IDENTIFIERS NAEP; \*National Assessment of Educational Progress

## ABSTRACT

This technical report contains the released musical exercises used and the assessment data collected in a nationwide survey of music education conducted by the National Assessment of Educational Progress (NAEP). Nine-year-olds, 13-year-olds, 17-year-olds, and adults (ages 26-35) were asked questions designed to measure their attitudes toward music and their achievement in or knowledge of musical performance, musical notation and terminology, instrumental and vocal media, and music history and literature. Although the report contains only one-half of the music exercises used in the survey, assessment data for all the exercises administered are provided. (Some exercise texts are unreleased at this time because NAEP will administer these exercises again in the future to determine whether the performance level of Americans has improved or declined.) Assessment data include percentage results for the national sample and for each of the subpopulation samples grouped by region, sex, race, parental education, and size and type of community. A cassette tape recording that presents the musical selections used as stimuli in many of the released exercises is available from NAEP. Also available are computer data tapes that contain the original, unanalyzed response data for all of the exercises. (Author/RM)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from the original.

## FOREWORD

The National Assessment of Educational Progress (NAEP) is an information-gathering project that surveys the educational attainments of 9-year-olds, 13-year-olds, 17-year-olds and adults (ages 26-35) in 10 learning areas: art, career and occupational development, citizenship, literature, mathematics, music, reading, science, social studies and writing. Different learning areas are assessed every year, and all areas are periodically reassessed in order to measure educational change.

Each assessment is the product of several years work by a great many educators, scholars and lay persons from across the country. Initially, these people design objectives for each area, proposing specific goals that they feel Americans should be achieving in the course of their education. After careful reviews, these objectives are given to exercise (item) writers, whose task it is to create measurement tools appropriate to the objectives.

When the exercises have passed extensive reviews by subject-matter specialists and measurement experts, they are administered to national probability samples of 9-year-olds, 13-year-olds, 17-year-olds and young adults between 26-35. The people who compose those samples are chosen in such a way that the results of their assessment can be generalized to the national population. That is, on the basis of the responses of about 2,500 9-year-olds on a given exercise, we can estimate the percentage of all 9-year-olds in the nation who can perform a task acceptably. Approximately 100,000 persons participate annually.

After assessment data have been collected, scored and analyzed, National Assessment publishes reports to present the results as accurately as possible. In this report, data are included for all exercises, but the exact exercise text is provided for only the released exercises. Some exercise texts are unreleased at this time because National Assessment will administer these exercises again in the future to determine whether the performance level of Americans has improved or declined. Approximately one-half of the music exercises have been retained for use in the second assessment. For the unreleased exercises, documentation of the objectives that were measured and the percentage results are presented in order to show the extent of the total assessment effort.

For exercises that have been released, this volume provides a copy of the exercise, complete documentation about administration and scoring procedures and the percentage results for the national sample and each of the subpopulation reporting groups. Researchers who need detailed information about the exercises, and state and local educators who want to use NAEP exercises in their own assessment programs, will find this documentation useful. An additional source of documentation is a cassette tape recording that presents the musical selections used as stimuli in many of the released exercises and sample responses from the music performance exercises. This recording is available from National Assessment.

A brief general summary of the music results can be found in *The First Music Assessment: An Overview, Report 03-MU-00*. Other reports focus on the music performance and attitude exercises. Also available is the *Music Technical Report: Summary Volume, Report 03-MU-21*, which provides summary data for the age levels and reporting groups for subsets of exercises within the objective and reporting theme classifications. National Assessment also publishes a general information yearbook that describes all major aspects of the assessment process. The reader who desires more detailed information about how National Assessment defines reporting groups, designs the sample, prepares and scores the exercises and analyzes and reports the results should consult *General Information Yearbook, Report 03/04-GIY*. All of these reports are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

National Assessment has also prepared computer data tapes, which contain the original, unanalyzed response data for all of the exercises. Information about the contents of the tapes can be obtained from National Assessment.

#### ACKNOWLEDGMENTS

Many people have made substantial contributions to the music assessment, from the beginning of the National Assessment of Educational Progress (NAEP) in 1964 through the completion of the reporting phase of the first assessment of music. Unfortunately, it is not possible to acknowledge them all here, and an apology is due to those whose names have been omitted.

The original preparation of the objectives and exercises for the music assessment was done by the Educational Testing Service (ETS). These materials were reviewed by dozens of consultants, including music professionals, music educators and interested lay persons.

The administration of the music assessment was conducted by the Research Triangle Institute (RTI) and the Measurement Research Center (MRC). Daniel Brantley and Louise Diana of MRC provided invaluable assistance in developing and refining the guidelines used in scoring the exercises. National Assessment's monitoring of exercise and scoring-guide development was conducted by Ed Roeber, Michigan Department of Education, formerly of the NAEP Exercise Development Department staff.

Two music educators, Paul Lehman of the Eastman School of Music (University of Rochester) and Jo Ann Baird of the Boulder (Colorado) Valley Schools, lent their expertise to nearly all phases of the assessment. These two consultants, along with others, helped Frank Rivas, Utilization/Applications Department, and Susan Oldefendt, Research and Analysis Departments, design the exercise-classification system used in reporting the results.

The preparation of this report was a collaborative effort of the National Assessment staff. The analyses and the design for the report were planned by Susan Oldefendt. William Ankeny, Data Processing Department, managed the data files and provided the programming support. Special appreciation is extended to Susan Sullivan, Data Processing Department, who diligently helped monitor the accuracy and completeness of all of the specifications and documentation involved in the analyses. Janet Bailey, Research and Analysis Department, helped assemble all of the materials. Marci Reser and Eileen Wollam, Utilization/Applications Department, assisted in the production of the report.

Special thanks must also go to J. Stanley Ahmann, who directed the NAEP program throughout the period in which this information was gathered and reported.

Roy H. Forbes  
Project Director

## CHAPTER 1

### DESCRIPTION OF THE MUSIC MATERIALS AND DATA

In the 1971-72 assessment of music, 9-year-olds, 13-year-olds, 17-year-olds and young adults ages 26-35 -- age levels that correspond to the end of primary, intermediate, secondary and post secondary education -- were asked a variety of questions designed to measure achievement of six broad objectives in music education. These objectives were: (1) to perform a piece of music (technical proficiency was not necessarily required); (2) to read standard musical notation; (3) to listen to music with understanding; (4) to be knowledgeable about some musical instruments, some of the terminology of music, methods of performance and forms, some of the standard literature of music and some aspects of the history of music; (5) to know about the musical resources of the community and seek musical experiences by performing music; and (6) to make judgments about music and value the personal worth of music.

For presentation in this volume and other National Assessment of Educational Progress (NAEP) reports, the music exercises have been grouped into the following five reporting themes. Each exercise is also classified into a subtheme within the theme.

- I. Musical performance
  - A. Singing familiar songs
  - B. Repeating unfamiliar musical material
  - C. Improvising
  - D. Reading notation
- II. Musical notation and terminology
  - A. Vocabulary
  - B. Basic notation
  - C. Score-reading
- III. Instrumental and vocal media
  - A. Aural recognition
  - B. Visual recognition
  - C. Performance practices
- IV. Music history and literature
  - A. Periods in music history

B. Musical genres and styles  
C. Music literature

V. Attitudes toward music

Several types of information, including reference to objectives and themes, are presented on each exercise-documentation page. A sample exercise and documentation page are shown below. The copy of the exercise shown is identical to the one seen by the respondent, except that the correct response oval has been darkened.

Musical works by the same composer often sound similar. Listen carefully to these three musical examples. Which examples were probably composed by the same person?

- 1 and 2 only.
- 1 and 3 only.
- 2 and 3 only.
- All 3.
- I don't know.

The works probably composed by the same person are

 Selection 2: Beethoven, "The Ninth Symphony" Op. 125, Part 1, London Philharmonic Symphony, Sir Charles Mackerras, conductor, Philips Records.  
 Selection 3: Beethoven, "The Ninth Symphony" Op. 125, Part 1, London Philharmonic Symphony, Sir Charles Mackerras, conductor, Philips Records.

Explanation of Sample Documentation Page

I. Exercise Identification systems

Release #: R4H

R4H: The first letter in the identifier indicates whether the exercise is released (R) or unreleased (U).

R4H: The number indicates the reporting theme to which the exercise belongs. In this case, the "4" indicates Theme 4: Music History and Literature.

R4H: The letter in the third position uniquely identifies and locates the exercise within the theme. This is Exercise H within Theme 4. If an exercise is released, the letter is capitalized. For unreleased exercises, lower-case letters are used as unique identifiers.

In this volume exercises are ordered by release number and, therefore, by theme and exercise within theme. The within-theme ordering is alphabetic, Exercise A is before Exercise B and so on.

NAEP #: 304003-234

304003-234: The first number indicates the objective.

304003-234: The second and third numbers indicate the subobjective within the objective.

304003-234: The next three numbers uniquely number the specific exercise within the objective and subobjective.

304003-234: The numbers following the dash indicate the age levels that responded to the exercise. In this case, the "2" indicates 13-year-olds, the "3" indicates 17-year-olds and the "4" indicates young adults. If the exercise had also been given to 9-year-olds, the indicator would include a "1."

II. Theme and subtheme

Theme: 4. Music history and literature

Subtheme: B. Musical genres and styles

The specific theme and subtheme classification for the exercise is given.

III. Objective and subobjective

Objective: III. Listen to music with understanding

Subobjective: D. Be aware of (and recognize) some features of historical styles in music.

Each exercise was originally written to measure one of the music objectives. A booklet describing the objectives and their development is available from National Assessment.

IV. Scoring and administration descriptors

Scoring type: machine

Multiple-choice exercises were scored by an optical scanning machine. Responses to music exercises that measured performance skills were listened to and scored by music experts. This type of scoring is termed professional. Short-answer, written exercises were scored semi-professionally.

Administration mode: group

Many exercises were administered to groups of 12 respondents. These exercise administrations were conducted by using a paced-tape recording to present the exercises to the group. Exercises designated as "individual" were administered on a one-to-one basis in an interview.

Special stimulus: none

If a special stimulus material such as a drum or a picture or a musical score was used in the exercise, it would be noted here. Recorded musical stimuli were not considered special because they were used in most of the exercises.

V. Packaging information and national p-values

Overlap:	Age 13	Age 17	Adult
Package-exercise:	04-08	04-07	05-19
National P-value:	59.50	66.17	60.36
R4H			

All four age levels were not asked to respond to all the exercises. In some cases, an exercise was administered at only one age, for example, to 9-year-olds. Others were given at two or more age levels and are called overlaps. The "Overlap" descriptor tells the age levels that responded to the exercise. The "Package-exercise" descriptor shows for each age which booklet or package the exercise was printed in and the exercise number within the package. In-school respondents (9-year-olds, 13-year-olds and 89% of the 17-year-olds) took only one package of exercises. Out-of-school respondents (11% of the 17-year-olds and all of the young adults) were allowed to take up to four packages.

The "National p-value" is the percentage of individuals at that age who could answer the exercise correctly or could answer the question at a level that subject-matter specialists felt indicated achievement of the objective the exercise was designed to measure. For multiple-choice exercises, the correct response is darkened on the copy of the exercise. For other exercises, the designated level for an acceptable response is given in a note at the bottom of the documentation page. By looking at the table, we can see that 59.5% of the 13-year-olds, 66% of the 17-year-olds and 60% of the adults responded correctly to the exercise. (The correct answer is "1 and 2 only.") For multi-part exercises, the national p-values are presented for each part. Part numbers 01, 02, and so on are added to the release number designation for multi-part exercises.

## VI. Administration times

### Timing (in seconds):

Stimulus:	103	99	97
Music:			
Sel. 1:	22	20	20
Sel. 2:	17	16	15
Sel. 3:	20	22	19
Response:	17	15	*
Total:	131	125	*

\* Time not limited by paced tape.

Those researchers planning to reassess the National Assessment exercises will need to know their exact administration times. The tape recordings used in each group administration were timed in order to arrive at the figures presented in this report. The *stimulus* time is the time required to read on the

tape the entire exercise or exercise part including the alternative responses. The stimulus time includes the length of time musical selections were being played on the tape. The response time is the period of silence allowed on the tape for respondents to record their answers. The total is the total elapsed time required to administer the entire exercise. The total is almost always greater than the sum of the stimulus and response times. This is accounted for by the fact that after the response time in most group-administered exercises there was a five-second interval during which respondents were instructed, "If you do not know the answer, please fill in the oval beside 'I don't know.'" Then there was about a six-second pause before the announcer instructed them to go on to the next exercise. Since individually administered exercises were read to the respondent by the administrator, they did not have paced-tape recordings and, therefore, do not have timing information. For adult administrations, tape recordings were used but the tapes were not paced.

VII. Source information for musical selection(s)

The sources for musical selections used as stimuli are documented. The cassette tape, which can be ordered from NAEP, presents the particular excerpts used for the exercise. In most cases, National Assessment was required to obtain permissions from artists and recording companies before selections could be used in the assessment. The permissions obtained applied only to NAEP's use of the selections and do not extend to anyone else who may use these exercises. Anyone wanting to use the selections is responsible for obtaining the necessary permissions.

VIII. Scoring guides

Performance and open-ended exercises are accompanied by copies of the scoring guides, which provided the criteria used to categorize the responses.

The Results for Each Exercise

As explained earlier, for each released exercise, a copy of the exercise and a documentation page, and for open-ended exercises, a scoring guide, are included. For unreleased exercises only, the documentation page (noting among other things the type of exercise and the objective and theme it was designed to measure)

is included. However, every exercise is accompanied by a complete appendix of results. A brief description of National Assessment's sample design, reporting populations and subpopulations and the data analysis used to compute these results follow.

