ABSTRACT

Designed to meet the job-related metric measurement needs of auto mechanics students, this instructional package is one of four for the transportation occupations cluster, part of a set of 55 packages for metric instruction in different occupations. The package is intended for students who already know the occupational terminology, measurement terms, and tools currently in use. Each of the five units in this instructional package contains performance. objectives, learning activities, and supporting information in the form of text, exercises, and tables. In addition, suggested teaching techniques are included. At the back of the package are objective-based evaluation items, a page of answers to the exercises and tests, a list of metric materials needed for the activities, references, and a list of suppliers. The material is designed to accommodate a Mariety of individual teaching and learning styles, e.g., independent study, small group, or whole-class activity. Exercises are intended to facilitate experiences with measurement instruments, tools, and devices used in this occupation and job-related tasks of estimating and measuring. Unit , a general introduction to the metric system of measurement, provides informal, hands-on experiences for the students. This unit enables students to become familiar with the basic metric units, their symbols, and measurement instruments; and to develop a set of mental references for metric values. The metric system of notation also is explained. Unit 2 provides the metric terms which are used in this occupation and gives experience with occupational measurement tasks. Unit 3 focuses on job-related metric equivalents and their relationships. Unit 4 provides experience with recognizing and using metric instruments and tools in occupational measurement tasks. It also provides experience in comparing metric and customary measurement instruments. Unit 5 is designed to give students practice in envefting customary and metric measurements, a skill considered seful during the transition to metric in each occupation. (HD)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). is not responsible for the quality of the original document, Reproductions supplied by EDRS are the best that can be made from ERIC ginal.

TEACHING AND LEARNING THE METRIC SYSTEM

This metric instructional package was designed to meet job-related metric measurement needs of students. To use this package students should already know the occupational terminology, measurement terms, and tools currently in use. These materials were prepared with the help of experienced vocational teachers, reviewed by experts, tested in classrooms in different parts of the United States, and revised before distribution.

Each of the five units of instruction contains performance objectives, learning activities, and supporting information in the form of text, exercises, and tables. In addition, suggested teaching techniques are included. At the back of this package are objective-based evaluation items, a page of answers to the exercises and tests, a list of metric materials needed for the activities, references, and a list of suppliers.

Classroom experiences with this instructional package suggest the following teaching-learning strategies:

- 1. Let the first experiences be informal to make learning the metric system fun.
- 2. Students learn better when metric units are compared to familiar objects. Everyone should learn to "think metric." Comparing metric units to customary units can be confusing.
- 3. Students will learn quickly to estimate and measure in metric units by "doing."
- 4. Students should have experience with measuring activities before getting too much information.
- 5. Move through the units in an order which emphasizes the simplicity of the metric system (e.g., length to area to volume).
- 6. Teach one concept at a time to avoid overwhelming students with too much material.

Unit 1 is a general introduction to the metric system of measurement which provides informal, hands-on experiences for the students. This unit enables students to become familiar with the basic metric units, their symbols, and measurement instruments; and to develop a set of mental references for metric values. The metric system of notation is explained.

Unit 2 provides the metric terms which are used in this occupation and gives experience with occupational measurement tasks.

Unit 3 focuses on job-related metric equivalents and their relationships.

Unit 4 provides experience with recognizing and using metric instruments and tools in occupational measurement tasks. It also provides experience in comparing metric and customary measurement instruments.

Unit 5 is designed to give students practice in converting customary and metric measurements. Students should learn to "think metric" and avoid comparing customary and metric units. However, skill with conversion tables will be useful during the transition to metric in each occupation.

Using These Instructional Materials

This package was designed to help students learn a core of knowledge about the metric system which they will use on the job. The exercises facilitate experiences with measurement instruments, tools, and devices used in this occupation and job-related tasks of estimating and measuring.

This instructional package also was designed to accommodate a variety of individual teaching and learning styles. Teachers are encouraged to adapt these materials to their own classes. For example, the information sheets may be given to students for self-study. References may be used as suppler ental resources. Exercises may be used in independent study, small groups, or whole-class activities: All of the materials can be expanded by the teacher.

UNIT

1

SUGGESTED TEACHING SEQUENCE

- 1. These introductory exercises may require two or three teaching periods for all five areas of measurement.
- Exercises should be followed in the orders given to best show the relationship between length, area, and volume.
- Assemble the metric measuring devices (rules, tapes, scales, thermometers, and measuring containers) and objects to be measured.*
- 4. Set up the equipment at work stations for use by the whole class or as individualized resource activities.
- Have the students estimate, measure, and record using Exercises 1 through 5.
- 6. Present information on notation and make Table 1 available.
- 7. Follow up with group discussion of activities.

*Other school departments may have devices which can be used. Metric suppliers are listed in the reference section.

OBJECTIVES

The student will demonstrate these skills for the Linear, Area, Volume or Capacity, Mass, and Temperature Exercises, using the metric terms and measurement devices listed here.

| | , | a . | | EXERCISE | s (| |
|----|---|---|--------------------------------|--|---|---|
| | SKILLS | Linear (pp. 3 - 4) | Area (pp. 5 · 6) | Volume or Capacity (pp. 7 - 8) | Mass (pp. 9 - 10) | Temperature (p. 11) |
| 1. | Recognize and use the unit and its symbol for: Select, use, and read the appropriate measuring | millimetre (mm) centimetre (cm) | square centimetre (cm²) | cubic centi metre (cm ¹) cubic metre (m ³) | gram (g) kilogram (kg) | degree Celsius (°C) |
| 3. | instruments for: State or show a physical elerence for: | <i>f</i> | metre (m ²) | litre (1) millilitre (ml) | | J |
| 4. | Estimate within 25% of the actual measure | height, width, or length of objects | the area of a given surface | capacity of containers | the mass of objects in grams and kilo grams | the temperature of the air or a liquid |
| 5. | Read correctly | metre stick, metric tape measure, and metric rulers | | measurements on graduated yolume measur- jhg devices | a kilogram scale and a gram scale | A Celsius thermometer |

