ABSTRACT

This secondary level vocational administrator's manual is designed to increase awareness of cost-effectiveness analysis concepts, provide step-by-step procedures and analytical techniques for conducting a cost-effectiveness analysis study, and assist administrators in improving management skills by using appropriate information from the study in their decision making for program evaluation, development, and planning. An introductory section includes a summary of the cost-effectiveness analysis model developed by the authors (and published as a separate technical report). The activities outlined for administrators include (1) determining the purpose of the analysis, (2) identifying appropriate resources, (3) developing a study plan, (4) collecting required data, (5) computing cost-effectiveness measures, (6) interpreting the measures, and (7) utilizing the results. Included also are analytical forms and instruments coordinated with the instructional/outlines for each activity. (Author/HD)

## Grant Information

The Project reported in this publication was conducted pursuant to a grant with the Indiana State Board of Vocational and Technical Education. The grant was issued under the number

SBVTE 8 - 75 - C - 5

Grantees undertaking such projects under government sponsorship are encouraged to express freely their judgements in professional and technical matters. Points of view or opinions do not, therefore, necessarily represent official funding agency positions or policies.

## ABSTRACT

Purposes. The project's purpose was to develop an administrator's manual for guiding locally directed cost-effectiveness analyses of secondary vocational education programs. The manual increases awareness of the cost-effectiveness analysis concepts, provides step-by-step procedures and analytical techniques for conducting a cost-effectiveness analysis study, and assists administrators in improving management skills by using appropriate information from the study in their decision making.

Procedures. Based upon the cost-effectiveness system developed by the authors, the manual orients the user toward the system. The outline of the manual was reviewed by the Project Advisory Committee and National Advisory Panel members as well as vocational administrators. Their comments were incorporated into all phases of the procedures and materials.

Products. The manual provided orientation toward the use of the cost-effectiveness system. It includes a summary of the cost-effectiveness analysis model. Seven activities within three phases were developed. These activities include (1) determining the purpose of the analysis, (2) identifying appropriate resources, (3) developing a study plan, (4) collecting required data, (5) computing cost-effectiveness measures, (6) interpreting the measures, and (7) utilizing the results. Analytical forms and instruments are coordinated with the instructional outlines for each activity. These materials are included in the manual.

## Acknowledgements

The authors wish to express appreciation to the Indiana State Board of Vocational and Technical Education for financial support in completing the Cost-Effectiveness Project. Appreciation is also extended to the Project Advisory Committee members, the National Panel members, the Third Party Evaluator, and Project Monitor, for their advice, encouragement, and critical review of products from the project.

Special indebtedness is expressed to vocational directors, Mr. Thomas Garrison, Mr. Roderick McKinney, and Mr. Don Pennington, who provided us with useful information from their corporations. Thanks to Mr. Larry Manly and Mr. William Cook, for their assistance in reviewing cost analysis information.

We hope this manual will be helpful for local administrators to conduct locally directed cost-effectiveness analyses of their vocational programs. After using the manual, we would appreciate receiving any comments and suggestions for improvement.

## CHAPTER I

### Introduction

- A. *What are the objectives of the manual?*
- B. *How was the manual developed?*
- C. *How is the manual organized?*

A. *What are the objectives of the manual?*

. Background of the Manual

This report presents an administrator's manual for locally conducting cost-effectiveness analyses of secondary vocational programs.

The manual was developed at Indiana University--Bloomington with the support of the Indiana State Board of Vocational and Technical Education.

. Objectives of the Manual

The manual was basically designed as a self-instructional guide to conducting locally directed cost-effectiveness studies for vocational program evaluation and planning. The objectives are:

1. To increase awareness of cost-effectiveness analysis concepts.
2. To provide step-by-step procedures and analytical techniques for a cost-effectiveness study.
3. To assist administrators in improving management skills by using appropriate information from the study in the decision-making process.

B. *How was the manual developed?*

. Procedures Used to Develop the Manual

Based upon the cost-effectiveness analysis model, the manual was developed through the following procedures:

1. The manual was outlined to include orientation toward the use of the model and procedures for using the cost-effectiveness model.
2. The project advisory committee reviewed and made comments on the manual in the development process.
3. The national advisory panel was consulted for review and comments on the outline of the administrator's manual in relation to the cost-effectiveness analysis model.
4. The manual developed step-by-step procedures, specific activities and analytical forms for the planning, implementing, and utilizing phases.

C. *How is the manual organized?*

• Organization of the Manual

The manual is organized into four chapters. The remaining parts of the manual present (1) orientation toward using the cost-effectiveness analysis model, (2) step-by-step procedures and forms, and (3) concluding remarks for using the manual.

1. Chapter II draws attention toward awareness of the cost-effectiveness concept and analytical procedures. The chapter includes:
  - (1) Definition of a cost-effectiveness analysis,
  - (2) Needs for cost-effectiveness analysis of vocational programs,
  - (3) An outline of the cost-effectiveness analysis model, and
  - (4) Procedures for using the model.
2. Chapter III describes step-by-step procedures and analytical forms by:
  - (1) Planning phase,
  - (2) Implementing phase, and
  - (3) Utilizing phase.
3. Chapter IV states concluding remarks and suggestions for using the manual. Supporting documents follow as appendices.

## CHAPTER II

### Orientation to the Cost-Effectiveness Model

- A. *What is a cost-effectiveness analysis?*
- B. *Why is a cost-effectiveness analysis needed for vocational programs?*
- C. *What is the cost-effectiveness analysis model for secondary vocational programs?*
- D. *What is the procedure for a cost-effectiveness analysis?*

A. *What is a cost-effectiveness analysis?*

. Definition

A cost-effectiveness analysis is an analytical tool for assessing outcomes of operating and/or alternative programs in achieving specified objectives in relation to costs.

. Cost-Effectiveness and Cost-Benefit Analysis

Cost-effectiveness analysis is distinguished from cost-benefit analysis by concentrating on the measure of program effectiveness as the degree of goal attainment, which cannot be priced. In cost-benefit analysis, benefits are expressed in the same monetary units as costs.

. Cost-Effectiveness Analysis and PPBS

As an analytical technique, cost-effectiveness analysis is related to Planning, Programming, Budgeting System (PPBS). It increases the potential of the PPB System by providing decision-makers with appropriate information on program effectiveness and cost implications in achieving the stated objectives.

B. *Why is a cost-effectiveness analysis needed for vocational programs?*

• Resource Allocation and Utilization

As a decision model for an optimal allocation or utilization of resources, a cost-effectiveness analysis may be used to provide decision-makers with a useful criterion in allocating or utilizing a given amount of resources to the most worthy of vocational programs.

• Program Evaluation and Planning

A cost-effectiveness analysis is needed for the evaluation of existing programs in terms of program effectiveness as compared with associated costs. Also, the analysis can be used in developing new alternative programs as well as program planning in order to maximize the effectiveness with a given amount of resources for the program, or to produce the same level of effectiveness at the lowest possible cost.

• Demand and Support for Vocational Education

Increase in demand and support for vocational programs needs systematic analyses of the program effectiveness and costs. Appropriate information from cost-effectiveness analyses provides rationale for supporting vocational programs.

