ABSTRACT

This second of a 3-volume curriculum guide covering Grades 1-9 contains four master units which incorporate career education concepts into the existing curriculum for Grades 5-8. Focusing on careers in the city, state, and nation, the units for Grades 5 and 6 continue the career awareness activities developed for the primary grades. Activities in the career orientation and exploration unit for Grade 7 are grouped by subject areas: Reading, language arts, social studies, and mathematics. The program for eighth grade social studies explores various occupational clusters through seven subunits: The individual, prejudice, elections, war, government, democracy, and technology. The general format for each unit includes an introduction, educational goals, career education concepts, information (behavioral) objectives, instructional procedures, suggested student outcomes, evaluation methods, and a bibliography. The instructional procedures are activities and experiences designed to achieve the stated goals and objectives. For each activity, the necessary resource materials are listed. A bibliography of career education materials (46 pages) completes the document. Entries are arranged alphabetically by type of material and include articles, books, and pamphlets. The information provided for pamphlets, which constitute the largest number of references, is the title and availability. (Author/RG)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from original.

FOREWORD

The need for innovation in education has never been more apparent than it is today. Our school division is part of a changing society that creates constantly accelerating demands for new insights into the learning process, new ways of teaching, and workable strategies for relating the traditional academic focus of the classroom to the "real world" outside the classroom walls. Students, parents, teachers, business and civic groups are calling for new ways of applying resources to educational needs, for experimentation and flexibility in altering obsolete roles and for relationships within school divisions that will facilitate more creative and effective resolution of educational problems.

One of the new strategies for meeting these educational challenges is a school curriculum organized around the Career Education theme that is correlated with academic subjects. This approach presents an opportunity for students to learn by direct and immediate involvement that eliminates the distinction between "classroom" and "reality," and brings the "real world" into the classroom..

It is a distinct privilege to continue the Career Education Pilot Program under state help and supervision. Our participation in the program under federal funding for the past two years causes us to believe that its merits make further exploration and development highly desirable in the firm belief that this educational program is all-encompassing and involves education of the future. Petersburg is particularly grateful to former State Senator Eugene P. Sydnor for his interest and leadership in making possible the expansion of the Career Education Program in the Petersburg City Schools. Through the interest of Mr. Sydnor, an outstanding individual in the field of business and a great friend of public education, the Career

Education Program is gaining more national interest than any other concept in the history of education.

Our goal for education is that every young person leaving or completing his high school program should be ready to enter higher education or have a salable skill for entering useful and rewarding employment. This concept has been embodied within this Career Education Resource Guide and our future Career Education Model for grades K-12.

PHILOSOPHY

We, in the Petersburg Career Education Program, believe that we must make certain that paycheck education is not left to chance. We should and must develop an awareness in our students of the real world of work as it exists today and is likely to exist tomorrow.

We must remember that a career is a long sequence of work experiences, each of which builds upon the individual's preparation, not for just the first job, but for a lifetime of useful work and expanding opportunities.

The careers of students in schools today will span the last quarter of the 20th century and the first quarter of the 21st. During these years many kinds of work will become obsolete while new ones will emerge. All jobs will change substantially. Consequently, the best career education is that which prepares individuals to rise to new opportunities and to adapt themselves to change. It must make for maximal flexibility.

INTRODUCTION

Petersburg Career Education Project

Curriculum Resource Guide

The Petersburg curriculum resource guide for the Career Education Program for grades 1 - 7 and the 8th grade social studies curriculum is designed to fuse and blend career education activities into the existing curriculum.

Revisions of the existing elementary school curriculum and the eighth grade social studies curriculum were undertaken in order to incorporate career awareness, career orientation and career exploration experiences in these grades and to re-focus the various disciplines around the career development theme. The career development experiences will serve as the vehicle or motivation for teaching the basic academic skills to the students. Therefore the career education theme will serve as a common thread to unify the educational efforts at all levels.

In developing the curriculum resource guide, master units were written in which career education concepts were incorporated into the existing curriculum at each grade level. The area of social studies was used as the main vehicle to accomplish this goal. Educational goals, career education concepts, and behavioral objectives were stated. Activities were then suggested which included activities in the other content areas in which the concepts of career education could also be accomplished.

The criteria for the selection of activities to promote career development were based upon anticipated students' needs, abilities, insights, interests, and aspirations; environmental constraints; principles of the psychology of learning, and human growth and development.

The general format of the curriculum resource guide which is used by all grade levels is as follows:

Curriculum Guide Outline

Grade 1

Master Unit: Finding Out About the World of Work

- I. Introduction
- II. Educational Goals
- III. Career Education Concepts
- IV. Informational Objectives - (Specific, stated in behavioral terms)
- V. Instructional Procedures - (activities and experiences to achieve objectives)

Content Areas	Activities	Resources
1. Soc. St.	1. 2.	1. 2.
2. Lang. Arts	1. 2.	1. 3. 2.

- VI. Suggested Student Outcomes
- VII. Evaluation
- VIII. Miscellaneous
 1. Letters to parents
 2. Letters to resource persons
 3. Etc.
- IX. Bibliography
 - A. Teachers
 - B. Students

Grade 2

Master Unit: Careers In Our Neighborhood and Community.

Grade 3

Master Unit: Careers In and Around the City

Grade 4

Master Unit: Careers In Our City and State

Grade 5

Master Unit: Careers In Our City, State and National Regions

Grade 6

Master Unit: Careers - City, State, Nation and World

Grade 7

Master Unit: Careers - City, State and Nation

Grade 8

Master Unit: Careers - City, State and Nation

These master units are geared to the grade level of the students, and will interject basic career information in all areas (art, mathematics, language arts, social studies, science, etc.), and develop a sequential plan moving from very simple identification of family, school and community helpers in the primary grades to more complex occupations in the upper elementary grades and the 8th grade.

The intent in creating these materials has been to provide an agent to facilitate career development in the school community. We do not profess to have found the ultimate answer but, rather, to have developed materials which we feel can change and improve an educational program. It is a challenge to you to take advantage of the right and the opportunity not only to create, but also to put into practice and evaluate the results of what has been created.

This guide has been developed to serve as a framework around which to build. Its success is contingent upon your efforts to expand and modify the contents of this guide for application at your particular level and the needs of your locality.

The curriculum resource guide is bound into two volumes, Grades 1-4; and Grades 5-8.

Ellen S. Poole
Career Education Supervisor

Phase I -- Career Awareness

Grade 5

Master Unit: Careers In Our City, State and National Regions

INTRODUCTION

In providing learning experiences, the Career Awareness Program will help students to better understand themselves---their interests, achievements, abilities, personal characteristics, physical abilities, physical traits and values.

It will provide for further investigation and interpretation of the work of family members, the community and the state as related to various careers on the national scale.

Further development of positive attitudes and values which are appropriate to both personal growth and career interests will be encouraged, building on insights gained in preceding levels. Experience will be expanded so that an awareness of career areas and career goals are enhanced. Instructional methods will be built upon individual student interest and mental maturation.

EDUCATIONAL GOALS

1. To help students recognize the relationship between self-awareness and career goals.
2. To provide students with experiences leading to an awareness of the basic human needs of belonging, security, affection and success.
3. To help develop in students the understanding that the world of work exists to meet the needs of and to provide services to society and to show their interdependency.
4. To provide students with information regarding the job opportunities present in the various career clusters.
5. To help students understand that all work has dignity and that every worker performs a useful function.
6. To provide students with the awareness of constant changes occurring in the world of work due to scientific and technological advancement.
7. To provide students with career information to make them aware of the meaning of work and its importance to them and society.
8. To provide students with an understanding of how people in their immediate environment can influence their attitudes, values and decision-making.
9. To present to students a realistic view of the world of work and to encourage them to consider their own interests, abilities, and the need to develop their potential.

CAREER DEVELOPMENT CONCEPTS

1. An understanding and acceptance of self--interests, abilities, attitudes and values--is important throughout life.
2. Education and work are interrelated.
3. Persons need to be recognized as having dignity and worth.
4. Occupations exist for a purpose.
5. There is a wide variety of careers which may be classified in several ways.
6. Work means different things to different people.
7. Occupational supply and demand has an impact on career development.
8. Job specialization creates interdependency.
9. Environment and individual potential interact to influence career development.
10. Occupations and life styles are interrelated.
11. Careers are unique to environmental location, climate and need.
12. Individuals can learn to perform adequately in a variety of occupations and are thereby confronted with a continuous and sequential series of choices.

LEARNING OBJECTIVES

1. Students will, by exploration, begin to identify those differences and disagreements that exist between themselves and the intervening environment.
2. Students will demonstrate an understanding of the purposes of the world of work.
3. Students will demonstrate an understanding of the differences in the career clusters.
4. Students will demonstrate an understanding of people and their work.
5. Students will demonstrate the understanding that change is continuous in the world of work.
6. Students will prepare a system for the collection and use of occupational information in career planning and preparation.
7. Students will relate what family, friends and environmental influences are being applied (positive or negative) to their career planning and preparation.
8. Students will know that occupational competency requirements influence the kind and degree of one's educational preparation in career planning and preparation.

UNIT I

EDUCATIONAL GOAL(S): To help students recognize the relationship between self-awareness and career goals.

To provide students with experiences leading to an awareness of the basic human needs of belonging, security, affection and success.

CONCEPT(S): An understanding and acceptance of self--interests, abilities, attitudes and values-- is important throughout life.

Education and work are interrelated.

Persons need to be recognized as having dignity and worth.

Work means different things to different people.

Occupational supply and demand has an impact on career development.

Environment and individual potential interact to influence career development.

INFORMATIONAL OBJECTIVE: Students will, by exploration, begin to identify those differences and disagreements that exist between themselves and the intervening environment.

CONTENT AREAS

Language Arts

Students will write a theme entitled "My Goals in Life."

Language Arts

Students will play a game about "Who Am I?"

Language Arts

Students will take part in a "share session" on what they have learned about themselves.

STRATEGIES

RESOURCE MATERIALS

Filmstrip:
Who Are You?

Filmstrip:
Developing Basic Values

Cassette: "You Can Do Almost Anything You Want To Do"

INFORMATIONAL OBJECTIVE: Students will, by exploration, begin to identify those differences and disagreements that exist between themselves and the intervening environment.

COHERENT
AREAS

STRATEGIES

RESOURCE MATERIALS

Language Arts	Students will follow the weekly schedule in "Secrets."	Kit: "Secrets"
Language Arts	Students will describe individual successful experiences.	
Language Arts	Students will solve a scrambled word puzzle on abilities, interests and work environment.	Teacher
Language Arts	Students will write a short paragraph or poem on "My Secret Ambition."	
Language Arts	Students will complete a personal characteristics inventory.	
Language Arts	Students will write a paragraph comparing personal characteristics with the characteristics demanded by the labor market.	
Art	Students will draw a self-portrait.	Paper, crayons
Art	Students will play charades, pantomiming various careers.	Flustrip: <u>Working in U.S. Communities</u>
Language Arts	Students will list the various occupations in the world related to language arts.	
Language Arts	Students will interview workers in the school and in the community.	
Language Arts	Have a resource person visit the classroom.	
Language Arts	From a grab bag of occupations, students will tell what they know about the occupation chosen.	Pupils and teacher

INSTRUCTIONAL OBJECTIVE: Students will, by exploration, begin to identify those differences and disagreements that exist between themselves and the intervening environment.

**CONTENT
AREAS**

STRATEGIES

RESOURCE MATERIALS

Language Arts

Students will visit nearby plants and industries to see man at work and to make comparisons of working conditions.

Language Arts

The teacher will lead pupils in a discussion as to the importance of each man to his job.

Language Arts

Students will write letters to local industries to gather facts about job requirements, educational and skill requirements.

Language Arts

Students will dramatize workers on the job.

Social Studies

Students will list occupations according to geographical locations.

Social Studies

Students will plan a bulletin board on occupations in the community.

Social Studies

Students will prepare reports of workers who help protect natural resources.

Math

Students will compute weekly, hourly and monthly wages of various workers.

Math

Students will compare some job requirements in terms of time and monetary returns.

Math

Students will list and compare fringe benefits of occupations (retirement, insurance, vacations, bonuses).

Film: Our People
Works Together

Language textbook,
teacher

Film: Cydonia Fishing
in Virginia

Film: Shell Fishing
in the Chesapeake

Newspapers, magazines
and pamphlets

Resource persons such
as U.S. Park Rangers,
Game Wardens, etc.

INFORMATIONAL OBJECTIVE: Students will, by exploration, begin to identify those differences and disagreements that exist between themselves and the intervening environment.

CONTENT AREAS	STRATEGIES	RESOURCE MATERIALS
Math	Students will compute costs of uniforms and tools for jobs.	Graves-Humphrey Catalog, Sears-Roebuck Catalog, London Uniform Co.
Math	Students will calculate the cost of purchasing equipment for some occupations.	Tandy Leather Co., Beckly Candy Co., Miller & Rhodes
Science	Students will make a relief map to show the regions of our natural resources and list occupations found in these areas.	
Science	Students will list various occupations derived from the use of natural resources within the state.	Commonwealth Gas Distribution, Lake Chesdin Filmstrips: <u>How We Get Gas,</u> <u>How We Get Electricity</u>
Science	Students will list jobs that are created through the use of a combination of natural resources (steel, brass, synthetics).	Film: <u>The Factory:</u> <u>How a Product is Made</u> Filmstrips: <u>How We Get Our Cement,</u> <u>How We Get Our Glass,</u> <u>How We Get Our Paper,</u> <u>How We Get Our Aluminum</u>
Science	Students will visit a plant or industry to view the steps in the process of making synthetic materials.	Allied Chemical Co., Fibers Division Film: <u>Fibers to Fabric</u>

INFORMATIONAL OBJECTIVE: Students will, by exploration, begin to identify those differences and disagreements that exist between themselves and the intervening environment.

CONTENT AREAS	STRATEGIES	RESOURCE MATERIALS
Art	Students will cut out pictures of workers from magazines and newspapers showing people at work.	Magazines and newspapers
Art	Students will draw a picture of one occupation of a member of his family.	Paper and crayons

Suggested Student Outcomes for Unit I:

1. Students will write a theme entitled "My Goals in Life are the Same Because. . ." or "My Goals in Life Have Changed Because . . ." using their understanding of the differences and disagreements that exist between themselves and the intervening environment.
2. Students will make a checklist of attitudes necessary to be successful in any occupation. They will also make a list of their own attitudes. Then, they will match these two. Thus, they can compare those attitudes they have to those they need to develop.
3. Given a list of six occupations, students will match them to the tools of the trade by drawing a line from the occupation to the correct tool used in that occupation with 80% accuracy.

UNIT II

- EDUCATIONAL GOAL:** To help develop in students the understanding that the world of work exists to meet the needs of and to provide services to society and to show their interdependency.
- CONCEPT(S):** An understanding and acceptance of self--interests, abilities, attitudes and values-- is important throughout life.
- Education and work are interrelated.
- Persons need to be recognized as having dignity and worth.
- Occupations exist for a purpose.
- There is a wide variety of careers which may be classified in several ways.
- Work means different things to different people.
- Occupational supply and demand has an impact on career development.
- Job specialization creates interdependency.
- INFORMATIONAL OBJECTIVE:** Students will demonstrate an understanding of the purposes of the world of work.

CONTENT AREAS

- Language Arts
- Social Studies

STRATEGIES

- Students will list the various subject areas in the world of work related to an occupation in their community (publishing a newspaper).
- Students will interview workers in their school and community.

RESOURCE MATERIALS

- Kit: "World of Work"
Newspapers, magazines
- School personnel,
Public Services
Film: People Who Work at Night

INFORMATIONAL OBJECTIVE: Students will demonstrate an understanding of the purposes of the world of work.

CONTENT
AREAS

STRATEGIES

RESOURCE MATERIALS

Social Studies	Students will visit nearby plants and industries to see people at work.
Language Arts	The teacher will lead pupils in a discussion as to the importance of each person on his job.
Social Studies	Students will visit an employment agency and find out what jobs are in the greatest demand, what jobs are becoming obsolete, and what jobs are new to our society.
Language Arts	Students will do research on seasonal jobs (Christmas, Thanksgiving, Easter, harvest-time, summer, etc.).

Kit: "World
of Work"

Virginia State
Employment Office,
Petersburg, Virginia

Films: Big Harvest-
The Story of Agriculture,
Wheat Farmer, New Fields
in the Old Dominion,
Orange Crowder

Suggested Student Outcomes for Unit II:

1. Students will be able to list the occupations in a school and tell why each is important.
2. Students will be able to write a job advertisement--including qualifications such as educational requirements and skills needed--using correct format.
3. Using a city map, students will be able to correctly locate and to plot the route to a selected number of businesses and industries.

UNIT III

EDUCATIONAL GOAL: To provide students with information regarding the job opportunities present in the various career clusters.

CONCEPT(S): Occupations exist for a purpose.

There is a wide variety of careers which may be classified in several ways.

Occupational supply and demand has an impact on career development.

Environment and individual potential interact to influence career development.

Occupations and life styles are interrelated.

Careers are unique to environmental location, climate and need.

Individuals can learn to perform adequately in a variety of occupations and are thereby confronted with a continuous and sequential series of choices.

INFORMATIONAL OBJECTIVE: Students will demonstrate an understanding of the differences in the career clusters.

CONTENT AREAS

STRATEGIES

RESOURCE MATERIALS

Language Arts Students will list those jobs found in the yellow pages of the telephone directory that pay the most per hour.

Language Arts Students will develop a chart of jobs found in the yellow pages which require the most skill and those which require the most education.

Occupational Outlook Handbook, telephone directory, employment ads in newspapers, Career Information brochures

INFORMATIONAL OBJECTIVE: Students will demonstrate an understanding of the differences in the career clusters.

COMMENT
AREAS

STRATEGIES

RESOURCE MATERIALS

Language Arts

Students will use newspapers, radio, television, etc. to learn about new opportunities offered by new careers.

Newspapers, radio, television, science magazines

Language Arts

Students will prepare a booklet with listings of all the jobs available and necessary to the production of any one item.

Resource person from Allied Chemical Co.

Language Arts

Students will visit an employment agency to find out what jobs are in the greatest demand, what jobs are becoming obsolete, and what jobs are new to our society.

Virginia State Employment Office, Petersburg, Virginia

Math

Students will prepare a list of all occupations which use geometry in their work activities.

School library, Television, radio and newspaper ads, Career Information Brochures

Math

Students will role play one of the many jobs which use volume and weight while the other students try to guess the job.

Math textbook, local industry resource person (supermarket workers)

Math

Students will bring in and display such items as a calendar, watch, thermometer, stamps, price tags, etc. and explain how each item is used in certain jobs for measuring purposes.

Film: Measuring-- A Way of Comparing

Science

Students will analyze the current trends in science technology in terms of how they have created new occupational areas.

Film: Chemistry and a Changing World

INFORMATIONAL OBJECTIVE: Students will demonstrate an understanding of the differences in the career clusters.

CONTENT AREAS	STRATEGIES	RESOURCE MATERIALS
Science	Students will list the many job opportunities open as a result of scientific discoveries and technological changes.	Film: <u>The Changing City</u>
Science	Students will investigate the career possibilities evolving from ecological problems created by increased population.	Newspapers, science magazines, encyclopedias
Science	Students will research current scientific discoveries and discuss the effect these discoveries will have on various careers.	Political party campaign headquarters Film: <u>Political Parties</u>
Science	Students will discuss the possibilities of raising crops on the desert and what new jobs this would create.	Social studies textbook Film: <u>New England Fisherman</u>
Social Studies	Students will conduct a mock election and investigate various occupations dealing with political parties and government.	Social studies textbook Film: <u>Transportation--Footpath to Air Lane</u>
Social Studies	Students will study the New England States and compare occupations to those found in our own area.	Film: <u>Iron Ore Mining</u>
Social Studies	Students will discuss the history of transportation and investigate the various jobs created by improving transportation.	
Social Studies	Students will study the industries involved in the collection of natural resources and the occupations these industries provide.	

Suggested Student Outcomes for Unit III:

1. Students will draw a career out of a grab bag, pantomime it, and let the class evaluate them and identify the job cluster.
2. Given ten pictures, students will classify them according to career clusters.

EDUCATIONAL GOAL: To help students understand that all work has dignity and that every worker performs a useful function.

CONCEPT(S): An understanding and acceptance of self--interests, abilities, attitudes and values-- is important throughout life.

Education and work are interrelated.

Persons need to be recognized as having dignity and worth.

Occupations exist for a purpose.

Job specialization creates interdependency.

Students will demonstrate an understanding of people and their work.

INFORMATIONAL OBJECTIVE:

COMMENT AREAS

STRATEGIES

RESOURCE MATERIALS

Social Studies

Students will study the importance of various careers in the development of our nation.

Social studies textbook:

Social Studies

Students will make a list of famous people and the importance of their careers.

Social Studies

After studying American heroes, students will identify the hero's interests and role play his occupation.

Social studies textbook

Math

Students will work with super-sets, sub-sets and intersections of sets to better understand the interdependence of occupations created by math in the world of work.

Film:
Language of Mathematics,
Math textbook

Science,
Social Studies

Students will list natural resources in the United States so as to better understand the various occupations created when these resources are put to useful purposes.

Social studies textbook, science textbook

INFORMATIONAL OBJECTIVE: Students will demonstrate an understanding of people and their work.

COMPONENT
AREAS

STRATEGIES

RESOURCE MATERIALS

Science,
Social Studies

Students will set up an assembly line for the production of items such as favors for the Jr. Red Cross in order to show how production is increased by each person doing a special job.

Film: Automation:
The Next Revolution

Science

Students will investigate and prepare a chart on the occupational opportunities available in a single hospital.

PERSONS PERSONS;
FOR HEALTH SERVICES
JOURNALS

Suggested Student Outcome for Unit IV:

After experiencing mass production (i.e. assembly line work), students will discuss why each person's job is important and what would happen if any one person were not in his place.

EDUCATIONAL GOALS: To provide students with the awareness of constant changes occurring in the world of work due to scientific and technological advancement.

CONCEPT(S): An understanding and acceptance of self--interests, abilities, attitudes and values--is important throughout life.

Education and work are interrelated.

Occupational supply and demand has an impact on career development.

Occupations and life styles are interrelated.

Careers are unique to environmental location, climate and need.

Individuals can learn to perform adequately in a variety of occupations and are thereby confronted with a continuous and sequential series of choices.

Students will demonstrate the understanding that change is continuous in the world of work.

INSTRUCTIONAL OBJECTIVE:

CONTENT AREAS

STRATEGIES

RESOURCE MATERIALS

Science

Students will research current scientific discoveries and discuss the effect these discoveries will have on various vocations.

Film: Chemistry and a Changing World

Science

Students will present an oral talk about current scientific discoveries.

Magazines, newspapers and books

Science

Students will discuss uses of agricultural products (ex. peanuts, soy beans, etc.) from individual research and research team inquiries (Allied Chemical, Hercules, Dupont, Reynolds).

Films: George M. Carver: Peanut Genius, How a Product is Made, KCV

INFORMATIONAL OBJECTIVE: Students will demonstrate the understanding that change is continuous in the world of work.

CONTENT
AREAS

STRATEGIES

RESOURCE MATERIALS

Science	Students will research agricultural innovations (reaper, harvester, cotton picker, cotton gin) that have led to the elimination of manual labor.	<u>Clothing is Made: The Story of Mass Production, From Fiber to Fabrics</u>
Social Studies	Students will set up an assembly line in order to make favors for the Red Cross.	Films: <u>The Cotton Farmer</u> , <u>Ell Whitney, Textile Factory Owners</u> Filmstrip: <u>G. V. Carver</u>
Social Studies	Students will discuss changes in modes and routes of transportation (completion, automation of jobs).	Films: <u>Transportation: Footpath to Airline, Development of Transportation</u>
Math	Students will visit a computer center.	Resource Persons: Bill Cunningham, computer Instructor at Richard Brand College; and Deane Fossum, AIIAC computer head
Math	Students will discuss the fact that most parts for computers are made in the New England states, the history of computers, and that the largest (in space) computer is at NORAD at Fort Loo.	
Math	Students will discuss the fact that memory banks and programs require less space for information storage.	

