IDENTIFIERS Virginia

ABSTRACT

Procedures and guidelines for use by visitation teams were developed and field tested to determine appropriate activities for such teams in the evaluation of vocational education programs in Virginia, and to expand and improve the annual local evaluation as a self-evaluation procedure. A review of the literature was conducted to determine the state-of-the-art from which preliminary guides were developed for conducting onsite evaluations. The annual local evaluation guidelines were revised and distributed to all school divisions. The major portion of the report consists of appendixes which contain the project-developed literature review for onsite evaluation, the general outline of activities for visitation team evaluation, the visitation team interview guide, and the annual local evaluation procedures, forms, and guidelines. (NJ)

FINAL REPORT

Vocational Education Program Evaluation Project

Research Project in Vocational Education Conducted Under Part C of Public Law 90-576

The project reported herein was performed pursuant to a grant from the Office of Education, U. S. Department of Health, Education, and Welfare. Contractors undertaking such projects under Government sponsorship are encouraged to express freely their professional judgment in the conduct of the project. Points of view or opinions stated do not, therefore, necessarily represent official Office of Education position or policy

Vocational Education Program Evaluation Project

Summary

The Division of Vocational Education, State Department of Education (DVE/SDE) funded the project, based in the Division of Vocational and Technical Education, Virginia Polytechnic Institute and State University for the period July 1, 1975 to June 30, 1976.

Objectives |

The objectives of this project were (1) determine through a state-of-theart study the current approaches to the use of visitation teams; (2) to develop and field test the procedures and guidelines for use of visitation teams in Virginia; and (3) to continue to expand and improve the Annual Local Evaluation as a self-evaluation procedure.

Procedures

A state-of-the-art study was conducted through a review of the literature to determine the current approaches to the use of visitation teams. From the study, preliminary sets of procedures and interview guides were developed.

No field test was conducted as a part of this project since DVE/SDE made available funds beginning with FY77 to support projects within school divisions which would, in effect, field test the materials developed by this project. The procedural booklet and guidelines for the Annual Local Evluation were revised, printed, and distributed in sufficient quantities to all school divisions.

Project Staff

The project director was the only professional staff member. A half-time clerk-typist was hired at the beginning in May to complete the project.

Results and Accomplishments

A review of the literature was conducted in order to determine the state-of-the-art from which preliminary guides were developed for conducting an on-site evaluation. The Annual Local Evaluation guidelines were revised to more closely conform to the major goals of vocational education as set forth by the DVE/CDE.

Evaluation

No third party evaluation was required. The staff of the Divisions of Vocational Education and Educational Research and Statistics, State Department of Education, provided continuous evaluation.

Conclusions and Recommendations

- The Annual Local Evaluation is providing a workable procedure for local school divisions to conduct an annual self-evaluation of the vocational education programs. This system should be continually evaluated in order to improve its effectiveness.
- 2. Only meager beginning was made to develop the procedures necessary to conduct an on-site evaluation by use of a visitation team due to a change from the use of the Annual Local Evaluation as the basic self-study to procedures used by the Southern Association. Considerable work is yet required to fully operationalize these procedures.

THE PROBLEM

School divisions of the Commonwealth of Virginia are required to revise and update annually the five-year school improvement plan. Systematic program evaluation in the foundation upon which program planning is built. Local self-evaluation and use of a visitation team are the major components of a systematic program evaluation. The basic procedures for conducting a systematic local self-evaluation have been developed. This research project was concerned with determining the appropriate activities of a visitation team and developing related guidelines.

BACKGROUND INFORMATION

Initial work on developing a systematic local evaluation procedure began in January 1973. A self-evaluation procedure was developed and field tested in four school divisions in the spring of 1973. Revisions were made based on the field test and recommendations of such groups as the DVE/SDE staff and local directors of vocational education. Statewide implementation of the revised procedure - Annual Local Evaluation - took place in April 1974 on an optional basis. Sixty-eight school divisions evaluated their vocational education programs or a portion thereof, during the spring of 1974 using the Annual Local Evaluation procedures. The results and experiences from these school divisions served as the basis for another revision and some expansion of the evaluation procedure. All school divisions in Virginia have been requested to incorporate the Annual Local Evaluation procedure into their evaluation of the vocational education programs in the spring of 1975.

Self-evaluation as outlined in the Annual Local Evaluation provides for teachers and supervisors to have direct input into the evaluation process. Students, former students, employees, and other lay persons of the community

participate actively by serving as members of advisory committees. Selfevaluation provides through self-study an inward look at the vocational
programs. The information and recommendations resulting from the self-evaluation
should be reviewed by persons not directly involved with the vocational
education program. This review by a visitation team will verify the selfevaluation and provide additional data and recommendations to the school
division for use in planning the vocational education program.

OBJECTIVES

The objectives of this research were:

- to determine through a state-of-the-art study the current approaches
 to the use of visitation teams.
- 2. to develop and field test the procedures and guidelines for use of visitation teams in Virginia.
- 3. to continue to expand and improve the Annual Local Evaluation as a self-evaluation procedure.

PROCEDURES

A state-of-the-art study was made to determine current approaches to the use of visita on teams. Information gained from this study provided the basis for the development of a preliminary set of procedures and guidelines for Virginia.