#### Sampling

The exercises were given to a national probability sample of 9-year-olds, 13-year-olds, 17-year-olds (including high school dropouts and early graduates) and young adults between the ages of 26 and 35.<sup>1</sup> Within the four age levels, National Assessment can report data about a limited number of subpopulations. Although the sample included respondents from all 50 states and the District of Columbia, it was not of sufficient size to enable comparisons of the data between states, school districts, schools, teachers, etc.

The sample design employed by National Assessment was stratified by geographic region, state, size of community and socioeconomic level. The sample was drawn at three stages. The first-stage sampling units consisted of counties or groups of contiguous counties and was constructed using U.S. Census data on the numbers of persons living in those counties.

For the in-school assessment, a stratified random sample of primary sampling units (PSUs) was drawn. Lists were made of the schools in each selected unit. At the second stage, a sample of schools was selected within each PSU. Finally, within each selected school National Assessment drew a random sample of students, and assigned those students to assessment booklets. Of course, all student listings were destroyed to protect the anonymity of the respondents. National Assessment has no records of the names of the students who took the booklets. The out-of-school sample design was similar to the in-school design. First, primary sampling units were drawn. Then, within each PSU a sample of small-area segments was obtained. Specially trained administrators located assessment participants within the area segments by visiting each housing unit and determining if any individual of the appropriate

<sup>1</sup> An overview of the National Assessment sampling design for Years 03 and 04 is provided in Chapter 2 of the *General Information Yearbook, Report 03/04-CIT* (Washington, D.C.: Government Printing Office, 1974). For more detailed documentation, see J.R. Chromy et al., *The National Assessment Approach to Sampling* (Denver, Colo.: Education Commission of the States, 1974). For an introductory treatment aimed at state and local assessment problems, see R.M. Jaeger, *A Primer on Sampling for Statewide Assessment* (Princeton, N.J.: Educational Testing Service, Center for Statewide Educational Assessment, 1973).

age lived there: Of the eligible individuals, 84% participated in the music assessment.

About 90,000 respondents were sampled in the 1971-72 assessment. However, not all respondents took all exercises. For example, 25,500 13-year-olds participated in the music assessment. Between 2,200-2,700 13-year-olds responded to each booklet of exercises.

#### Reporting Populations and Subpopulations

In addition to national results for 9-year-olds, 13-year-olds, 17-year-olds and young adults, National Assessment provides data about various groups of people. The variables used for this analysis are region of the country, sex, race, level of parental education and size and type of community and are fully explained in the *General Information Yearbook*. They are briefly described as follows.

#### Region

The country has been divided into four regions -- Northeast, Southeast, Central and West -- in order to present results for various regions relative to the national results.

#### Sex

Results are presented for males and for females.

#### Race

Results are presented for whites and blacks.

#### Parental Education

The four parental-education categories are defined by the highest level of education attained by either of a person's parents. The no-high-school category (NO HS) is comprised of all people who indicated that neither parent went to high school. The some-high-school category (SOME HS) consists of all those who indicated that the parent with the most education attended high school but did not graduate. In the graduated-from-high-school category (GRAD HS) are all those who indicated that at least one parent graduated from high school, and in the post-high-school group (POST HS) are all those who indicated that at least one parent received some post-high school education (college, vocational training or adult education courses).

#### Size and Type of Community (STOC)

The groups within this variable are defined by the size of a person's community and an occupational profile of the area his or her school serves.

*Low metro.* Individuals in this group attend schools within the city limits or residential area served by a city with a population greater than 150,000; the schools serve areas in which a high proportion of the residents are on welfare or not regularly employed.

*Extreme rural.* People in this group attend schools in a community having a population less than about 8,000. Most residents in the area the school serves are farmers or farm workers.

*Small places.* People in this group attend schools in a community of less than 25,000 inhabitants that are not included in the extreme-rural group.

*Medium city.* Individuals in this group are those who attend schools in cities with populations between 25,000 and 200,000 that are not in high- or low-metro groups.

*Main big city.* These are students attending schools in a big city (population greater than 200,000) who are not included in either the low-metro or high-metro groups.

*Urban fringe.* People in this group attend schools in the metropolitan area served by a city with more than 200,000 inhabitants; the school and the area it serves are outside of the city limits and are not included in either the low-metro or high-metro group.

*High metro.* Individuals in this group attend schools within the city limits or residential area served by a city with a population greater than 150,000; the area served by the school consists primarily of residents who are professional or managerial personnel.

#### Computation of P-Values and Standard Errors

The choice of algorithms for estimating p-values (proportions) and estimates of their standard errors is heavily dependent on the sample design. To estimate the percentages of individuals in the population who possessed various knowledges, understandings, skills and attitudes, National Assessment weighted all response data in accordance with the sample design.

The following types of results are provided for each exercise.

1. *P-value.* An estimate of the percentage of persons in each of the populations who gave a certain response to a specific exercise. For example, the estimated percentage of 9-year-olds who answered a given exercise acceptably is defined as the weighted number of acceptable responses divided by the weighted number of responses for all 9-year-olds. Percentages for each reporting group were computed in the same manner using only the weighted responses for the people in that group.
2. *Delta-P.* An estimate of the differences between the performance of a subpopulation and the performance of the total age population. A delta-p is the difference between the estimated percentage of a group (for example, the Western region) that provided a particular response to an exercise and the corresponding national percentage:

Western % - National % = Western Delta-P.

If, on a given exercise, a group's percentage is lower than the national percentage, the difference between the two percentages is expressed as a negative number; if a group's percentage of success is higher than the national percentage, the group's difference in performance is a positive number. For example, if on a given exercise 74% of the 13-year-olds in the West gave an acceptable response, but only 68% of the national sample did so, then the West group delta-p for 13-year-olds would be +6 percentage points.

3. *Standard error.* The Year 03 NAEP sample design provides no known standard-error estimator that is unbiased, simple and inexpensive to compute. A reasonably good approximation to standard-error estimates of p-values may be obtained by applying the jackknife algorithm to first-stage sampling units within strata, using the method of successive differences and pooling across strata.

Let

$\hat{Y}_{ijk}$  = Sum of weights for respondents in subgroup i (e.g., Northeast, males or low metro) who chose response category j (e.g., correct foil in PSU k of stratum h (h = first three digits of PSU number, k = last digit of PSU number)).

$\hat{M}_{i,hk}$  = Sum of weights for respondents in subgroup i of PSU k of stratum h. Note that  $M_{i,hk} = \sum_j \hat{Y}_{ijk}$

Then

$\hat{Y}_{1j\dots} = \sum_{h=1}^H \sum_{k=1}^{n_h} \hat{Y}_{ijk}$ , The estimated number of respondents in subgroup i who chose response category j,

$\hat{M}_{1\dots} = \sum_{h=1}^H \sum_{k=1}^{n_h} \hat{M}_{i,hk}$ , the estimated number of respondents in subgroup i,

and

$$\hat{p}_{ij} = \frac{\hat{Y}_{ij..}}{\hat{M}_{i..}}$$

the estimated proportion of respondents

in subgroup i who chose response category j.

In the above formulas, H = the number of strata and  $n_h$  = the number of PSUs in stratum h. Multiplying  $\hat{p}_{ij}$  by 100 yields percentages, called p-values in NAEP terminology. The jackknifed estimate of the standard error of  $\hat{p}_{ij}$  is

$$s.e.\hat{p}_{ij} = \left[ \frac{1}{8} \sum_{h=1}^H \sum_{k=1}^{n_h} \left( \frac{\hat{Y}_{ij..} - \hat{Y}_{ijhk} + \hat{Y}_{ijh,k+1}}{\hat{M}_{i..} - \hat{M}_{i.hk} + \hat{M}_{i.h,k+1}} - \frac{\hat{Y}_{ijj..} + \hat{Y}_{ijhk} - \hat{Y}_{ijh,k+1}}{\hat{M}_{i..} + \hat{M}_{i.hk} - \hat{M}_{i.h,k+1}} \right)^2 \right]^{1/2}$$

where, for  $k = n_h$

$$\hat{Y}_{ijh,k+1} \equiv \hat{Y}_{ijh,1}$$

and

$$\hat{M}_{i.h,k+1} \equiv \hat{M}_{i.h,1}$$

In general, the jackknifed standard errors of National Assessment data will be larger than the simple random sampling formula  $(p/n)^{1/2}$ , reflecting, largely, the loss of precision due to cluster sampling of schools and students.

The project has adopted the convention that if an obtained delta-p is at least twice as large as the estimate of its standard error, then the difference is statistically significant. These differences are indicated in the tables by asterisks (\*).

Explanation of a Data Table Page for an Exercise

The exercise NAEP number and release number (including part suffix numbers for multipart exercises) are printed at the top and bottom of each data table page. For each exercise, data are

presented for the nation and for the 19 reporting groups. These groups are listed as column headings across the top of each page.

#### P-Values

The first level of text describes the exercise or exercise part. Within that part each response category is presented. For example, the first exercise (RIA) required respondents to sing "America." The first response category for which data are presented is "no response," which was coded "00" for the computer analyses. A set of results are presented first for 9-year-olds, then for 13-year-olds, 17-year-olds and young adults. At each age level for each response category, the first number printed is the national p-value. For example, the weighted percentage of 9-year-olds in the national sample who did not respond to the "America" exercise is 2.9%.

The response category that contains the total percentage of correct or acceptable responses to the exercise or exercise part has an asterisk attached to the category code. For these categories, the p-values for each reporting group are included in addition to the national p-value.

#### Delta-p's

Delta-p's are printed for each response category, for each of the 19 subpopulations within each age level. The first delta-p printed is for the Southeast region. For example, on the "America" exercise the difference between the Southeastern "no response" percentage and the national "no response" percentage is -.2%. The Southeast delta-p (-.2%) can be added to the national percentage (2.9%) to determine the percentage of Southeast 9-year-olds who did not respond (2.7%). The Western region delta-p is .4%, which indicates that the "no response" rate for 9-year-olds in that region was slightly higher than that of the nation as a whole.

#### Standard Errors

The standard error for each delta-p is an estimate of the variability in the obtained delta-p due to sampling error. If an obtained difference is at least twice as large as the estimate of its standard error, then the delta-p is said to be reliably different from zero. Statistically, this sort of statement has 95% probability of being correct. Such differences are called statistically significant and are indicated by asterisks. For example, on Exercise RIA the Northeast 17-year-old difference was found to be significantly above the "no response" rate for the nation as a whole.

The standard errors of the delta-p's provide estimates of the reliability of the national percentage and the respective group percentages obtained from the sample of respondents.

#### Results for Unreleased Exercises

Data are included for unreleased exercises. Usually, however, the results are only given for the no response, acceptable or correct response, unacceptable responses grouped together and the "I don't know" response categories. The text for each unreleased exercise describes the exercise's relationship to the music objectives and subobjectives.

CHAPTER 2

THEME 1: MUSICAL PERFORMANCE

For the purpose of assessment, performance has been broadly defined to include not only the polished concerts of the school band, orchestra and chorus, but also the less sophisticated singing of a young child in the classroom and the tapping of an adult as he listens to a popular song.

Five categories of musical performance were measured: singing familiar songs, repeating unfamiliar musical material, improvising, performing from notation and performing a prepared piece.

Turn on the RESPONSE tape recorder.)

(Before reading this exercise, give respondent the supplementary package opened to page 3.)

Here are the words to the song "America." You will hear it sung two times. You may join in singing at the beginning or when the announcer on the tape tells you to.

Turn on the STIMULUS tape recorder. Do NOT comment on the quality of respondent's singing. If respondent stops singing, encourage him to continue. When the voices stop, turn off the STIMULUS tape recorder and fill in the appropriate circles below.)

	<u>FIRST TIME</u>	<u>SECOND TIME</u>
No response	<input type="radio"/>	<input type="radio"/>
Incomplete response	<input type="radio"/>	<input type="radio"/>
Complete response	<input type="radio"/>	<input type="radio"/>

Release #: R1A  
NAEP #: 101001a1234

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: A. Singing familiar songs.

Objective: I. PERFORM A PIECE OF MUSIC.  
Subobjective: A. Sing (technical proficiency not required).

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: Verse of song in workbook

Overlap:				
Package-Exercise:	<u>9</u>	<u>13</u>	<u>17</u>	<u>Adult</u>
National P-value:	05-06	08-05	10-06	04-03
RTA05	48.81	53.92	63.73	68.74

Timing: (in seconds)

Stimulus:	*	*	*	*
Music:	22	22	21	21
Response:	*	*	*	*

\*Time not limited by paced tape.

Source Information for Musical Selection(s):

Score is Public Domain.

NOTE: Each P-value is the percentage of individuals of that age who gave a response of ACCEPTABLE OVERALL QUALITY. The stimulus for 9-year-olds was a children's choir singing in the Key of D. The stimulus for the other three ages was a mixed chorus singing in the key of C.

My country 'tis of thee, Sweet land of liberty, Of thee I sing, Land where my fathers died, Land of the pilgrims' pride, From every mountainside Let freedom ring
---

EXERCISE 11A--SCORING GUIDELINES

Generally only the second performance of "America" was scored in this exercise. If, however, there was no response or an incomplete response the second time, the better of the two times was scored.

Completeness: *No Response, Complete, Incomplete*  
Respondents who made no attempt to sing "America" received scores of *no response* for completeness and for pitch, rhythm and overall quality.

For a response to have been considered *complete*, it must have filled approximately 80% of the time span. For example, respondents could have delayed for two measures at the beginning of "America" and left off the last two notes of the song.