C. *What is the cost-effectiveness analysis model for secondary vocational programs?*

• The cost-effectiveness analysis model

A conceptual model is a simplified representation of relationships among the components involved in analyzing cost-effectiveness of secondary vocational programs. The model includes four major components, three measures, and three additional factors (See Figure 1, p. 13).

1. Vocational programs:

The secondary vocational program is distinguished from its counterparts, the general or academic program at the secondary school. It includes seven program areas:

- (1) Agriculture
- (2) Distributive education
- (3) Health occupations
- (4) Home economics-occupational
- (5) Business and office
- (6) Technical education
- (7) Trade and industry

The sub-program areas or courses, such as agriculture production or horticulture within the agriculture program area, are called vocational instructional programs as units for analyses. The classification of the vocational education programs is based upon the classification scheme developed by the U.S. Office of Education (See Appendix A).

2. Program objectives:

Program objectives are desired outcomes or target goals anticipated from an instructional program. The objectives of secondary vocational programs are classified into seven categories:

- (1) Completion of students from vocational programs
- (2) Completion of special student groups from vocational programs
- (3) Provision of occupational preparation
- (4) Student leadership development
- (5) Provision of guidance and counseling services (career development)
- (6) Fulfillment of labor market requirements and community manpower needs
- (7) Advanced education of graduates from secondary vocational programs

Each of the program objectives is specified in measurable terms as a target goal (See Appendix B).

### 3. Program outputs:

Program outputs are actual outcomes from a vocational program. Output indicators are made in accordance with predetermined target goals.

### 4. Program costs:

Program costs are annual expenses for operating vocational programs at the local school corporation (district) level. Annual expenses include direct and indirect costs.

Direct costs. Costs that are directly related to the instruction of a vocational program. Direct costs include six categories:

- (1) Salaries of teaching staff
- (2) Fringe benefits of teaching staff
- (3) Travel costs for instruction
- (4) Costs of supplies and materials for instruction
- (5) Costs of classroom and laboratory facilities and equipment
- (6) Building use cost

Indirect costs. Costs for supportive services necessary in the operation of vocational programs which can be proxated to a vocational program. Supporting services costs include:

- (1) Prorated student services costs
- (2) Prorated instructional staff services costs
- (3) Prorated general administration services costs
- (4) Prorated school administration services costs
- (5) Prorated business services costs
- (6) Prorated central services costs

Total costs. The total program cost is direct cost plus prorated indirect cost for a vocational program.

5. Program effectiveness:

Effectiveness is a measure of goal attainments for a program, that is, the extent to which specified target goals are achieved.

$$\text{Effectiveness score(s)} = \frac{\text{Output(s)}}{\text{Target goal(s)}}$$

Effectiveness index. A composite or average effectiveness and/or weighted composite or weighted average effectiveness.

6. Cost efficiency:

Efficiency is measured by the unit cost.

$$\text{Unit cost} = \frac{\text{Total cost of program}}{\text{Unit of output(s)}}$$

Unit of output(s): number of completions, or enrolled students, or student contact hours.

$$\text{Efficiency index} = \frac{\text{Actual unit cost}}{\text{Budgeted or standard unit cost}}$$

7. Cost-effectiveness ratio and performance ratio:

Cost-effectiveness ratio indicates the degree of goal attainment against cost.

$$\text{C/E Ratio} = \frac{\text{Effectiveness index}}{\text{Total or unit cost}}$$

Performance ratio is a criterion by which to evaluate the degree of performance.

$$\text{Performance Ratio} = \frac{\text{Effectiveness Index}}{\text{Efficiency Index}}$$

8. Student inputs:

Student input data may be considered for determining program objectives and outputs, and also for interpreting analytical results. The data include:

- (1) Regular and special students,
- (2) Personal--age, sex, race,
- (3) Educational--needs, achievements,
- (4) Job experiences, and
- (5) Family background--parents' income, and education level.

9. Community characteristics:

Community factors external to the school system may be considered for the design and operation of vocational programs, and interpretation of analytical results. They include:

- (1) Community demand--population, employment, manpower demands, and
- (2) Community support--economic resources, willingness to support vocational programs.

10. Economic and Non-economic benefits:

Economic and non-economic benefits are considered as long-range outputs of the school system.

- (1) Economic benefits--earnings, employment, and occupational improvement, and
- (2) Non-economic benefits--participation in governmental affairs, decrease of crime rates and public assistance recipients.

11. Feedback:

Feedback is a self-correcting mechanism, which relates educational efforts to community demand and support for the evaluation and planning of vocational programs. It indicates:

- (1) Input-output relationships, and
- (2) A recycling procedure for the planning, implementation and evaluation of vocational programs.

