school district to the region and to the state, is an essential task if the educational process in Kentucky is to be a viable and relevant process. Kentucky can ill-afford to

postpone the identification of specific planning goals and lay waste its resources chasing ephemeral and momentary goals which may have only slight relationships to the "learner needs" of its schools.

The first step has now been taken. As you read this report, you should be looking ahead to the steps that will logically follow: 1) translating needs priorities into program goals, and 2) field testing the new pattern of programmatic objectives in a sampling of school districts.

## ACKNOWLEDGMENTS

The Office of the Superintendent of Public Instruction, the Bureau of State-Federal Relations, and the Research Office are indebted to the many contributors who participated in Phase I of the Kentucky Educational Needs Assessment Study. Citizens, teachers, and administrators at the local level provided much valuable assistance, both in response to the structured instrument and the quality of narrative comments in Part II, and in separate correspondence. An effort is made in this final report to capture the concerns as well as the value judgements made by the respondents. The interest manifested and the level of participation reflect a real team effort by the more than 5,000 participants.

Grateful acknowledgment is extended to the representative members of the Citizens' Advisory Committee who provided invaluable assistance in helping to maintain a balance in perspective among the many publics who are served by the schools of Kentucky. The names of the representatives and the various organizations, associations and councils they represent are listed in the Introduction. Also, the State Department of Education Coordinating Committee consisting of Executive Cabinet and bureau and division representatives assisted materially in planning and conducting the Survey.

Grateful recognition is also extended to special consultants who provided direction and help in the early development of the Study. The Title III ESEA Office provided financial support and staff assistance to Research Office in preparation and handling of materials. In particular, credit is due Dr. Fred Edmonds, Bureau of School Services, and Dr. Robert Ogletree, Department of Educational Administration, University of Kentucky, for their continuing service and close relationship to the study from instrument design to preparation of the final report.

## Introduction

This document is submitted as a supplement to Kentucky's State Plan for F.Y. 70 in compliance with the charge of B. Alden Lilywhite's letter of July 30, 1969 in which specific reference was made to section 2.3.1-, Assessment of Educational Needs. That letter stated:

"This section should be redeveloped by adding a phase or phases which would provide for a systematic collection of additional data concerning the cognitive, affective and psychomotor needs of the learner as opposed to institutional or administrative needs. Such data to be shown to be current, reliable, valid, and appropriately treated. The evidence so obtained should then, be refined into a clear-cut statement of critical needs in terms of learner needs. This latter statement should include procedures and criteria for determining criticality of needs, extent to which the needs are actually based on the assessment data, and the extent to which the needs of various areas of the State are reflected in the needs."<sup>1</sup>

## DESIGN OF THE STUDY

In response to the charge contained in the above letter, the Department of Education established the following three objectives:

- 1) To carry on a state-wide assessment study (regionalized) seeking to obtain a significant sample of professional and lay citizen opinion concerning the criticality of learner needs in Kentucky.
- 2) To use a representative sample of both lay and professional groups in validating the representativeness of opinions expressed via instrumentation in "1," above.

---

<sup>1</sup> Letter from B. Alden Lilywhite, Deputy Associate Commissioner of Elementary and Secondary Education, U. S. Office of Education, Washington, D. C., dated July 30, 1969.

- 3) To develop regionalized and state profiles of critical learner needs which should have utility in developing performance goals in programming--especially in Title III--to reduce the intensity of such needs.

The term "learner needs" is here used to denote those cognitive, affective and psychomotor learnings in which Kentucky's public and private school students appear deficient. Such needs differ from organizational, administrative, and programmatic needs in that organizational, administrative, and programmatic needs are geared to and determined by strategies for the reduction and/or elimination of these learner needs.

This concept of learner needs implies a model of what learners "ought" to be. The difference between where a learner "is" and where he "ought to be" constitutes his needs. Unfortunately, Kentucky--like other states--has only a vague and overgeneralized model of the "ought to be." Hence, the assessment of such learner needs is predicated upon the generation of a model of where learners "ought to be." Thus this document reports progress made in the development of the "ought" model and sets forth tentative plans for translating the value judgments of a large cross-sectional sample of the population regarding the criticality of needs into statements of performance objectives which will be used as the "ought" model.

#### Rationale and Organization

The Needs Assessment Study is but one phase of the total effort in which Kentucky is now engaged. The long-range objective is to identify appropriate performance goals for comprehensive program planning so that

