ABSTRACT

Presented are the results of a survey involving personnel directors from 271 local firms in Manatee and Sarasota Counties (Florida) on the employment of the physically impaired, visually impaired, hearing impaired, and mentally retarded. Included are brief descriptions of the goals of the survey and the sampling technique used, and a sample survey packet with handicap definitions. Favorable data is summarized for each of 14 job clusters (such as construction/building and government). Also provided for each job cluster are tables with statistical data related to the analysis of labor market returns, potential job positions which are available to handicapped persons, total firms reporting jobs, and training preference of personnel directors reporting jobs suitable for handicapped persons. Comments made by personnel directors are provided for each job cluster. In addition, a table is presented which lists alphabetically jobs for the handicapped and a table on overall responses to the labor market survey. It is noted that the survey results may be helpful in vocational counseling for exceptional students and their parents. (SBH)

INTRODUCTION

FLRS/Suncoast Associate Center with contractual assistance from Adley Associates, Inc. and with assistance from many interested persons completed a labor market survey. Analysis of the surveys returned identify 1975-76 directions in employment of handicapped persons in Manatee and Sarasota Counties. Personnel directors from local firms were surveyed by mail for employment information about the physically impaired, visually impaired, hearing impaired, and retarded persons. This information is available to special education personnel in Sarasota and Manatee Counties. The report is now being introduced through meetings and workshops with vocational coordinators, work evaluators, guidance counselors, occupational specialists and others. This information may be helpful in advising exceptional students and parents.

Copies of this report will be submitted to the Florida Developed Products Listing printed by the State Department of Education. The report and survey returns are in the FLRS/Suncoast office and may be reviewed upon request by anyone wishing to do so.

ACKNOWLEDGEMENTS

The FLRS/Suncoast Associate Center staff wishes to express its appreciation to the firms that participated in the survey, agency representatives, school personnel, parents, and interested citizens who have contributed their time and talents to the development of the Survey Report. Special mention is given to Mr. William Brisson, Dr. Jack Dale, and Mr. Robert Jones. The concern and interest which has been demonstrated has been most gratifying.

GOALS OF THE "SURVEY OF THE LABOR MARKET FOR HANDICAPPED PERSONS IN MANATEE AND SARASOTA COUNTIES"

To acquire current listing of jobs that local employers indicated could be filled by physically impaired, visually impaired, hearing impaired, or retarded persons.

To acquire current information stating employer's training preference for jobs that could be filled by physically impaired, visually impaired, hearing impaired, or retarded persons.

To acquire current information from employers to determine hiring trends of persons who are physically impaired, visually impaired, hearing impaired, or retarded persons.

SAMPLING TECHNIQUE

A mail survey was conducted. A description of the sampling technique follows in three parts: selection of firms, method of contacting firms, and background information given to personnel directors.

Most firms in Manatee and Sarasota Counties are in one of fourteen standard job clusters. For most job clusters, ten to twenty area firms were surveyed. Where possible, the firms selected had twenty or more employees. A total of two hundred seventy-one firms were contacted. In the job clusters of electronics and government, the firms contacted represent nearly the universe of known firms. The office/clerical cluster was surveyed through survey forms mailed to twenty-three banks and to all other firms in the total survey. Further data on job clusters and overall survey responses is given on the last page.

Phone contact was initially made with personnel directors for selected firms. Those personnel directors willing to participate in the survey received survey forms for their job cluster and the clerical cluster. A reminder letter with another survey was mailed to personnel directors who failed to return the original survey.

A packet of background information about the survey and survey forms were mailed to personnel directors. Materials given in the packet included: an information page on purpose of the survey, a definition page on impairments, survey forms, and a prepared return envelope. An example of the mail packet appears in this report.

(Page 1 of Survey Packet)

Dear

Thank you for agreeing to participate in our Survey. As we mentioned in our recent phone conversation, enclosed is a short questionnaire. Please complete it at your earliest convenience and return in the stamped, self-addressed envelope provided. Your firm is one of a limited sample representing each of the major industries in our area; as such your response is critical to the success of our project.

FLRS/Suncoast Associate Center, a federally funded project, in conjunction with the Sarasota and Manatee County School Systems, is attempting to determine potential job opportunities for handicapped youth in the bi-county area. Information received from this survey will assist the schools in re-evaluating their job-oriented curriculum in order that handicapped youth may better prepare themselves for gainful employment.

Following are explanatory comments that may help in completing the questionnaire in a minimum of time.

Attached to the questionnaire is a sheet providing a very general description of the types of handicapped individuals with which the survey is concerned. These descriptions are but simple, working definitions to familiarize you with some of the most basic characteristics persons with each handicap may have.

Question 1 — Check the box for each job position you normally employ persons. It does not matter that you may not currently have openings in these positions. Also, please indicate the approximate number of persons you now employ (if any) in each job. If your firm has positions other than those listed, please write these in the blank spaces provided. Regarding these "other" job positions, our interest is limited to those jobs that would require no more than a high school education or vocational equivalent.

