ABSTRACT

Intended for the vocational instructor, the booklet presents a task list and competency record for the occupational program of lubrication specialist. The list was developed by a working committee of auto mechanics instructors and industry representatives throughout the state of Minnesota for use in program articulation between secondary and postsecondary institutions. From the task list for the occupational program of automotive mechanic, groups of tasks are organized into 12 areas of competence: Steering and Suspension System, Drive Train, Engine Mechanical, Cooling and Heating System, Air Conditioning, Brake, Electrical, Engine Tune-Up, Fuel and Emission System, Body Adjustments, Exhaust and Lubrication, and Related Subject Activities. The competency record is a suggested replacement for the traditional report card and would accompany the student through his or her vocational training in the secondary and/or postsecondary school. For each group of tasks within the competency areas, the student is graded for each competency in task performance on a 6-point scale ranging from "received introduction only" to "able to help others; very competent." Also included in the booklet are the job description for lubrication specialist, list of references, the industry representatives involved in developing the task list, members of the curriculum articulation project, and maps showing the locations of vocational centers and area vocational technical institutes in the state. (Author/RG)

 * Documents acquired by ERIC include many informal unpublished *
 * materials not available from other sources. ERIC makes every effort *
 * to obtain the best copy available. Nevertheless, items of marginal *
 * reproducibility are often encountered and this affects the quality *
 * of the microfiche and hardcopy reproductions ERIC makes available *
 * via the ERIC Document Reproduction Service (EDRS). EDRS is not *
 * responsible for the quality of the original document. Reproductions *
 * supplied by EDRS are the best that can be made from the original. *

550 Cedar Street
St. Paul, MN 55101
(612) 296-3755

MINNESOTA INSTRUCTIONAL MATERIALS CENTER
3300 Century Avenue North White Bear Lake, Minnesota 55110
(612) 770-3943 800 652-9024

This material is being distributed to you through the facilities of the Minnesota Instructional Materials Center in cooperation with the Minnesota State Department of Education.

The Minnesota Instructional Materials Center is supported by Title IV Part C, ESIA and Parts D, B, and F of VEA. If we can be of assistance to you, call or write.

I. JOB DESCRIPTION

Lubrication Specialist - (DOT 915.887)

(Other common job titles: lubrication person, lube person)

The lubrication specialist installs or replaces minor cooling, heating and electrical units, exhaust system components, performs lubrication service, changes the oil in the engine and replaces parts and accessories. He/she discusses problems or requests with the customer or reads the work order to determine probable repairs.

In doing service and replacing parts, the lubrication specialist visually inspects the vehicle and notifies the customer of defects and impending problems.

Graduates* of the lubrication specialist occupational program find employment in independent garages, auto service centers, dealerships and fleet maintenance shops.

It is not assumed that he/she could be employed as a foreman, service manager, automotive mechanic, service center mechanic or as any other automotive specialist.

* Graduate: A student who has demonstrated competent performance of all tasks designated on the task list for this occupational program.

II. TASK LIST

The following task list gives you, the vocational instructor, recommendations about what your students should be able to do when they take a job as a LUBRICATION SPECIALIST. It was developed by a working committee of auto mechanics instructors and industry representatives throughout the state of Minnesota.

The task list on the following pages includes only the tasks in the AREAS OF COMPETENCE recommended for a graduate of the LUBRICATION SPECIALIST occupational program. These tasks were selected from the task list for the Automotive Mechanic. The occupational program for LUBRICATION SPECIALIST does not require that the student be competent in performing all tasks recommended for the Automotive Mechanic. The numbering system used for this task listing shows the tasks that were selected from the Automotive Mechanic task list.

As you utilize this task list, you will need to continue working with your local advisory committee and with other instructors in your geographic area. Judgments must be made, by you, concerning the amount of time to spend in teaching various tasks, the conditions surrounding performance of each task, and the performance level for each task that will be acceptable.

