DESCRIPTORS Behavioral Objectives; \*Clothing Instruction; Curriculum Development; \*Curriculum Guides; \*Home Economics Education; \*Learning Activities; Learning Experience; Resource Guides; Secondary Education; Social Influences; \*Textiles Instruction; Unit Plan

ABSTRACT

The curriculum guide is organized around major concepts and generalizations on textiles and clothing considered educationally significant. The first major part of the document (15 pages) provides a detailed organizational outline of the behavioral outcomes and generalizations for the unit plans. The material is organized according to levels of maturity: (1) beginning (you), (2) intermediate (your family), and (3) advanced (your future). The second major section (142 pages) provides four unit plans. The first three units, prepared for the three levels of maturity, stress two concepts: the significance of textiles and clothing to the individual in society and acquisition and use of textiles and clothing. Each unit specifies the major concept, areas of concentration, learning level, and behavioral outcomes; and is organized according to coordinated generalizations, learning experiences, and resources for learning. The fourth unit on clothing construction specifies the major concepts, areas of concentration, concepts, and generalizations. It is organized according to learning experiences or activities based on the five clothing construction concepts of compatibility, fitting, flexibility, stabilizing, and shaping. The document concludes with three appendixes: the criteria for learning experiences and teaching procedures, suggestions for individualized instruction, and lists of resource materials. (BP)

\*\*\*\*\*  
\* Documents acquired by ERIC include many informal unpublished \*  
\* materials not available from other sources. ERIC makes every effort \*  
\* to obtain the best copy available. Nevertheless, items of marginal \*  
\* reproducibility are often encountered and this affects the quality \*  
\* of the microfiche and hardcopy reproductions ERIC makes available \*  
\* via the ERIC Document Reproduction Service (EDRS). EDRS is not \*  
\* responsible for the quality of the original document. Reproductions \*  
\* supplied by EDRS are the best that can be made from the original. \*

GUIDELINES FOR CLOTHING EDUCATION

State of Washington  
COORDINATING COUNCIL FOR OCCUPATIONAL EDUCATION  
Vocational Education  
Home and Family Life Section  
Olympia  
1972

## FOREWORD

These guidelines are built around a framework of major concepts and generalizations in textiles and clothing which were selected in relation to the content considered to be important to teach. The behavioral outcomes refer to the student behavior desired as a result of learning experiences. As these are stated in the guidelines they are in general terms. In order to assess achievement, the teacher will need to identify behavioral objectives which are more specific, define in more detail conditions under which behavior is to occur, and establish criteria of acceptable performance.

Suggested teaching plans or unit plans for Section I, SIGNIFICANCE OF TEXTILES AND CLOTHING TO THE INDIVIDUAL IN SOCIETY, and Section II, ACQUISITION AND USE OF TEXTILES AND CLOTHING, are provided to illustrate how the content can be structured to provide a variety of learning experiences to help students gain understandings related to generalizations and to the achievement of behavioral outcomes. These teaching plans include learning experiences which relate to achievement of behavioral outcomes at lower and upper levels of cognition, not necessarily at all six levels of Bloom's "Taxonomy of Education Objectives: The Classification of Education Goals." Though these teaching plans are suggested for the secondary school--Beginning, Intermediate and Advanced--some of the materials may be applicable for post-high school and adult students.

The suggested teaching plans for Section III, CLOTHING CONSTRUCTION, include a scope and sequence chart based on construction techniques or processes rather than the three levels of maturity used in Sections I and II.

Marianne Andrews, Director  
Home and Family Life Education

WASHINGTON HOME AND FAMILY LIFE TEACHERS BELIEVE THAT:

The teacher's attitude and enthusiasm has a great effect on the learner.

Teachers are accountable to students and to their parents for the relevancy of their teaching.

Communication with parents and other community members as a means of seeking their advice and counsel regarding curriculum building can be an aid to the teacher in strengthening the quality of instruction.

Boys as well as girls are consumers and managers of clothing. Providing opportunities for clothing education for all students is a responsibility of the school.

Experiences planned to help the students develop awareness of their responsibilities as consumers of textiles and clothing is an essential part of clothing education.

When a student is aware of the family resources available for clothing management and of the use made of those resources, learning experiences in consumer education will tend to be germane.

Study of how clothing affects self-image and behavior is an inherent part of clothing education.

Self understanding and the relationship of the individual to others may be gained through exploring psychological and sociological aspects of clothing.

Use of a variety of resources, methods, and techniques contributes to achievement of clothing education objectives.

Learning techniques of clothing construction contribute to achievement of various clothing education goals in addition to development of skill in sewing.

A classroom atmosphere which encourages creativity, responsibility and individuality is an asset in achievement of clothing education goals. The attitudes and practices of the teacher are basic to developing and maintaining such a climate.

Selective and flexible use of individualized instruction can serve as an effective means of meeting clothing education needs of students.

When a teacher guides a student to set individual and class goals, to assist in determining the methods of achieving goals, to manage individual resources, and to evaluate results, the student will be able to apply learnings outside the classroom.

It is the teacher's responsibility to acquaint students with the job opportunities which require the knowledge and skills of clothing and textiles.

Learning experiences in clothing education are strengthened when they are applied through extended learnings outside the classroom.

KEY TO USING THE GUIDELINES

These guidelines for Section I, SIGNIFICANCE OF TEXTILES AND CLOTHING TO THE INDIVIDUAL IN SOCIETY, and Section II, ACQUISITION AND USE OF TEXTILES AND CLOTHING, are built around a framework of Concepts, Generalizations and Behavioral Objectives at the Beginning, Intermediate and Advanced Levels. Generalizations with suggested learning experiences and learning resources are identified for each Behavioral Outcome.

The guidelines for Section III, CLOTHING CONSTRUCTION, are based on complexity of construction techniques rather than the three levels of maturity.

Each teacher's teaching plans will vary, depending upon the needs of students and their families and the resources available.

