ABSTRACT

The field test report on the "Learn to Earn" instructional unit for grade 6 is one of a series of reports on the Arizona developed Career Education Curriculum Units. Presented is specific information as to the success of the units in terms of the learner's cognitive, affective, and psychomotor behavior according to expressed performance and behavior objectives. Cognitive and student and teacher attitudinal data were collected from five sites and projects in Arizona. Following the introduction, a brief description of the unit is given. The body of the document presents and discusses various tables showing field test results in the following areas: (1) information describing the field test, including demographic characteristics of both participating teachers and learners, (2) attitudinal data from both teachers and learners concerning the unit, (3) learner performance data on the lessons' specific items, and (4) teacher recruitment, refinement data, analysis, and comments. Four brief conclusions and recommendations are included. The document concludes with two appendixes: statistics and tabular data on student and teacher attitudes and a sample of the field test instrument package -- UNIVAL (forms and questionnaires on student and teacher attitudes and student performance). (Author/BP)

So many have contributed rajor input to the field test processes of unit delivery, monitoring and instrument completion, that it is impossible to extract, note, and applaud individual efforts. I am sure that all those involved in this major team effort can see how much has been accomplished and have a positive view of its educational significance for the young people of Arizona. By documenting and analyzing the capabilities of the career education units tested, we all have contributed a positive boost to career education in school districts across the state.

The task of Field Test Manager has been simplified considerably by excellent staff support from the Mesa Public Schools Department of Research and Evaluation, responsive assistance from the State Department of Education, and the effective management shown by the field test coordinators from the respective field test projects.

This is one of a series of field test reports on Arizona developed Career Education Curriculum Units. This report presents unit specific field test material. Another report in this series contains information concerning overall field test rationale and compilation of results for all field tested units.

The work presented and reported herein was performed pursuant to contract from the Arizona State Department of Education. However, the opinions expressed herein do not necessarily reflect the position or policy of the Arizona State Department of Education and no official endorsement by the Arizona State Department of Education should be inferred.

ERIC A Frontided by ERIC

INTRODUCTION

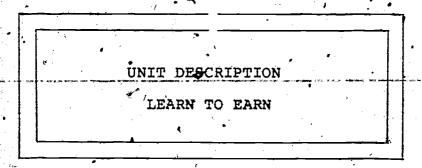

The major purpose of most innovative programs such as career education is to affect positively learners' cognitive, affective, and psychomotor behavior according to expressed performance and behavioral objectives. The present field test of career education curriculum units is designed to examine the success of the unit in terms of the above. Cognitive and attitudinal data have been collected from sites and projects across the state of Arizona. The following projects were involved in the effort of field testing the units: Central Maricopa, Coconino, Mesa, Pima, Pinal, Roosevelt, Tri-County, WACOP, and Yavapai.

Data on the present unit, however, have been collected from the following sites:

Project	Classrooms Requested	Classrooms Used In Analysis*
Coconino	, 2	.1
Mesa	. 2	1
Pima	2	1 1
Tri-County	3	3
WACOP . 1	2	2
Total	11	. 8

^{*}Data received in time for analysis.

Significant statistics are presented and discussed in the Field Test Results section of this report. Other statistics and tabular data are presented in Appendix I of this report.

Grade 6: Learn to Earn

The primary intent of this unit is to develop career awareness and employability skills. The purpose is to help the learner understand that tasks performed in the home setting, neighborhood setting, school setting and the occupational setting are related to the interests, aptitudes, and trainings of the individuals performing these tasks. Emphasis is placed on learning to earn. Two major concepts and five performance objectives are addressed in this unit. The activities for the performance objectives incorporate various kinds of multi-media, including art, discussions, guest speaker, role playing, and storytelling. The learner will be given practice in specific skills involved in being a responsible person, good business person, and good citizen. The learner will become aware of ways to be a productive, contributing member of society.

FIELD TEST RESULTS LEARN TO EARN

This section of the report presents the data summary and analysis for the field test of the curriculum unit. An outline of this section follows:

- A description of the field test including demographic characteristics of both participating teachers and learners.
- B. Attitudinal data from both teachers and learners concerning the unit.
- C. Learner performance data on the lesson specific items.
- D. Teacher refinement data, analysis and comments.

DESCRIPTION OF THE PARTICIPANTS

The data in this report was obtained from the projects, teachers, and learners described in the following tables.

1. Learners

Table I presents demographic information on the learners that were exposed to the unit in the field test. Examining Table I, it can be seen that the male and famile learners are fairly evenly represented. There was little representation by the minority groups. Out of 291 learners 21% (60) were from minority backgrounds: 8% (23) Spanish Surname, 0.3% (1) Black, 12% (35) American Indian, and 0.3% (6) Other.