II. TASK LIST

AREA OF COMPETENCE #1

PERFORM STEERING AND SUSPENSION SYSTEM SERVICE

- IA. Inspect Steering and Suspension System
1. Inspect springs for breakage and sag
 - a. Coil
 - b. Leaf
 - c. Torsion Bar
 2. Inspect shock absorber for leaks, operation, and mounting
 - a. Standard
 - b. Air
 3. Inspect control arm bushings for distortion and wear
 4. Check ball joints for wear and lubrication
 5. Check spindles and steering knuckles for bent parts and worn parts
 6. Inspect tires and wheels for wear pattern
 - a. Air pressure
 - b. Proper size
 7. Inspect wheel bearings for noise and condition
 8. Inspect tie rods for looseness, seals, and bent rods
 9. Inspect idler arms for worn bushings
 10. Inspect stabilizer bars for breakage and bushing wear
 11. Inspect steering arms for damage
 12. Inspect drag links for damage and loose ends
 13. Inspect bell-crank assemblies for damage and wear
 14. Inspect rear-axle housing for damage, broken welds, bushings, and leaks
 15. Inspect frame and body for bends, cracks, damage, and height
 16. Inspect sway bars for bushing wear
 17. Inspect strut bars for bushing wear
 18. Inspect solid-beam axles for damage and bushing wear
 19. Inspect trailing and torque arm for distortion
 20. Inspect trunnions for looseness
 21. Check torsion bar height
 22. Inspect front wheel drive/steering axle for worn parts
- IIA. Remove and Replace Steering and Suspension Components
2. R/R shock absorbers
 - a. Standard shock components
 - b. Air shock components
 6. Mount and demount tires. Use tire changing machine
 - a. Repair tires
 7. R/R wheel bearings, pack and adjust
 - a. Replace seals
 24. Perform lubrication service
 25. Perform safety inspection

- IB. Inspect Manual and Power Steering Systems
 - 1. Inspect fluid levels and leak
 - 3. Inspect pump for mounting, lines, seals, hoses, noise, pulley, and belts

- IIB. Remove and Replace Manual and Power Steering System Components
 - 1. R/R belts, hoses, and lines

AREA OF COMPETENCE #2
PERFORM DRIVE TRAIN SERVICE

- IA. Inspect Clutch Assembly
 - 1. Inspect clutch operation
 - 2. Inspect pedal free play
 - 4. Inspect engine and transmission mounts

- IIA. Remove and Replace Clutch Components
 - 5. Adjust free play and total travel

- IB. Inspect Manual Transmission Assembly
 - 1. Inspect fluid levels and leaks

- IC. Inspect Automatic Transmission Assembly
 - 1. Inspect fluid levels, leaks, and conditions
 - 4. Inspect lines and hoses

- ID. Inspect Drive Shaft Components
 - 1. Inspect drive shaft condition
 - 2. Inspect universal joints for wear
 - 3. Inspect center bearing for condition
 - 4. Inspect constant velocity joint
 - 5. Lubricate components

- IE. Inspect Drive Axle Assemblies
 - 1. Inspect fluid levels and leaks
 - a. Rear axle assembly
 - b. Front axle assembly
 - c. Four wheel drive
 - d. Transfer case
 - 2. Inspect mounting and noises

AREA OF COMPETENCE #3
PERFORM ENGINE MECHANICAL SERVICE

- IA. Inspect Engine Condition
1. Inspect fluid levels and leaks
 2. Check performance and condition
 - a. Check abnormal noises, smoke, and roughness
 - b. Check for oil deposits in tailpipe, radiator, and air cleaner
 - c. Use infra-red to check engine condition

AREA OF COMPETENCE #4
PERFORM COOLING AND HEATING SYSTEM SERVICE

- IA. Inspect Cooling and Heating Systems
1. Inspect and test pressure cap
 2. Pressure test cooling system
 3. Inspect and test combustion leakage
 - a. Use pressure test, fluid gas detector, and infra-red testers
 4. Inspect, test, and add coolant
 5. Inspect system for leaks
 6. Inspect and replace hoses
 7. Inspect, replace, and adjust fan belt with tension gauge
 8. Inspect radiators, flush, and replace coolant
 9. Inspect, test, and replace thermostat and by-pass valves
 10. Inspect operation of cooling system block and tank heaters
 11. Inspect air-cooled engine cooling systems
 12. Inspect and test operation of blower motor, speed controls, and air temp
 13. Inspect radiator for obstructions and clean exterior components
 14. Inspect operation of semi-sealed and recovery systems
 15. Inspect water pump for bearing condition and water leaks
 16. Inspect thermostatic fan for condition of blades, hub, and mounts
 17. Test operation of heater control valves for air and water with vac. gauge
 18. Inspect auto transmission fluid coolers
 - a. Inspect radiator for contamination with fluid
 - b. Inspect transmission for contamination with coolant
 19. Inspect warning light system
 20. Reverse flush heater core

AREA OF COMPETENCY #6
PERFORM BRAKE SERVICE

- IA. Inspect Drum/Disc Brake System
1. Check operation of brake system
 2. Inspect drums/discs
 3. Inspect linings or pads
 4. Inspect brake hardware
 - a. Springs
 - b. Holddowns
 - c. Adjusters
 - d. Backing plate
 - e. Anchors
 - f. Parking brake
 5. Inspect hydraulic system
 - a. Wheel cylinders/calipers
 - b. Master cylinder
 - c. Lines/hoses
 - d. Control valves
 6. Inspect wheel bearings and seals
 7. Inspect brake pedal rod, mounting, linkage, and free travel
 8. Inspect operation of brake booster
 9. Inspect operation of stoplight and brake warning light