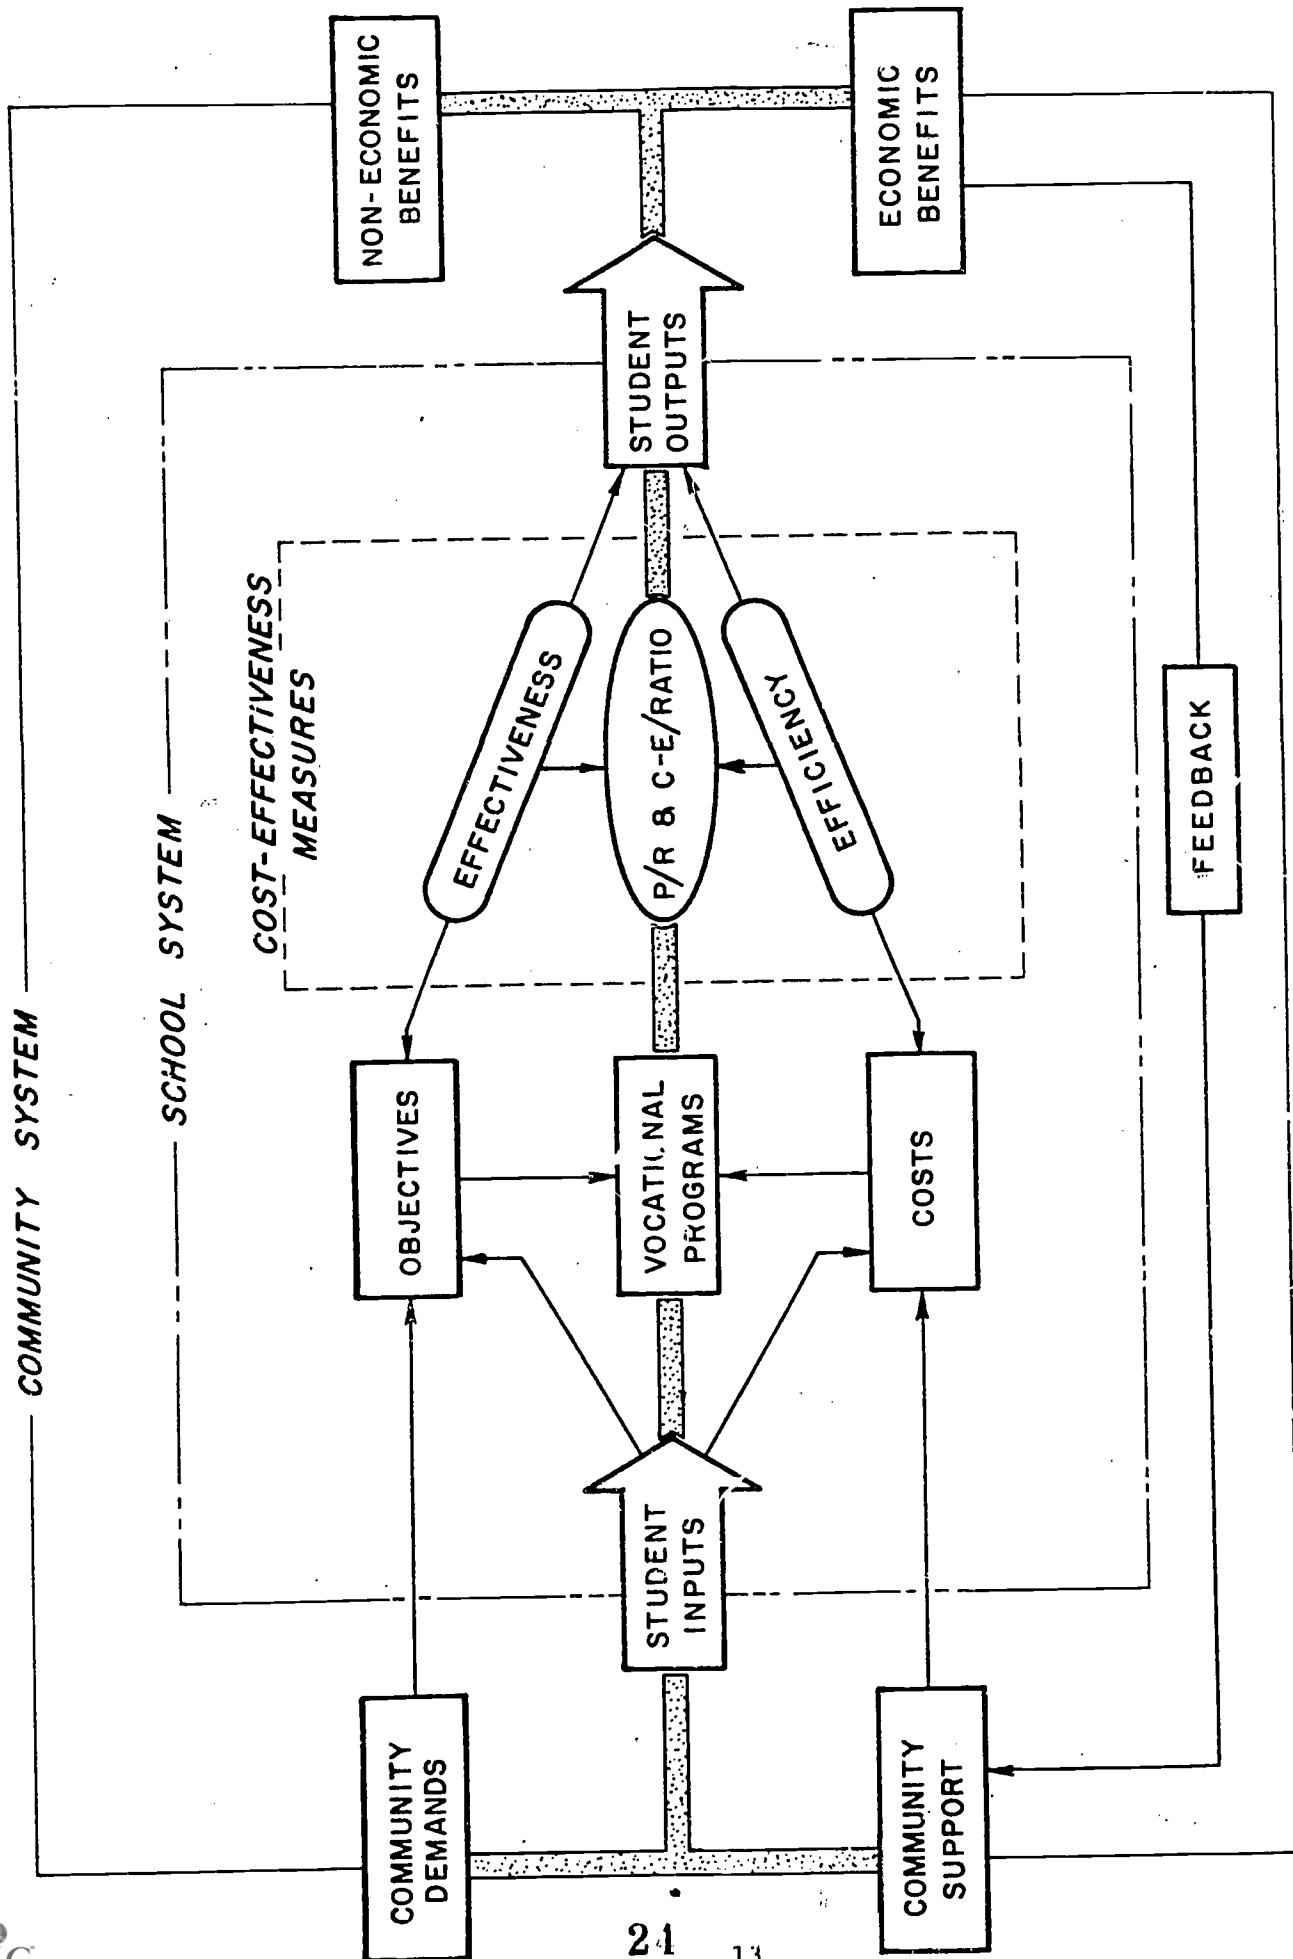

FIGURE 1  
 A CONCEPTUAL MODEL FOR THE ANALYSIS OF COST-EFFECTIVENESS  
 FOR VOCATIONAL EDUCATION

D. *What is the procedure for a cost-effectiveness analysis?*

The procedure for using the cost-effectiveness analysis model

A standard procedure was conceptualized for using the cost-effectiveness analysis. The procedure involves seven steps within three phases (See Figure 2).