Thank you for your cooperation. Should you have any questions, please feel free to call Bette Hammond between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday.

The following general descriptions will serve to familiarize you with some of the characteristics of the handicapped groups listed below. Any one individual within a handicap category may not exhibit all of the characteristics listed.

DESCRIPTIONS

A PHYSICALLY HANDICAPPED person:

will have limited mobility necessitating the use of crutches or a wheelchair and building facilities to accommodate wheelchairs; would require assistance during emergency situations.

A person who is VISUALLY IMPAIRED:

would have difficulty reading standard size print such as typed copy, newspapers, etc.;
may use touch and hearing to compensate for visual weakness;

would require assistance during emergency situations.

A person who is HEARING IMPAIRED:

may have difficulty with verbal communication;
would require assistance during emergency situations;
can work well in a noisy environment.

A person who is RETARDED:

learns more slowly and has less learning potential than one within the normal range of intelligence;

may need extended on-the-job training and/or supervision;
performs best at uncomplicated, repetitive, manual, unskilled, and semi-skilled tasks.

SUMMARY OF FAVORABLE DATA IN JOB CLUSTERS FOR HANDICAPPED

BOATS/FIBERGLASS

(Not enough data to make statement.)

CONCRETE

Of six (6) firms employing twelve (12) concrete batchers, two (2) firms indicated eight (8) job possibilities for hearing impaired.

CONSTRUCTION/BUILDING

Of six (6) firms employing seven (7) draftsmen/draftswomen, four (4) firms indicated four (4) job possibilities for physically handicapped.

For laborer jobs, personnel directors reported that the hearing impaired and retarded were capable of performing the job tasks.

ELECTRONICS

Of four (4) firms employing eighty-two (82) electrical assemblers, three (3) firms indicated sixty-two (62) job possibilities for physically handicapped.

FOOD PROCESSORS

(Not enough data to make statement.)

GOVERNMENT

Of two (2) firms employing seventy-nine (79) maintenance workers, one (1) firm indicated sixty-nine (69) job possibilities for hearing impaired or retarded.

As a group, four (4) personnel directors would consider persons with impairments for groundskeeper.

Of three (3) firms employing one hundred sixty-one (161) janitors/custodians, one (1) firm indicated one hundred fifty (150) job possibilities for hearing impaired or retarded.

The only personnel director reporting cook and kitchen assistant indicated his firm employed two hundred and eight (208) persons in this job and that physically handicapped and hearing impaired persons could handle the job.

Summary of Favorable Data in Job Clusters for Handicapped - continued

HOSPITAL AND HEALTH RELATED SERVICES

Of three (3) firms employing seven (7) linen room attendants, three (3) firms indicated seven (7) job possibilities for hearing impaired.

Of five (5) firms employing seventy-nine (79) handyman/housekeeper, two (2) firms indicated seventy-two (72) job possibilities for retarded.

Of six (6) firms employing one hundred and ten (110) dietary workers, five (5) firms indicated one hundred and five (105) job possibilities for retarded.

Of three (3) firms employing seventeen (17) admission clerks, the firms indicated seventeen (17) job possibilities for physically handicapped.

For the aide job, one (1) personnel director indicated twenty (20) job possibilities for the hearing impaired and another personnel director indicated forty-eight (48) job possibilities for the retarded.

HOTEL, MOTEL, AND RETAIL SERVICES

Of fourteen (14) firms employing sixty-one (61) dishwashers, thirteen (13) firms indicated fifty-seven (57) job possibilities for hearing impaired. And nine (9) firms indicated thirty-two (32) job possibilities for the retarded.

Of five (5) firms employing eight (8) groundskeepers, four (4) firms indicated seven (7) job possibilities for hearing impaired.

Of fourteen (14) firms employing twenty-four (24) janitors, ten (10) indicated nineteen (19) job possibilities for hearing impaired.

LAWN CARE/NURSERY

Of nine (9) firms employing twenty-six (26) nursery production workers, nine (9) firms indicated twenty-six (26) job possibilities for hearing impaired.

Of two (2) firms employing six (6) persons in landscaping, the firms indicated six (6) job possibilities for visually or hearing impaired.

LUMBER & WOOD PRODUCTS

Of three (3) firms employing four (4) carpenters, three (3) firms indicated four (4) job possibilities for hearing impaired.

Summary of Favorable Data in Job Clusters for Handicapped - continued

LUMBER & WOOD PRODUCTS - continued

Of three (3) firms employing seventy-eight (78) furniture makers, three (3) firms indicated seventy-eight (78) job possibilities for hearing impaired. One (1) of three (3) firms employ seventy-five (75) furniture makers and indicated seventy-five (75) job possibilities for retarded.

Of five (5) firms employing seventy-four (74) machine operators, three (3) firms indicated seventy (70) job possibilities for hearing impaired. Two (2) firms indicated fifty-five (55) job possibilities for retarded.