Pitch: *Not Markedly Deficient, Markedly Deficient*  
To have been considered correct, a pitch must have been closer to the right pitch than to the next half-step. Changes in register were not considered errors. A response which maintained the correct pitch in all but three notes was considered to be *not markedly deficient* in pitch.

Rhythm: *Not Markedly Deficient, Markedly Deficient*  
The rhythm was considered incorrect if the singing deviated from the stimulus rhythm to the extent that it could have been notated more accurately another way; slight tempo changes were acceptable. A response was considered *not markedly deficient* in rhythm if it contained less than four rhythmic errors.

Overall Quality: *Acceptable (Adequate or Good), Poor*  
Completeness, pitch and rhythm all contributed to the overall quality score; other factors, such as the correctness of the words, were not included. An *adequate* response contained not more than three pitch and three rhythmic errors; that is, it was not markedly deficient in either pitch or rhythm. A *good* response was complete, maintained correct pitch in all but the first two notes and contained no more than one rhythmic error. Both good and adequate responses were considered *acceptable*.

*Poor* responses fell into three categories. Poor pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. Poor rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. Poor pitch and rhythm was a response markedly deficient in both pitch and rhythm.

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: A. Singing familiar songs.

Objective: I. PERFORM A PIECE OF MUSIC.  
Subobjective: A. Sing (technical proficiency not required).

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: Verse of song in workbook

Overlap:	9	13	17	Adult
Package-Exercise:	06-06	10-06	12-05	06-03
National P-value:	40.08	47.85	57.46	63.86

Timing: (in seconds)				
Stimulus:	*	*	*	*
Music:	22	21	21	21
Response:	*	*	*	*

\*Time not limited by paced tape.

NOTE: Each P-value is the percentage of individuals of that age who gave a response of ACCEPTABLE OVERALL QUALITY.

EXERCISE U1a--SCORING GUIDELINES

Generally only the second performance of the familiar song was scored in this exercise. If, however, there was no response or an incomplete response the second time, the better of the two times was scored.

Completeness: *No Response, Complete, Incomplete*  
Respondents who made no attempt to sing received scores of *no response* for completeness and for pitch, rhythm and overall quality.

For a response to have been considered *complete*, it must have filled approximately 80% of the time span. For example, respondents could have delayed for two measures at the beginning of the song and left off the last two notes.

Pitch: *Not Markedly Deficient, Markedly Deficient*  
To have been considered correct, a pitch must have been closer to the right pitch than to the next half-step. Changes in register were not considered errors. A response which maintained the correct pitch in all but three notes was considered to be *not markedly deficient* in pitch.

Rhythm: *Not Markedly Deficient, Markedly Deficient*  
The rhythm was considered incorrect if the singing deviated from the stimulus rhythm to the extent that it could have been notated more accurately another way; slight tempo changes were acceptable. A response was considered *not markedly deficient* in rhythm if it contained less than four rhythmic errors.

Overall Quality: *Acceptable (Adequate or Good), Poor*  
Completeness, pitch and rhythm all contributed to the overall quality score; other factors, such as the correctness of the words, were not included. An *adequate* response contained not more than three pitch and three rhythmic errors; that is, it was not markedly deficient in either pitch or rhythm. A *good* response was complete, maintained correct pitch in all but the first two notes and contained no more than one rhythmic error. Both good and adequate responses were considered *acceptable*.

Poor responses fell into three categories. Poor pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. Poor rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. Poor pitch and rhythm was a response markedly deficient in both pitch and rhythm.

XXXXXXXXXXXX

Here are the words to a familiar song. You will hear it sung two times. You may join in singing at the beginning or when the announcer on the tape tells you to.

RESPONSE: 00 AGE: 9 No response.

(Turn on the RESPONSE tape recorder.)

(Before reading this exercise, give respondent the supplementary package opened to page 8.)

Here are the words to the song, "America." You are to sing it two times. Join in singing with the voices at the beginning. The voices will stop at the beginning of the second time. Keep singing when the voices stop.

(Turn on the STIMULUS tape recorder. Do NOT comment on the quality of respondent's singing. If respondent stops singing, encourage him to continue. When the voices stop, turn off the STIMULUS tape recorder. When respondent has finished singing, fill in the appropriate ovals below.)

My country, 'tis of thee,  
Sweet land of liberty,  
Of thee I sing  
Land where my Fathers died,  
Land of the pilgrims' pride,  
From every mountainside  
Let freedom ring.

Timing: (in seconds)

Stimulus:	*	*	*	*
Music:	24	22	22	22
Response:	*	*	*	*

\*Time not limited by paced tape.

Source Information for Musical Selection(s):

Score is Public Domain.

NOTE: Each p-value on the first line is the percentage of individuals of that age who gave a response of ACCEPTABLE OVERALL QUALITY when singing with others. The percentages on the second line are for ACCEPTABLE OVERALL QUALITY when singing alone. The stimulus for 9-year-olds was a children's choir singing in the key of D. The stimulus for the other three ages was a mixed chorus singing in the key of C.

#### EXERCISE RIB--SCORING GUIDELINES

This exercise required singing "America" first with others and then alone; both times were scored.

Completeness: No Response, Complete, Incomplete

Respondents who made no attempt to sing either time received scores of *no response* for both times. They were also scored no response for pitch, rhythm and overall quality. Those who sang only one time received scores of no response for the other time.

For a response to have been considered *complete*, it must have filled approximately 80% of the time span. For example, respondents could have delayed for two measures at the beginning of "America" and left off the last two notes of the song.

Pitch: Not Markedly Deficient, Markedly Deficient

To have been considered correct, a pitch must have been closer to the right pitch than to the next half-step. Changes in register were not errors. A response which maintained the correct pitch in all but three notes was considered to be *not markedly deficient* in pitch.

Rhythm: Not Markedly Deficient, Markedly Deficient

The rhythm was incorrect if the singing deviated from the stimulus rhythm to the extent that it could have been notated more accurately another way; slight tempo changes were acceptable. A response was considered *not markedly deficient* in rhythm if it contained less than four rhythmic errors.

Overall Quality: Acceptable (Adequate or Good), Poor

Completeness, pitch and rhythm all contributed to the overall quality score; other factors, such as the correctness of the words, were not included. An *adequate* response contained not more than three pitch and three rhythmic errors; that is, it was not markedly deficient in either pitch or rhythm. A *good* response was complete, maintained correct pitch in all but the first two notes and contained no more than one rhythmic error. Both *good* and *adequate* responses were considered *acceptable*.

There were two special criteria applied to responses to the second part of the exercise, singing alone. First, a response could contain unstable pitches throughout the first measure and still be considered good. Second, if the response was in a key different than the stimulus key, then the response was scored poor.

*Poor* responses fell into three categories. Poor pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. Poor rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. Poor pitch and rhythm was a response markedly deficient in both pitch and rhythm.

EXERCISE: R1901

Here are the words to "America." You are to sing it twice. Join in at the beginning. When the voices end at the start of the 2nd time, keep standing. (Time 1 scores)

101002-1234 R1B14

(Before reading this exercise, give respondent the supplementary package opened to page 3.)

Here are the words of a song. Now listen to the song.

(Turn on the STIMULUS tape recorder. Play first part of the selection, where the voices sing "Are You Sleeping," once through in unison, then turn off the STIMULUS tape recorder.)

Now the recorded voices will sing the song as a round. You sing with the voices that START the song. Join in singing at the beginning. The chorus will sing the song twice. You sing YOUR part twice. Begin singing with the voices that START the song, and keep singing with THOSE voices.

(Turn on the STIMULUS tape recorder. Do NOT comment on the quality of respondent's singing. If respondent stops singing, encourage him to continue. When the voices stop, turn off the STIMULUS tape recorder, and fill in the appropriate oval below.)

Morning bells are ringing,  
Ding ding dong,  
Ding ding dong.

Release #: R1C  
NAEP #: 101004-1

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: A. Singing familiar songs.  
Objective: I. PERFORM A PIECE OF MUSIC.  
Subobjective: A. Sing (technical proficiency not required).

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: Verse of song in workbook

Overlap:  
Package-Exercise: 05-08  
National P-value: 22.04  
R1C15

Timing: (in seconds)  
Stimulus: \*  
Music: 15  
Response: \*  
\*Time not limited by paced tape.

Source Information for Musical Selection(s):  
Score is Public Domain.  
NOTE: The P-value is the percentage of individuals who gave at least one response of ACCEPTABLE OVERALL QUALITY.

EXERCISE RIC--Scoring Guidelines

Since the exercise required singing a round twice, both times were scored.

Completeness: *No Response, Complete, Incomplete*  
Respondents who made no attempt to sing either time received *no response* scores for both times. They also received scores of no response for pitch, rhythm and overall quality. Those who sang only one time received scores of no response for the other time.

The importance of finishing the song was emphasized by the scoring. A response could have omitted the first two measures, as many as three beats in the middle or the last two notes and still have been considered *complete*. Completeness referred to filling the time span rather than following the text or melodic contour. Thus, the response "Are you sleeping? Are you sleeping? Are you sleeping...?" was considered complete.

Pitch: *Not Markedly Deficient, Markedly Deficient*  
To have been considered correct, a pitch must have been closer to the right pitch than to the next half-step. Changes in register were not considered errors. A response which maintained the correct pitch in all but six notes was scored *not markedly deficient*.

Rhythm: *Not Markedly Deficient, Markedly Deficient*  
The rhythm was considered incorrect if the singing deviated from the stimulus rhythm to the extent that it could have been notated more accurately another way. A response scored *not markedly deficient* contained less than seven rhythmic errors.

Overall Quality: *Acceptable (Adequate or Good), Poor*  
Completeness, pitch and rhythm all contributed to the overall quality score; other factors, such as the correctness of the words, were not included. An *adequate* response could not have been markedly deficient in pitch or rhythm. A *good* response was complete and contained not more than one pitch and one rhythmic error. Both good and adequate responses were considered *acceptable*.

*Poor* responses fell into three categories. *Poor* pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. *Poor* rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. *Poor* pitch and rhythm was a response markedly deficient in both pitch and rhythm.

Release #: U1c

NAEP #: 101005-234

EXERCISE U1c--SCORING GUIDELINES

Since the exercise required singing a round twice, both times were scored.

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: A. Singing familiar songs.

Objective: I. PERFORM A PIECE OF MUSIC.  
Subobjective: A. Sing (technical proficiency not required).

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: Verse of song in workbook

	13 10-07	17 12-06	ADULT 08-06
Overlap:			
Package-Exercise:			
National P-value:	29.29	40.52	46.66

Timing: (in seconds)	*	*	*
Stimulus:	8	8	8
Music:	*	*	*
Response:	*	*	*

\*Time not limited by paced tape.

NOTE: Each P-value is the percentage of individuals of that age who gave at least one response of ACCEPTABLE OVERALL QUALITY.

Completeness: No Response, Complete, Incomplete

Respondents who made no attempt to sing either time received scores of no response for both times. They also received scores of no response for pitch, rhythm and overall quality. Those who sang only one time received scores of no response for the other time.

The importance of finishing the song was emphasized by the scoring. A response could have omitted the first two measures, as many as three beats in the middle or the last two notes and still have been considered complete. Completeness referred to filling the time span rather than following the text or melodic contour.

Pitch: Not Markedly Deficient, Markedly Deficient

To have been considered correct, a pitch must have been closer to the right pitch than to the next half-step. Changes in register were not considered errors. A response which maintained the correct pitch in all but six notes was scored *not markedly deficient*.

Rhythm: Not Markedly Deficient, Markedly Deficient

The rhythm was considered incorrect if the singing deviated from the stimulus rhythm to the extent that it could have been notated more accurately another way. A response scored *not markedly deficient* in rhythm contained less than seven rhythmic errors.

Overall Quality: Acceptable (Adequate or Good), Poor

Completeness, pitch and rhythm all contributed to the overall quality score; other factors, such as the correctness of the words, were not included. An adequate response could not have been markedly deficient in pitch or rhythm. A good response was complete and contained not more than one pitch and one rhythmic error. Both good and adequate responses were considered *acceptable*.

Poor responses fell into three categories. Poor pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. Poor rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. Poor pitch and rhythm was a response markedly deficient in both pitch and rhythm.

EXERCISE: UIC01

Here are words to a familiar song, to be sung as a round. Start to sing at the beginning with the first voices and keep singing with them. Sing your part twice. (Time 1 score)

RESPONSE: 00 AGE: 13 No response.

Listen carefully to the rhythm. You will hear it two times. Try to remember it

so that you can tap out the same rhythm with this drum. You may play the drum with one or both hands.

(Hand the drum to respondent. Turn on the STIMULUS tape recorder. When the rhythm has been played twice, turn off the STIMULUS tape recorder. Hold the microphone of the RESPONSE tape recorder near the drum.)

Now you tap out the rhythm.

(If respondent does not respond, encourage him to try to tap out the rhythm. If he still does not respond, fill in the "No response" oval below.)

No response

Release #: R1D

NAPP #: 301016-1234

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: B. Repeating unfamiliar musical material.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
Subobjective: A. Perceive the various elements of music, such as timbre, rhythm, melody and harmony, and texture.

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: In-school: Drum; Out-of-school: Briefcase

Overlap: Professional  
Package-Exercise: 05-07 09-07 12-07 Adult  
National P-value: 31.19 55.79 63.66 54.25  
R1D04

Timing: (in seconds)  
Stimulus: \* \* \* \* \*  
Music: 9 9 9 9 9  
Response: \* \* \* \* \*

\*Time not limited by paced tape.

NOTE: Each P-value is the percentage of individuals of that age who gave a response of ADEQUATE OR GOOD QUALITY.

