ABSTRACT

Within this document, and presented in their entirety, are five reports which depict differing views of Delaware County Community College (DCCC) from 1974 through 1980. The reports consist of both historical and predictive data, evolved from staff work related to long and short range planning. The general framework for this activity revolved about the American Management Association planning process interacting with the National Center for Higher Education Management Systems (NCHEMS) products. The individual reports comprising the document include: (1) Long Range Planning at DCCC 1975-1980; (2) The Institutional Plan 1977-78; (3) Information Exchange Procedures, Data Formats and Definitions for DCCC Fiscal Year 1974-1975, utilizing the Information Exchange Procedures (IEP) developed by NCHEMS, a set of standard definitions and procedures for collecting data about disciplines and student degree programs, outcomes of instructional programs, and institutional characteristics; (4) A Costing Profile of Instructional Activities at DCCC for the 1974-75 Fiscal Year (instructional costs by discipline, student costs by year, program full cost per student credit hour); (5) A Summary of 1974-75 and 1975-76 Instructional Credit Hour Activities and Projections for 1976-77 and 1977-78. The reports are intended to serve as examples of differing types of data which are available for planning and management when management products are combined with planning processes. (JDS)

PREFACE

Throughout the past year, the staff at Delaware County Community College have spent a considerable amount of time and effort in an attempt to construct a planning/management environment as an aid to future College operations.

The general framework for this activity has revolved about the American Management Association (AMA) planning process interacting with the National Center for Education Management Systems (NCHEMS) products. Within this document, and presented in their entirety, are several reports which depict differing views of the College from 1974 through 1980. They consist, of course, of both historical and predictive data; and, they evolved from staff work relating to long and short range planning.

These are to serve as a representative example of differing types of data which are available for planning and management when management products are combined with planning processes.

The next step at DCCC is the implementation of a more complete planning/management framework through funds provided by a recent AIDP Grant.

PART I

Introduction

The process of planning at DCCC is intended to gather information for analysis leading to decisions that will enhance College development. Through the efforts of the Board of Trustees, administrative officers, faculty, students and community, the results of such a process will produce specific plans for short and long range program development. It is generally recognized by those concerned that the planning process will directly influence College development.

The planning process at DCCC is currently separated into two distinct areas: 1) operational or short range planning; and 2) long range planning. Short range planning is being carried out in a 20-month cycle guided by the development of a Planning, Programming, Budgeting System calendar. Long range planning is currently under review; however, the initial phases of implementation are completed and presented within this document.

Operational or Short Range Planning

Operational planning at DCCC focuses upon primary and secondary dates, functions, and responsibilities. Primary dates and functions are defined as those major "all college" items which must be completed at appropriate times in order for the College to operate. Secondary dates and functions are those set by major administrative offices which refer to their responsibility and which relate to primary functions.

The operational planning of the College revolves about a 20-month planning cycle which is depicted in Figure 1. This calendar is issued

DELAWARE COUNTY COMMUNITY COLLEGE
Planning/Management System
Academic Year 1977-78
(36 Month Cycle)**

PRIMARY DATES AND FUNCTIONS

January to May 1978	June 1978	July 1978	August 1978	September 1978	October 1978	November 1978	December 1978
Prepare 1977-78 Institutional goals and plan. (President's Staff) Prepare 1977-78 enrollment plan. (President's Staff) Approve 1977-78 Institutional Goals and plan. (Board of Trustees) Approve 1977-78 enrollment plan. (Board of Trustees) Approve 1977-78 college calendar. (Board of Trustees) Approve 1977-78 institutional program and unit goals. (President)		Approve preliminary 1977-78 formula budget. (President)	Submit 1977-78 budget estimate to State. (Business Office)	Present preliminary 1977-78 budget data to Finance Committee. (Business Office)	Present preliminary 1977-78 budget data to Sponsor's Liaison Representatives. (President)	Submit 1977-78 budget to Finance Committee. (Business Office)	Present 1977-78 budget to Board of Trustees for approval. (President)

SECONDARY DATES AND FUNCTIONS

January to May 1978	June 1978	July 1978	August 1978	September 1978	October 1978	November 1978	December 1978
	Prepare preliminary 1977-78 formula budget. (Business Office)	Start 1977-78 line item budget preparation. (Business Office)	Submit 1977-78 unit budget data to Business Office. (Aress) Prepare preliminary 1977-78 budget data for Board presentation. (Business Office)	Hegis reports requirements received. VARIOUS RESPONSE DATES. (President's Staff) Update enrollment actual & projections (Planning)	Issue final examination schedule for Fall 1976. (Instruction) Summer Degrees awarded. (Instruction)	Issue Advisement schedule for Inter-session & winter 1977. (Instruction) Course offerings for Inter-session & winter term 1977 issued. (Instruction) Issue registration schedule & instructions for Inter-session & winter 1977 term. (Planning)	Recommendation for Faculty promotions. (Instruction)

Figure 1

January 1977	February 1977	March 1977	April 1977	May 1977	June 1977	July 1977	August 1977	September 1977
1977-78 budget approved by Board of Trustees.	Sponsors approve 1977-78 budget.	Sponsors approve 1977-78 budget.	Sponsors approve 1977-78 budget.			Make annual report to the Board of Trustees. (President)		Classes begin for Fall Term 1977-78 Academic Year.
Hold meetings with Sponsors on 1977-78 Budget. (President)			Ratify new and returning 1977-78 staff employment contract. (Board of Trustees)					
Classes begin for winter term 1977.								

