ABSTRACT

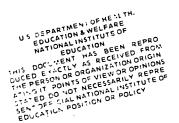

This implementation guide was developed from a project to integrate career education into existing preservice teacher training courses and to prepare students in these courses to serve as career education catalysts in their schools. Integration schematics for core courses in the Secondary Education Teacher Preparation Program at the University of Arizona are presented, and a step-by-step process for implementing a university-based career information center is outlined including the necessary elements: advisory committee, location and space, equipment, materials, files, quidelines for use, orientation, public relations, workshops, vocational assistance, staff, budget, and evaluation procedures. Initial and long range training activities for implementing in-service training of university personnel are also included. Approximately one-half of the report consists of the following appendices: Sample Career Information Center Bibliography, Sample Occupational Clustering Systems, Alternative Resource Speaker Filing Systems, Orientation: The Career Information Center, Suggested Topics for Career Information Center Workshops, and Selected References. (MP)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from sinal.

FOREWORD

Whether Career Education will indeed be considered the educational innovation of the seventies is still to be determined. The fact that it has made an impact on our education institutions is nevertheless obvious. And because school districts throughout our various states have committed their energies—in varying degrees—to the Career Education approach, we at the college/university level have likewise found ourselves involved. We can no longer send out teachers who are uninformed about Career Education, who know neither what it is nor how to implement it.

Such was certainly the case in the state of Arizona and at The University of Arizona. Since 1971, the Arizona State Legislature has appropriated over 15 million dollars for the implementation of Career Education K-12. These monies were assigned on the basis of proposals to a variety of district and county projects whose responsibility it was to assist local schools in integrating Career Education into existing curriculum.

Although each project was successful in its own right, there was seemingly a component missing—that component which would augment and support these projects. With funding not as plentiful and with projects forced to spread their personnel thinner, it seemed obvious that a Career Education project at the university level could provide such support by supplying projects with school personnel who were already trained in and familiar with the Career Education concepts and materials.

On the basis of that rationale, The University of Arizona College of Education Career Education Project was funded in February, 1974. The goal of the Project was to integrate Career Education into existing in-service teacher training courses and so prepare students in these classes to serve as Career Education catalysts in their schools. Previous work in local school systems and the realization that consultation with professors and students would mandate it led the coordinators of the project, Dr. Brenda B. Even and Dr. Betty J. Newlon, to insist upon the development of a Career Information Center. With the help of Suzanne Delap, Project administrative assistant, existing Career Education-related materials were collected; new materials were ordered; and a working resource operation evolved.

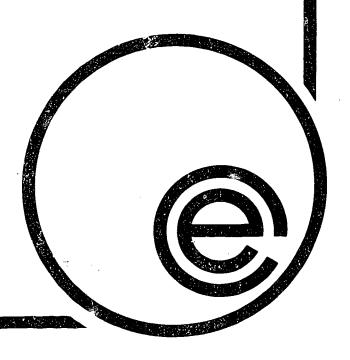

The Center and indeed the Project itself have now been in operation for several years. It is therefore in terms of this information and experience, as well as on the basis of extensive research and creative application that this guide has been developed. Hopefully, it will serve as a useful tool for those attempting to integrate Career Education into teacher preparation.

Brenda B. Even, Ph.D. University of Arizona

Career Education Integration Model

INTEGRATING CAREER EDUCATION INTO TEACHER PREPARATION

An extensive review of the literature in the Career Education field reveals that little emphasis has indeed been placed on Career Education at the pre-service level. More precisely, the literature indicates that college and university teacher preparation efforts in Career Education fall into the following categories: in-service programs, elective courses, curriculum development, and a few pre-service options. Consequently, the purpose of "Integrating Career Education Into Teacher Preparation" is to develop a model which integrates Career Education into an existing teacher preparation program; in this case, that of the Secondary Education Department, College of Education, The University of Arizona.

The significance of such a model can be examined from three distinct vantage points—the national perspective, the state vista, and the local outlook. From the national perspective, it is significant because it deals directly with the problem of training pre-service personnel; because it suggests an integrated Career Education approach, rather than either a single course or an overshadowing college emphasis; and because it fulfills a designated and practical research need. From the state vista, it is significant because of Arizona's 15 million dollar emphasis on the integration of Career Education into its K-12 educational framework. And finally, from the local outlook, the study is significant because of its integrative and option-providing nature which is applicable to the Secondary Education Department's teacher preparation program.

