ABSTRACT

The document examines the adult population of New York State demographically in terms of potential participation in postsecondary continuing education. Information is divided into four sections of supplemental data. Section one, New York State Population, discusses the general characteristics of the adult population (those 25 and over). Section two, Educational Levels, state that less than 12 years of schooling has been received by 47 percent of the state population, with 31 percent receiving 12 years of schooling, and 22 percent having 13 or more years of education. Potential participants in the educational programs number 3.5 million. Section three, Specific Populations to Be Served by Postsecondary Continuing Education, examines women, senior citizens, and the educationally and economically disadvantaged. It is stated that this last group is in the most need of, and least represented in, continuing education programs. Section four, Summary of Report, presents the specific group statistics. Federal census data and estimated adult learning audience for New York State (1970), a list of 1974 New York State legislative bills concerning senior citizen education, two tables regarding New York State's economically disadvantaged, data on the Higher Education Act of 1965, and a legislative memorandum regarding program support are appended.

FOREWORD

The following report was prepared for a number of reasons. First of all, there was a need for the Bureau of Post-Secondary Continuing Education to obtain an immediate overview of the dimensions of the educationally and economically disadvantaged populations as supportive data for a legislative proposal submitted through Department channels for possible action during the 1975 session. (Ultimately, a decision was made not to forward such proposal.) Secondly, the report was seen as providing further information for the staff paper, "Post-Secondary Continuing Education," presented to the Regents at their November, 1973 meeting. Thirdly, it was intended that such a report could provide a kind of framework for a more comprehensive study proposed by the State Advisory Council on Post-Secondary Continuing Education in January, 1974. Further, it was felt that such a report would provide useful direction to the Priority II, Title I, H.E.A. 1965 regional project administrators as they gathered information on needs and resources, which is to become the basis for the 1976 master plan for post-secondary continuing education to be formulated by the Bureau. Additionally, the report has served as a ready reference for responses to questions frequently asked about economically and educationally disadvantaged adults. Finally, the report has served to confirm the selection of priorities for the Annual Amendment to the Statewide Plan for Title I of the Higher Education Act of 1965.

This report was prepared by Lucy T. Comly, special consultant to the Bureau of Post-Secondary Continuing Education, and was edited by Frank E. Hobson, Jr., Chief of the Bureau.

ABSTRACT

Experiences of the Department's Title I, H.E.A. 1965 staff and information gathered by the writer of this report confirm that that segment of New York State's adult population which is classified as "economically disadvantaged" is, also, educationally disadvantaged. Reports compiled by the administrators of such programs as HEOP, EOP, SEEK, and Title I; H.E.A. 1965 also clearly demonstrate that those economically and educationally disadvantaged adults, when provided the opportunity for post-secondary education, take fuller advantage of it than the traditional, regularly-enrolled student and frequently become productive participants in our socio-economic system. While this report does not take the position that "all of the people, aged 25 and over, in New York State are properly motivated and able to profit by exposure to post-secondary learning, it does show that, currently, upwards of 3,500,000 individuals would be likely to find such exposure useful and suggests that at least 2,000,000 would be women and senior citizens--two groups whose potential remains seriously underutilized. For a full discussion of yet another largely bypassed population, Vietnam veterans, the reader is referred to a special report, also prepared by Dr. Comly, entitled, "The New York State Vietnam Veteran: His Immediate and Continuing Needs in Post-Secondary Education."

THE DEMOGRAPHY OF THE NEW YORK POPULATION OF
EDUCATIONALLY AND ECONOMICALLY DISADVANTAGED ADULTS

I. Introduction

A large potential population for post-secondary continuing education exists in New York State, the majority of whom is not presently being served by institutional programs. New York State, in 1970, had 4.9 million adults, age 25 and over, who had less than a high school education and are, therefore, classified as educationally disadvantaged.* The majority of these adults (4.2 million) are white. An additional 3.25 million adults, age 25 and over, reside in New York State who have only completed high school.

Programs such as HEOP, EOP, and SEEK and the Federal Title I, H.E.A. 1965, have been established to meet the special post-secondary needs of these citizens, particularly those in minority groups. However, most of the students in the HEOP, EOP, and SEEK programs are under 25; 65% are black and very few are part-time students. In 1973-74, these State and Federal programs supported 27,600 individuals, a truly miniscule portion of those who might participate in, and benefit from, further post-secondary education.

