 IDENTIFIERS \*Manpower Distribution Project

ABSTRACT

The directory lists the types of preceptorship experiences (courses of study in which students receive part of their training in a health care setting outside the direct confines of the educational institution and under the supervision of a practicing professional who serves as a preceptor) available at health professional schools and also the variety of sites being used for these experiences (also known as clerkships, clinical electives, or field placements). The directory is divided into two main sections, programs open to students from other institutions (108) and programs limited to those enrolled at the sponsoring college or university (135), both listed alphabetically by State. Data for the directory have been gathered from schools of dentistry, medicine, nursing (baccalaureate programs only), optometry, osteopathic medicine, pharmacy, podiatry, and public health. Included for each listing are: a brief description of the experience (rural, inner city, solo practitioner, group practice, neighborhood health center, and others), a contact for information, name of the sponsoring school or organization, location of sites, length of assignment, availability of financial assistance, and identification of students to whom the program is open. A chart and map summarize the listings. Appended are names of schools interested in initiating cooperative programs with other institutions. (Author/MS)

The work upon which this publication is based was performed pursuant to Contract No. NO1-MB-24352 with the Bureau of Health Manpower, Health Resources Administration, Public Health Service, Department of Health, Education and Welfare. However, any information provided herein does not necessarily represent the views of the Bureau of Health Manpower, Health Resources Administration, Public Health Service, or the Department of Health, Education and Welfare.

## PREFACE

The National Health Council established the Manpower Distribution Project in June, 1972, under contract with the Bureau of Health Manpower. Similar to BHM's Area Health Education Center Program, the project seeks to identify methods of influencing health science students to practice in shortage areas of the country after completion of their training, in order to alleviate the maldistribution of health manpower in the United States.

The sharing and dissemination of information relating to health manpower distribution are important aspects of the project. This directory of preceptorship programs will be beneficial to students seeking to identify available off-campus clinical experiences and to faculty seeking resource information on different types of preceptorship programs at other institutions. Experience has shown that students who have actual exposure to rural and inner city practice will be positively influenced to locate in these areas after completion of their training. As a national voluntary organization, the National Health Council, through its Manpower Distribution Project, is testing this method through other aspects of its program.

### National Health Council

The National Health Council is an organization of more than 70 national voluntary, professional and governmental agencies and other groups concerned with improving the health of all Americans. Supported by its members, the NHC provides a mechanism through which member agencies work together, and with others, in the common cause of health protection and improvement. It is committed to these objectives: (1) To improve the accountability and creditability of the private sector, including outreach to groups not meeting present membership criteria; (2) To represent and promote the needs and contributions of the private sector in health affairs; (3) To provide a channel to and from government by serving as a point of communication, a coordinated point for exploring and clarifying public issues and reviewing and appraising for the public sector; (4) To provide linkage to the total health scene for its members; (5) To augment the objectives and efforts of members and to foster and encourage mutual assistance to improve effectiveness of performance; (6) To participate in public policy development through exploration of policy issues and, where appropriate, to enter into selective advocacy.

### Manpower Distribution Pr

The Manpower Distribution Project of Council seeks to find the best ways to en in training for the health professions to p tion of training, in areas of greatest need— rural areas of the United States. The pr mented by NHC under contract with the Program, Bureau of Health Manpower, areas of activity are encompassed in the p ing demonstration projects which test c encouraging students to practice in shorta ing and disseminating pertinent studies a relating to health manpower distributio national clearinghouse of information on Conducting regional workshops which p students with information on opportun shortage areas, and provide faculty and dea information about programs at other u benefiting students and helping to allev inadequate health care in underserved areas

## National Health Council

The National Health Council is an organization of more than 70 professional and governmental agencies and individuals concerned with improving the health of all Americans. Directed by its members, the NHC provides a national forum in which member agencies work together, and a common cause of health protection and improvement. The Council is committed to these objectives: (1) To improve the stability and creditability of the private health care system; (2) To reach out to groups not meeting present health needs; (3) To represent and promote the needs of the private sector in health affairs; (4) To coordinate and coordinate with government by serving as a point of contact; (5) To provide a coordinated point for exploring and discussing health issues and reviewing and appraising for the benefit of the public; (6) To provide linkage to the total health scene; (7) To augment the objectives and efforts of other health organizations; (8) To foster and encourage mutual assistance to improve the quality of performance; (9) To participate in health policy development through exploration of policy issues; (10) To enter into selective advocacy.