1. Planning a cost-effectiveness analysis

The planning phase starts by determining the purposes of the analysis and provides a time schedule and appropriate resources for attaining the purposes. Thus, it includes three steps:

- (1) Determine the purposes of a cost-effectiveness analysis
- (2) Identify available resources for the analysis
- (3) Develop a study plan

2. Implementing a cost-effectiveness analysis

As scheduled in the plan, a cost-effectiveness analysis may be implemented. The implementing phase includes two steps:

- (4) Collect the required data
- (5) Compute the resulting measures

3. Utilizing the results from the analysis

The results from a cost-effectiveness analysis provide implications for program evaluation and can be used in the program planning and decision-making process. The utilizing phase is divided into two steps:

- (6) Prepare a study report
- (7) Utilize the results for program evaluation, development, and planning

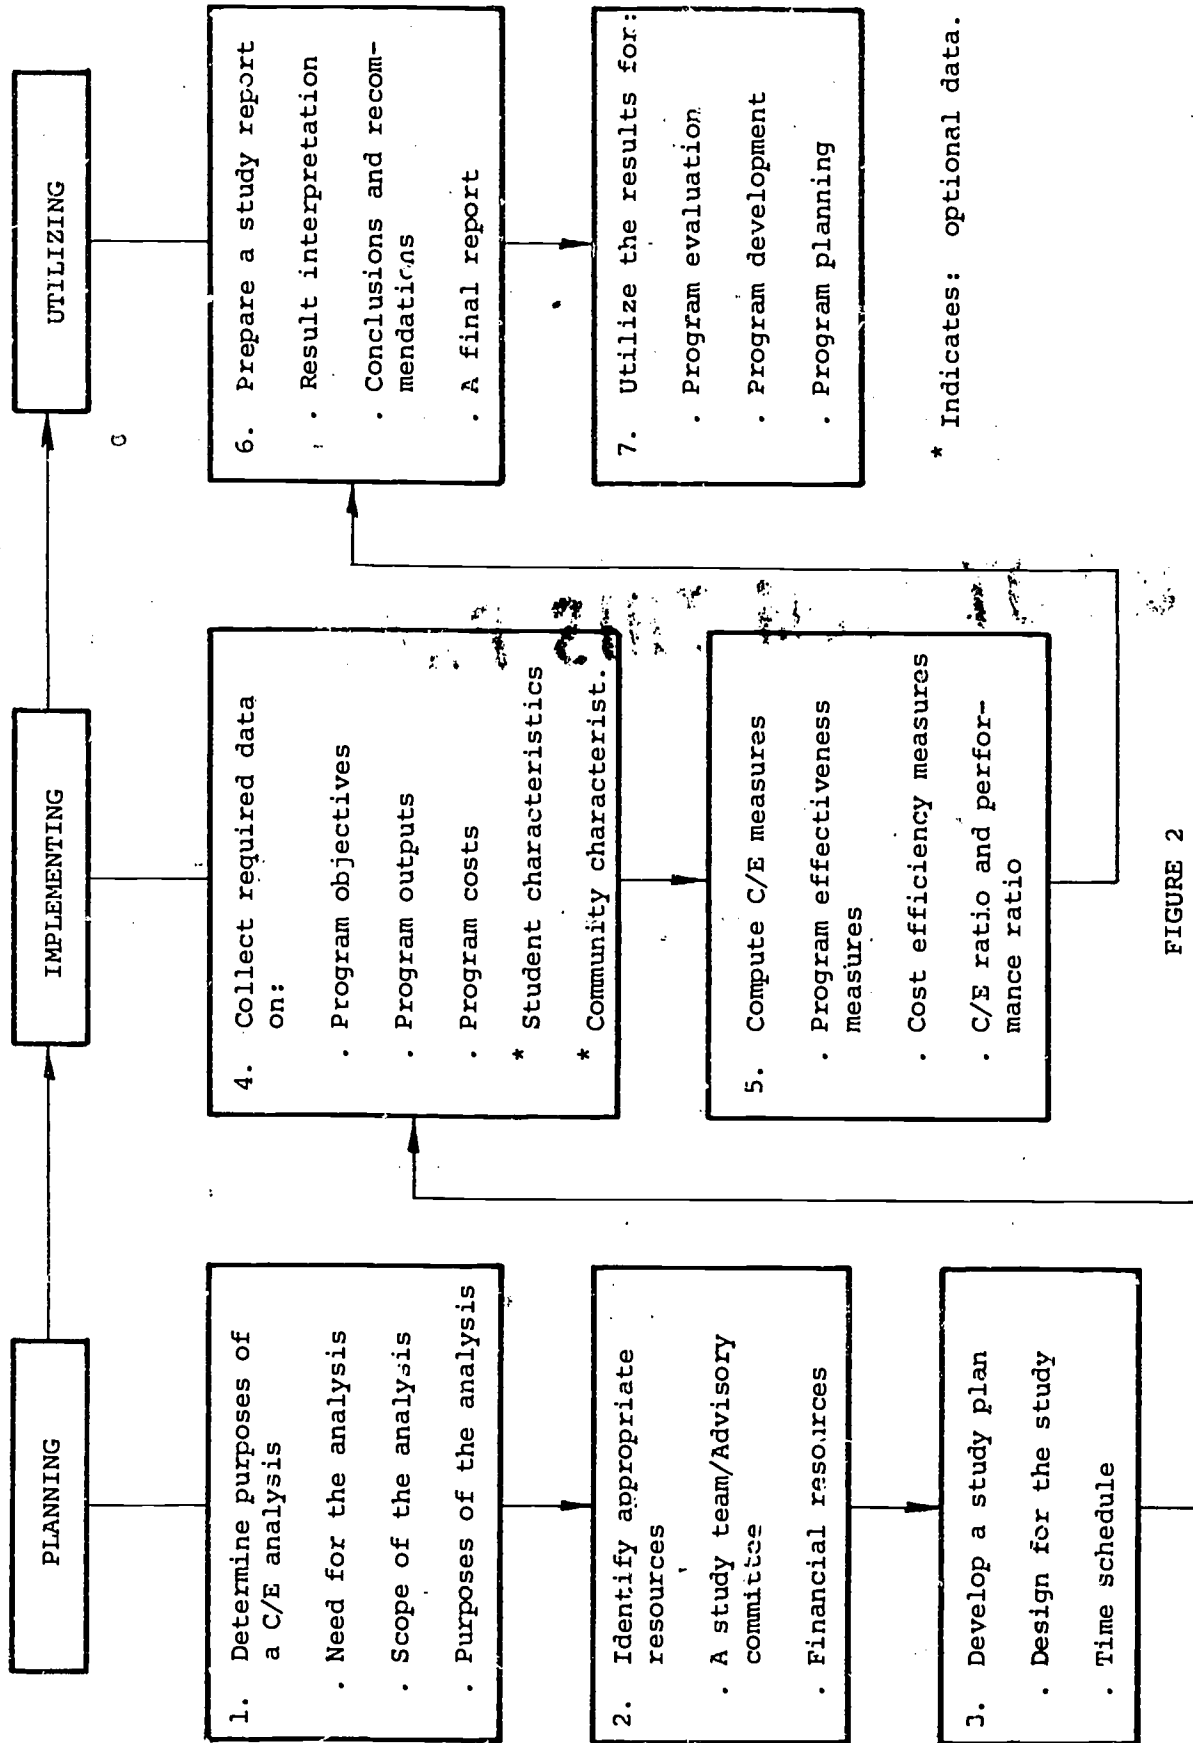

FIGURE 2

PROCEDURE FOR USING THE COST-EFFECTIVENESS ANALYSIS MODEL

## CHAPTER III

### Application of the Cost-Effectiveness Model

- A. *What plan should be developed for implementing a cost-effectiveness analysis?*
- B. *What activities should be executed for a cost-effectiveness analysis?*
- C. *How can the analytical results be utilized for program evaluation, development, and planning?*

A. *What plan should be developed for implementing a cost-effectiveness analysis?*

. Planning for a Cost-Effectiveness Analysis

In preparing a plan for implementing a cost-effectiveness analysis, there are three major considerations which should be taken into account:

1. Determine the purposes of the analysis

The first step is to determine the purpose of the analysis. Its needs and scope should be defined in specifying the purposes.