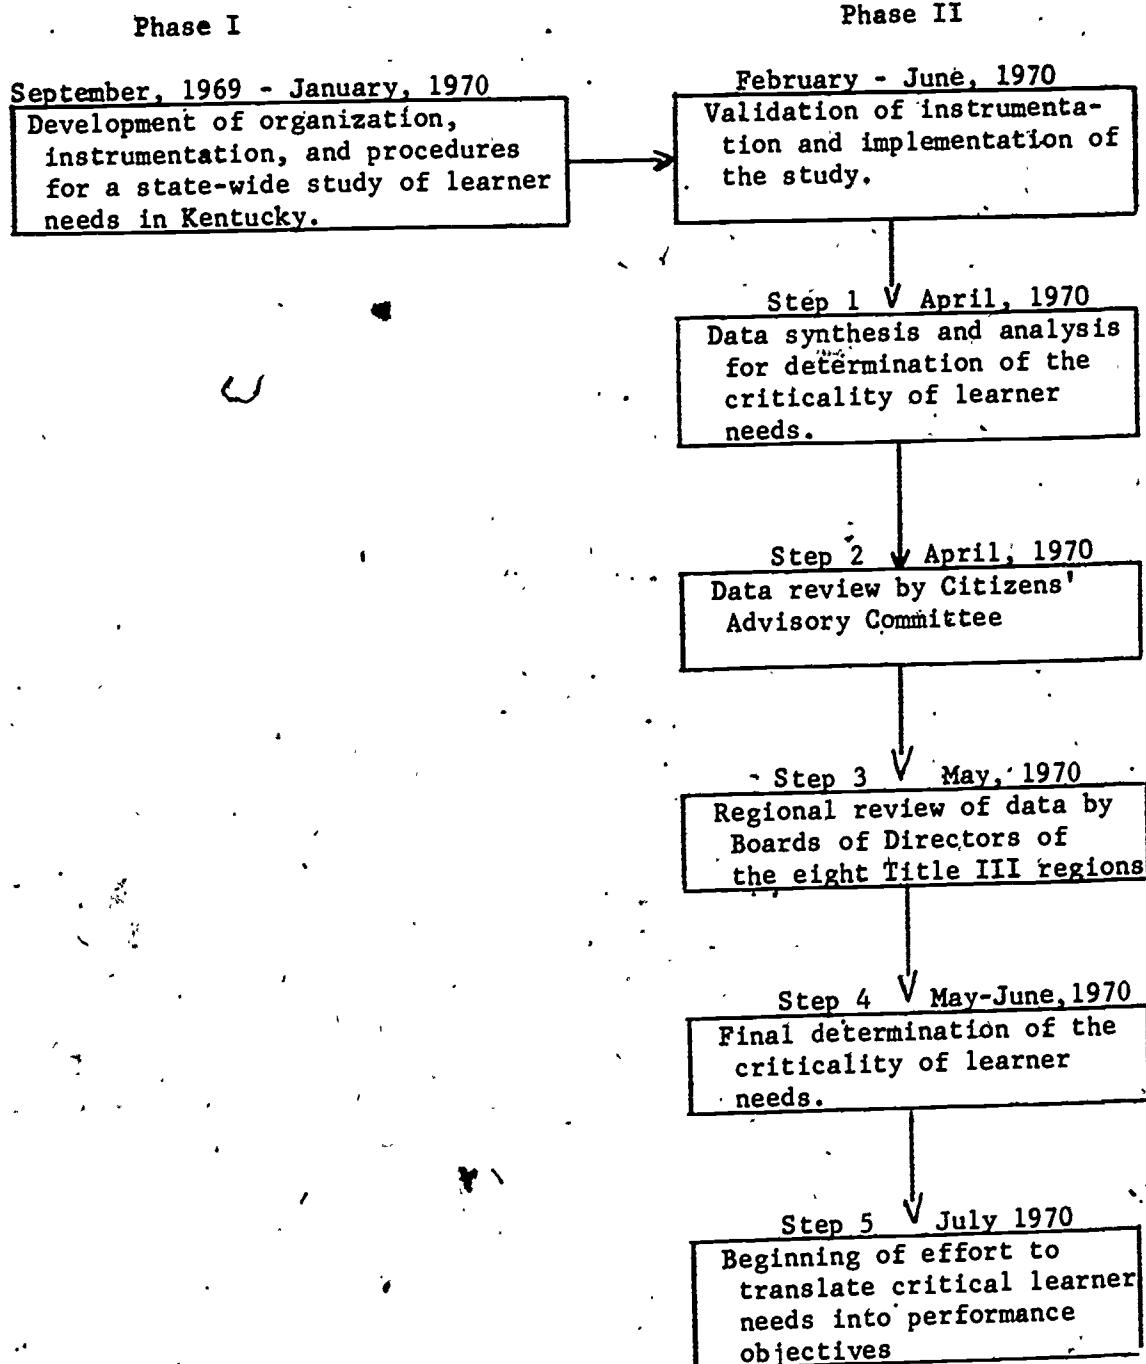

planning may be more thorough, orderly, and accelerated. The identification of performance goals, ranging from the individual school to the school district to the region and to the state, is an essential task if assessment of progress and assigned accountability are to become operative. The absence of specific performance goals can but continue the trend of haphazard and erratic planning and the lack of adequate measures of achievement and success in planning and program implementation. Kentucky can ill-afford to postpone the identification of specific planning goals and lay waste its resources chasing ephemeral, momentary goals which have only a chance relationship to the programmatic needs of its schools.

Thus, the scope of this effort extends well beyond the perimeters of the Needs Assessment Study, the substance of this report. Defined in the classic model, the scope of the project may be described as: (1) identify the needs of learners to be served, (2) determine the criticality of the learner needs that are identified by applying judgmental values, (3) establish performance goals for the alleviation of critical needs and develop programs to meet these critical needs, (4) and, of course, apply measures of accountability, based upon performance goals, to the progress of such programs.

In this context, the Needs Assessment Study is but the first step toward comprehensive planning. Therefore, the past year has been spent in setting the stage, creating an awareness of the need for the effort, establishing an appropriate organizational framework, and implementing a state-wide study of learner needs. This report synthesizes and displays the findings of that study.

4

Operationally, the Needs Assessment Study functioned according to the following flow chart:

### Planning Process

To formulate a strategy for determining what the people of Kentucky valued as the critical needs of learners, a Department Educational Needs Assessment Survey Committee composed of the following persons was activated:

#### Executive Cabinet

Wendell P. Butler, Superintendent of Public Instruction  
 Samuel Alexander, Deputy Superintendent  
 Don C. Bale, Assistant Superintendent of Instruction  
 Carl F. Lamar, Assistant Superintendent for Vocational Education  
 Marshall Swain, Assistant Superintendent for Pupil Personnel Services  
 Frank Vittetow, Assistant Superintendent of State-Federal Relations  
 Ben Coffman, Assistant Superintendent for Rehabilitation Services

#### Representing Bureau of Instruction

Martha Ellison, Coordinator of Curriculum Development  
 Eugene Tallent, Coordinator of Evaluation  
 Sam Pollock, General Education Supervisor