The Annual Local Evaluation guidelines were revised based on feedback from the DVE/SDE. After revision the booklet was printed and distributed in sufficient quantities to all school divisions.

PROJECT STAFF

Dr. Donald E. Elson, project director, was the only professional staff member. A clerk-typist (1/2 time) was hired at the beginning of May to provide necessary secretarial assistance.

Qualifications of Project Director

Education:

- Ph.D. Michigan State University, 1972. (Major: Vocational Education; Minor: Administration and Higher Education; Cognate: Research and Evaluation)
- M.S. Kansas State University, 1968. (Major: Agricultural Education)
- B.S. Kansas State University, 1958. (Major: Agricultural Education) Experience:

Currently Assistant Professor and Coordinator of curriculum and program evaluation in the Division of Vocational Education, Virginia Polytechnic Institute and State University. Principal developer of the Annual Local Evaluation procedure.

RESULTS AND ACCOMPLISHMENTS

A review of the literature was conducted in order to determine the state-of-the-art. Research reports and evaluation documents from states were reviewed. A copy of the report is included as Appendix A of this report.

After completing the state-of-the-art study, a set of preliminary procedures and guidelines were developed. The basis of these procedures was the use of the Annual Local Evaluation as the self-study. DVE/SDE personnel, after study of these procedures decided that the visitation approach should be more in line with the approach used by the Southern Association for accreditation purposes. As a result, considerable work is yet to be done to develop an on-site evaluation procedure for vocational education which will conform to these procedures used by the Southern Association. No field test was conducted. The DVE/SDE has made money available through exemplary funds to assist school divisions in conducting an on-site evaluation for the fall of 1976. This will provide a field test of the work of this project.

EVALUATION

No third party evaluation was required. The staff of the Divisions of Vocational Education and Educational Research and Statistical, State Department of Education, provided continuous evaluation.

CONCLUSIONS AND RECOMMENDATIONS

- 1. The Annual Local Evaluation is providing a workable procedure for local school divisions to conduct an annual self-evaluation of the vocational education programs. This system should be continually evaluated in order to improve its effectiveness.
- 2. Only a meager beginning was made to develop the procedures necessary to conduct an on-site evaluation by use of a visitation team due to a change from the use of the Annual Local Evaluation as the basic self-study to procedures used by the Southern Association.

Procedures for On-Site Evaluation A State-of-the-Art Study

Rationale for On-site Visitation

The question can be asked, who should evaluate? The answer to this question has implications for visitation teams. Proponents of visitation teams claim that someone outside the organization can see problems in a new light and may be able to suggest solutions not seen by those working day—to—day with the problems. Opponents suggest that outsiders may not have sufficient insight into the reality of the problems and, therefore, could antagonize school personnel (Byrnside, 1969).

Verification of information provided by the self-evaluation report and presentation of additional information seem to be two major reasons for the use of visitation teams. Ash (1971:20) adds to this rationale by stating that the purpose of a visitation team is ". . . to evaluate the institution's systems for conducting valid self-evaluation, to verify the extent to which outcomes correspond with need and with stated objectives, and to supplement the Self-evaluation Report with additional data and documentation where needed." The Illinois Office of Education (1975b:E) indicates that the purpose of the visitation team is ". . . to provide a local district with a profile of its total occupational program . . ".

Visitation teams for on-site evaluation of vocational education programs have been used in Tennessee since 1971. These procedures have, "... proven to be time-consuming and financially burdensome." (Wallace, 1975:iii) An indepth study was initiated to evaluate the procedures and make recommendations for future evaluation of vocational programs. Wallace (1975) presented the following conclusions as a result of the study in Tennessee:

 Information obtained from currently used instruments for on-site evaluations by visiting teams was not adequate to be able to determine relative quality of vocational-technical programs.

- Currently used state evaluation instruments were not definitive or specific enough to identify the same quality aspects of vocationaltechnical programs as did the Ray Self-Checklist evaluation instrument.
- 3. Professional vocational-technical educators could not analyze team visit reports and adequately determine the quality of selected vocational-technical programs. State evaluation procedures need to include checklists where more observations could be made.
- 4. Guidance counselors were less able to identify elements of quality vocational-technical programs than were teachers or principals.
- 5. Some of the elements on the Ray Self-Checklist overlapped in their interpretation.
- 6. A panel of experts, unfamiliar with each individual situation and trying to glean information from an on-site team report, was not able to identify outstanding elements of quality vocational programs as easily as the professionals who were closest to the situation.

The major recommendation made by the Wallace study was that instruments should include more quality indicators and should be objective in nature.

(1975:12)

Selection of Team Members

The selection of the team leader is of critical importance. The individual selected as team leader should have experience in vocational education and be familiar with the total vocational program, understand the needs of various size schools, and be a competent leader. (Illinois, 1975a)

The team members should represent each vocational area for which preparation is offered, plus, students, administrators, guidance, and other specialized areas related to the vocational program (Ash; Illinois; National Study). The number of individuals on the team varies with ". . . the size of the school, the number of days that will be available for the visit, the amount of experience of visitors, the interest in using the visit as a phase of in-service education, and the willingness of the visitors to work long hours." (National Study) The selection of the team members should be a joint effort between the school and the evaluating agency.