		119			<p>APPRAISE THE EFFECT OF PRODUCTION AND DISTRIBUTION OF CLOTHING AND TEXTILES ON THE CONSUMER.</p> <p>*Methods involved in the production and distribution of fabrics and clothing influence the quality, cost, and availability to the consumer.</p> <p>Quality and quantity of fabrics and clothing influence cost.</p> <p>Designers and manufacturers determine that which is available to the consumer.</p> <p>The textile and clothing industry is affected by consumer response to their products.</p> <p>Fashion values may be more important than economic values to the consumer.</p> <p>Producers and distributors adjust the quality of clothing to the amount of money consumers will spend.</p> <p>Mass production has an effect on standards in ready-to-wear garments.</p>

Pg.	BEGINNING (You)	Pg.	INTERMEDIATE (Your Family)	Pg.	ADVANCED (Your Future)
I. E.	<u>Physiological aspects of textiles and clothing.</u>	78	<p>ANALYZE PHYSIOLOGICAL FACTORS AFFECTING SELECTION OF FABRICS AND CLOTHING.</p> <p>*Clothing facilitates adjustments of the human body to the environment.</p> <p>Fibers, finishes and methods of fabric construction affect heat conduction and environmental conditions; i.e., temperature, humidity, wind, rain, flame.</p>	78	
		80	<p>*Comfort and safety of clothing are influenced by fabric finish, construction, and style, and the suitability of these for various activities.</p> <p>The construction and style of the garment affect body comfort.</p> <p>Comfort of clothing is influenced by style and suitability for a given activity.</p> <p>The safety of clothing is influenced by chemistry of the fiber and fabric and by the construction of the fabric and of the garment.</p> <p>The physical condition and stage of development of the human body influences the type of clothing selected.</p>	80	

Pg.	BEGINNING (You)	Pg.	INTERMEDIATE (Your Family)	Pg.	ADVANCED (Your Future)
42	<p>II. <u>Acquisition and use of textiles and clothing.</u></p> <p>A. <u>Selection</u></p> <p>ANALYZE PERSONAL AND FAMILY VALUES AND GOALS IN REGARD TO CLOTHING.</p> <p>*Choices made in the selection and use of clothing are influenced by individual, peer group, and family value patterns and the relative importance of various clothing goals.</p>	83	<p>→</p> <p>→</p> <p>There may be a relationship between the selection of clothing and the individual's self-concept.</p> <p>There is a tendency to dress according to role expectations.</p> <p>The individual's value system affects his sense of ownership; i.e., borrowing and sharing clothes.</p> <p>Clothing choices may be influenced by a desire to be a pace-setter in fashion or to conform to the group.</p>	122	<p>→</p> <p>→</p> <p>Clothing goals are established by the individual's total environment: economic, physical, climatic, social, and aesthetic.</p> <p>Available resources influence the types of clothing goals selected; i.e., time, energy, skills, money.</p> <p>Clothing goals change with varying social, family, and individual life patterns; i.e., changes in fashion, age and maturity of the individual, stage in the family life cycle, individual, family, local and national economy, mobility of family, role changes.</p>

Pg.	BEGINNING (You)	Pg.	INTERMEDIATE (Your Family)	Pg.	ADVANCED (Your Future)
	<p>Acceptance of his or her clothing choices by others may be held in high priority by an individual.</p> <p>Fads accepted by the peer group influence the individual's choice.</p> <p>Choices of clothing may cause conflict between the student and the parents or peer group.</p>				

Pg.	BEGINNING (You)	Pg.	INTERMEDIATE (Your Family)	Pg.	ADVANCED (Your Future)
46	<p>ANALYZE FABRIC CHARACTERISTICS AND MAKE SELECTIONS IN RELATION TO PERFORMANCE FOR THE INTENDED USE.</p> <p>*The suitability of a fabric for its intended use is dependent upon the nature of the textile, its design, construction, and finish.</p> <p>Textiles are products of fiber and/or yarn, fabric construction, and finish.</p> <p>Fibers and/or yarn may be converted into cloth by various methods such as weaving, knitting, knotting, interlacing, bonding, and felting.</p> <p>Some characteristics of fibers may not be retained in the finished fabric if blended or combined with other fibers or modified during some stage in the manufacturing process.</p>	87	<p>→</p> <p>→</p> <p>Fabrics differ in quality, fiber, construction and finish.</p> <p>The performance of a fabric is dependent upon its fiber, construction and finish.</p> <p>Finishes may be applied to fabrics to produce and control desired qualities.</p> <p>The finished fabric will give more satisfactory service when the characteristics of the fabric are compatible with intended end use.</p> <p>Some characteristics of fibers may not be retained in the finished fabric if blended or combined with other fibers or modified during some stage in the manufacturing process.</p>	124	<p>→</p> <p>→</p>

Pg.	BEGINNING (You)	Pg.	INTERMEDIATE (Your Family)	Pg.	ADVANCED (Your Future)
		<p>90</p> <p>JUDGE QUALITY, SUITABILITY AND DURABILITY OF GARMENT CONSTRUCTION.</p> <p>*Consumers are able to evaluate factors in choosing ready-to-wear clothing when they are familiar with construction techniques.</p> <p>Quality of construction used on a garment is one contributing factor related to cost and expected performance of the garment; i.e., quality in seam allowances, seam finishes, grainline, thread, stretch length, darts, hems, closures, trim, application of sleeves and collar, understitching, excess bulk in seams, etc.</p> <p>Suitability of a garment's closures and trim frequently defines the degree of satisfactory wear.</p> <p>Construction techniques may affect the fit of the garment.</p>	<p>127</p>	<p>The selection of a textile product is related to the use and care needed and the resources available for providing that care.</p> <p>↑</p> <p>↑</p> <p>The suitability of an article for its intended use is dependent upon the construction techniques.</p> <p>The durability of construction relates to the use of the article.</p> <p>The weight and application of interfacing is related to type, style, and quality of a garment.</p> <p>Linings and underlinings serve specific purposes in determining appearance and lasting qualities of a garment.</p>	

Pg.	BEGINNING (You)	Pg.	INTERMEDIATE (Your Family)	Pg.	ADVANCED (Your Future)
50	<p>MAKE DECISIONS IN BUYING CLOTHING AND ACCESSORIES IN RELATION TO NEED, USE, RESOURCES AND SATISFACTIONS.</p> <p>*Skills, knowledge, time, money, and energy are resources that may help in determining selection of clothing and accessories.</p> <p>Factors to consider in selecting ready-made clothing include fabric, workmanship, design and fit.</p> <p>Planning clothes which "go together" may enable an individual to achieve wardrobe unity with variety and economy.</p> <p>The use to be made of the costume and accessories will help determine the style, material, and quality of workmanship desired.</p> <p>Accessories can be selected to complement the individual and her costume.</p> <p>Information provided by labels is one resource which may assist the consumer in buying clothing and accessories.</p>	91	<p style="text-align: center;">↑</p> <p style="text-align: center;">↑</p>	129	<p>MAKE DECISIONS IN MANAGEMENT OF THE FAMILY CLOTHING CONSIDERING FAMILY CLOTHING VALUES AND GOALS AND USE OF RESOURCES.</p> <p>*Factors involved in making clothing decisions include one's needs and desires, family composition, stage of the life cycle, resources, stage of the fashion cycle, mobility of people, climatic conditions and social environment.</p> <p>There are differing needs for clothing at various stages in the family life cycle.</p>
					<p>The stage of the fashion cycle (rise, culmination, and decline) may influence the consumer's decision to buy, i.e., the value placed on high style or lower prices.</p> <p>The availability and use of resources for achieving clothing goals are related to the allocation of resources to other individual and family goals.</p>