MOBILE HOME & FABRICATED METALS

Of four (4) firms employing one hundred and two (102) machine operators, two (2) firms indicated eighty (80) job possibilities for physically handicapped.

The only personnel director reporting production workers indicated forty (40) job possibilities for visually or hearing impaired persons.

OFFICE/CLERICAL

Of forty-one (41) firms employing eighty-four (84) billing clerks, twenty-nine (29) indicated sixty-seven (67) job possibilities for physically impaired.

Of forty-five (45) firms employing two hundred and forty-one (241) clerk/typists, twenty-eight (28) firms indicated two hundred and four (204) job possibilities for physically impaired.

Of forty-seven (47) firms employing sixty-five (65) payroll clerks, thirty-one (31) firms indicated forty-nine (49) job possibilities for physically impaired.

Of twenty-three (23) firms employing fifty-five (55) business machine operators, twelve (12) firms indicated forty-four (44) job possibilities for physically impaired.

Of twenty (20) firms employing twenty-nine (29) dispatchers, nine (9) firms indicated twenty-three (23) job possibilities for physically impaired.

PLASTICS

Of four (4) firms employing forty-one (41) machine operators, three (3) firms indicated thirty-eight (38) job possibilities for hearing impaired. Two (2) firms indicated thirty-six (36) job possibilities for physically handicapped.

Summary of Favorable Data in Job Clusters for Handicapped - continued

PRINTING/PUBLISHING

Most jobs in printing/publishing are within the capabilities of the physically handicapped and hearing impaired as reported by personnel directors.

SUMMARY OF COMMENTS BY PERSONNEL DIRECTORS

BOATS/FIBERGLASS

"Our foreman says even a hearing disability would not be acceptable."

CONCRETE

"For safety purposes all our employees must be physically fit - we might at some point consider a slightly retarded individual for a laborer's position."

CONSTRUCTION & BUILDING

"General Contractor - all work through sub-contractors."

"However the person's hearing would have to be well enough to take instructions. Our laborers also perform carpenter's helper duties."

ELECTRONICS

no comments

FOOD PROCESSORS

"Since we are only a warehouse and distribution point, we are limited to the following jobs: Manager, Sales Manager, Driver/Salesmen, Warehouseman (½ fork lift), and Loader (½ fork lift). All of the above require a driver's license, all require a great amount of handling cases at 50 to 60 pounds each, all except the loader require a good knowledge of math (at least high school) in order to figure sales tickets and check in properly. I am afraid our particular profession is a poor one for handicapped persors, although our bottling plant in Tampa may be able to hire the handicapped."

GOVERNMENT

"The County has some eighty-five different job classifications. If an individual's specific handicap did not preclude performance of the required duties, they would be considered eligible for an opening. Naturally, the handicap could not be of such nature that it would expose the applicant or co-workers to abnormal safety risks."

Summary of Comments by Personnel Directors - Continued

HOSPITAL/HEALTH & RELATED SERVICES

"Typing skills must be vocationally trained."

HOTEL/MOTEL, RETAIL SERVICES

"Dishwashers, Maids, Groundskeepers could be considered by persons whose hearing was impaired, possibly by some retarded persons."

"Since this has been such a very bad year for us financially, we would not at this time, consider hiring anyone in any capacity. We are just trying to keep what we have."

(Regarding Display Technician Position) - "Background in art - would probably require more than vocational training. Example, Ringling School."

LAWN CARE/NURSERY

"The people who work for us also are salespersons and it is very hard to put a handicapped person in this position."

LUMBER/WOOD PROPERTY

"Actually none of the handicapped can be employed. Shop work is extremely dangerous and a person must have easy mobility and also must see and hear very well when working with saws, etc. I feel both vocational course and on-the-job training are required."

MOBILE HOME & FABRICATED METALS

"In this industry, which is by government standards heavy industry, all our men must have excellent hearing and quick reflexes in order to prevent accidents

"Our greatest turnover is in our production department. We manufacture prefinished plywood and occasionally there are positions available in the plant."

"It would all depend upon what type of handicap is involved before I could place a person in a job category. Let me stress the importance of our safety regulations (ruled by OSHA) as to employing visually or hearing impaired persons. Working around our machinery is very dangerous and risky."

OFFICE/CLERICAL

"I can't be of much help. In a shop the size of ours - all employees do so many different things that all physical abilities are needed."

OFFICE/CLERICAL - Continued

"At the present our office positions are pretty well permanent and not available for occasional turnover. As typing and knowledge of figures are required, vocational course would be necessary."

"Employee in this position could not have any impairment."
(Refers to one employee who performs 17 of 18 positions listed on the survey form.)

"At one point in time our office manager was confined to a wheelchair."

"All of the above must type - so vocational training needed."

"Don't currently have positions which would permit handicap."

PLASTICS

"Please understand mine is a new business not presently in a position to hire. When an employee is needed I will be happy to call Beneva House."