The rhythm to be repeated was:

EXERCISE R1D--SCORING GUIDELINES

Completeness: *No Response, Complete, Incomplete*  
Respondents who made no attempt to play received scores of *no response* for completeness and overall quality.

A *complete* response consisted of 13 or more beats. Many respondents played only the first four measures. Even though such a response was incomplete, it was scored adequate if all other criteria were met.

Overall Quality: *Acceptable (Adequate or Good), Poor*

An *adequate* response allowed for one error (a hesitation after the first four measures counted as an error) and a 30% tempo change. A *good* response must have been complete with all notes correct. The pattern must have been continuous, without hesitation, and there must have been no more than a 10% change from the stimulus tempo. Both *good* and *adequate* responses were considered *acceptable*.

Any response with more than one error was considered *poor*.

EXERCISE: R1D01

Listen carefully to the rhythm. You will hear it two times. Try to remember it so you can tap out the same rhythm on this drum. You may play the drum with one or both hands.

Listen carefully to this simple melody. It will be sung two times. Then you sing the same melody.

(Turn on the STIMULUS tape recorder. When the melody has been sung twice, turn off the STIMULUS tape recorder.)

Now, you sing the melody.

(Do NOT comment on the quality of respondent's singing. If respondent stops singing, encourage him to continue.)

If respondent does not respond, encourage him to try to sing the melody. If he still does not respond, fill in the "No response" oval below.)

No response

Release #: R12  
NAEP #: 301022-1234

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: B. Repeating unfamiliar musical material.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
Subobjective: A. Perceive the various elements of music, such as timbre, rhythm, melody and harmony, and texture.

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: None

Overlap:	$\frac{9}{06-08}$	$\frac{13}{08-07}$	$\frac{17}{10-08}$	Adult
Package-Exercise:				06-04
National P-value:	2.11	4.23	7.22	9.28

Timing: (in seconds)				
Stimulus:	*	*	*	*
Music:	6	6	6	6
Response:	*	*	*	*

\*Time not limited by paced tape.

NOTE: Each P-value is the percentage of individuals of that age who gave a response of ADEQUATE OR GOOD QUALITY.

The melody to be repeated was:

EXERCISE R1E--SCORING GUIDELINES

Three small changes in the melody were not considered as errors: articulating the second beat of the first measure, tying the first two notes of the third measure and not holding the last note. However, transposing the key and distorting the meter were each considered as one error. Generally no more than one error per beat was counted, but when a rhythmic error resulted in distortion of the meter, two errors were counted.

Overall Quality: *No Response, Acceptable (Adequate or Good), Poor*

Respondents who made no attempt to sing received a score of *no response*.

An *adequate* response must have contained no errors in the accented (first) beats but could have contained two errors elsewhere. The tempo could not deviate from the stimulus by more than 10%. To be scored *good*, a response must have also contained no errors on accented beats and no more than one error elsewhere. The stimulus could not have deviated from that of the stimulus by more than 5%. Both good and adequate responses were considered *acceptable*.

Any response with an error on an accented beat or more than two errors elsewhere was considered *poor*.

EXERCISE: N1201

Listen carefully to this simple melody. It will be sung two times. Then you sing the same melody.

	EAST	CENTRAL	EAST	MALE	BLACK	WHITE	NO HS	SOME HS	GRAD HS	POST HS	HERNO.	RURAL	CITY	BIG CITY	FRANGE	HERNO.

Listen to this tune. There are no words, only la, la, la. First, the recorded voices will sing both the melody and the harmonizing part.

(Turn on the STIMULUS tape recorder and play the first part of the selection. Then turn off the STIMULUS tape recorder.)

Now, listen carefully to the voices singing the HARMONIZING PART alone, because later you will sing this part with the recorded voices.

(Turn on the STIMULUS tape recorder and play the second part of the selection. Then turn off the STIMULUS tape recorder.)

Now, they will sing both the melody and the harmonizing part together two more times. BOTH times you sing the HARMONIZING PART with them. Begin singing when the voices start singing.

(Turn on the STIMULUS tape recorder and play the third part of the selection. Do NOT comment on the quality of respondent's singing. If respondent stops singing, encourage him to continue. When the voices stop, turn off the STIMULUS tape recorder, and fill in the appropriate ovals below.)

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: B. Repeating unfamiliar musical material.  
Objective: I. PERFORM A PIECE OF MUSIC.  
Subobjective: A. Sing (technical proficiency not required).

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: None

Overlap: 13/09-08 17/11-09 ADULT 06-06  
Package-Exercise: 7.64 15.37 7.60  
National P-value: R1P15

Timing: (in seconds)  
Stimulus: \* \* \* \* \*  
Music: 8 8 \* \* \* \* \*  
Response: \* \* \* \* \*

\*Time not limited by paced tape.

NOTE: Each P-value is the percentage of individuals of that age who gave at least one response of ACCEPTABLE OVERALL QUALITY.

The harmony line to be repeated is the top line.

EXERCISE R1F--SCORING GUIDELINES

Since the exercise required singing a harmonizing part twice, both times were scored.

Completeness: *No Response, Complete, Incomplete*

Respondents who made no attempt to sing received scores of *no response* for completeness and for pitch, rhythm and overall quality.

A *complete* response must have filled approximately 80% of the total time span or 100% of the time span after the first five notes.

Pitch: *Not Markedly Deficient, Markedly Deficient*

To have been considered correct, a pitch must have been closer to the right pitch than to the next half-step. Changes in register were not considered errors. A response which maintained the correct pitch in all but four notes at the beginning or three notes elsewhere was considered to be *not markedly deficient* in pitch.

Rhythm: *Not Markedly Deficient, Markedly Deficient*

The rhythm was considered incorrect if the singing deviated from the stimulus rhythm to the extent that it could have been notated more accurately another way; slight tempo changes were acceptable. A response was considered *not markedly deficient* in rhythm if it contained less than four rhythmic errors.

Overall Quality: *Acceptable (Adequate or Good), Poor*

Completeness, pitch and rhythm all contributed to the overall quality score. An *adequate* response could not have been markedly deficient in either pitch or rhythm. A *good* response was complete, maintained correct pitches except in the first three notes and contained no more than one rhythmic error. Both good and adequate responses were considered *acceptable*.

*Poor* responses fell into three categories. Poor pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. Poor rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. Poor pitch and rhythm was a response deficient in both pitch and rhythm.

NATION	REGION	SEX	RACE	PARENTAL EDUCATION	LOW EXTREME	SIZE-AND-TYPE OF COMMUNITY
SOUTH	NORTH	MALE FEMALE	BLACK WHITE	SOME GMD HS HS HS HS	NEEDS	RODUR

EXERCISE: R1701

Listen to the tune: It has no words, only Ja,Ja,Ja. First you'll hear the complete tune, then only the harmony. The tune will be played twice more. You sing harmony both times.

RESPONSE: 00 AGE: 13 No response.

R1P14

EXERCISE: N1710

Combination of performance quality, pitch, and rhythm scores from time 1 and time 2.

RESPONSE: 20 AGE: 13 Time 1: Poor with not deficient pitch and deficient rhythm; time 2: No response.

AGE: 17

Response did not occur at this age.

AGE: Ad

Response did not occur at this age.

RESPONSE: 21 AGE: 13

Time 1: Poor with not deficient pitch and deficient rhythm; Time 2: Poor with deficient pitch and rhythm.

AGE: 17

Response did not occur at this age.

AGE: Ad

Response did not occur at this age.

RESPONSE: 22 AGE: 13

Time 1: Poor with not deficient pitch and deficient rhythm; Time 2: Same as time 1.

AGE: 17

Response did not occur at this age.

AGE: Ad

Response did not occur at this age.

RESPONSE: 23 AGE: 13

Time 1: Poor with not deficient pitch & deficient rhythm; Time 2: Poor with deficient pitch and not deficient rhythm.

AGE: 17

Response did not occur at this age.

AGE: Ad

Response did not occur at this age.

RESPONSE: 24 AGE: 13

Time 1: Poor with not deficient pitch and deficient rhythm; Time 2: Adequate or good with not deficient pitch.

AGE: 17

Response did not occur at this age.

AGE: Ad

Response did not occur at this age.

You will hear a tune played two times.

The first time, listen carefully to the tune and make up a drum part that you would like to hear with the tune. The second time, play your drum part with the tune. Play whatever sounds best to you. You may play the drum with one or both hands.

(Hand the drum to respondent. Hold the microphone near the drum. Turn on the STIMULUS tape recorder. If respondent stops playing his part, encourage him to continue. When the tune is finished, turn off the STIMULUS tape recorder and fill in the appropriate oval below.)

SECOND TIME

- No response
- Incomplete response
- Complete response

Release #: R1G  
NAEP #: 103001-1234

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: C. Improvising.

Objective: I. PERFORM A PIECE OF MUSIC.  
Subobjective: C. Invent and improvise (technical proficiency not required).

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: In-school: Drum; Out-of-school: Briefcase

Overlap:	9	13	17	Adult
Package-Exercise:	06-07	08-06	10-07	04-04
National P-value:	69.87	82.23	90.32	90.30

Timing: (in seconds)				
Stimulus:	*	*	*	*
Music:	40	41	41	40
Response:	*	*	*	*

\*Time not limited by paced tape.

Source Information for Musical Selection(s):

William D. Hall, "Break the Silence with a Song." Score used by permission of William D. Hall.

NOTE: Each P-value is the percentage of individuals of that age who gave a response of ADEQUATE OR GOOD QUALITY.

EXERCISE RIG--SCORING GUIDELINES

Completeness: *No Response, Complete, Incomplete*  
Respondents who made no attempt to play received scores of *no response* for completeness and overall quality.

A *complete* response filled approximately 80% of the time span.

Overall Quality: *Acceptable (Adequate or Good), Poor*

An *adequate* response maintained the basic beat and was coordinated with the stimulus tempo by the beginning of the fifth measure. A *good* response not only maintained the beat but also added several embellishments which contributed to the performance. Both good and adequate responses were considered *acceptable*.

*Poor* responses were those which were not maintaining a steady beat with the stimulus music after the beginning of the fifth measure.

R1G01 103001-1234 103001-1234 R1G01

EXPERIMENTAL R1G01

You will hear an original tune played twice. First, listen & make up a drum rhythm you'd like to hear with the tune. Next time, play, with 1 or 2 hands, what sounds best to you.

RESPONSE: 00 AGE: 9 No response.

RIGOR 103001-1234

103001-1234 RIGOR

B. Now you will hear the beginning of a different song. Make up a tune that finishes the song. I will raise my hand to let you know when you are to begin singing.

(Turn on the STIMULUS tape recorder. As soon as the music stops, raise your hand and turn off the STIMULUS tape recorder.)

Do NOT comment on the quality of respondent's singing.

When respondent has finished part B, go to next exercise.

If respondent does not respond, encourage him to try to finish the song. If he still does not respond, fill in the "No response" oval below.)

No response

Release #: R1H  
NAEP #: 103003-1234

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: C. Improvising.

Objective: I. PERFORM A PIECE OF MUSIC.  
Subobjective: C. Invent and improvise (technical proficiency not required).

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: None

Overlap:  
Package-Exercise: 07-08 13 17 ADULT  
National P-Value: 46.70 50.77 45.10 59.41  
R1H02

Timing: (in seconds)  
Stimulus: \* \* \* \* \*  
Part B Music: 6 6 6 6 \*  
Response: \* \* \* \* \*

\*Time not limited by paced tape.

NOTE: This information pertains to Part B, the released part of the exercise. Each P-Value is the percentage of individuals of that age who gave a response of ADEQUATE OR GOOD QUALITY. Part A is reported as exercise 1h.

B. The beginning of the song was:

EXERCISE RH--SCORING GUIDELINES

Overall Quality: *No Response, Acceptable (Adequate or Good), Poor*  
Respondents who made no attempt to sing received scores of *no response*.

Three basic criteria separated the adequate and good responses from the poor responses. To have been considered *adequate or good*, a response must have begun within two measures of the end of the stimulus, must have not deviated from the stimulus tempo by more than 10% and must have contained less than three unidentifiable pitches (pitches that were a little sharp or flat were acceptable).

Three other criteria separated good responses from adequate responses:

A *good* response lasted at least two measures while an adequate response need only have filled one measure.

A *good* response did not change key while an adequate response could establish and retain a new tonal center in a closely related key (dominant, subdominant, relative minor or parallel minor). Temporary dominant modulation with return to the tonic was not a change of key.

A *good* response ended on the first, third or fifth degree of the tonic chord with a definite feeling of finish while an adequate response ended on any note in the same key in a clear cadence or half-cadence.

Both good and adequate responses were considered *acceptable*.

EXERCISE 01h--SCORING GUIDELINES

Theme: I. MUSICAL PERFORMANCE.  
 Subtheme: C. Improvising.  
 Objective: I. PERFORM A PIECE OF MUSIC.  
 Subobjective: C. Invent and improvise (technical proficiency not required).

Scoring Type: Professional  
 Administration Mode: Individual  
 Special Stimulus: None

Overlap:	07-9	17	Adult
Package-Exercise:	07-08	11-07	08-04
National P-value:	38.58	38.34	53.71
Timing: (in seconds)			
Stimulus:	*	*	*
Part A Music:	7	6	6
Response:	*	*	*

\*Time not limited by paced tape.

NOTE: This information pertains to the unreleased Part A of exercise 1H. Each P-value is the percentage of individuals of that age who gave a response of ADEQUATE OR GOOD QUALITY. There is no data for 13-year-olds.

Overall Quality: *No Response, Acceptable (Adequate or Good), Poor*  
 Respondents who made no attempt to sing received scores of *no response*.