This model is both analytical and developmental in nature. It was designed as the result of examining the existing pre-service teacher preparation program in The University of Arizona's Secondary Education Department. It was then developed by integrating Career Education into this existing teacher preparation program. First, the rationale, as well as the outcomes and elements for integrating Career Education, were delineated and analyzed. Then, on the basis of the literature reviewed (Bailey 1974b; Goldhammer 1972; Hansen, Klaurens, Tennyson 1973a; Keller 1972c; Kiesow 1972, 1973; for example), the Hansen-Klaurens-Tennyson set of Career Education components of integration was designated: need, Career Education concept, orientation to the

من د

The complete text of this study is contained in Even, Brenda B., "Integrating Career Education Into Teacner Preparation." Unpublished doctoral dissertation. Tucson, Arizona: The University of Arizona, 1975.

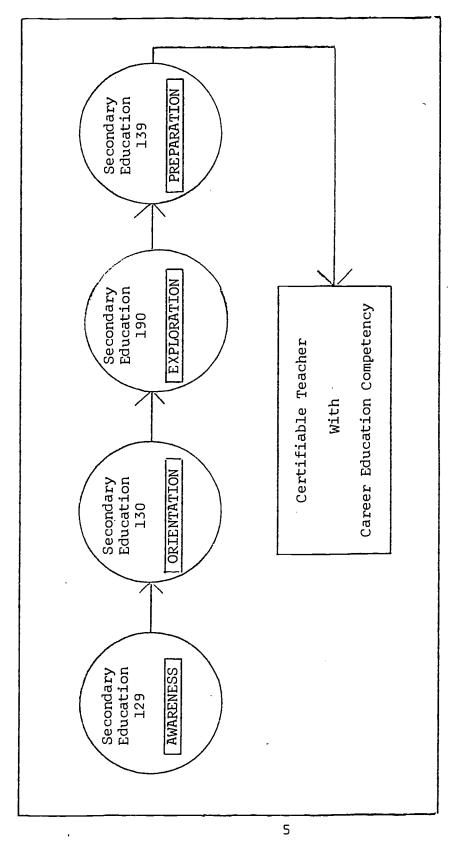

world of work, information systems and use of resources, implementation through curriculum, guidance and counseling skills, and change process. Selection of this set was based on (1) internal coherence in terms of a developmental Career Education training plan, and (2) integrative consistency in relation to the existent teacher preparation program itself.

What follows, then, are the overall course integration schematics, which were developed in terms of the core courses in the teacher preparation program of the Department of Secondary Education. In addition to these wholistic schematics, individual core course schematics were likewise developed, outlining outcomes, elements, integration components, objectives, suggested activities, evaluation, and resources. A separate schematic, detailing the use of the Career Information Center, is also included, along with in-service program schematics.

This model is presented in the hope that pre-service educators can use it as a tool to meet the challenge of preparing certifiable teachers who possess a Career Education competency. Un - doubtedly, pre-service educators will accept this challenge, as "it would be ironic if career education were to meet with initial success in the schools primarily because of an intensive inservice program, only to find new and young teachers emerging from teacher training institutions, unequipped to work in the field of career education."²

Career Information Center Implementation

OVERVIEW

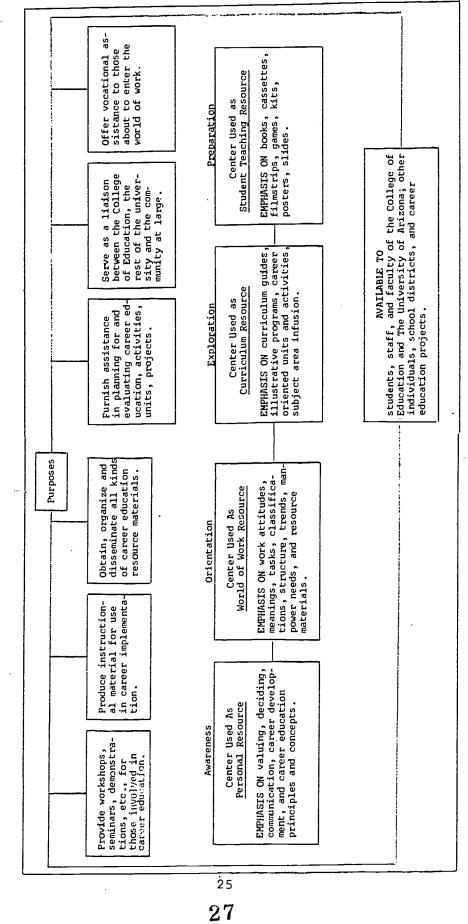

If a college or university is attempting to integrate Career Education into its existing teacher preparation programs or is in fact establishing a separate department of Career Education, its strongest asset is a Career Information Center which can serve as the vehicle for attaining the purposes outlined in the following schematic. Without such a Center, a Career Education program of integration or departmental development is vastly limited. None of the suggested purposes can be adequately addressed. Theoretical information can be supplied, of course, but any on-campus activities requiring the demonstration, production, and/or collection of career education materials, are practically eliminated. These hands-on experiences so vital to the development of teacher expertise are once again dependent solely on field participation. Liaison service and vocational assistance are likewise ignored.