Pg.	BEGINNING (You)	INTERMEDIATE (Your Family)	Pg.	ADVANCED (Your Future)
		<p>*The resources available for meeting clothing needs include available goods and services, purchasing power, personal information, ability, time, and energy.</p>	94	<p>Mobility of people may influence clothing needs and choices.</p> <p>Climatic conditions have an influence on clothing decisions, i.e., people living in warm climates may have more clothing that is less expensive while persons living in colder climates may have few clothes that are more expensive and more durable.</p> <p>Social environment is to be considered since persons who are active socially require clothing for special occasions.</p>
			132	<p>*Planning the use of resources available in securing and caring for clothing may conserve these resources.</p> <p>Surveying and evaluating the use of resources available for securing and caring for clothing may assist in the management of the family clothing resources.</p> <p>Resources (human and non-human) influence decisions in relation to: whether to buy ready-made clothing, to make own clothing; amount and kind of clothing to buy.</p>

Pg.	BEGINNING (You)	INTERMEDIATE (Your Family)	ADVANCED (Your Future)
54	<p>RECOGNIZE THE PLACE OF THE PERSONAL WARDROBE IN RELATION TO THE CLOTHING NEEDS OF THE FAMILY.</p> <p>*Personal wardrobe decisions are influenced by the needs and wants of other family members.</p> <p>One's needs and desires influence clothing decisions since one may let "what he wants" get confused with "what he needs."</p> <p>Family composition influences clothing decisions since the number, age, sex and occupation of family members determine clothing needs.</p> <p>Stages of the family life cycle has bearing since clothing needs are related to one's stage of the life cycle.</p>	<p>↑</p> <p>↑</p>	
54			

Pg.	BEGINNING (You)	Pg.	INTERMEDIATE (Your Family)	Pg.	ADVANCED (Your Future)
56	<p><u>II. B. Use and Care</u></p> <p>CARE FOR CLOTHING USING RECOMMENDED TECHNIQUES FOR LAUNDERING, PRESSING, MENDING AND STORAGE.</p> <p>*The type of care needed for a garment will be determined by the characteristics of the textile, construction, finish and ornamentation.</p>	96	<p>APPRaise THE CHARACTERISTICS OF A TEXTILE PRODUCT (FABRIC OR GARMENT) IN RELATION TO ITS CARE.</p> <p>*The type of care needed for a garment will be determined by the characteristics of the textile, construction, finish, and ornamentation.</p>	96	→
	<p>Care information may be obtained from a variety of sources, i.e., manufacturers, co-op extension bulletins, dry cleaners, hang tags, labels, etc.</p>	96	<p>*Characteristics of fabrics result from the fiber used, the method of construction and the finishing processes employed.</p>	96	→
	<p>Care procedure will be determined by personal standards and use of available resources, i.e., money, supplies, equipment, and time.</p>	99	<p>*The selection of a textile product is related to the use and care needed and the resources available for providing that care.</p>	99	→
	<p>Satisfaction may be achieved by using recommended care procedures.</p>	101	<p>*Buying decisions may be dependent upon resources available, intended use, fabric and garment construction.</p>	101	→

Pg.	BEGINNING (You)	Pg.	INTERMEDIATE (Your Family)	Pg.	ADVANCED (Your Future)
59	<p>II C. <u>Responsibilities of Consumers</u></p> <p>BECOME AWARE OF INFLUENCE CONSUMERS HAVE ON PRODUCTION AND SALES OF CLOTHING AND TEXTILES.</p>	103	<p>ACCEPT RESPONSIBILITY FOR IMPROVING STANDARDS OF CLOTHING PRODUCTS AND GAINING INCREASED CONSUMER INFORMATION.</p>		→
59	<p>*The textile and clothing industry is affected by the consumption patterns of individuals and families.</p>	103	<p>*The consumer can improve production and distribution of textiles and clothing by communicating needs, wants, satisfactions or dissatisfactions to the retailer and the manufacturer.</p>	103	→
59	<p>*The consumer's purchase of any item of clothing denotes to the clothing industry the customer's approval of the item.</p>		<p>The customer's choice of merchandise is a guide to the buyer in gearing the store's spending patterns to the requirements of local demand.</p>		
60	<p>Consumer response to fashion changes forces adjustments in the clothing industry.</p> <p>Consumer demand and retail practices have a reciprocal effect upon one another.</p> <p>*The return of items that are unsatisfactory to the consumer is one way of communicating with retailers and manufacturers.</p>		<p>The consumer may be at fault by failing to state his need accurately, failing to ask questions, not knowing what he is looking for, or neglecting to follow the manufacturer's directions for use and care.</p> <p>The concerted effort of consumers can bring about improved standards of clothing products and increased consumer information.</p>		

Pg.	BEGINNING (You)	Pg.	INTERMEDIATE (Your Family)	Pg.	ADVANCED (Your Future)
61	<p>*Irresponsible consumer practices may affect production and sales of clothing and textiles.</p> <p>Careless treatment of clothing and textile items by the consumer, resulting in the return of merchandise is an irresponsible consumer practice.</p> <p>The purchase of merchandise with the intent to use and return for credit is an irresponsible consumer practice which affects production and sales of textiles and clothing.</p>				
63	<p>EVALUATE THE INFLUENCES OF ADVERTISING UPON CLOTHING AND TEXTILES CHOICES.</p> <p>*Advertising through mass media is planned to affect consumer choices.</p> <p>A seller advertises to create a demand for his merchandise.</p> <p>An awareness of misleading statements and false claims in advertising is a safeguard in evaluating advertisements of merchandise.</p>	63	<p>↑</p> <p>↑</p>	63	<p>↑</p> <p>↑</p>

65	<p>MAKE USE OF AVAILABLE CONSUMER AIDS AND PROTECTION IN PURCHASING CLOTHING AND FABRICS.</p> <p>*Information provided by agencies and industry through labels, advertising, and sales persons are resources which may assist the consumer in predicting performance of textiles and clothing.</p> <p>Consumer information obtained from labels or hang tags, advertisements and sales people needs to be critically analyzed before purchasing products.</p> <p>By reading the label or hang tag, a consumer may gain such information as care requirements, fiber content, brand name, and infer performance expectations.</p> <p>As a source of information about performance expectations, sales people may assist the shopper.</p>	105	<p>MAKE USE OF AVAILABLE CONSUMER AIDS AND PROTECTION IN PURCHASING CLOTHING AND FABRICS.</p> <p>*Information provided by agencies and industry through labels, advertising, and sales persons are resources which may assist the consumer in predicting performance of textiles and clothing.</p> <p>Federal laws are in effect that give information and protection to the consumer.</p> <p>The laws fall under various names: Wool Products Labeling Act, Textile Fiber Products Identification Act, Fur Products Labeling Act, Flammable Fabrics Act.</p> <p>Laws protect the consumer by requiring that certain information be placed on labels and hang tags.</p> <p>One purpose of labeling laws is to provide the consumer with accurate information about the fiber content and finish of the fabric.</p>	105	<p>→</p> <p>→</p>