## Manpower Distribution Project

The Manpower Distribution Project of the National Health Council seeks to find the best ways to encourage students now in training for the health professions to practice, after completion of training, in areas of greatest need—mainly inner city and rural areas of the United States. The project is being implemented by NHC under contract with the Manpower Initiatives Program, Bureau of Health Manpower, DHEW. Three major areas of activity are encompassed in the project: (1) Establishing demonstration projects which test different methods of encouraging students to practice in shortage areas, (2) Collecting and disseminating pertinent studies and resource material relating to health manpower distribution and establishing a national clearinghouse of information on this subject, and (3) Conducting regional workshops which provide health science students with information on opportunities for practice in shortage areas, and provide faculty and deans with new resource information about programs at other universities which are benefiting students and helping to alleviate the problem of inadequate health care in underserved areas.

## ACKNOWLEDGEMENTS

Two individuals have been especially helpful in preparing the Directory and deserve special recognition. Susan Naylor has worked on this project in the capacity of research assistant as well as secretary during the months of preparation. Her excellent assistance in data gathering, writing, typing, and follow-up has been invaluable. A special thank you also to David Lawrence, M.D., M.P.H., Assistant Professor, University of Washington School of Public Health and Community Medicine, for his interest in the research, expert advice, and periodic words of encouragement. Several of his valuable suggestions regarding organization of the data have been incorporated into the final product.

## INTRODUCTION

This Directory lists the types of preceptorship experiences available at health professional schools and the variety of sites being used for clinical clerkships. The term "preceptorship" is being defined broadly to mean a course of study in which students receive part of their training in a health care setting outside the direct confines of the educational institution and under the supervision of a practicing professional who serves as a preceptor. These off-campus experiences are referred to by several terms—clerkships, clinical electives, field placements or preceptorships.

NHC's Manpower Distribution Project staff have had requests for such a listing from faculty who want to begin or expand a preceptorship program at their institution, and from students who want to take a clinical elective in a rural or inner city location outside the state in which they are studying. A reference guide of names and addresses to contact including a brief description of the preceptorship experience (rural, inner city, solo practitioner, group practice, neighborhood health center, etc.) should be helpful to both groups. Also identified are: the sponsoring school or organization; location of preceptorship sites; length of assignment; availability of stipends, transportation, or lodging; and whether the program is open to students from other institutions.

The Directory is divided into two main sections—programs open to students from other institutions, and programs closed or limited to those enrolled at the sponsoring college or university. Of the 243 programs listed, 108 are open and 135 closed. Schools appear in both sections when they sponsor an open as well as a closed program. Regional programs, those open to students at several schools within a specific state or geographic region, are listed in the closed section.

Data for the Directory have been gathered from dental, dentistry, medicine, nursing (baccalaureate), optometry, osteopathic medicine, pharmacy, and public health. Individual letters of inquiry were sent to 585 schools and several organizations. A response rate was 61%. In addition to the 243 programs, 24 schools responded stating they have no preceptorship program underway or planned for the 1975-76 academic year. Four of these institutions indicated an interest in a cooperative program with another health professional school and are listed separately in the Appendix.

Although there is no guarantee that student clinical exposure to rural and inner city practice settings will be positively influenced to a significant degree upon graduation, results obtained through preceptorship projects to date indicate that preceptorships are critical catalysts in decisions regarding practice. This Directory is designed to assist health professional schools in identifying available off-campus clinical experiences.

The National Health Council is grateful to the health professional schools and organizations that have provided information about their preceptorship programs. It is noted, however, that many programs exist or are being developed which are not listed in the Directory. As the Directory is updated, we will update our files for any subsequent editions. Additions, corrections or comments are welcome. Please send them to the Manpower Distribution Project, National Health Council, 1740 Broadway, New York, N.Y. 10019.

## INTRODUCTION

the types of preceptorship experiences in professional schools and the variety of sites and clerkships. The term "preceptorship" is used to mean a course of study in which students receive their training in a health care setting outside of the educational institution and under the supervision of a practicing professional who serves as a preceptor. On-campus experiences are referred to by the term "preceptorship," while off-campus experiences, clinical electives, field placements or externships are referred to by the term "preceptorship."