Suggested Student Outcomes for Unit V:

1. Students will select an industry and list the stages of its advancement.
2. Students will project the changes in a job choice for the next twenty years, with consideration for technological advancement (cotton pickers to cotton gin).
3. Students will discuss the various changes that will come about in health care due to the future use of computers.

UNIT VI

EDUCATIONAL GOAL: To provide students with career information to make them aware of the meaning of work and its importance to them and society.

CONCEPT(S): An understanding and acceptance of self--interests, abilities, attitudes and values--is important throughout life.

Education and work are interrelated.

Occupational supply and demand has an impact on career development.

Occupations and life styles are interrelated.

Careers are unique to environmental location, climate and need.

Individuals can learn to perform adequately in a variety of occupations and are thereby confronted with a continuous and sequential series of choices.

INFORMATIONAL OBJECTIVE: Students will prepare a system for the collection and use of occupational information in career planning and preparation.

CONTENT AREAS

STRATEGIES

RESOURCE MATERIALS

Language Arts

Students will write a paragraph comparing personal characteristics demanded by the labor market.

Language Arts

Students will research a classroom file of careers compiled by the teacher.

Science

Students will investigate and prepare a chart on the occupational opportunities available in a single hospital.

Resource Persons,
Health Services
Library

INFORMATIONAL OBJECTIVE: Students will prepare a system for the collection and use of occupational information in career planning and preparation.

CONTENT
AREAS

STRATEGIES

RESOURCE MATERIALS

Language Arts

Students will list the various occupations in the world of work related to language arts.

Language Arts

Students will interview workers in their school and community.

Language Arts

The teacher will have resource persons visit the classroom.

Social Studies

After visiting various industries in their community, students will compile and make a comparison of qualifications for and working conditions in various careers.

Language Arts

Students will write letters to local industries to gather facts about job requirements (educational and skill).

Science

Students will visit plants and/or industries to view steps in the process of making synthetic materials.

English textbook,
classroom teacher

Allied Chemical Co.,
Fiber Division,
Merdules
Film: From Fibers
to Fabric

Suggested Student Outcomes for Unit VI:

Students should select a career to research and, using all required materials available, plot a course to achieve their goal in terms of both education and experience.

UNIT VII

EDUCATIONAL GOAL: To provide students with an understanding of how people in their immediate environment can influence their attitudes, values and decision-making.

CONCEPT(S): An understanding and acceptance of self--interests, abilities, attitudes and values--is important throughout life.

Education and work are interrelated.

Environment and individual potential interact to influence career development.

Occupations and life styles are interrelated.

Careers are unique to environmental location, climate and need.

INFORMATIONAL OBJECTIVE: Students will relate what family, friends and environmental influences are being applied (positive or negative) to their career planning and preparation.

CONTENT AREAS	STRATEGIES	RESOURCE MATERIALS
Art	Students will draw a picture of one occupation of a family member or friend.	
Language Arts	Students will write a theme entitled "My Goals in Life."	Illustration: "Who Are You?"
Language Arts	Students will write a second theme entitled "What My Family Thinks of My Goals in Life."	
Language Arts	Students will write a third theme entitled "What My Family, Friends and I Can do to Help Achieve My Career Goals."	
Language Arts	The teacher will describe individual successful experiences of students and their family members and friends.	Teacher

INFORMATIONAL OBJECTIVE: Students will relate what family, friends and environmental influences are being applied (positive or negative) to their career planning and preparation.

CONTENT AREAS

STRATEGIES

RESOURCE MATERIALS

Language Arts

Students will complete a personal characteristics inventory in relation to career planning and preparation. They will then choose a member of their family or a friend who has achieved a career goal and list that person's personal characteristics.

Language Arts

Students will interview the family member or friend whose picture they drew. Students will find out what that person likes or dislikes about his job and why.

Math

Students will decide on the basic salary of this family member or friend and work out a weekly budget including transportation, food, clothing, rent and recreation.

Language Arts

From a grab bag of occupations, students will tell what they know about the occupation they draw. Peer reactions should be discussed.

Language Arts

Students will play charades, pantomiming various careers. Students will discuss their pantomime with their peers.

Art

Students will dress up as a worker of their choice. They will discuss with the class how they are or are not suited to the chosen occupation. (How does the class's approval or disapproval affect their choice?)

Art

Students will draw pictures of two of their friends at work.

Filmstrip: Working in U.S. Communities, English textbook

Cooperation from local workers to furnish tools and information

INFORMATIONAL OBJECTIVE: Students will relate what family, friends and environmental influences are being applied (positive or negative) to their career planning and preparation.

CONTENT AREAS	STRATEGIES	RESOURCE MATERIALS
Language Arts, Social Studies	Students will list and discuss occupations available in the area. Attention should be drawn to those available due to geographical conditions. Plan a bulletin board on occupations in community using newspapers, magazines and pamphlets. Lead pupils in a discussion of the importance of each occupation to the community.	Closed circuit T.V. program "Careers in Virginia" Films: <u>Oyster--Virginia Shellfish, Our Family Works Together</u>
Language Arts	Students will write letters to industries discussed to gather facts about job requirements including both education and skills needed.	English textbook, teacher
Language Arts	Students will dramatize workers on the job.	
Math	Students will compute the weekly, hourly and monthly wages of various workers.	
Math	Students will compare some job requirements in terms of time and monetary returns.	
Math	Students will list and compare fringe benefits of occupations (bonuses, raises, insurances, retirement).	
Math	Students will compute the cost of special job materials (uniforms, tools, etc).	Graves-Humphrey Catalog, Sears-Roebuck Catalog, London Uniform Company, Tandy Leather Company
Math	Students will calculate the cost of purchasing equipment for some occupation.	

THEORETICAL OBJECTIVE: Students will relate what family, friends and environmental influences are being applied (positive or negative) to their career planning and preparation.

**CONTENT
AREAS**

STRATEGIES

RESOURCE MATERIALS

Art

Students will cut out pictures of workers from magazines and newspapers showing people at work.

Magazines and newspapers

Science,
Social Studies

Students will list various occupations derived from natural resources in the state.

Students will list jobs created through the use of a combination of natural resources.

Students will visit a plant to view the steps in the production of a product.

Students will list occupations derived from agricultural products in our area.

Suggested Student Outcomes for Unit VII:

1. Students will be able to list some of the elements in their immediate environment that affect their career planning.
2. Students will play "Job for a Day." Each child will write his qualifications on a 3 x 5 card. Students qualifications and jobs in the classroom will be matched.
3. Students will be able to discriminate between the positive and negative influences on their career planning and preparation.
4. Students will make a list of occupations and survey family and friends asking them to give preferences in order (1-5). Students will then rate the list with their own personal preferences and compare those to those of their family and friends.

UNIT VIII

EDUCATIONAL GOAL: To present to students a realistic view of the world of work and to encourage them to consider their own interests, abilities, and the need to develop their potential.

CONCEPT(S): An understanding and acceptance of self--interests, abilities, attitudes and values-- is important throughout life.

Education and work are interrelated.

Persons need to be recognized as having dignity and worth.

Occupational supply and demand has an impact on career development.

Environment and individual potential interact to influence career development.

Occupations and life styles are interrelated.

Careers are unique to environmental location, climate and need.

INFORMATIONAL OBJECTIVE: Students will know that occupational competency requirements influence the kind and degree of one's educational preparation in career planning and preparation.

CONTENT
AREAS

STRATEGIES

RESOURCE MATERIALS

Math

Students will research an occupation and demonstrate through role playing how math is used in this job.

Films: Making Change for a Dollar,
Comparing--Getting Ready to Measure

Math

Students will determine the correct prices for products after comparing production costs and supply and demand for the item.

Film: It's Everybody's Business

Math

Students will visit a supermarket.

Films: Making Change for a Dollar,

INFORMATIONAL OBJECTIVE: Students will know that occupational competency requirements influence the kind and degree of one's educational preparation in career planning and preparation.

Build Our Houses

Film: Measuring and
Squaring Tools

Resource person from
a local industry such
as Brown & Williamson

Math
After participating in the construction of a mathematical device such as a geo-board, students will identify and list the skills used in its production.

Math
Students will keep a list of work activities in and out of school over a specified period of time and identify any math concepts used in these activities.

Math
Having identified the mathematical skills used by certain workers such as a cashier, surveyor, etc., students will construct a chart showing other occupations in which these skills are used.

Social Studies
After listing a variety of work activities in a career area, students will research what basic education is necessary to accomplish the activity.

Social Studies
Students will prepare an exhibit tracing the development of tools and technology and indicate the relationship between skills, tools and materials.

Social Studies
When confronted with a group of unusual hand tools, students will try to match the tool with material, operation and purpose.

Social Studies
Students will group jobs which employ transferrable skills.

INFORMATIONAL OBJECTIVE: Students will know that occupational competency requirements influence the kind and degree of one's educational preparation in career planning and preparation.

**CONTENT
AREAS**

STRATEGIES

RESOURCE MATERIALS

Social Studies	Students will develop a scale model of a factory.	Filmstrip: <u>Simple Machines</u>
Language Arts	Students will list the attitudes and skills employed in various jobs.	Kit: "Job Experience Kit"
Language Arts	Students will discuss how knowledge gained in the classroom is used in a mass production experience.	Film: <u>The Tools and Rules for Precision Measuring</u>
Language Arts	Students will analyze the nature of various work activities in terms of the language arts skills needed.	Film: <u>The Importance of Making Notes</u> Film: <u>Writing Better Business Letters</u>
Science	Students will list those occupations which require some knowledge of chemistry.	Filmstrip: <u>Understanding Chemical Change</u>
Science	Students will make models of the simple machines (wheel and axle, pulley, etc.) and explain how these simple machines are used.	Filmstrip: <u>Tools and Simple Machines</u>
Science	Students will visit a highly automated factory and observe how the simple machines are used in complicated machinery. Students will discuss what jobs these machines have made obsolete and what jobs these machines have created.	Film: <u>Machines do Work</u>

Suggested Student Outcome for Unit VIII:

Students will be able to select four or five careers and research the necessary information relating to education and/or training required to gain successful entry.

Evaluation

1. Evaluation of Understandings
 - a. Observe class participation.
 - b. Give objective-type and discussion tests.
 - c. Observe contributions to group discussions.
 - d. Administer standardized tests.
 - e. Give a pre-test and a post-test to evaluate achievement in the classroom.
 - f. Observe the students as they work on panels, give oral reports, and give written reports.
 - g. Observe behavioral changes in group and individual tasks.
 - h. Have group quizzes and discussions.
2. Evaluation of Skills
 - a. Observe the growth in reading for information.
 - b. Observe the desire to do more research.
 - c. Observe participation in writing a short play to be dramatized.
 - d. Observe a desire to read from many sources for information.
 - e. Observe how well the learner can locate places on maps and globes.
 - f. Observe the knowledge of the vocabulary of the World of Work gained from the context.
 - g. Observe growth in letter writing and spelling.
 - h. Observe growth in distinguishing between fact and opinion.

- i. Observe the creative work of the pupils done during the unit.
 - j. Observe the ability to make comparisons.
 - k. Observe how well the students discuss and interpret pictures and visual aids.
3. Evaluation of Attitudes
- a. Observe the ability to carry a fair share of the work load in a small group.
 - b. Observe the ability to observe rules established by the group.
 - c. Observe the respect shown for the ideas and feelings of classmates.
 - d. Observe the desire to share with each other.
 - e. Observe the development of an appreciation for the efforts of such workers as coal miners, farmers, and factory workers.
 - f. Observe the development of an appreciation for contributions of people in other sections of the state and the nation.

4. Teacher - Pupil Evaluation

The teacher - pupil conference can be of great help in assisting students in showing progress and growth and also in discovering particular learning problems and difficulties that they may have.

5. Pupil Evaluation

- a. The pupils may evaluate their own work by individual conferences with the teacher.
- b. The pupils will mark individual check list sheets.

PHASE I - CAREER AWARENESS

GRADE 6

MASTER UNIT - Careers - City, State, Nation and World

Introduction

The goal of education has always been to prepare students for entry into the world of work. However, statistics clearly indicate to us that there is a great void between the amount of time, money and energy put into education and the total output of trained young people capable of assuming productive roles in the world of work.

We realize our ultimate task is to provide our students with meaningful and relevant learning experiences in preparing them for meeting the challenges and opportunities of their world. The sixth grade social studies program is concerned with the study of the world in which we live utilizing the career education concept as the focus point in providing a systematic way of developing an understanding of the interdependence of nations in providing goods and services for all. Many of the various careers involved will be investigated.

The sixth grade math program is concerned with the study of mathematics as a realistic means of meeting everyday situations. It is designed as a common basis for measurement and computation, thus assuring more of a reliable source of communication. Pupils at this level begin to realize their need for and dependence upon basic operations in order to successfully compete in the world of work.

Our world is in an ever changing state and the science program has been revised to meet the scientific demands of our time. It is based on an active involvement of the children and an application of scientific knowledge in daily living. Through career education, pupils are able to develop an understanding of the interrelationships of the forces that govern our universe and of the careers that have been established to meet the needs of our universe.

Realizing that all students do not require the same type of instruction at the same time, or to the same extent, our approach to the task of teaching all of our students is through the team teaching method with the utilization of learning centers, learning stations and out-of-class resources.

The teachers, two in mathematics, science, and health and the other two in social studies and language arts developed their objectives and planned their activities and experiences so that there would be a definite correlation between instruction provided in each of the subject areas. A great amount of emphasis will be put on student participation in concrete activities for awareness and exploratory purposes.

EDUCATIONAL GOALS

1. To prepare the students by developing intellectual skills and the ability to analyze a problem and make decisions so that they will be able to adapt to the changes in their life and in their future career choices.
2. To develop in students the proper interests, attitudes, and behavior which will enable them to make choices and intelligent decisions about careers.
3. To motivate students in the study of careers and their importance in one's daily life.
4. To stress the idea that all work has dignity and every job is necessary and important.
5. To improve the performance of students in basic subject areas by making the subject matter more meaningful and relevant through unifying and focusing it around career clusters.
6. To encourage an identity with success through career orientation experiences.
7. To reinforce basic skills in the varied subject areas through real-life experiences.
8. To develop the concept of interdependency of careers on a world-wide basis.

CONCEPTS TO BE DEVELOPED

1. People are dependent upon each other for survival.
2. Work is interdependent.
3. Accepted social values and moral standards are necessary for success in any job.
4. Work is necessary for self-worth.
5. Every individual has a unique contribution to make to the world of work depending on his interests, attitudes and abilities.
6. Tolerance, respect and cooperation are essential in order to achieve success.
7. The abundance and diversity of an area's natural resources and the use to which they are put determine the level of economic development for that area.
8. Careers are unique to environment, climate, location, and need.
9. Certain services and skills are rendered worldwide.
10. As man progresses in a society, jobs are either established, altered or terminated in order to reflect man's current needs.

INFORMATIONAL OBJECTIVES

1. The students will recognize how past and present land formations influence man's choice of careers.
2. The students will identify and compare careers which study the formation of mountains and the preservation of surrounding areas.
3. The students will be able to discuss occupations which deal with valuable products found below the earth's crust.
4. The students will be able to explain some of the fundamental principles of chemistry and some of the careers that have been developed because of our highly technical society.
5. The students will investigate the problems of pollution and the jobs that are needed to correct and prevent these conditions.
6. The students will identify the problems and careers that are involved with the production, transmission, control and uses of electricity.
7. The students will be able to describe the basic principles and the problems involved in flight, sea-going vessels, and gasoline engines. The careers dealing with these principles and problems will be explored on a national basis and compared with the world.
8. The students will compare the life process of plants and animals and will become familiar with importance of careers or occupations of persons involved with plants, animals and people.
9. The students will identify the problems and careers that are involved with banking.

UNIT I

INFORMATIONAL GOALS: To prepare the students by developing intellectual skills and the ability to analyze a problem and make decisions so that they will be able to adapt to the changes in their life and in their future career choices.

CONCEPT: Careers are unique to environment, climate, location, and need.

INFORMATIONAL CONNECTIVE: The students will recognize how past and present land formations influence man's choice of careers.

11

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
Social Studies	Study famous geologists and their contributions.	Widening Occupational Poles Kit (WORK)
Social Studies	Invite a geologist to visit the class.	Extension Service, Prince George County, Virginia
Social Studies	Plan a trip to a museum to view a collection of rocks.	Smithsonian Institute, Washington, D.C.
Social Studies	Study a relief map and construct a model of Virginia in clay.	Map from U.S.
Social Studies, Language Arts	List the differences between an anthropologist and an archaeologist.	Geological Survey Office, Washington, D.C.
Social Studies, Health	Read about an anthropologist and an archaeologist.	Dictionary

WORK,
Encyclopedia of Careers and Vocational Guidance

INTEGRATIONAL OBJECTIVE: The students will recognize how past and present land formations influence man's choice of careers.

Suggested Student Outcomes for Unit I:

1. After viewing a film on rocks and working with matching exercises placing rocks in an appropriate area depending on distinct characteristics, students will be able to identify the three classifications of rocks.
2. After having collected and classified the rocks along with having studied sound effects, at least 85% of the students will be able to differentiate between the tone qualities of the classes of rocks.
3. As a result of investigations and discussions about the anthropologist, the geologist, and the archaeologist, all of the students will be able to compare and contrast at least three of their duties and qualifications.
4. Given a demonstration of the surveyor's tools and an opportunity to study them, students will be able to use three out of five of his tools to survey a given area.
5. After having viewed a film on oceanographers and discussed the terminology necessary for a career in oceanography, 80% of the students will relate and integrate oceanographic terms in appropriate life situations.
6. As a result of studying several relief maps and drawing pictures to show many of the land forms, 90% of the students will be able to construct a model of Virginia in clay.
7. Having developed an interest in the earth's transformations, having studied the careers that deal with these changes, and having experienced the drawing and reading of graphs, the students will show the archaeological expeditions since 1900 by constructing a line graph.

UNIT II

EDUCATIONAL GOAL: To develop in students the proper interests, attitudes, and behavior which will enable them to make choices and intelligent decisions about careers.

CONCEPT: The abundance and diversity of an area's natural resources and the use to which they are put determine the level of economic development of that area.

INSTRUCTIONAL OBJECTIVE: The students will identify and compare careers which study the formation of mountains and the preservation of surrounding areas.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
Social Studies, Science	Investigate the soil conservationist's occupation.	WORK, <u>Encyclopedia of Careers and Vocational Guidance,</u> <u>Virginia State College (VSC)</u>
Social Studies	Investigate the agricultural engineer's occupation.	Dictionary
Social Studies, Language Arts	Define terms associated with soil conservation: delta, dune, glacial drift, loess, sheet wash, gully, dust bowl, etc.	Filmstrips: <u>What is Conservation,</u> <u>Saving Our Soil,</u> <u>Improving Our Grasslands and Using Our Forests Wisely</u>
Social Studies	Study the forestry technician's occupation.	WORK

INFORMATIONAL OBJECTIVE: The students will identify and compare careers which study the formation of mountains and the preservation of surrounding areas.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
Social Studies	Have pupils compare the jobs of the forestry technician and the forester.	WORK, Book: <u>I Want To Be - Forester</u>
Social Studies	Invite a forest ranger or park ranger to talk about his duties.	Resource person: Park or Forest Ranger
Social Studies, Art	Construct model to show results of land erosion and compare model to Grand Canyon.	Magazines, pictures and photographs
Social Studies, Science	Study islands of Japan and discover destruction by volcanos.	Book: <u>Your World and Mine,</u> Film: <u>Volcanoes In Action</u>
Social Studies	Plan a field trip to an area where conservation techniques are being used.	Area within walking distance of school
Social Studies, Art, Science	Construct a volcano and show how land is formed by erupting volcanos.	Film: <u>Birth and Death of Mountains (551.4)</u>
Social Studies, Art, Science	Have students find examples in pictures of soil erosion around the world.	Magazines, photographs, and books, Petersburg Extension Service (4-II)
Science, Art	Have students draw pictures of still and erupting volcanoes.	

INFORMATIONAL OBJECTIVE: The students will identify and compare careers which study the formation of mountains and the preservation of surrounding areas.

COURTNEY
ADLEY

STRATEGIES

RESOURCE
MATERIALS

Social Studies, Art Make conservation posters-Smokey The Bear.

State Parks, Inc.,
Virginia Extension
Service

Social Studies, Science Have students identify the 4 Great Cordillera Regions of the world (mountain ranges).

Book: Your World And Mine,
Encyclopedia

Social Studies, Science Have students locate on a map the 4 cordillera regions.

Maps

Language Arts, Math, Social Studies, Art, Music Make up a play about a ranger and his duties and construct a stage and puppets for presenting the play.

Science, Social Studies Take a walking trip to a nearby bridge to view erosion.

A bridge within walking distance of the school

Science, Social Studies Show a film on the Continental Divide and it's formation and erosion.

Film: Rocky Mountains-
The Continental Divide

Social Studies, Language Arts Conduct a spelling contest on all occupations studied in this unit.

Social Studies Have students play games about careers and people.

Games:
"Hollywood Squares,"
"To Tell The Truth,"
"What's My Line" 6 - 1:

INFORMATIONAL OBJECTIVE: The students will identify and compare careers which study the formation of mountains and the preservation of surrounding areas.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
Science	Construct a volcano and demonstrate its operation.	Film: <u>Earthquakes and Volcanoes</u>
Science, Social Studies	Invite a soil conservationist to discuss problems of a nearby community.	Resource person: Soil Conservationist
Science	Take a walking trip to see erosion.	Film: <u>Erosion</u>
Science	Make and display pictures and drawings of mountain building.	Magazines and newspapers, Photographer
Science	Demonstrate uplifting by using cotton to show folding of the land due to pressure.	Book: <u>Concepts in Science, 6</u>
Science	View a film that explains how mountains are worn down and how they are formed.	Film: <u>Birth of a Nation</u>
Science	View a film to see a volcano in action.	Film: <u>Volcano In Action, Johnny Horizon Environmental Kit</u>
Science	Name several agents of erosion.	Book: <u>Concepts in Science, 6</u>
Science	Use a water sprinkler and an electric fan to demonstrate the effects of erosion.	
Science	Find out how a soil conservationist helps in preventing erosion.	

INFORMATIONAL OBJECTIVE: The students will identify and compare careers which study the formation of mountains and the preservation of surrounding areas.

CONTENT AREA	SUMMARIES	RESOURCE MATERIALS
Science	Identify results of erosion.	
Science	Investigate the occupations of agricultural engineers and forestry technician.	<p>WORK, <u>Encyclopedia of Careers and Vocational Guidance,</u> <u>Virginia Park, Inc.</u></p>
Science	Discuss orally how the above careers can help us.	<p>WORK, Petersburg Extension Service</p>
Science, art	Make posters pointing out some conservation problems in the pupils' localities.	
Science	Find out what conservation projects are under way or being proposed in Virginia.	<p>Resource person: Conservationist, State Soil Conservation Service</p>
Science	Compare jobs of forestry technician and forester.	<p>WORK, <u>Encyclopedia of Careers and Vocational Guidance,</u> <u>Virginia Park, Inc.</u></p>
Science, Art	Make models of clay or papier-mache to show land formations.	<p>Newspapers, pamphlets, books, magazines, pictures and films,</p>

INTEGRATIONAL OBJECTIVE: The students will identify and compare careers which study the formation of mountains and the preservation of surrounding areas.