If, however, such a Center is available, the following developmental stages can be emphasized:

- 1) The AWARENESS or perception stage in which the Center is used as a personal resource;
- 2) The ORIENTATION or investigation stage during which the Center serves as a World of Work Resource:
- 3) The EXPLORATION or in-depth examination stage where the Center becomes a curriculum resource;
- 4) The PREPARATION or readiness stage in which the Center is designated as a student teaching and vocational resource.

A Career Information Center, then, is a vital ingredient for a Career Education program, because it is in escence a learning laboratory for the students, faculty and staff of a school or college of education; its resources, however, can be made readily available to anyone on campus or in the community.

Integration Schematic VII: Use of the Career Information Center

Purposes adapted from Swanson and Jervis (1973, p. 16).

STEP-BY-STEP PROCESS

- 1. Define the role and the rationale for the Center.
- 2. Analyze the purposes and objectives of the Center.
- Assess specific Center needs re: equipment, space, location, materials, staff.
- 4. Contact departments involved and discuss implementation possibilities.
- 5. Establish a specific Advisory Committee.
- 6. Outline possible program and submit for Advisory Committee input.
- 7. Revise and submit for Advisory Committee approval.
- 8. Secure space and equipment.
- 9. Hire staff.
- 10. Collect existing materials and solicit suggestions for additional materials.
- 11. Order new materials.
- 12. Decide on the organization and arrangement of the Center.
- 13. Set up the Center as materials arrive.
- 14. Establish policies/guidelines for use.
- 15. Open the Center.
- 16. Hold orientation sessions.
- 17. Publicize the Center.
- 18. Schedule class visits to the Center.
- 19. Develop workshop plans.
- 20. Evaluate the operation; update the materials; and initiate any necessary changes.

ELEMENTS

ADVISORY COMMITTEE

A necessary ingredient for a successful Center operation is the establishment of an Advisory Committee. This Committee consists of representatives from each area or department involved in the Career Education thrust. The chief function of this group will be to serve the Center staff in an advisory capacity. More specifically, the Committee's responsibilities include the following:

- 1. Examining and approving the Center's program.
- 2. Suggesting ideas and materials for the Center.
- 3. Reviewing scheduled Center activities.
- 4. Serving as a "sounding board" for the Center staff.
- 5. Encouraging departmental participation in the Center's program.
- 6. Coordinating within their departments in order to prevent repetition of materials and/or activities.
- 7. Evaluating completed Center activities.
- 8. Analyzing "drop-in" use of the Center.
- 9. Meeting regularly as a group.

(The time, place and regularity of the meetings should be determined by the group itself. A monthly meeting is suggested.)

LOCATION AND SPACE

As this Center is essentially a learning laboratory for the students and faculty of the college/school of education, ideally it should be located there in an easily accessible area. The space needed will depend on an assessment of the student utilization of such a Center. Both location and space, however, are subject to the already existing spatial demands within the college/school. Even though an area large enough to accommodate 30-40 people confortably and to house staff, media equipment and materials is desirable, it is even more important to be in existence! Therefore, it is imperative to BEGIN with whatever is available and to expand from there.

12.00

EQUIPMENT

Equipment can be classified into two main categories -- ESSENTIAL and DESIRABLE.

ESSENTIAL

DESIRABLE

Telephone Career Education materials Book shelves File cabinets Office supplies Access to duplicating machines Tables Chairs Desks Typewriters Bulletin boards Audio-visual cart

Filmstrip viewers Screen Filmstrip projector Movie projector Tape recorders Zerox machine Mimeo machine Ditto machine Overhead projector Video equipment

The ESSENTIAL items, in many cases, can be secured from existing equipment not assigned. If not, part of the Center budget must be allocated for necessary equipment. As for the DESIRABLE items, use of most of them can be arranged through an academic department, through the college/school's resource supplies or through the campus audio-visual bureau. If any of the DESIRABLE items are deemed ESSENTIAL and cannot be secured as suggested, then they too must be considered in the budget for the Center.