January 1977	February 1977	March 1977	April 1977	May 1977	June 1977	July 1977	August 1977	September 1977
Ratify intersession Employment Contracts by Board of Trustees.	Fall Degrees Awarded. (Instruction)	Issue Examination schedule for winter 1977. (Instruction)	Compile annual report to the Board of Trustees. (President's Staff)	Submit requests for graduate study tuition. (Areas)		Issue Final Examination Schedule for Summer 1977. (Instruction)		Ratify coadjutant employee contract for Fall term. (Board of Trustees)
Release college catalog, 1977-78 to printer. (Community Relations)	Update enrollment actuals & projections. (Planning)	Issue advisement schedule & instructions for students returning for Fall term 1977. (Instruction)	Complete Personnel evaluations. (Areas)	Issue final Examination schedule for Spring 1977. (Instruction)				
	Ratify coadjutant employee contracts. (Board of Trustees)	Course offerings for Summer sessions & Fall term 1977 issued. (Instruction)	Submit copy of approved 1977-78 budget to State. (Business Office)	COMMENCEMENT				
		Issue registration schedule & instruction for Summer session & Fall 1977 term. (Planning)	Submit new & returning staff employment contracts to Board of Trustees. (Business Office)					

in January of every year to officially initiate the planning related to the academic year twenty months hence. An important technical process integrated with short range planning is the implementation of the National Center for Education Management Systems (NCHEMS) Costing and Data Management System as well as their Resource Requirement Prediction Model (RRPM 1.6). When the planning which is suggested within the calendar is integrated with NCHEMS products, feasible courses of action are formulated through a systematic consideration of alternatives. The end result is a line-item budget prepared through program considerations.

Long Range Planning

A long range planning group comprised of Trustees, executive officers, and administrators was established at the College early in 1975. Assisted by the American Management Association (AMA), the group has followed a quasi-structured format in reviewing previous goals and objectives of the College.

This process is a step-by-step procedure through the following areas: Mission, Policy Guidelines, Beliefs, Environmental Analysis, Developmental Area, Critical Issues, Key Performance Areas, Objectives, and Action Planning. Implementation of the College long range plan will give fairly specific direction for operational short range planning and resource allocation.

An unanticipated result of this first planning process has been an increased awareness of the needs for further development. Two particular areas of concern include: 1) the need for more meaningful

¹
See Appendix I for further information about the AMA planning process.

involvement to extend to all professional groups with the College; and 2) the need for reliable, timely, and valid data to provide the pertinent background upon which to base the planning process.

Integration of Short Range Planning with Long Range Planning

The flow and relationship of short range operational planning with long range planning is depicted in a Planning, Management, and Evaluation (PME) flowchart in Figure 2. It is evident in this process that long range planning provides the impetus for planning and budgeting within the short range (20 month) cycle.

In many colleges and universities the long range and short range planning processes have developed somewhat independent of one another; however, we are searching for a process which will more closely relate these two components. We believe that maximum efficiency and effectiveness will be achieved through a meshing rather than a separation.

The remainder of this planning document will revolve about the issues of where we are, where we want to go, and how we are going to get there.

PLANNING, MANAGEMENT, AND EVALUATION (PME) CYCLE

PART II

Where We Are

Policy Guidelines

Statements representing the consensus of the management as to courses of action which are unacceptable or should be avoided, or courses of action which must be followed in future planning.²

1. The College will only offer first and second year courses in the College and University Transfer Program.
2. Preference will be given to students from local sponsoring school districts. Students from non-sponsoring areas will be required to pay all of the costs normally assessed to the local sponsor.
3. Admissions will be accepted on a first-come, first-serve basis, within the financial and program limitations of the College.
4. All program offerings shall be based on the overall needs of the community as assessed by the College.
5. The College shall maintain its status as a non-residential, community, teaching institution.
6. As a community-centered institution, the College will be a resource to the community and the community will be a resource to the College.
7. The College will not develop programs or services which unnecessarily duplicate those already offered by other agencies in Delaware County.
8. "Student Activities" shall be funded through fees assessed to students.
9. All groups within the College shall have an opportunity to contribute information pertaining to those long range decisions affecting their areas of responsibility.
10. The College shall stress better classroom and institutional management in its continuing effort to achieve quality.

2

This is an AMA definition. Note that these appear with frequency throughout the remainder of this document.

Beliefs

Mission related tenets of educational philosophy underlying policy guidelines.

As a community-centered educational institution, Delaware County Community College believes that:

1. Life styles are enriched through education.
2. Educational institutions have an obligation to help citizens achieve individual potential.
3. Education creates more productive citizens and encourages personal awareness and individual development.
4. A community-centered educational institution can make a significant contribution to the economic, social, political, and cultural welfare of the community.
5. Everyone can benefit in some way from education.
6. Every citizen should have access to education beyond the secondary school level.
7. An educational institution should provide a humanistic environment recognizing individual dignity and worth.
8. Citizens who make appropriate career choices tend to lead more productive and satisfying lives.
9. An educational institution should provide individuals with opportunities to include in their respective career plans: 1) preparation for gainful employment; 2) intellectual growth through development of interests outside their vocational pursuits; and 3) physical and emotional well-being through the development of life-time hobbies.

Environmental Analysis

The identification of major environmental factors which may have a present or future impact on the organization. Characteristically the organization has little control over these factors; therefore, the management must develop agreed-to assumptions about these factors and how they may affect-- positively or negatively-- the future of the organization.

During the next five years, the College is anticipating various changes in the student body, both in terms of their own background characteristics and the concomitant effect their coming to the College should have on the programs and services of the College.