For the educationally and economically disadvantaged adult population in New York State, special programs, like those sponsored under Title I, H.E.A. 1965, have already demonstrated their need to be continued and expanded. The Priority I programs of study, under Title I, have a two-fold purpose. The first is community service education: providing training for leadership and for effective performance in community agencies, especially in urban ghetto areas. The second purpose of Title I, Priority I, programs has been that of providing post-secondary education to disadvantaged adults who, otherwise, would not have had such opportunity. Some participants transfer to two- or four-year college degree programs after successful completion of Title I credit courses. In 1973, the completion rate for participants in Title I programs was 90%, a remarkable record, considering that 21% of the students had only a junior high school education (See Appendix A.--3 and 4.)

All Priority I programs, under Title I, are of the institutional aid form and provide tuition-free, part-time credit studies for the educationally or economically disadvantaged at an average total cost of less than \$400 per participant. Priority II, Title I, monies provide funding for the development of a regionally-based, Statewide program and Master Plan for assessing all post-secondary education resources,

*Nearly 2 million persons in New York State live at the poverty level; many of these are educationally disadvantaged.

as well as adult participation and needs. Thus the two priorities are designed to serve the State's total adult population although, realistically, about one-third of the 10.42 million adults, 25 or over, or 3.5 million, could be expected to be eligible and motivated to participate in post-secondary continuing education offerings. Still, this group is a considerable segment of the voting and tax-paying population.

Thus it becomes critically imperative that special effort be continued to assure that higher education opportunities are accessible to all New York State citizens who may benefit. By encouraging the adult population to participate in higher education, the State stands to benefit from the increased earning capacity and knowledge resources of its citizens.

II. New York State Population

Of the 18,236,951 New York State residents (1970 Census), 10,418,555 are 25 and over* (57% of the total New York State population); 8,161,135 are 35 and over. (See Appendix A.--1 and 2.)

The New York State Office of Planning Services estimates that the 1970 population of 8,975,547 individuals between the ages of 19 and 60 will grow to:

9,429,584 by 1975;
10,058,035 by 1980.

III. Educational Levels

A. General

Of the total New York State adult population, age 25 and over, 47% have received less than 12 years of schooling, 31% have received 12 years of schooling, and 22% have had 13 or more years of school (Table I and Appendix A.--3 and 4.) A greater percentage of the Black or Puerto Rican populations received less than 12 years of school (60% and 79% respectively) compared to Whites (45%); however, 85% of all adults who received less than 12 years of schooling in New York State are white (4.2 or 4.9 million).

*In the 25 and over population, 88.7% are white, 10.4% are Black, 0.04% are Puerto Rican, and 0.01% are other races.

Table I
Educational Attainment of Persons 25 Years
of Age and Older, 1970, New York State

Years School Completed	Total	White	Black	Other Races	Puerto Rican
Total, 25 and Over:	10,418,555	9,237,969	1,076,959	103,627	370,090
Less than 8 Years:	1,552,365 14.9%	1,284,078 13.9%	248,778 23.1%	38,808 27.8%	156,178 42.2%
8 Years:	1,354,412 13.0%	1,212,412 12.2%	117,389 10.9%	8,601 8.3%	49,962 13.5%
9 to 11 Years:	2,021,200 19.4%	1,727,500 18.7%	283,240 26.3%	14,093 13.6%	86,601 23.4%

Median Years:	12.1	12.1	10.9	12.1	8.6

(Source: New York State Department of Labor, Annual Manpower Planning Report, FY 1975, p. 81.)

B. Potential Population for Post-Secondary Continuing Education

The total potential population (age 25 and over) in New York State which might benefit from post-secondary continuing education includes, as a minimum, those who have completed high school and those who have had an additional one to three years of college education. This population exceeded 4.2 million in 1970 in New York State; of these, 3.25 million had only 12 years of schooling. (Experience with Title I, H.E.A. '65 projects has also shown that, with careful screening, at least 75 percent of those without the high school diploma or its equivalent are able to complete successfully post-secondary credit-bearing offerings.)