CONTENT AREA

STRATEGIES

RESOURCE MATERIALS

models showing land formations

Compare shapes of various land formations.

Math

Film: Rocky Mountains, The Continental Divide

Construct and compute work problems dealing with mountain building and growth.

Math

Book: School Modern Math, 6

Determine the amount of money people such as agricultural engineers, foresters, forestry technicians, etc. can expect to make in a lifetime depending on their expected beginning salaries.

Math

SRA Handbook of Job Facts, Encyclopedia of Careers and Vocational Guidance

Find out approximately how much money the state of Virginia spends on soil conservation a year.

Math

Resource person: Soil Conservationist, State of Virginia Conservation Service

Construct a stage and make puppets for a Ranger Show.

Math, Art

Discuss acre-feet in relation to water.

Math

Book: Science In Our World, 5

Discuss acre-feet of water in a reservoir using given data.

Math

Book: Science In Our World, 5

INFORMATIONAL OBJECTIVE: The students will identify and compare careers which study the formation of mountains and the preservation of surrounding areas.

Find out the precautions that people must take after land and water disasters.

Newspapers and
magazines,
Resource Person:
City Engineer

Health,
Social Studies

Compare a national and a world health problem in relation to water, air, or noise. (U.S.A. and England)

World Health
Organization,
newspapers and
magazines

Suggested Student Outcomes for UNIT II

1. After having investigated the soil conservationist's occupation and having interviewed him, 80% of the students will be able to evaluate the demand for and the benefits of this career.
2. Given career identification exercises and survey sheets to complete about the soil conservationist, the agricultural engineer, and the forestry technician, the students will be able to differentiate and analyze the roles of these persons.
3. As a result of identifying flood warnings and doing an extensive study of a statewide flood disaster, the students will write letters to the city council and make suggestions for future preventive measures.
4. After having viewed some local erosion sites, seeing a film about the prevention of erosion, studying pictures of erosion problems, and working on small erosion projects at home, 95% of the students will be able to analyze the problems that are faced by people in authority who must make decisions about erosion on a large scale basis.

UNIT III

EDUCATIONAL GOALS: To develop the concept of interdependency of careers on a world-wide basis.

CONCEPT: Careers are unique to environment, climate, location, and need.

INFORMATIONAL OBJECTIVE: The students will be able to discuss occupations which deal with valuable products found below the earth's crust.

CONTENT: SUB TOPICS RESOURCE MATERIALS

Social Studies Study the manufacture and distribution of jewelry. Book: Your World and Mine

Social Studies Study the diamond extraction process in South Africa and draw a chart. Book: Man and Change

Social Studies List all occupations involved in the process. Books: Man and Change
(1) Your World and Mine
(2) Mine

Social Studies Investigate the occupation of a mining engineer. WORK

Social Studies Take a field trip to a quarry or to a mine.

Social Studies Study what a miner does - compare differences in coal and diamond mining. WORK,
Film: Republic of South Africa - Its Land & Its People (916.8)

Social Studies Study jobs needed to get the diamonds on a ship. WORK

INFORMATIONAL OBJECTIVE: The students will be able to discuss occupations which deal with valuable products found below the earth's crust.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
Social Studies	Investigate the occupation of a ship pilot.	WORK
Social Studies	Study longshoremen jobs, earnings, education, importance, and the possible results of longshoremen strikes.	WORK
Social Studies	Discuss how diamonds get to the jeweler-trucking industry.	WORK
Social Studies, Science	Study the jeweler's occupation.	WORK
Social Studies, Science	Visit a jewelry manufacturing facility.	Local Facility Petersburg, Virginia
Social Studies, Science	Visit a jewelry store and observe the types of jobs involved.	Jewelry Store
Social Studies	Invite a jeweler to the classroom with his equipment and some finished products.	Resource Person; Jeweler
Social Studies, Art	Make some simple jewelry. Polished stones, paper and beads can be used.	Resource Person; Art Student
Social Studies	Construct a display board showing how to make jewelry and the jobs and materials involved.	
Social Studies	Investigate the job of a store manager.	WORK

INFORMATIONAL OBJECTIVE: The students will be able to discuss occupations which deal with valuable products found below the earth's crust.

CONTENT
AREA

RESOURCE
MATERIALS

Social Studies	Investigate the job of a bookkeeper.	WORK
Social Studies	Investigate the job of an accountant.	WORK
Social Studies	Do job experience on the accountant.	Job Experience Kit
Social Studies	Investigate the buyer's job in the jewelry business.	WORK
Social Studies	Investigate the stock clerk's job in a jewelry store.	WORK
Social Studies	Visit a large warehouse and talk to a stock clerk.	Local facility
Social Studies	Read a story about a salesperson.	Story: <u>Joe the Retail Salesman -</u>
Social Studies	Group experience - have students try to sell each other a product they produced.	<u>What Job for Me Series</u>
Social Studies	Read material on a department store worker.	<u>Pollett Vocational Reading Series</u>
Social Studies	Do salesperson experience.	<u>Job Experience Kit</u>
Social Studies, Spelling	Learn to spell all the occupations in the jewelry industry.	

INFORMATIONAL OBJECTIVE: The students will be able to discuss occupations which deal with valuable products found below the earth's crust.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
--------------	------------	--------------------

Social Studies, Language Arts
 Make up a crossword puzzle using all the names of the occupations in the jewelry industry.

Science
 Study small individual crystals on a slide under a microscope.

Science
 Continue to add to rock collection.

Science
 Do research on gems, crystals, stalactites, stalagmites and ores.

Science
 Identify the characteristics of the three classes of rocks and examples.

Science
 Demonstrate sedimentation.

Science
 Make sedimentary rocks with container of water, sand, stone, clay and chipped wood.

Science, Language Arts
 Define key terms: rock, mineral, sedimentary, igneous, metamorphic.

Science
 View film to see the activities of the coal industry.

Math
 Define "Carat."

Dictionary

Film: Coal Country

Encyclopedia

INFORMATIONAL OBJECTIVE: The students will be able to discuss occupations which deal with valuable products found below the earth's crust.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
Math	Find out the monetary value of diamonds according to weight and size on a world-wide basis.	Encyclopedia
Math	Study about the taxes placed on imported materials, such as oil, petroleum, and minerals.	
Math	Investigate the economic value of rocks and minerals.	
Math	Make a bar graph to illustrate the number of B.T.U.'s that a pound of the given fuel can supply.	Books: <u>Science In Our World, 5.</u> <u>Modern School Math, 5</u>
Math	Interview a jeweler to find out how he determines the price of a watch.	Resource Person: Jeweler
Math	Learn to use a cash register and an adding machine.	Business Machines
Health	Describe safety precautions needed by mine workers.	Encyclopedia
Health	Become aware of the things that a safety engineer does.	WORK
Health	Determine the importance of his job.	WORK
Health	Study diseases common to persons who work below the earth's surface. Example - black lung.	Encyclopedia

INFORMATIONAL OBJECTIVE: The students will be able to discuss occupations which deal with valuable products found below the earth's crust.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
--------------	------------	--------------------

Health	Identify problems that the shortage of the earth's valuable products may present for dentists.	Encyclopedia
--------	--	--------------

Suggested Student Outcomes for UNIT III

1. After reading pamphlets, researching careers in mining, viewing films and filmstrips on mining, and having discussions and worksheet exercises on the subject, at least 85% of the students will be able to evaluate the field of mining in terms of personnel, vocabulary, processes, earnings, and desirability.
2. After researching health problems common to persons who work below the earth's surface, 90% of the students will be able to identify at least three of the problems and describe them.
3. At least 75% of the students will be able to evaluate laws that govern safe practices of underground workers after having discussed and researched these laws using news media, newspapers, magazines, and books.
4. Given worksheets on the process of oil refining, viewing films on the story of oil, and researching the cost of oil, 75% of the students will be able to analyze the process of the refinement of oil and evaluate the cost of it.
5. After viewing a film on coal and diamond mining and studying WORK briefs, 90% of the students will be able to contrast coal and diamond mining.
6. After visiting a jewelry store, studying the jewelry-making kit, consulting WORK and visiting a warehouse, at least 75% of the students will be able to analyze the process of manufacturing and distributing jewelry.

UNIT IV

EDUCATIONAL GOAL: To prepare the students by developing intellectual skills and the ability to analyze a problem and make decisions so that they will be able to adapt to changes in their life and in their future career choices.

- CONTENTS:**
- (1) The abundance and diversity of an area's natural resources and the use to which they are put determine the level of economic development for that area.
 - (2) As the population in a society, jobs are either established, altered, or terminated in order to reflect man's current needs.
 - (3) People are dependent upon each other for survival.

INFORMATIONAL OBJECTIVE: The students will be able to explain some of the fundamental principles of chemistry and some of the related careers that have become necessary because of our highly technical society.

CONTENT AREA

STRATEGIES

RESOURCE MATERIALS

Science, Art
 Science
 Science

Construct well-known molecular models by using sponge rubber, styrofoam, etc.

Define and distinguish between the terms atoms and molecules.

Experiment: Place various substances to determine whether they will or will not dissolve in water.

Film: Explaining Matter, Atoms and Molecules
Atmosphere
Atoms and Molecules
Filmstrip
Some Things Dissolve

INFORMATIONAL OBJECTIVE: The students will be able to explain some of the fundamental principles of chemistry and some of the related careers that have become necessary because of our highly technical society.

CONTENT AREA **STRATEGIES**

RESOURCE MATERIALS

Social Studies Read a group of stories about two sisters who are beauticians.
 Story: The Delso Sisters, Pollett Vocational Reading Series

Social Studies, Art Do a skit about putting on makeup.
 WORK

Social Studies Invite a cosmetologist to the classroom to demonstrate and talk about his job.
 WORK

Social Studies Investigate the barbering trade.

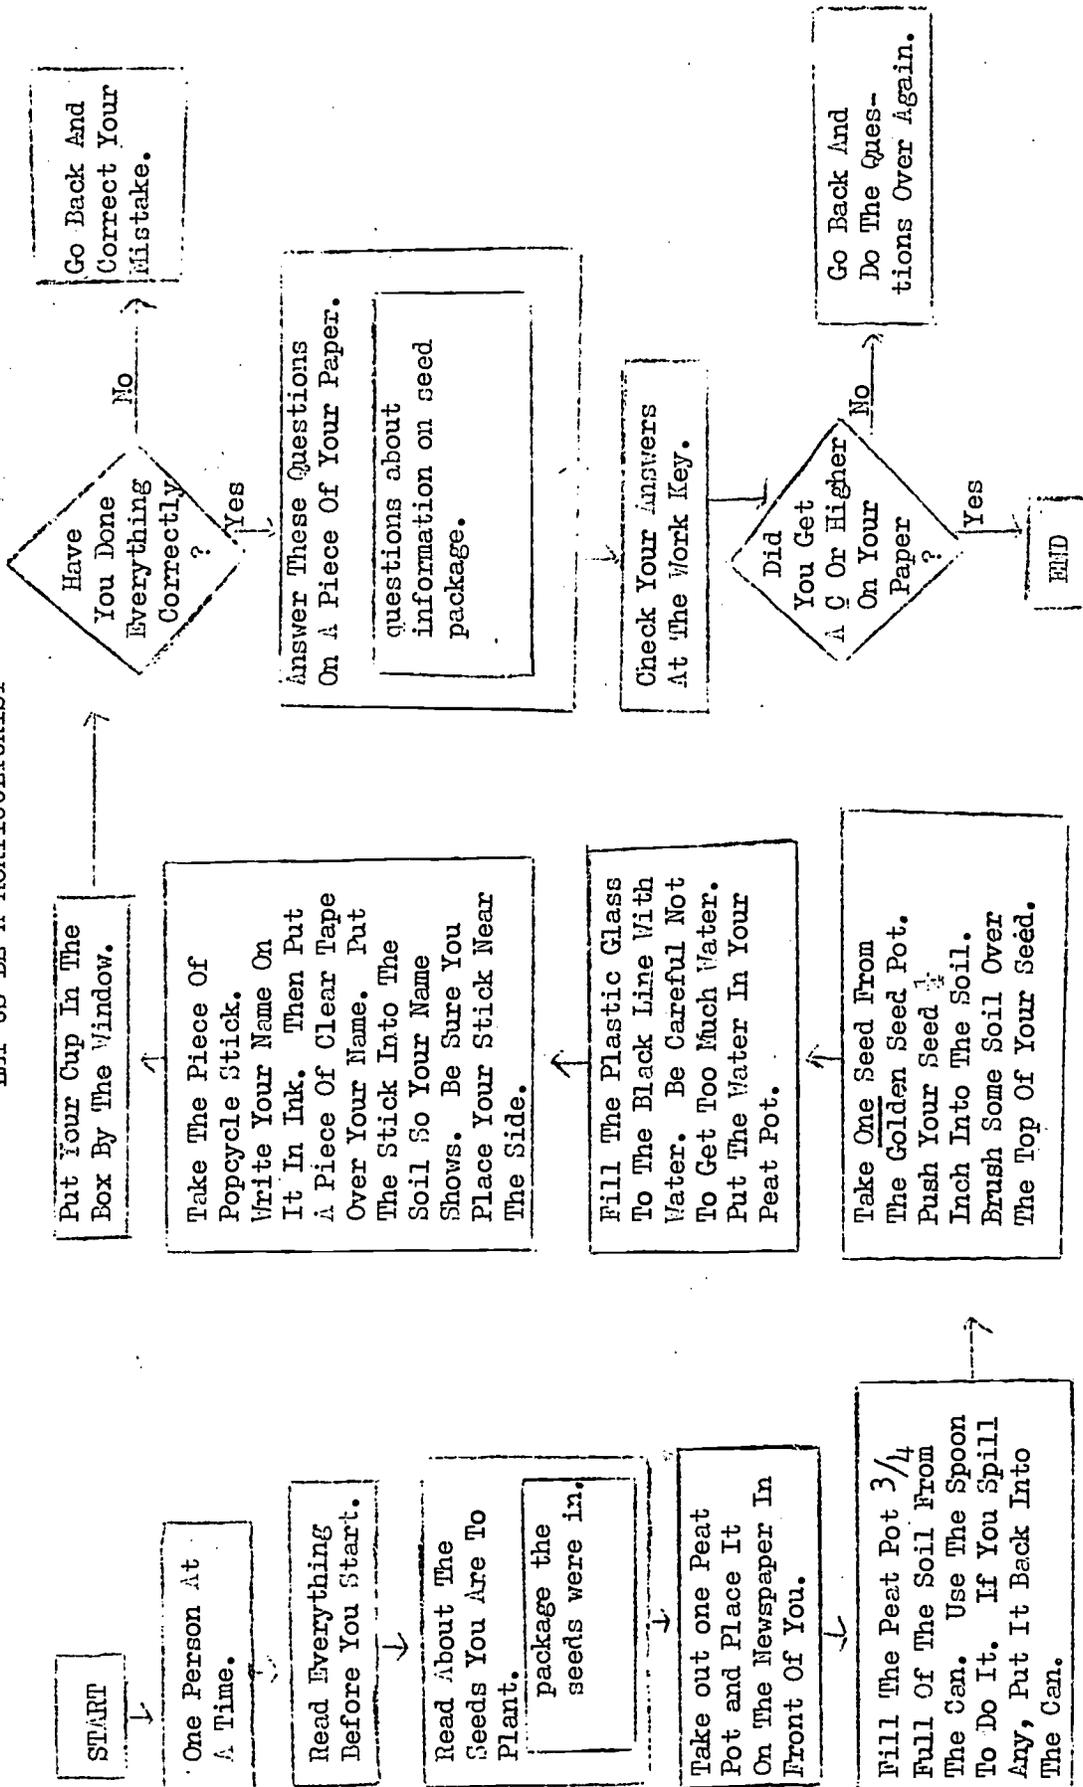

Suggested Student Outcomes for UNIT IV

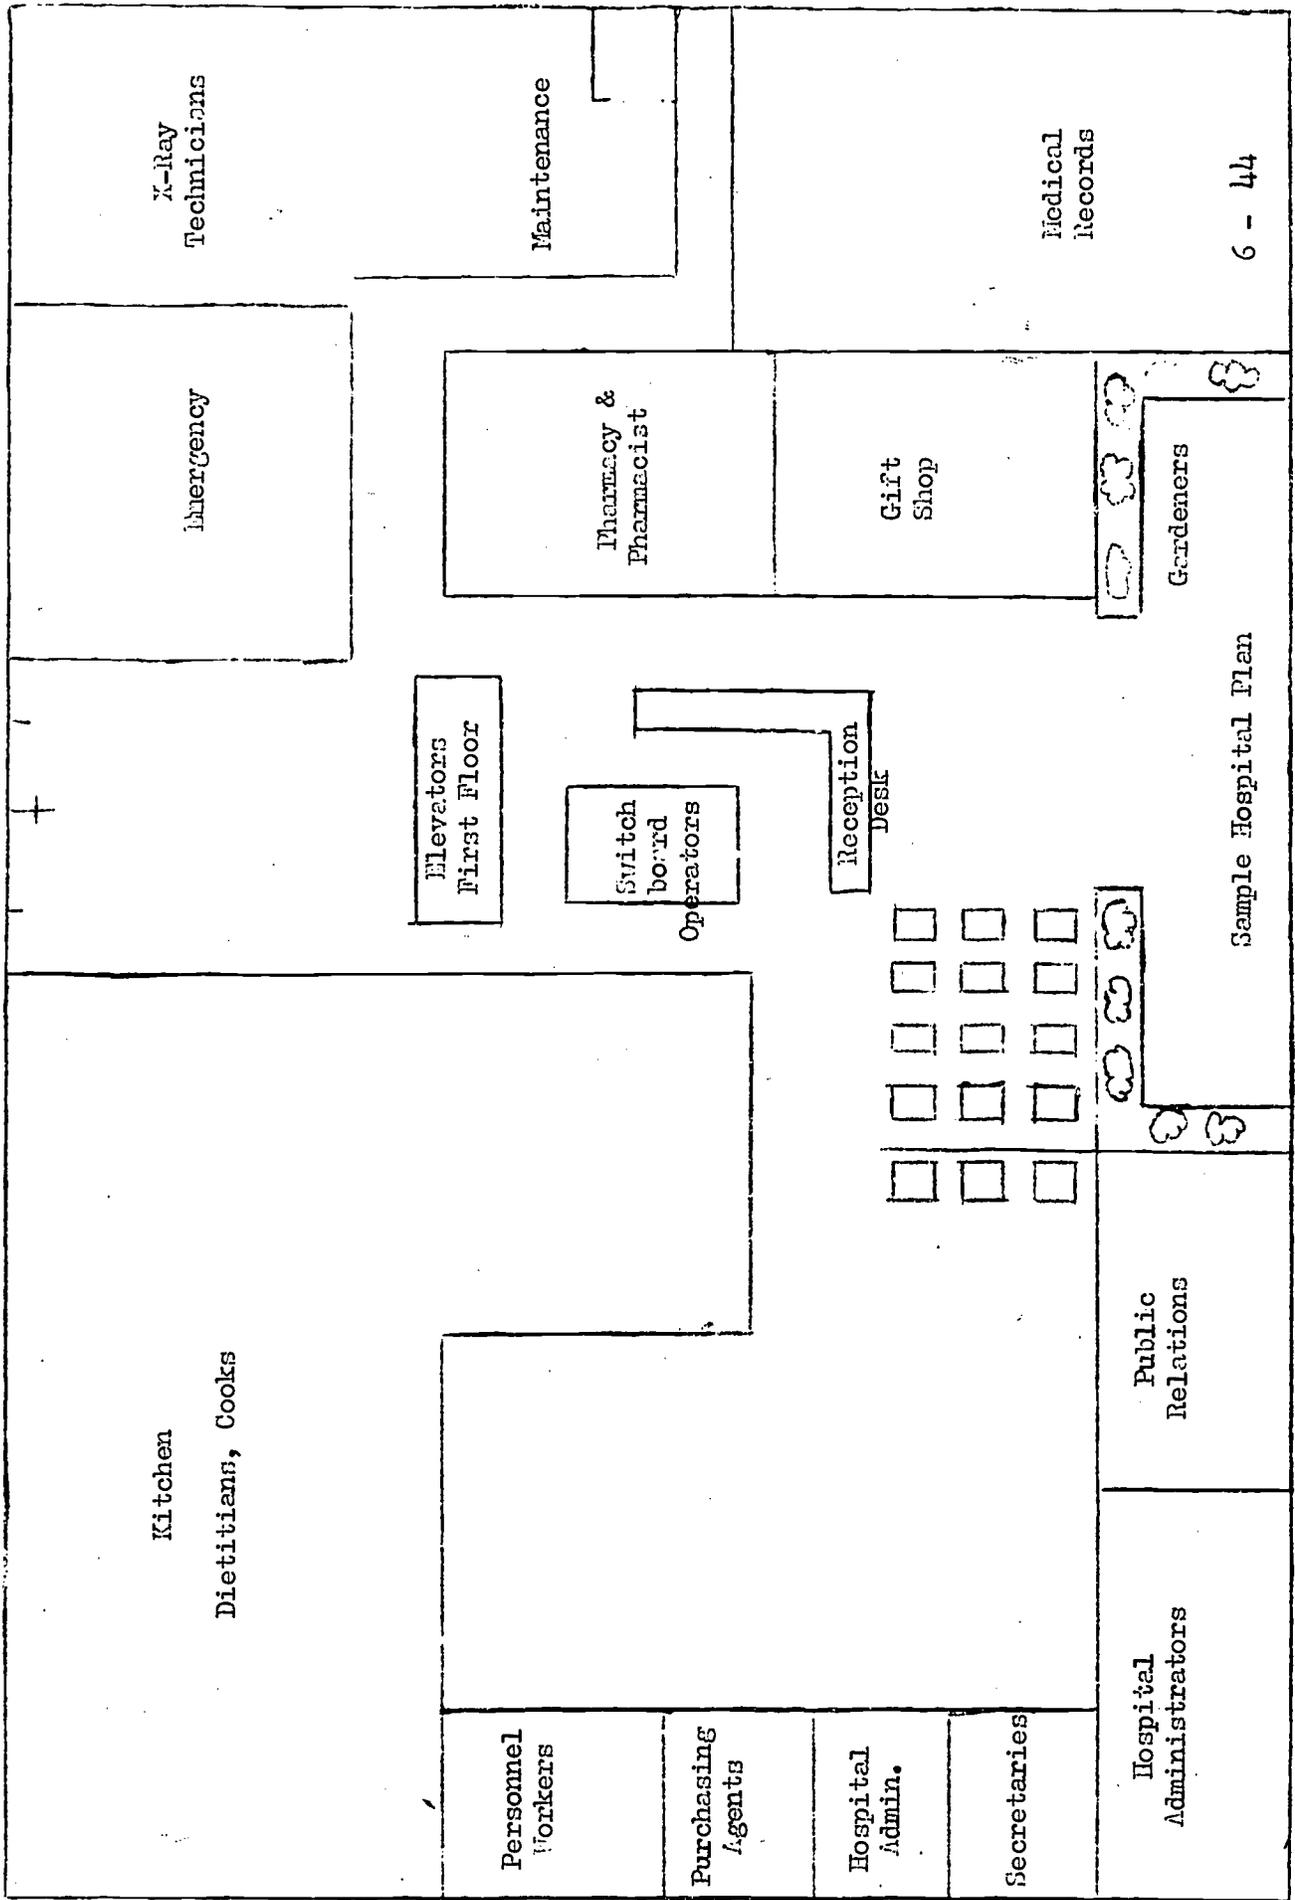

1. 90% of the students will be able to compare and contrast the careers related to the fundamental principles of chemistry after visiting a nuclear installation and interviewing persons in chemistry, viewing films on careers related to chemistry, researching, and discussing careers in chemistry.
2. After viewing a film, discussing transparencies, using worksheets, and constructing atoms and molecules, 95% of the students will be able to identify and differentiate among properties and structures of matter.
3. Given examples of physical and chemical changes and viewing experiments and transparencies involving physical and chemical changes, 85% of the students will be able to distinguish between physical and chemical changes.
4. After studying techniques of advertising in the news media, photography, and various chemical industries, at least 80% of the students will be able to analyze and intelligently evaluate and make decisions on propaganda.