MATERIALS

A list of specific materials for stocking a Career Information Center can be found in Appendix A. The organization of these materials, however, is another item for consideration. suggestion made by staff members of the Westside Area Career Occupations Project (WACOP), to arrange Center materials according to type of material has proved to be most workable. Career Education materials thus fall into the following categorical types:

> Books (B) Cassettes (CS) Files (F) Filmstrips (FS) Games (G) *Kits (KT)

Miscellaneous (MISC) Pamphlets (PM) Posters (P) Periodicals (PER) Simulations (SIM) Transparencies (TP)

*Kits can be defined as any multi-media unit.

These groups of materials can then be arranged in alphabetical order around the perimeter of your room, thus leaving the center area for study tables and chairs.

In order to more precisely classify WITHIN item categories, materials can be sorted systematically in terms of the following breakdown or a comparable one devised to fit specific needs:

- 1. Generalities
- 2. Career Education
- 3. Counseling and Guidance
- 4. Decision-Making
- 5. Education
- Self-Awareness
- 7. Subject Area
- 8. World of Work
- 9. Testing
- 10. Valuing

If such categorizing is to be efficient for users as well as for staff, a card catalog system like that available in any other library or resource center will need to be established. In addition to a Center Shelf List, an alphabetically arranged listing of all materials including publication information that are available in the Center, TITLE, SUBJECT and GRADE LEVEL indices can be set up. The TITLE INDEX will be arranged alphabetically like the SHELF LIST, but will carry such additional information as an ITEM notation and an acquisition NUMBER taken from the Center's Acquisition List which is compiled according to the date of the item's arrival (i.e. B-1 or FS-4). Annotation, grade level usage, price, and subject classification (1-10) are also included. The GRADE LEVEL Catalog can be color-coded according to grade level usage (i.e. high school/adult = blue; junior high = green; elementary = pink) and will carry all information but the annotation and the subject classification; the latter information can be secured from the TITLE catalog. The SUBJECT Catalog, then, will be arranged according to subject (i.e. Generalities, Career Education, Counseling and Guidance, etc.) and will include all information, but the annotation and the grade level usage.

SAMPLE TITLE CARDS

2.1

B-133 Career education: What is is and how to do it, Kenneth B. Hoyt, Rupert N. Evans, Edward F. Mackin, Garth L. Mangum. Olympus Pub. Co., 2nd ed., 1974. 238 pp.

> Provides the philosophic and historical background for understanding what career education is, why it is needed, and how it developed. Instructs on how a program can be implemented within a school system.

FILES

Files to be set up include the following:

-- <u>Vertical Files</u>: Established for miscellaneous career materials and pamphlets. Arranged alphabetically.

- -- Occupational Files: Developed from free materials, occupational briefs, the Occupational Outlook Handbook pamphlets. This information can be arranged according to a clustering system (see Appendix B, "Sample Occupational Clustering Systems"), alphabetically by career title or alphabetically by subject area emphasis.
- -- <u>College Files</u>: Set up on a limited basis as such catalogs and information are generally available in the main campus library. Shelved alphabetically by state or by college.
- -- <u>Junior College Files</u>: Set up in the same way as the College Files.
- -- Apprenticeship Files: Developed with materials available from local apprenticeship programs. Filed alphabetically.
- -- <u>Training Schools</u>: Put together with materials secured from local beauty, barber, business and career colleges. Filed alphabetically.
- -- Speaker Files: Optional. Established by securing commitments from individuals willing to speak on given topics to various groups. This information can be arranged in one of several ways. (See Appendix C, "Alternative Resource Speaker Filing Systems.")

GUIDELINES FOR USE

Suggested Purposes for the Center:

- -- Provide workshops, seminars, demonstrations, etc., for those involved in Career Education.
- -- Produce instructional material for use in Career Education implementation.
- -- Obtain, organize and disseminate all kinds of Career Education resource materials.
- -- Furnish assistance in planning for and evaluating Career Education activities, units, projects.
- -- Serve as a liaison between the College/School of Education, the rest of the campus, and the community at large.
- -- Offer vocational assistance to those about to enter the world of work.