\*SEQUENCE OF CLOTHING CONSTRUCTION TECHNIQUES

LEVEL I

1. Operating & sewing machine
2. Straight machine stitching
3. Recognizing correct machine stitching (tension, length of stitch)
4. Determining grain (lengthwise, selvage, crosswise, bias)
5. Pressing with the grain
6. Simple machine hem and hand hem
7. Finishing a row of stitching (back-stitching)
8. Button application (by hand)

LEVEL II

1. Stay Stitching
2. Curved seams
3. Understitching
4. Plain seams
5. Snap and hook and eye application
6. Follow seam guides
7. Machine basting
8. Gathering
9. Pinning and cutting techniques
10. Waist band

LEVEL III

1. Commercial patterns
2. Preparation of fabric
3. Grain perfection
4. Darts - tucks
5. Pattern layout
6. Markings (transfer of)
7. Facings
8. Zipper
9. Hem finishes
10. Collars
11. Set-in sleeves
12. Button holes (machine)
13. Interfacing
14. Trims
15. Pressing
16. Clipping & grading seams

LEVEL IV

1. Fitting
2. Alterations of a garment
3. Bias seams
4. Seam finishes
5. Under linings
6. Linings
7. Nap fabrics
8. Preparation and cutting of special fabrics (naps, plaids, wools)
9. Pressing special fabrics, and finishes

\*\* LEVEL V

1. Hand worked and bound buttonholes
2. Fitting alteration (shell)
3. Interfacing
4. Hand-pick zipper
5. Stretch and knit fabrics
6. Matching designs
7. Hand details
8. Special types of seams and finishes
9. Special pressing techniques
10. Lining

\*Note: This part of the guidelines use a different form.

\*\*No learning experiences are developed for LEVEL V.

BEGINNING (You)	INTERMEDIATE (Your Family)	ADVANCED (Your Future)
<p>III. <u>Clothing Construction</u> (p. 135)</p> <p><b>SELECTS, USES, AND CARES FOR EQUIPMENT</b></p> <p>The selection, use and care of equipment and supplies influences the quality of the finished product and the rate of construction.</p> <p>Include selection of pins, needles, tape, gauge, sharp shears or scissors, pin cushion.</p> <p>Use and care of equipment: iron, ironing board, sewing machine.</p> <p>Use of pressing equipment: point presser, hem guide, sleeve roll, press mit, press cloth, ham, sleeve board,</p> <p><b>APPLY MANAGEMENT PRINCIPLES IN CONSTRUCTING A SIMPLE PROJECT.</b></p> <p>A clothing project executed through the use of management processes can be an aid in the development of skills, contribute to satisfaction and increase the rate of construction.</p> <p>Processes include:            . Work simplification-            . unit method of construction-            . arrangement of work center-            . planning:</p>	<p>↑</p> <p>↑</p> <p>Include use and care of pressing equipment.</p> <p>SELECT MANAGEMENT PRINCIPLES IN CONSTRUCTING A GARMENT.</p> <p>Decisions related to the use of management principles may contribute to the satisfaction derived from the finished garment.</p>	<p>↑</p> <p>↑</p> <p>Include criteria for selecting equipment; especially sewing machine, irons, pressing equipment.</p>

SUGGESTED PLANS FOR GUIDING LEARNING

-2732

Major Concept I. Significance of Textiles and Clothing to the Individual in Society

Area of Concentration I. A. Interrelationship of Clothing and Culture

Learning Level Beginning

Behavioral Outcome Analyze Present Day Events and Conditions in Relation to Clothing, Design, and Selection

Generalization	Learning Experiences	Resources for Learning
<p>*Dress and self adornment reflect current attitudes and values.</p> <p>Variations in clothing and self adornment exist within a culture as well as among cultures.</p> <p>Variations in clothing and self adornment exist between and within groups, generations, and individuals.</p> <p>Dress takes on new meanings and associations as social environment changes.</p> <p>Clothing and self adornment vary with changing personal values and attitudes.</p> <p>Clothing is "powerful" in communicating values.</p>	<p>As an introduction to this study, view on opaque projector, pictures of costume worn today and in former times which illustrate differences in attitudes and values - Example: sportswear for women today versus 1915-1920. Also show pictures of dress typical of different nations.</p> <p>As a means of increasing understanding of the relationship of history, literature, and art to clothing, read about clothing worn in the past in this and other countries.</p> <p>From reading and from discussion with adults and/or with contemporaries from backgrounds differing from your own, explore how values and attitudes affect clothing.</p> <p>List ways in which values and attitudes affect clothing.</p>	<p>Craig, <u>Clothing A Comprehensive Study</u>, pp. 160-174.</p> <p>Vanderhoff, <u>Clothes: Part of Your World</u>, pp. 2-26.</p>

PLAN FOR GUIDING LEARNING

Major Concept

II. Acquisition and use of textiles and clothing

Area of Concentration

II. A. Selection

Learning Level

Intermediate

Behavioral Outcome

Analyze personal and family values and goals in regard to clothing.

Generalization	Learning Experiences	Resources for Learning
<p>(Continued from preceding page)</p> <p>The individual's value system affects his or her sense of ownership; i.e., borrowing and sharing clothes.</p> <p>Clothing choices may be influenced by a desire to be a pace-setter in fashion or to conform to the group.</p>	<p>Each student choose a celebrity; i.e., Mama Cass, Jackie Onassis, or a specific case situation. For the class present a wardrobe need or needs and suggest an item of clothing or an outfit which would fulfill the need(s) for a specific case situation. Class appraise the suggestions made for suitability to self-concept, activities, roles, etc.</p> <p>Discuss reasons for borrowing and for lending clothing. Address attention to such questions as: Does borrowing clothing contribute to security or to a feeling of belonging? How does borrowing or lending clothing relate to an individual's values? How does this practice influence conformity in dress?</p> <p>On a paper each person lists items related to clothing he or she has borrowed or loaned in the last two months. Include reasons for borrowing or lending clothes. Tabulate for benefit of the class.</p> <p>Make a survey at school to find out factors which influence clothing choices of students (individual goals; individual characteristics; i.e., desire to be a pace-setter or desire to conform; peer group; family members; functional needs; economic needs, etc.)</p>	<p>List of celebrities and/or descriptions of case situations which identify characteristics of individuals.</p>

PLAN FOR GUIDING LEARNING

Major Concept II. Acquisition and use of textiles and clothing

Area of Concentration II. A. Selection

Learning Level Intermediate

Behavioral Outcome Analyze fabric characteristics and make selections in relation to performance for the intended use.