DIAGRAMS

- Flow Chart
- Hospital Plan

LET US BE A HORTICULTURIST

EVALUATION

- I. Student and Teacher Evaluation
 - A. Observation of oral responses
 - B. Observation of notable changes in student behavior
 - C. Individualized (Self) Evaluation
 - D. Opportunity for self-criticism and suggestions for improvement
 - E. Survey of pupil progress
 - F. Individual student-teacher conference

- II. Intellectual Evaluation (content)
 - A. Pre - and Post - Test
 - B. Group discussions
 - C. Accomplishment of Behavioral Objectives
 - D. Standardized tests
 - E. Objective and subjective teacher-made and commercial tests.
 - F. Oral and written reports
 - G. Projects and Experiments

- III. Psycho-Motor-Skills
 - A. Dramatize and role play
 - B. Make inferences and constructively criticize
 - C. Make use of artistic ability
 - D. Do creative writing
 - E. Read and interpret details
 - F. Do cursive writing
 - G. Make use of map skills
 - H. Analyze, evaluate, and make decisions
 - I. Distinguish between fact and opinion
 - J. Compare and contrast situations
 - K. Oral Expression

EVALUATION
(Continued)

IV. Affective (Attitudes, Appreciations, Values)

- A. Open-ended statements
- B. Attitude Surveys (Interests)
- C. Sociograms
- D. Observation of students' appreciation of the dignity and self-worth that stems from all work
- E. Observation of students' attitudes toward rules and regulations
- F. Observation of level of tolerance towards self and others
- G. Observation of accepted social behavior (promptness, dependability, neatness, cooperation)

V. Student Career Evaluation

- A. Make booklet of work on careers
- B. Set up displays and construct models
- C. Dramatize problems in certain occupations
- D. Play games that test pupil vocabularies
- E. Role play different occupations
- F. Make bulletin boards
- G. Panel discussions

INTRODUCTION

The seventh grade Career Awareness program is aimed at developing five major educational goals. Goals one and two are concerned with the student understanding himself through learning about his own abilities and interests and the economic aspects of life. Goal three stresses man's acceptance of the dignity of all honest work. The next sequential step in development is to understand the elements which make up and affect community growth and well-being. This comprises goal four. After the student has moved outward from studying himself and his community, he will investigate career opportunities at the state level.

The instructional method used in the seventh grade program varies. The activities described may be used with the entire class, in groups, learning centers or other class organizations.

This seventh grade program is divided into subject areas with individual informational objectives. This was done to fit a departmentalized scheme. However, this program could be easily adapted to either a self-contained or team-teaching situation.

EDUCATIONAL GOALS

1. To aid students in developing those interests, attitudes, abilities and behaviors which will enable them to make intelligent decisions concerning careers--realizing the relationship between self-awareness and career goals.
2. To aid students in developing an awareness of the long and short-range effects of different alternatives pertaining to the economic aspects of life.
3. To stress the idea that the dignity of honest work and man's interdependence make every job necessary and important.
4. To understand the elements that make up a community and the factors which will affect the growth and well-being of the community.
5. To know where there are large groups of people in Virginia and the relationships between these groups of people and career opportunities.

CONCEPTS

1. Self-awareness is concerned with a knowledge of one's individual interests, attitudes, abilities and behaviors.
2. Self-awareness will enable the student to make self-fulfilling career decisions.
3. Technological, sociological and economic changes affect careers.
4. An awareness of the short-range economic aspects of life affect the individual in his career decision and life style.
5. All honest work has dignity.
6. Due to economic interdependence, every job is necessary and important.
7. Elements of all fifteen job clusters are present in a community.
8. The growth and well-being of the community are dependent upon the fifteen job clusters.
9. There is a relationship between population density and career opportunities.

PIECE II - CAREER AWARENESS

GRADE 7 - Reading

MASTER UNIT -- Careers: City, State and Nation

FUNCTIONAL OBJECTIVES

RAMBLIC: The student will be able to choose career clusters as related to his current interests, attitudes, abilities and behaviors.

The student will be able to enumerate some significant effects of advances in technology, sociology and economics on careers.

UNIT I - READING

EDUCATIONAL GOALS:

To aid students in developing those interests, attitudes, abilities and behaviors which will enable them to make intelligent decisions concerning careers--realizing the relationship between self-awareness and career goals.

CONTENT(S):

Self-awareness is concerned with a knowledge of one's individual interests, attitudes, abilities and behaviors.

Self-awareness will enable the student to make self-fulfilling career decisions.

INFORMATIONAL OBJECTIVE:

The student will be able to choose career clusters as related to his current interests, attitudes, abilities and behaviors.

CONTENT AREA

STRATEGIES

RESOURCE MATERIALS

Reading

Read Unit III, "Man Himself."

Discuss individual stories of the unit.

Develop skills in determining the meaning of words according to context clues.

View film.

Construct or put up a bulletin board consisting of words describing interests, abilities and values.

Read about various careers from library books.

Observe and talk with workers on the job.

Textbook: Adventures For Readers, p. 90

Film: Attitudes and Occupations

Magazines, newspapers

Library

INSTRUCTIONAL OBJECTIVE: The student will be able to choose career clusters as related to his current interests, attitudes, abilities and behaviors.

COURSE
AREA

STRATEGIES

RESOURCE
MATERIALS

Reading

Bring in resource persons from different areas of work.

Resource persons,
parents

Role play in the classroom.

Engage in part-time work and react orally (baby sitting, moving lawns, stock clerk, etc.).

Attend educational events outside of school (science, agriculture or auto shows, plays, art exhibits, industrial displays).

Suggested Student Outcomes for Unit 1:

1. The students will read stories and identify with characters with 80% accuracy.
2. Given words in context, 80% of the students will be able to determine their meanings.
3. Having read and discussed stories, 80% of the students will comprehend the printed materials.

Suggested Evaluation Procedures for Unit 1:

1. Teacher observation of students as they read stories.
2. Students' written descriptions of "self."
3. Students' selections of meanings of words appropriate to how they are used in context.
4. Students' participations in discussions.

UNIT II - READING

EDUCATIONAL GOAL: To aid students in developing an awareness of the long and short-range effects of different alternatives pertaining to the economic aspects of life.

CONCEPT(S): Technological, sociological and economic changes affect careers.

An awareness of the short-range economic aspects of life affect the individual in his career decision and life style.

INFORMATIONAL OBJECTIVE: The student will be able to enumerate some significant effects of advances in technology, sociology and economics on careers.

CONTENT AREA

STRATEGIES

RESOURCE MATERIALS

Reading

Read "Mother For Mayor."

Discuss the problem of the play.

Dramatize the play.

Develop work study skills.

Read "Revolt of Machine."

Discuss the story.

Develop skills in matching idioms with the ordinary sense of the word.

Listen to tapes.

Textbook: Adventures For You

Textbook: Adventures For You

Tapes: Conquering Obstacles ("Helen Keller" and "Thomas Edison")

INFORMATIONAL OBJECTIVE: The student will be able to enumerate some significant effects of advances in technology, sociology and economics on careers.

CONTENT
AREA

STRATEGIES

RESOURCE
MATERIALS

Reading

Divide into three or four "buzz" groups.

Discuss how the lack of modern technology would affect our lives (choose the area of communication for discussion).

Students will write out their discoveries.

View films.

Films: The Changing City, Automation: What It Is and What It Does

Discuss the effects of a changing city and the future implications of increasing automation.

Explore alternative careers for people in obsolete occupations (discuss skills which carry into other careers, list family of jobs with similar job requirements).

Reference books

Encourage original poems on the displaced persons (local grocer, local farmer, milkman, iceman).

Encourage writing of a skit on the displaced local grocer (emphasize the introduction of the large supermarket versus the local store, correlate the loss of services of the small farmer and the local grocer).

Suggested Student Outcomes for Unit II:

1. The students will be able to enumerate significant effects of advances in technology with 80% accuracy.
2. The students will be able to match idioms with the ordinary sense of the word with 90% accuracy.
3. The students will be able to comprehend through listening activities with 90% accuracy.

Suggested Evaluation Procedures for Unit II:

1. Teacher observation of student participation in discussion.
2. Teacher evaluation of word-study exercises.

FILMS

Attitudes and Occupations - Coronet Films

Automation: What It Is and What It Does - Coronet Films

Changing City, The - Churchill Films

TAPES

Work-Widening Occupational Roles Kits. Chicago, Illinois: Science Research Associates, 1972.

PHASE II - CAREER AWARENESS

GRADE 7 - Language Arts

MASTER UNIT - Careers: City, State and Nation

INFORMATIONAL OBJECTIVES

LANGUAGE ARTS:

The students will analyze and evaluate themselves in terms of abilities, interests, attitudes and behaviors in order to make self-fulfilling career decisions.

The students will identify and analyze a wide range of career clusters.

Through written themes, newspaper advertisements, dramatizations and oral communication, students will demonstrate a knowledge of how changes have affected the career decisions and life styles of individuals.

The students will analyze and familiarize themselves with terminology prevalent in credit contracts and job applications.

UNIT I - LANGUAGE ARTS

EDUCATIONAL GOAL: To aid students in developing those interests, attitudes, abilities and behaviors which enable them to make intelligent decisions concerning careers--realizing the relationship between self-awareness and career goals.

CONCEPT(S): Self-awareness is concerned with a knowledge of one's individual interests, attitudes, abilities and behaviors.

SELF-AWARENESS will enable the student to make self-fulfilling career decisions.

INFORMATIONAL OBJECTIVE: The students will analyze and evaluate themselves in terms of abilities, interests, attitudes and behaviors in order to make self-fulfilling career decisions.

CONTENT AREA

STRATEGIES

RESOURCE MATERIALS

Language Arts

In a paragraph entitled "My Own Thing," students will describe themselves in terms of personality, abilities, interests, attitudes and behaviors.

Skill - mechanics of English composition

Emphasizing the fact that people are different but also alike in many ways, the students will list ways in which they are alike and different.

Skill - word formation, making comparisons using adjectives and adverbs

Students will describe "self" as they would like to be.

Students will list their hobbies, free-time activities and school activities, then tell why each was chosen.

Skill - composition, reporting

Film: Writing A Good Paragraph

Textbook

INFORMATIONAL OBJECTIVE: The students will analyze and evaluate themselves in terms of abilities, interests, attitudes and behaviors in order to make self-fulfilling career decisions.

**COMMENT
AREA**

STRATEGIES

**RESOURCE
MATERIALS**

Language Arts

Students will identify their academic strengths and weaknesses through tests and records.

Skill - decision-making

Students will write themes describing good jobs they have done that they believe have benefited someone.

Skill - mechanics of English composition

After reading several work briefs, students will evaluate them in terms of their own interests and abilities and decide which ones would be their career choices and why.

Skill - decision-making and evaluation

Students will identify and select information which contains the specific knowledge required for their tentative career choice.

Skill - decision-making

Students will write letters of invitation, business letters for information and materials, letters of application for jobs, thank-you letters for materials and services, and friendly letters.

Skill - correct forms for writing business and friendly letters

Students will engage in various aspects of job hunting and applying and securing employment through the use of newspaper ads, bulletins, radio and human resources.

Skill - reading and evaluating ads, listening to radio, television and resource people, making introductions, using the telephone correctly

Students will make and engage in job interviews.

Skill - oral expression

Teacher tests,
cumulative records

Kit: Work-Widening
Occupational Roles,

Kit: Work-Widening
Occupational Roles, Job
Family Booklets, Health
Careers

Textbook

Local newspapers,
Resource people

Suggested Student Outcomes for Unit I:

1. All students will analyze and evaluate themselves in terms of abilities, interests and attitudes by responding to questionnaires and through oral and written discussions.
2. All students will make and respond to interviews through role-playing.
3. All students will have a workable knowledge of job hunting and applying and securing employment through the use of ads, writing letters of application and making interviews.

UNIT II - LANGUAGE ARTS

EDUCATIONAL GOAL:

To aid students in developing those interests, attitudes, abilities and behaviors which will enable them to make intelligent decisions concerning careers -- realizing the relationship between self-awareness and career goals.

CONCEPT(S):

Self-awareness is concerned with a knowledge of one's individual interests, attitudes, abilities, and behaviors.

Self-awareness will enable the student to make self-fulfilling career decisions.

INFORMATIONAL OBJECTIVE:

Students will identify and analyze a wide range of career clusters.

CONTENT AREA:

STRATEGIES

RESOURCE MATERIALS

Language Arts

Students will discuss and write about work done during vacation and after school

Skill - oral expression, mechanics of writing

Students will list and discuss the occupations of family members.

Skill - oral expression, rising nouns

Students will identify and locate industries in the tri-city area.

Skill - map reading, following directions, locating places

Students will take field trips to local industries and places of business to see people at work.

Skill - listening, observing, reporting

Students will read, survey and discuss the career clusters involved in their field trips.

Skill - Researching, organizing

Family members

City maps

Brown & Williamson,
Continental Can Co.,
Holde's Bakery,
City Library

Booklets: What Job For Me, Job Family Booklets, Your Job and Your Future-

Vols. I and II, 7 - 17

INFORMATIONAL OBJECTIVE: Students will identify and analyze a wide range of career clusters.

COMMENT
AREA

STRATEGIES

RESOURCE
MATERIALS

Language Arts

Students will interview different workers to better understand their work.

Skill - interviewing

Students will write letters to Chamber of Commerce, local industries and employment office to secure a list of job opportunities.

Skill - correct forms for letter writing

Students will listen to representatives of different careers.

Skill - listening, questioning

After selecting careers of their choice, students will read and record important information about each.

Skill - reading and comprehension, summarizing and organizing material read

Students will visit libraries to select books and other reference materials on occupational opportunities in the community and state.

Skill - use of the library, decision-making

Resource persons

Kit: Work-Widening Occupational Roles

Textbook

Company representatives, parents

Kits: Work-Widening Occupational Roles, Health Careers

Booklets: Job Family

Booklets, Job Attitude;

A Job That Goes Someplace, My Educational Plans

Libraries in school, city and room;

Reference books,

Booklet: Job Attitudes;

Liking Your Job

INFORMATIONAL OBJECTIVE: Students will identify and analyze a wide range of career clusters.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
Language Arts	Students will construct charts relating careers, educational requirements and school subjects. <u>Skill</u> - making charts	

Suggested Student Outcomes for Unit II:

1. Students will be able to identify the fifteen career clusters and will be able to list at least three jobs in each cluster.
2. Students will be able to list at least three careers that they think will be self-fulfilling and tell why each career was listed.
3. Eighty-five percent of the students will be able to select at least three career choices and to relate them to their abilities, interests and attitudes.

UNIT III - LANGUAGE ARTS

EDUCATIONAL GOAL:

To aid students in developing an awareness of the long and short-range effects of different alternatives pertaining to the economic aspects of life.

CONCEPT(S):

Technological, sociological and economic changes affect careers.

An awareness of the short-range economic aspects of life affect the individual in his career decision and life style.

INFORMATIONAL OBJECTIVE:

Through written themes, newspaper advertisements, dramatizations and oral communication, students will demonstrate a knowledge of how changes have affected the career decisions and life styles of individuals.

CONTENT AREA

STRATEGIES

RESOURCE MATERIALS

Language Arts

List jobs that are now obsolete (for example switchboard operator, blacksmith, iceman, etc.).

Write newspaper want ads for two of the jobs in the above activity.

Skill - mechanics of writing

Bring in newspaper ads for jobs of today and contrast these with the ads in the above activity.

Skill - oral expression

Write a theme telling why some job is obsolete.

Skill - research methods, mechanics of writing

Contrast communication media of yesterday with today in terms of career opportunities in the present and past.

Skill - research methods, mechanics of writing, public speaking, making charts

Local newspapers

Encyclopedias

Films: Television Serves the Community, Pony Express in America's Growth, The Mailman

7-21EA

INFORMATIONAL OBJECTIVE: Through written themes, newspaper advertisements, dramatizations and oral communication, students will demonstrate a knowledge of how changes have affected the career decisions and life styles of individuals.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
Language Arts	<p>Analyze new and obsolete words brought about by technological, sociological and economic changes.</p> <p><u>Skill</u> - research methods, dictionary skills, word analysis</p> <p>Make charts showing modern communication media and the career opportunities provided by each.</p> <p><u>Skill</u> - research methods, chart making</p>	<p>Kit: <u>Work-Widening Occupational Roles</u></p>

Suggested Student Outcome for Unit III:

1. Given a list of careers, all students, with an 80% degree of accuracy, will be able to point out careers that are obsolete.

UNIT IV - LANGUAGE ARTS

EDUCATIONAL GOAL: To aid students in developing an awareness of the long and short-range effects of different alternatives pertaining to the economic aspects of life.

CONCEPT(S): Technological, sociological and economic changes affect careers.

An awareness of the short-range economic aspects of life affect the individual in his career decision and life style.

INFORMATIONAL OBJECTIVE: Students will analyze and familiarize themselves with terminology prevalent in credit contracts and job applications.

CONTENT AREA

STRATEGIES

RESOURCE MATERIALS

Language Arts

Examine credit contracts to study terminology.

Skill - dictionary skills, word analysis

Fill in job applications.

Role play for job interviews.

Skill - oral expression

Make charts showing the terminology and meaning used in contracts.

Skill - word analysis, chart making

Discuss and record qualifications needed to obtain credit.

Skill - oral and written expression

Invite representatives from credit stores and credit unions to talk to the class about credit.

Skill - listening

Credit contracts from local businesses

Job applications from local businesses

Resource persons

INFORMATIONAL OBJECTIVE: Students will analyze and familiarize themselves with terminology prevalent in credit contracts and job applications.

COURSE
AREA

STRATEGIES

RESOURCE
MATERIALS

Language Arts

Invite representatives from the employment agencies to talk to the group about employment, how to fill out employment applications.

Apply for Social Security numbers which are needed for employment.

Skill - letter writing

Resource persons

Suggested Student Outcomes for Unit IV:

1. At least 90% of the students will have a working knowledge of contract terminology.
2. At least 75% of the students will correctly fill out job applications.

FILMS

Writing Better Business Letters - Coronet Films

Writing Better Social Letters - Coronet Films

PHASE II - CAREER AWARENESS

GRADE 7 - Social Studies

MASTER UNIT - Careers: City, State and Nation

INFORMATIONAL OBJECTIVES

SOCIAL STUDIES: The student will be able to demonstrate an awareness of his interests, abilities, strengths and weaknesses.

The student will be able to enumerate some specific effects of changes in technology on the quality of life and careers.

UNIT I - SOCIAL STUDIES

EDUCATIONAL GOAL: To aid students in developing those interests, attitudes, abilities and behaviors which will enable them to make intelligent decisions concerning careers--realizing the relationship between self-awareness and career goals.

CONCEPT(S): Self-awareness is concerned with a knowledge of one's individual interests, attitudes, abilities and behaviors.

INFORMATIONAL OBJECTIVE: The student will be able to demonstrate an awareness of his interests, abilities, strengths and weaknesses.

CONTENT AREA

STRATEGIES

RESOURCE MATERIALS

Social Studies

Students will bring their favorite recording to class accompanied by album covers, lyrics, etc. Students will decide what values are implied by the song, what values they share with the songwriter, what similarities they share with the singer, etc.

Records, lyrics, album covers

Students will complete open-ended case studies which involve making value choices (choosing between respect for law or loyalty to brother). Answers will be discussed and values behind decisions listed.

Case studies

Students will play a "reaction game." Isolate 5 students from the classroom. Students individually will return to room and be faced with a class-picked situation. A student can keep tally of reactions. What needs are being met by the reactions?

Students will listen to several resource persons from the local high school describing and showing pictures of various courses of study. Students ask question.

Resource person

INFORMATIONAL OBJECTIVE: The student will be able to demonstrate an awareness of his interests, abilities, strengths and weaknesses.

COMMENT
AREA

STRATEGIES

RESOURCE
MATERIALS

Social Studies

Students will take a field trip to the high school and mark tally sheet of interests seen at high school on scale of 1-6. (photography, woodcutting, journalism, etc.).

Students will visit "Career Corners" and experiment with various paraphernalia and information concerning a career cluster. Students will keep lists of abilities necessary for various careers.

Students will read unit "Man as an Individual" and answer the accompanying questions.

Students will read about careers in which they are interested and will write a report of the requirements and procedures for obtaining employment in one of these careers.

Students will fill out an interest inventory.

Students will list their academic subjects plus one or two hobbies or sports into categories of "Excellent," "Good" or "Poor." From this list they will rank a tentative career list according to their abilities.

Information and paraphernalia concerning a career cluster

Textbook: pages 4-78

Books: Open Door Books

Suggested Student Outcomes for Unit I:

1. All students will be able to successfully complete an interest inventory list.
2. All students will be able to successfully list their subjects, hobbies and sports and rank them as "Excellent," "Good" or "Poor."
3. All students will be able to list at least five careers that suit their abilities and interests.

Suggested Evaluation Procedures for Unit I:

1. Teacher's observation of pupil progress in forming interests and recognizing abilities.
2. Written inventory forms.

UNIT II - SOCIAL STUDIES

- EDUCATIONAL GOAL:** To aid students in developing an awareness of the long and short-range effects of different alternatives pertaining to the economic aspects of life.
- CONCEPT(S):** Technological, sociological and economic changes affect careers.
- An awareness of the short-range economic aspects of life affect the individual in his career decision and life style.
- INFORMATIONAL OBJECTIVE:** The student will be able to enumerate some specific effects of changes in technology on the quality of life and careers.

CONTENT AREA

STRENGTHS

RESOURCE MATERIALS

Social Studies

Students will list the uses of water in a more primitive society such as Jamestown, Virginia's first settlement.

Students will construct either a diorama or a model of the Jamestown village illustrating what basic needs water was satisfying (source of food, transportation, drinking water, irrigation, cleanliness, etc.).

Students will view film.

Students will have a "Parade of Careers" in which they will assume the role of different settlers from Jamestown whose careers are connected with water. Each "settler" in the parade will assume the proper dress for his career, report to the class what duties and tasks are involved in his job and describe how his life style would be affected.

Textbook: Virginia History, Government, Geography

Film: Jamestown-The First English Settlement in America

INFORMATIONAL OBJECTIVE: The student will be able to enumerate some specific effects of changes in technology on the quality of life and careers.

**CONTENT
AREA**

STRATEGIES

**RESOURCE
MATERIALS**

Social Studies

Students will look at pictures of water in its various forms in the community in which they live. (This can be displayed on a bulletin board or in a learning center). Students will make a list of the uses of water in their community, putting a star next to those that have not changed since the Jamestown settlement.

Those uses of water that have changed since the Jamestown settlement will be put on the board. The class will be divided into groups. Each group will be assigned a part of this list. The group will do research to determine how technology has played a part in changing the uses of water. How have these uses changed the life styles of people?

Students will again have a "Parade of Careers" in which they will assume the work roles of community people whose careers are connected with water. "Workers" will describe their jobs to the class and either tell about or role-play some of the aspects of their life styles.