Estimates of the number who might actually participate in post-secondary continuing education may be made for (1) degree-credit enrollment and (2) degree-, non-degree, and non-credit enrollment. Nationally,* in 1972, one of fifty men and women (2%) age 35 and over were studying for a degree or training for an occupation.

*U. S. Department of Labor, Monthly Labor Review, October, 1973, p. 39.

Fifty-four percent of these participants were in college or graduate school*; therefore, about 1% of all U. S. adults aged 35 and over currently participate in degree-credit post-secondary education. The estimated participating population, in all forms of post-secondary education (degree, non-degree, non-credit) is considerably larger than for degree-credit programs alone. K. Patricia Cross** estimates that one-third of the nation's adults participate in some formal post-secondary education program. According to this estimate, approximately 3.5 million of those age 25 and over (10.4 million in New York State) are potential participants in all forms of post-secondary continuing education.***

The comparison of potential participants to those actually participating is, presently, impossible to assess for New York State. The part-time post-secondary degree-credit enrollment in December, 1973, amounted to 37.5% of the total degree-credit enrollment (327,341 out of 873,316); however, data are not available, which specify the age or race of these students. At present no data are available on non-credit enrollments in New York State. Credit, but non-degree, enrollment in 1972-73 totalled 21,357 students (98% were part-time) in New York State. The private institutions enroll almost three times as many students in such programs as the public institutions.

IV. Specific Populations to Be Served by Post-Secondary Continuing Education

A. Women

More than one-half, or 5.6 million, of the New York State population age 25 and over (10.4 million) are women. Their population size, by age (25-49) and race, and their educational attainments, are shown in Table II (and Appendix A.--4). Of the total female population age 25 and over, 1.93 million had completed 12 years of school and an additional one-half million had one to three years of college education.

*83.3% were part-time; 16.6%, full-time.

**K. Patricia Cross, Serving the New Clientele in Post-Secondary Education, Princeton, ETS, 1973.

***The Title I, H.E.A., 1965, Guidelines for FY 1975 consider the potential adult learning audience to be one-third of those between age 22 and 55, or 2.55 million adults in New York State in 1975. See Appendix A.--5 for regional estimates.

Table II

New York State Women: Educational Levels Completed Beyond Grade 8

1970 Age	Total Population	4 Yrs. H.S.	1-3 Yrs. College	4 Years College	5 or More	Median School Years Completed
A. ALL New York State Women						
14 and Over	7,296,658	2,414,423	751,029	366,119	212,708	12.0
25 and Over	5,600,894	1,934,177	505,793	301,806	197,223	12.1
25-29	636,022	278,077	88,790	66,539	35,943	12.5

45-49	65,566	18,348	3,674	1,478	1,312	10.8
C. White Women						
14 and Over	6,397,895	2,153,267	689,911	343,935	198,106	12.1
25 and Over	4,942,013	1,740,102	464,063	282,826	183,514	12.1
25-29	529,641	232,620	79,242	61,441	33,191	12.6
30-34	447,524	200,689	56,521	38,785	23,634	12.5
35-39	446,683	203,126	49,959	33,031	21,451	12.4
40-44	506,694	227,880	51,864	31,277	22,906	12.4
45-49	527,160	239,343	52,605	25,260	19,709	12.3

(Data from U. S. Bureau of Census, 1970. See Appendix A.--3 and 4.)