AREA OF COMPETENCE #7
PERFORM ELECTRICAL SERVICE

- IA. Inspect and Service Battery
 - 1. Inspect battery electrolyte level and refill
 - 2. Remove and clean battery terminals and cables
 - 3. Test state of charge and determine battery condition
 - a. Use hydrometer
 - b. Use load type testers
 - 4. Start vehicle using jumper cables
 - 5. Charge battery
 - a. Use fast charger w/thermometer and voltmeter
 - b. Use slow charger
 - 6. Inspect carrier and holddown

- IIA. Remove and Replace Battery
 - 1. Prepare and install battery
 - a. Wet
 - b. Dry
 - c. Maintenance Free
 - 2. R/R cables

- IIIA. Diagnose Battery Problems
 - 1. Diagnose electrical problems
 - 2. Diagnose mechanical problems

- IB. Inspect Charging Circuit
 - 2. Inspect and adjust tension of belts with tension gauge

- IIB. Remove and Replace Charging Circuit Components
 - 5. R/R belts and pulleys

- IC. Inspect Cranking System
 - 1. Inspect cranking motor cables and connections

- IIC. Remove and Replace Cranking Circuit Components
 - 1. R/R battery cables

- IE. Inspect Electrical Accessories
 - 1. Inspect wiring and connections of all circuits
 - 2. Inspect operation of windshield wipers and blade condition
 - 4. Inspect operation of washers, clean and aim nozzles
 - 5. Inspect operation of horn

AREA OF COMPETENCE #8
PERFORM ENGINE TUNE-UP SERVICE

- IA. Perform Minor Tune-Up Service
 - 5. Service air cleaner element and P.C. valve.
 - 6. Service battery and cables
 - 7. Inspect fluid levels and belt condition
 - 8. Inspect intake and exhaust pre-heat system mechanism

- IIA. Perform Major Tune-Up Service
 - 8. Service air cleaner, P.C. valve, and fuel filter
 - 10. Inspect and tighten all hose connections
 - 11. Check and adjust belts
 - 12. Check fluid levels

AREA OF COMPETENCE #9
PERFORM FUEL AND EMISSION SYSTEM SERVICE

- IA. Inspect Fuel and Emission Systems
 - 1. Inspect fuel pump for mounting and leaks
 - 2. Inspect emission system belts, hoses, and connections
 - 4. Inspect fuel tank for leaks and dents
 - 5. Inspect indicator gauge for operation
 - 7. Inspect manifold heat control valve for operation
 - 9. Inspect catalytic converter for condition/operation
 - 10. Inspect positive crankcase ventilation system
 - 12. Inspect heated air intake system

- IIA. Remove and Replace Fuel and Emission Components
 - 10. R/R and test P.C.V.

AREA OF COMPETENCE #10
PERFORM BODY ADJUSTMENTS AND SERVICE

- IA. Inspect and Adjust Body Components
 - 1. Inspect and adjust doors
 - a. Strikers and locks

- IIA. Remove and Replace Body Components
 - 1. R/R door components
 - a. Strikers and locks

AREA OF COMPETENCE #11

PERFORM EXHAUST AND LUBRICATION SERVICE

- IA. Perform safety inspection
 - 1. Inspect tires and air pressure
 - 2. Inspect shocks
 - 3. Inspect lines and hoses
 - 4. Inspect fluid levels
 - 5. Inspect lights and wipers
 - 6. Inspect warning devices
 - 7. Inspect suspension and steering
 - 8. Inspect drive belts
 - 9. Inspect brake pedal reserve
 - 10. Inspect engine mounts
 - 11. Inspect glass
 - 12. Inspect exhaust manifold
 - 13. Inspect muffler/resonator and pipes
 - 14. Inspect catalytic converter
 - 15. Inspect clutch pedal free travel

- IIA. Perform Exhaust and Lubrication Service
 - 1. Lubricate chassis
 - 2. Charge engine oil and filter
 - 3. Change automatic transmission fluid and filter
 - 4. Repack wheel bearings
 - 5. Test anti-freeze protection
 - 6. Flush and install anti-freeze
 - 7. Clean windows
 - 8. Vacuum interior
 - 9. R/R exhaust manifold and pipe
 - 10. R/R muffler, resonator, and pipes
 - 11. R/R catalytic converter
 - 12. R/R exhaust heat riser