Students will draw a series of pictures or a mural which will illustrate the changes technology has made on the uses of water and on the life styles of man.

Students will set up a model community of the future. In this model they will show imaginary changes in technology as they would affect the use of water and the changes these would make on the people's life styles and careers.

Pictures displayed
on bulletin board
or in learning center

Textbook: Pages 4-70
Encyclopedias

Suggested Student Outcomes for Unit II:

1. In a mural or series of pictures reflecting a contrast in man's past use of a resource (water) and the present use of this resource, the student will demonstrate his knowledge of technology's effect on man's life style and career.
2. In building a model community of the future reflecting the change of technology from today, the student will demonstrate and apply his knowledge of technology on man's life style and career.
3. The student will be able to list at least five specific effects of the advances of technology on man's life style and at least five effects of changing technology on careers.

Suggested Evaluation Procedures for Unit II:

1. Teacher observation of student progress in completing projects.
2. Teacher observation of student progress through listening to students during conversations and discussions.
3. Written test or quiz in which teacher evaluates progress of students.

TAPES

My Educational Plans, Job Family Booklets, What Job For Me, Your Job and Your Future. Manchester, Mo.: McGraw-Hill Book Co., 1972.

KITS

Work-Widening Occupational Roles Kits. Chicago, Illinois: Science Research Associates, 1972.

PHASE II - CAREER AWARENESS

GRADE 7 - Math

WINTER UNIT - Careers: City, State and Nation

INFORMATIONAL OBJECTIVES

NAME: The student will be able to choose job clusters as related to his interests, attitudes, abilities, and behaviors.

The student will investigate the aspects of financial management.

UNIT I - IAAE

EDUCATIONAL GOAL: To aid students in developing those interests, attitudes, abilities and behaviors which will enable them to make intelligent decisions concerning careers--realizing the relationship between self-awareness and career goals.

CONCEPT(S): Self-awareness is concerned with a knowledge of one's individual interests, attitudes, abilities and behaviors.

Self-awareness will enable the student to make self-fulfilling career decisions.

The student will be able to choose job clusters as related to his interests, attitudes, abilities and behaviors.

CONTENT AREA

STRATEGIES

RESOURCE MATERIALS

Math

View and discuss film.

Film: Choosing Your Occupation

View and discuss filmstrip.

Filmstrip: Your Personality - The You Others Know

Listen to a counselor or personnel director talk about attributes employers look for in hiring.

Counselors from Peabody High School

Figure hourly, weekly and yearly income of jobs within a cluster.

Want ad section of daily newspapers

Understand numerical values in graphs, charts and tables. For example, read dimensions on drawings, determine distances on maps; locate streets by coordinates on city map.

City maps of Petersburg, Textbooks: pages 84, 86, 87, 312, 314 Blueprints

INFORMATIONAL OBJECTIVE: The student will be able to choose job clusters as related to his interests, attitudes, abilities and behaviors.

COMMENT AREA	STRATEGIES	RESOURCE MATERIALS
Math	<p>Estimate numerical quantities. For example, estimate areas of geometric figures such as rectangles. Estimate width of streets, size of windows.</p> <p>Compare numerical values. For example, compare common fractions, areas of two geometric figures, prices of magazine subscriptions with news store costs.</p> <p>Visit a computer center.</p> <p>Perform calculations and transactions involving money. For example, figure simple totals for purchases, wages, taxes, etc.</p> <p>Measure things around the classroom to have students become aware of fractional parts of an inch.</p> <p>Relate fractions to the world of work by having students find how the workers listed below use fractions in their work.</p> <p>carpenter painter housewife mechanic seamstress wallpaper hanger</p> <p>Make bar graphs depicting the distribution of employed persons according to occupational families.</p>	<p>Geoboards, rubber bands, yarnsticks</p> <p>Textbook: pages 186, 265-271, pamphlets from mail order houses, telephone</p> <p>Virginia State College's computer center</p> <p>Transparencies, typical payroll check stubs with explanation of entries, daily papers, catalogs, Textbook: pages 166-167</p> <p>Variations</p> <p>Resource persons from the community</p>

INFORMATIONAL OBJECTIVE: The student will be able to choose job clusters as related to his interests, attitudes, abilities and behaviors.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
Math	Complete crossword puzzle which emphasizes how mathematics is related to a wide variety of occupations. Compute student's absenteeism and tardiness to show what it would cost the company if he were working and have the students discuss their findings.	Sample attached Sample attached

Suggested Student Outcomes for Unit I:

1. Students will successfully complete 80% of the enclosed crossword puzzle to demonstrate a knowledge of math terms and related occupations.
2. Students will perform calculations involving money with an 80% degree of accuracy.
3. Students will construct bar graphs depicting the distribution of employed persons according to occupational families.

Suggested Evaluation Procedures for Unit I:

1. Observation
2. Puzzle
3. Student participation in discussions

ABSENCE ON THE JOB

1. How many days have you been absent this semester?
2. What were the reasons for absence?
3. If you earned \$1.60 an hour, and were absent for an 8-hour day, how much would you:
 - a. Lose in a day?
 - b. Have lost for the semester so far?
4. If you were an employer, how would you feel about people who were absent from work very often?
5. Could your attendance record be improved?

CLUES:

Across

1. Amount of surface
3. Not exactly divisible by two; opposite of even
4. That proportion of a circular arc intercepted by such lines
6. The name of the sixteenth Greek letter; also found in the formula for area of a circle
7. Person who conducts his work receiving and lending money
8. A solid generated by a line passing through a fixed point and a given plane curve; often used to hold dips of ice cream
10. One who puts forth effort
12. One who works with preservation of trees
13. A builder; works with wood
15. Sales person

Down

2. One who works with any mechanical contrivance; this person is also found on a train
5. Whole; having no fractional part; divisible by two
6. An instrument for writing
7. Person keeping records of money transactions
9. Collection of objects
11. Person who deals with the science of treating teeth
14. A straight line extending from a point

UNIT II - MONEY

EDUCATIONAL GOAL: To aid students in developing an awareness of the long and short-range effects of different alternatives pertaining to the economic aspects of life.

CONCEPT(S): Technological, sociological and economic changes affect careers.

An awareness of the short-range economic aspects of life affect the individual in his career decision and life style.

INFORMATIONAL OBJECTIVE: The student will investigate the aspects of financial management.

CONTENT AREA

STRATEGIES

RESOURCE MATERIALS

Math

List items essential to a family budget.

Set up a hypothetical family budget.

Compare interest at current rates on car loans, mortgages and charge plans.

Display specimens of Christmas Clubs, checks, savings accounts, saving certificates.

Study the advantages and/or disadvantages of paying cash versus installment buying.

Graph the percentage of the take-home pay going for shelter, food, clothing, recreation and savings.

Visit a bank.

Film: Money and Its Uses

Pupils and parents

Banking personnel and proper forms, daily newspapers

Specimens of installment contracts

Banking personnel

Film: How Money and Credit Help Us

Graphs

Bank-

INFORMATIONAL OBJECTIVE: The student will investigate the aspects of financial management.

CONTENT AREA	STRATEGIES	RESOURCE MATERIALS
Math	Have resource persons (bankers) share information with students. Role-play setting up and carrying out banking transactions.	Bank personnel Filmstrips with records: <u>How Money Goes Round and Round, How We Borrow Money</u>

Suggested Student Outcomes for Unit II:

1. Eighty percent of the students will list the items essential to a family budget.
2. Eighty percent of the students will compute interest at current rates on car loans, mortgages, and charge plans.
3. Eighty percent of the students will set up a hypothetical family budget.

Suggested Evaluation Procedures for Unit II:

1. Observation
2. Student participation in discussions
3. Worksheets

Phase II - Career Orientation and Exploration

Grade 8

Social Studies

INTRODUCTION

The program for eighth grade Social Studies is designed with the concept of the student being the center of the world around him. The student will be given various tasks and activities to acquaint him with himself and his immediate surroundings.

He will explore various occupational clusters on this level. This exploration is divided into seven units of organization conducive to the study of careers as well as Social Studies. The student will investigate occupations, how they vary during different periods and the influence of external forces on occupations such as war, etc. We hope to orient him with relevant career experiences that will make Social Studies more meaningful.

The seven major concepts are outlined in diagram form in varying degrees of complexity. The possibilities for the development of sub-concepts is endless. Each concept and subsequent sub-concepts represent a starting point for the exploration of occupations and Social Studies. We see the two as compatible and inseparable.

EDUCATIONAL GOALS

1. Encouraging each child to become a democratic person whose behavior is guided by democratic values.
2. Acquiring and using functional information and basic understanding of home, neighborhood, state, nation and world; accepting responsibility; respecting the law; gaining confidence; and gaining skill in critical thinking and problem solving involving human relationships.
3. Using dependable sources of information; locating, evaluating, selecting, organizing and presenting information effectively; and basing action on sound conclusions.
4. Coping intelligently with change, in as much as change is inevitable and desirable in developing situations and participating effectively in bringing about new conditions for the improvement of living.
5. Developing an awareness that it is necessary for a citizen in a democracy to be literate and accurately informed.
6. Using mass media to build defenses against propaganda and ideologies contrary to democratic principles and, thereby, investigating all sides of a question before arriving at a decision.
7. Guiding each child to develop into a useful and well-adjusted citizen by participating in and improving community life and by achieving feelings of adequacy as a person and as an accepted member of the group.
8. Appreciating and respecting other persons' cultural similarities, differences and contributions to our way of living, realizing that human dignity and personality are of first importance in human relationships regardless of race, color or creed.
9. Acquiring and using practical information concerning such concepts as: production of goods and services, transportation, distribution, communication and conservation of natural resources.

EDUCATIONAL GOALS (cont.)

10. Understanding and appreciating the impact of: scientific advancement and education upon ways of living; the effect of family life, community living, and national and international welfare; and the increasing interdependence characteristic of modern living.
11. Stimulating curiosity and providing information and motivation that will enable each individual to make intelligent career choices in the future - - choices that are compatible with one's interests and abilities as well as one's plans.
12. Developing the concept that "All men are created equal, and that each has the right to life, liberty and the pursuit of happiness."

CONCEPTS

1. An understanding and acceptance of self is important throughout life.
2. Personality is an important factor in securing and holding a job.
3. Different careers require different abilities.
4. Individuals differ in their abilities, interests, attitudes and values.
5. Individuals vary, to a great extent, regarding the probability for success or failure in a chosen career.
6. Individuals learn to act as members of a group through the process of socialization.
7. A person builds character; he is not born with it. This is an important factor to success in any career.
8. The United States Constitution guarantees equal protection under the law (civil liberties and civil rights), yet many have never known equality.
9. Basically, all people have the same biological, psychological, political and cultural similarities.
10. Other minority groups have benefitted from the black man's struggle for equality.
11. There are several types of prejudice which may be expressed in many different ways.
12. Prejudice often leads to discrimination.
13. Persons need to be recognized as having dignity, worth, rights and responsibilities.
14. Students need to develop a perception of their abilities and interests as related to career requirements in the political world.
15. People work for different reasons---sometimes without pay (campaign manager).

CONCEPTS (cont.)

16. Interaction and interdependency are important necessities in achieving certain goals.
17. Occupational supply and demand has an impact on career planning.
18. Various groups and institutions influence the nature and structure of work.
19. Job characteristics and individuals must be flexible in a changing society.
20. Students need to understand economic potential as related to career clusters.
21. Occupations exist for a purpose.
22. Persons working on all levels in governmental careers should be worthy of respect in those relations between worker and employer.
23. Our form of government makes the individual assume the responsibility for planning his own future.
24. Governmental careers on a local, state or federal level are available on a merit basis regardless of individual status.
25. Interrelations in decision-making processes apply to government in the study of careers.
26. Through government, students are able to understand the characteristics of leadership.
27. Governmental environment and individual potential interact to influence career development.
28. Job specialization caused by assembly production is an example of interdependency resulting from technology.
29. Job characteristics and individuals must be able to adjust to the deletion and development of various occupations caused by technology and the knowledge explosion.
30. Work means different things to different people.

UNIT OBJECTIVES

1. Students will be provided with the information and motivation that will enable them to make career choices compatible with their interests, abilities and plans for the future.
2. Students will be guided to develop an intelligent understanding and an acceptance that prejudice is acquired through experiences and environmental circumstances and may apply to almost anything or anyone.
3. Students will be guided to an understanding of the importance of elections in a democratic system.
4. Students will be presented with the total concept of war--the interrelatedness of basic causes, advances and results of most wars.
5. Students will be provided with the information necessary for gaining an understanding of the basis for and the development of government and how this has created the need for more financing and more jobs.
6. Students will be presented with the concept of democracy as a way of life and will be guided by its principles and values while appreciating the sacrifices and contributions made to promote democratic living in the United States.
7. Students will demonstrate an understanding and an appreciation of the impact that scientific advancement and technological change have had upon our way of life.

INFORMATIONAL OBJECTIVES

1. Students will develop positive attitudes toward the world of work and will realize the worth and dignity in honest employment.
2. Students will demonstrate the realization that individuals are expected to become contributing members of society.
3. Students will develop the ability to recognize job situations in which they will best fit to contribute the most to society and to receive the greatest pleasure as well as the greatest monetary benefits.
4. Students will constantly examine themselves as individuals by analyzing, evaluating and assessing their abilities, interests and values. They will become their own best critic.
5. Students will demonstrate that a good personality is the key to success in the working world--that it enhances one's ability to get along with others in the world.
6. Students will determine educational requirements for becoming a qualified worker in the career of their choice.
7. Students will identify the various types of prejudices in real life situations.
8. Students will trace the origin of the various types of prejudice and chart the development.
9. Students will list the causes and consequences of prejudice and discrimination and will indicate the types of adjustments made by society.
10. Students will identify situations or give examples which show how other minority groups have benefited from the black man's fight for equal rights.
11. Having researched laws and court decisions that were designed to retard certain racial advancements, students will list, examine and evaluate these situations.
12. Students will examine and evaluate laws and court decisions that have brought great changes in American life.

INFORMATIONAL OBJECTIVES (cont.)

13. Students will distinguish between prejudice and discrimination.
14. Students will identify election vocabulary terms.
15. Students will list the qualifications for various political offices.
16. Students will learn how and why a campaign is organized.
17. Students will identify the people working in a campaign and the responsibilities of the various jobs.
18. Students will differentiate between elected positions, appointed ones and ones obtained on merit.
19. Students will identify the terminology needed to understand and discuss war.
20. Students will compare and contrast the differences between war and peace-time economies.
21. Students will compare and contrast the economic, social, political and psychological results of war.
22. Students will identify important events and persons connected with war.
23. Students will identify the technological improvements brought about by war.
24. Students will recognize and use certain terms relevant to government.
25. Students will make charts depicting the people who run our government.
26. Students will list benefits and careers related to those services performed by our government.
27. Students will identify the people who work in our local, state and federal governments and the various occupations involved.

INFORMATIONAL OBJECTIVES (cont.)

28. Students will compare our government with that of other nations.
29. Students will recognize that people form governments for enforcing laws and providing services they cannot provide for themselves.
30. Students will acquire and communicate the concepts inherent in "democracy."
31. Students will identify the basic features of a democracy.
32. Students will name and identify important personalities in history responsible for the development of democracy and will point out leadership characteristics as related to career development.
33. Students will list the responsibilities and rights of citizens in a democracy.
34. Students will list some of the changes that have taken place in our society as a result of specific events in the development of democracy.
35. Students will identify the problems of a democracy by citing ways a democracy can be improved.
36. Students will contrast the features of American democracy with other forms of contemporary government. (Monarchy, communism, etc.)
37. Students will use correctly certain terminology connected with technology. (Mass production, interchangeable parts, assembly line, power, energy, etc.)
38. Students will determine the advancement of technology in transportation and the various occupations this offers.
39. Students will show technological progress in communications and will identify the careers related to this field.

INFORMATIONAL OBJECTIVES (cont.)

40. Students will show a cause and effect relationship between technology and disease and will identify the health careers involved.
41. Students will compare and contrast the positive and negative aspects of technology.
42. Students will indicate the effects technology has produced on expansion in relation to space.
43. Students will cite the effects technology has had on expansion in relation to the oceans.
44. Students will indicate the effects technology has or has not had on their career choice. (e.g., supply and demand)

UNIT I - THE INDIVIDUAL

EDUCATIONAL GOALS:

Guiding each child to develop into a useful and well-adjusted citizen by participating in and improving community life and by achieving feelings of adequacy as a person and as an accepted member of the group.

Appreciating and respecting other persons' cultural similarities, differences and contributions to our way of living, realizing that human dignity and personality are of first importance in human relationships regardless of race, color or creed.

Stimulating curiosity and providing information and motivation that will enable each individual to make intelligent career choices in the future--choices that are compatible with one's interests and abilities as well as one's plans.

CONCEPTS:

An understanding and acceptance of self is important throughout life.

Personality is an important factor in securing and holding a job.

Different careers require different abilities.

Individuals differ in their abilities, interests, attitudes and values.

Individuals are, to a great extent, responsible for success or failure in a chosen career.

Individuals learn to act as members of a group through the process of socialization.

A person builds character; he is not born with it. This is an important factor to success in any career.

UNIT OBJECTIVE:

Students will be provided with the information and motivation that will enable them to make career choices compatible with their interests, abilities and plans for the future.

INFORMATIONAL
OBJECTIVES:

Students will develop positive attitudes toward the world of work and will realize the worth and dignity in honest employment.

Students will demonstrate the realization that individuals are expected to become contributing members of society.

Students will develop the ability to recognize job situations in which they will best fit to contribute the most to society and to receive the greatest pleasure as well as the greatest monetary benefits.

Students will constantly examine themselves as individuals by analyzing, evaluating and assessing their abilities, interests and values. They will become their own best critic.

Students will demonstrate that a good personality is the key to success in the working world--that it enhances one's ability to get along with others in the world.

Students will determine educational requirements for becoming a qualified worker in the career of their choice.

UNIT OBJECTIVE: Students will be provided with the information and motivation that will enable them to make career choices compatible with their interests, abilities and plans for the future.

STRATEGIES

Students will view filmstrips depicting various aspects of human living as individuals relate to each other. They will become aware of "self" in an impersonal society and of their own attributes and short-comings.

Arrange a bulletin board displaying the various job clusters. Invoke a discussion to determine the extent of students' knowledge about various job opportunities.

Having determined by way of a checklist students' various interests and attitudes, form groups accordingly and set up "interest centers" with related materials (books, magazines, pictures, crafts, filmstrips, records, etc.).

Invite parents of students who are locally employed to discuss their jobs, benefits obtained from it, requirements for it, and how they, through their jobs, serve the community.

Students will create bulletin boards or large posters depicting people employing attitudinal, intellectual, or manual skills (people working with people, people working with machinery, people working with ideas).

RESOURCE MATERIALS

Tapes: Secrets,
Filmstrip: Understanding
Myself, Guidance Series
Set #1, Filmstrip: Be a
Neighbor, Guidance
Series Set #2

Magazines and newspapers

Designed checklist to
determine interests
and attitudes

Parents and/or com-
munity workers

Current magazines and
newspapers

UNIT OBJECTIVE: Students will be provided with the information and motivation that will enable them to make a career choice compatible with their interests, abilities and plans for the future.

STRATEGIES

Students will make picture charts depicting various interest areas and will list underneath the charts the abilities needed. Checking against these charts, students will identify their present abilities and those they may need to acquire in order to pursue their interest.

Students will make two lists--1) persons and 2) things in their environment. Students will rank these according to their importance to them and then orally describe how they relate to their view of work.

Having toured the telephone company, the students will discuss various job opportunities thinking in terms of their own abilities and skill to perform in these capacities.

Students will participate in a simulated game of role playing.

Having made a decision of a possible career choice, students will design a flow chart projecting their future plans.

Students will write an autobiography reflecting upon their past experience.

RESOURCE MATERIALS

Current magazines and newspapers

Community resources

Parents, company guide, company employee

Game: Life Career

Books, Job Experience Kit, - Exploring the World of Work

UNIT OBJECTIVE: Students will be provided with the information and motivation that will enable them to make a career choice compatible with their interests, abilities and plans for the future.

RESOURCE MATERIALS

STRATEGIES

Book: Citizenship in Action.
Painter & Bixler, Chapter 28
Film: Are You Popular?
World of Work Kit (WOW),
Filmsstrips: Job Attitudes: Liking Your Job and Your Life -
Guidance Series Set #/2

Personality plays a big part in a person's life. Will your personality help or hinder you in getting the job you want? In order that your teachers and counselors may be able to help you make decisions about your future, they must know as much as possible about you. Write a comprehensive autobiography on the form to be distributed. This information will be kept in the strictest confidence.

Write a theme which describes an incident in which you were involved and your contribution in a situation you believed helped someone else in some way.

Form buzz groups to discuss the following statements:

- (a) Persons should receive recognition for achievement.
- (b) A person's performance reflects his interests.
- (c) Grades should not be given to indicate student progress.

Students will develop a crossword puzzle using titles of jobs which have had the greatest effect upon their lives at any given time.

Dictionary of Occupational Titles

UNIT OBJECTIVE: Students will be provided with the information and motivation that will enable them to make a career choice compatible with their interests, abilities and plans for the future.

STRATEGIES

With information made available at learning stations referring to the various career clusters, students will illustrate, by way of charts, the contributions and importance of these career areas to our society.