The Manpower Distribution Project staff have had requests from faculty who want to begin or expand a preceptorship program at their institution, and from students who want to do a clinical elective in a rural or inner city location. A reference list of addresses to contact including a brief description of preceptorship experience (rural, inner city, solo practice, neighborhood health center, etc.) is included for both groups. Also identified are: the sponsoring organization; location of preceptorship sites; availability of stipends, transportation, or other benefits; and whether the program is open to students from

both rural and inner city areas. The Directory is divided into two main sections—programs open to students from rural institutions, and programs closed or restricted to students from inner city areas. In the first section, 108 are open and 135 closed. In the second section when they sponsor an open as well as a closed program. Regional programs, those open to students from schools within a specific state or geographic area, are listed in a closed section.

Data for the Directory have been gathered from schools of dentistry, medicine, nursing (baccalaureate programs only), optometry, osteopathic medicine, pharmacy, podiatry and public health. Individual letters of inquiry were sent to a total of 585 schools and several organizations. Overall the response rate was 61%. In addition to the 243 programs listed, 136 schools responded stating they have no preceptorship program underway or planned for the 1975-76 academic year. However, four of these institutions indicated an interest in beginning a cooperative program with another health professional school and are listed separately in the Appendix.

Although there is no guarantee that students who have firsthand exposure to rural and inner city practice while they are in training will be positively influenced to locate in these areas upon graduation, results obtained through NHC demonstration projects to date indicate that preceptorship experiences are critical catalysts in decisions regarding practice location. This Directory is designed to assist health science students in identifying available off-campus clinical and community experiences.

The National Health Council is grateful to the many health professional schools and organizations that responded with information about their preceptorship programs. It is recognized, however, that many programs exist or are being developed which are not listed in the Directory. As these are identified, we will update our files for any subsequent edition of the Directory. Additions, corrections or comments are welcome and should be sent to the Manpower Distribution Project, National Health Council, 1740 Broadway, New York, New York 10019. □

## BIRMINGHAM NURSING MATRIC NURSE PRACTITIONERS

Huntsville.

Program under development for senior Pediatric Nurse Practitioner students, includes 12 physician preceptors in solo Birmingham and surrounding rural areas also serve as preceptors. Huntsville team approach emphasized. PNP health centers, rural small hospitals, and a mental health clinic.

Open on limited basis to PNP students from other institutions, University of Alabama and students must make their own arrangements for housing.

NP Program.  
Accelaureate students.

# ARIZONA

## UNIVERSITY OF ARIZONA COLLEGE OF MEDICINE

**SITES:** ARIZONA—Benson, Casa Grande, Ganado, Kingman, Marana, Morenci, Tucson and communities statewide. Includes all University affiliated National Health Service Corps programs in state with emphasis on southern Arizona. Selected experiences approved out of state and out of country, primarily Latin America sites.

**DESCRIPTION:** Pre-clinical Traineeships in Arizona designed for 1st and 2nd year medical students involve research and community health projects under supervision of faculty member. Out of state or international sites may be selected by University of Arizona students provided equivalent faculty supervision can be arranged.

Clinical Preceptorships for seniors offer choice of moderately structured clinical settings in rural areas such as Ganado (Navajo National Health Foundation), Kingman and Morenci with supervision by associate faculty program coordinators. Students may elect to work in group or individual practice settings in rural and urban areas of Arizona, or (for Arizona students only) throughout the Intermountain West. This program coordinated with University of Utah College of Medicine. International clerkships also possible in senior year.

Acting Internship in Rural Health places senior students in faculty supervised rural practices in Marana, Benson, Casa Grande and other National Health Service Corps communities professionally linked to University of Arizona College of Medicine. Assignment may be with family practice residents from University or may involve participation in mobile rural health program operated by University.

**AVAILABILITY:** Pre-clinical Traineeships open to medical students from other institutions. Program designed for 1st and 2nd year students; others considered, but preference given to pre-clinical students.

Clinical Preceptorships and Acting Internship in Rural Health open to senior medical students from other institutions.

**LENGTH:** 8-12 weeks, year round—Pre-clinical Traineeships.  
6-12 weeks, year round—Clinical Preceptorships and Acting Internship in Rural Health.