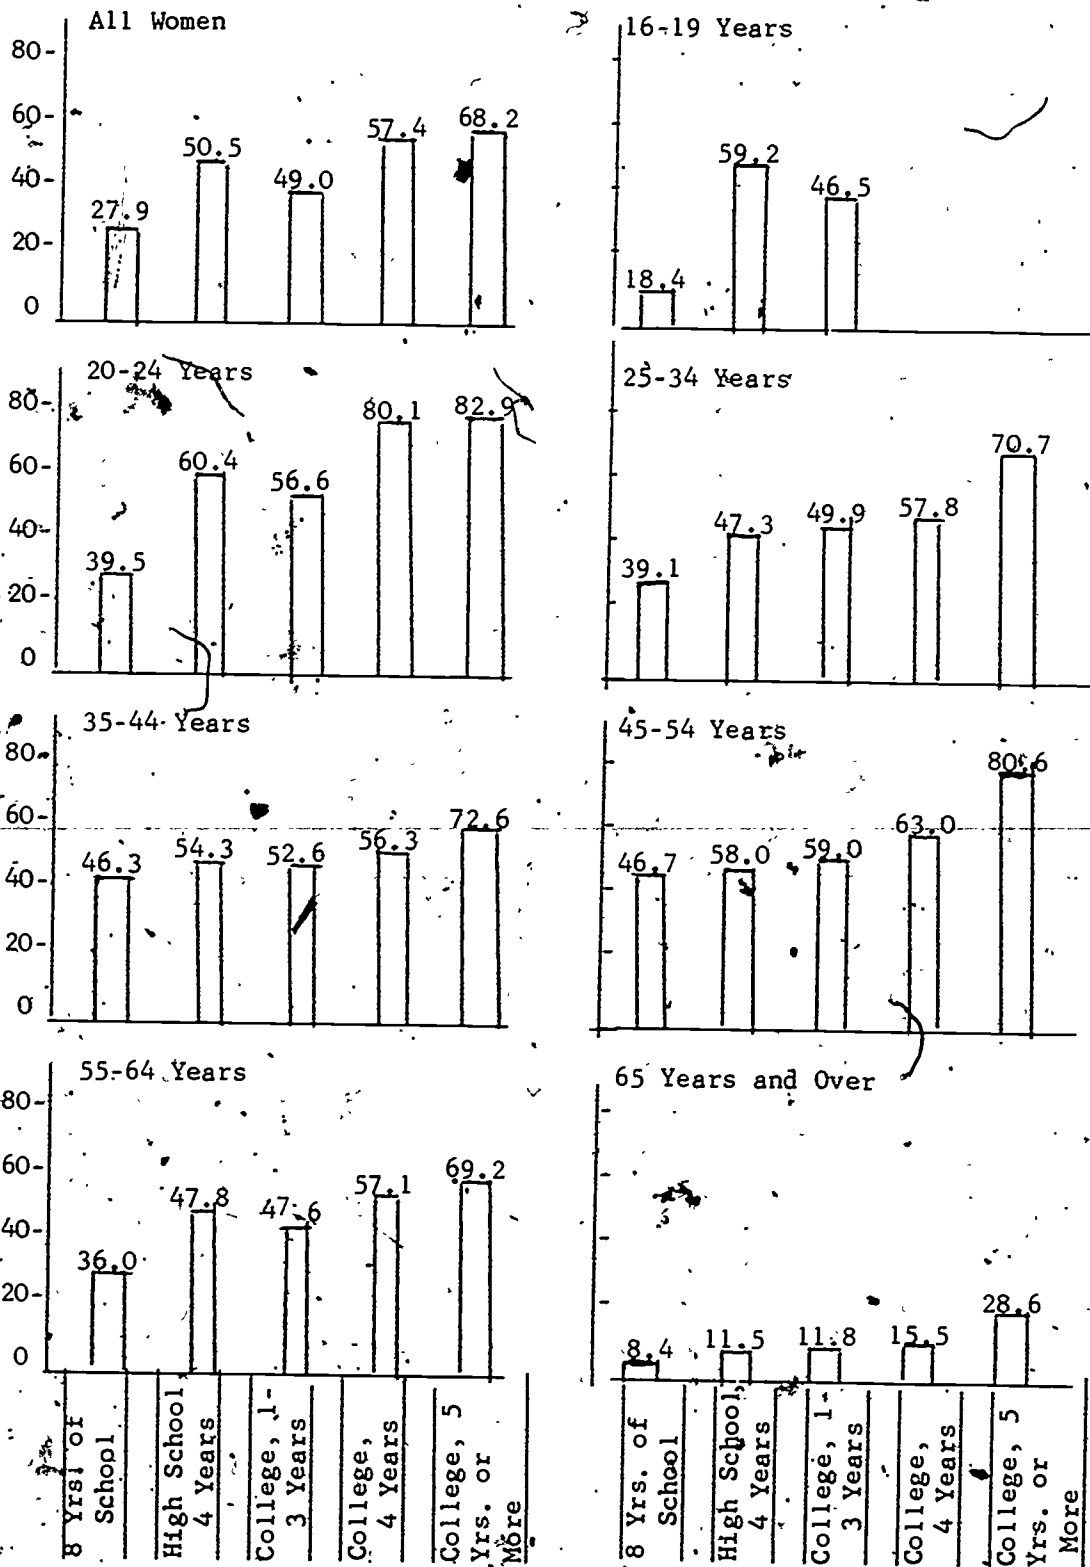

On the average (New York State Department of Labor Manpower Planning Report, FY 1975, page 15), women participate in the labor force at about one-half the rate of men. The rate of participation for women, however, increased dramatically from 1969 to 1972, especially among those with children still at home. Twenty-nine percent of those with children under three years of age were working in 1973, compared to 19% in 1963. Forty-one percent of black wives with pre-school age children were in the labor force in 1972, an increase from 26% in 1969. (Table III)

In general, 57% of American wives with children between 6 and 17 years of age and 45% of the women with children under six worked in 1973. The higher the level of education attained, the greater is the percentage of women in the labor force.

Table III

Percentage of Women in the Labor Force, by Age and Education, March 1972

Source: U. S. Bureau of Labor Statistics, 1972, p. A-11.

Women with children continue to swell the work force, a new study shows.

Economic pressures, divorce, and falling birth rates persuade more mothers to work. The number of children with working mothers rose by 650,000 between 1970 and 1973, the Bureau of Labor Statistics finds, while the number of children in all families fell by 1.5 million. Among wives with children under three years old, 29% were in the labor force in March 1973, up 10 percentage points in a decade.

More than 57% of all wives with children between six and 17 years old worked during 1972, the study shows, compared with 45% of the women with children under six. From 1969 to 1972, the proportion of black working wives with pre-school age children rose to 41% from 26%. Half of all married women had work experience in 1972.

The trend underscores the need for improved child day care as more young mothers seek work, the study notes.

Women participate, in number, equal to men in continuing education programs in the New York State SUNY system.

No information is presently available on the age groups or race of female participants in part-time continuing education programs in public or private institutions in New York State.

Table IV

State University of New York, Continuing Education Programs, February 5, 1974

	Univ. Centers	Ag. & Tech. Inst.	4 Year Colleges	Comm. Colleges	Grand Total
Total Headcount	12,463	8,327	14,123	64,799	99,712
Male	6,511	5,174	6,330	32,106	50,121