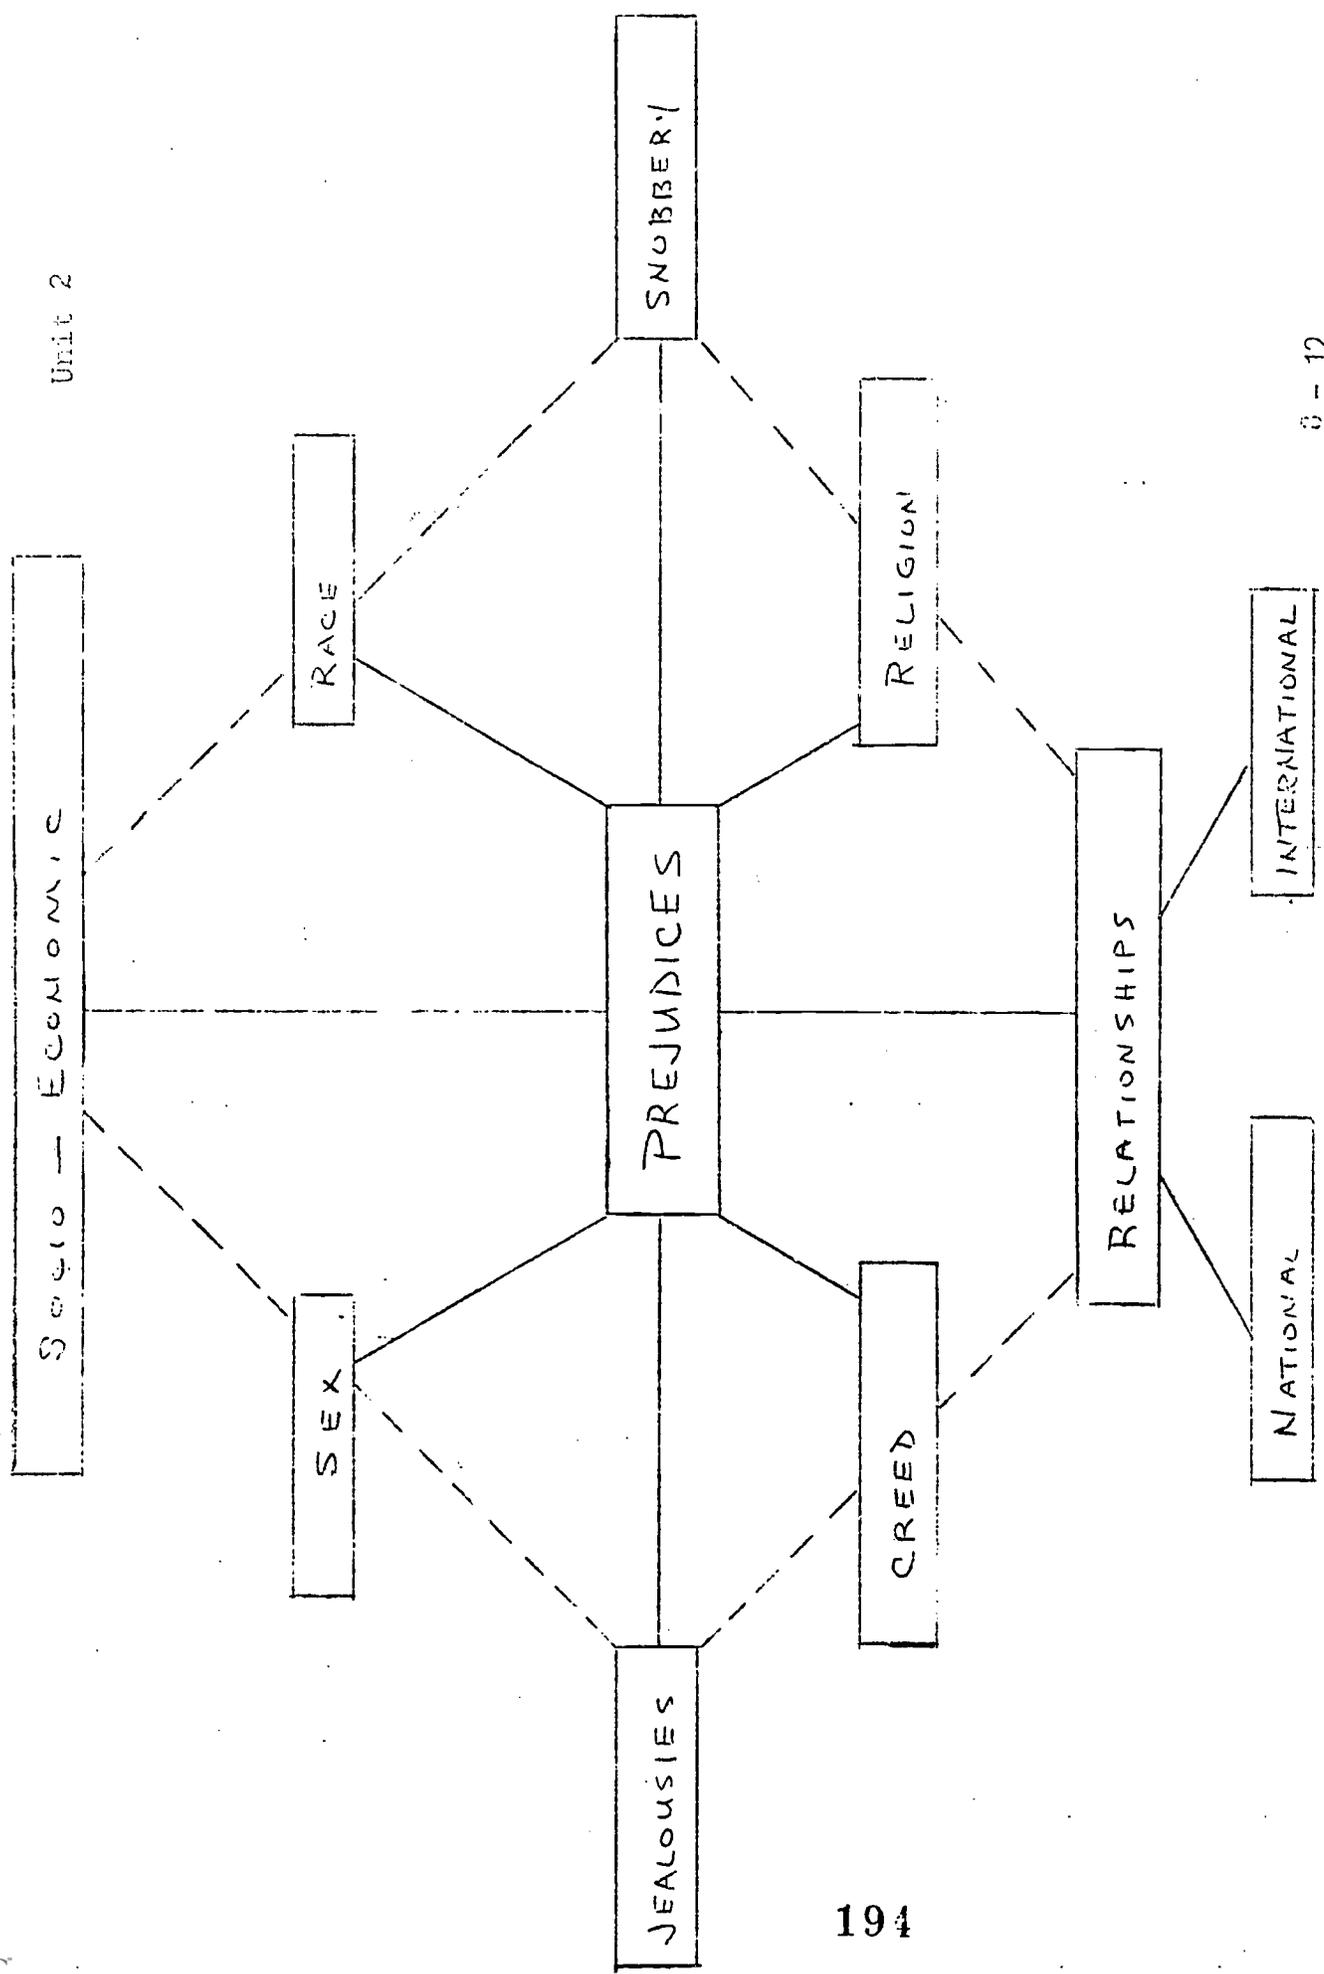

**RESOURCE
MATERIALS**

Learning centers

Suggested Student Outcomes for Unit I

1. Given a list of possible personal characteristics, students will identify those necessary in an individual for obtaining and keeping a job.
2. Given a list containing a wide range of career options, students will select the one or ones they might be best suited for and will give reasons for their decision(s).
3. Students will make a list of those qualities employers look for in a potential employee.
4. Students will criticize themselves and will suggest possible improvements which could be made in their personal characteristics.
5. Students will cite situations in which individuals were released from their job and will give reasons why the situations occurred.
6. Students will design a rating scale for determining those qualifications necessary in both obtaining and performing adequately on a job.

UNIT II - PREJUDICE

EDUCATIONAL GOALS:

Appreciating and respecting other persons' cultural similarities, differences and contributions to our way of living, realizing that human dignity and personality are of first importance in human relationships regardless of race, color or creed.

Using mass media to build defenses against propaganda and ideologies contrary to democratic principles and, thereby, investigating all sides of a question before arriving at a decision.

Developing the concept that "All men are created equal, and that each has the right to life, liberty and the pursuit of happiness."

Stimulating curiosity and providing information and motivation that will enable each individual to make intelligent career choices in the future--choices that are compatible with one's interests and abilities as well as one's plans.

CONCEPTS:

The United States Constitution guarantees equal protection under the law (civil liberties and civil rights), yet many have never known equality.

Basically, all people have the same biological, psychological, political and cultural similarities.

Other minority groups have benefited from the black man's struggle for equality.

There are several types of prejudice which may be expressed in many different ways.

Prejudice often leads to discrimination.

UNIT OBJECTIVE:

Students will be guided to develop an intelligent understanding and an acceptance that prejudice is acquired through experiences and environmental circumstances and may apply to almost anything or anyone.

INFORMATIONAL OBJECTIVES:

Students will identify the various types of prejudices in real life situations.

Students will trace the origin of the various types of prejudice and chart the development.

Students will list the causes and consequences of prejudice and discrimination and will indicate the types of adjustments made by society.

Students will identify situations or give examples which show how other minority groups have benefited from the black man's fight for equal rights.

Having researched laws and court decisions that were designed to retard certain racial advancements, students will list, examine and evaluate these situations.

Students will examine and evaluate laws and court decisions that have brought great changes in American life.

Students will distinguish between prejudice and discrimination.

UNIT OBJECTIVE: Students will be guided to develop an intelligent understanding and an acceptance that prejudice is acquired through experiences and environmental circumstances and may apply to almost anything or anyone.

STRATEGIES

Provide students with an activity sheet. Allow ten minutes for written reaction to its contents. Distribute an article entitled "Prejudice." Allow twenty minutes for silent reading. In oral discussion students will analyze their preconceived ideas.

Students will list prejudices or false impressions which they have had in the past about anything and which later they found to be wrong. Discuss.

Ask students to write a response to the following questions: What would I like to know about other races? Do popular nationality jokes cause prejudices? Why? Have you read about people who were enslaved other than black Americans? Discuss.

Students will bring in and display newspaper and magazine articles concerned with how societal groups express their prejudices.

Project: Do research on ways of living among people whose cultures differ from our own. Report results of research to class. Purpose of research: To develop a feeling of understanding and respect for all humans regardless of race, color or creed.

RESOURCE MATERIALS

Book: The Nature of Prejudice.
Gordon W. Allport

Book: Race and Races.
Richard A. Goldsby

Current publications

Any social studies text, Fort Lee non-American personnel, VSC staff and students, current publications

UNIT OBJECTIVE: Students will be guided to develop an intelligent understanding and an acceptance that prejudice is acquired through experiences and environmental circumstances and may apply to almost anything or anyone.

STRATEGIES

**RESOURCE
MATERIALS**

Write an account of your activities during a typical day. Tell what forces influenced your actions and to what extent. Determine whether your decision to act in a certain way was triggered by prejudice.

Imagine that you are traveling in another country and meet someone who dislikes the United States. He insists that our country is not a real democracy because it is prejudiced and discriminates against minority groups. Tell how you would handle this situation.

Explore hiring policies (not requirements for employment) for various jobs in local plants. Determine whether these policies are valid or discriminatory.

Have a panel discussion on the current busing issue. The question: Do you think that busing is motivated by prejudice?

Visit a local factory (preferably Brown-Williamson) to find out how local products (tobacco) are traded. Observe women employees from the point of the number employed and the positions held. Inquire about job opportunities and requirements for employment.

Plant employees,
plant managers,
plant supervisors

Mass media, interviews
with school board members,
principals and
parents

Local plants, plant
managers, supervisors
and workers

UNIT OBJECTIVE: Students will be guided to develop an intelligent understanding and an acceptance that prejudice is acquired through experiences and environmental circumstances and may apply to almost anything or anyone.

STRATEGIES

Conduct a "Self-examination" period. Encourage students to express their true feelings on such topics as: Hair styles, Dress codes, Eighteen year-old voting, Desegregation (in a broad sense) and Inter-marriage. They may suggest others. Ask: if these attitudes are motivated by prejudice.

Conduct a survey among students and faculty. Find out how many (percentage) are sympathetic with the idea of a woman (regardless of race) for President of the United States or a black man for the same office. Report to class.

Research the Women's Liberation Movement. What is the philosophy behind it?

Role play city dwellers and farmers depicting rural living and urban living in colonial times and the present. For both time periods, discuss the societal attitudes favoring one life style over the other.

Invite a social worker to class. Ask her to discuss with the class her role as a service person to the underprivileged in the community. Find out the requirements and benefits of her job and whether the people whom she serves are generally stigmatized by the community. If so, why?

RESOURCE MATERIALS

Students

Students-faculty interviews with selected persons

Books: Women in the U.S., Women Employment, Women and Social and Moral Questions, Current literature

Current literature

Social Worker

UNIT OBJECTIVE: Students will be guided to develop an intelligent understanding and an acceptance that prejudice is acquired through experiences and environmental circumstances and may apply to almost anything or anyone.

STRATEGIES

Invite a representative from a local employment agency. Request statistics on employment. Formulate an "information desired" questionnaire concerning the kinds of jobs for which they have greatest requests, the percentage of clientele (race and sex), skills and abilities required in performing such jobs as might be named.

Have a class discussion with a student designated as moderator. The statement: Migratory workers in our western states will always face the problems they now face. Bring out reasons for this kind of life and the attitude of the general public toward these people.

Make a graph to bring out the following differences between whites and non-whites: life expectancy, average family income, school years completed with reference to the years 1940, 1965, 1970 and 1972.

Interview or invite to class a female doctor, lawyer and politician. Find out why they chose their careers and some of the difficulties they encountered in preparation and also the disadvantages they presently experience.

RESOURCE
MATERIALS

Employment agency
representative

Book: World Almanac

UNIT OBJECTIVE: Students will be guided to develop an intelligent understanding and an acceptance that prejudice is acquired through experiences and environmental circumstances and may apply to almost anything or anyone.

STRATEGIES

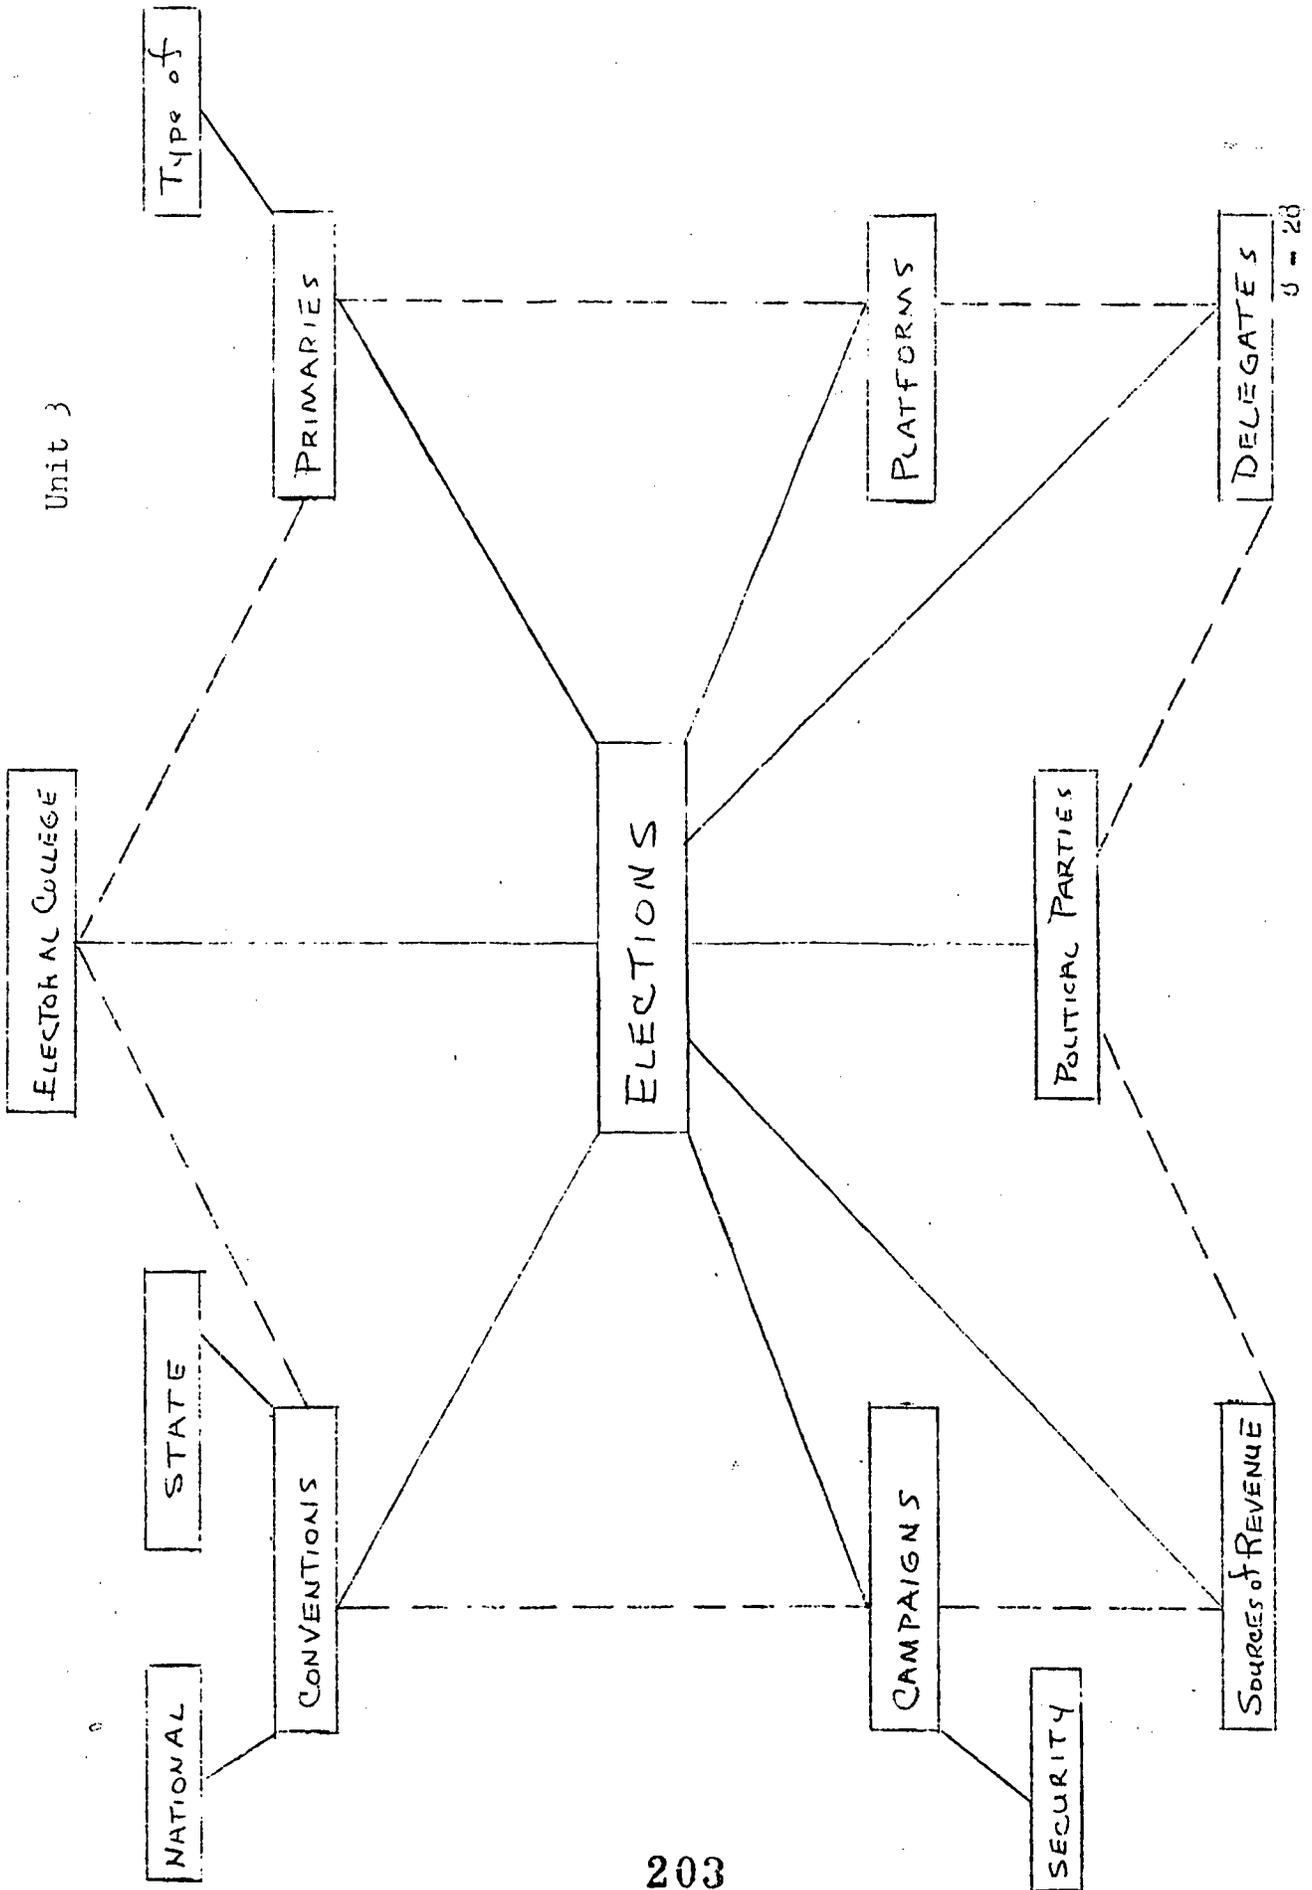

Pretend that you are a famous Negro in the past. Relate to the class what you consider to be the high points of: your career, your struggles for identity in whatever career you chose, your achievements or contributions made to society and the obstacles you had to overcome in the process.

**RESOURCE
MATERIALS**

Books: The Negro in America,
Negroes in our History,
Negroes of Achievement
Filmstrips: Liage
Makers Series -
Jackie Robinson,
Martin Luther King

Suggested Student Outcomes for Unit II

1. Students will identify those sources in their environment from which prejudices are acquired.
2. Students will identify several types of prejudices in real life and will also identify the means by which they are expressed.
3. Students will trace the origin of various prejudices and will chart their development.
4. Students will distinguish between prejudice and discrimination by giving examples.
5. Students will demonstrate their acceptance of all persons as human beings regardless of ethnic, cultural or economic backgrounds.
6. Students will list the causes and consequences of prejudice and discrimination and will indicate the types of adjustments made by society.
7. Students will identify and give examples of situations which show how other minority groups have benefited from the black man's fight for equal rights.
8. Students will identify laws and court decisions that have brought great changes in American life.

UNIT III - ELECTIONS

- EDUCATIONAL GOAL:** Developing an awareness that it is necessary for a citizen in a democracy to be literate and accurately informed.
- CONCEPTS:**
- Persons need to be recognized as having dignity, worth, rights and responsibilities.
 - Students need to develop a perception of their abilities and interests as related to career requirements in the political world.
 - People work for different reasons--sometimes without pay (campaign manager).
 - Interaction and interdependency are important necessities in achieving certain goals.
- UNIT OBJECTIVE:** Students will be guided to an understanding of the importance of elections in a democratic system.
- INFORMATIONAL OBJECTIVES:**
- Students will identify election vocabulary terms.
 - Students will list the qualifications for various political offices.
 - Students will learn how and why a campaign is organized.
 - Students will identify the people working in a campaign and the responsibilities of the various jobs.
 - Students will differentiate between elected positions, appointed ones and ones obtained on merit.

UNIT OBJECTIVE: Students will be guided to an understanding of the importance of elections in a democratic system.

STRATEGIES

Develop a work sheet to acquaint the student with the vocabulary used in and around elections.

Make a scrapbook concerning the forthcoming election.

Construct a master chart in the room to keep everyone aware of the progress of the candidates.

Write an essay: "If I were elected President, I would . . ."
Have the other students decide if the ideas put forth are realistic enough to be put into effect.

Play the game "Election U.S.A."

Run a mock election in the room allowing the students to campaign and take various roles involved in a campaign such as campaign manager, publicity chairman, etc. and come up with a Class President.

Have a class discussion: "The people who make the candidate."

Report on political parties. Discuss their social, political and economic aspects.

Have a class discussion: "The importance of Elections in a Democracy."

RESOURCE MATERIALS

Book: Free and the Brave, Junior Scholastic Magazines

Newspapers, magazines

Newspapers, magazines

Magazines, newspapers, news programs

Game: "Election U.S.A."