Three basic criteria separated the adequate and good responses from the poor responses. To have been considered *adequate or good*, a response must have begun within two measures of the end of the stimulus, must have not deviated from the stimulus tempo by more than 10% and must have contained less than three unidentifiable pitches (pitches that were a little sharp or flat were acceptable).

Three other criteria separated good responses from adequate responses:  
 A *good* response lasted at least two measures while an adequate response need only have filled one measure.

A *good* response did not change key while an adequate response could establish and retain a new tonal center in a closely related key (dominant, subdominant, relative minor or parallel minor). Temporary dominant modulation with return to the tonic was not a change of key.

A *good* response ended on the first, third or fifth degree of the tonic chord with a definite feeling of finish while an adequate response ended on any note in the same key in a clear cadence or half-cadence.

Both good and adequate responses were considered *acceptable*.

Listen to this tune. There are no words, only la, la, la.

*(Turn on the STIMULUS tape recorder and play the tune once. Then turn off the STIMULUS tape recorder.)*

Listen to the tune again and make up a harmonizing part. The third time you will sing your harmonizing part with the voices. You may find it easier to sing above or below the melody.

*(Turn on the STIMULUS tape recorder and play the tune again. Then turn off the STIMULUS tape recorder.)*

Now, sing your harmonizing part with the voices.

*(Turn on the STIMULUS tape recorder and play the tune the last time. Do NOT comment on the quality of respondent's singing.)*

*If respondent stops singing, encourage him to continue. When the voices stop, turn off the STIMULUS and RESPONSE tape recorders, and fill in the appropriate oval below.)*

- No response
- Incomplete response
- Complete response

(MAKE SURE BOTH TAPE RECORDERS ARE TURNED OFF)

Release #: R11  
NAEP #: 103006-234

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: C. Improvising.

Objective: I. PERFORM A PIECE OF MUSIC.  
Subobjective: C. Invent and improvise (technical proficiency not required).

Scoring Type: Professional  
Administration Node: Individual  
Special Stimulus: None

Overlap:			
Package-Exercise:	13	17	Adult
National P-value:	10-09	12-08	04-05
R1104	7.71	8.64	11.05

Timing: (in seconds)			
Stimulus:	*	*	*
Music:	9	10	9
Total:	*	*	*

\*Time not limited by paced tape.

NOTE: Each P-value is the percentage of individuals of that age who gave a response of ADEQUATE OR GOOD QUALITY.

The tune played on the tape recorder was:

EXERCISE R11--SCORING GUIDELINES

Completeness: No Response, Complete, Incomplete  
Respondents who made no attempt to sing received scores of *no response* for completeness and overall quality.

A response was *complete* if no more than one measure (one quarter of the tune) was omitted.

Overall Quality: Acceptable (Adequate or Good), Poor

An *adequate* response must have filled several requirements. It did not lose the tonality and the cadence was in the stimulus key. At least 50% of the beats were harmonized with thirds or sixths (with the exception of pedal points using I or V<sup>7</sup>) unless the response had the character of an independent melody, in which case only 25% of the beats had to be harmonized with thirds or sixths. No more than 50% of the notes could be in unison or at the octave, and no more than 33% could be harmonized in seconds or sevenths.

The requirements for a *good* response were more stringent. At least 75% of the beats must have been harmonized in thirds or sixths (with the exception of pedal points using I or V<sup>7</sup>), and even if the response had the character of an independent melody, at least 50% of the notes should have been harmonized in thirds or sixths. The lines could not have had more than one measure of parallel fourths or fifths, and one of the two final notes must not have been in unison or at the octave.

Both *good* and *adequate* responses were considered *acceptable*.

MAYOR	SOUTH		REGION		NORTH		SEX	RACE	PARENTAL EDUCATION		POST	SIZE-AND-TYPE OF COMMUNITY

B. Now sing this second line of music. (Point to line B.)

Males: page 4, part B  
Females: page 5, part B

(When respondent has finished part B, turn off the RESPONSE tape recorder.

If respondent does not respond, encourage him to try to sing the line of music. If he still does not respond, turn off the RESPONSE tape recorder and fill in the "No response" oval below.)

No response

(MAKE SURE BOTH TAPE RECORDERS ARE TURNED OFF)

Release #: R1J  
NAEP #: 204001-1234

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: D. Reading notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
Subobjective: D. Sight-sing.

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: Score

Overlap:  
Package-Exercise: 05-09 13 17  
National P-value: .83 5.99 11.85 9.23

Timing: No paced tape was used in this individually administered exercise.

NOTE: This information pertains to Part B, the released part of the exercise. Each P-value is the percentage of individuals of that age who gave a response of ACCEPTABLE OVERALL QUALITY. Part A is reported as exercise 1j.

Supplementary package: page 4

Supplementary package: page 5

EXERCISE R1J--SCORING GUIDELINES

Completeness: *No Response, Complete, Incomplete*  
Respondents who made no attempt to sing the line of music received scores of *no response* for completeness and for pitch, rhythm and overall quality.

A response was considered *complete* if the number of sounds corresponded to the number of notes in the line of music.

Pitch: *Not Markedly Deficient, Markedly Deficient*

A pitch was considered correct if it was closer to the right pitch than to the next half-step. A score of *not markedly deficient* allowed three pitch errors and one change of key.

Rhythm: *Not Markedly Deficient, Markedly Deficient*

The rhythm was incorrect if the singing deviated from the stimulus rhythm to the extent that it could be more accurately notated another way. Since no tempo was established, values of notes could only be relative to one another. Stopping for a breath did not count as an error if the next note was attacked at the right time. To be *not markedly deficient* in rhythm, a response could not contain more than three rhythmic errors. One exception, however, was that a performance containing consistently halved quarter notes, but no other errors, was scored not markedly deficient.

Overall Quality: *Acceptable (Adequate or Good), Poor*

Completeness, pitch and rhythm all contributed to the overall quality score. An *adequate* performance could not be deficient in either pitch or rhythm. A *good* performance could not have more than one error of any kind. Both adequate and good responses were considered *acceptable*.

*Poor* responses fell into three categories. Poor pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. Poor rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. Poor pitch and rhythm was a response markedly deficient in both pitch and rhythm.

RESPONSE: 34 AGE: 9 A) Poor with deficient pitch and not deficient rhythm; B) Adequate or good with not deficient pitch and rhythm.

RESPONSE: 33 AGE: 9 A) Poor with deficient pitch and not deficient rhythm; B) Same as A.

RESPONSE: 32 AGE: 13 A) Poor with deficient pitch and not deficient rhythm; B) Poor with not deficient pitch and deficient rhythm.

RESPONSE: 31 AGE: 9 A) Adequate or good performance with not markedly deficient pitch and rhythm; B) No response.

Response did not occur at this age.

EXPLANATION

Combination of performance quality, pitch, and rhythm scores from A and B.

RESPONSE: 40 AGE: 13 A) Adequate or good performance with not markedly deficient pitch and rhythm; B) No response.

Response did not occur at this age.

AGE: 17

Response did not occur at this age.

AGE: Ad

Response did not occur at this age.

RESPONSE: 41 AGE: 9 A) Adequate or good with not deficient pitch and rhythm; B) Poor with deficient pitch and rhythm.

NAEP #: 204001-1234

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: D. Reading notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
Subobjective: D. Sight-sing.

Scoring Type: Professional  
Administration Mode: Individual  
Special stimulus: Score

Overlap:	$\frac{9}{05-09}$	$\frac{13}{08-08}$	$\frac{17}{10-09}$	$\frac{Adult}{06-07}$
Package-Exercise:				
National P-value:	1.58	9.20	15.10	12.38

Timing: No paced tape was used in this individually administered exercise.

NOTE: This information pertains to the unreleased Part A of exercise 1J. Each P-value is the percentage of individuals of that age who gave a response of ACCEPTABLE OVERALL QUALITY.

EXERCISE 1J-J--SCORING GUIDELINES

Completeness: No Response, Complete, Incomplete

Respondents who made no attempt to sing the line of music received scores of no response for completeness and for pitch, rhythm and overall quality. A response was considered complete if the number of sounds corresponded to the number of notes in the line of music.

Pitch: Not Markedly Deficient, Markedly Deficient

A pitch was considered correct if it was closer to the right pitch than to the next half-step. A score of not markedly deficient allowed two pitch errors and one change of key.

Rhythm: Not Markedly Deficient, Markedly Deficient

The rhythm was incorrect if the singing deviated from the stimulus rhythm to the extent that it could be more accurately notated another way. Since no tempo was established, values of notes could only be relative to one another. Stopping for a breath did not count as an error if the next note was attacked at the right time. To be not markedly deficient in rhythm, a response could not contain more than two rhythmic errors. One exception, however, was that a performance containing consistently halved quarter notes, but no other errors, was scored not markedly deficient.

Overall Quality: Acceptable (Adequate or Good), Poor

Completeness, pitch and rhythm all contributed to the overall quality score. An adequate performance could not be deficient in either pitch or rhythm. A good performance could not have more than one error of any kind. Both adequate and good responses were considered acceptable.

Poor responses fell into three categories. Poor pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. Poor rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. Poor pitch and rhythm was a response markedly deficient in both pitch and rhythm.

EXERCISE: 01101

A. Look at the first line of music. Sing this line. Start on any tone. You may sing numbers, letters, or Ia, Ia, Ia- whichever is easiest. Begin when you are ready.

RESPONSE: 00 AGE: 9 No response.

Theme: I. MUSICAL PERFORMANCE.  
 Subtheme: D. Reading notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
 Subobjective: D. Sight-sing.

Scoring Type: Professional  
 Administration Mode: Individual  
 Special Stimulus: Score

Overlap:  
 Package-Exercise:  $\frac{9}{06-09}$   $\frac{13}{09-09}$   $\frac{17}{11-10}$   $\frac{Adult}{04-06}$   
 National P-value: .41 4.65 10.14 8.08

Timing: No paced tape was used in this individually administered exercise.

NOTE: This information pertains to Part B, the released part of the exercise. Each P-value is the percentage of individuals of that age who gave a response of ACCEPTABLE OVERALL QUALITY. Part A is reported as exercise 1k.

Supplementary package: page 9

Supplementary package: page 10

B.

EXERCISE RIK--SCORING GUIDELINES

Completeness: No Response, Complete, Incomplete

Respondents who made no attempt to sing the line of music received scores of no response for completeness and for pitch, rhythm and overall quality.

A response was considered *complete* if the number of sounds corresponded to the number of notes in the line of music.

Pitch: Not Markedly Deficient, Markedly Deficient

A pitch was considered correct if it was closer to the right pitch than to the next half-step. A score of *not markedly deficient* allowed three pitch errors and one change of key. However, if one of the major second intervals was maintained consistently, the other interval may have been sung at a minor second interval without causing a markedly deficient score.

Rhythm: Not Markedly Deficient, Markedly Deficient

The rhythm was incorrect if the singing deviated from the stimulus rhythm to the extent that it could be more accurately notated another way. Since no tempo was established, values of notes could only be relative to one another. Stopping for a breath did not count as an error if the next note was attacked at the right time. To be *not markedly deficient* in rhythm, a response could not contain more than three rhythmic errors. One exception, however, was that a performance containing consistently halved quarter notes, but no other errors, was scored not markedly deficient.

Overall Quality: Acceptable (Adequate or Good), Poor

Completeness, pitch and rhythm all contributed to the overall quality score. An *adequate* performance could not be deficient in either pitch or rhythm. A *good* performance could not have more than one error of any kind. Both good and adequate responses were considered *acceptable*.

Poor responses fell into three categories. Poor pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. Poor rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. Poor pitch and rhythm was a response markedly deficient in both pitch and rhythm.

EXERCISE: R1K01

B. Look at the second line of music. Sing this line. Start on any tone. You may sing numbers, letters, or Ia, Ia- whichever is easiest. Begin when you are ready.

RESPONSE: 00 AGE: 9 No response.

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: D. Reading notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
Subobjective: D. Sight-sing.

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: Score

Overlap:	9	13	17	Adult
Package-Exercise:	06-09	09-09	11-10	04-06
National P-Value:	01K05	1.17	8.24	12.48
				10.41

Timing: No paced tape was used in this individually administered exercise.

NOTE: This information pertains to the unreleased Part A of exercise 1K. Each p-value is the percentage of individuals of that age who gave a response of ACCEPTABLE OVERALL QUALITY.

EXERCISE 01K--SCORING GUIDELINES

Completeness: *No Response, Complete, Incomplete*  
Respondents who made no attempt to sing the line of music received scores of *no response* for completeness and for pitch, rhythm and overall quality.

A response was considered *complete* if the number of sounds corresponded to the number of notes in the line of music.

Pitch: *Not Markedly Deficient, Markedly Deficient*  
A pitch was considered correct if it was closer to the right pitch than to the next half-step. A score of *not markedly deficient* allowed two pitch errors and one change of key.

Rhythm: *Not Markedly Deficient, Markedly Deficient*  
The rhythm was incorrect if the singing deviated from the stimulus rhythm to the extent that it could be more accurately notated another way. Since no tempo was established, values of notes could only be relative to one another. Stopping for a breath did not count as an error if the next note was attacked at the right time. To be *not markedly deficient* in rhythm, a response could not contain more than two rhythmic errors. One exception, however, was that a performance containing consistently halved quarter notes, but no other errors, was scored not markedly deficient.

Overall Quality: *Acceptable (Adequate or Good), Poor*  
Completeness, pitch and rhythm all contributed to the overall quality score. An *adequate* performance could not be deficient in either pitch or rhythm. A *good* performance could not have more than one error of any kind. Both good and adequate responses were considered *acceptable*.

*Poor* responses fell into three categories. Poor pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. Poor rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. Poor pitch and rhythm was a response markedly deficient in both pitch and rhythm.