In summarizing the current status of the student population, the following should be considered as descriptive:

The College population is mostly from areas within Delaware County that sponsor the College. The students tend to be first generation college students from middle and lower middle class homes. Parental occupational level tends to be semi-skilled, skilled, semi-professional, managerial, and sales. If the student is full-time, he tends to have a part-time job on or off campus and approximately 40% of all students receive some form of financial aid. The College student body is composed of two primary groups - recent high school graduates (ages 17-20) who comprise 41% and tend to be full-time students, and older persons (ages over 21) who comprise 59% and tend to enroll on a part-time basis. However,, 33% of the students over 21 years are enrolled full-time. Approximately 20% of the students are women over 21 years (which is 45% of all women students). Approximately 13% of the students are veterans who are enrolled, 60% part-time and 40% full-time. The student body is predominantly white with approximately 7% of the students categorized as minority.

Of 2586 part-time students (53% of Fall, 1975 enrollment), 85% (2193 students) are enrolled exclusively in the evening. Over 25% of the students attended private or parochial high schools (Catholic) and 5% hold High Equivalency Certificates. The recent high school graduate tends to have a "C" average in high school and an ACT test score which is less than the national average for two year colleges. Older students tend to have not considered college seriously in the past and by their reports were not considered "college material" when in high school.

Although the college level matriculated students (2335 students or 46% of student body) tend to enroll more frequently in college and university parallel or transfer programs, a considerable percentage (44%) are matriculated in occupational programs. The most frequent curricular majors for matriculated students are: Liberal Arts (34%), Occupational Business Cluster Programs (19%), Business Administration (15%), and Public Service Cluster Programs (13%). Nineteen percent of the matriculated students enroll in all other curricular programs.

In the non-matriculant categories, 1110 students or 23% of all students are developmental while 31% (1521 students) are mostly part-time non-matriculated students. It is estimated that approximately 50% of all entering students are at the time of admission considered weak in one of four academic areas (mathematics, reading, English or science) and approximately one-half of these students

are currently taking developmental (remedial) courses during the first term of enrollment.

Approximately 50% of the students return for a third semester of enrollment while approximately 20% persist and graduate or accumulate sufficient credits to be eligible for graduation.

The changes anticipated in the next five years include:

- (1) Increased enrollment to approximately 6300 to 7700 heads and approximately 4700 to 5600 FTE students by 1980. The higher estimates are based upon full county sponsorship.
- (2) Probability of county sponsorship creating the higher enrollment suggested in #1 above.
- (3) Significantly increased disadvantaged and minority enrollment due to county sponsorship.
- (4) Continued increase in percentage of older, part-time evening students.
- (5) Greater percentages of the less academically qualified students with unrealistic career and educational aspirations.
- (6) Increasing demand in the occupational program areas of curriculum.
- (7) Increasing needs for financial aid.

The changes experienced during the last few years, compounded by the apparent trends and anticipated changes in sources and characteristics of the student population, have and will continue to call for specific changes in the educational program of the College. The dynamic nature of the situation clearly indicates the need for change, especially when the nature of students coming and expected

to come to the College are considered.

Developmental Areas

Shortages, deficiencies or major problems which make it difficult to achieve the mission and objectives of the organization. Developmental Areas should be concerned with underlying causes, not symptoms. These areas should not include day-to-day problems which can be resolved by an immediate decision or problems characteristic of any well-performing organization.

The following areas were identified as needing further development in order to achieve a greater degree of success in pursuing the educational goals of the College.

Items 1-5 appeared with most frequency and are rank ordered.

1. Improve management by identifying proper role relationships at all levels including the Board of Trustees (responsibilities, duties, authority, relationships to other people, standards of performance, performance review, correction, communication).
2. Create and implement a system for establishing priorities.
- ✓ 3. Improve operational procedures to allow for adequate planning, evaluation, accountability, and follow-through.
4. Investigate means to provide services on a community-wide basis.
5. Develop methods to enhance the image of community colleges in general and further establish the identity of DCCC in the County.

Items 6-17 are identified but not ranked.

6. Take steps to improve existing facility limitations, e.g., physical education, performing arts, etc.
7. Examine high and increasing tuition costs in comparing with other community colleges in the State.

8. Improve the College's position regarding financial predictability and vulnerability.
9. Improve timetable for preparation of the budget.
10. Identify and remedy low morale apparent in some key areas.
11. Establish programs and policies to overcome "impersonal management" image.
12. Determine reasons for excessive turnover in some areas and decide on appropriate action.
13. Investigate means of improving State support of the College.
14. Establish more definitive criteria for assessing and evaluating educational needs of the community.
15. Improve efficiency in procedures.
16. Improve the effectiveness of institutional governance structure.
17. Develop a comprehensive program of faculty evaluation which includes a systematic assessment of teaching by students.

Critical Issues

List of the major controversial issues within the organization on which a management consensus can only be achieved with significant compromise. Tend to be issues which affect the basic definition of organizational purpose.

1. The role of Physical Development Programs within the College, i.e., athletics, instruction, and recreation.
2. Establish and define the role of the Board of Trustees in the affairs and operation of the College.
3. Maintaining the College's commitment to an open admissions policy.
4. Commitment of the College resources to Developmental Education.
5. Commitment of the College resources to Occupational Education.
6. Consideration of facts concerning the possible expansion of the geographical area served by the College.

7. Determine extent of unused plant and facilities, and formulate plans for further utilization.
8. How should the Board of Trustees continue to effectively manage the institution with the existence of the employee unions?

Key Performance Areas

Areas of performance most critical to the long-term success of the organization. Continued failure in any of these areas would seriously jeopardize future survival.