Generalization	Learning Experiences	Resources for Learning
<p>(Continued from preceding page)</p> <p>The performance of a fabric is dependent upon its fiber, construction, and finish.</p>	<p>Bring examples from home or find examples at school of fabrics which are of good quality and those which are of poor quality.</p> <p>Explain how thread count and construction affect fabric performance.</p> <p>Trace the steps in process of manufacture from the time the yarn was woven or knitted into a fabric until it is ready to be sent to the retailer.</p>	<p>Fabrics of good quality.</p> <p>Fabrics of poor quality.</p>
<p>Finishes may be applied to fabrics to produce and control desired qualities.</p>	<p>How do these processes contribute to the appearance and/or to the usefulness of the fabric?</p>	<p>McDermott and Norris, <u>Opportunities in Clothing</u>, pp. 140-146.</p>
<p>The finished textile will give more satisfactory service when the characteristics of the fabric are compatible with intended end use.</p>	<p>From reading and from personal experiences with fabrics, list finishes which affect appearance of a fabric; finishes which improve performance.</p>	<p>McDermott and Norris, <u>Opportunities in Clothing</u>, pp. 147-150.</p> <p>American Home Economics Association, <u>Textile Handbook</u>. (Teacher resource)</p>
<p>Some characteristics of fibers may not be retained in the finished fabric if blended or combined with other fibers or modified during some stage in the manufacturing process.</p>	<p>Individually, in groups, or as a total class, investigate finishes which affect appearance of a fabric and finishes which improve performance.</p> <p>Describe a garment a hypothetical student wants for his or her wardrobe. Identify the purposes the garment is to serve. Choose a fabric you consider will meet quality, appearance, and performance criteria compatible with purposes the garment is to serve. Have other members of the class evaluate your fabric choice.</p>	

Major Concept      II. Acquisition and use of textiles and clothing

Area of Concentration      II. A. Selection

Learning Level      Intermediate

Behavioral Outcome      Judge quality, suitability and durability of garment construction

Generalization	Learning Experiences	Resources for Learning
<p>* Consumers are able to evaluate factors in choosing ready-to-wear clothing when they are familiar with construction techniques.</p> <p>Quality of construction used on a garment is one contributing factor related to cost and expected performance of the garment; i.e., quality in seam allowances, seam finishes, grain-line, thread, stretch length, darts, hems, closures, trim, application of sleeves and collar, understitching, excess bulk in seams, etc.</p> <p>Suitability of a garment's closures and trim frequently defines the degree of satisfactory wear.</p> <p>Construction techniques may affect the fit of the garment.</p>	<p>Watch a demonstration by the teacher, illustrating good and poor quality construction.</p> <p>As individuals or in pairs, investigate features desirable for one type of ready-made garment; i.e., dress, skirt, jeans. For this investigation:</p> <p>Read in one or more texts, do comparison shopping, examine garments at home, talk to an adult about desirable features, etc.</p> <p>Prepare a buyer's guide for use in shopping for a specific type of garment.</p> <p>Have members of the class use the guide to rate some garments (in the collection at school, at home, or in a shop).</p> <p>Revise the shopper's guide if a revision is indicated.</p> <p>Play classroom BINGO as review of guidelines for judging garment construction.</p>	<p>Garments for examination and comparison (borrowed by teacher from individuals or stores or from examples in school teaching aids.)</p> <p>Garments for comparison</p> <p>Stores for comparative shopping.</p> <p>Champion and Barclay, <u>Guide to Homemaking</u>, pp. 66-89.</p> <p>Dunn, Bailey and Vansickle, <u>Steps in Clothing Skills</u>, pp. 159-181.</p> <p>McDermott and Nicholas, <u>Homemaking for Teenagers</u>, Book I, pp. 201-220.</p> <p>Pollard, <u>Experiences in Homemaking</u>, pp. 270-275.</p> <p>Pollard, <u>Experiences with Clothing</u>, pp. 174-192.</p> <p>Todd and Roberts, <u>Clothes for Teens</u>, pp. 147-160.</p>

PLAN FOR GUIDING LEARNING

### III. CLOTHING CONSTRUCTION

This section of the guide was written through the cooperative efforts of a group of home economics teachers enrolled in a summer school course of Washington State University with Dr. Mignon Perry, Chairman of Clothing, Textiles and Interior Design, Miss Joane Wohlgemant, Assistant Professor and staff members of the Coordinating Council for Occupational Education.

It is the belief of this group that there are fundamental concepts to be used in solving problems by those who make their own clothing. Therefore, this part of the guide develops FIVE BASIC CONCEPTS: COMPATIBILITY, FITTING, FLEXIBILITY, STABILIZING AND SHAPING. The concepts and related generalizations are based on those outlined by the home economics teachers in the summer school course. Selected generalizations emphasize information needed to judge when and why a certain construction technique should be used. Additional generalizations dealing with other construction techniques and organizing of activities for sewing are needed to adequately teach clothing construction.

The scope and sequence chart included in this part of the guide is based on difficulty or complexity of construction techniques or processes, rather than the three levels of maturity used in the rest of the guide. Not all techniques listed under a level will necessarily be taught. If the first experience in clothing construction is at the ninth grade, consider LEARNINGS AT LEVEL I AND II. Other facts to consider in determining sequence, besides the logical development of a skill based on difficulty, is the "readiness" of pupils for learning, such as eye-hand and eye-eye coordination, ability to reason in abstracts and see relationships, and previous experiences in sewing outside the homemaking program.

The LEARNING ACTIVITIES given in the guide for each set of generalizations are EXAMPLES to show how they would apply to specific construction techniques. Additional activities will need to be planned by the teacher to achieve complete learning.

The philosophy reflected here is that in teaching clothing construction, the methods used to help students develop generalizations about processes, techniques and management is more important than the end product. Emphasis has been placed on teaching toward development of GENERALIZATIONS, INDIVIDUALIZING INSTRUCTION, and DECISION MAKING as an integral part of constructing a garment.

\* SEQUENCE OF CLOTHING CONSTRUCTION TECHNIQUES

LEVEL I

1. Operating a sewing machine
2. Straight machine stitching
3. Recognizing correct machine stitching (tension, length of stitch)
4. Determining grain (lengthwise, selvage, crosswise, bias)
5. Pressing with the grain
6. Simple machine hem and hand hem
7. Finishing a row of stitching (back-stitching)
8. Button application (by hand)

LEVEL II

1. Stay stitching
2. Curved seams
3. Understitching
4. Plain seams
5. Snap and hook and eye application
6. Follow seam guides
7. Machine basting
8. Gathering
9. Pinning and cutting techniques
10. Waist band

LEVEL III

1. Commercial patterns
2. Preparation of fabric
3. Grain perfection
4. Darts - tucks
5. Pattern layout
6. Markings (transfer of)
7. Facings
8. Zipper
9. Hem finishes
10. Collars
11. Set-in sleeves
12. Button holes (machines)
13. Interfacing
14. Trims
15. Pressing
16. Clipping & grading seams

LEVEL IV

1. Fitting
2. Alterations of a garment
3. Bias Seams
4. Seam finishes
5. Underlinings
6. Linings
7. Nap fabrics
8. Preparation and cutting of special fabrics (naps, plaids, wools)
9. Pressing special fabrics and finishes

\*\* LEVEL V

1. Hand worked and bound buttonholes
2. Fitting alteration (shell)
3. Interfacing
4. Hand-pick zipper
5. Stretch and knit fabrics
6. Matching designs
7. Hand details
8. Special types of seams and finishes
9. Special pressing techniques
10. Lining

\* Note--This part of the guidelines use a different form.  
 \*\* No learning experiences are developed for LEVEL V.