2. Teachers

Table II presents the total number and selected demographic characteristics of the teachers presenting the unit.

It can be noted from Table II that 5 of the 8 teachers that taught this unit were female.

The median years of experience for this group falls between 1-5 years. It should be noted that this group of teachers was quite sophisticated concerning career education. Six of the 8 teachers were familiar with career education, of these six, three had previously taught a career education unit or program.

ATTITUDINAL DATA

1. Teacher Attitude

Included in each UNIVAL (Unit Evaluation Instrument) was an Instructor Attitudinal Data Sheet which asked two questions concerning attitudes toward career education in general and three questions concerning the teacher's attitude toward the unit (see Appendix II).

a. Teacher Attitude Toward Career Education

Examining the teachers' general attitude toward career education (Table III) it can be seen that the mean response across questions and projects is a high 3.94, on a scale where 5 is the highest positive response. Of the 16 possible responses, 13 (81%) are positive toward career education, 2 (13%) are of no opinion, and only 1 (6%) negative.

b. Teacher Attitude Toward the Unit

Table IV summarizes the teacher attitudes toward the unit. The teachers show only a slightly (3.29) positive attitude toward the unit. Of the possible 24 responses, 14 (58%) are positive, 2 (8%) are of no opinion, and 8 (33%) negative. Correlations between the Teacher Attitude toward career education and Teacher Attitude toward the unit were not significant (Appendix I).

TABLE III *

. 4	PROJECT	Coconino	Mesa	Pima	Tri-County	WACOP	Total

2. Learner Attitude

When learner attitude toward the unit is examined, (Table V), we see a moderately high positive feeling toward the unit across all projects. Of the 1608 responses 58% were positive toward the unit, 32% no opinion, and 10% were negative toward the unit.

Correlations between the Teacher Attitude toward the unit and Learner Attitude were not significant (Appendix I).

LEARNER PERFORMANCE

In order to examine learners' performance on the unit, and to assess how well the objectives of the unit are met, cumulative scores over all the lesson items within the unit (total learner scores) were examined. Table VI presents the total learner scores in percentages by projects. This score reflects the unit's overall success concerning delivery of its objectives. The scores from each project range from a low of 87% at Tri-County to a high of 94% at Coconino. These responses appear uniform with no one project varying far from the mean score (90%) thereby exerting a disproportionate influence.

Various other data was collected from the teachers involved in the field test of the units.

Tri-County	332	290	87
WACOP	505	456	90
Total	1079	968	90
			7.5

The data collected included the following information:

- 1. Teachers inicated whether they had experience in jobs other than teaching and whether this information helps in teaching the unit. It was found that 5 of the 8 teachers (61%) had provious experience in a job other than teaching. On these five, all indicated that the previous experience helped in teaching the unit. (Tables VII and VIII)
- 2. The teachers were asked how many guest speakers they used. Only one of the 8 teachers (12%) did not use guest speakers. A total of 10 guest speakers were used in the 8 classrooms. (Table IX)
- 3. The teachers were also asked to indicate the amount of time devoted to the unit per week and what time of day (AM or PM) the unit was primarily taught. The median number of hours spent per week teaching the unit fell between 2-3 hours. Three (38%) teachers taught the unit in the afternoon while 5 (62%) taught the unit in the morning. (Tables X and XI)
- 4. The teachers were also asked what kind of classroom or method of teaching they used. Four (50%) of the classrooms were self-contained, 3 (37%) were open classroom and 1 (12%) were team taught. (Table XII)

Correlations were calculated between the above data and Student Attitude, Teacher Attitude and Student Performance. Significant correlations were found between learner performance and time of day the unit was taught. When the unit was taught in the morning the performance was higher. (See Table XIII)

TEACHER REFINEMENT, ANALYSIS AND COMMENTS

Specific revision data was obtained by asking the field test teachers to make comments regarding each lesson taught.

These comments were solicited in the UNIVAL.

The following represents a composite of teacher comments regarding the various aspects of the unit, as well as a lesson by lesson critique of the unit. These comments have been analyzed and recommendations for revision presented.

TEACHER COMMENTS

When reading the teacher comments it should be noted that not all teachers respond to the open ended items. Therefore, some of the responses seem inconsistent with the teacher responses to the closed items. The closed items, it is felt, reflect a true attitude toward the unit over the teachers sampled. The teacher comments are from selected teachers that felt strongly enough to take the opportunity to respond. The comments are, therefore, more for curriculum refinement than for overall evaluation of the unit.