1. Enrollment
2. Costs
3. Facilities
4. Management
5. Sponsorship Expansion
6. Attrition

PART III

Where We Want To Go

Mission

The mission is the broadest, most comprehensive statement that can be made about central or continuing purpose. The chief function or responsibility of an organization which justifies continuing support of the organization by society and which provides initial direction for the management or administration of the organization. The purpose of the mission statement is to provide a focus for the resources of the organization.

The mission of Delaware County Community College is to offer educational programs and services which are comprehensive, accessible, flexible and community-centered in order to enhance the development of our community and its residents.

Strategic Objectives

1. Management Systems shall be developed and maintained to optimize effectiveness and efficiency of College programs and services.
2. Appropriate Programs and services shall be offered so that students enrolled and continued in programs consistent with their educational needs.
3. Opportunities at the College shall be extended to all residents of Delaware County on an equitable basis.
4. Adequate facilities shall be provided for educational programs and services.

The above listed strategic objectives were selected, from a larger list, in their order of importance as being those most worthy for implementation.³ The others would be reviewed annually and

3

See Appendix II for a complete list of strategic objectives.

either be replaced or added to the implementation list. Also, during this annual review, new objectives could be suggested for implementation.

PART IV

How We Are Going To Get ThereStrategies

Broad courses of action designed to achieve strategic objectives.

- A. Management Systems shall be developed and maintained to optimize effectiveness and efficiency of College programs and services.

1. Buy management systems.
2. Buy services from a management service bureau.
3. Develop a management system.
4. Develop a management system with appropriate help.

- B. Appropriate programs and services shall be offered so that students are enrolled and continued in programs consistent with their educational needs.

1. To develop and maintain an evaluation system that will lead to the offering of programs and courses meeting the educational needs of the students.
2. To develop and maintain a retention system that will lead to the offering of programs and courses meeting the educational needs of the students.
3. Implement Advanced Institutional Development Program (AIDP).

- C. Opportunities at the College shall be extended to all residents of Delaware County on an equitable basis.

High
Priority

1. County government sponsorship.
2. Total County sponsorship through municipalities.
3. State subsidy of community colleges.
4. Increase contracted educational services.
5. Federal assistance programs.

Medium

- Priority 1. Total County school district sponsorship.

2. Increase extension centers, etc.

Low

Priority 1. Charge back (legislation).

2. College direct tax (legislation).
3. Financial aid for "non-sponsored" students.
4. State operation of community colleges.

D. Adequate facilities shall be provided for educational programs and services.

1. To construct new facilities.
2. Obtain off-campus facilities.

PART V

Summary

The process of planning at DCCC is intended to gather information for analysis leading to decisions that will enhance College development. This process is currently separated into two distinct areas: 1) operational or short range planning; and 2) long range planning. In many colleges, these components have developed independently of one another; however, DCCC intends to closely relate these components with the belief that maximum efficiency and effectiveness will be achieved through a meshing rather than a separation.

A long range planning group comprised of Trustees, executive officers, and administrators was established at the College early in 1975. Assisted by the American Management Association (AMA), the group followed a quasi-structured format in order to produce a long range plan for the years 1975-1980.

Four strategic objectives were selected by the planning group as appropriate for implementation during the 1975-1980 timeframe. These are as follows:

1. Management Systems shall be developed and maintained to optimize effectiveness and efficiency of College programs and services.
2. Appropriate programs and services shall be offered so that students are enrolled and continued in programs consistent with their educational needs.
3. Opportunities at the College shall be extended to all residents of Delaware County on an equitable basis.
4. Adequate facilities shall be provided for educational programs and services.

AMA has recommended that this group meet again in November, 1976, to evaluate progress to date and to review strategic objectives as to their appropriateness for the remainder of the period (1975-1980).

APPENDIX I

THE TEAM PLANNING PROCESS

PURPOSE

To increase a management team's desire and ability to develop and maintain an effective management system. Participants may expect observable improvement in relation to the following.

SUCCESS CRITERIA

1. A Team - A group characterized by:
 - a) A commitment to results.
 - b) A commitment to a common body of objectives.
 - c) A common language.
 - d) A candid environment.
2. A Plan - A specification of what will be done, by whom, by when, for what purpose--consistent with longer term considerations.
3. Planning Skills - The ability to:
 - a) Differentiate between ends and means.
 - b) Develop realistic strategies in light of environment and resources available.
 - c) Delegate effectively without abdication.
 - d) Create an organizational climate which enhances each individual's desire and ability to contribute to organizational objectives.

THE TEAM PLANNING PROCESS PROCEDURE

Essentially, the team process consists of:

1. Detaching the chief school officer and his top managers from their daily jobs to enable them to concentrate on developing their planning skills.

-2-

2. Placing the team in an environment conducive to an intensive study and solution of organization's planning problems.
3. Providing skilled guidance and controlled direction throughout the planning process so that top management acquires the skills to produce and implement a workable long-range educational plan.

THE FIRST STEP IN THE PROCESS

Following the decision to participate in the Center's Team Planning Process, a meeting is arranged with the Team Director. At this meeting, the chief school officer and the Director agree on the make-up of the executive team which will be involved in the planning process. The Director outlines the content and purposes of the planning process, reviews the organization's previous experience in planning, obtains existing plans, if available, and requests pertinent background information on the organization. The director and the CSO may also agree upon some preliminary work assignments to facilitate progress during the first week's meetings.

FIRST FIVE-DAY SESSION

The objectives of this week are to:

1. Agree upon a definition of the nature of the organization, the policies which guide its future development, its organization and manpower resources, and its fundamental characteristics.
2. Analyze existing resources and identify strong areas that can be exploited--and weak areas that should be strengthened.
3. Establish tentative objectives for the long-term continuing development of the organization and specific targets to be reached during the planning period.
4. Determine what kinds of additional information will be needed about specific aspects of the organization to evaluate possible courses of action.
5. Assign specific data-gathering tasks to members of the team, and realistic due dates for assembling this data. On the basis of these due dates, the organization will schedule its second five-day session.