Major Concept III. CLOTHING CONSTRUCTION

Area of Concentration III. A. COMPATIBILITY

Concepts and Generalizations:

Compatibility is the perceived congruity of the personal characteristics of the individual, style in relation to materials, and expectation of a garment by each observer.

- A. The degree of compatibility of a garment is determined by the interrelationship among style (or pattern), fabrics, notions, and construction.
- B. The perceived compatibility of garment parts is the effect of the combined garment variables in relation to personal expectations.
- C. Increased awareness of the components of compatibility increases expectations.

LEARNING EXPERIENCES

LEVEL IV

LEVEL II

LEVEL I

Emphasis-COMPATIBILITY (A and B):

Interrelationship of notions to fabric and personal expectations.

Examine five ready-to-wear garments similar to project to be constructed to see how the trimming, buttons, and stitching affect an individual's feelings about the garment.

Discuss the feelings of class members. Why did some like certain combinations and others not like the combinations. Consider why the type of trimming and buttons not only need to fit the personal expectations of an individual, but should also meet certain characteristics of durability and ease of care.

Emphasis-COMPATIBILITY (A):

Interrelationship of style of garment, fabric, and construction process.

Analyze sample garments made from the same pattern but different type of fabrics to see how the appearance of the garment was affected by use of different fabrics. Discuss the effect of weight and texture of fabric on the appearance of the garment.

Examine several ready-made garments to see how each have been constructed. Look to see number of pattern pieces necessary for the type of dress, if tucks or pleats are used, and how the dress hangs from the floor. List the characteristics of fabric, style and construction.

Major Concept III. CLOTHING CONSTRUCTION

Area of Concentration III. A. COMPATIBILITY

Concepts and Generalizations:

LEARNING EXPERIENCES

LEVEL I

LEVEL III

LEVEL II

LEVEL IV

the room. Write one word describing your first feeling. Now, move closer, unfold fabrics and record your feelings. Discuss how the design created different feelings with different treatment of fabric.

Drape fabrics which have a design on a partner by gathering, folding, or pleating. Determine where the seam might come if a garment were made from the fabric and analyze what might happen to the design.

Select a pattern for the sample fabric given to you by the teacher. Tell why you chose the style of garment you did for the fabric. Collect a sample of fabric for your own project. Use the pattern books to find the style of garment that will compliment your fabric design and texture.

major Concept III. CLOTHING CONSTRUCTION

Area of Concentration III. B. FITTING

Concepts and Generalizations:

Fitting is the adjustment of the garment to the size and shape of the individual. It is the process of making a flat, pliable fabric conform to the curves and bulges of the body.

- A. A well-fitted garment is comfortable, adaptable to the body in motion, and enhances the body.
- B. The fit of a garment will vary with style, fashion, function of the garment and with personal preferences.
- C. The finished, well-fitted garment presents a unified picture and is free of structural wrinkles or gaps between parts.
- D. Fitting problems arise from off-grain fabrics, errors in cutting or construction, figure irregularities, and/or poor choice of size of pattern for the particular figure.

LEARNING EXPERIENCES

LEVEL I

LEVEL II

LEVEL III

LEVEL IV

Emphasis-FITTING (A and B):

FITTING in terms of body shape, style, function, and choice of pattern size.  
Study pictures of garments similar to the one to be constructed to visualize how it needs to fit to be both comfortable and adaptable to the figure. Discuss how clothes need to have social-psychological and physical comfort.  
Find pictures of garment styles that express the feeling of belonging and which reflect fads. Analyze each picture to decide which would require fewer alterations to produce comfort and appearance desired.  
Discuss why the tightness and looseness in garments vary with style of garment,

Emphasis-FITTING (D):

FITTING is the adjustment of the garment to the size and shape of the individual.  
View slides or pictures depicting poorly fitted garments. Discuss why the garment does not present a unified picture. (i.e., It has wrinkles or gaps).  
Analyze the fit of a "sample" garment on the figure of one of your class members for grain line, ease of movement, and function of garment. Discuss fitting characteristics such as fall of fabric, freedom from wrinkles, accuracy of construction to plumb seamline, comfort or ease of fit and enhancement of figure.

Major Concept III. CLOTHING CONSTRUCTION

Area of Concentration III. B. FITTING

Concepts and Generalizations:

(Continued from preceding page)

LEARNING EXPERIENCES

LEVEL I	LEVEL II	LEVEL III	LEVEL IV
		<p>fabric and personal preference. Decide the amount of ease needed for the kind of garment to be constructed.</p> <p>Discuss why the bust and hip measurements are essential measurements to take before deciding upon size of pattern to buy. Answer the question: When is it necessary to take measurements for length of garments from shoulder to waist and shoulder to full length of dress?</p> <p>Take essential measurements of the body and compare in relation to measurements of the pattern. Discuss these measurements with teacher to decide upon the amount of ease needed to be allowed for type of garment and determine pattern size to pattern size to purchase.</p> <p>With the help of the teacher, make necessary alterations in pattern before cutting out garment.</p>	<p>Bring one garment to class which does not fit you very well. Analyze fitting problems of garment with the help of your teacher. Study ways to alter garment for a better fit. Make the alteration as your extended learning.</p>

### Major Concept III. CLOTHING CONSTRUCTION

#### Area of Concentration III. C. FLEXIBILITY

##### Concepts and Generalizations:

FLEXIBILITY is the quality of pliability and adaptability, of extensibility (or stretch) and resiliency of a material, and is influenced by fiber, yarn, fabric construction, and finish of the fabric.