Current publications, teacher, other media

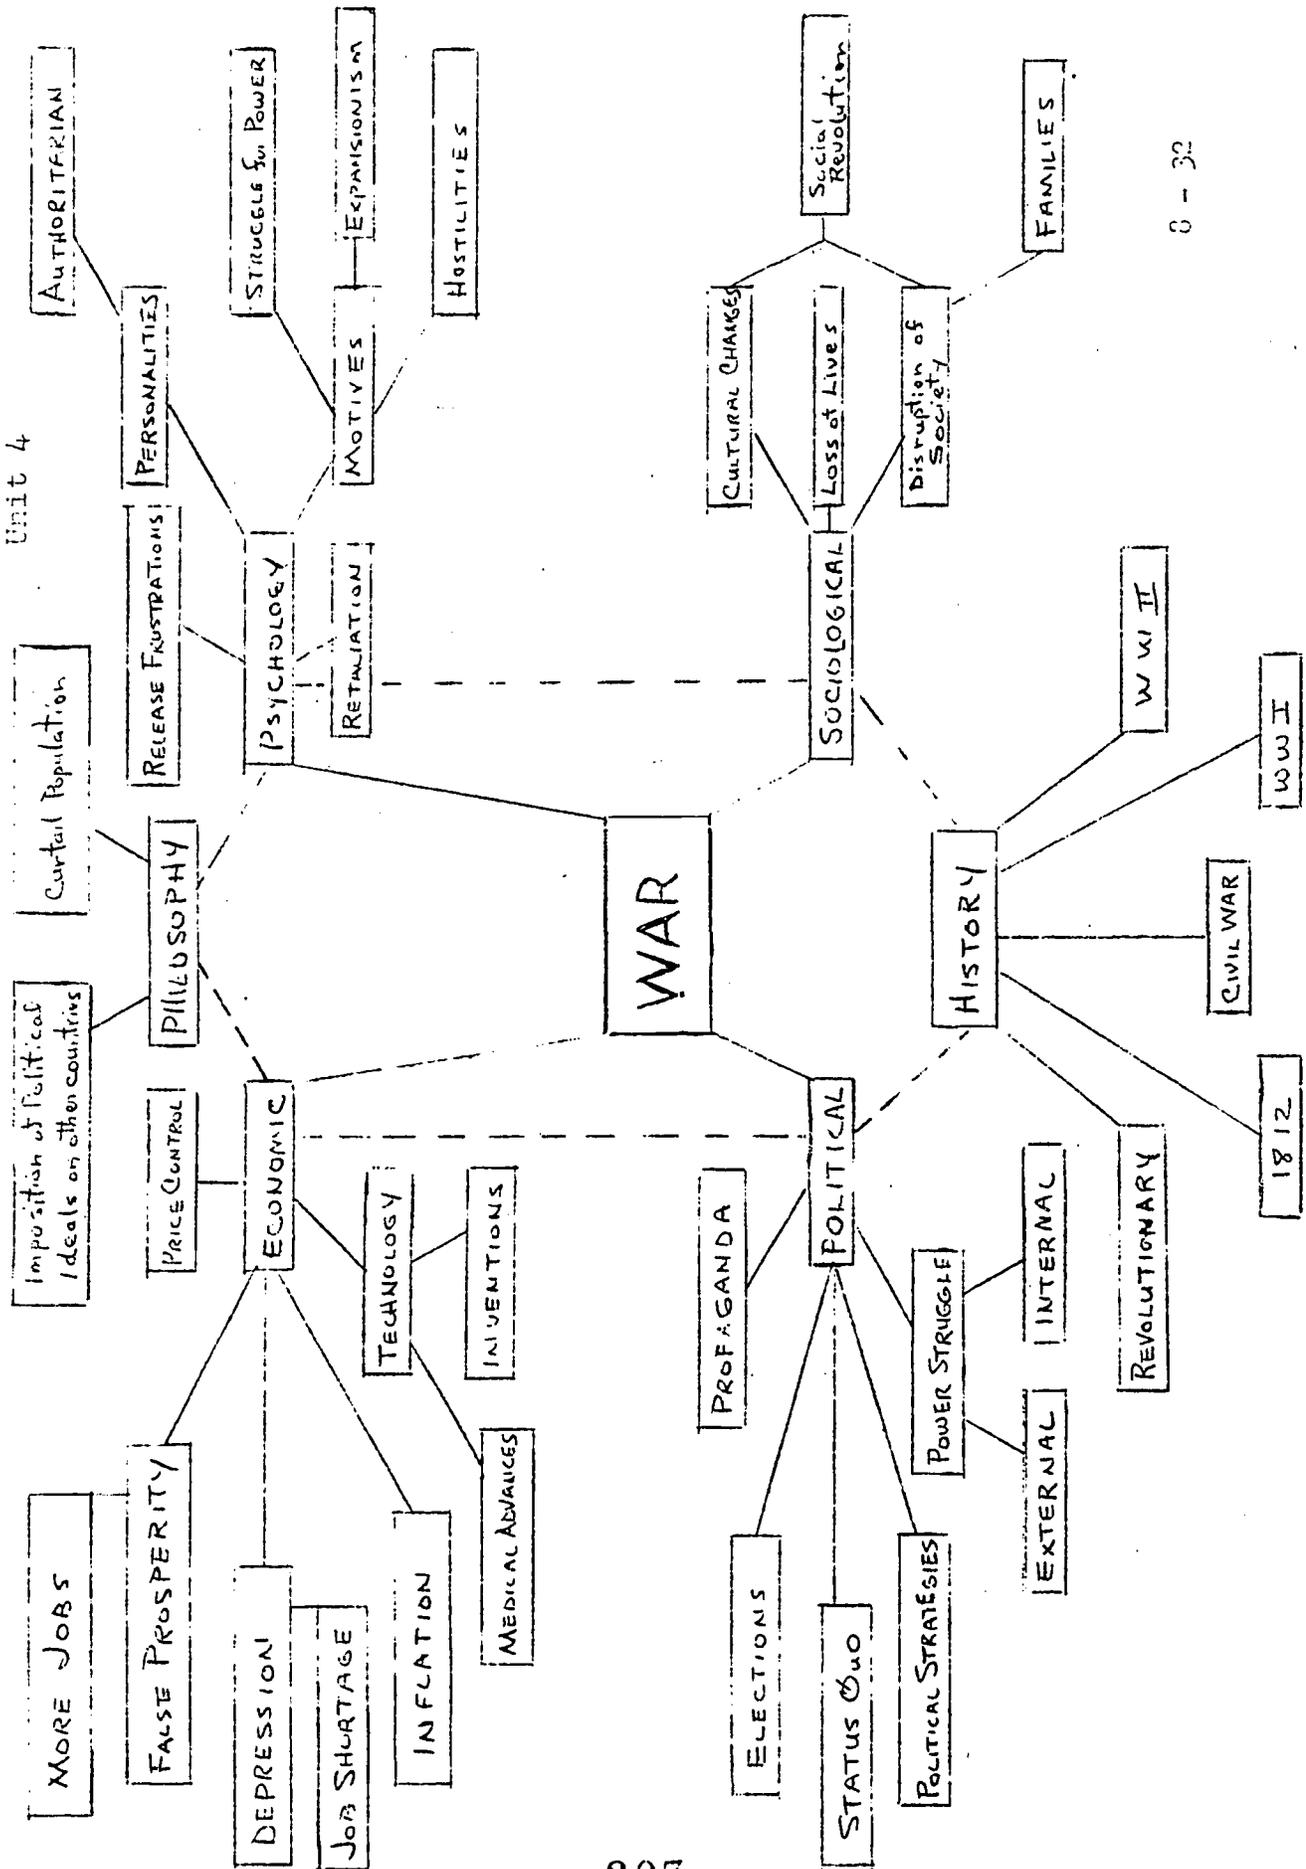

Teacher, current publications

Book: Free and the Brave, Encyclopedias

Teacher, Book: Free and the Brave, Game: "Election U.S.A."

Suggested Student Outcomes for Unit III

1. Students will defend the importance of elections in a democratic society.
2. Students will list and classify the various career opportunities in the political arena.
3. Students will describe the requirements for obtaining and holding a prescribed list of political positions.
4. Students will help organize and participate in campaigns for the election of school and local representatives.
5. Students will tell the difference between elected positions, appointed ones and ones obtained by merit.
6. Students will list the qualifications for various political offices.
7. Students will identify persons working in a campaign and will list the duties assigned to each position.
8. Students will trace the historical development of elections in our country.
9. Students will explain why respect and confidence are necessary character traits for elected officials.
10. Using available information, students will predict the winning candidate in a given local, state or national election.

UNIT IV - WAR

EDUCATIONAL GOALS:

Coping intelligently with change, in as much as change is inevitable and desirable in developing situations and participating effectively in bringing about new conditions for the improvement of living.

Using mass media to build defenses against propaganda and ideologies contrary to democratic principles and, thereby, investigating all sides of a question before arriving at a decision.

Stimulating curiosity and providing information and motivation that will enable each individual to make intelligent career choices in the future--choices that are compatible with one's interests and abilities as well as one's plans.

CONCEPTS:

Occupational supply and demand has an impact on career planning in our technological society.

Various groups and institutions influence the nature and structure of work.

Job characteristics and individuals must be flexible in a changing society.

Students need to understand economic potential as related to career clusters.

Occupations exist for a purpose.

Students will be presented with the total concept of war--the inter-relatedness of basic causes, advances and results of most wars.

UNIT OBJECTIVE:

Students will identify the terminology needed to understand and discuss war.

INFORMATIONAL OBJECTIVES:

Students will compare and contrast the differences between war and peace-time economies.

**INFORMATIONAL
OBJECTIVES:**

Students will compare and contrast the economic, social, political and psychological results of war.

Students will identify important events and persons connected with war.

Students will identify the technological improvements brought about by war.

UNIT OBJECTIVE: Students will be presented with the total concept of war--the inter-relatedness of basic causes, advances and results of most wars.

STRATEGIES

RESOURCE MATERIALS

Develop a worksheet to acquaint the students with the vocabulary of war (depression, inflation, reparations, etc.).

Book: Free and the Brave, teacher, current publications, encyclopedia

Play a game.

Game: "Mission: Simulation of Our Involvement in Vietnam"

Study the master chart in the room showing the similarities in the economic, social, political and psychological variations caused by war.

Teacher, Book: Free and the Brave, current publications, encyclopedia

Play a game.

Game: "Propaganda"

Students will write an essay in which they compare and contrast their personal qualities with those of well-known leaders.

Encyclopedia, teacher, Library

Compare and contrast well-known men and women in different wars in terms of their leadership abilities.

Biographies, autobiographies

Draw cartoons depicting the various jobs found in war.

Book: Free and the Brave, current publications

Make collages depicting some of the effects of wars (social, personal, economic, political, psychological, etc.).

Historical pamphlets, current publications

UNIT OBJECTIVE: Students will be presented with the total concept of war--the inter-relatedness of basic causes, advances and results of most wars.

STRATEGIES

RESOURCE MATERIALS

Make a chart tracing the increase in casualties and expenditures in wars from the Revolutionary War to Vietnam.

Basic books on U.S. history, current publications

Play a game -- "Who Am I?"

Teacher, Book:
Free and the Brave,
Current publications

Have a class discussion: The differences technological advancements have brought to war and have developed as a result of war.

Teacher, current publications, encyclopedias

Write an essay: "Why the Economy is Different During Wartime."

Teacher, encyclopedias

Make a chart showing the fluctuation of employment in conjunction with different wars.

Encyclopedias, current & historical publications

Invite a military person to discuss his or her role in the army.

Resource person

Take a field trip to a T.V. station to emphasize the role of media in forming public opinion, especially during wartime.

Teacher, T.V. station, current publications

Make a chart pointing out the good and bad aspects of war.

History text, encyclopedias, current publications

UNIT OBJECTIVE: Students will be presented with the total concept of war--the inter-relatedness of basic causes, advances and results of most wars.

STRATEGIES

RESOURCE
MATERIALS

Invite a panel of three military persons who have fought in various wars to help point out similarities and differences in jobs.

Resource people,
encyclopedia

Have a panel discussion: "Wartime Economy as Opposed to Peacetime Economy."

Current publications,
history text

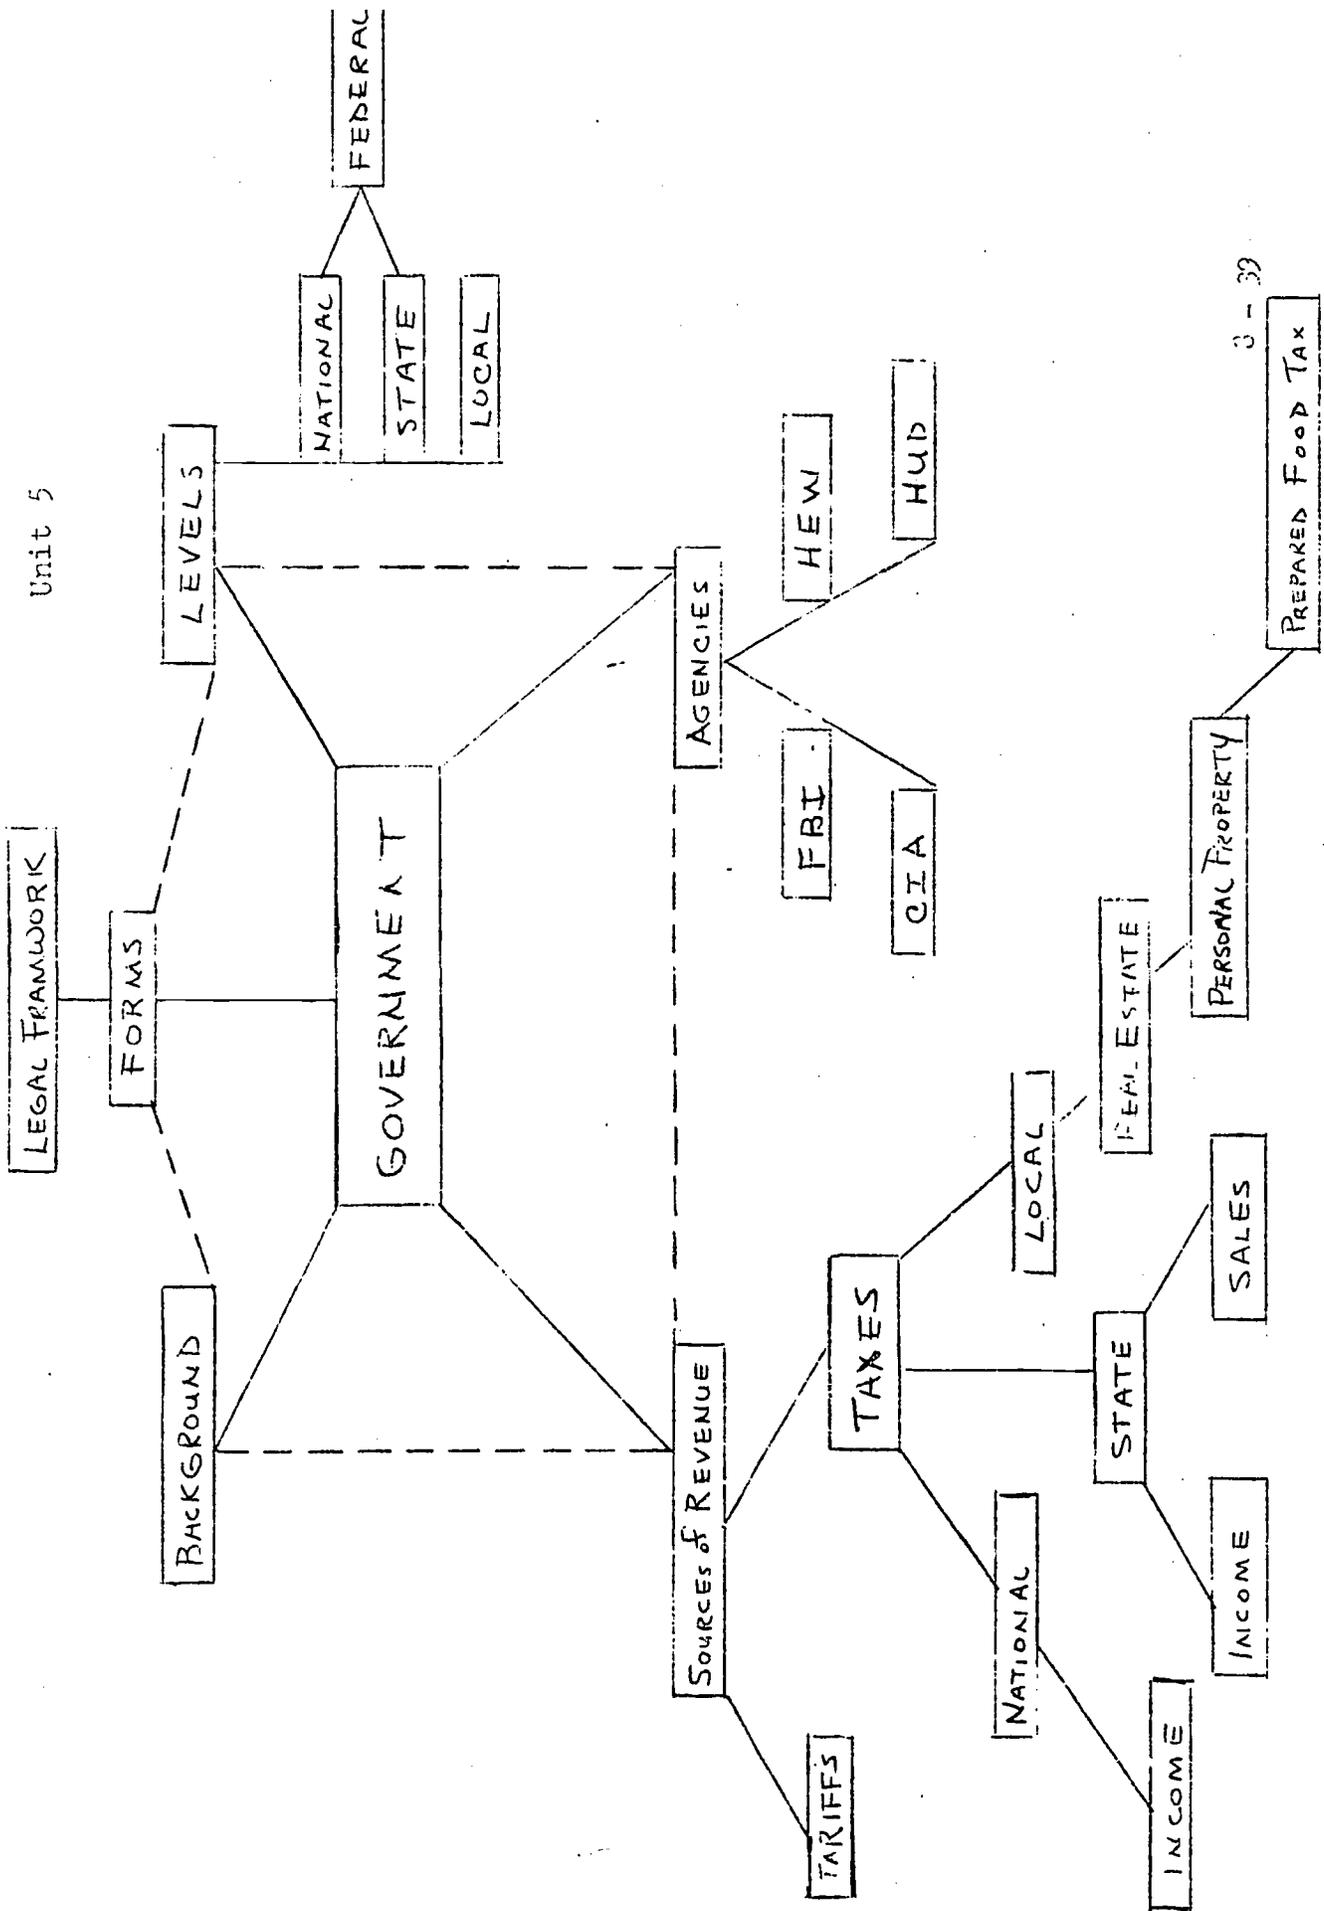

Take a field trip to Fort Lee Museum.

Write a research paper: "Careers in the Military Services."

Current publications,
recruiting officer from
one of the armed forces

Suggested Student Outcomes for Unit IV

1. Students will relate the availability of the wide range of career opportunities in the armed services. They will indicate how these careers may be obtained and the benefits which may be derived from them.
2. Students will demonstrate their ability in decision making, critical thinking and analysis when confronted with hypothetical problems both in and outside of school.
3. Students will point out the social and psychological effects of war on the economic and political life of nations and the world.
4. Students will describe the social and psychological interaction of individuals, society and the world during a war period.
5. Students will supply evidence indicating the effect of war upon technological advancements.
6. Students will describe the importance of responsible leadership.
7. Students will provide information to support the theory that "the end result of war is inflation and depression" and that this situation gives rise to new careers.

UNIT V - GOVERNMENT

EDUCATIONAL GOALS:

Acquiring and using functional information and basic understanding of home, neighborhood, state, nation and world; accepting responsibility; respecting the law; gaining confidence; and gaining skill in critical thinking and problem-solving involving human relationships.

Stimulating curiosity and providing information and motivation that will enable each individual to make intelligent career choices in the future-- choices that are compatible with one's interests and abilities as well as one's plans.

CONCEPTS:

Persons working on all levels in governmental careers should be worthy of respect in those relations between worker and employer.

Our form of government makes the individual assume the responsibility for planning his own future.

Governmental careers on a local, state or federal level are available on a merit basis regardless of individual status.

Interrelations in decision-making processes apply to government in the study of careers.

Through government, students are able to understand the characteristics of leadership.

UNIT OBJECTIVE:

Students will be provided with the information necessary for gaining an understanding of the basis for and the development of government and how this has created the need for more financing and more jobs.

INFORMATIONAL OBJECTIVES:

Students will recognize and use certain terms relevant to government.

Students will make charts depicting the people who run our government.

Students will list benefits and careers related to those services performed by our government.

INFORMATIONAL
OBJECTIVES:

Students will identify the people who work in our local, state and federal governments and the various occupations involved.

Students will compare our government with that of other nations.

Students will recognize that people form governments for enforcing laws and providing services they cannot provide for themselves.

UNIT OBJECTIVE: Students will be provided with the information necessary for gaining an understanding of the basis for and the development of government and how this has created the need for more financing and more jobs.

STRATEGIES

- Develop worksheets dealing with the vocabulary needed to understand the concept of "government."
- Have students prepare reports on the differences and similarities among city, state, and national government careers.
- Make a collage composed of current and past issues of various occupations which are available in government.
- Arrange a bulletin board to show the various services rendered by local governments.
- Draw cartoons: (a) tracing some of the contributions that men and movements have made to government, (b) political cartoons, depicting present men and/or issues.
- Take a field trip to a clerk's office to investigate some duties in relation to the overall picture of government.
- Take a field trip to the General Assembly to see a branch of the State government in action.
- Invite in a speaker from the executive branch of government on either the state or local level.

RESOURCE MATERIALS

Books: Free and the Brave, American Government, Junior Scholastic Magazine

Book: Free and the Brave, Filmstrip: Federal Government

Newspapers, magazines

Teacher

Books: Free and the Brave, American Government, newspapers, magazines

Clerk's office

State Capitol

Resource person from executive branch

UNIT OBJECTIVE: Students will be provided with the information necessary for gaining an understanding of the basis for and the development of government and how this has created the need for more financing and more jobs.

STRATEGIES

Take a field trip to a courthouse to see the judicial branch in action.

A policeman comes to your door, arrests you and takes you to headquarters and locks you up without a word. What are your rights?