-3-

INTERSESSION FOR DATA GATHERING

The length of time between the two sessions is determined by the quantity and availability of the information required. This interim ranges from two to six months. While it should be kept as short as possible to conserve the momentum of the process, it is essential that all necessary input data be converted into, and presented, in a meaningful form--before the second session begins.

The input data is submitted to the Director at least three weeks before the second session. Depending on the firmness of the tentative objectives set in the first week, teams may also wish to assemble data for alternative strategies to achieve objectives.

THE SECOND FIVE-DAY SESSION

Following the data-gathering phase, the planning team has analyzed enough information to be able to recognize significant internal trends--and their relationship to outside influences. It is now ready to:

1. Define planning "gaps"--the difference between where the organization is going and where it wants to go.
2. Modify preliminary objectives.
3. Analyze alternative courses of action.
4. Break down strategic courses into specific action assignments; listing exact standards of performance and estimated times of completion.
5. Design specifications for supplementary planning efforts to be carried out in subordinate units of the organization.
6. Agree on the timing, degree of detail and format in which planning decisions will be communicated by top management to other areas of the organization.
7. Develop a guide for future planning.

KEY PERFORMANCE AREA
(critical to long-term success)

COLLEGE

Key Performance Indicators
(to measure level of performance)

EFFICIENCY

1. Income
2. Expenditures
3. Manpower ratios
4. Income/Credit Hours
Full Credit Hour Cost
5. Instructional salaries

1.1	1128	37%
1.2	1087	36%
1.3	368	12%
1.4	437	15%

3020

1975-76 FTE cost: \$1331

1970-71	\$1068
1971-72	1167
1972-73	1209
1973-74	1288
1974-75	1353
1975-76	1331

1975-76 Income = Expenditures:
YES, at \$1500 State FTE Base

- Developmental and Basic will remain a constant percentage.
- Community Education will be a decreasing percentage but a constant FTE.
- College & University Parallel will decrease as a percentage of the total but increase in students.
- Occupational will increase as a percentage of the total and students.

Difference/Year

76-77	\$16
77-78	20
78-79	20
79-80	13

If \$1500 Base is constant,
then Income = Expenditures
through 1979-80.

- To keep student cost as low as possible.

1970-71	\$ 372
1971-72	404
1972-73	416
1973-74	442
1974-75	482
1975-76	528
1976-77	480

1975-76 Tuition : \$528

FACILITIES

- To utilize plant and resources at optimum use for both student and community by 1979-80.
- To provide adequate new facilities needed for current identified needs.
- To modify facilities for instructional purposes as related to enrollment.
- To provide facilities related to community based mission.

Modify existing buildings

Physical Development Center,
Performing/Fine Arts Center.

Modify facilities related to developmental and occupational enrollments.

Physical Development Center,
Performing/Fine Arts Center,
Modify existing buildings.

MANAGEMENT

- To increase all levels of administrative effectiveness and efficiency.

AMA Planning Sessions, AMA Performance Standards, NCHEMS Costing & Data Management System.

Completion of these programs.

SPONSORSHIP EXPANSION

- Geographical Expansion

Present school districts.

All school districts, County,
Beyond County.

ATTRITION

- Reduce "negative" attrition.

Negative attrition - Students withdrawing or not returning to the College due to factors relating to possible deficiencies in the College's programs and services.

THE INSTITUTIONAL PLAN, 1977-78

PART I

Philosophy

The Delaware County Community College is committed to the comprehensive community college philosophy of meeting the post-high school educational needs of the community it serves. Within this area of responsibility and available resources, the College is dedicated to the policy of providing educational opportunities that will permit the youth and adults of the area to enrich their lives, develop themselves personally, and advance their careers to the limit of their desires and capabilities.

The role of the College is to offer programs and services for which it is particularly capable. It seeks to complement, not duplicate unnecessarily, those offered by other community institutions and agencies.

Mission

The mission of Delaware County Community College is to offer educational programs and services which are comprehensive, accessible, flexible and community-centered in order to enhance the development of our community and its residents.

Long Range Institutional Purposes

In adopting this statement of goals, the Board of Trustees wishes to provide the staff of the College with additional guidance for carrying out the mission of the College as set forth in the College Philosophy. They are long range aspirations, which can come closer to reality as we give them attention and emphasis.

The mission states that the College should be accessible, comprehensive, community-centered and flexible. Each of these major concepts need further definition in order that the joint efforts of all concerned can be directed most effectively.

Accessibility

In stating the goal of accessibility, the Board desires that the College be geographically, economically, socially and educationally accessible to citizens of the community. Facilities are now and should continue to be conveniently located with respect to geographical and population centers of the area serviced, for a community college is an institution for commuters. The College should make every effort, in programs of financial assistance, to ensure that no applicant is denied admission to the College because of lack of funds. Educationally, the door of the College should be open to students with a wide diversity of backgrounds and

abilities. Further diversity should be encouraged by making the College socially accessible to stimulate attendance by those who otherwise would not aspire to higher education.

Comprehensiveness

To be fully comprehensive means that the institution should be comprehensive in Instructional Programs, in Student Services, and in Educational Methods. In doing so, the College aims to be student-oriented rather than institution-oriented. To be comprehensive in programs is to provide a broad range of offerings in response to student and community needs. In addition, student services are comprehensive when they provide the individual student not only a range of service but an integrated program aimed at assisting each student toward increasing maturity and personal development in his collegiate years. Comprehensiveness in method means that instruction should be presented in the most appropriate manner for the diversity of individuals and disciplines involved.