Coconino

Unit did not relate well to the average 6th grade learner, especially the Personal Characteristics section. Needs to be more related to students today rather than for future jobs.

Lessons 1 and 4 were excellent. Lesson 3 was weak.

Mesa

Utilization of guest speakers added a great deal. Involve students more.

Pima

We used oral class reports on chosen vocations to start the unit.

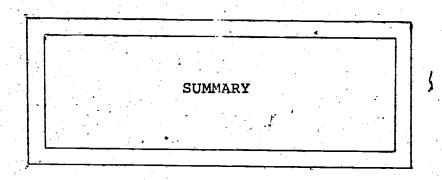

Tri-County

Some of the lessons and activities were above the 6th grade level. Felt it was too elementary in some respects.

WACOP

Too much repetition. Need hints for integrating with other curriculum. The reading material is too involved.

The relevant data collected during the field test is summarized below:

- A total of 291 learners were exposed to this unit in 5
 of the 9 participating projects. Fifty-two percent
 of the learners were female and 21% representatives of
 minority backgrounds.
- 2. Of the 8 teachers that presented the unit 5 were female, the median years of experience was between 1-5 years, and 3 had taught or developed career education material.
- 3. Teachers expressed a very positive attitude toward career education in general (3.94 on a scale where 5 was the highest positive response). Though still positive, the teachers' attitude toward this particular unit was lower (3.29).
- 4. The learners also exhibited a positive attitude toward the unit with 58% of the 1608 responses ositive, 32% no opinion, and only 10% negative.
- 5. The learners' overall performance was very high (90% correct).

 There was very little variability across lessons and units.
- 6. A list of the teachers critical comments and recommendations was presented in the body of this report.

CONCLUSIONS AND RECOMMENDATIONS

- 1. Future users of this unit should review the unit in its entirety paying particular attention to the content of each activity noting when during their teaching year it is best to be taught.
- During installation the teachers, while not constrained by field testing, should be made aware that the lessons as presented are only suggestions and may be modified, resequenced, augmented or reduced as desired:
- 3. This unit presents a wide range of activity suggestions, many of which may be extracted to constitute an enrichment program in addition to the unit.
- 4. This unit was well received by students who also scored a very high 90% on the test items. It is recommended that this unit be included in the implementation phase of curriculum development on the strengths of high Student Attitude and high Student Performance.

a. American Indian	d. Anglo White
	e. Other
c. Spanish Surname	
DIRECTIONS: Circle the letter following question	of your answer in each of the
Teachers:	•
How many years have you work	ked in the field of education?
a. Less than one	d. 11-15 years
b. 1-5 years	e. More than 15 years
c. 6-10 years	
Which of the following would Career Education 'co date):	d best describe your exposure to
a. Develored a Career F	ducation unit or program
b. Taught a Career Educa	ation unit or program
c. Read a Career Educat	ion unit or program
d: Had some exposure to	Career Education
went in a management to the	Ranget'on

What is your sex?	
a. Male	
b. Female_	
Is your classroom: (more tha	n one answer may be applicable
a. Open	
b. Self-contained	
c. Team taught	
What time of day were the les	sons taught (predominantly)?
a. AM	
b. PM	
How much time did you devote	to the unit each week?
a. Less than 1 hour	
b. 1-2 hours	
c. 2-3 hours	
d. 3-5 hours	
e. More than 5 hours	
How many guest speakers were unit?	used in conjunction with the
a. 0	
b. 1	
c. 2	
d. 3	
e. 4 or more	
Have you had another occupation	on other than teaching?
a. Social sciences	e. Technical
b. Physical sciences	f. Construction
c. Chemical sciences	g. Industry
d. Business	h. (

Did this experience help in teaching the Career Education unit?

- a. Yes
- b. No

PART II

Learner Performance Data

Directions:

Please provide an indication of how well the lessons delivered the performance objectives. The lesson numbers and methods of evaluation for each have been indicated. Page numbers, objective specifications, and item numbers are indicated as appropriate. Please indicate the total number of learners responding. Then record the number that responded correctly. Complete this form as you teach each lesson of the unit.

Learner Attitudinal Data

On the following page is an attitudinal survey which we would like your learners to respond to. Please remove that page from this instrument and reproduce enough copies for each of your learners. We feel that it would be best if your learners responded to this survey at the completion of the unit. If your learners do not have the needed reading ability to complete the survey, please read and explain the items to them. After the learners have completed the survey, please tally their responses and record the total number of learners responding in each manner of the form provided below.