- 1.1 Identify needs or anticipated information from the analysis
- 1.2 Define the scope of the analysis
- 1.3 Specify the purposes of the analysis

2. Identify available resources for the analysis

Human and financial resources available to the analysis should be identified.

- 2.1 Organize a study team and/or advisory committee
- 2.2 Identify financial resources

3. Develop a study plan

To meet analytical needs, a plan for a cost-effectiveness analysis should be developed with design of the analysis and a time schedule over the procedural activities.

- 3.1 Design a cost-effectiveness study
- 3.2 Develop a time schedule

\*The planning activities are specified with the indication of who will be responsible for, and what instruments will be available in the following forms:

Planning Activity	Who	Form
1.1 Identify needs or anticipated information from the analysis.	Vocational Director	FORM 1.1
<p>Needs for the analysis will be defined by answering the following questions:</p> <p><u>Why do you need the analysis?</u></p> <ol style="list-style-type: none"> <li>(1) Evaluation of existing programs?</li> <li>(2) Development of new programs?</li> <li>(3) Program planning?</li> </ol> <p><u>What information do you need?</u></p> <ol style="list-style-type: none"> <li>(1) Vocational programs?</li> <li>(2) Program objectives?</li> <li>(3) Program outputs?</li> <li>(4) Program costs?</li> <li>(5) Program effectiveness measures?</li> <li>(6) Cost efficiency measures?</li> <li>(7) Cost-effectiveness/performance ratio?</li> </ol> <p>*A combination of your selections from the above alternatives will provide needs of the analysis.</p>		<p>See Appendix A</p> <p>See Appendix B</p>

DETERMINATION OF NEEDS AND ANTICIPATED INFORMATION FROM  
COST-EFFECTIVENESS ANALYSES

Information	Program Evaluation	Program Development	Program Planning

CHECKLIST OF DATA TYPES NEEDED  
FOR COST-EFFECTIVENESS ANALYSES

	<u>School Records</u>	<u>Availability</u>		
		<u>Past</u>	<u>Current</u>	<u>Projected</u>
S 1	- number of students enrolled in total school	_____	_____	_____
S 2	- number of students who complete program requirements	_____	_____	_____
S 3	- total of all students who are enrolled in program	_____	_____	_____
S 4	- number of students with on-the-job experience (coop)	_____	_____	_____
S 5	- number of student dropouts in vocational program	_____	_____	_____
S 6	- number of student dropouts in total school	_____	_____	_____
S 7	- number of disadvantaged students enrolled in vocational program	_____	_____	_____
S 8	- number of disadvantaged students enrolled in school	_____	_____	_____
S 9	- number of special education students in school	_____	_____	_____
S10	- number of disadvantaged students completing program	_____	_____	_____
S11	- number of disadvantaged students in work-study	_____	_____	_____
S12	- number of handicapped student completions	_____	_____	_____
S13	- number of exceptional student completions	_____	_____	_____
S14	- number of sex minority enrolled	_____	_____	_____
S15	- number of special education students enrolled in program	_____	_____	_____

FORM 3.1  
(continued)

	<u>School Records</u>	<u>Availability</u>		
		<u>Past</u>	<u>Current</u>	<u>Projected</u>
S16	- number of special students enrolled in related or enabling skills	_____	_____	_____
S17	- number of special students enrolled in related or enabling skills courses attaining minimum competencies	_____	_____	_____
S18	- number of special students who complete program requirements	_____	_____	_____
S19	- number of students participating in youth organizations	_____	_____	_____
S20	- number of students receiving career counseling and guidance services	_____	_____	_____
S21	- number of students receiving career development information	_____	_____	_____
S22	- number of students enrolled in high need program	_____	_____	_____

<u>Follow-up data</u>				
F 1	- number of students rating program as satisfactory	_____	_____	_____
F 2	- number of special students rating program satisfactory	_____	_____	_____
F 3	- number of students recommending program to other students	_____	_____	_____
F 4	- number of special students recommending program to other students	_____	_____	_____
F 5	- number of students employed	_____	_____	_____
F 6	- number of student graduates available for employment	_____	_____	_____
F 7	- number of students employed in their specialty	_____	_____	_____
F 8	- number of students employed in specialty and/or related area	_____	_____	_____

FORM 3.2

NETWORK DIAGRAM FOR COST-EFFECTIVENESS STUDY  
AN ILLUSTRATION FOR 12-WEEK SCHEDULE

B. *What activities should be executed for a cost-effectiveness analysis?*

• Implementing a Cost-Effectiveness Analysis

After a plan for a cost-effectiveness analysis is approved, as scheduled in the plan, the implementing activity will be executed for collecting required data and computing cost-effectiveness measures.

4. Collect required data

Data required for each of the components in a cost-effectiveness analysis should be collected.

- 4.1 Determine program objectives/target goals
- 4.2 Collect program outputs/follow-up data
- 4.3 Analyze costs of vocational programs

5. Compute cost-effectiveness measures

After required data are collected, planned analytical techniques will be executed to:

- 5.1 Compute program effectiveness measures
- 5.2 Compute cost efficiency measures
- 5.3 Compute cost-effectiveness ratio and performance ratio

\*The implementing activity is more specified by each component with the indication of who will be responsible and what instruments will be available in the following forms:

Implementing Activity	Who	Form
<p>4.1 Define program objectives and target goals.</p>	<p>Vocational Director/ Study Team</p>	<p>Appendices: B &amp; D FORM 4.1</p>
<p>Program objectives should be reviewed and specified into measurable terms. The following procedures can be taken into consideration:</p> <p><u>Refer to a seven-category objectives of the program and their specifications</u></p> <p>A set of program objectives are developed for determination of specified target goals of the Vocational program.</p> <p><u>Select a number of objectives and specifications</u></p> <p>Considering the program relativeness and data availability, a number of objectives and specifications can be selected from among the seven objective categories.</p> <p>For instance, Objective 2 will be appropriate to the program enrolling students with special needs.</p> <p>Specified goals within an objective category may be chosen according to policy preferences or data availability.</p> <p><u>Explore or set forth target goals</u></p> <p>Already assigned target goals can be identified. Otherwise, appropriate target goals should be set forth by the authority from the future perspective, based upon Appendix D.</p> <p><u>Put determined program objectives/target goals into FORM 4.1</u></p>		<p>See Appendix B</p> <p>See Appendix D</p> <p>FORM 4.1</p>

DETERMINATION OF SELECTED PROGRAM OBJECTIVES/TARGET GOALS

Selected Objectives: (1-a) _____ (1-b) _____	Instructional Programs	Target Goals:

Implementing Activity	Who	Form
<p>4.2 Collect program output data including follow-up information and identify output measures.</p>	<p>Study team</p>	<p>Appendix C: (II) (III) (IV) Appendix D FORM 4.2</p>
<p>In accordance with program objectives, program output data should be collected to identify actual performances of each objective. What is the extent to which target goals are achieved when completing the vocational program or after graduation.</p> <p>For program planning, however, anticipated target goals can be referred to as outputs of the program objective.</p> <p>In relation to the selected pre-determined target goals, collect needed data through:</p> <ul style="list-style-type: none"> <li>(1) School records/documents analysis, and</li> <li>(2) Follow-up information</li> </ul> <p><u>Identify program output measures, using Appendix D:</u></p> <p>For example, a completion rate of students will be made by dividing the number of students who completed the vocational program over the number of students enrolled in the program.</p> <p><u>Put output information into Form 4.2</u></p> <p>Then, it is ready to compute program effectiveness scores. It may proceed or wait until cost analysis.</p>		<p>See Appendix C: (II)</p> <p>See Appendix C: (III) (IV)</p> <p>See Appendix D</p> <p>FORM 4.2</p>

C. *How can the analytical results be utilized for program evaluation, development, and planning?*

. Utilizing the results from the analysis

A study report should be made to decision-makers so that they may utilize the results in reaching decisions pertaining to program evaluation, development, and planning.

6. Prepare a study report

The resulting cost-effectiveness measures should be interpreted and discussed among the concerned people. Then a study report, including conclusions and recommendations, will be made.

- 6.1 Interpret the results
- 6.2 Draw conclusions and recommendations
- 6.3 Write a report

7. Utilize the results

Based on the conclusions and recommendations, analytical results can be utilized for program evaluation, development, and planning.

- 7.1 Use results for program evaluation
- 7.2 Use them for program development
- 7.3 Apply them to program planning

\*The utilizing activity is specified with the indication of who will be responsible in the following:

Utilizing Activity	Who	Form
<p>6.1 Interpret the results from the study.</p> <p>The results from the analysis should be interpreted with careful consideration.</p>	<p>Vocational Director/ Study team</p>	
<p><u>Program effectiveness measures</u> will be employed to judge how effective the program is. At the moment, the following points should be taken into consideration:</p> <ol style="list-style-type: none"> <li>(1) Were program objectives appropriately selected?</li> <li>(2) Were target goals adequately determined?</li> <li>(3) What effectiveness measures are most reliable to judge program effectiveness?</li> </ol> <p>In interpreting <u>cost efficiency measures</u>, the following questions will be critical:</p> <ol style="list-style-type: none"> <li>(1) What budget items were involved in determining costs for a vocational program?</li> <li>(2) How were costs assigned or prorated to the program?</li> <li>(3) What efficiency measures are most reliable to judge if the program was implemented in an efficient way?</li> </ol> <p>A <u>cost-effectiveness ratio</u> can be referred to as a criterion in judging program effectiveness in relation to the associated costs. Furthermore, <u>performance ratio</u> indicates the degree of program management performance, based on the program effectiveness and cost efficiency. For a comparison of two or more programs, caution should be given to the following additional points:</p> <ol style="list-style-type: none"> <li>(1) Are effectiveness scores and index made upon the same basis of goal targets between programs?</li> <li>(2) Are efficiency measures and index made upon the same cost items between programs?</li> <li>(3) Are there common characteristics of students between programs?</li> </ol>		

Utilizing Activity	Who	Form
<p>6.2 Draw conclusions and recommendations.</p> <p>Based upon the results and interpretation, conclusions and recommendations will be made and discussed among the concerned people.</p>	<p>Vocational Director/ Study team/ Advisory Committee/ Teachers</p>	
<p><u>Draw conclusions from the results.</u></p> <p>An evaluative study will draw conclusions upon the following remarks:</p> <ol style="list-style-type: none"> <li>(1) How effective is the program?</li> <li>(2) How efficient is the program?</li> <li>(3) What is the relationship between program effectiveness and cost efficiency?</li> </ol> <p>Furthermore, in program comparisons, conclusions will be made on:</p> <ol style="list-style-type: none"> <li>(1) Which program is most effective among studied programs?</li> <li>(2) Which program is most efficient?</li> <li>(3) Which program is most effective and efficient?</li> </ol> <p><u>Develop recommendations for further actions.</u></p> <p>Based on the conclusions, recommendations will be developed for further actions:</p> <ol style="list-style-type: none"> <li>(1) To increase program effectiveness with the given resources.</li> <li>(2) To allocate additional resources to most effective and/or efficient programs.</li> </ol> <p><u>Discuss conclusions and recommendations among the concerned people.</u></p> <p>The conclusions and recommendations should be discussed among the concerned people and be referred to the advisory committee.</p>		

Utilizing Activity	Who	Form
<p>6.3 Prepare a final report.</p> <p>Through discussion of the results, conclusions and recommendations, a final report should be made to decision-makers.</p>	Study team	
<p>The report would include:</p> <ul style="list-style-type: none"> <li>(1) Objectives of the study,</li> <li>(2) Procedures for the study,</li> <li>(3) Program objectives and target goals,</li> <li>(4) Actualized outputs from the program,</li> <li>(5) Program costs,</li> <li>(6) Cost-effectiveness measures, and</li> <li>(7) Conclusions and recommendations</li> </ul>		

Utilizing Activity	Who	Form
<p>7.1 Use the report for program evaluation.</p> <p>Based upon the recommendations, cost-effectiveness measures can be used in evaluating existing vocational programs.</p>	<p>Board members/ Administrator/ Vocational Director/ Teachers</p>	
<p><u>Make relative judgements by ranking programs in order.</u></p> <p>Referring to cost-effectiveness measures, relative judgements on program effectiveness and cost efficiency will be made among the given programs.</p> <p><u>Relate program effectiveness to cost implications.</u></p> <p>It would be possible to identify factors influencing the determination of program costs and explain the relationship between program effectiveness and cost implications.</p> <p><u>Develop strategies for increasing effectiveness or efficiency.</u></p> <p>A final decision will be made to develop strategies for increasing program effectiveness and/or cost efficiency.</p>		

Utilizing Activity	Who	Form
<p>7.2 Use the report in developing new programs.</p> <p>Cost-effectiveness measures would provide decision-makers with information on the need for new program development.</p>	<p>Board members/ Administrator/ Vocational Director</p>	
<p><u>Make a judgement on the need for revising an on-going program.</u></p> <p>If a program is found to be very ineffective and inefficient, a judgement should be made to determine if the program should be modified or deleted.</p> <p><u>Develop strategies for modifying the program or identifying an alternate new program.</u></p> <p>A final decision will be made to develop strategies either modifying the program or developing a new alternate program.</p>		