#### Representing Bureau of Vocational Education

Mary Lois Williamson, Associate Director, Supporting Services  
 Charles Wade, Associate Director of Program Planning,  
     Development, and Implementation  
 Christine Wallace, Supervisor, Persons with Special Needs

#### Representing Bureau of Pupil Personnel Services

Kearney Campbell, Director, Division of Guidance Services  
 Cephas Bevins, Director, Division of School Lunch  
 Lee Tyler, Director, Division of Pupil Personnel Attendance  
     and Accounting

#### Representing Bureau of State-Federal Relations

Richard Winebarger, Director, Title III ESEA  
 John Bruce, Director, Title I ESEA

#### Other Bureaus and Divisions

Fred Johnson, Assistant Director, Division of Finance  
 Stewart Gatewood, Chief Planner of Program Development  
 D. E. Elswick, Director, Division of Educational Research  
 Mary Marshall, Director, Division of Information-Publications

This Committee was supplemented and assisted by a state-wide  
 Citizens Advisory Committee for Educational Needs Assessment composed  
 of the following:

Mr. Ralph Fontaine  
 Executive Vice President  
 Kentucky Bankers Association  
 425 South Fifth Street  
 Louisville, Kentucky 40202

Dr. Marvin Dodson  
 Executive Secretary  
 Kentucky Education Association  
 101 West Walnut Street  
 Louisville, Kentucky 40202

Mrs. George Spoonamore, Jr.  
 State President  
 Congress of Parents and Teachers  
 113 Portman Avenue  
 Stanford, Kentucky 40484

Mr. Ted C. Gilbert  
 Executive Director  
 Council on Public Higher Educ.

Mr. Rayburn Watkins  
 Executive Secretary  
 Associated Industries of Ky.  
 200 West Chestnut St.  
 Louisville, Kentucky

Mr. Harold Steele  
 Division of Economic Opportunity  
 Program Development Office  
 The Capitol  
 Frankfort, Kentucky 40601

Dr. Walter L. Cawood  
 President  
 Kentucky Medical Association  
 1200 Bath Avenue  
 Ashland, Kentucky 41101

Dr. Carl Hill, President  
 Kentucky State College  
 East Main Street  
 Frankfort, Kentucky 40601

Mr. John M. Lewis  
 Executive Vice President  
 Kentucky Chamber of Commerce  
 300 West York Street  
 Louisville, Kentucky

Mr. Lee Browning, President  
 Kentucky Broadcasters Association  
 c/o WAVE-TV  
 725 South Floyd  
 Louisville, Kentucky 40203

Mr. James Norris, Jr.,  
 President  
 Kentucky Press Association  
 c/o Ashland Independent  
 Ashland, Kentucky 41101

The Reverend John S. Chambers  
 Executive Director  
 Kentucky Council of Churches, Inc.  
 Suite 216-Bakhaus Bldg.  
 Lexington, Kentucky 40506

Mr. Glenn Lovorn  
 Executive Director  
 Kentucky Municipal League  
 300 Capital Avenue  
 Frankfort, Kentucky 40601

The Reverend Thomas Casper  
 Superintendent  
 Louisville Catholic Schools  
 435 South Fifth Street  
 Louisville, Kentucky 40202

Mrs. Oscar Sowards  
 President  
 Kentucky Federation of Women's Clubs  
 105 West Walnut Lane  
 Pikeville, Kentucky 41501

Mr. Louis Ison  
 President  
 Kentucky Farm Bureau  
 Harrodsburg, Kentucky

Mr. Maurice Bement  
 Executive Director  
 Kentucky School Boards Association  
 248 Plaza Drive  
 Lexington, Kentucky 40503

The Department's Needs Assessment Committee, with appropriate consultant assistance from other State Departments of Education, Southern Association of Colleges, Secondary and Elementary Schools, and college and university personnel within and outside the state, devised a strategy which is described by the following steps:

- 1) Reviewed much of the appropriate literature on learner needs with particular emphasis on definitions, assessment or determination procedures and transformation of learner needs to performance objectives and program strategies.
- 2) Defined learner needs in the manner cited above.
- 3) Determined large areas in which cognitive, affective and psychomotor learnings were valued by this committee.
- 4) Assigned these need areas to specific Bureaus within the Department to identify and submit a list of specific learner needs.
- 5) Integrated each Bureau's reports into a single document.
- 6) Transformed this document into a working needs assessment instrument.
- 7) Submitted the instrument to a sub-committee of outside consultants who refined the format, reduced the educational jargon, eliminated the overlap of specific needs between need areas and added a section for respondents to report needs other than those identified in the instrument.
- 8) Reviewed the revised instrument as a committee of the whole with the assistance of out-of-department consultants

- 9) Made necessary revisions in the instrument..
- 10) Determined the structure of the sample to be drawn from the state's population.
- 11) Submitted the instrument to its public school sample.
- 12) Secured the approval, support, and assistance from the Citizen's Advisory Committee whose members provided the names of persons constituting the sample from their organization and prepared cover letters to accompany the instrument which was mailed to them.
- 13) Established machinery and procedures for treating the responses to the instrument as these were returned to the Department.
- 14) Established machinery and procedures for transforming these opinions (ratings) of needs into statements of needs in terms of performance objectives.

#### Instrumentation

The primary instrument used to collect data for this needs survey was developed through the procedures described above. (Instrument appended to this report, Appendix A.) Basically, this device was designed to identify learners' needs in the three learning domains: cognitive, affective, psychomotor.