01K05 200002-1234

200002-1234 01K05

*(This exercise requires respondent to play a musical instrument and to sing. If respondent plays a large instrument, it may be necessary for you to go to another room to administer this exercise. If it is necessary to move, TAKE ALL NATIONAL ASSESSMENT MATERIALS WITH YOU.)*

*If possible, respondent should not be observed by anyone during this administration. Before beginning this exercise, read the following to respondent.)*

FOR THIS LAST EXERCISE WE WILL AGAIN BE USING A TAPE RECORDER TO RECORD SOME OF YOUR RESPONSES.

*(Turn the RESPONSE tape over and rewind it.)*

A. Do you now play a musical instrument?

- Yes (Go to B)
- No (Go to I on page 26)

(Continued)

B. What instrument(s) do you now play? How long have you played the instrument(s)?

- (1) \_\_\_\_\_
- (2) \_\_\_\_\_
- (3) \_\_\_\_\_
- (4) \_\_\_\_\_
- (5) \_\_\_\_\_
- (6) \_\_\_\_\_
- (7) \_\_\_\_\_
- (8) \_\_\_\_\_
- (9) \_\_\_\_\_
- (10) \_\_\_\_\_

*(If respondent answers "None" OR no response is given in 10 seconds, go to I. If respondent pauses after first response ask, "What other instruments do you play?")*

*Stop after 10 responses OR when respondent answers "None" OR no response is given in 10 seconds. (Go to C)*

C. Do you have an instrument to play?

- Yes (Fill in the oval to indicate where instrument is available from. Identify instrument on line below and go to D.)  Home
- School  Other (specify) \_\_\_\_\_

What is the instrument? \_\_\_\_\_ (Go to D)

- No Why not? (Fill in the oval to indicate reason and go to I.)  Not available
- Too heavy or large  Forgor
- Other (specify) \_\_\_\_\_

(Continued)

D. Do you have a piece of music to play?

- Yes (Go to F)
- No Why not? (Fill in the oval to indicate reason and go to E.)
- None available
- Can't read music
- Forget
- Other (specify) \_\_\_\_\_

E. Can you play a tune from memory?

- Yes (Go to F)
- No (Go to H)

(Write the tape-counter reading from the RESPONSE tape recorder here \_\_\_\_\_)

**MAKE SURE NEVER TO REWIND THE RESPONSE TAPE RECORDER BEYOND THIS READING!**

Ask respondent to spend a few minutes warming up.

The recording volume-level of the RESPONSE tape recorder should be checked by tape recording respondent as he warms up. Set up the RESPONSE tape recorder near respondent and tape 10-15 seconds of his playing. Rewind the tape (NO FURTHER THAN THE NUMBER WRITTEN ABOVE!) and listen to make sure the volume level is acceptable. If the volume level is too low, move the microphone closer to the instrument. When the volume level is acceptable, do NOT move the RESPONSE tape recorder or the microphone.

When the RESPONSE tape recorder is set up and checked out, proceed with part F of this exercise.)

F. (Identify the piece. If respondent has music, ask if you can see it. Then, write down the information asked for below. If he does not have music, obtain from him as much information below as he can give you.)

Composer \_\_\_\_\_

Title \_\_\_\_\_

Arranger \_\_\_\_\_

Publisher \_\_\_\_\_

(Go to G)

G. (Ask respondent to spend a few minutes warming up.

The recording volume-level of the RESPONSE tape recorder should be checked by tape recording respondent as he warms up. Set up the RESPONSE tape recorder near respondent and tape 10-15 seconds of his playing. Rewind the tape and listen to make sure the volume level is acceptable. If the volume level is too low, move the microphone closer to the instrument. When the volume level is acceptable, do NOT move the RESPONSE tape recorder or the microphone. Rewind the tape and read the information from the RESPONSE tape box label onto the tape.

When respondent is ready to play, turn on the RESPONSE tape recorder. ANNOUNCE THE TITLE OF THE PIECE TO BE PLAYED ON THE RESPONSE TAPE. The respondent may start at the beginning or play the most typical passage of the work. Record 40-60 seconds of the indicated work, then go to H.

If respondent is unable to play ANY music, fill in the "No response" oval below and go to H.)

- No response

H. (Give respondent the supplementary package opened to page 16 or 17.

Show him the line appropriate to his instrument by using the key on the opposite page. Give him time to look at the music. Ask him to play that line.

If respondent has not previously played the instrument, ask him to spend a few minutes warming up. Check the recording volume-level of the RESPONSE tape recorder as indicated in G above.

Before tape recording the performance ANNOUNCE ON THE TAPE THE LINE OF MUSIC TO BE PLAYED. Record the performance. If respondent stops playing before finishing the line of music, ask him to replay it. If he is unable to play ANY notes in the line of music, fill in the "No response" oval below and go to I.)

- No response

(Turn off the RESPONSE tape recorder.)

(Continued)

Supplementary package: pages 16 and 17

(Locate the NAME of the instrument respondent plays in the list below. The number following the instrument name refers to the line of music he is to play.)

Refer to the supplementary package, pages 16 and 17 for the music.

If respondent states in part C that he has an instrument to play which is NOT on the list, ask him to choose one line to play. Ask respondent to tell you which line he will play, and ANNOUNCE THAT NUMBER ON THE RESPONSE TAPE RECORDER.)

INSTRUMENT	LINE OF MUSIC	INSTRUMENT	LINE OF MUSIC
Accordion	10	Guitar, Acoustic (Non-electric)	11
Alto Horn	4	Guitar, Electric	11
A. Violin	10	Harmonica	1, 2, or 3
E. Violin	11	Harp	10

EXERCISE R1L--SCORING GUIDELINES

(Part H: Instrumental Sight-reading)

Release #: R1L  
NAEP #: 102001-12  
102002-34

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: D. Reading notation.

Objective: I. PERFORM A PIECE OF MUSIC.  
Subobjective: B. Play or sing (technical proficiency not required).

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: Instrument and score

Overlap:				
Package-Exercise:	07-13	13	17	ADULT
National P-value:		10-14	12-13	02-03
R1I23	.64	6.34	8.71	4.01

Timing: No paced tape was used in this individually administered exercise.

NOTE: Each P-value is the percentage of individuals of that age who gave an instrumental performance of ACCEPTABLE OVERALL QUALITY on the sight-reading task in Part H. Drummers were not scored for pitch; guitar players were not scored for rhythm. For the in-school ages the administration of the exercise was stopped after Part B and arrangements were made for the individual to return with his instrument later that day or the next day. The second session began with Part C. For the out-of-school ages the entire exercise was administered in one session. For 17-year-olds and adults the exercise continued into another section for vocal performance. This section is reported as Exercise 14. If individuals at these upper two age levels said No to Part A of Exercise 14, then Exercise 14 was administered.

Completeness: No Response, Complete, Incomplete

Respondents who made no attempt to sight-read received scores of no response. They also received scores of no response for pitch, rhythm and overall quality.

A performance which included at least 80% of the notes was considered complete.

Pitch: Not Markedly Deficient, Markedly Deficient

To have been considered correct, a pitch must have been closer to the right pitch than to the next half-step. A response which included less than four pitch errors was considered to be not markedly deficient. One change of key or pitch level was also permitted in a performance that was not markedly deficient.

Rhythm: Not Markedly Deficient, Markedly Deficient

The rhythm was considered incorrect if it deviated from the stimulus rhythm to the extent that it could have been notated more accurately another way. Since no tempo was established, values of notes could only be relative to one another. Three rhythmic errors were allowed in a performance that was not markedly deficient.

Overall Quality: Acceptable (Adequate or Good), Poor

Completeness, pitch and rhythm all contributed to the overall quality score. An adequate performance was deficient in neither pitch nor rhythm. A good performance had no more than one error of any kind. Both adequate and good responses were considered acceptable.

Poor responses fell into three categories. Poor pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. Poor rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. Poor pitch and rhythm was a response markedly deficient in both pitch and rhythm.

EXERCISE RIL--SCORING GUIDELINES

(Parts F and G: Playing a Prepared Piece)

Difficulty: Easy, Medium, Difficult

The Selective Music Lists prepared by the National Interscholastic Music Activities Commission of the Music Educators National Conference were used as guides in scoring the difficulty level of the pieces.

Overall Quality: No Response, Acceptable (Adequate or Good), Poor  
Respondents who made no attempt to play instruments received scores of *no response*.

Because of the diversity of the prepared pieces, it was impossible to construct categories with rigid definitions. An *adequate* performance followed the score closely, included not more than a few errors and maintained tonal harmonic and rhythmic integrity. A *good* performance had to be more than a mechanistic reproduction of the score; it must have been interpretive. The supplementary cassette recording presents examples from each category. Both adequate and good performances were considered *acceptable*.

FRANCISE R1L01

Part A. Do you now play a musical instrument?

RESPONSE: 00 AGE: 9 No response.

(Continued)

Now I would like to ask you some questions about singing.

1. What type of voice do you have?

Soprano (Go to J)

Alto (Go to J)

Tenor (Go to J)

Bass (Go to J)

Other (Please specify) \_\_\_\_\_  
(Go to J)

Uncertain (Go to J)

J. Do you have a piece of music available to sing?

Yes (Go to L)

No (Specify reason on line below)

Why not? \_\_\_\_\_ (Go to K)

K. Can you sing without having printed music?

Yes (Go to L)

No (Go to N)

(Continued)

L. (Identify the piece. If respondent has music, ask if you can see it. Then, write down the information asked for below. If he does not have music, obtain from him as much information as he can give you.)

Composer \_\_\_\_\_

Title \_\_\_\_\_

Arranger \_\_\_\_\_

Publisher \_\_\_\_\_

(Go to M)

M. (When respondent is ready to sing, turn on the RESPONSE tape recorder. Be sure the Record Level Control is set at 3. ANNOUNCE THE TITLE OF THE PIECE TO BE SING ON THE RESPONSE TAPE. The respondent may start at the beginning or sing the most typical passage of the work. Record 40-60 seconds of the indicated work, then go to N.)

If respondent is unable to sing ANY of the music, fill in the "No response" oval below and go to N.)

No response

N. (Give respondent the supplementary package opened to page 15. Find the line appropriate for his voice by using the key on the next page.)

Sing this line of music. (Point to the correct line.) You may sing numbers, letters,

or La, la, la--whichever is easiest. Begin singing when you are ready.

(Before respondent begins singing, ANNOUNCE ON THE TAPE THE LINE TO BE SING. If the respondent has not sung previously, be sure the Record Level Control is set at 3.)

If respondent stops singing before finishing the line of music, ask him to sing it again. If he is unable to sing ANY notes in the line of music, fill in the "No response" oval below.)

No response

(Turn off the RESPONSE tape recorder.)

(Continued)

(Locate respondent's type of voice in the list below. The number following the type of voice refers to the line of music he is to sing.)

Refer to supplementary package, page 18 for the music.

If the answer to part I is "Other" OR "Uncertain," ask respondent to choose one line of music to sing. Ask him to tell you which line he will sing, and ANNOUNCE THAT NUMBER ON THE RESPONSE TAPE RECORDER.)

<u>TYPE OF VOICE</u>	<u>LINE OF MUSIC</u>
Soprano	1
Alto	2
Tenor	3
Bass	4

Supplementary package: page 18

Release #: R1H  
NAEP #: 102002-34

Theme: I. MUSICAL PERFORMANCE.  
Subtheme: D. Reading notation.  
Objective: I. PERFORM A PIECE OF MUSIC.  
Subobjective: B. Play or sing (technical proficiency not required).

Scoring Type: Professional  
Administration Mode: Individual  
Special Stimulus: Score

Overlap: 17  
Package-Exercise: 12-13  
National P-value: 3.07  
R1M13 3.20

Timing: No paced tape was used in this individually administered exercise.

NOTE: This exercise is the continuation of Exercise 11 for 17-year-olds and adults. Each P-value is the percentage of individuals of that age who gave a vocal performance of ACCEPTABLE OVERALL QUALITY on the sight-reading task in Part N.

EXERCISE RIM--SCORING GUIDELINES

(Part N: Vocal Sight-reading)

Completeness: No Response, Complete, Incomplete

Respondents who made no attempt to sight-read received scores of *no response* for completeness and for pitch, rhythm and overall quality.

A performance which included at least 80% of the notes was considered *complete*.

Pitch: Not Markedly Deficient, Markedly Deficient

Starting pitches were at the discretion of the vocalist; subsequent pitches were relative and must have been closer to the right pitch than to the next half-step. A response which included less than four pitch errors was considered to be *not markedly deficient*. One change of key or pitch level was also permitted in a performance that was not markedly deficient.

Rhythm: Not Markedly Deficient, Markedly Deficient

The rhythm was considered incorrect if it deviated from the stimulus rhythm to the extent that it could have been notated more accurately another way. Since no tempo was established, values of notes could only be relative to one another. Three rhythmic errors were allowed in a performance that was *not markedly deficient*.

Overall Quality: Acceptable (Adequate or Good), Poor

Completeness, pitch and rhythm all contributed to the overall quality score. A performance not markedly deficient in either pitch or rhythm was considered *adequate*. Only one error of any kind was permitted in a *good* performance. Both good and adequate responses were considered *acceptable*.

*Poor* responses fell into three categories. *Poor* pitch was a response markedly deficient in pitch but not markedly deficient in rhythm. *Poor* rhythm was a response not markedly deficient in pitch but markedly deficient in rhythm. *Poor* pitch and rhythm was a response markedly deficient in both pitch and rhythm.