##### A. Characteristics of fabrics which affect flexibility.

1. In a woven fabric warp thread usually are stronger and more numerous per inch than weft or crosswise threads; therefore,
  - a. greater extensibility occurs in the crosswise direction than in lengthwise as the threads are less restricted in both their vertical and horizontal movement.
  - b. a greatest degree of stretch is in the diagonal direction as the force of the pull is not along the length of any yarn. (Force or fall distorts the threads from the right angle construction and extension of fabric occurs.)
  - c. the warp yarns tend to hang perpendicular to the floor, i.e.,
    - 1) skirts cut on the lengthwise threads hang straight and closer to the body.
    - 2) full, gathered, or pleated skirts cut on lengthwise grain hang in straight parallel folds.
2. A knitted fabric is usually more flexible than a woven fabric of similar fiber and yarn construction, as construction of fabric allows more movement of yarns in all directions and force is not applied to the more stable yarn length. The type of knit (warp or filling, plain or fancy, etc.) is related to degree of extensibility in length, crosswise or diagonal direction of fabric; however, degrees of extensibility in lengthwise, crosswise or diagonal of fabric usually corresponds to woven fabrics.
3. Characteristics of fibers, yarns, fabric construction and finishes affect flexibility of fabric.
  - a. Fiber characteristics
    - 1) The rougher the fiber, the less flexibility.
    - 2) The greater the crimp (natural or artificial) the greater the flexibility.
  - b. Yarn characteristics
    - 1) The greater the number of ply yarns the greater the strength, but flexibility is less.
    - 2) The greater the twist of yarn, the less flexibility in a fiber.
  - c. Fiber characteristics
    - 1) The greater the compactness of weave, the less flexibility in a fabric.
    - 2) Knitting gives greater flexibility than weaving to a fabric.
    - 3) Bending reduces flexibility in a fabric.
- B. Relationship of flexibility to design of garment.
  1. The greater the flexibility of the fabric
    - a. the less need for ease in the garment.
    - b. the less need for shaping (darts or dart equivalents) in the garment.
- C. Relationship of flexibility of fabric to construction.
  1. Breaking of thread in seams during wear and tear is less likely to occur if seams are stitched with the same amount of flexibility or stretch as the fabric has.

Emphasis-FLEXIBILITY (A-2 and B-1):

Characteristics of fabrics which affect FLEXIBILITY and way of handling in constructing a garment.

Compare the flexibility of woven and knit fabrics by stretching a number of variations of each type. Answer the following questions:

Which fabrics were most Flexible?

Were the knit fabrics more flexible than the woven fabrics?

Were some of the knit fabrics more flexible than other knits?

Test fabric samples of three or more different knits:

- 1) by stretching to compare amount of flexibility.
- 2) by straight stitching to compare amount of stitch breaking which occurs when fabric is stretched.

View demonstration given by teacher showing how much stretch is needed for specific fabrics in order to eliminate stitch breaking and to maintain the fabric's natural shape.

Emphasis-FLEXIBILITY (C-1):

Relationship of FLEXIBILITY of fabric to length and type of stitch.

Play with a rubber band. (Do not explain why.)

Record everything that you think about the rubber band as you play with it.

Discuss the characteristics by listing ideas on the blackboard. Find one word that describes all the characteristics. Discuss how fabric and thread are like the rubber band; that is, they have the quality of flexibility. Pull samples of fabrics to see the stretch.

View demonstration given by the teacher which shows stitching breaking on a piece of fabric when it is pulled and another that does not break. Explain why one broke and the other didn't.

Test fabric samples containing three different combinations of stitch lengths and tightness on the same fabric by pulling each sample. Discuss why the stitching broke on two samples and not on the third one.

Experiment with type and length of stitches on your own fabric by trying several combinations.

		<p>In small groups select an appropriate fabric to meet a specific pattern's need of ease.</p>	
		<p>Select own pattern and fabric to meet the pattern's need for ease.</p>	

Major Concept III. CLOTHING CONSTRUCTION

Area of Concentration III. D. STABILIZATION

Concepts and Generalizations:

- Stabilization is the process for maintaining shape, size, and wearability by the use of restraining agents.
- A. The degree of stability required depends upon the amount of stress in relation to fabric characteristics to prevent tearing, wrinkling, raveling, bagging or fabric disintegration in any area of the garment.
  - B. The intended use of the garment will influence the degree of stability required in areas of garments where excessive distortion of fabric during wear is likely; i.e., buttonholes, edges of garments, etc.
  - C. Restraining agents reduce stress between garment and the body.
    - 1. Stitching and pressing as restraining agents
      - a. Stitching and pressing fabrics with grain (on or near lengthwise thread) will reduce distortion of fabric in construction.
      - b. Staystitching may be necessary in construction in areas cut diagonally or across lengthwise yarns.
    - 2. Use of fabric as a restraining agent
      - a. in facings, interfacings, linings or patches
      - b. bonded or applied to surface with stitching
    - 3. Modification of seams for control and stability (i.e., to prevent raveling, stretching, etc.)
      - a. taping
      - b. seam finishes
      - c. variations in seams

Purchase the interfacing.</p>	

Major Concept III. CLOTHING CONSTRUCTION

Area of Concentration III. E. SHAPING

Concepts and Generalizations:

SHAPING is the control and molding of the fabric to conform to body bulges and to the form or shape of the body.

A. Control

- 1. The outer edges (perimeter) of a pattern often includes concave curves, neck and arm edge, to shape fabric to body contours.
- 2. Darts and dart equivalents are also methods of fabric removal to shape the garment over body contour. (Dart equivalents include pleats, tucks, ease, gather, and seams.)
  - a. the amount of fabric removed is in ratio to the size of the curve (or bulge) of the body and style of garment, i.e., the greater the amount of shape needed, the larger the dart or dart equivalent.
- 3. Reducing bulk is the removal of excessive fabric to achieve the desired outline of garment.
  - a. clipping, grading, raveling, tapering, and trimming sharpen the seam allowance line and remove the excess fabric, which may distort shape intended.
  - b. a concave curve is clipped to increase the circumference and a convex curve is wedged or trimmed to decrease circumference.
  - c. shrinking and pressing may also be used to remove excess fabric.

B. Molding

- 1. Turn of cloth is cutting of concentric layers to conform to each other and to the desired outline of cloth: turn of cloth is used whenever there are upper and underpieces as in collars, cuffs, hems and lapels.

LEVEL I

Emphasis-SHAPING (B-1):

Hemming as a means of molding fabric to conform to each other.

NOTE: The demonstration outlined below is designed to be recorded on tape and is for putting a hem in a night gown or skirt. A lesson would need to precede the use of this demonstration for deciding upon length and marking the hem.

LEVEL II

Emphasis-SHAPING (A-3a & b):

Clipping, grading, tapering and trimming as a means of shaping by reducing excess fabric

This demonstration for applying a neck facing without a collar or an armhole facing outlined below is designed to be recorded on a tape. For most effective learning on the part of the student, there should be a chart for each step for the student to view as he listens to the tape.