The design of the instrument was moored to several assumptions:

- (1) it should be simple in format and response instructions, and contain a vocabulary that would be understood by lay as well as professional persons;
- (2) it should provide the respondent with sufficient opportunity to identify priorities among needs, yet not be so restrictive that all categories of need would have to be ordered in precise priority;
- (3) it should contain a logical spread of learner needs, ranging through a

representative spectrum of cognitive, affective, and psychomotor domains; and (4) it should provide the respondent opportunities to identify learner needs other than those included in the instrument.

The completed instrument did reflect attention to each of these design assumptions. The simplicity of format, vocabulary, and response instructions was validated by a utility check with a spectrum of respondents. The provision of opportunity for the specification of need priority was incorporated by asking the respondent to identify (check) four of the ten general needs categories and subsequently respond to only four items under each of these choices. An examination of Part I of the instrument would support the assumption that the device should have a spectrum of learner needs in the three learning domains, and Part II provided ample opportunity for respondents to add additional needs.

Prior to general distribution, the instrument was utility validated by testing it with a structured sample, representative of its intended final distribution. This test produced the following conclusions: (1) regardless of socio-economic, educational attainment, or job position, the instrument appeared to communicate to and elicit appropriate responses from this mini-sample; (2) all items appeared to be relevant and appropriate as attested by the fact that each item received some response, and the response patterns showed a significant and discriminatory spread over the entire range of items.

#### Survey Procedures

Sampling, for distribution of the survey instrument, was by stratification. Regional groupings constituted the primary stratification for the sample; that is Kentucky's eight Title III regions were used

as perimeters for further sub-grouping. (See Appendix B for a map showing these eight regions.) Table 1 shows the distribution pattern for the entire sample and Table 2 shows a further elaboration of the citizens' group included in the sample.

Beginning in February, 1970, the distribution of survey instruments was implemented. Copies for professional educators were packaged for the superintendents of all 193 public school districts, along with instructions for further local distribution. Private schools were sampled on the same basis as public schools; that is, a twenty-five percent random sample of all schools with eight or more teachers. Principals then chose a random sample of twenty-five percent of their teachers, using an alphabetical selection, and a total sample of special school personnel such as guidance counselors and librarians. All central office personnel, including the superintendent, were included in the sample, as were all board members. The distribution of instruments for the citizens' groups was made by mail, either using lists of names submitted by the Advisory Committee or mailed directly by an official of a group represented in the Advisory Committee. Table 3 presents the numbers of respondents, by stratified group, for each region and for the total state.

## THE SURVEY FINDINGS

### PART I

The displays of response data which follow are of two orders:

(1) data and derived ranking of General Needs, or the ten categories of needs, and (2) data and ranking of the Specific Needs clustered under each of the general categories. (The respondents were instructed first to check the four of the ten General Needs which ". . . you feel should be given more attention in your school district," and second to check the four Specific Needs in each of the four selected General Needs categories in terms of "most needed attention." That is, each respondent identified four General Needs, and sixteen Specific Needs.)

The responses of the 5,126 persons included in the survey sample were transposed to data cards and treated by computer to yield frequency rank by prescribed population groups. Frequency ranking was used to provide the primary measure of the criticality of learner needs; subsequently, these ranking profiles were subjected to examination and validation by study groups in each of the Title III regions. (Comparison of ranking relationships among the various population groups was accomplished by the Spearman rank order correlation technique

$$\left( r_s = 1 - \frac{6 \sum d^2}{N(N^2-1)} \right).$$

An arbitrary level of statistical significance was fixed at .05, and to simplify the task of data interpretation each of the following tables shows the correlation coefficients and has encircled all those which fall below this level of significance.

Ranking of General Needs

Table 4 shows how the total respondents in each Title III region ranked the ten General Needs identified for this study. An examination of these data reveals that a significant relationship exists among the rank profiles of the eight regions. Further, the relationships between the rankings assigned the General Needs at the state level (composited) and those assigned within each region were of a particularly high order (.90 and above). Hence, it must be concluded that there is significant agreement state-wide in the ranking of General Needs in Kentucky regardless of where the respondents reside.

Ranking of Specific Needs

Since a significant relationship was found between the state rankings and the rankings of each Title III region and among the rankings assigned regionally, it was then necessary to determine whether similarly significant relationships exist in terms of Specific Needs.

Tables 5-14, therefore, show the state and regional ranks for each of the Specific Needs included in the survey, and corresponding rank order coefficients.

Since none of the rank order coefficients in Tables 5-14 fall below the .05 level of probability, it may be assumed that there is significant agreement among the total sample population on the criticality of Specific Needs in Kentucky.

Ranking of Needs by Gross Population Groups

But, of course, Tables 5-14 contain only composite data for the state and each of the Title III regions. These data, while useful at the state and regional levels, nevertheless, do not provide the precise specificity for efficacious utility. Tables 15-25 provide additional data toward this end by showing a further analysis of response by more specific population groups within each region. These tables show ranks, number of respondents from Public School Personnel, Non-Public School Personnel, and Citizens. Further, they then divide the total respondents into two groups, those from public school districts which expend more than the Kentucky average per pupil for education and those from districts which expend less than the Kentucky average, and display ranking profiles for these two groups.

<sup>a</sup>Coefficients encircled indicate  $P < .05$ .

A casual examination of the rank assignments made by each group in Tables 15-25 indicates some noticeable variation in the values assigned to the General Needs (Table 15), and even more variation in rank assignments in Specific Needs. However, an examination of the correlation matrices would indicate that only in three instances do the coefficients fall below the .05 level of significance. (Between the Public School Personnel and Non-Public School Personnel in the Specific Needs of Citizenship; between the Non-Public School Personnel and Citizens, and between the Non-Public School Personnel and respondents from districts which spend less than the Kentucky average per pupil for education in the Specific Needs category of Physical and Mental Health).