AREA OF COMPETENCE #12
PERFORM RELATED SUBJECT ACTIVITIES

- I. Demonstrate Prescribed (OHS/A) Safe Work Practices in Each AREA OF COMPETENCE
 1. Demonstrate Shop Safety Practices
 - a. Personal
 - b. Co-Worker
 - c. Fire
 - d. Shop
 - e. Equipment
 - f. Tools
 - g. OSHA
 - h. Shop and personal appearance
- II. Operate Welding Equipment
 1. Demonstrate gas procedures
- III. Perform Shop Related Skills
 1. Identify and select fasteners
 - a. Nuts, bolts, and screws
 - b. Clips, retainers, and snap rings
 - c. Washers
 - d. Clamps and locking devices
 2. Maintain tools
 - a. Drills, bits, and cutters
 - b. Chisels and punches
 - c. Screwdrivers
 - d. Handles
 3. Demonstrate proper use of tools
 - a. Stud extraction tools
 - b. Torque wrenches
 - c. Tap and die (thread chasers)
 - (1) Thread repair
 - d. Power hand tools
 - e. Cutting tools
 - f. Grinders
 4. Demonstrate use of shop manuals
 - a. Repair manuals
 - b. Parts and Time Guide
 - c. Specifications
 - d. Wiring diagrams
 - e. Technical bulletins
- IV. Solve Automotive Math and Related Measuring Problems
 1. Solve shop-business problems
 2. Solve metric problems
 3. Demonstrate precision tool measuring

- V. Perform Communication Activities
 1. Write business letters
 2. Prepare resume
 3. Perform job application procedures
 - a. Application forms
 - b. Interview procedures
 4. Write work orders and service reports
- VI. Maintain Bookkeeping Record for a Small Business
 1. Perform basic bookkeeping procedures
- VII. Perform Management and Business Procedures
 1. Estimate jobs (local and state laws)
 2. Perform sales and service selling techniques
 3. Evaluate time management
 4. Determine employee productivity
 5. Perform inventory control and security
- VIII. Solve Customer and Employer Relation Problems
 1. Solve communication problems
 2. Solve attitude problems of supervisor-employee relations
- IX. Participate in Union Orientation
- X. Participate in Supervised Work Experience Training (Co-op or Internship)
- XI. Participate in Club Activities

IV. COMPETENCY RECORD

The COMPETENCY RECORD that appears in this section is suggested as a replacement for the traditional report card. It can be used to give employers, teachers, counselors, students and parents information about what each student can and cannot do.

The COMPETENCY RECORD should follow the student through his or her vocational training in the secondary and/or the post secondary school. The recommended grading scale is shown on the COMPETENCY RECORD. The COMPETENCY RECORD on the following pages includes ALL the AREAS OF COMPETENCE recommended for the graduate of the Automotive Mechanic occupational program. However, the occupational program for LUBRICATION SPECIALIST does not require that the student be competent in all AREAS OF COMPETENCE which are recommended for the automotive mechanic. The AREAS OF COMPETENCE which are recommended for a graduate of the Lubrication Specialist occupational program are summarized below. See the task list in the front of this booklet for more detailed information.

LUBRICATION SPECIALIST

TASK LIST

Tasks that should be performed by the Lubrication Specialist have been taken from the following areas of the task list developed for the Automotive Mechanic:

Competence Area #1

IA, IIA (2, 6, 7, 24, 25), IB (1, 3),
IIB (1)

Competence Area #2

IA (1, 2, 4), IIA (5), IB (1),
IC (1, 4), ID (1, 2, 3, 4, 5),
IE (1, 2)

Competence Area #3

IA (1, 2)

Competence Area #4

IA

Competence Area #6

IA

Competence Area #7

IA, IIA, IIIA, IB (2), IIB (5),
IC (1), IIC (1), IE (1, 2, 4, 5)

Competence Area #8

IA (5, 6, 7, 8), IIA
(8, 10, 11, 12)

Competence Area #9

IA (1, 2, 4, 5, 7, 9,
10, 12), IIA (10)

Competence Area #10

IA (1a), IIA (1a)

Competence Area #11

IA, IIA

Competence Area #12

I, II (1), III, IV, V,
VI, VII, VIII, IX, X, XI

COMPETENCY RECORD

Occupational Program : Lubrication Specialist

(Competencies of the Lubrication Specialist are shaded grey)

This competency record tells what the student, who is named below, has demonstrated that he or she can do. A committee of industrial representatives from throughout Minnesota assisted in identifying the competencies needed by graduates of the occupational programs shown above. For more specific information, refer to the task list for each occupational program.

- Grading:
- 5 - able to help others; very competent
 - 4 - able to perform the task(s) without supervision; competent
 - 3 - able to perform the task(s) with limited supervision
 - 2 - able to perform the task(s) with direct supervision
 - 1 - unable to perform the task(s)
 - ✓ - received introduction only