EXERCISE RIM--SCORING GUIDELINES

(Parts L and M: Singing a Prepared Piece)

Difficulty: Easy, Medium, Difficult

The Selective Music Lists prepared by the National Interscholastic Music Activities Commission of the Music Educators National Conference were used as guides in scoring the difficulty level of the pieces.

Overall Quality: No Response, Acceptable (Adequate or Good), Poor

Respondents who made no attempt to sing, received scores of *no response*.

Because of the diversity of the prepared pieces, it was impossible to construct categories with rigid definitions. An *adequate* performance followed the score closely, included not more than a few errors and maintained tonal harmonic and rhythmic integrity. A *good* performance had to be more than a mechanistic reproduction of the score; it must have been interpretive. The supplementary cassette recording presents examples from each category. Both adequate and good performances were considered *acceptable*.

### CHAPTER 3

#### THEME 2: MUSICAL NOTATION AND TERMINOLOGY

Three closely related sets of exercises were developed to measure knowledge of musical notation and terminology. The first set deals with the vocabulary commonly used to describe music elements, forms, tempi, dynamics and interpretive characteristics. Exercises in this group deal with the meanings of simple words like *loud* and *soft* as well as with more sophisticated musical terms like *largo*. The second set deals with music notation. At the simplest level, exercises involve recognizing the treble clef; at a more difficult level, exercises require reading a key signature or explaining the meaning of a crescendo. In the third set of exercises, individuals are asked to follow notation while listening to a piece of music. In one case, they follow pedagogical line notation for "Are You Sleeping?" In another case, they follow a 12-part score from the beginning of the Beethoven *Symphony No. 7*.

Listen carefully to the music. Fill in the oval beside the pattern that shows the direction the tune moves.

I don't know.

Release #: R2A  
NAEP #: 301027-1

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
Subtheme: A. Vocabulary.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
Subobjective: A. Perceive the various elements of music, such as timbre, rhythm, melody and harmony, and texture.

Scoring Type: Machine  
Administration Mode: Group.  
Special Stimulus: Line drawings

Overlap:  
Package-Exercise:  $\frac{9}{01-19}$   
National P-value: R2A 32.32

Timing: (in seconds)  
Stimulus: 17  
Music: 5  
Response: 17  
Total: 44

DO NOT TURN THE PAGE  
UNTIL TOLD TO DO SO.

EXERCISE: R2A

Listen carefully to the music. Choose the pattern that shows the direction the tune moves. (Recording of piano)

Listen carefully to the music. It has two parts. How does the second part compare to the first part?

- It is louder.
- It is softer.
- It is slower.
- It is exactly the same.
- I don't know.

Release #: R2C  
 NARP #: 302001-1234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
 Subtheme: A. Vocabulary.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
 Subobjective: B. Perceive structure in music.

A. Listen carefully to the form of this melody. It has four phrases:

A ... A (same) ... B (different) ... A (same)

B. Now you are going to hear a different melody in four phrases.

It will be played two times. What is its form?

- A ... A ... A ... B
- A ... A ... B ... A
- A ... A ... B ... B
- A ... B ... B ... A
- I don't know.

Release #: R2E  
NAEP #: 302006-1234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
Subtheme: A. Vocabulary.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
Subobjective: B. Perceive structure in music.

Scoring Type: Machine  
Administration Mode: Group  
Special Stimulus: None

Listen carefully to this musical selection. It will be performed two times. In the second performance of the selection, there may be a:

- change in harmony.
- change in melody.
- change in rhythm.

A. Fill in the oval beside the phrase that tells about the type of change in the second performance. The two performances of this selection will be repeated.

- Change in harmony
- Change in melody
- Change in rhythm
- I don't know.

B. Now listen carefully to another musical selection. It will be performed two times. Fill in the oval beside the phrase that tells about the type of change in the second performance.

The two performances of this selection will be repeated.

- Change in harmony
- Change in melody
- Change in rhythm
- I don't know.

DO NOT TURN THE PAGE  
UNTIL TOLD TO DO SO.

U2603 301048-234

Look at the line of music.

The word "Largo" means that the music should be performed in what way?

- Loudly
- Softly
- Quickly
- Slowly
- I don't know.

Release #: R2P  
NAEP #: 201015-234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
Subtheme: A. Vocabulary.  
Objective: II. READ STANDARD MUSICAL NOTATION.  
Subobjective: A. Identify the elements of notation, such as clefs, letter names of notes, duration symbols, key signatures, and dynamic markings.

Scoring Type: Machine  
Administration Mode: Group  
Special Stimulus: Score

Overlap: 13 17  
Package-Exercise: 06-13 03-04 Adult  
National P-Value: R2P 9.88 14.34 9.11 02-12

Timing: (in seconds)  
Stimulus: 16 15  
Response: 15 14  
Total: 42 40

\*Time not limited by paced tape.

Below is an excerpt from a program that you might receive at a concert. Use the excerpt to answer the questions on this and the following two pages.

SYMPHONY NO. 31, IN F MAJOR.....Bernhard Apfelbaum (1733-1790)

1. Allegro
2. Adagio
3. Minuet: Moderato
4. Rondo: Presto

(Continued)

C. What is the tempo of the last movement?

- Slow
- Moderate
- Fast
- Shifting between slow and fast
- I don't know.

D. Who will probably perform the work?

- An instrumental soloist
- An instrumental soloist with orchestra
- An orchestra
- A singer with piano
- A singer with orchestra and chorus
- I don't know.

E. The form of the last movement is probably

- rondo.
- sonata--allegro.
- three-part (A-B-A).
- theme and variations.
- I don't know.

PLEASE TURN THE PAGE.

A. The work is probably in the style of which period of music history?

- Renaissance
- Baroque
- Classical
- Romantic
- Modern
- I don't know.

B. What is the tempo of the second movement?

- Slow
- Moderate
- Fast
- Shifting between slow and fast
- I don't know.

PLEASE GO ON TO THE NEXT PAGE.

(Continued)

F. The form of the third movement is probably

- rondo.
- sonata.
- three-part (A-B-A).
- theme and variations.
- I don't know.

G. Which one of the following is probably the structure of the last movement?

- A theme of two equal phrases and variations on that theme
- An opening theme which alternates with successive contrasting themes
- Several different themes which are stated, developed, then restated
- An opening theme which is repeated by various instruments in the manner of a round
- I don't know.

Release #: R26  
NAEP #: 401012-34

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
Subtheme: A. Vocabulary.

Objective: IV. BE KNOWLEDGEABLE ABOUT SOME MUSICAL INSTRUMENTS, SOME OF THE TERMINOLOGY OF MUSIC, METHODS OF PERFORMANCE AND FORMS, SOME OF THE STANDARD LITERATURE OF MUSIC, AND SOME ASPECTS OF THE HISTORY OF MUSIC.

Subobjective: A. Know the meanings of common musical terms used in connection with the performance of music, and identify musical instruments and performing ensembles in illustrations.

Scoring Type: Machine  
Administration Mode: Group  
Special Stimulus: Program excerpt

Overlap: 17  
Package-Exercise: 01-15  
National P-value: 07-13

Below are the names of some musical forms. Fill in the oval beside "Yes" if an ORCHESTRA is normally used in the performance of the musical form. Fill in the oval beside "No" if an orchestra is not normally used in the performance of the musical form. If you do not know the answer, fill in the oval beside "I don't know."

A. Is an orchestra normally used in the performance of an OPERA?

- Yes  
 No

I don't know.

B. Is an orchestra normally used in the performance of a SYMPHONY?

- Yes  
 No

I don't know.

C. Is an orchestra normally used in the performance of a BALLETT SUITE?

- Yes  
 No

I don't know.

(Continued)

D. Is an orchestra normally used in the performance of a MADRIGAL?

- Yes  
 No

I don't know.

E. Is an orchestra normally used in the performance of a STRING QUARTET?

- Yes  
 No

I don't know.

F. Is an orchestra normally used in the performance of a VIOLIN SONATA?

- Yes  
 No

I don't know.

G. Is an orchestra normally used in the performance of a PIANO CONCERTO?

- Yes  
 No

I don't know.

R2H08

Release #: U2i  
NAEP #: 201001-1

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
Subtheme: B. Basic notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
Subobjective: A. Identify the elements of notation, such as clefs, letter names of notes, duration symbols, key signatures, and dynamic markings.

Scoring Type: Machine  
Administration Mode: Group  
Special Stimulus: Graphics

Overlap:  
Package-Exercise: 9  
National P-value: 01-01  
U2i 96.16

Timing: (in seconds)  
Stimulus: 4  
Response: 20  
Total: 34

R2J 201002-1234

201002-1234

R2J

Release #: U2J  
NAEP #: 201008-1234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
Subtheme: B. Basic notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
Subobjective: A. Identify the elements of notation, such as clefs, letter names of notes, duration symbols, key signatures, and dynamic markings.

Scoring Type: Machine  
Administration Mode: Group  
Special Stimulus: Score

Overlap:  $\frac{9}{04-13}$   $\frac{13}{03-14}$   $\frac{17}{05-17}$   $\frac{Adult}{02-25}$   
Package-Exercise: 42.55 67.13 67.53 42.89  
National P-value: U2J

Timing: (in seconds)  
Stimulus: 16 16 16 16  
Response: 16 15 15 15  
Total: 42 43 42 \*

\*Time not limited by paced tape.

EXERCISE: 021

Identify a music notation symbol in a given line of music.

RESPONSE: 07M AGI: Ad Incorrect responses:

201006-234 R2K

Release #: U2k  
 NAMP #: 201004-1234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
 Subtheme: B. Basic notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
 Subobjective: A. Identify the elements of notation, such as clefs, letter names of notes, duration symbols, key signatures, and dynamic markings.

Scoring Type: Machine  
 Administration Mode: Group  
 Special Stimulus: Score

Look at the line of music.

The arrow is pointing to what note?

- A
- B
- C
- D
- E
- I don't know.

Release #: R2L  
NAEP #: 201016-234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
Subtheme: B. Basic notation.

Objective: II. READ STANDARD MUSICAL NOTATION.

Subobjective: A. Identify the elements of notation, such as clefs, letter names of notes, duration symbols, key signatures, and dynamic markings.

Scoring Type: Machine  
Administration Mode: Group  
Special Stimulus: Score

Overlap: 13 17 Adult  
Package-Exercise: 06-18 06-15 07-07  
National P-value: 62.01 60.89 38.99  
R2L

Timing; (in seconds)  
Stimulus: 15 15 12  
Response: 15 16 \*  
Total: 40 42 \*

\*Time not limited by paced tape.

DO NOT TURN THE PAGE  
UNTIL TOLD TO DO SO.

EXERCISE: R2L---

The arrow is pointing to what note in the line of music?

Release #: 021  
 NAEP #: 201005-1234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
 Subtheme: B. Basic notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
 Subobjective: A. Identify the elements of notation, such as clefs, letter names of notes, duration symbols, key signatures, and dynamic markings.

Scoring Type: Machine  
 Administration Mode: Group  
 Special Stimulus: Score

Look at the line of music.

The arrow is pointing to what musical sign?

- Bar line
- Flat
- Natural
- Sharp
- I don't know

Release #: R2M  
NAEP #: 201007-1234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
Subtheme: B. Basic notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
Subobjective: A. Identify the elements of notation, such as clefs, letter names of notes, duration symbols, key signatures, and dynamic markings.

Scoring Type: Machine  
Administration Mode: Group  
Special Stimulus: Score

R2H 201007-1234

201007-1234 R2H

Release #: U2m  
 NABP #: 201010-1234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
 Subtheme: B. Basic notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
 Subobjective: A. Identify the elements of notation, such as clefs, letter names of notes, duration symbols, key signatures, and dynamic markings.

Scoring Type: Machine  
 Administration Mode: Group  
 Special Stimulus: Score

|                   |                   |                    |                    |       |
|-------------------|-------------------|--------------------|--------------------|-------|
| Overlap:          | $\frac{9}{03-19}$ | $\frac{13}{04-19}$ | $\frac{17}{08-05}$ | Adult |

Look at the line of music.

The line of music is in what key?

- B flat major
- C minor
- E flat major
- F major
- I don't know.

Release #: R2N  
NAEP #: 201014-234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
Subtheme: B. Basic notation.

Objective: II. READ STANDARD MUSICAL NOTATION.  
Subobjective: A. Identify the elements of notation, such as clefs, letter names of notes, duration symbols, key signatures, and dynamic markings.

Scoring Type: Machine  
Administration Mode: Group  
Special Stimulus: Score

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
 Subtheme: C. Score-Reading.  
 Objective: II. READ STANDARD MUSICAL NOTATION.  
 Subobjective: C. Follow notation while listening to music.

Scoring Type: Semi-Professional  
 Administration Mode: Group  
 Special Stimulus: Score

|                   |                   |                    |                    |                       |
|-------------------|-------------------|--------------------|--------------------|-----------------------|
| Overlap:          | $\frac{9}{03-11}$ | $\frac{13}{07-11}$ | $\frac{17}{01-12}$ | $\frac{ADULT}{07-15}$ |
| Package-Exercise: | 2.85              | 9.55               | 15.73              | 12.98                 |
| National P-Value: |                   |                    |                    |                       |
| U2s               |                   |                    |                    |                       |

|                      |    |    |    |    |
|----------------------|----|----|----|----|
| Timing: (in seconds) |    |    |    |    |
| Stimulus:            | 37 | 34 | 35 | 33 |
| Music:               | 6  | 6  | 6  | 6  |
| Response:            | 12 | 11 | 11 | *  |
| Total:               | 49 | 45 | 46 | *  |

\*Time not limited by paced tape.

EXAMISEL-025---

Identify the place in a score where there is a discrepancy between the performance and the notation.

RESPONSE: 09 No response.