Female	5,952	3,153	7,793	32,693	49,591
Credit Program Students	10,246	7,417	7,104	47,848	72,615
Non-Credit Program Students	2,392	3,166	3,719	13,916	23,193

The New York State Education Department's Division of Continuing Education notes that women in the 45-65 age group who are returning to work (because they are widowed or need supplemental family income) have special post-secondary education needs, not unlike those of veterans, senior citizens, and the disadvantaged. Counseling services are needed to provide both psychological support and advice on training and employment opportunities;

training or educational programs are needed for specific skills or for completion of degree programs.* Because one-half of the potential population will be working and raising children, program offerings must be conveniently-located and at suitable times to attract women.

B. Senior Citizens

Of the 10.4 million age 25 and over in New York State, 3.8 million are age 55 and over. The New York State Office for the Aging estimates that only 600,000 of these senior citizens would potentially be interested in post-secondary education. The remainder of the population falls in the near-poverty and poverty level class; as such, these individuals have more fundamental needs-- health care, decent housing, employment.

Those senior citizens who presently participate in programs at Adult Education Centers and Senior Citizens Centers** are primarily interested in retirement planning, leisure crafts, and public and consumer affairs. The State Education Department's Division of Continuing Education states that these senior citizens need, but receive little, counseling and training on how to supplement their incomes and how to utilize their time and skills in serious community efforts. This Division also suggests that any programs offered to senior citizens must be tailored for their convenience and should be tuition-free, day-time, conveniently located, informal, and flexible (drawing on life experience and requiring a minimum of outside work).

Opportunities presently available to New York State senior citizens for continuing education include, among others:

1. Adult education courses, New York State public schools (125)
2. Community colleges
3. Senior Citizens' Centers
4. New School for Social Research, Institute for Retired Executives

*An additional much-needed support service is day or evening care centers for children.