Recognizing that its Philosophy encourages the enrollment of people with differing abilities and objectives, the College will strive to offer a wide variety of curricula and courses. The College also recognizes that its basic Philosophy necessitates the inclusion of opportunities for experiences which will assist in the development of a more broadly educated person who has a better grasp of the interrelationship of

knowledge fields, can think and express himself more effectively, can make more relevant judgements and discriminate among values, and can make more appropriate applications of his knowledge. These opportunities to achieve commonly accepted goals of a good general education will be provided to the student in all of his activities at the College throughout his total College experience.

Once a student has clarified his career direction, the College will attempt to help him create, where feasible, an individually tailored curriculum from among those courses which the College offers. Recognizing that the process of education is a uniquely individual affair, the College should publish curricular patterns of courses only as guidelines to assist students in meeting minimum requirements in preparation for specific career objectives or the requirements of other institutions or agencies.

In striving to be comprehensive, the College should provide:

- * Courses whose purpose is to provide basic skills and knowledge for students to enable them to qualify for admission to the other programs. (Basic Education)
- * Courses of a remedial nature designed with the objective of helping students to qualify for admission to a College and University Parallel, an Occupational or General Program. (Developmental Education)
- * General Education curricula of two years or less duration which are designed as discreet educational

programs for students desiring additional education beyond secondary school but not necessarily with a particular occupational orientation. (General Education)

- * Occupational curricula of two years or less duration which are designed as discreet educational experiences for students preparing for immediate employment in an area of specialization, for which there is a community need and an employment potential, upon completion of the curricula. (Occupational Education)
- * The first two years of college instruction for students planning to transfer to four-year colleges or universities to complete the requirements for a baccalaureate degree. (College and University Parallel Education)
- * Opportunities for citizens of the community to enrich their lives; to increase their potentialities as wage earners, as creative beings, and social individuals; and to realize the importance of individual excellence. These opportunities are provided through all of the other educational programs offered by the College as well as through specifically-designed courses, seminars, lecture series, workshops, and other types of educational and cultural activities. (Community Service Education)

The College accepts a diverse population of applicants representing a wide spectrum of abilities, interests, ages and socioeconomic backgrounds. Each of these students has a broad span of unique characteristics that will affect his performance in and out of the college community. The College accepts

responsibility for providing a structured student service program which has as its chief concern the overall growth and development of individual students.

These programs should include those which will help the student better understand himself and others, both in the college community and in the larger society. First, each student needs to acquire a positive and realistic conception of his own abilities in the world of higher learning and in the world at large. Second, he needs to reach the point of being able to see the structure and interrelations of knowledge so that he may begin the process of forming judgements on his own. Third, he needs to see the relevance of higher learning to the quality of his own life and to see that life in relation to the new kinds of judgements he now makes.

Concerning comprehensiveness in educational methods, the College accepts the responsibility for providing an instructional environment that is conducive to learning. This means the providing of appropriate physical facilities where faculty and students meet, the providing of learning resources to complement classroom experiences, and the organization of the instructional process so that it reflects the ways individuals learn best.

The College must develop a variety of methods to help students learn, encourage instructional innovation and accept its responsibility to provide ways to reach individual students.

Community-Centeredness

The third major goal is that the institution be truly community-centered. As a locally sponsored two-year college whose purpose is to meet community postsecondary needs, it is essential that these needs be defined and recognized, and two-way communication developed with the community. The College should be sensitive to the concerns of its many publics. The Board of Trustees, itself, as the representative of the Local Sponsor, should be the chief vehicle for coordinating communication with the Local Sponsor. Lay committees, to advise on curriculum development or liaison representatives from the sponsoring school districts, should facilitate communication. The College is obligated to the Local Sponsor to use wisely the resources provided. The ultimate goal of community-centeredness is the accountability of the College for carrying out the mission and charge given to it by its sponsor at the time of founding. Furthermore, the College should invite community involvement and interest and seek to become a community cultural center. Community use of the College facilities should be encouraged.

Flexibility

The goal of flexibility or adaptability should help to place a perspective on the College's role, particularly during any one period. Flexibility means that the College is a

dynamic institution, which can truly adapt to changing needs, changing circumstances, changing aspirations. This implies a commitment to experimentation and innovation, but also to evaluation of the success of the projects carried out, with an understanding that some experiments may not be completely successful. The College should be committed to regularly evaluating present offerings in terms of need and effectiveness in addition to serving new needs. In fulfilling its educational mission and in aiming to be accessible, comprehensive, and community-centered, the College should be flexible in allocating its resources so that its institutional goals can be achieved in a planned program of emphasis and development.

1977-78 Goals and Objectives

General Goals

1. Maintain and improve quality and excellence of faculty, administration, and staff.
2. To continue career education implementation.
3. To continue the College's commitment to equal educational and employment opportunities.
4. To improve the College's ability to evaluate effectiveness of programs and services offered.
5. To further develop activities that will bring income from governmental and private sources.
6. To continue to study the impact of the new campus on existing continuing education functions and programs on and off campus.
7. To continue to develop improvement in the Personnel Evaluation System.
8. To continue to study existing facilities offered by the permanent campus in light of existing and future program needs.

Selected Goals

A long-range planning group comprised of Trustees, executive officers, and administrators was established at the College early in 1975. Assisted by the American Management Association (AMA), the group has followed a quasi-structured format in reviewing previous endeavors of the College. From this process, the following goals and objectives have been selected as those appropriate for major emphasis during 1977-78.