Further examination of these tables reveals that the responses of the Public School Personnel's rankings correlated higher with the Citizens' than with the Non-Public School Personnel except in School Readiness (Table 23a) and Social and Economic Disadvantages (Table 24a). Possibly this is explained by the relationship of these two General Needs to the actual or perceived performance of the professional--both public and non-public.

Possibly because of the variation in the number of respondents included in each group, the state rankings correlated highest with those of Public School Personnel except in the Specific Needs under Social and Economic Disadvantages (Table 24) where the Citizens' rankings had a very slightly higher correlation (.976 to .988).

It is also interesting to note that the type of districts (above and below Kentucky's average pupil expenditure) rankings had very high

correlations. All except four were above .95. Of these four, two were above .925 and two (Citizenship and Physical and Mental Health) were tied at .806.

From the data in Tables 5-14, the obvious conclusions are to the effect that the state rankings correlate significantly with those assigned by the type of respondent (Public School Personnel, Non-Public School Personnel and Citizens) and with those assigned by all respondents in two types of districts (above and below Kentucky's average pupil expenditure). Further, one may conclude that the Non-Public School Personnel perceives learners slightly (but not significantly) different from their counterparts in the public schools and from citizens. One also may conclude that the rankings of the needs were not influenced by the per pupil expenditure of the respondents' school districts. Therefore, the data in these tables again support the rankings assigned the General and Specific Needs at the state level.

#### Relationship Profiles Among Specific Population Groups

The data presented to this point have dealt with large composite population groups. Further analysis of each of these larger groups would seem to be in order; therefore, Tables 26-36 display Spearman rank order coefficient matrices showing relationships among the twenty-nine identifiable respondent groups in terms of how they ranked the general and specific learner needs. (Refer to Table 3 for the size (N) of each of these groups.) Each of these tables has encircled all the coefficients which fall below the .05 level of significance (.648), thus readily observable patterns of divergence can be distinguished. In Table 26 (General Needs), for example, the two most divergent groups are "Other School Personnel" (No. 5), and "Economic Opportunity" (No. 27). Also,

showing considerable divergence are "Supervisors" (No. 6), "Title I Coordinators" (No. 7), "Non-Public Central Office" (No. 14), "Kentucky Medical Association" (No. 24); and "Kentucky Press Association" (No. 26).

Table 27 reflects almost unanimous agreement of the total sample in ranking the Specific Needs under the heading of Learning Skills.

Note that, with only four exceptions, only groups 7 (Title I Coordinators) and 14 (Non-Public Central Office) are in significant disagreement with the other 27 groups.

Table 28 shows that the most divergent groups, in response to the Specific Needs in the Basic Knowledge Areas category, are (1) Public School Principals, (2) Chamber of Commerce, and (3) AFL-CIO persons.

Table 29 portrays the following groups as varying significantly: Other School Persons (Public), Non-Public School Principals, Non-Public Central Office, Economic Opportunity, and Human Rights persons.

Table 30 shows mainly one group in disagreement: Non-Public School Others.

Table 31 shows scattered disagreements throughout the matrix, excluding all ten groups of Public School Personnel who would seem to agree with each other.

Table 32 has the following group divergencies: Non-Public School Principals, Non-Public School Others, Non-Public Central Office, Economic Opportunity, AFL-CIO, and Human Rights Commission.

Table 33 shows 14 groups in significant disagreement: Other Public School Persons, Non-Public School Principals, Non-Public Others, Bankers Association, Council of Churches, Broadcasters Association,

Farm Bureau, Higher Education, Municipal League, Associated Industries, Federation of Womens Clubs, Kentucky Press Association, AFL-CIO, and Human Rights Commission.

Table 34 also shows considerable disagreement. In ranking the specific needs in the General Needs category of School Readiness, only the Public School Personnel groups seem to be in agreement.

Table 35 shows that only four groups are in significant disagreement in ranking the Specific Needs of Social and Economic Disadvantages: three groups in the Non-Public School Personnel category (Principals, Others, and Central Office) and one group in the Citizens category (Farm Bureau).

Table 36 has only two groups that vary significantly: AFL-CIO, and Human Rights Commission.

○ = Not significant at .05 level

\*\*\*

In summation, Tables 26-36 would seem to suggest that special interest groups do indeed have some differences of opinion concerning learner needs in Kentucky. This is to be expected, and is desirable in that each group needs to maintain a focus of interest lest that domain be neglected in planning. Perhaps the variance in size (N) among these twenty-nine groups accentuated the disagreements in ranking, a factor that was not corrected in the statistical processes of this study.

Observationally, the categories of specific needs which resulted in the greatest disagreement among the various groups are in descending order of greatest disagreement:

1. Physical and Mental Health
2. School Readiness
3. Human Relations
4. New Approaches to Learning
5. Vocational Knowledge and Skills
6. Basic Knowledge Areas
7. Social and Economic Disadvantages
8. Physical or Mental Differences
9. Citizenship
10. Learning Skills

Appendix C provides a further display of data that have been regionalized to provide more assistance in programming in each Title III region of Kentucky.

## Summary of Findings

### Part I

The preceding data would seem to be sufficient evidence to warrant the following conclusions:

- 1) There is significant agreement among all major population groups identified in this study concerning the criticality of the General Needs of learners in Kentucky. Therefore, considerable credence should be accorded the following Kentucky rank order profile of General Needs: (in descending order of needed attention).

"Learners in Kentucky need more assistance with . . ."

1. Learning Skills
  2. Vocational Knowledge and Skills
  3. Human Relations
  4. New Approaches to Learning
  5. Citizenship
  6. Basic Knowledge Areas
  7. Social and Economic Disadvantages
  8. School Readiness
  9. Physical or Mental Differences
  10. Physical and Mental Health
- 2) While there is limited disagreement among the eight Title III regions in regard to the criticality of Specific Needs, it should be noted that these Specific Needs are merely representations of their respective General Needs and were not intended to be all-

inclusive. The major disagreements are exemplified in the Specific Needs of General Needs 4.00 (Citizenship), and 6.00 (Physical and Mental Health).