Show slides. B 17-B/44

Show filmstrips.

Write an essay: "Is it Possible For People to Live Without Government?"

RESOURCE MATERIALS

Court House

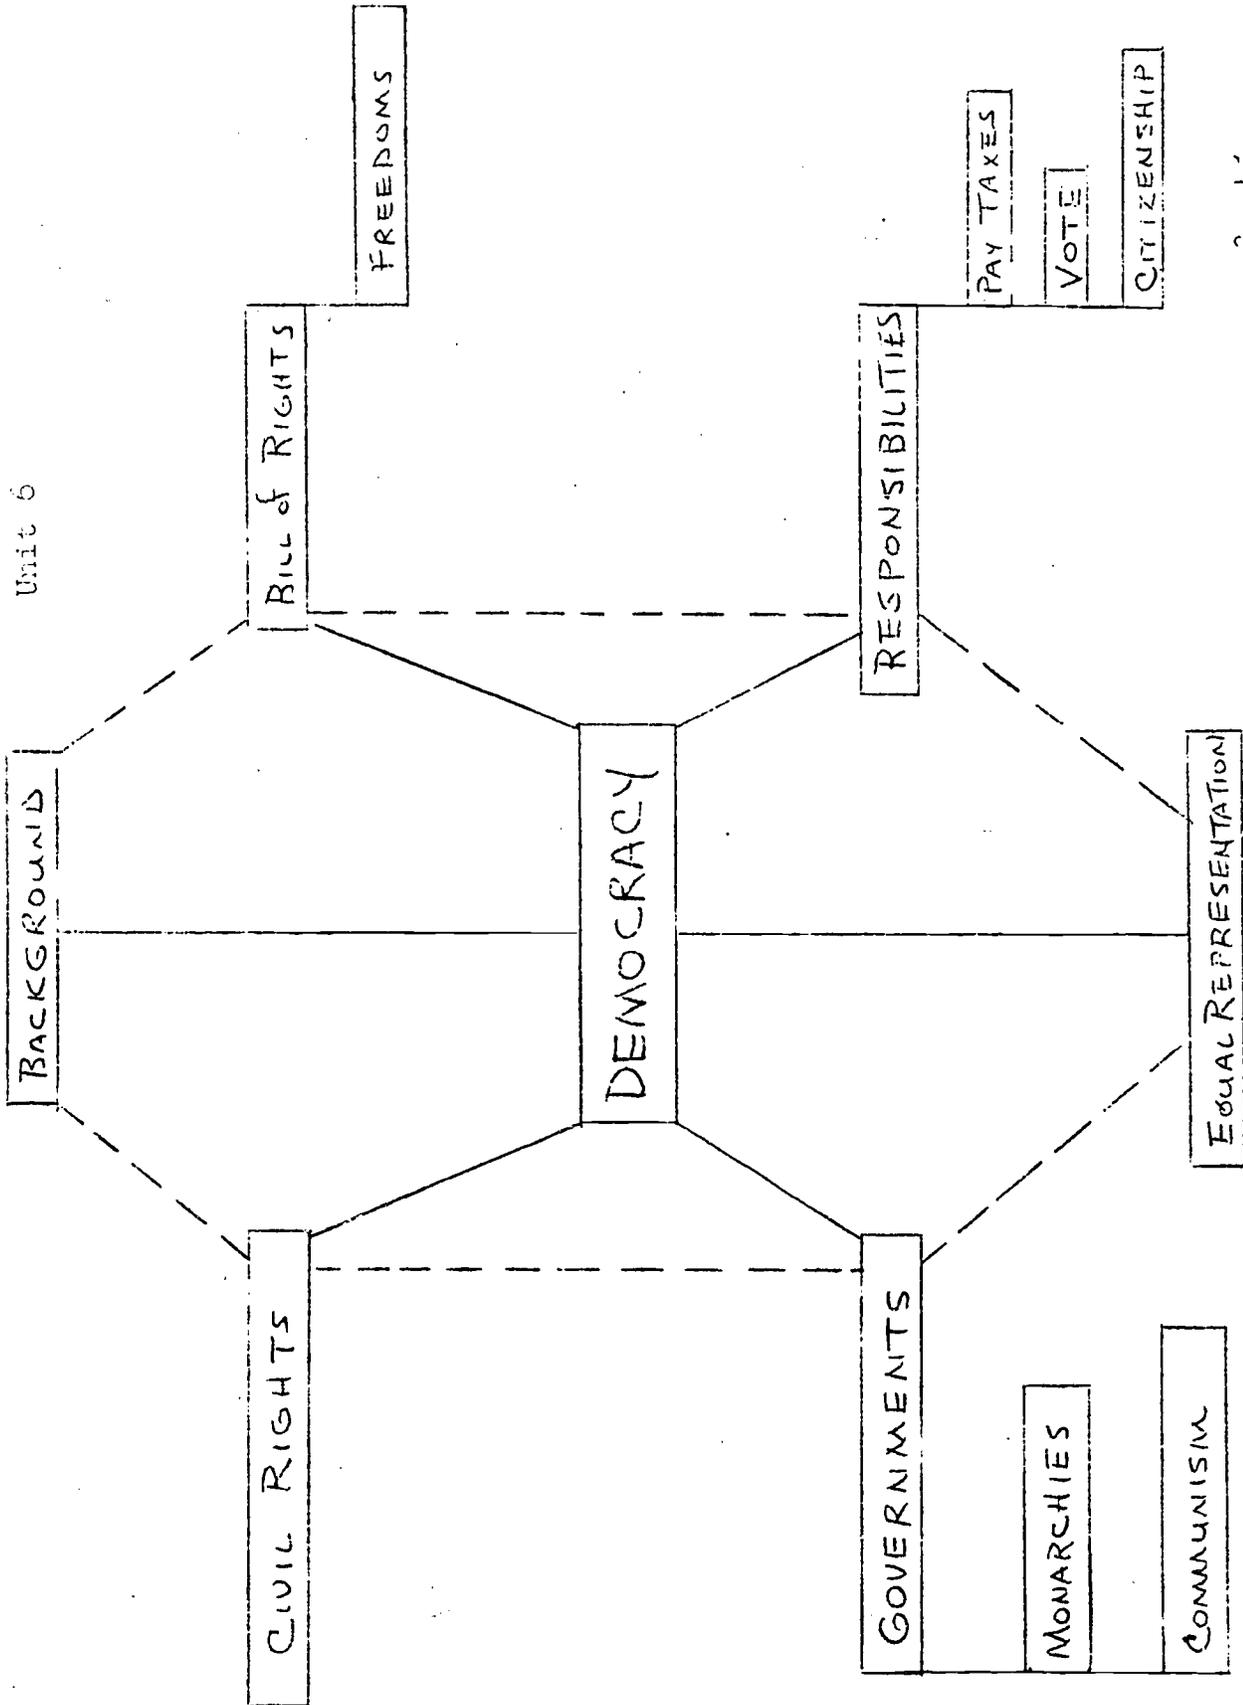

Bill of Rights

Carousel slides: Federal System, Division of Powers, Constitution

Filmstrips: Federal Government Series, Constitution of the U.S. Series, Communism: What You Should Know About It and Why

Suggested Student Outcomes for Unit V

1. Students will identify a wide variety of careers in government, will relate the requirements and preparation for a specified job, and will describe the duties performed and the benefits derived from such employment.
2. Students will name and describe the functions of the three branches of our government and will show the interrelationship of job activities in each branch.
3. Students will identify the many services rendered by the government.
4. Students will discuss current events in government and will correctly use designated governmental terms.
5. Students will list key persons in government and will identify the job(s) which they perform.
6. Students will indicate the similarities in structure and function of local, state and federal government.
7. Students will compare the structure and function of our government with that of other nations in the world.
8. Students will briefly state the historical background of our government.

UNIT VI - DEMOCRACY

EDUCATIONAL GOALS:

Encouraging each child to become a democratic person whose behavior is guided by democratic values.

Using dependable sources of information; locating, evaluating, selecting, organizing and presenting information effectively; and basing action on sound conclusions.

Guiding each child to develop into a useful and well-adjusted citizen by participating in and improving community life and by achieving feelings of adequacy as a person and as an accepted member of the group.

Stimulating curiosity and providing information and motivation that will enable each individual to make intelligent career choices in the future-- choices that are compatible with one's interests and abilities as well as one's plans.

CONCEPTS:

An understanding and acceptance of self is important throughout life.

Persons need to be recognized as having dignity, worth, rights and responsibilities.

Individuals differ in their abilities, interests, attitudes and values.

Governmental environment and individual potential interact to influence career development.

UNIT OBJECTIVE:

Students will be presented with the concept of democracy as a way of life and will be guided by its principles and values while appreciating the sacrifices and contributions made to promote democratic living in the United States.

INFORMATIONAL
OBJECTIVES:

Students will use correctly the word "democracy" so as to be able to intelligently communicate basic concepts.

Students will identify the basic features of a democracy.

Students will name and identify important personalities in history responsible for the development of democracy and will point out leadership characteristics as related to career development.

Students will list the responsibilities and rights of citizens in a democracy.

Students will list some of the changes that have taken place in our society as a result of specific events in the development of democracy.

Students will identify the problems of a democracy by citing ways a democracy can be improved.

Students will contrast the features of American democracy with other forms of contemporary government. (Monarchy, Communism, etc.)

UNIT OBJECTIVE: Students will be presented with the concept of democracy as a way of life and will be guided by its principles and values while appreciating the sacrifices and contributions made to promote democratic living in the United States.

STRATEGIES

Write an essay on economic freedom in the U.S.

Write a biography on one American whom you think has contributed the most to the development of democracy through his contribution in the career world. Be prepared to defend your selection.

Have students list the characteristics of a good citizen in a democracy. Discuss how technology has made it easier for a person to be a good citizen.

Play a game.

Debate a current question concerning democracy and careers. Example: Watergate.

Practice democracy in the classroom in class activities.

Write an account of an activity observed at school or elsewhere. Indicate whether the action involved supports or violates the principles of democracy.

RESOURCE
MATERIALS

Book: Any basic American History text, encyclopedia

Filmstrips: Founders of American History Series, Books: Who's Who, any basic American History text, biographies

Book: Any basic American History text

Encyclopedia,
Game: "Democracy"

Newspapers, magazines,
current publications

UNIT OBJECTIVE: Students will be presented with the concept of democracy as a way of life and will be guided by its principles and values while appreciating the sacrifices and contributions made to promote democratic living in the United States.

STRATEGIES

**RESOURCE
MATERIALS**

Make a list of the various occupations in and around the school. Investigate each to determine if it operates on a democratic basis.

Discuss the entry of women into such occupations as jockeys, engineers, and mail carriers, stating the law which says there can be no discrimination because of sex.

Role play a situation of working men. One student could represent a factory owner, another a worker and another a union organizer.

Invite a recent immigrant to the class to tell about his group's culture, about its contributions to American life and about its life in the United States.

Promote school or community improvement through voluntary student action.

Current publications,
resource person

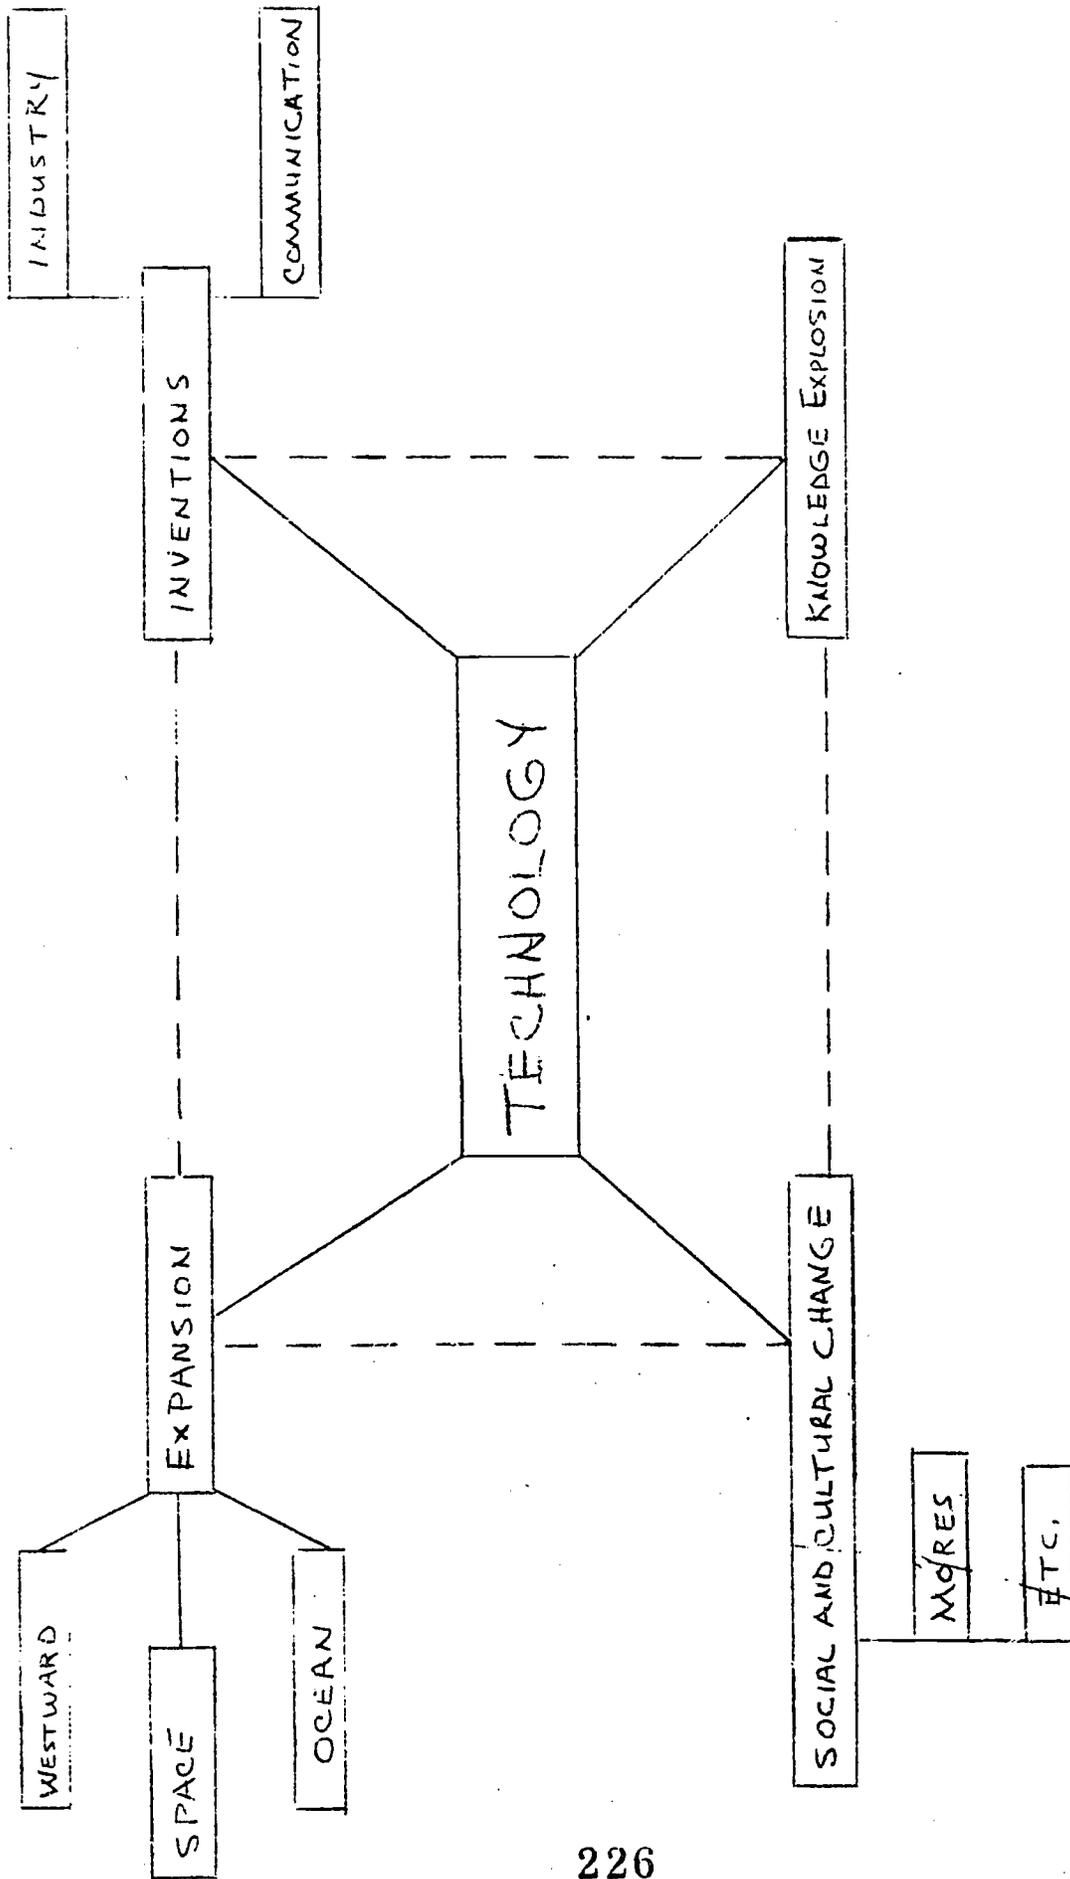

Library

Resource person from
the community

Suggested Student Outcomes for Unit VI

1. Students will define the word "democracy" and will cite examples of democracy at work in American society.
2. Students will name other countries that have a democratic system of government and will indicate the similarities and differences between the structure of those governments and ours.
3. Students will list some of the changes that have taken place in American society as a result of the functions of a democratic system of government.
4. Students will demonstrate democratic principles as they interact in the classroom, at home and in the community.
5. Students will identify the basic features of a democratic form of government.
6. Students will identify and communicate the basic concepts of democracy.
7. Students will name and identify important historical personalities responsible for the development of our democratic system and will point out the leadership characteristic as a prerequisite for success in a chosen career.
8. Students will list the responsibilities and rights of citizens in a democracy.
9. Students will identify some of the problems of a democratic system and will suggest ways the system can be improved.
10. Students will compare and contrast features of American democracy with other forms of contemporary government (monarchy, communism, etc.).

Unit 7

Unit 7

UNIT VII - TECHNOLOGY

EDUCATIONAL GOALS: Coping intelligently with change, in as much as change is inevitable and desirable in developing situations and participating effectively in bringing about new conditions for the improvement of living.

Acquiring and using practical information concerning such concepts as: production of goods and services, transportation, distribution, communication and conservation of natural resources.

Understanding and appreciating the impact of: scientific advancement and education upon ways of living; the effect of moral and spiritual values upon human behavior; ways to improve family life, community living, and national and international welfare; and the increasing interdependence characteristic of modern living.

Stimulating curiosity and providing information and motivation that will enable each individual to make intelligent career choices in the future-- choices that are compatible with one's interests and abilities as well as one's plans.

CONCEPTS: Occupational supply and demand has an impact on career planning in our technological society.

Job specialization caused by assembly production is an example of interdependency resulting from technology.

Job characteristics and individuals must be able to adjust to the deletion and development of various occupations caused by technology and the knowledge explosion.

Work means different things to different people.

UNIT OBJECTIVE: Students will demonstrate an understanding and an appreciation of the impact that scientific advancement and technological change have had upon our way of life.

INFORMATIONAL
OBJECTIVES:

Students will use correctly certain terminology connected with technology. (Mass production, interchangeable parts, assembly line, power, energy, etc.)

Students will determine the advancement of technology in transportation and the various occupations this offers.

Students will show technological progress in communications and will identify the careers related to this field.

Students will show a cause and effect relationship between technology and disease and will identify the health careers involved.

Students will compare and contrast the positive and negative aspects of technology.

Students will indicate the effects technology has produced on expansion in relation to space.

Students will cite the effects technology has had on expansion in relation to the oceans.

Students will indicate the effects technology has or has not had on their career choice (e.g., supply and demand).

UNIT OBJECTIVE: Students will demonstrate an understanding and an appreciation of the impact that scientific advancement and technological change have had upon our way of life.

STRATEGIES

RESOURCE MATERIALS

Plan a trip to a local factory. Arrange to see the production of one item from raw material to finished product. Ask a representative to tell about conditions in the factory. Compare what you saw and what you read about working conditions.

Book: Free and the Brave, Local factory, factory representative

Plan a field trip to the Norfolk Naval Base. Arrange a tour of a modern, present-day passenger ship and a battleship.

Public transportation vehicle, ship guide

Report on: Henry Ford, Eli Whitney, Alexander Bell, Thomas Edison, Andrew Carnegie and John D. Rockefeller.

Book: Free and the Brave, Library

Research and prepare a large chart which indicates the technology that has developed since World War II in areas such as transportation, communication, industry and medicine.

Library

Collect and display models which show technological advances in transportation (e.g. automobiles, trains, airplanes, etc.).

Community

Observe the home environment. Make a list of homemaking conveniences which are in use today. Discuss with parents how these new ideas in technology conserve time and energy.

Parents and home environment

Select two new advances in technology. Arrange a bulletin board display indicating the various kinds of jobs involved. Assign students to find out the kinds of skills and abilities necessary to work successfully in each area.

Newspapers, magazines, pamphlets, industrial workers

UNIT OBJECTIVE: Students will demonstrate an understanding and an appreciation of the impact that scientific advancement and technological change have had upon our way of life.

STRATEGIES

Visit three major local industries. Find out how many persons they employ and how many of their employees live outside of the city.

Invite several parents working on different jobs to the class to discuss their occupations.

Play the "Who Am I" game on famous pioneers of industry.

Take specific field trips to the four areas of technology emphasized in our unit: Communication, Transportation, Industry and Medicine.

Automobiles, televisions, and radios are factors that have greatly changed American life. Draw a graph showing the rise in the production and consumption of them.

Compare and contrast the development of industry in the U.S. and in other nations.

Write a paper: "What Life Would be Like Without Modern Conveniences."

Have a demonstration of the positive and negative aspects of the effect technology has had upon ecology. (Charts, field trips, discussion and research, essays.)

RESOURCE
MATERIALS

Local industry
plant manager

Parents

Book: Free and the
Brave, encyclopedia.
Game: "Who Am I?"

T.V. station, airport,
hospital

Book: World Almanac

Book: World Almanac,
Library

Filmstrips, library

Suggested Student Outcomes for Unit VII

1. Students will relate the numerous ways by which our lives are influenced by technology.
2. Students will trace the historical development of technological advancement in American society.
3. Students will compare and contrast the positive and negative effects of technology upon our lives.
4. Students will select one phase or aspect of technology (transportation, communication, etc.), trace the stages in its development and indicate how it has changed the way we live.
5. Students will indicate how advancing technology affects one's career choice or choices.
6. Students will explain the effects of technology on supply and demand.
7. Students will describe the processes involved in mass production.
8. Students will indicate the influence advanced technology has had and is having upon the creation of new jobs. Students will list several such new jobs found in the community.
9. From a selection of diversified careers in technology, students will make a chart indicating the following: duties performed, salary range, preparation necessary, demand for and benefits derived from participation in each career selected.

EVALUATION

1. Observe the extent to which each pupil displays:
 - a. democratic involvement in group and committee work and discussions
 - b. interest in community
 - c. acceptance and understanding of other races and ethnic groups
 - d. effective use of new vocabulary
 - e. awareness of the world of work.
 - f. attentiveness and interaction with resource persons
 - g. changes in attitudes and behavior toward themselves, others and the world of work.
2. Administration of tests
 - a. pre-test and post-test
 - b. oral and written test - objective and essay
3. Evaluation by students
 - a. self
 - b. unit