**No data exist on the programs offered or number of participants at Senior Citizens Centers. In 1972-73, Public School (125) Continuing Education Courses totalled 36,281, of which only 419 were entitled "Senior Citizens Education." These courses enrolled 18,295 senior citizens (about 2% of the total enrolled in all adult education courses). Other course categories in which senior citizens were enrolled in small numbers were: Adult Elementary Education; High School Equivalency; Americanization; Art, Music, Drama, Crafts, Non-Occupational Business Education (Estate Planning, Law Everyone Should Know, Investments); and Home Economics Education (Consumer and Home Economics Demonstration Project, Food and Nutrition).

5. Universities--if tuition is waived and courses are non-credit
6. Community agencies--if offering on-the-job training for volunteer work
7. Correspondence courses, including those offered by State University's Independent Study Program
8. American Association for Retired Persons--courses offered at Washington, D. C., and California Institute for Lifetime Learning (enrichment, not occupational courses)
9. External Degree
10. Empire State College

In 1974 the Governor signed into law a provision which permits senior citizens, age 60 and over, to audit State University and community college courses, upon a space-available basis, free of charge (See Appendix B for list of bills related to senior citizen education introduced in the 1974 New York State Legislative session.).

C. Educationally Disadvantaged

Those most in need of, and least represented in, post-secondary continuing education programs are the educationally and economically disadvantaged New York State adults. In 1970, 47.3% or 4.9 million of those age 25 and over in New York State had less than 12 years of school and, therefore, are defined as educationally disadvantaged. (Table I). Eighty-five percent of these disadvantaged are white (4.2 million) (Appendix A.--3 and 4). Thirty-one percent had only 12 years of schooling, a level of education which is rapidly becoming insufficient for the complex technical skills required for many jobs. (Of this latter group, 90% are white.) The U. S. Department of Labor's Occupational Outlook Handbook, 1974-75, states:

"...employment growth generally will be fastest in those occupations requiring the most education and training....A high school education has become a standard for American workers...skill requirements are rising for clerical and other jobs."

The Occupational Outlook Quarterly, Summer, 1974, (U. S. Department of Labor) states that:

"Nearly a quarter of all job openings between 1972 and 1985 are expected to be filled by persons who will have completed four years or more of college (from 1959 to 1972, only 18% of the jobs were so filled).... college graduates will be needed for almost one-third of all white-collar job openings, especially in the professional and technical (3 of 4 openings will require a college degree) and managerial and administrative (1 of 2 openings will require a college degree) fields."

Not only will the job opportunities showing the most growth in the next ten years be closed to the educationally disadvantaged, but the educationally disadvantaged worker has less chance of finding a steady job and is the one on whom unemployment falls most heavily.

D. Economically Disadvantaged

In New York State in 1970 nearly 2,000,000 people lived at the poverty level; that is, 11.1% of the total population, or 15.3% of those age 16 and over, live at the poverty level (see Appendix C.--1). Those who have 12 years of schooling or less constitute the bulk of the population classed as disadvantaged poor in the New York State Department of Labor's manpower "Universe of Need." These people are ones who will need manpower assistance because they are unemployed or under-employed and live near or at the poverty level defined in Appendix C.--2. There are 517,000 disadvantaged poor in the "Universe of Need" (Table V), of whom 95% have 12 or fewer years of education (Table VI).

Table V

"Universe of Need" Population for 1975

Total Population:	2,433,400
Total Poor:	557,000
Disadvantaged Poor:	517,000
Other Poor:	40,000
Total Near-Poor and Non-Poor:	1,876,000
Near-Poor:	629,000
Non-Poor:	1,247,000

(New York State Department of Labor, Annual Manpower Planning Report, FY 1975)

Table VI

Educational Attainment: Disadvantaged Poor in the Universe of Need

Years of School	% of Total	Number
0-7 yrs.	12.2%	63,074
8-11 yrs.	58.8%	303,996
12 yrs.	23.5%	21,495
over 12 yrs.	5.5%	28,435
Total		517,000

Among the disadvantaged poor, 60% are on welfare and only 47% are "job-ready." One-half are in the 22-39 age group (258,500). Forty-three percent are white and fifty-three percent are black among the disadvantaged poor.