- 3) When item analyzed, generally the respondents perceived more learner needs in the skills area (directly or tangentially related to the psychomotor domain) and in the affective domain than in area of cognition.
- 4) The data would seem to indicate that, by and large, a break with traditionalism permeates these perceptions of learner needs. For example, Basic Knowledge Areas, once the raison detre for schools, was relegated to sixth place in the frequency ranking. Likewise, New Approaches To Learning, which includes a sub-cluster of needs that imply the use of modern technology and highly specialized assistance, was accorded fourth place in frequency ranking.
- 5) Somewhat surprising, the factor of wealth (per pupil expenditure) apparently had little effect upon the manner in which the respondents chose the learner needs. As Tables 15-25 show, extremely high correlations exist between rankings of respondents from districts above the Kentucky average for per pupil expenditure and those respondents from districts below the Kentucky average.
- 6) There were significant disagreements among the rankings of the twenty-nine sub-groups, where rank order coefficients are shown in Tables 26-36; however, this probably was the result of the considerable variance of the N among these groups. Nevertheless, this information should be useful for local district and regional educational planning.

## THE SURVEY FINDINGS

### PART II

Part I of the survey instrument forced the respondents to make choices from the listed learner needs. Obviously, this is a procedure that places severe constrictures upon a study attempting to focus in a comprehensive manner toward identifying critical learner needs. To obviate this limitation, Part II was designed as a simple, open-ended response sheet to elicit additional descriptions of learner needs.

No count was made of the actual number of persons who responded to Part II; however, their need descriptions were treated to a content factoring process, nineteen categories of needs were identified, and the frequency of response was recorded according to the appropriate category. Table 37 shows the state composite frequency response to Part II. (Appendix D has these response data regionalized.)

TABLE 37--Response Profile to PART II  
State Composite

	Pub. Sch. Pers. Freq.	Sch. Pers. Freq.	Non-Pub. Sch. Pers. Freq.	Citizens Rank Freq.	Total Rank Freq.
<b>Special programs:</b> (Special education for mentally retarded; special programs for slow learners; special programs for the college-bound; special programs for learners from poor socio-economic backgrounds; special research and experimentation)					
Varied curriculum: (Afro-American studies; ecological courses; consumer education; economic education; remedial mathematics; sex education)	153	1	11	1.5 39	2 231
Vocational education:	113	2	8	7.5 42	1 163

Lower pupil-teacher ratio	73	9	0	19 6	18 79
Human relations	54	14	4	12.5 11	15 69

TABLE 3a --Spearman Rank Coefficients

$$.462 = p < .05$$

Table 37 would seem to indicate that relatively few respondents took the time, or had additional needs to identify, incompleting Part II. The actual percentage of frequency response was somewhat low. The most frequently described needs fell into the Special Programs category, where there were only 153 responses (3.89 percent) of 3,925 Public School Personnel that were in the survey sample, 11 responses (4.21 percent) of the 261 Non-Public School Personnel which made up their survey population, and 39 responses (4.13 percent) of the 943 Citizens included in the sample. However, educational planners in Kentucky should not dismiss these responses lightly without considering that such written responses took both thought and effort. Perhaps these responses carry with them an intensity of feeling not present in the findings of Part I. At any rate, the data in Part II should be given very careful consideration.

Table 37a, which shows rank order coefficients between the major groups, indicates significant relationships between all groups except between Non-Public School Personnel and Citizens (.462 = <.05).

**APPENDIX A**

**THE SURVEY INSTRUMENT**

60a

77

## GENERAL INFORMATION

The purpose of this survey questionnaire is two-fold: (1) to determine from a wide-range of persons their opinions of the most important needs of Kentucky children and youth who may be classified as Learners, and (2) to lay the groundwork for cooperative development of meaningful goals and objectives for Kentucky Education in the Seventies. The question which needs to be answered is: WHAT ARE KENTUCKY'S LEARNERS' GREATEST NEEDS? Your response to this questionnaire will help answer this question.

## SPECIAL INSTRUCTIONS

This questionnaire requests that you make a total of only twenty choices in answer to the above question. Sixteen of these choices depend upon the first four you are asked to make; therefore, please follow these steps:

- Step I. Read or scan all pages of survey form
- Step II. Check appropriate items below
- Step III. Turn page for specific directions

The school district to which I refer is \_\_\_\_\_

Check the capacity in which you are responding or most appropriate "other" category:

	School Personnel	Other
1.	Classroom teacher	10. _____ Member of local board
2.	Principal	11. _____ University staff
3.	Superintendent	12. _____ PTA member or parent
4.	Guidance Counselor	13. _____ Farm Bureau
5.	Special Ed. Teacher	14. _____ Labor
6.	Supervisor	15. _____ Industry
7.	Title I Coordinator	16. _____ Business
8.	Dir. Pupil Personnel	17. _____ Civic Club
9.	Other Central Office	18. _____ Woman's Club
	Specify	19. _____ Other Specify

## GENERAL NEEDS

Each of the items below identifies a commonly accepted goal or need of education. Schools in your district are accomplishing more with some of these than with others. Therefore, from the list of ten General Needs, check (✓) the four (4) which you feel should be given more attention in your school district

Preface each statement with: Learners in my school district need more assistance with

**1.00 LEARNING SKILLS**

(Those skills necessary for learning the basic knowledge and acquiring the essential attitudes for effective learning)

**2.00 BASIC KNOWLEDGE AREAS**

(The knowledge in those areas commonly considered to be the essential content of a school curriculum)

**3.00 VOCATIONAL KNOWLEDGE AND SKILLS**

(The knowledge and skills related to the world of work so as to become economically productive and self-sufficient)