The Visic

The most important concept to be kept in mind by the visiting team and all individuals in the school is that the team is not at the school to find fault, but to verify and supplement facts.

Each set of procedures reviewed relied upon a set of guidelines to direct the activities of the visitation team. (Ash; West Virginia; Illinois 1975 a and b; National Study; Tennessee) While these guidelines varied in complexity, all attempted to elicit data and information for making well informed decisions and recommendations.

Summary Conference

The "summary conference" between the team and school personnel was deemed important especially by the Illinois, Office of Education. The purpose of this conference is to communicate the team's findings to the school personnel. This meeting also provides an opportunity for the administrators of the school to make known any limitations they may see which would hinder the implementation of the recommendations made by the visitation team.

Appendix B

General Outline of Activities for Visitation Team Evaluation

General Outline of Activities for Visitation Team Evaluation

1. September 15, 1976. All school personnel involved with vocational education will review the 1976 Annual Local Evaluation Report as submitted to the Division of Vocational Education.

Mutual agreement will be reached between the project director and the Division of Vocational Education as to the persons to be named as members of the visitation team.

2. September 15 to ber 15, 1976. Three-1 workshop for the team members will 1 personnel from VPI & and/or the Division of Vocational Educ

Project director will complete or have completed the following:

- a. Division Information form project director
- b. Instructor Information form all personnel involved with vocational education
- c. Student Information form all students enrolled in a vocational course.
- 3. October 15, 1976. Project director will provide members of the visitation team with copies of the 1976 Annual Local Evaluation Report, the current Annual and Five-Year Plan for Vocational Education, summaries of the three forms listed above, and other data and information which will assist the team.
- 4. Octobe 15 to November 15, 1976. Conduct three my on-site evaluation by visitation. Report will be prepared and reviee with school personnel during last afternoon of visit.
- 5. December 15, 1976. Final copy of visitation reprepared by project direct and submitted to team leader for his proval. Six copies sent to the Division of Vocational Education.

Visitation Team Interview Guide will be used by team members to study vocational education in division and as a guide as they interview individuals during the visit to the school. Reference data are obtained from the Annual Local Evaluation 1976 Report, the Division Information form (D), the Instructor Information form (I), and the Student Information form (S).

VISITATION TEAM

INTERVIEW GUIDE

Major Goal I

Youths and adults will acquire the skills and knowledge needed for initial and continuing employment or self—employment in occupations of their choice and for which there are employment opportunities and they will also acquire the competencies needed as consuemrs of goods and services, for home and family living, and for personal use.

Objectives of Interview:

- 1. Determine how many of the five occupational areas are available to students and determine the effectiveness of each area.
- 2. Determine whether the occupational courses are sequentially structured into occupational programs.
- 3. Determine if measurable objectives exist for (a) total program, (b) individual programs, and (c) specific courses.
- 4. Determine the criteria used to identify disadvantaged and handicapped students.
- 5. Netermine what additional services are being provided for the disadvantaged and handicapped students.
- 6. Determine what provisions are mader to insure that students are employable by the time they terminate their formal education either by graduating or dropping out.
- 7. Determine how knowledgeable students are about the purposes, objectives and activities associated with the occupational program in which they are enrolled.
- Determine whether the occupational programs offered students adequately prepare them for employment.
- 9. Determine if the training needs of adults in the community are being met.

	Rei	ference Data:
	1.	Guidelines for Annual Local Evaluation, Part B, Sections 1 and 2, 1976 report.
:	2.	(I-11) Are the occupational courses sequentially structured into a program?
f		Yes No
	3.	(I-12) Are there stated and measurable objectives for:
		a. the division's total occupational program
		Yes No Not sure
		b. the program(s) in which you teach, administer, or provide guidance
		YesNo
		c. the course(s) which you teach, administer, or provide guidance
		Yes No Some
	4.	(I-13) Are you familiar with your institution's plan for identifying
		disadvantaged and handicapped students?
		Yes No
	5.	(I-14) Are additional services provided for disadvantaged and handicapped
		students? (other than special education)
	. •	Yes No Not sure
	6.	(S-10) Do you feel your instructor(s) have clearly explained the objective
		and goals of your occupational course(s)?
		Yes No
	7.	(S-12) Rate your program in terms of preparation for an occupation.
		Hi_h Average Low
., .	Β.	(S-13) Would you recommend the occupational program which you are in to
		a =lend?
		Yes No

9.	(S-14) Do you expect to:
	get a job doing what you are learning?
	get a job similar to the one you are learning?
t	continue studying about the same job at another school after graduate and
	make little use of what you are !
,i,O ₄ .	(S-1) Nould you like to change to another occupational program?
	Yes No
11.	(S-16) Is your preferred program available?
	Yes No
12.	(S-17) Is it possible to thange programs if you want to?
	Yes No
13.	(D-6) What percentage of your student population is enrolled in occupational
	education?
14.	(D-7) Refer to enrollment table (item 7) on Division Information form.

Major Goal II

Youth and adults will become aware of employment or a semployment opportunities and requirements a use on taking career choice and in determining their education programs.

Objectives of Interview:

- Determine the availability and quality of the K-8 occupational information program.
- 2. Determine whether the content of occupational orientation courses (9th and 10th grades) is appropriate for that level.
- 3. Determine if program and course objectives are communicated to students.
- 4. Determine who is involved in providing occupational guidance services to students (instructional staff, guidance personnel, etc.).
- 5. Determine the extent of the following services provided to students:
 - a. Availability of current career information materials (guidance office, library, ecc.),
 - b. Formal placement service (full time or part time employment and advanced training).

Re	eference Data	•
1.	. Guidelines for Annual Local Evaluation, Part B, Sections 1 and 2, 1976 re	port.

	division provide placement services for:	~
	a. Enrolled students Yes No	
	b. Dropouts Yes No	
·	c. Graduates Yes No	

Major Goal III

Youths and adults will exhibit pride in work well done; confidence in ability to perform in the world of work; and develop leadership abilities, responsible citizenship, and a realistic self-image in relation to work in their chosen vocation.

Objectives of Interview:

1. Determine the scope, availability and effectiveness of youth organizations in serving students' needs and interests.

Major Goal IV

Youth and adults will benefit from programs improved and expanded through ancillary activities, including teacher education, research, guidance, supervision, planning and evaluation.

Objectives of Interview:

A. Research

1. Determine procedures for assessing student needs, occupational interests and abilities and utilizing this information.

Rei	erence Data	
1.	Guidelines for Annual Local Evaluation, Part B, Section 1 and 2, 1976 repo	or
2.	(I-17) Do guidance personnel and instructors work together in identifying	2
	students' needs and interests.	_
	ExtensivelyLittle	
	Moderately None	
3.	(D-4) What is the current unemployment rate for your area?	
4.	(D-5) What is the current youth unemployment rate for your area?	-
5.	(D-8) What was last school year's dropout rate for all high school	-
	students?	
6.	(D-9) What is the administrator's estimate, by percentage, of graduates	
	what enter:	
	four year colleges	
	two year post-secondary	

one year post-secondary certificate program

immediate job placement (exclusive of Armed Forces)

private career school

Objectives of Interview:

B. Guidance

- 1. Determine the involvement of guidance personnel in the following:
 - a. Occupational advisory committees
 - b. Identification of disadvantaged and handicapped students
 - c. Participate in the conduct of formalized follow-up studies
 - d. Evaluation of guidance services
 - e. Development and operation of the K-8 occupational information program.
 - f. Conducting inservice programs to acquaint instructional staff with the guidance services available to students.

Reference Data

. Guidelines for Annual Local Evaluation, Part B, Sections 1 and 2, 1976 report.

Objectives of Interview:

C. Planning

- 1. Determine who was involved in establishing the total occupational program objectives as stated in the Plan for Vocational Education.
- 2. Determine what relationship exists between (a) total program, (b) individual program, and (c) specific course objectives.
- 3. Determine how often the (a) total program, (b) individual program, and (c) course objectives are reviewed for possible revision.
- 4. Determine if board, administration, advisory committees, students and staff members are knowledgeable about total program objectives.
- Determine the need for addition, expansion or deletion of occupational programs.
- 6. Determine the extent of articulation of occupational programs at all levels of education (elementary, secondary, post-secondary and adult).
- 7. Determine the extent of the coordination of occupational programs, both within and between departments or divisions.
- 8. Determine the working relationship among all department in conducting a total occupational program.
- 9. Determine how effectively the following internal resources are utilized in planning, conducting and/or evaluating occupational programs:
 - .a. Staff
 - b. Students
 - c. Financial resources

Objectives : Interview: (continued)

C. Planning

- 10. Less mine how effer the effollowing extend resources are the in planning, or ting and evaluating occupational programs:
 - b o munity business and industrial person
 - c $^{\prime\prime}$ mmunity business and industrial facilities
 - d. overnmental and citic agencies (i.e., I nois State Employment rvice, Chamber of Jommerce, etc.).
 - e. Joint agreements and contracts with other public and proprietary institutions.

Ref	erenc_ Dat:

	Modera None
4.	(D-2) Do cit your community serve on occupational education
	advisory commune
	Yes No
	If yes, is the
	one adv committee for all occupational areas?
,	a separate committee for each area?
	both.

Objectives of Interview:

D. Evaluation

- 1. Determine how programs and courses are measured gast their objectives (i.e., by whom, how frequently, etc.).
- conducted by the division (i.e., student follow-mp. taff evaluation, cost analysis, employer survey, facility assessme etc.).
- 3. Determine who is involved in conducting the evaluation system (i.e., teachers, administrators, students, advisory committee members, etc.).
- 4. Determine how evaluation results are used (i.e., course revision, program revision, modification of instruction, deletion or addition of prgrams, etc.).

Major Goal V

Instructional staff possesses the necessary professional and technical qualifications required to administer and compact the vocational program.

Objectives of Interview:

- 1. Determine the general qualifications of occurpational staff including:
 - a. Education (pre-service and in-service)
 - b. Teaching experience
 - c. Work experience
 - d. Knowledge of the World of Work
- 2. Determine if a formal system for professional staff development exists which may include provisions for the following:
 - a. Periodic work experience
 - b. Periodic in-service transing
 - c. Participation in profess and or manimum ons
 - d. Contact with employers of students
 - e. Visitation to other dimens with samilar programs
- 3. Determine the quality of working relationships between the occupational staff and:
 - a. Other occupational start members
 - b. Non-occupational st
 - Guidance personnel
 - d. Students
 - e. Administrators
 - f. Local Governing Board
 - g. Community business and industrial personnel

Major Goal VI

Students have the opportunity to develop the necessary understandings and competencies as prescribed in the program objectives through the use of properly equipped classrooms, shops and laboratories.

Objectives for Interview:

- 1. Determine the extent to which a multi-media instructional approach is used.
- 2. Determine if the shop and laboratory equipment are comparable to that used on-the-job.
- 3. Determine if adequate facilities and equipment are available so that all students have sufficient exposure to and use of the equipment.

INSTRUCTOR INFORMATION

Personal Information

1.	Your present primary position is:
	a. instruction
	b. counseling (advising)
	c. administration
2.	If instruction, in which occupational area are you most involved?
	a. not in instruction
	b. industrial oriented
	c. personal and public service
	d. health
	e. business, marketing and management
	f. agriculture
	g. cooperative education
3.	Your highest earned degree is:
	a. less than baccalaureate
•	b. baccalaureate
	c. masters
	d. advanced certificate
	e. doctorate
4.	The type of certificate you hold is: (Mark only one)
	a. high school teaching
	b. provisional vocational
•	c. supervisory
	d. administrative endorsement
	e. counseling
	f

•	
, ,	
5	. How many years of experience in Occupational Education have you had?
	(Teaching, Guidance, Administration)
:	a. 0-4 years
	b. 5-8 years
	c. 9-12 years
	d. 13-16 years
	e. 16 or more years
6.	
<u>.</u>	had?
	a. none
ŧ	b. cless than one year
	c. 1-4 years
	d. 5-8 years
·	e. 9-12 years
	f. more than 12 years
. 7.	Are you presentaly a member of a professional organization related to
	your field?
	Yes No
8.	The nature of your last in-service experience was:
	a. University course
	b. non-credit workshop (University or Business sponsored)
	c. non-credit workshop (school sponsored)
•	d. occupational experience
	e. other
9.	How long since your last occupational course, workshop, etc., other than
	local division meetings?
	a. less than one year
	b. one to two years
EDIC.	c. more than two years
Afull Text Provided by ERIC	

10.	Are you currently involved in leadership of a vocational youth organization?
	Yes No
Pro	ogram Information
11.	Are the occupational courses sequentially structured into programs?
	Yes No
12.	Are there stated and measurable objectives for the division's total
	occupatioanl program?
	Yes No Don't know
13.	Are you familiar with your institution's plan for identifying disadvantaged
	and handicapped students?
	Yes No
14.	Are additional services provided for disadvantaged and hance apped
	students? other than special education)
	NoNot sure
15.	Which term describes your local division's evaluation system for occupational
	education?
	a. Formal - a district - wide evaluation system exists which pro-
	vides information for total program planning.
	b. Informal - unrelated evaluation processes.
	c. None- no structured district - wide evaluation.
16.	Were you involved in planning and/or making changes in your local division's
	one and five year plan for vocational and technical education?
	Extensively
	Moderately
	Little
	None

17.	Do guidance personnel and instructors work together in identifying student
	needs and interests?
	a. Extensively
	b. Moderately
i	c. Little
	d. None
18.	Rate the guidance personnel's knowledge of occupational course and program
	offerings.
	a. High - ver knowledgeable
	b. Average - come knowledge
	c. Low - litt_e knowledge
19.	ate the working relationship among occupational instructors across all
	occupational areas.
	a. High cooperation
	b. Average cooperation
	c. Low cooperation
20.	Rate your local board's support of occupational education.
	a. '_gh - strong support
	b. Average - generally supportive
	c. Low - little support .
21.	Rate the working relacionship between occupational instructors and the
	following groups:
	A. Academic Instructors
	a. High - most cooperate
•	b. Average - some cooperate
	c. Low - few cooperate

. 21.	Rate the working relationship between occupational instructors and the
	following groups: (continued)

	a.	no		
?	b.	yes, meets more than once a month		
	c.	yes, meets once a month		
	d.	yes, meets 2 or 3 times a semester		
	e.	yes, meets 2 or 3 times a year		
	f.	yes, meets less than three times a year		

4.	Last year I met with a counselor:
}	a. more than 5 times
	b. 4 to 5 times
	c. 2 or 3 times
	d. once
	e. never
٥.	I would rate my counselor's knowledge of the world of work:
	a. High - knows about most occupations
	b. Average - knows about some occupations
	c. Below average - knows very little about occupations
	d. I don't know - never talked shout occupations
6.	I would rate the information I have received from counselors with regard
	to my future occupation:
	a. High - consider ble
	b. Average - some
	c. Low - little or none
7.	In addition to your own personal interest, who encouraged you the most to
	enroll in the occupational program you are now taking? (Mark only one)
	a. Instructor or administrator
	b. Guidance counselor
	c. Friend(s)
	d. Parent
	e. None of the above
8.	I would rate my instructor's knowledge of the world of work:
	a. High - knows about occupations
	b. Average - knows something about occupations
	c. Eelow average - knows very little about occupations

-	
P6 .	9. Are you aware of occupational program and course objectives?
!	a. Yes
i	b. No
	c. Some
1	0. Do you feel your instructor(s) have clearly explained the objectives and
	goals of your occupational courses?
	a. Yes
	b. No
1	1. Do your current occupational courses relate to your chosen career goal?
	a. Yes
•	b. No
	c. Somewhat
1	2. Rate your program in terms of preparation for an occupation:
	a. High - it will help me find and maintain a job
٠	b. Average - it may help me find and maintain a job
	c. Low - it will not help me find and maintain a job
1	3. Would you recommend the occupational program you are in to a friend?
	a. Yes
	b. No
14	4. Do you expect to: (mark only one)
	a. Get a job doing what you are learning?
	b. Get a job similar to the one you are learning?
	c. Continue studying about the same job at another school after
	graduation?
	d. Make little use of what you are learning?
1.5	Would you like to change to another occupational program?
, ,	a. Yes

16.	Is your preferred program available?
	a. Yes
	b. No
17.	Is it possible to change programs if you want to?
	a. Yes
	b. No
18.	Is it possible to change programs at mid year?
	a. Yes
	b. No

Blacksburg, Virginia 24061

in cooperation with

Division of Vocational Education State Department of Education Richmond, Virginia 23216

* PREFACE

What is evaluation? There have been several definitions given but one of the better definitions has been stated by Daniel Stufflebeam:

Educational evaluation is the process of delineating, obtaining, and providing useful information for judging decision alternatives.

It should be stressed that evaluation is for "judging decision alternatives." Thus, the purpose of evaluation is not to prove, but to improve.

Who should evaluate? An evaluation ought to be done by those who are responsible for the improvement of the program. Therefore, the teachers, supervisors, and administrators of vocational education with the advice of advisory committees should be the evaluators of vocational education programs.

The procedures incorporated in the Annual Local Evaluation were developed with the above definition and purpose in mind. Every effort is made to provide a systematic, organized approach which will involve all staff members in a school division with responsibilities in vocational and technical education.

Appreciation is expressed to the staff of the Division of Vocational Education, State Department of Education, and to Donald E. Elson, assistant professor and other faculty members of the College of Education, Virginia Polytechnic Institute and State University, who gave their valuable assistance in the development of this evaluation procedure.

George S. Orr, Jr. State Director Division of Vocational Education

EVALUATING VOCATIONAL EDUCATION

Introduction

The Suandards of Quality and Objectives for Public Schools in Virginia, 1974-76 present guidelines for developing the planning capabilities in local school divisions. The following quote is taken from Standard No. 8, Five-Year School Improvement Plan:

Each school division shall involve the staff and community in revising and extending annually the five-year school improvement plan to be submitted to and approved by the Board of Education on July one, ... (of each year)*. This plan shall include:

- The objectives of the school division stated in terms of student performance;
- b. An assessment of the extent to which the objectives are being achieved, including follow-up studies of former students; and
- c. Strategies for achieving the objectives of the school division, including an organized program for staff improvement.

A systematic procedure has been developed for evaluating and planning local vocational education programs to assist the localities in meeting this standard. Phase One of the system deals with program planning and requires that the updated five-year improvement plan for vocational education be filed with the Division of Vocational Education on January 15* of each year. Phase Two is concerned with the implementation and operation of the planned vocational education programs. Data are collected in Phase Two by the Vocational Education Reporting System (VERS) to verify the enrollment and operation of the planned programs. Phase Three is the Annual Local Evaluation which is an evaluation of the total vocational education program in a school division and serves as a basis for the school division's update of the five-year plan for vocational education due January 15 each year.

Annual Local Evaluation

The Annual Local Evaluation is a systematic procedure for evaluating the vocational education programs in the school divisions. It is not an evaluation of teachers. The emphasis of the Annual Local Evaluation is on the total offering of vocational education by the school division as well as the various vocational programs. This evaluation procedure considers the three major aspects of vocational education -- occupational preparation (job entry), consumer and homemaking education, and orientation and exploration programs -- while placing stress on the regular, disadvantaged, and handicapped secondary and adult students to be served.

*The vocational education section is due on the January 15 preceding the July 1 date for the five-year school improvement plan. The Department of Education is currently proposing (subject to General Assembly revision) that the date for submitting the total five year school improvement plan be changed to January 15, effective in 1977, making all plans due on that date, and each January 15 thereafter.

The Annual Local Evaluation assists local school divisions in assessing the major strengths and major weaknesses of the vocational education programs and in making recommendations for program improvement. Since this evaluation takes place many months before the Five-Year Improvement Plan is finalized, the school division is requested to again state the major strengths as a part of the Plan. The major weaknesses should be covered through the objectives and strategies in the Plan.

The Division of Vocational Education suggests the following five major goals for vocational education to the local school divisions. The <u>Guidelines</u> for Annual Local Evaluation - Part A, <u>Curriculum and Instruction</u> are directly related to these goal statements.

Consistent with their abilities, interests, and education needs:

- Youths and adults will acquire the skills and knowledge needed for initial and continuing employment or self-employment in occupations of their choice and for which there are employment opportunities.
- 2. Youths and adults will acquire the competencies needed as consumers of goods and services, for home and family living, and for personal use.
- Youths and adults will become aware of employment or self-employment opportunities and requirements for use in making career choices and in determining their educational programs.
- 4. Youths and adults will exhibit pride in work well done; confidence in ability to perform in the world of work; and develop leadership abilities, responsible citizenship, and a realistic self-image in relation to work in their chosen vocation.
- 5. Youths and adults will benefit from programs improved and expanded through ancillary activities, including teacher education, research, guidance, supervision, planning and evaluation.

Since vocational education is the joint effort of State and local educational agencies, a school division can adopt, revise, and/or refine any or all of these goals and can develop other goals in addition to these five goals.

ASSESSMENT OF PROGRESS MADE TOWARD OBJECTIVES

The development of a meaningful five year improvement plan by the local school division requires assessment beyond the scope of the Annual Local Evaluation to fully assess progress made and the remaining local needs in terms of each goal adopted for vocational education.

School divisions are asked to make this assessment of progress twice each year - once at the time the Annual Local Evaluation Report is submitted (covering January to June) and again when the Five Year Improvement Plan is submitted (covering July to December).

An example of the form for submitting this assessment of progress will be found on Page 17. Copies of this form were supplied to the school division at the time this booklet was distributed.

Suggested Vocational Committee Structure

Decisions by committees with individual input by teachers are important in evaluation. The recommendations to be developed by this procedure are based on the work of committees at the vocational department level within a school, at the school level, and at the division level. All vocational teachers will have a direct input by completing the <u>Guidelines for Annual Local Evaluation -- Part A, Curriculum and Instruction</u>. Students, former students, employers, and other lay persons of the community will be active participants in the evaluation of the local vocational education programs by serving as members of advisory committees.

Since school divisions vary in size and organizational structure, the following committee structure for the annual evaluation of the vocational education programs is suggested as a good procedure to consider. School divisions will want to vary the procedure to meet their own individual needs.

Division Vocational Education Committee

Suggested Membership:

Director of Vocational Education for school division (chairman)
One teacher from each vocational service
One coordinator or supervisor from each vocational service
One member of the Planning Council
Supervisor of guidance for school division
Chairman of the Division Vocational Education Advisory Committee

Responsibilities:

Receive recommendations for improvement of the vocational education programs from the School Vocational Education Committees.

Study these recommendations, analyze additional data as required, and evaluate the total vocational program.

Make final set of recommendations for vocational education in the division to the Division Superintendent. Final recommendations should be reviewed with the Vocational Education Advisory Committee.

Update, annually, the five-year plan for vocational education.

Division Advisory Committee

Suggested Membership:

General Advisory Committee for Vocational Education plus the following if not presently on the committee:

One employed former student from each vocational service One currently enrolled student from each vocational service

Responsibilities:

Assist and advise the Division Vocational Education Committee

School Vocational Education Committee

A separate committee is needed for each school offering vocational programs in the division. This committee is not necessary in divisions having only one high school.

Suggested Membership:

Head teacher from each vocational department in school (designate one as chairman)

(If school is a Vocational Center, the principal should be chairman) Coordinator of guidance in school.

One member of Division Vocational Education Committee

Responsibilities:

Receive recommendations from the Department Committees. Study the recommendations, analyze additional data as required, and evaluate total vocational program in school using <u>Guidelines for Annual Local Evaluation - Part B</u>. In schools where use of the Department Committee is not feasible, this committee will assume the duties of the Department Committee (refer to section on Department Committees).

After review by school principal, make final set of recommendations for vocational education in the school to the Division Vocational Education Committee using <u>Cuidelines</u> for <u>Annual Local Evaluation</u> - Part B.

Department Committees

A separate committee may be established for each vocational department in area vocational centers and comprehensive high schools. The School Vocational Education Committee may assume the duties of this committee in small schools where such a committee is not feasible.

Suggested Membership:

Supervisor and/or head teacher of department in school (chairman) All teachers in department

Responsibilities:

Analyze needed data and the <u>Guidelines</u> for <u>Annual Local Evaluation</u> —

<u>Part A</u> which were completed by each teacher in the department.

Develop set of recommendations for the <u>department</u> to be given to the <u>School Vocational Education Committee</u> using <u>Guidelines for Annual Local Evaluation</u> — Part B.

60

Data Requirements for Local Evaluation and Planning

Sound evaluation and planning of vocational offerings which are relevant to the needs of students and to employment opportunities require a variety of data. The following types of data should be thoroughly studied during the process of evaluating the vocational programs.

- 1. Follow-up of former students by vocational service
- 2. Description of school population (see suggested catagories below)

				Proj	ected
De:	scription of School Population	1974*	Present**	1 year	5 years
Α.	Age*				
	(1) 1-5 (2) 6-15				
	(3) 16-19				
	(4) Adult				
В.	Sex*				
	(1) Male (2) Female				
c.	Ethnic Groups*			•	
	(1) Negro or Black (2) White (3) Other				
D.	Disadvantaged				
	(1) Academic (2) Economic (3) Cultural				/
E.	Handicapped***				
	(1) Deaf		•		
	(2) Blind				
	(3) Speech defect	Ţ		1	
	(4) Crippling condition	1			
	(5) Convulsive seizure	ļ			
1	(6) Mentally retarded	[
	(7) Emotionally distrubed				

^{*}Data available from Virginia School Census - 1974

**Present actual data or projected data from past data

***Survey made locally for Special Education

- 3. VERS data applicable to local school division
- 4. Student needs and interest in vocational education*
- 5. Attitudinal data from students, parents, and employers
- 6. Manyower data for area -- present and projected
- 7. Present philosophy and objectives of the Division School Board pertaining to vocational education.

Most of the above data will be available through the principal's office since the five-year school improvement plan requires these data.

^{*}Vocational Education Student Demand Projection System (a description of each vocational course available in Virginia and a system to use in determining student interest) is available from the State Division of Vocational Education.

GUIDELINES FOR ANNUAL LOCAL EVALUATION

Summary of Instructions

The forms, Guidelines for Annual Local Evaluation - Part A, Curriculum and Instruction and Part B, Summarization, are included in this booklet.

Part A is to be completed by each vocational teacher.

Part B is to be completed by the Department Committees, the School Vocational Education Committees, and the Division Vocational Education Committee.

Only one evaluation summary report of the school division (Guidelines for Annual Local Evaluation - Part B) will be sent to the Director, Division of Vocational Education, State Department of Education, by July 1. The purpose of this report is to indicate to the Division of Vocational Education that the school divisions are following an organized approach to evaluation and the five-year program improvement plan reflects the recommendations resulting from the evaluation. The report will be used by the Division of Vocational Education to assist the local school divisions in program improvement.

Part A -- Curriculum and Instruction

Detailed Instructions

The <u>Guidelines for Annual Local Evaluation - Part A</u> is to be used by the individual teachers to evaluate their programs. Each vocational teacher in the school division should complete this form and submit a set of recommendations for his or her program to the most specialized committee used for evaluating vocational education in the school division. Individual ratings are to go no further than this committee. It is important to remember that this is an evaluation of the program and not an evaluation of teachers.

One original copy of the form is included in this booklet and a second copy will be provided separately. Complete both copies. You are to keep the copy included in the bcoklet on file so that you may review the ratings with your administrator and supervisory personnel when appropriate. The separate copy is to be submitted to the Department Committee or School Committee.

The Guidelines have been organized into four sections. Section I includes statements related to Major Goals 1 and 2. Sections II, III, and IV, relate to Major Goals 3, 4, and 5, respectively.

Part A -- Curriculum and Instruction (Continued)

- 1. Work with one guideline at a time.
 - A. Study each guideline and make notes as to what evidence is available or needed to make an evaluation and to substantiate that evaluation.
 - B. Collect and analyze needed data (share data to avoid duplication of effort).
 - C. Assign each guideline an evaluative rating using the following code:
 - M = Major improvement needed critical weakness or inadequacy exists in meeting the minimum standard for the guideline. Use this rating if a program or service is needed but is not being provided by your department.
 - I = Improvement needed with minor changes the program could be improved to meet the minimum standard for the guideline.
 - S = Program meets the minimum standard for the guideline.
 - E = Program exceeds the minimum standard for the guideline.
 - NA = Not applicable. Use only where the purposes of the program being evaluated differ from the guideline. Do not use this rating if a program or service is needed but is not provided by your department.
- 2. The ratings are not to be summarized; they are to be used to direct your thinking toward listing: (1) the major strengths and the major weaknesses of your program by Section and (2) your recommendations for program improvement by Section.
- Develop a set of recommendations using the Guidelines, the listing of the strengths and weaknesses, and other evaluative data for each Section of the Guidelines.

Recommendations for improvement of the vocational education program should originate with the vocational teachers in a vocational department. It will be helpful if information concerning student needs and employment demands is available to vocational teachers.

Conditional Iducation Committee for study and consolidation into linear the employeement between the Internal Committee for study and consolidation into linear the employeement to that particular school. (If the Tehool Vo ational linear teasures should complete a copy of the Guidelines for Annual Local involution. Part A for his or her program and submit it to the School Vocational riducation Committee.) The School Vocational Education Committee's resummendations, using Guidelines for Annual Local Evaluation. Part B, Section 1, are given to the Division Vocational Education Committee.

tart B, Theorem I, develops the recommendations for Annual Local Evaluation, cation in the school division. In the larger school divisions, the final report of recommendations, where practical, should contain a sub-report for each program area. These reports will be very helpful to the stire supervisory scale in a sub-report for the final school division to the final school division to the final school division to

right, estimate, is also completed by the Division Committee. Section 2 provides a recent of Indicating the progress made toward the achievement of the masses division's measurable objectives listed in the 1975-76 Five-Year Vocational Education improvement Plan.

The Division dommittee will submit two sets of the recommendations (certified 1) with the recommendations from each school attached and the assessment of the objectives (Section 2), to the division superintendent or his designee. One set of the division's recommendations — do not include recommendations from local schools — is signed and sent along with a copy of the assessment to the Director, Division of Vocational Education, State Department of Education, by July 1. Copies of the division's approved recommendations should be distributed to all vocational teacher.

the results of the recommendations should be reflected as objectives in the update of the Five-Year Program Improvement Plan due the following January 15, in the Division of Vocational Education, State Department of Education.