Follow the printed music below as you listen to the recording.

The recording will stop before the end of the music. Draw a vertical line through the printed music after the last note you hear.

Release #: R2U

NAEP #: 203003-1234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
Subtheme: C. Score-reading.

Objective: II. READ STANDARD MUSICAL NOTATION.  
Subobjective: C. Follow notation while listening to music.

Scoring Type: Semi-Professional  
Administration Mode: Group Score  
Special Stimulus:

|                   |       |       |       |       |

Follow the printed music below as you listen to the recording.  
 The recording will stop before the end of the music. Draw a  
 vertical line through the printed music after the last note you  
 hear.

Release #: E27  
 NSEP #: 203004-1234

Theme: II. MUSICAL NOTATION AND TERMINOLOGY.  
 Subtheme: C. Score-reading.  
 Objective: II. READ STANDARD MUSICAL NOTATION.  
 Subobjective: C. Follow notation while listening to music.

Scoring Type: Semi-Professional  
 Administration Mode: Group  
 Special Stimulus: Score  
 Overlap:  
 Package-Exercises: 9  
 National P-Value: 04-21  
 R2V 6.96 34.08 45.97 34.41

Timing: (in seconds)  
 Stimulus: 36

Follow the printed music on this page and the following page as you listen to the recording. The recording will stop before the end of the music. Draw a vertical line through the 12 lines of printed music after the last note you hear.

Musical score for page 433, featuring 12 staves for various instruments: Flute (Fl.), Oboe (Ob.), Clarinet (Cl.), Bassoon (Bn.), Trumpet (Tr.), Horn (Hr.), Trombone (Tbn.), Violin I (Vn. I), Violin II (Vn. II), Viola (Va.), Violoncello (Vc.), and Contrabass (Cb.). The score includes musical notation such as notes, rests, and dynamic markings.

PLEASE GO ON TO THE NEXT PAGE.

(Continued)

Continuation of the musical score from page 433, featuring the same 12 staves for instruments: Flute (Fl.), Oboe (Ob.), Clarinet (Cl.), Bassoon (Bn.), Trumpet (Tr.), Horn (Hr.), Trombone (Tbn.), Violin I (Vn. I), Violin II (Vn. II), Viola (Va.), Violoncello (Vc.), and Contrabass (Cb.). The score continues with musical notation and dynamic markings.

**STOP**

DO NOT TURN THE PAGE  
UNTIL TOLD TO DO SO.

Follow the printed music on this page and the following page as you listen to the recording. The recording will stop before the end of the music. Draw a vertical line through the four lines of printed music after the last note you hear.

*Allegro spiritoso*

APTER 4

THEME 3: INSTRUMENTAL AND VOCAL MEDIA

The instrumental and vocal media exercises require discrimination among performing media and also require verbal identification of the instrument or voice that produces a given timbre. Three types of exercises were used to measure the ability to discriminate among instrumental and vocal media. The first group involved presenting a taped recording of a short performance, sometimes by one instrument or voice, sometimes by several. Respondents were then asked which instruments or voice types were performing. Exercises in the second group involved asking respondents to identify the picture of a certain instrument or instrument family. The third group of exercises measured knowledge about how certain instruments are played -- by blowing, by striking, by plucking or by drawing a bow across them.

Listen carefully to the music. How is the instrument played?

- By striking
- By blowing
- By plucking strings
- By drawing a bow across strings
- I don't know.

Release #: R3A  
 NABP #: 301001-12

448

Theme: III. INSTRUMENTAL AND VOCAL MEDIA.  
 Subtheme: A. Aural recognition.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
 Subobjective: A. Perceive the various elements of music, such as timbre, rhythm, melody and harmony, and texture.

Scoring Type: Machine  
 Administration Mode: Group  
 Special Stimulus: None

Overlap:  $\frac{9}{02-09}$   $\frac{13}{01-18}$   
 Package-Exercise: R3A  
 National P-value: 91.11 93.44

Timing: (in seconds)  
 Stimulus: 42 40  
 Music: 23 23  
 Response: 15 17  
 Total: 67 70

Source Information for Musical Selection(s):

Ludwig von Beethoven, "Andante," Symphony No. 6 in F Major, op. 68. Score is Public Domain.

301009-123a 03b

Listen carefully to the music. What instrument is playing?

- Clarinet
- Oboe
- Piccolo
- Trumpet
- I don't know.

Release #: R3C  
 NABP #: 301007-1234

Theme: III. INSTRUMENTAL AND VOCAL MEDIA.  
 Subtheme: A. Aural recognition.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
 Subobjective: A. Perceive the various elements of music, such as timbre, rhythm, melody and harmony, and texture.

Scoring Type: Machine  
 Administration Mode: Group  
 Special Stimulus: None

Overlap:  
 Package-Exercise: 01-03 13 02-14 17 01-04 17 Adult  
 National P-value: R3C 57.55 88.52 89.95 83.60

Timing: (in seconds)  
 Stimulus: 27 30 27 29  
 Music: 15 16 15 15  
 Response: 16 16 15 15  
 Total: 54 57 52 52 \*

\*Time not limited by paced tape.

Listen carefully to the music. What kind of instruments are playing? Mark only ONE answer.

- Brass  
 Strings  
 Woodwinds  
 I don't know.

Release #: R31  
NAEP #: 301042-234

Theme: III. INSTRUMENTAL AND VOCAL MEDIA.  
Subtheme: A. Aural recognition.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
Subobjective: A. Perceive the various elements of music, such as timbre, rhythm, melody and harmony, and texture.

Scoring Type: Machine  
Administration Mode: Group  
Special Stimulus: None

Overlap: 13 17 Adult  
Package-Exercise: 07-07 07-03 05-10  
National P-value: R31 85.47 91.18 88.82

Timing: (in seconds)  
Stimulus: 38 39 37  
Music: 24 24 24  
Response: 15 16 \*  
Total: 64 66 \*

\*Time not limited by paced tape.

Listen carefully to the music. What instruments are playing?  
 Mark only ONE answer.

- Flute and oboe
- Oboe and bassoon
- Flute and clarinet
- Clarinet and bassoon
- I don't know.

Release #: R3K  
 NAEP #: 301038-234

Theme: III. INSTRUMENTAL AND VOCAL MEDIA.  
 Subtheme: A. Aural recognition.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
 Subobjective: A. Perceive the various elements of music, such as timbre, rhythm, melody and harmony, and texture.

Scoring Type: Machine  
 Administration Mode: Group  
 Special Stimulus: None

Overlap:  
 Package-Exercise: 13 17 Adult  
 National P-value: 04-16 09-08 03-21  
 R3K 20.80 19.26 17.97

Timing: (in seconds)  
 Stimulus: 51 46 45  
 Music: 29 29 29  
 Response: 16 15 \*  
 Total: 79 71 \*

\*Time not limited by paced tape.

Source Information for Musical Selection(s):

Antonio Vivaldi, "2nd Movement," Diesden Concerto in G Minor, Tomo 25, Fanna XII, No. 3, P. 383, Jouvet, Conductor, Westminster Recording Co., Inc., New York, NY 5341. Score is Public Domain.

Listen carefully to the music. What instruments are playing?  
 Mark only ONE answer.

- Two violins
- Violin and viola
- Violin and cello
- Two double basses
- I don't know.

Release #: R3L  
 NARP #: 301039-234

Theme: III. INSTRUMENTAL AND VOCAL MEDIA.  
 Subtheme: A. Aural recognition.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
 Subobjective: A. Perceive the various elements of music, such as timbre, rhythm, melody and harmony, and texture.

Scoring Type: Machine  
 Administration Mode: Group  
 Special Stimulus: None

Overlap:  
 Package-Exercise:  $\frac{13}{05-16}$   $\frac{17}{03-08}$   $\frac{ADULT}{04-20}$   
 National P-Value: R3L 61.74 65.46 57.47

Timing: (in seconds)  
 Stimulus: 40 40 41  
 Music: 22 21 22  
 Response: 17 16 \*  
 Total: 68 66 \*

\*Time not limited by paced tape.

Source Information for Musical Selection(s):

Johann Sebastian Bach, "Invention No. 4 in D Minor," from the 15  
Two-Part Inventions. Score is Public Domain.

DO NOT GO ON TO THE NEXT  
 PAGE UNTIL TOLD TO DO SO.

EXERCISE: R3L  
 Listen carefully to the music. What instruments are playing? (Each, invention No. 4 in D minor)  
 RESPONSE: 00 AGE: 13 No response.  
 Response did not occur at this age.

Listen carefully to the music performed by a singer accompanied by instruments. What kind of voice is singing?

- Soprano  
 Alto  
 Baritone  
 Bass  
 I don't know.

Release #: R3M  
NAEP #: 301035-234

Theme: III. INSTRUMENTAL AND VOCAL MEDIA.  
Subtheme: A. Aural recognition.

Objective: III. LISTEN TO MUSIC WITH UNDERSTANDING.  
Subobjective: A. Perceive the various elements of music, such as timbre, rhythm, melody and harmony, and texture.

Scoring Type: Machine  
Administration Mode: Group  
Special Stimulus: None

Overlap: 13  
Package-Exercise: 03-17 09-03 ADAPT  
National P-value: 37.63 40.77 41.06  
R3M

Timing: (in seconds)  
Stimulus: 51 49 49  
Music: 34 33 32  
Response: 16 15 \*  
Total: 78 75 \*

\*Time not limited by paced tape.

Source Information for Musical Selection(s):

Johannes Brahms, "Songs for Alto, Viola and Piano," Op. 91, Marian Anderson's Treasury, Marian Anderson, contralto, William Primrose, Violist, Franz Rupp, pianist, RCA Records, New York, RCA Vic. LM 2712. Used by permission of RCA Records and American Federation of Television and Radio Artists. Score is Public Domain.

On each of the following four pages is a picture of the instruments found in a symphony orchestra. Follow the directions on EACH page.

(Continued)

A. Draw a line around ALL of the cellos.

Former Seating Plan, Philadelphia Orchestra, Eugene Ormandy, Music Director

PLEASE TURN THE PAGE.

PLEASE GO ON TO THE NEXT PAGE.

(Continued)  
B. Draw a line around ALL of the bassoons.

Former Seating Plan, Philadelphia Orchestra, Eugene Ormandy, Music Director

(Continued)  
C. Draw a line around ALL of the bass drums.

Former Seating Plan, Philadelphia Orchestra, Eugene Ormandy, Music Director

PLEASE TURN THE PAGE.

PLEASE GO ON TO THE NEXT PAGE.

(Continued)  
 D. Draw a line around ALL of the trumpets.

Finnish Seating Plan, Philadelphia Orchestra, Eugene Ormandy, Music Director

Release #: R3P  
 NAEP #: 401002-1234

Theme: III. INSTRUMENTAL AND VOCAL MEDIA.  
 Subtheme: B. Visual recognition.

Objective: IV. BE KNOWLEDGEABLE ABOUT SOME MUSICAL INSTRUMENTS, SOME OF THE TERMINOLOGY OF MUSIC, METHODS OF PERFORMANCE AND FORMS, SOME OF THE STANDARD LITERATURE OF MUSIC, AND SOME ASPECTS OF THE HISTORY OF MUSIC.  
 Subobjective: A. Know the meanings of common musical terms used in connection with the performance of music, and identify musical instruments and performing ensembles in illustrations.

Scoring Type: Semi-Professional  
 Administration Mode: Group  
 Special Stimulus: Orchestral seating plan

Release #: U3g  
 NABP #: 401003-1234

Theme: III. INSTRUMENTAL AND VOCAL MEDIA.  
 Subtheme: B. Visual recognition.

Objective: IV. BE KNOWLEDGEABLE ABOUT SOME MUSICAL INSTRUMENTS, SOME OF THE TERMINOLOGY OF MUSIC, METHODS OF PERFORMANCE AND FORMS, SOME OF THE STANDARD LITERATURE OF MUSIC, AND SOME ASPECTS OF THE HISTORY OF MUSIC.  
 Subobjective: A. Know the meanings of common musical terms used in connection with the performance of music, and identify musical instruments and performing ensembles in illustrations.

Scoring Type: Semi-Professional  
 Administration Mode: Group  
 Special Stimulus: Orchestral seating plan

Some of the instruments listed below are played by blowing air into them. Fill in the oval beside "Yes" if the instrument is played by blowing air into it. Fill in the oval beside "No" if the instrument is NOT played by blowing air into it. If you do not know the answer, fill in the oval beside "I don't know."

A. Is the CLARINET played by blowing air into it?

- Yes  
 No

I don't know.

B. Are the CYMBALS played by blowing air into them?

- Yes  
 No

I don't know.

(Continued)

C. Is the GUITAR played by blowing air into it?

- Yes  
 No

I don't know.

D. Is the HARP played by blowing air into it?

- Yes  
 No

I don't know.

E. Is the OBOE played by blowing air into it?

- Yes  
 No

I don't know.

PLEASE GO ON TO THE NEXT PAGE.

PLEASE TURN THE PAGE.

(Continued)

F. Is the SAXOPHONE played by blowing air into it?

- Yes
- No

I don't know.

G. Is the TROMBONE played by blowing air into it?

- Yes
- No

I don't know.

H. Is the TRUMPET played by blowing air into it?

- Yes
- No

I don't know.

(Continued)

I. Is the TUBA played by blowing air into it?

- Yes
- No

I don't know.

J. Is the VIOLIN played by blowing air into it?

- Yes
- No

I don't know.

K. Is the XYLOPHONE played by blowing air into it?

- Yes
- No

I don't know.

PLEASE GO ON TO THE NEXT PAGE.

DO NOT TURN THE PAGE  
UNTIL TOLD TO DO SO