Utilizing Activity	Who	Form
<p>7.3 Utilize the report for program planning.</p> <p>The analytical results and recommendations will provide a basis for a future plan for the improvement of vocational education programs.</p>	<p>Board members/ Administrator/ Vocational Director</p>	
<p><u>Develop a short-range plan for minor change and improvement in vocational education.</u></p> <p>Based on the decision pertaining to program evaluation, a short-range (one or two-year) plan will be developed for increasing program effectiveness and/or cost efficiency.</p> <p><u>Develop a long-range (five-year) plan for the improvement of overall vocational programs.</u></p> <p>A long-range plan should be made in order to implement development strategies for the improvement of overall vocational programs as well as the development of new alternate vocational programs from long-term perspectives.</p>		

## CHAPTER IV

### Conclusion

- A. *What are concluding remarks?*
- B. *What are further suggestions for using the manual?*

A. *What are concluding remarks?*

• Concluding Remarks

The manual is developed to guide locally directed cost-effectiveness studies for secondary vocational program evaluation, development, and planning. In using the manual, the following points pertain:

1. Administrative awareness and commitment to cost-effectiveness analysis of vocational programs is a key point to success in the analysis.
2. Through discussion of needs and scope of the analysis, and human/financial resources, a study plan should be developed to include specific design and time schedule.
3. In determining program objectives/target goals, student/community characteristics information should be fully considered and concerned people should be involved in the decision-making process.
4. According to a standardized accounting system, program costs should be accounted and analyzed, in particular, when comparing cost efficiency among vocational programs.
5. Cost-effectiveness measures, as computed in the manual, are relatively inclusive criteria in evaluating program effectiveness and cost efficiency. The measures may not be used as absolutely exclusive criteria in the decision-making process.
6. Cost-effectiveness analyses should be continued as a recycling process. The repeating analyses based on accumulated data will increase the utility of the analysis.

B. *What are further suggestions for using the manual?*

• Further Suggestions

Although the manual was designed to assist local vocational administrators, its use may be extended. And also the manual will be revised by cumulated efforts.

1. Even though the manual was focused upon secondary vocational programs, the basic conceptual and analytical procedures may be applied to post-secondary vocational program evaluation and planning as well.
2. As a simulation for cost-effectiveness analysis, the manual can be used in training prospective vocational administrators as well as for in-service administrators' workshops.
3. Additional research will be needed for defining program objectives and standardizing cost analysis. Based upon the cumulated efforts, the manual should be revised periodically for general use.

APPENDIX B

APPENDIX B

PROGRAM OBJECTIVES AND TARGET GOALS

- OBJECTIVE 1. Aid students enrolled in vocational education to successfully complete a secondary occupational program.
- 1-a. \_\_\_\_\_ percent of the student population will be enrolled in the secondary vocational program during the 19\_\_ - 19\_\_ school year.
  - 1-b. \_\_\_\_\_ percent of the students will complete the program requirements.
  - 1-c. \_\_\_\_\_ percent of the student completions will have on the job occupational experience.
  - 1-d. \_\_\_\_\_ percent less dropout rate will occur in the vocational program than the total dropout rate for the entire school.
  - 1-e. \_\_\_\_\_ percent of the student completions will rate their program as satisfactorily meeting their educational goals.
  - 1-f. \_\_\_\_\_ percent of the student completions will indicate they would recommend their vocational program to other students.
- OBJECTIVE 2. Assist special student groups to successfully achieve in a secondary vocational program.
- 2-a. \_\_\_\_\_ percent of the persons identified as special education students will be enrolled in the vocational program (mainstream).
  - 2-b. \_\_\_\_\_ percent of the disadvantaged students will be enrolled in the vocational program.
  - 2-c. \_\_\_\_\_ disadvantaged persons (economically and/or educationally) will complete the secondary vocational program.
  - 2-d. \_\_\_\_\_ disadvantaged students (economically and/or educationally) will participate in work-study programs.
  - 2-e. \_\_\_\_\_ handicapped persons (physical and/or mental) will successfully complete the secondary vocational program.
  - 2-f. \_\_\_\_\_ exceptional youth will complete the secondary vocational program.
  - 2-g. \_\_\_\_\_ percent of the students enrolled will represent the sex minority in those programs traditionally considered sex-stereotyped.

APPENDIX B (continued)

- 2-h. \_\_\_\_\_ percent of the students classified in special student groups who can benefit from a related or enabling skills course will be enrolled in such courses.
- 2-i. \_\_\_\_\_ percent of the students enrolled in related or enabling skills courses will attain minimum competencies in order to benefit from vocational or preparatory programs.
- 2-j. \_\_\_\_\_ percent of the students classified in special student groups will rate their vocational program as satisfactorily meeting their educational goals.
- 2-k. \_\_\_\_\_ percent of the special student group completions will indicate they would recommend their vocational program to other students.

OBJECTIVE 3. Provide vocational education for secondary school youth in accordance with their occupational preparation.

- 3-a. \_\_\_\_\_ percent of the students available for and having sought employment will be employed full-time in less than fifteen weeks after graduation. (Consider military and apprenticeships as employed.)
- 3-b. \_\_\_\_\_ percent of the graduates available for and having sought employment in their specialization will be employed in their specialization in less than fifteen weeks after graduation. (Include military and apprenticeships if in the area of specialization.)
- 3-c. \_\_\_\_\_ percent of the graduates available for employment will be employed in their specialization or in a position they considered related to their area in less than fifteen weeks after graduation. (Include military and apprenticeships if in specialization or related area.)
- 3-d. \_\_\_\_\_ percent of the enrollees who terminate schooling before completing program requirements will find their first full-time job in the occupation for which they were being trained or a related area. (Include military and apprenticeships if in specialization or related area.)
- 3-e. \_\_\_\_\_ percent of the graduates of any licensed occupation program (who apply and take) will pass the appropriate examination.
- 3-f. \_\_\_\_\_ percent of the students responding on a follow-up study will indicate they are satisfied with their job.
- 3-g. \_\_\_\_\_ percent of the students employed six (6) months after graduation will indicate that their skill preparation was adequate for their present job.

APPENDIX B (continued)

3-h. \_\_\_\_\_ percent of the graduates will indicate they were adequately prepared to work with supervisors, co-workers and subordinates.

OBJECTIVE 4. Provide leadership development activities for students enrolled in vocational programs through a youth organization functioning as an integral part of the vocational instruction.

4-a. \_\_\_\_\_ percent of the students enrolled in the vocational program will have taken an active part in (youth organization, i.e., VICA, FFA, FHA, etc.) activities for the school year.

4-b. \_\_\_\_\_ percent of youth organization participants will rate the activities as meeting their needs and interests.

OBJECTIVE 5. Provide guidance and counseling services (career development) information appropriate to continued education or employment for students enrolled in vocational programs.

5-a. \_\_\_\_\_ vocational students will receive career counseling and guidance services.

5-b. \_\_\_\_\_ students will receive career development information during the school year 19 \_\_ - 19 \_\_.

5-c. \_\_\_\_\_ percent of the students will indicate career guidance and counseling services as adequate after completion of their vocational program.

5-d. \_\_\_\_\_ percent of the students receiving exploratory career information will rate the experience as having influence on their career choice.

OBJECTIVE 6. Provide vocational programs to fulfill the requirement of the labor markets and the employment community manpower needs.