33

Services available through the Center:

- -- Individualized assistance
- -- Facility for class/personal visitations
- -- Career Education Workshops
- -- Material demonstration and development
- -- Resource materials for class, personal use
- -- Referral source
- -- Vocational assistance

Policy Considerations Relating to the Center:

- -- Hours of Center
- -- Material check-out system
- -- Length of borrowing time
- -- Reserve materials
- -- Newsletter dissemination
- -- Demonstrations and workshops
- -- Tabulation of Center visitors
- -- Users' evaluation of materials
- -- Priority availability of Center and its materials

ORIENTATION

Faculty and students, particularly, need to be familiarized with the Career Information Center--its purposes, its services, its availability. However, such a familiarization process can be successfully achieved only after the Center staff is fully aware of their responsibilities and of the Center's functions. When this stage of orientation has been satisfactorily completed, then the following two-stage orientation of students and faculty can proceed:

34

STAGE I: Open House. This stage can be planned for students and faculty separately or together. It consists of publicizing designated times when students and faculty can come to the Center and discover where it is, what it contains and who operates it.

STAGE II. Class Session. This stage is a precisely planned session in the Center for a designated class and its professor. (See Appendix D, "Orientation: Career Information Center.")

PUBLIC RELATIONS

Chief components of this element are publicity and coordination with others operating in a similar capacity. In order to establish and continue a Career Information Center, continuous publicity must be forthcoming through bulletin boards, periodic flyers, the campus newspaper, a regular newsletter, etc. In addition, Certer staff must be in contact with others on the campus and is the community who are providing similar services. Only through a concerted attempt to make the campus community aware of the Center and a willingness to cooperate with others in the field will the Center be able to meet the needs of its users and realize its stated purposes.

WORKSHOPS

The Career Information Center provides the optimum ingredients for the development of a variety of Career Education workshops. The place, a knowledgeable staff, and the necessary resource materials are accessible to any group who wants to meet for a period of intensive study in Career Education. Although groups will have different needs and workshop topics, formats and time schedules will vary, in most cases, the following generalized components will be applicable or adaptable:

I,	Overview of Career Education
II.	Analysis of Career Education and
III.	Career Education Materials Appropriate to
IV.	Development of Career Education Activities, Units, Programs, Resources in/for

Regardless, it is a prime responsibility of the Center staff to make such workshops available not only to faculty and students, but also to local school districts requesting assistance with Career Education implementation. (See Appendix D, "Suggested Topics for Career Information Center Workshops.")

VOCATIONAL ASSISTANCE

One of the purposes of a Career Information Center is to provide help to those about to enter the world of work. This vocational assistance may occur as one-to-one consultations, group decision-making activities, career exploration workshops, or class career information sessions. It is therefore imperative that the Center staff be able to utilize Career Education resources from a purely occupational viewpoint.

STAFF

In order to oversee the Center, to fulfill the purposes outlined for its implementation and to develop the previously described programs, a minimum staffing would be as follows:

Career Education Specialist

Qualifications: Master's or doctoral degree in an educational area. Experience in teaching, administration and Career Education necessary.

Responsibilities include:

- 1. Directing the operation of the Center.
- 2. Meeting with the Advisory Board.
- Hiring and supervising staff.
- 4. Ordering supplies and Career Education materials.
- 5. Planning and conducting orientations.
- Developing workshop plan.
- 7. Conducting workshops.
- 8. Teaming with professors for Career Education integration into existing courses.
- 9. Coordinating with other campus student services.
- 10. Supervising independent study in Career Education.
- 11. Providing vocational assistance.
- 12. Evaluating Career Information Center program and revising.
- 13. Updating Center materials.

Center Administrative Assistant

Qualifications: A minimum of two years college experience. Working knowledge of secretarial skills and business procedures. Background and/or interest in library work and Career Education preferred.

Responsibilities include:

- 1. Maintaining and augmenting procedures for utilizing the Career Information Center.
- 2. Handling all Center business procedures (typing, filing, ordering, compiling, mimeographing, etc.).
- Supervising part-time secretarial help.
- 4. Organizing and maintaining Center materials.
- 5. Arranging materials for Center activities and workshops.
- 6. Publicizing Center activities (through bulletin boards, flyers, personal contact).
- 7. Publishing Center newsletter.
- 8. Keeping Center evaluation records.

Part-Time Secretarial Help

Qualifications: Secretarial skills (typing, filing, compiling, mimeographing, etc.) and experience.

Responsibilities include:

- 1. Typing assigned materials.
- 2. Operating duplicating machines.
- Compiling materials.
- 4. Assisting administrative assistant.

BUDGET

The operating budget for a Career Information Center will vary from school to school depending on the size of the Center, the number of staff, and the amount of available materials. Still, the major budget items to be considered will be the following:

Staff Equipment Supplies Career Education Materials Space

Possible funding sources include (1) the existing college/university budget; (2) federal contracts and grants (Vocational or Career Education monies); (3) state resources (in Vocational or Career Education); (4) private foundations.