Very few (less than 1%) of the educationally (4.9 million) and/or economically (2 million) disadvantaged New York State population age 25 and over are presently being assisted by State or Federal post-secondary education programs, especially in the form of part-time opportunities. Title I, Higher Education Act of 1965, and the programs administered by HEOP, EOP, and SEEK are directed towards the minority populations especially, but cover those who are educationally and economically deprived. Title I programs have involved about 37,000 individuals since 1966; there were 2600 participants in 1973 alone (See Appendix D). In 1973-74, HEOP, SEEK, and EOP had about 25,000 participants. SEEK has full-time students only; HEOP and EOP together had only 1,400 part-time students. HEOP and SEEK primarily serve individuals under age 25; about 2500 participants are 25 or older (Table VII) in these two programs.

Table VII

Enrollment, 1973-74 in EOP, HEOP, and SEEK Programs, New York State

	EOP	HEOP	SEEK	Totals
Total Enrolled	9,850	5,220	9,700	24,770
Full-Time	92-95% (9,062-9,358)	88½% (4,672)	9,700	23,434-23,730
Part-Time	5-8% (500-800)	11½% (600)	-0-	1,100-1,400
Under 21	NA*	50% (2,610)	42% (4,074)	minimum of 6,684
21-25	NA*	25% (1,305)	45% (4,365)	minimum of 5,670
25 and Over	NA*	25% (1,305)	13% (1,261)	minimum of 2,566
Black	66%	65%	NA*	

*NA = Not Available

In summary, less than 1% of the educationally or economically disadvantaged citizens were involved in Title I, H.E.A. 1965 or HEOP-SEEK-EOP programs in 1973-74. No estimate can be made on the number of such individuals who might benefit and are presently participating in any form of post-secondary education. It seems reasonable to assume, on the basis of part-time degree and non-degree credit enrollment figures, that only a small percentage of the 3.5 million* who could be served are participating.

*One-third of the 10.4 million age 25 and over in New York State (from page 2).

V. Summary of Report

Table VIII

A. New York State Population, Aged 25 and over, in 1970--10,418,555-- and Their Educational Attainments (in rounded-off figures based on a total State population of 18,236,951)*

Years of School Completed	Number 25 and over: 10,418,555	% of Total 25 and over	Number 25-54: 6,606,635	% of Total 25-54	Number 55 and over: 3,811,920	% of Total 55 and over
Less than 12	4,900,000	47	2,400,000	36	2,500,000	66
12	3,250,000	31	2,500,000	38	1,000,000	26
1-3 of college	1,000,000	9.6	750,000	11		
4 or more of college	1,240,000	12	965,000	15	311,920	8

*Estimated number, aged 22-55, in 1975: 7,650,735

Table IX

B. Special Target Groups for New York State Post-Secondary Education (in rounded-off figures)

Years of School Completed	WOMEN 25 and over: 5,600,000	% of Total 25 & over	SENIOR CITIZENS 55 and over: 3,811,920	% of Total 55 & over	EDUCATIONALLY DISADVANTAGED*	ETHNIC %	ECONOMICALLY DISADVANTAGED**	ETHNIC %
Less than 12	2,600,000	46	2,500,000	66	4,900,000	88.7 White	1,990,000 (Poverty)	72 White
12	1,930,000	34	1,000,000	26		10.4 Black	1,200,000 (Poor or Near-Poor)	28 Other
1-3 of college	500,000	10						
4 or more of college	570,000	9	311,920	8		.05 PR and other		

**Disadvantaged individuals being served in HEOP, EOP, SEEK, and Title I, H.E.A. 1965 programs in 1973-74: 27,600.

C. Potential Participants in All Forms of Post-Secondary Education:

1. 1,420,000: one-third of the 4,250,000 who have completed 12-15 years of school
2. 3,500,000: one-third of the 10,420,000 who are 25 and over
3. 2,550,000: one-third of the 7,650,000 who are aged 22 to 55.

Appendix B

1974 New York State Legislative Bills Concerning Senior Citizen Education

Carry-overs from 1973:

- A.220 (Mr. Brown) (1/11/74). Provides tuition-free courses to persons over 60 years of age (State University of New York).
- A.4432 (Mr. Levy) (1/11/74). Authorizes community colleges to waive tuition for residents 60 years of age or over.
- A.5080 (Mr. DiFalco). Authorizes City University to provide persons 62 years of age or over up to 2 hours free instruction per week.
- S.6417 (Mr. Beatty). Authorizes Medgar Evers College to waive tuition for Kings County residents over 60 years of age.