6-a. \_\_\_\_\_ percent of the student completions will be working in the employment community serviced by the school corporation.

6-b. \_\_\_\_\_ percent of the student completions will seek employment external to the employment community in which they were trained.

6-c. \_\_\_\_\_ percent of all students will be enrolled in the vocational program that is considered to have high employment community and manpower occupational needs. (Projected)

APPENDIX B (continued)

- 6-d. \_\_\_\_\_ employers will value the vocational program as a source of trained manpower.
- 6-e. \_\_\_\_\_ employers will indicate that the employees' vocational preparation was critical in the employment decision.
- 6-f. \_\_\_\_\_ employers will rank the employees' skill and knowledge level at a minimum of fairly skilled or above.
- 6-g. \_\_\_\_\_ employers will indicate job advancement is related to training received in the vocational education programs.
- 6-h. \_\_\_\_\_ employers will rate the employees on the job maturity factors at a minimum mean of good or above.

OBJECTIVE

- 7. Encourage vocational graduates to continue their education after completion of their secondary program
- 7-a. \_\_\_\_\_ percent of the students who complete the vocational program will be enrolled in advanced study programs.
- 7-b. \_\_\_\_\_ percent of the students enrolled in advanced study programs will be in the same program specialty as their secondary vocational program.
- 7-c. \_\_\_\_\_ percent of the students enrolled in advanced study programs will be in their specialization or programs which they considered related to their secondary vocational program.
- 7-d. \_\_\_\_\_ percent of the students enrolled in advanced study programs will rate their secondary vocational program as instrumental in their decision to continue their education.
- 7-e. \_\_\_\_\_ percent of the students enrolled in advanced study programs will indicate their vocational program prepared them for their pursuit of advanced study.

## Students' Follow-up Program Rating Scale

This questionnaire is one portion of an evaluation of vocational education programs. Information you can provide will serve as an important basis for decisions regarding local school programs.

The information on this form will be used as a program class profile. Please note that your name does not appear on the questionnaire. This confidential data will not be reported as information on specific students, employers, or teachers. The code number at the top of the page will be used to record person returning the questionnaire.

**INSTRUCTIONS:** Please mark responses to the following questions or statements. When you have completed the questionnaire, return it in the enclosed postage paid envelope.

THANK YOU FOR YOUR TIME AND THOUGHTS.

1. Were you enrolled in a vocational education program while in school?

Yes . . .  No . . .

2. What type of vocational program:

- Agriculture . . . . .
- Distributive Education . . . . .
- Business . . . . .
- Health . . . . .
- Home Economics . . . . .
- Trade & Industry . . . . .

3. Has your address changed since leaving school?

Yes . . .  No . . .

3a. If you answered "yes" above, where did you move?

- To a place in the same county . . . . .
- To a different county (same state) . . . . .
- To a different state . . . . .

4. Since you left school, did you seek full-time employment? (35 or more hours per week)

Yes . . .  No . . .

5. What is your present employment status?

- Employed: full-time (35 or more hours per week) . . . . .
- Employed: part-time (less than 35 hours per week) . . . . .
- Not Employed: looking for work . . . . .
- Not Employed: not looking for work . . . . .
- Attending school . . . . .
- Married or getting married . . . . .
- Military . . . . .
- Other (explain) \_\_\_\_\_

6. Have you had a full-time job since leaving high school?

Yes . . .  No . . .

Answer these questions if you are working full-time.

7. How long after leaving high school did you begin your first full-time job?

- No working period . . . . .
- Less than 4 weeks . . . . .
- 4 to 8 weeks . . . . .
- 8 to 12 weeks . . . . .
- 12 to 15 weeks . . . . .
- 15 to 18 weeks . . . . .
- 18 to 24 weeks . . . . .

8. Is your present job related to the vocational training you received?

- Same occupation . . . . .
- Highly related . . . . .
- Slightly related . . . . .
- Totally unrelated . . . . .

9. Did your first job require that you take a licensed examination?

Yes . . .  No . . .

10. Did you pass the examination?

Yes . . .  No . . .

If you are going to school, answer these questions.

11. Are you enrolled in advanced study?

Yes . . .  No . . .

12. What is the relationship of your advanced study program to your high school vocational program?

- New program is in the same occupation . . .
- New program is in a related occupation . .
- New program is in an entirely different occupation . . . . .

Rate the following items as they state your personal feelings or experiences. Check the blank according to whether you agree or disagree with the statement.

	<u>Agree</u> (3)	<u>Don't</u> <u>Know</u> (2)	<u>Disagree</u> (1)
13. I'm satisfied with the vocational training I received in high school as meeting my goals.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
14. I would recommend this vocational program to others.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
15. The vocational youth organization activities met my needs and interests.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
16. I feel that the career counseling and guidance services I received at school were adequate.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
17. The career information that I received during the school was influential in my career choice.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<u>Rate if working.</u>			
18. I was adequately prepared for my present job by my vocational program.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
19. I was adequately trained to get along with others at work by my vocational program.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
20. I am satisfied with my present job.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<u>Rate if going to school.</u>			
21. The vocational program that I completed was influential in my decision to take advanced studies.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
22. The vocational program that I completed prepared me to pursue advanced study.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### Employers' Opinion on Vocational Training of Employees

Dear Employer:

This questionnaire was developed for you to provide information on the vocational training of an employee in your firm. Your response will serve as a basis for decisions regarding local vocational program development and operation. This confidential data will not be reported as information on specific students, employers, or teachers.

Please provide the appropriate information about the designated employee. When you have completed the questionnaire, return it in the enclosed postage paid envelope.

\_\_\_\_\_ is an employee in your firm.

1. What is the title of the position he/she holds within the firm? (example: secretary, machine operator, cashier, etc.)

Job title: \_\_\_\_\_

2. When hiring the person, did you consider his/her vocational training at the high school level as critical in your decision?

Yes . . . . .                       No . . . . .                       Undecided . . . . .

3. Please rate the person's occupational skills at the time the person was employed.

No skill and knowledge . . . . .   
Limited skill and knowledge . . . . .   
Fair skill and knowledge . . . . .   
Exceptional skill and knowledge . . . . .

4. Do you think that the employee's skill or knowledge attained through the vocational training program has allowed the employee to advance in his/her job?

Yes . . . . .                       No . . . . .                       Undecided . . . . .

5. Do you look to the vocational education program as a good source of trained personnel?

Yes . . . . .                       No . . . . .                       Undecided . . . . .

6. Please rate the employee in the following factors: (check each of the items on the adjacent scale)

Factors

- A) Cooperativeness with supervisor |-----|  
Poor    Fair    Good    Very Good    Excellent
- B) Cooperativeness with other employees |-----|  
Poor    Fair    Good    Very Good    Excellent
- C) Interest in the job |-----|  
Poor    Fair    Good    Very Good    Excellent
- D) Attendance and punctuality |-----|  
Poor    Fair    Good    Very Good    Excellent
- E) Productivity |-----|  
Poor    Fair    Good    Very Good    Excellent

Employers' Opinion on Vocational Training of Employees