EVALUATION

OVERVIEW

Although rationale and implementation represent the major segments of any program, they are incomplete without the inclusion of an evaluation segment. When such an evaluation segment is automatically built into the on-going operation of a Career Information Center, the development of the operation can be carefully documented: its effectiveness analyzed and its implementation adapted. In order to secure a representative analysis, evaluation should be drawn from the following groups:

- -- The Advisory Committee
- -- Involved faculty and staff
- -- Student participants
- -- Others (local school district personnel and/or community representatives)

Evaluation instruments should be devised to examine the effectiveness of:

- -- Orientation
- -- Workshops
- -- In-class presentations
- -- Material usage
- -- Vocational assistance
- -- The entire program

INSTRUMENTS

The sample evaluation formats included here can be adapted to fit specific needs or can serve as guidelines for the development of new instruments. They are grouped in the following categories: Surveys, Questionnaires, Evaluations, Miscellaneous Formats.

SURVEYS

Benson (1973, p. A-85), "Program Reaction Survey"
Staff

1.	In what ways has the Career Development Program helped you to do a better job professionally?
	A. Increased my knowledge of career development concepts. B. Provided a vehicle for increasing curriculum relevancy. C. Provided usable materials for my work. D. Stimulated more team work. E. Increased community assistance in education. F. Other
	G. No help.
2.	Did you feel you had a voice in the implementation of the program, if you desired?
	Yes No
3.	The amount of time required for this program was:
	too much okay too little
4.	The major objectives of the program as you see them are (check all appropriate answers):
	A. Meet national manpower needs. B. Develop specific student job skills before graduation. C. Integrate vocational and academic education. D. Help students select an occupation before graduation. E. Increase the use of community resources. F. Other
	G. Impossible to determine.
5.	What are the highlights of the program?
6.	In your opinion were the participants supportive of this program?
	Much Some Little None

7.	Did this pro	gram duplicate	what is being do	ne already?
	Much	Some	Little	None
	If so, where			
8.		, problems do y	ou see associated	d with the
9.	Were the mate	erials develope	ed useful?	
•	Much	Some	Little	No help
10.	Were the tech	nniques develor	ed useful?	•
	Much	Some	Little	No use

White and Bainter (1973), "Pre-Service Teacher Attitude Survey"

Level of Agreement %
Unde- DisAgree cided agree

Opinion Statement

- 1. The concept of career education is long overdue in the nation's schools.
- The preparation of general teachers for career education roles should be a function of this institution.
- Every pre-service teacher should have hands-on experience in structuring career education curriculum.
- Career education is probably a passing fad.
- 5. If I had a choice, I would like to work in a school system which has a career education program.
- 6. Bringing the world of work into the school curriculum in the elementary and middle school will negatively affect the student's choice about what to learn.
- 7. I would like to have additional experience in structuring career education curriculum.
- I have sufficient work experience myself that I could use in structuring career education curriculum.
- 9. Education for employment is as justifiably a part of the school curriculum as education for college.
- 10. I would recommend this module to other pre-service teachers.

QUESTIONNAIRES

Even (1974a), "Administrator Information Questionnaire" 1. Have you had personal contact with the Career Education Specialist during the current school year? No Yes 2. Based on your personal observations, what would you consider to be the involvement of both students and teachers with the Career Education Specialist (check appropriate box)? Little or No Great __ Professor Involvement Professor Involvement -Little or No Great Student Student Involvement Involvement 3. How satisfied are you with the specialist related activities in your department/college? ____ Very Dissatisfied Satisfied 4. Briefly state what you feel the role of the career education specialist should be in your department/college. 5. Are there any specialist activities which you feel should be expanded? Explain: ______ 6. Are there any activities that you feel can be reduced? Explain: _____ 7. Have either students or professors related favorable or unfavorable comments to you regarding specialist activities? If so, what was the nature of these?

Tuckman (1972) (Adapted)

"Career Education Workshop Final Evaluation Form"

Read each statement carefully and decide how you feel about it. You will agree with some statements and disagree with others. There are five possible answers to each statement. The "undecided" answer should be circled only when you have no opinion. Circle one answer where applicable and complete all statements.