LEARNING EXPERIENCES

LEVEL III

LEVEL IV

major Concept III. CLOTHING CONSTRUCTION

Area of Concentration III. E. SHAPING

Concepts and Generalizations:

(Continued from preceding page)

LEVEL I	LEVEL II	LEVEL III	LEVEL IV
<p>Introduction: Now that the hemline is marked your next step is to put the hem in the garment. When the fabric of the hem is turned up, there will be extra fullness which must be eased out. The reason for this fullness is that the fabric turned up is greater than the distance around the garment. The hem fold must be made to conform to the fabric of the garment. Directions will be given on how to handle this fullness when hemming a garment. As you listen to tape, look at the samples of each step as it is described.</p> <p>Step 1. The first step is to lay the garment on a flat surface, right side up. Fold the fabric along the line of pins. Pin the hem to the garment, matching center front and side seams. Pins should be placed near the top and perpendicular to it.</p>	<p>NOTE: Staystitching the facing and finishing outer raw edge of facing is not included in this demonstration. Neither is preparing the neck edge of the fabric for facing.</p> <p>Step 1. Pinning facing to the bodice.</p> <p>Check your facings and bodice, decide what is the right side of the fabric, place right side together and pin along the neck edge. Look at sample step 1 to see how this is done. Check that shoulder seams and notches on the neck edge match. Stop the tape and do this much on the garment.</p> <p>Step 2. Sewing the facing to the bodice.</p> <p>Sew the facing to the bodice with a line of stitching 5/8 inch from the neck edge and running parallel to the neck edge. This step is no. 2. Stop the tape to do this part</p>	<p>↑</p>	

Major Concept III. CLOTHING CONSTRUCTION

Area of Concentration III. E. SHAPING

Concepts and Generalizations:

(Continued from preceding page)

LEVEL I	LEVEL II	LEARNING EXPERIENCES LEVEL III	LEVEL IV
<p>Place pins at 3 to 4 inch intervals. Stop tape to complete this step.</p> <p>Step 2. Try on the garment to inspect hem length and make sure it is even from the floor. If not, make adjustments. Hand or machine baste one-eighth to one-fourth inch from hem fold. Press hem. Put paper between hem and garment. Stop the tape to complete this step.</p> <p>Step 3. Read the pattern guide instruction sheet to find out desired hem depth. Lay garment on flat surface wrong side out. Measure depth of hem with ruler or tape measure. Mark with pins to establish cutting line. Trim away excess fabric. Stop tape to complete this task.</p> <p>Step 4. Turn under hem edge one-fourth inch and machine stitch. Be sure not to stitch hem to garment body. Stop the tape to complete this step.</p>	<p>Step 3. Look at the sample where the facing has been stitched to the neck edge. Attempt to turn the facing to the inside of the neck edge. Does the facing lie flat and smooth? Is the curve of the neck edge smooth? Stop the tape and answer these questions. Then turn on the tape for the next step.</p> <p>Step 4. Now you will be instructed on how to shape your neck edge and get the facing to lie flat and smooth. First, the seam allowances need to be cut off to reduce bulk so that the facing can be turned so it lies flat against the inside of the garment. This process is called "grading" because you are not cutting both seam allowances the same distance from the stitching. Grade the bodice seam allowance to 3/8 inch from the line of stitching. Grading in this way prevents a ridge from showing on the outside of your garment. Stop the</p>		

Major Concept III. CLOTHING CONSTRUCTION

Area of Concentration III. E. SHAPING

Concepts and Generalizations:

(Continued from preceding page)

LEARNING EXPERIENCES

LEVEL IV

LEVEL III

LEVEL II

LEVEL I

Step 5. Now is when it is necessary to ease in fullness in the hem top between seams. Place pins at the matching points-center front and side seams-before adjusting fullness. Pat and smooth to distribute fullness and place the grain appropriately. Take care of fullness in these ways. Which method to use depends upon amount of fullness. Ask the teacher to help make the decision.

Machine baste one-half inch from upper edge to hem allowance. Pull the bobbin thread at intervals to adjust and distribute fullness evenly along hem. Or lay small pleats in the hem top.

Step 6. The final step is to finish hem by using the slip stitch to catch the hem to the garment. After you have

tape. Look at the sample labeled "grading". Stop tape and do grading on your project.

Second step is to clip the seam allowances. This process will enable you to have a smooth well-shaped neck edge. To clip, you will use the point of your shears and cut into the seam allowance at right angles to the stitching line. Be sure that clipping stops just before it reaches the stitching line. Clip approximately every 1/2 inch. You will know that you have made clips close enough together when the neck edge forms a straight line on bodice. Look at the sample labeled "clipping". Stop the tape to clip the neckline of your garment. Do any necessary pressing.

DEMONSTRATION: Shaping through the use of shrinking and pressing.

Shaping parts of a garment is necessary to achieve the desired outline for garment.

Shrinking is a way to remove excess fabric to achieve the desired shape for the garment.

Today, the demonstration will show using shrinking by pressing as a method to remove excessive fabric to achieve the desired shape in the sleeve of a dress. When the sleeve is finished it should appear to have an even distribution of ease with no pleats or tucks in the seam.

Run directional basting stitch from notch to cap 5/8 inch from edge.

CRITERIA FOR LEARNING EXPERIENCES AND TEACHING PROCEDURES

## CRITERIA FOR LEARNING EXPERIENCES AND TEACHING PROCEDURES

Consider the Behavioral Outcome, the Generalization, Learning Experiences and the Resources together in planning lessons and units.

A learning experience for each idea of content should serve a definite purpose. Choose learning experiences in relation to the subject matter and the behavioral objective involved.

Plan introductory activities to orient students to the study and to establish a connection with their previous experiences.

Utilize ways to plan learning experiences with students. This is a means of helping students recognize reasons for the study and with opportunities for learning. Students and the teacher planning together can aid in meeting needs of individual students. Many students will profit from planning experiences creatively.

Involve students in a variety of learning activities. Experience is recognized as a vehicle for learning and learning occurs by means of processes which are specific to the thing being learned.

Provide enough experiences for students to gain a thorough grasp of concepts, ideas, facts and their relationships. This is necessary in order for students to develop ability to generalize and to make application of learning to new situations. Understanding grows out of experiences (discovering, seeing, handling, feeling.)

Develop a sequence of learning experiences as a way of making learning continuous and accumulative. Visualize what the student needs to do or to experience in order to acquire certain behavioral competencies and what order seems suitable for the experiences.

Plan some learning experiences for individuals and some for small and/or large groups or committees. Some behavioral outcomes may be achieved most effectively by individual study; others through a group approach. Some students work best alone; others in groups.

Include assignments and activities which help students to generalize, to put ideas together and to state them in their own way, to summarize, to formulate conclusions.

Incorporate evaluative procedures as an integral part of learning experiences, when feasible. Some concluding activities should be largely for the purpose of appraisal of progress.

Examples of Experiences Leading to Learning:

- |               |                     |              |
|---------------|---------------------|--------------|