No action was taken on any of the above bills.

1974 Introductions:

- A.8660 (Mr. Hawley) (2/8/74). Permits persons 60 years of age or over to audit State University and community college courses free of charge. (Passed Assembly; died Senate Education Committee.)
- A.9116 (Mr. H. J. Miller) (2/28/74). Gives persons 65 years of age and over financial aid of \$20 per course for up to two non-credit and continuing education courses.
- A.10239 (Mr. Stavisky) (3/21/74). Requires all public colleges to waive tuition and fees for matriculated students who are at least 60 years old.
- S.9595-C (Mr. Flynn) (5/21/74). Permits persons 60 years of age or over to audit State University and community college courses, upon a space-available basis, free of charge. (Passed by Legislature, and Signed by the Governor) (Chapter 1002)

Thus, only S.9595-C, among the 1974 bills introduced, became law.

Appendix E

MEMORANDUM IN SUPPORT OF AN "ACT TO AMEND THE EDUCATION LAW TO PROVIDE FULL SUPPORT FOR PROGRAMS IN POST-SECONDARY CONTINUING EDUCATION AND COMMUNITY SERVICE FOR DISADVANTAGED ADULTS AND MAKING AN APPROPRIATION THEREFOR."

Purpose of the bill:

To provide State funds to cover the costs of ongoing and proposed post-secondary community service/continuing education programs for educationally and economically disadvantaged adults.

Summary of the provisions of the bill:

A new section 6454 is added to Article 130 of the Education Law to provide supportive monies to qualified post-secondary education institutions such that two-thirds of the total costs of operating community service/post-secondary continuing education programs for disadvantaged adults will be met. Under this formula, the institutions will be required to supply the remaining one-third of the program costs by "in-kind" contributions. The appropriation will relieve the economically disadvantaged or poor adult of all tuition and standard fee charges. By the same token, the program support monies, by contract, would stipulate assignment to: appropriately qualified administrators, faculty, and counselors; facilities easily accessible to the disadvantaged adults to be served; and innovative programs designed to meet community needs.

Approved programs will have as their objectives the education of bypassed adults for greater participation in the State's socio-economic system and for active, knowledgeable roles in the solution of community problems. Each program's major objective would be the qualification of disadvantaged adults for entry-level and upper-level positions in these human service agencies which have social, health, housing, environmental, and criminal justice concerns. Such programs must include course credit, or life/work experience credit, or field work as acceptable components in training or qualifying these adults for community service.

Statement in support of the bill:

This bill is of particular significance for, although not limited to, urban ghetto areas where the acute problems generated by inadequate education, housing, and employment remain, despite the earlier spotlight of Federal Governmental attention.

Although post-secondary education has provided solutions to such community problems, only a small percentage of the population of disadvantaged adults has been served up to this time. The New York State Department of Labor's "Annual Manpower Planning Report" for Fiscal 1975 states that the "universe of need" includes 557,000 poor persons and 1,250,660 individuals. The latter are unemployed or under-employed because of their age, race, and educational level. The Title I, H.E.A.

1965 program for the years 1966-73 focused on the education of such disadvantaged adults; data on 16,187 of the 36,870 participants show that nearly 50 percent had no post-secondary education prior to program entry. For this same period, available data shows that 37 percent of the participant population may be classified as unemployed or under-employed.

The Labor Department projects that openings in white-collar occupations will continue to provide opportunities for the largest proportion of job-seekers. The educationally and economically disadvantaged adults will remain ineligible for such opportunities and will be incapable of contributing to their communities without the kinds of post-secondary continuing programs to be supported by this bill.

Budgetary implications of the bill:

This amendment to the Education Law is based on the assumption that Title I, H.E.A. 1965 will not be funded beyond the authorized 6/30/75 termination date of the Act. (Termination is also imminent for other Federally-funded community service projects such as the Model Cities program.) The requested State appropriation for 1975-80 is based on total annual amounts requested by successful Title I, H.E.A. 1965 proposals from 1967 to 1974, as opposed to the total sums available.

It is estimated that the following amounts must be appropriated in the years listed to provide the support required:

1975-76	\$ 710,885
1976-77	1,500,000
1977-78	2,000,000
1978-79	2,500,000
1979-80	3,000,000