	5	Strongly Agree	Agree	Unde- cided	Dis- agree	
1.	The objectives of this workshop were clear to me	SA	A.	u'	D	SD
2.	Specific goals and plan- ning made it easy to work efficiently	SA	A	u	D	SD
3.	I did not learn anything new	SA	A	u	D	SD
4.	The material presented was valuable to me	SA	А	u	D	SD
5.	I was stimulated to think about the topics presented		А	u	D	SD
6.	We worked together well a a group	s SA	А	ŭ	D	SD
7.	I did not have an opportunity to express my ideas	s SA	A	и	D	SD
8.	My time was well spent .	SA	A	u	D ·	SD
9.	The workshop met my expectations	SA	А	u	D	SD
10.	The content presented was applicable to the future implementation of Career Education	SA	A	u	D	SD

^{11.} As a result of your participation in this workshop, what plans have you formulated for future implementation of Career Education?

- 12. In your opinion, what were the major strengths of this workshop?
- 13. In your opinion, what were the major weaknesses of this workshop?
- 14. If you were to conduct a workshop similar to this one, what would you do differently from what was done in this workshop?
- 15. Additional comments about the workshop:

Even and Delap, The University of Arizona Career Education Project, 1974.

In-Service Implementation

INITIAL ACTIVITIES

- PART I. For Department Heads/Area Coordinators individually: Step-by-Step Process of Development
 - Briefly review materials in packet.
 - 2. Quickly jot down what is already being done in your department/area.
 - 3. Select four core courses/areas for concentrated integration.

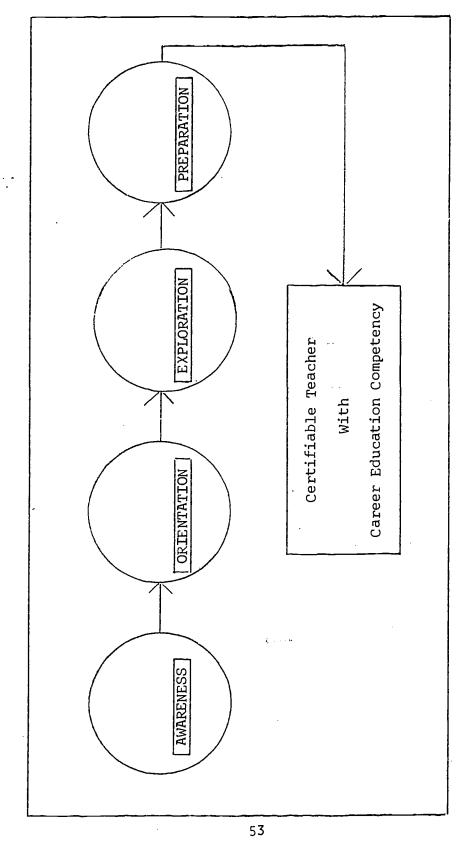

FILL IN SCHEMATIC I

- 4. Consider as they are appropriate to your department/ area:
 - --- Implementation Possibilities
 - --- Goal/Mission
 - --- Outcomes and Elements
 - --- Teacher Preparation Components
 - --- Courses to Be Integrated
 - --- Career Center/Laboratory Usage
 - --- Evaluation Options
 - --- Characteristics of Your Program

FILL IN SCHEMATIC II

- 5. Examine as they are appropriate to at least one of your core courses/areas:
 - --- Description
 - --- Outcomes and Elements
 - --- Teacher Preparation Components
 - --- Course/Area Objectives
 - --- Career Education Objectives ~
 - --- Suggested Activities