1

For a more detailed description of this process and its outcomes, please refer to the "Long Range Planning at Delaware County Community College, 1975-1980," located in the Office of Management Systems, Planning and Research.

Long Range Goal - Management Systems shall be developed and maintained to optimize effectiveness and efficiency of College programs and services.

1977-78 Objective -

1. To develop internal planning and management skills.
2. To begin management audits of existing administrative structure.
3. To begin a complete policy review.
4. To construct performance objectives.
5. To construct a framework for program accountability.

Long Range Goal - Appropriate programs and services should be offered so that students are enrolled and continued in programs consistent with their educational needs.

1977-78 Objective -

1. To further develop efforts to assess career awareness of students at time of admission.
2. To assess employment opportunities in all fields for which training could be provided by the College.
3. To implement career decision-making component during the admission process.
4. To establish more realistic placement testing practices for matriculation into degree programs.

5. To begin development of a method to better analyze reasons for attrition.
6. To begin development of a coordinated retention program.

PREFACE

The Information Exchange Procedures (IEP) developed by the National Center for Higher Education Management Systems (NCHEMS) are a set of standard definitions and procedures for collecting information about disciplines and student-degree programs, outcomes of instructional programs, and general institutional characteristics. These definitions and procedures have been developed to facilitate exchange of information among institutions of post-secondary education, providing institutions with some assurance that data they exchange are useful for purposes of comparison.

The procedures and definitions recommended in this manual and other manuals about IEP are "targets" for institutions. While it is anticipated that most institutions will be able to follow these recommendations, some institutions may not have available the required information and others may be able to provide it only at an unreasonable cost. Others may find that only after several years of using IEP can data be developed that accurately reflect the characteristics of the institutions. For some institutions the definitions and procedures may be too complex; others may find them too simplistic. Any effort at exchange of data among institutions involves some compromise in an attempt to accommodate the wide variation among institutions. Consequently, while comparable information for exchange is the goal of IEP, NCHEMS cannot guarantee absolute comparability of data as the final result of IEP. But, hopefully, implementation of IEP will represent reasonable progress toward that goal.

The Information Exchange Procedures initially were developed by the NCHEMS staff with guidance from a task force and steering committee, composed of institutional and state agency representatives. The cost procedures were tested during 1972-73 by a group of about 60 community colleges, private colleges, and state colleges and universities. The full set of exchange procedures was tested during 1973-74 in about the same number and kinds of institutions. Insights gained from these pilot tests served to refine the full range of procedures and definitions.

The Information Exchange Procedures described in Technical Report #65 have been reviewed and approved by the IEP advisory groups and the NCHEMS Board of Directors, and are being released at this time for widescale implementation. While IEP is intended to be a final product, widescale implementation may point to additional information needs of institutions that can be addressed in updates to this report if necessary. However, NCHEMS feels that IEP is sufficiently refined at this time that it can be released to the full NCHEMS general distribution mailing list and to other institutions interested in implementing IEP.

LIST OF IEP DATA FORMATS

- A.1 General Information
- A.2 Statement of the Beliefs and Mission of the Institution
- B.1 Student Information: Demographic Data
- B.2 Student Information: Headcount Enrollments
- B.3 Student Information: Enrollment Status
- B.4 Student Information: Financial Aid
- B.5 Student Information: Entering Freshmen Abilities
- B.6 Student Information: Tuition and Fees
- C.1 Resource Information: Instruction/Research Professionals
- C.2 Resource Information: Personnel
- C.3 Resource Information: Facilities
- D.1 Financial Information: Direct and Full Cost Summary
- D.2 Financial Information: Individual or Project Research
- D.3 Financial Information: Columnar Balance Sheet
- D.4 Financial Information: Current Revenues by Source
- D.5 Financial Information: Current Funds Source/Use Format
- E.1 Unit Cost Information: By Discipline and Course Level
- E.2 Unit Cost Information: By Study Program and Student Level
- F.1 Student Outcomes Information: Program Enrollments and Completions
- F.2 Student Outcomes Information: Outcomes Questionnaire for Program Completers

NOTE: The data formats have been coded by the type of information displayed on each format. For example, the A's have been reserved for general information, the B's for student information, and so forth. A third digit should be used for data formats that run more than one page, for example, D.1.1 and D.1.2.

STUDENT INFORMATION:

ACT SUMMARY OF 252 ENROLLED FRESHMAN STUDENTS FOR FALL 1974

Of this group of 252 students, 51% listed DCCC as their first choice, 2% their second choice, and 2% their third choice. Of the seven college-choice factors, the percentage of time each was chosen as "Most Important" was: Institutional type - 10%; Student-Body Composition - 2%; Location - 18%; Cost - 23%; Field of Study - 46%; and Extracurricular - 1%.

The typical student in this group had an ACT composite score of 15.5 and a high school average of 2.4. This compares to national averages of 19.5 and 2.8, respectively (enrolled freshman norms). The student typically was in a college preparatory high school program. At the time of testing, the student thought he or she would obtain a first-year college GPA of about 2.7. The student's most typical planned educational major and first vocational choice were in business and commerce and health professions, respectively.

The ACT freshman group consisted of 103 men and 149 women. A total of 57% were "Very Sure" of their educational major, while 36% said they were "Fairly Sure." A total of 35% aspired to a bachelor's professional degree. The largest percentage planned to live in parents' or relative's home (79%).

62 The students in this group identified their race as follows: Afro-American - 4%; American Indian - 2%; Caucasian American - 71%; Other - 3%; Prefer Not To Respond - 14%; and Not Given - 6%. Of these students, 43 were married, 20 had served in the military, and 2 reported a permanent physical handicap or disability.