**FINANCIAL ASSISTANCE:** Stipends available, up to \$84/week, for all programs. Availability of stipends depends on kind of experience selected and adequacy of funding at any given time. Local transportation funds usually available. Lodging occasionally provided.

course entitled Nursing in the Community de-  
erience in health facilities and agencies, such as

Comprehensive Health Planning, Model City Health Center, high rise  
apartments for elderly, mental health clinics, rehabilitation centers, etc.  
Aim of course is to help students bridge gap between sophistication of  
nursing care they have been trained to give and kind of care actually  
available in community to those who need it most. Clinical experience  
may be obtained in New Bedford and Fall River inner cities or other  
communities in southeastern Massachusetts where health problems are  
prevalent and not being cared for by existing delivery system.

**AVAILABILITY:** Open as space permits to senior nursing students from  
other institutions.

**LENGTH:** 14 weeks, academic year.

**FINANCIAL ASSISTANCE:** None.

## ALLIED HEALTH MEDICINE NURSING PHARMACY PUBLIC HEALTH

**SITES:** MASSACHUSETTS.

**DESCRIPTION:** Required clerkship for freshman medical students in  
rural, suburban and urban community medical centers, health depart-  
ments, hospitals, solo or group practices statewide. Team approach em-  
phasized where possible. Program designed to acquaint students early in  
training with practice of medicine in community settings and teach them  
about contributions of other disciplines to patient care. Series of inter-  
disciplinary orientation lectures precedes community experience. Students  
also required to take clerkship during junior or senior year which is clini-  
cally oriented with more direct responsibility for patient care.

**AVAILABILITY:** Programs open as space permits to medical, nursing,  
pharmacy, public health and allied health students from other institu-  
tions. Placements individually arranged depending upon student's level  
of training and development.

**LENGTH:** 3 weeks, freshman academic year.  
6 weeks, junior or senior academic year.

## MICHIGAN

### FERRIS STATE COLLEGE SCHOOL OF PHARMACY

### PHARMACY

**SITES:** MICHIGAN—Baldwin, Flint, Grand Rapids, Lansing, Pontiac, Saginaw.

**DESCRIPTION:** During 2-week Clinical Visitation program, senior pharmacy students introduced to health care problems of urban residents at all sites listed except rural Baldwin. Students obtain patient drug histories, provide counsel on drug related topics, assist in Family Practice Clinics, methadone treatment programs, and join Visiting Nurse Association staff in home visitations. Others have gained insight into rural health problems via involvement in neighborhood health clinic and pharmacy in Baldwin. Students accompany family service workers to patient homes to counsel on proper use of medications. Future plans include expanding 2-week Clinical Visitation Program to 10-week Clinical Clerkship in 1976.

**AVAILABILITY:** Open as space permits to 5th year pharmacy students from other institutions; participants must register as "guest" students at Ferris.

**LENGTH:** 2 weeks, spring term—Clinical Visitation.  
10 weeks, year round—new Clinical Clerkship beginning 1976.

## UNIVERSITY OF NEW MEXICO SCHOOL OF MEDICINE

## MEDICINE

SITES: NEW MEXICO—Artesia, Cuba, Gallup, Silver City, and 11 other  
communities ranging from 500 to 250,000 in population.

DESCRIPTION: Program predominantly rural. Sites located in physician  
shortage areas statewide. Examples of settings include: solo practice in  
Artesia, small town in ranch country of southern New Mexico; rural clinic  
in Cuba offering interdisciplinary experience with paramedics under  
direction of Presbyterian Medical Services; Gallup Indian Medical Center  
serving townspeople and Navajo Reservation where community health  
work encouraged; and group practice in Silver City, mountain town with  
heavy mining industry. Preceptorship program being expanded to include  
many new and unique experiences in rural, ethnically centered New  
Mexico communities. Future plan is to offer more experiences utilizing  
interdisciplinary approach.

AVAILABILITY: Open to medical students from other schools. Program  
now directed toward seniors although juniors with some clinical experi-  
ence may apply.

LENGTH: Usually 4-6 weeks, year round.

FINANCIAL ASSISTANCE: Room and board provided.

**GE OF WISCONSIN**

**MEDICINE**

N—Milwaukee, West Bend, Woodruff and rural commu-

rogram is elective clerkship for seniors with primary care  
o or group practice in Milwaukee or rural Wisconsin.  
o available at ambulatory care setting affiliated with St.  
ty Hospital in West Bend where students make rounds  
office patients and do follow-up work on teaching cases.  
Lakeland Medical Associates in Woodruff have firsthand  
try medicine. Students essentially given responsibilities  
re closely supervised by a surgeon and internist. This ro-  
nts opportunity to learn firsthand about medical prac-  
esort community.

Open as space permits to senior students from other

ths, year round.

**STANCE:** Room and board provided at West Bend and  
he preceptors also furnish housing.

## UNIVERSITY OF IOWA COLLEGE OF DENTISTRY

**SITES:** IOWA—Independence, Muscatine, Oakdale, and other communities statewide.

**DESCRIPTION:** Two-week assignment required at Model Rural Health Center, Oakdale. Most students also rotate through Health Center for 1 week. Experiences in innovative, developing interdisciplinary team involving clinical dentistry, interactions with patients, and care for groups with special needs, and community health.

Mental Health Mini-Internship for senior dental students. Mental Health Institute gives opportunity to provide care to patients, gain better understanding of dental care for emotionally disturbed, and work with members of staff, not generally exposed to during dental school.

Service in Mobile Dental Unit to rural Iowa communities. Provides senior dental and dental hygiene students. Community health encouraged and public health needs emphasized. Program also enables students to visit and work in rural communities as potential practice sites.

Summer preceptorship available for incoming senior dental students. Students assist practicing dentists in rural Iowa. Students assist in providing firsthand how practitioners relate to patients, and work with colleagues.

Summer Migrant Program gives senior students opportunity to provide needed dental care to underprivileged Mexican-American families. Many faculty and students from other disciplines (e.g., nursing, pharmacy) volunteer part-time.

**AVAILABILITY:** All programs closed.

## UNIVERSITY OF IOWA COLLEGE OF DENTISTRY

## DENTAL HYGIENE DENTISTRY

**SITES:** IOWA—Independence, Muscatine, Oakdale; rural and semi-rural  
communities statewide.

**DESCRIPTION:** Two-week assignment required for senior dental students  
at Model Rural Health Center, Oakdale. Most senior dental hygiene stu-  
dents also rotate through Health Center for 1 week. Purpose is for exper-  
iences in innovative, developing interdisciplinary health care delivery sys-  
tem involving clinical dentistry, interactions with other health personnel,  
care for groups with special needs, and community outreach activities.

Mental Health Mini-Internship for senior dental students at Independence  
Mental Health Institute gives opportunity to provide needed dental ser-  
vices to patients, gain better understanding of problems encountered by  
emotionally disturbed, and work with members of allied health professions  
not generally exposed to during dental school.

Service in Mobile Dental Unit to rural Iowa communities required of all  
senior dental and dental hygiene students. Community involvement en-  
couraged and public health needs emphasized as van moves throughout  
state. Program also enables students to visit and consider many Iowa com-  
munities as potential practice sites.

Summer preceptorship available for incoming senior dental students with  
practicing dentists in rural Iowa. Students assist in treatment and observe  
firsthand how practitioners relate to patients, employees, community and  
colleagues.

Summer Migrant Program gives senior students chance to provide urgently  
needed dental care to underprivileged Mexican-American farm workers and  
families. Many faculty and students from other disciplines (medicine, nurs-  
ing, pharmacy) volunteer part-time.

**AVAILABILITY:** All programs closed.

**LENGTH:** 2 weeks, senior academic year—Model Rural Health Center.  
2 weeks, senior academic year—Mental Health Mini-Internship.  
2 weeks, senior academic year—Mobile Unit rotation.  
2-9 weeks, summer following junior year—Preceptorship in  
rural Iowa.  
11 weeks, summer following junior year—Migrant Program.

**FINANCIAL ASSISTANCE:** Model Rural Health Center Program: transportation, lodging and meals provided. Mental Health Mini-Internship: travel expenses provided by University; dormitory and meals provided by Institute. Mobile Unit: students reimbursed for meals and lodging. Summer preceptorship: weekly stipends provided by preceptors. Summer Migrant Program: Public Health Service Traineeships available for 5 full-time dental students.

## DENTAL HYGIENE DENTISTRY

**SITES:** KENTUCKY.

**DESCRIPTION:** Elective Summer Externship Program places dental and dental hygiene students in private dental offices, institutions or health delivery systems statewide for summer months. Dental students may be utilized as hygienists or assistants but primarily perform clinical dentistry under supervision of dentist. Priority given to 3rd and 4th year dental students although underclassmen also eligible.

Individualized Externship Program during academic year designed to expose 4th year dental students to realities of practice in environment other than dental college. Program directed toward increasing clinical competence, however, student may elect individualized projects of non-clinical nature. Students may be assigned to general dentists or specialists practicing in institutions or health delivery systems, but 90% of extramural experiences are in offices of private dental practitioners. Settings for both externship programs in urban and rural areas of Kentucky.

**AVAILABILITY:** Closed.

**LENGTH:** 8-10 weeks—Summer Externship.  
2 weeks—9 months, academic year—Individualized Externship.

**FINANCIAL ASSISTANCE:** Summer Externship: 1st year students receive \$90/week salary; 2nd year students, \$110/week; 3rd year students, \$125/week. Salaries paid by dental preceptors. Individualized Externship: student expenses paid by preceptors. (No salaries.)

## VIRGINIA COMMONWEALTH UNIVERSITY MEDICAL COLLEGE OF VIRGINIA

## MEDICINE

**SITES:** VIRGINIA—Abingdon, Eastern Shore, Newport News, Norfolk, Richmond, and small towns statewide.

**DESCRIPTION:** Freshman and sophomore students have firsthand experience in family practice offices interviewing patients and observing effects of acute and chronic disease on family dynamics. In addition to weekly attendance at family physician's office, students identify with 1 family group and get to know members in depth, both in and out of home over 9-week period.

Sophomores may take additional week during summer with family physician, accompanying him or her on hospital rounds, home visits, seeing office patients, attending at deliveries, etc. Program arranged through Virginia Academy of Family Physicians.

Juniors required to spend 1 month in community hospital in Richmond or 1 of other towns listed. Students remaining in Richmond assigned to family physician who arranges supervised experiences with specialist and sub-specialist colleagues in community hospitals and private offices. Family Practice may be 1 of these disciplines, but is limited to a portion of required month's experience. In other areas of Virginia, students spend 1 month in community hospital working on wards with specialists and in their local offices.

Seniors may elect 1 month in primary care physician's office participating in all aspects of family care, as well as professional and social activities of preceptor. Students work daily with tutor in office and hospital settings. Health needs of community examined including practitioner's relationship with community health service agencies.

**AVAILABILITY:** All programs closed.

## APPENDIX

The following schools have expressed an interest in developing a cooperative preceptorship program with another institution. Their responses are listed below.

### MICHIGAN

#### Wayne State University College of Nursing

"Nothing underway or conclusively on the drawing board in this regard. However, since we are an ideal setting for an inner city preceptorship we will continue to explore the possibility of establishing such a program. At this time we would invite inquiries from interested persons and perhaps we can develop something on an individualized basis."

Margretta M. Styles, R.N., Ed.D.

Dean

Wayne State University

College of Nursing

5557 Cass Avenue

Detroit, Michigan 48202

(313) 577-4085

### OKLAHOMA

#### East Central University School of Nursing

"No preceptorship program established, but we would cooperate in an individual study project with another institution. Projects could be developed in rural areas involving clinics or medical/dental offices."

Neil W. Rheiner, Ed.D.

East Central University

School of Nursing

Ada, Oklahoma 74820

(405) 332-8000, Ext. 3112

### OREGON

#### Pacific University College of Optometry

"No preceptorship program per se is presently being tution. . . . We would be particularly interested in a with medicine and especially as it relates to eye patho

Willard B. Bleything, O.D., M.S.

Interim Dean

Pacific University

College of Optometry

Forest Grove, Oregon 97116

(503) 357-6151

### SOUTH DAKOTA

#### Mount Marty College Department of Nursing

"We are interested in some kind of exchange program school in a metropolitan area."

James C. Sorenson

Chairman

Department of Nursing

Mount Marty College

Yankton, South Dakota 57078