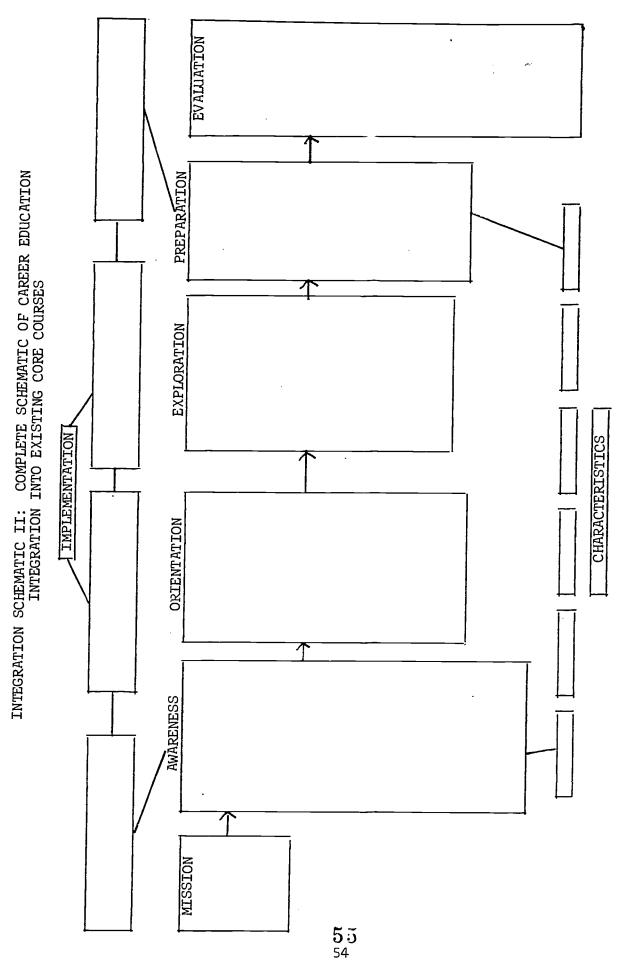

Career Education Emphasis in Existing Core Courses Integration Schematic I:

Schematic design adapted from POP Instructional Model (Hackett et al. 1974).

- --- Evaluation Options
- --- Resources

FILL IN SCHEMATIC III - VI

- 6. Study as they are appropriate to the development of a new Center or the refocusing of an existing Center:
 - --- Purposes
 - --- Levels of Usage
 - --- Availability

FILL IN SCHEMATIC VII

Briefly note the general categories of materials you would want available in the Center.

Widening Occupational Roles Kit		180.00
	TOTAL	\$1,254.76

NOTE 2:

Prices listed for individual items are school prices as of Spring, 1974.

NOTE 3:

Some of the materials noted are more than five years old. At the time they were purchased, more recent information was not available.

NOTE 4:

Materials not priced were free, complimentary, or already available through the University of Arizona Counseling and Guidance Department.

APPENDIX B

SAMPLE OCCUPATIONAL CLUSTERING SYSTEMS*

Several individuals and groups have attempted to classify occupations and to relate them to school subjects. The aim is to find ways to organize the world of work, the 25,000 or so, occupations and to bring it down to manageable size for exploration.

II. By Speaker Name

Substitute for CLUSTER the first letter of the last name (A) and file alphabetically.

III. By Subject Area

Substitute SUBJECT AREA for CLUSTER and file alphabetically. Omit SUBJECT AREA listed below.

IV. By Occupation

Substitute OCCUPATION for CLUSTER and file alphabetically. Omit OCCUPATION listed below.

APPENDIX D

ORIENTATION: THE CAREER INFORMATION CENTER

GOAL:

To make learners aware of the available elementary/secondary Career Education materials.

OBJECTIVES:

- The learners will know what kinds of Career Education materials are available.
- 2. The learners will be able to identify Career Education materials appropriate to the elementary/secondary school-aged students.
- 3. The learners will be able to integrate at least one piece of Career Education material into their classroom curriculum.

ACTIVITIES:

- 1. The leader will introduce the learners to the Career Information Center by explaining the development and organization of the Center.
- 2. The leader, with the help of the learners, will demonstrate the items particularly appropriate to the elementary/secondary setting.
- 3. With the leader serving as a consultant, the learners will examine the materials.
- 4. Using the attached Learning Activity Brief format, the learners will develop at least one activity utilizing Career Education material.
- 5. The learners will share their ideas for classroom implementation.

TIME:

1-2 hours, depending on available time. Activities can be adapted or omitted to meet the time allotted.

ENRICHMENT:

The learners may critique Career Education materials for future school purchasing.

RESOURCES:

Career Information Center materials.

MEDIA:

Filmstrip viewers and cassette tape recorders available for use.

EVALUATION:

Summary discussion focusing on the applicability of Career Education materials in the elementary/secondary school.

"Learning Activity Brief"*

- 1. Career goal statement (to be taken from Arizona Matrix)
- 2. Performance Objective:

Who--(usually students)
What--(example: shall demonstrate responsibility)
How--(example: by independently performing a routine task)
Measurement--(as observed by the teacher)
When--(time limit)
Performance Criteria--(a task or three tasks)

3. Description of Unit:

Grade level, subject, and unit in subject-Grade level 5, Language Arts, Letter-Writing unit)

4. Activity:

Indicate--Reading Option or Non-reading Option Suggested teacher activities--be specific. Suggested learner activities. Approximate time for activity. Suggested grouping.

- 5. Enrichment
- 6. Resources for teachers:

Textbooks, stories, films, slides, filmstrips, sources of information, etc.

7. Media needed:

(audio-visual equipment needed)

Evaluation (method of--give example of worksheet, tests, etc.)

*Arizona Career Education Clearninghouse. Phoenix: Arizona State Department of Education.