Need for help was expressed as follows: Educational and vocational plans - 28%; Writing - 31%; Reading - 48%; Study Skills - 43%; Math - 69%; Personal Problems - 42%. A total of 34% expressed interest in independent study, 12% in honors courses, 15% in some foreign study, and 33% in some kind of advanced placement. Expectations of working at a job during the school year and expressing need for help in finding a school-year job were held by 42% of the students. Also, 44% expected to apply for financial aid.

The extracurricular area where the most students (33%) participated in high school and also had similar plans for college was intramural athletics. The area where the most students (15%) participated in high school but had no similar plans for college was intramural athletics. The major within state feeder high school was Ridley Senior High School.

IV. Student Perceptions of Growth

Student perceptions of the institution's contribution to progress and the importance of that progress in six areas of potential growth.

Growth Area	Institution's Contribution to Progress						Importance of That Progress					
	Frequency Count					Mean*	Frequency Count					Mean*
	None	Little	Moderate	Much	Very Much		None	Little	Moderate	Much	Very Much	
A. Intellectual	3	2	35	90	38	3.9	1	2	17	64	84	4.4
B. Social	1	10	51	65	40	3.8	1	6	18	58	84	4.3
C. Aesthetic/Cultural	8	30	59	42	27	3.3	0	13	55	44	56	3.9
D. Educational	0	3	34	72	57	4.1	0	3	8	47	109	4.6
E. Vocational/Professional	11	21	53	41	37	3.4	1	3	16	36	109	4.5
F. Personal	2	8	33	68	56	4.0	0	2	11	28	127	4.7

*The mean for each growth area is based on values of 1, 2, 3, 4, and 5 assigned to the responses "None," "Little," "Moderate," "Much," and "Very Much," respectively.

DELAWARE COUNTY COMMUNITY COLLEGE

AN OVERVIEW OF INSTRUCTIONAL COSTS AND ACTIVITIES

Delaware County Community College is a public, two-year institution located on a single campus in Marple Township, Pennsylvania. DCCC operates on a nine-month academic year, two summer terms, and an intersession. DCCC grants Associate in Arts, Associate in Science, Associate in Applied Science degrees and Certificates in a wide variety of vocational, technical, and college transfer fields. The College is committed to offer educational programs and services which are comprehensive, accessible, flexible, and community centered in order to enhance the development of our community and its residents. Tuition at DCCC is \$512 per semester for full-time sponsoring students and \$1204 per semester for full-time students from non-sponsoring districts.

A total of 3,465 students attended DCCC during Fall 1974, 49 percent full-time and 51 percent part-time. Almost 60 percent of the students were between 17 and 22 years of age and most of the remainder were between 23 and 30. Men (54%) outnumbered women (46%) by about 7 percent. Among the students, 1,645 (47%) were attending the College for the first time and 1,820 were returning. The College awarded a total of \$496,627 in financial aid to these students, most of it in the form of grants and loans.

During the past academic year, 373 students completed their programs at DCCC. The three programs with the largest number of graduates were: Liberal Arts (112), Business Administration (49), and Nursing (47). Among students seeking jobs, 44 percent had

secured positions by the time they graduated.¹ The overall average annual salary among graduates with jobs was \$6,750.² Of those students who left the College without formally completing a degree or certificate program, virtually all were in good standing.

DCCC is staffed by a faculty of 149 individuals, of whom 93 are full-time. Approximately 48 percent of the faculty are tenured, 68 percent of full-time are men. Most full-time faculty members hold either Master's or Bachelor's degrees and the average salary for a full-time faculty member is \$13,809. The faculty are supported by 35 administrative professionals. Other personnel (secretarial, technical, etc.) number 75.

The total cost of operating the College during 1974-75 was \$4,192,069. Not surprisingly, a large component of this cost was attributable to College and University Parallel Instruction, which consumed \$834,875 or about 20 percent of the School's total. The cost of all the College's primary program (i.e., Instruction) was \$1,424,331 or one-third of DCCC's overall cost. Other costs resulted from operation of the College's various support programs, including Academic Support (libraries, computer services, personnel development, etc.)--\$465,921, Student Services--\$321,372, Institutional Support (administration, physical plant, etc.)--\$1,980,445.

The College's major revenue sources during 1974-75 were a State appropriation of \$1,131,524 and tuition income of \$1,190,787. Other sources of revenue included the Federal Government (\$138,125), and local sponsor (\$945,528). Further details on revenues as well

1&2

Estimates made relative to responses from Student Outcomes Questionnaire.

as a complete statement of assets and liabilities are available from the College.

One other aspect of the cost analysis noted above should be described in closing: the study of unit costs. This analysis was conducted for each of the College's programs and for each of its student degree disciplines. The units used as a basis were the credit hours taken by students in the programs or majors. Thus, for example, students took 9,751 credit hours in the Business Administration program during the academic year. Since the direct cost of operating the Business Administration program was found to be \$162,262,, a unit cost of \$16.65 can be calculated ($\$162,262$ divided by 9,751). A similar calculation was performed for each of the School's programs and for each type of discipline. Among disciplines, unit costs ranged from a high of \$57.34 per student credit hour in Engineering to a low of \$9.01 per student credit hour in Health and Physical Education. The highest unit cost for student degree programs was \$34.00 for Nursing and the lowest was \$14.50 in Administration of Justice. Once again, full details of this analysis are available from the College.

The material found in the summary is drawn from the results of a major study carried out by Delaware County Community College for the 1974-75 fiscal year. This study utilized a set of Information Exchange Procedures developed by the National Center for Higher Education Management Systems. Individuals interested in more detailed results of the study or other information are encouraged to contact:
