ABSTRACT

This report presents the results of the annual survey of the geographic origins, or permanent residences, of students attending institutions of the State University of New York in the fall 1975 term. The report includes all credit course students and all institutions of the State University system. The student and institutional data elements that enter into this report are student level (undergraduate and graduate), student load (full- and part-time), permanent residence, and institutional location. Part I presents data for the entire system; Part II contains tables for each institution, and summary tables for institutional type; Part III contains tables for each New York State county, and listings for out-of-state residences; Part IV is a trend table for 1959 through 1975, indicating origins of students by percent of population in individual institutions and by institution type.

INTRODUCTION

This report presents the results of the annual survey of the geographic origins, or permanent residences, of students attending institutions of the State University of New York during the Fall 1975 term. The report includes all credit course students and all institutions of the State University system. While this report surveys the entire credit course student enrollment at the State University, a companion volume is also published which provides similar data for first-time students attending the University.

The student and institutional data elements which enter into this report are as follows:

- A. Student Data Elements
 - 1. Student level (undergraduate/graduate)
 - 2. Student load (full-time/part-time)
 - 3. Permanent residence (for New York State residents, county of residence; for other United State residents, state of residence; and for non-resident aliens, country of residence)
- B. Institutional Data Elements
 - 1. Institutional location (for State-operated institutions, the county of location; and for Community Colleges, the sponsorship area)

The main body of this report is divided into four parts; Parts I through III contain data for the Fall 1975 term, Part IV contains trend data.

Part I (tables 1 through 5) - Part I contains summary data for the complete State University system. Tables 1 through 4 provide data by student level, institution and institutional type regarding students who come from the institution's area of location, who come from New York State but outside of the institution's area of location, who come from other states in the United States, and who come from foreign countries. Table 5 provides system-wide data on student level, load and permanent residence.

Part II (tables 6 through 78) - Part II contains tables for each institution which display the institution's enrollment by student level, load and permanent residence. In addition, Part II contains summary tables for institutional types.

Part III (tables 79 through 141) - Part III contains separate tables for each New York State county and a table listing the permanent residences of students from outside of New York State. Within the location of permanent

residence, information is displayed showing the number of students by student load attending each individual institution of the State University.

Part IV (table 142) - Part IV contains a trend table from 1959 through 1975. Data is provided by individual institution and institutional type regarding the percent of the institution's full-time students who come from the institution's area of location, who come from New York State but outside the area of the institution's location, who come from the United States but outside of New York State, and who come from a foreign country.

Most surveys of the residences of college students suffer the problem of a valid definition of "residence". In this study, the respondents were asked to report "permanent" residence as distinct from "local" or "temporary" residence. As students grow older, marry, and participate in the community while attending an institution of higher education, there is an increasing tendency for the institution's records to begin to reflect the "local" residence in decisions regarding housing, tuition rates and the like. For example, the concept of "origin" for a student working on his third degree at as many colleges is not simply determined. It may be that the assumption of a single origin is a methodological flaw of all such surveys. However, the direction of bias caused by this problem can probably be stated as follows: somewhat more students have "origins" outside an institution's commuting distance than the data reflect. In order to collect uniform and consistent data, permanent residence was defined in accordance with a memorandum from the Counsel's Office on the "Establishment of Residence for Tuition Purposes".

The data included in this report provide the opportunity for all segments of the State University to obtain an accurate picture of the major areas they serve as shown by the geographic origins of their students. In view of expected changes in the pool of available students and resultant changes in enrollment patterns, the data in this report should provide an important instrument for institutional planning.

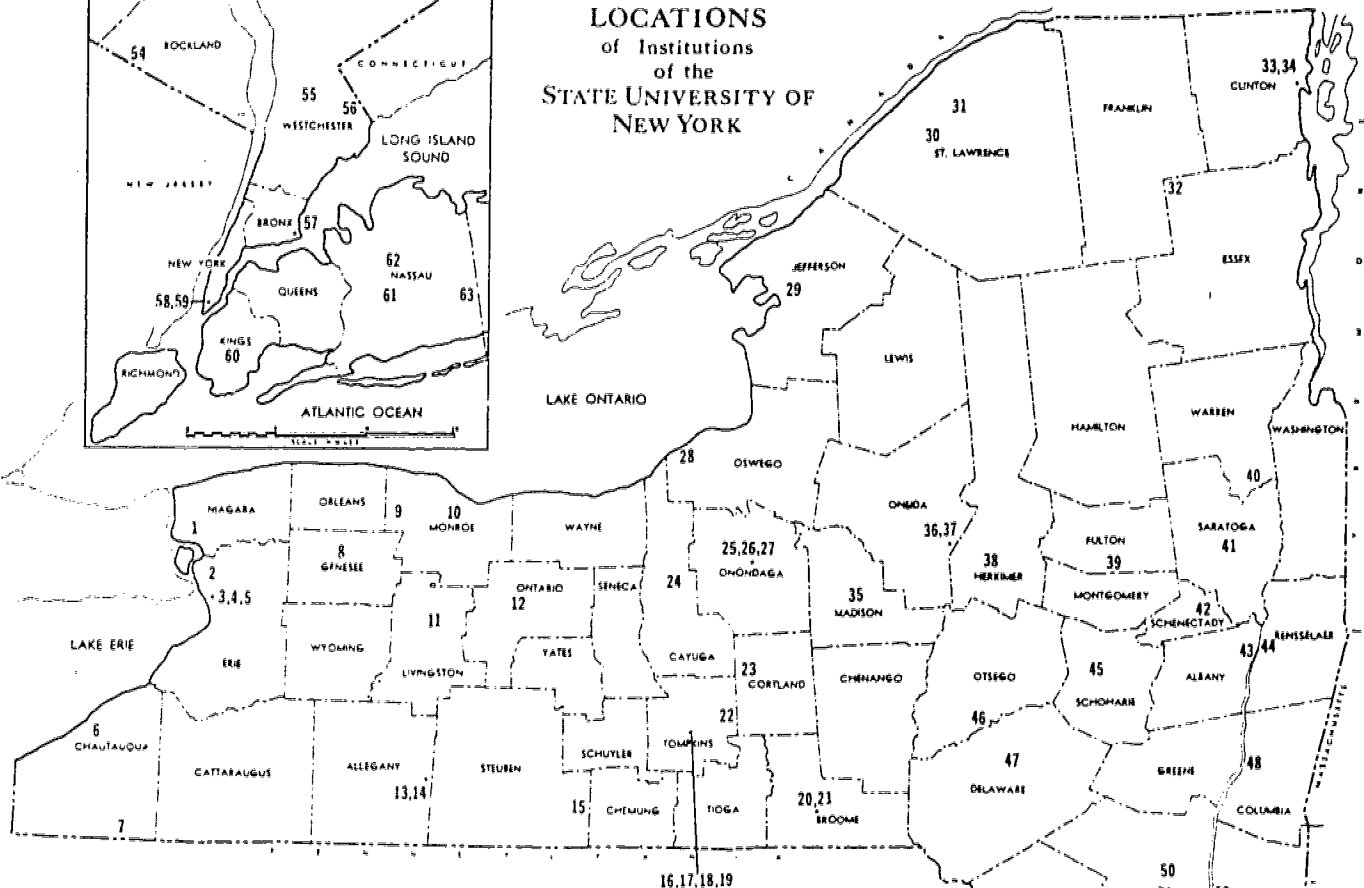

As is always the case, the significance of data depends on the network of interests, goals and priorities of the user of the data. Consequently, the data included in this report have been presented in a fashion designed to provide maximum flexibility, and hence utility, to a wide spectrum of users.

No study of this magnitude could have been conducted or completed without the extensive cooperation of campus personnel and of those in the Central Staff Office of Institutional Research. Those who will use this document will be grateful for that effort.

^aThe "location" is the county of the institution except for community colleges, where the "location" is the sponsorship area. For some colleges, the addition of students from contiguous counties substantially increases this percentage.

^bExcluding Empire State College.

^cThe community colleges sponsored by the New York City Board of Higher Education ceased to be under the program of the State University of New York as of July 1, 1975 and are now solely a part of the City University of New York. The data for Fall 1975 does not include these institutions; the data through Fall 1974 does include these institutions.