**4.00 CITIZENSHIP**

(The knowledge and skills necessary for the fulfillment of citizenship responsibilities)

**5.00 HUMAN RELATIONS**

(The attitudes and perceptions which enhance the quality of human interaction and relationships)

**6.00 PHYSICAL AND MENTAL HEALTH**

(The knowledge, attitudes, and skills necessary for good physical and mental health)

**7.00 NEW APPROACHES TO LEARNING**

(School programs which are innovative and different in terms of purpose, curricula, facilities, learning materials, and instructional processes)

**8.00 SCHOOL READINESS**

(The knowledge, skills, and attitudes which contribute to success in school before they enter the first grade)

**9.00 SOCIAL AND ECONOMIC DISADVANTAGES**

(The special knowledge, skills, attitudes, and programs to overcome economic and social disadvantages)

**10.00 PHYSICAL OR MENTAL DIFFERENCES**

(Special programs for learners with major physical, mental, and emotional differences).

If you selected General Need number 1.00, LEARNING SKILLS, please complete this page. If this need was not among the four you checked, please go on to the next page.

Please check four (4) of the following more specific sub-needs which you feel need the most attention in your school district.

Preface each statement with: Learners in my school district need more skill in . . .

- 1.01 Reading, writing, mathematics, listening, and speaking
- 1.02 Thinking logically and critically in solving problems
- 1.03 Using a variety of materials and equipment in locating and using information
- 1.04 Making choices and decisions based on the best information available
- 1.05 Analyzing their own learning skills, abilities, and needs and seeking assistance when it is needed
- 1.06 Applying knowledge or information to problems in a variety of situations
- 1.07 Relating information from one subject area to another
- 1.08 Directing their own learning activities
- 1.09 Memorizing and retaining information
- 1.10 Asking appropriate questions.

If you selected General Need number 2.00, **BASIC KNOWLEDGE**, please complete this page. If this need was not among the four you checked, please go on to the next page.

Please check four (4) of the following more specific sub-needs which you feel need the most attention in your school district. (The areas listed are the Adopted State Program of Studies for Kentucky)

Preface each statement with: Learners in my school district need to learn more in . . .

- 2.01 English and language arts
- 2.02 Social studies
- 2.03 Arithmetic and mathematics
- 2.04 Sciences
- 2.05 Health, physical education and safety
- 2.06 Music and art
- 2.07 Foreign language
- 2.08 Industrial arts
- 2.09 Business education
- 2.10 Vocational education.

If you selected General Need number 3.00, **VOCATIONAL KNOWLEDGE AND SKILLS**, please complete this page. If this need was not among the four you checked, please go on to the next page.

Please check four (4) of the following more specific sub-needs which you feel need the most attention in your school district.

Preface each statement with: Learners in my school district need more opportunities that provide for . . .

- 3.01 Understanding a wide variety of careers so that they will be better prepared to make wise choices
- 3.02 Acquiring occupational skills and knowledge to qualify them for employment immediately after high school
- 3.03 Developing basic occupational knowledge and skills at the high school level that lead to a planned post high school career program
- 3.04 Acquiring knowledge and skills to assume their dual roles as home-makers and wage-earners with consumer education an integral phase
- 3.05 Assisting students with physical or mental handicaps to prepare for their economic future
- 3.06 Assisting students with social, economic, and academic handicaps to prepare for their economic future
- 3.07 Using the community resources in business and industry in developing vocational skills and knowledge
- 3.08 Assisting students needing financial aid to remain in school and prepare for their economic future
- 3.09 Developing occupational knowledge and skills through an organized program for high school graduates and dropouts
- 3.10 Improving the knowledge and skills of employed and unemployed adults in the community.

If you selected General Need number 4. 00 CITIZENSHIP, please complete this page. If this need was not among the four you checked, please go on to the next page.

Please check four (4) of the following more specific sub-needs which you feel need the most attention in your school district.

Preface each statement with: Learners in my school district need more assistance with

- 4. 01 Understanding the structure and function of local government
- 4. 02 Understanding the individual's responsibilities in a democracy
- 4. 03 Understanding the right and limitations of dissent
- 4. 04 Understanding economic, civil, and social rights
- 4. 05 Practicing democracy and democratic processes within the school
- 4. 06 Understanding the respecting statutory laws and regulations
- 4. 07 Understanding and appreciating our economic and political systems in comparison to other systems
- 4. 08 Understanding world citizenship responsibilities
- 4. 09 Understanding that for every right and privilege there is a corresponding responsibility
- 4. 10 Understanding the purpose, structure, and functioning of the United Nations.

If you selected General Need number 5.00, HUMAN RELATIONS, please complete this page. If this need was not among the four you checked, please go on to the next page.

Please check four (4) of the following more specific sub-needs which you feel need the most attention in your school district..

Preface each statement with: Learners in my school district need assistance with .

- \_\_\_\_ 5.01 Knowing themselves and developing positive attitudes toward their own strengths, weaknesses, attitudes, and behavior
- \_\_\_\_ 5.02 Understanding other people and developing positive attitudes for their worth and dignity regardless of age, sex, race, religion, or social status.
- \_\_\_\_ 5.03 Understanding and appreciating our social order and their roles in it
- \_\_\_\_ 5.04 Understanding how to work with and relate to individuals and groups
- \_\_\_\_ 5.05 Wanting to learn and recognizing the importance of learning in the fulfillment of their potential
- \_\_\_\_ 5.06 Accepting and appreciating work as a necessary part of their lives
- \_\_\_\_ 5.07 Accepting responsibility for their own actions and for society
- \_\_\_\_ 5.08 Developing a moral and ethical code by which they control their lives and relationships
- \_\_\_\_ 5.09 Developing a sense of commitment to purposeful, challenging, and rewarding goals
- \_\_\_\_ 5.10 Understanding and appreciating their culture and valuing those cultural attributes which have enabled man to survive and accomplish.

If you selected General Need Number 6.00, PHYSICAL AND MENTAL HEALTH, please complete this page. If this need was not among the four you checked, please go on to the next page.

Please check four (4) of the following more specific sub-needs which you feel need more attention in your school district.

Preface each statement with: Learners in my school district need more . . .

- 6.01 Physical activities at all age levels
- 6.02 Positive and realistic self-images
- 6.03 Understanding of the value of teamwork so that they may know the outcomes of cooperation and competition
- 6.04 Understanding of their abilities, interests, attitudes, and behavior so as to contribute to better mental health
- 6.05 Understanding of nutrition and the selection of more nourishing foods
- 6.06 Understanding of the individual's responsibilities toward achieving a clean, safe, and healthy environment
- 6.07 Understanding of the structure and functions of the human body
- 6.08 Understanding of the role of the family in the development of wholesome personal characteristics
- 6.09 Understanding of the role of the school in the development of good mental health
- 6.10 Positive attitudes toward the various functions of the human body.

If you selected General Need number 7.00, **NEW APPROACHES TO LEARNING**, please complete this page. If this need was not among the four you checked, please go on to the next page.

Please check four (4) of the following more specific sub-needs which you feel need the most attention in your school district.

Preface each statement with: Learners in my school district need more assistance in learning from . . .

- \_\_\_\_ 7.01 Programs that emphasize contemporary content relevant to family life and problems of everyday living
- \_\_\_\_ 7.02 Opportunities to examine and resolve problems rather than memorize predetermined, isolated information
- \_\_\_\_ 7.03 Specialized school personnel who attempt to diagnose learning needs, prescribe and administer treatment, and evaluate progress
- \_\_\_\_ 7.04 Opportunities to use and learn from the use of new types of instructional materials and media
- \_\_\_\_ 7.05 Programs which provide for different and more productive ways of using learners' time in school
- \_\_\_\_ 7.06 Opportunities to learn on their own and at their own rates
- \_\_\_\_ 7.07 Programs that make a wider use of the community for learning resources and as a learning laboratory
- \_\_\_\_ 7.08 Opportunities for more individualized attention and assistance from instructional and guidance/counseling personnel
- \_\_\_\_ 7.09 Programs that are housed in facilities that enable them to work independently and in small and large groups
- \_\_\_\_ 7.10 Programs that change as the learners change and as new materials, equipment, methods, and knowledge become available.

If you selected General Need number .00 SCHOOL READINESS, please complete this page. If this need was not among the four you checked, please go on to the next page.

Please check four (4) of the following more specific sub-needs which you feel need the most attention in your school district.

Preface each statement with: Pre-school children in my school district need to . . .

- \_\_\_\_ 8.01 Learn to live, work, and play effectively with children their own ages
- \_\_\_\_ 8.02 Learn to adjust to the expectations and authority of non-parent adults
- \_\_\_\_ 8.03 Be introduced to a routine or controlled environment
- \_\_\_\_ 8.04 Learn to control themselves and adjust to group behavior
- \_\_\_\_ 8.05 Develop verbal communications skills
- \_\_\_\_ 8.06 Develop skills in taking care of themselves
- \_\_\_\_ 8.07 Be exposed to the world of pictures, books, and other sources of information
- \_\_\_\_ 8.08 Have their limited experiences supplemented so as to have equal opportunity to learn in school
- \_\_\_\_ 8.09 Sense a supportive relationship between their homes and the school
- \_\_\_\_ 8.10 Develop ways of expressing themselves in drawing, music, and behavior.

If you selected General Need number 9.00 SOCIAL AND ECONOMIC DISADVANTAGES, please complete this page.  
If this need was not among the four you checked, please go to the next page.

Please check four (4) of the following more specific sub-needs which you feel need the most attention in your school district

Preface each statement with: Learners in my school district who have social and economic disadvantages need . . .

- 9.01 Assistance in acquiring necessary learning skills
- 9.02 Opportunities to acquire those knowledges and experiences common to children who are not disadvantaged
- 9.03 Individual attention from teachers
- 9.04 Special assistance in overcoming social barriers associated with being disadvantaged
- 9.05 Special assistance in determining specific learning needs
- 9.06 Experiences to assist them in learning to participate more adequately in our social, economic, and political systems
- 9.07 Different kinds of learning materials
- 9.08 School schedules adjusted to accommodate different kinds of learning experiences
- 9.09 Assistance in linking the world of their homes to the world of the school and the world of work
- 9.10 Different school expectancies of them and different methods used with them.

If you selected General Need number 10.00, PHYSICAL AND MENTAL DIFFERENCES, please complete this page. If this need was not among the four you checked, please do not complete this page.

Please check four (4) of the following more specific sub-needs which you feel need the most attention in your school district.

Preface each statement with. Learners who have special physical and mental differences in my school district need special school programs; therefore, my school district needs to provide special programs for learners who are:

- 10.01 Crippled or physically unable to attend school
- 10.02 Crippled or physically handicapped, but able to attend school
- 10.03 Neurologically impaired with learning disabilities
- 10.04 Emotionally disturbed
- 10.05 Visually handicapped
- 10.06 Hard of hearing or deaf
- 10.07 Educable, but mentally retarded
- 10.08 Trainable, but mentally retarded
- 10.09 Physically handicapped with special defects
- 10.10 Mentally gifted or gifted in other ways.

## PART TWO

On the preceding pages your responses have been limited by the items from which you could choose. Undoubtedly, some of the needs you see for the children, youth, and adults of your district were not listed. Therefore, in the space below would you please list any additional learner needs you think are significantly important.