RULES OF NOTATION

- 1. Symbols are not capitalized unless the unit is a proper name (mm not MM).
- 2. Symbols are not followed by periods (m not m.).
- 3. Symbols are not followed by an s for plurals (25 g not 25 gs).
- 4. A space separates the numerals from the unit symbols (4 l not 41).
- 5. Spaces; not commas, are used to separate large numbers into groups of three digits (45 271 km not 45,271 km).
- 6. A zero precedes the decimal point if the number is less than one (0.52 g not .52 g).
- 7. Litre and metre can be spelled either with an re or er ending.

Information Sheet 1

METRIC UNITS, SYMBOLS, AND REFERENTS

| Quantity | Metric Unit | Symbol | Useful Referents |
|------------|------------------------------|-----------------|--|
| Length | millimetre | mm | Thickness of dime or paper clip wire |
| | centimetre | cm> ° | Width of paper clip |
| | metre | m | Height of door about 2 m |
| , | kilometre | km< | 12-minute walking distance |
| Area | square centimetre | cm ² | Area of this space |
| | square metre | m ² | Area of card table top |
| L . | hectare | ha | Football field including sidelines and end zones |
| Volume and | millilitre | ml | Teaspoon is 5 ml |
| Capacity | litre . | 1 | A little more than 1 quart |
| | cubic centimetre | cm ³ | Volume of this container |
| | • | · · · · · | |
| • | cubic metre | m ³ | A little more than a cubic yard |
| Mass | milligram | mg 1 | Apple seed about 10 mg, grain of salt, 1 mg |
| | gram | g . | Nickel about 5 g |
| , | kilogram | kg. | Webster's Collegiate Dictionary |
| | metric ton (1 000 kilograms) | | Volkswagen Beetle |

3

LINEAR MEASUREMENT ACTIVITIES

Metre, Centimetre, Millimetre

I. THE METRE (m)

A. DEVELOP A FEELING FOR THE SIZE OF A METRÉ

1. Pick up one of the metre sticks and stand it up on the floor. Hold it in place with one hand. Walk around the stick. Now stand next to the stick. With your other hand, touch yourself where the top of the metre stick comes on you.

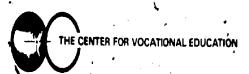

THAT IS HOW HIGH A METRE IS!

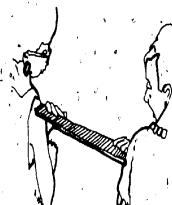

2. Hold one arm out straight at shoulder height. Put the metre stick along this arm until the end hits the end of your fingers. Where is the other end of the metre stick? Touch your self at that end.

THAT IS HOW LONG A METRE IS!

at your side. Move apart so that you can put one end of a metre stick on your partner's shoulder and the other end on your shoulder. Look at the space between you.

THAT IS THE WIDTH OF A METRE!

B. DEVELOP YOUR ABILITY TO ESTIMATE IN METRES

Now you will improve your ability to estimate in metres. Remember where the length and height of a metre was on your body.

For each of the following items:

Estimate the size of the items and write your estimate in the ESTIMATE column. Measure the size with your metre stick and write the answer in the MEASUREMENT column.

Decide how close your estimate was to the actual measure. If your estimate was within 25% of the actual measure you are a "Metric Maryet."

| | Height of door knob from floor. | Estimate (m) | Measurement (m) | How Close Were You? |
|---|---------------------------------|--------------|-----------------|------------------------|
| | Height of door. | | | |
| | Length of table. | . . | | |
| Ŋ | Width of table. | · | | <u> </u> |
| | Length of wall of this room. | · · | | · . |
| | Distance from | , | , , | • • |

Exercise 1

(continued on next page)

l 1

| | | | , , | |
|-----|--------|-----------|----------|----------|
| | .I | CENTIN | WATER TO | / F \F |
| 11 | ALLII. | TILL TILL | AM*1 K K | J PM |
| II. | Inc | CELLAR | TO THE | a citti. |
| *** | | 44-41 | | , , |

There are 100 centimetres in one metre. If there are 4 metres and 3 centimetres, you write 403 cm [(4 x 100 cm) + 3 cm = 400 cm + 3 cm]

A DEVELOP A FREELING FOR THE SIZE OF A CENTIMETRE

- Hold the metric ruler against the width of your thumbnail. How wide is it?
- 2. Weasure your thumb from the first joint, to the end:
- 3. Use the metric ruler to find the width of your palm
- 4. Measure your index or pointing finger. How long is it?
- 5. Measure your wrist with a tape measure. What is the distance around it?,
- 6. Use the tape measure to find your waist size. _____ cm

B. DEVELOPYOUR ABILITY TO ESTIMATE IN CENTIMETRES

You are now ready to estimate in centimetres. For each of the following it. s, follow the procedures used for estimating in metres.

| | | Estimate (cm) | Measurement (cm) | Were You? |
|----|-----------------------------|---------------|------------------|-----------|
| 1. | Length of a paper | , | | |
| | clip. | | | |
| 2. | Diameter (width) of a coin. | | | |
| 3. | Width of a postage stamp. | , | | |
| 4. | Length of a | 7 | • | |

5. Width of a sheet of paper.

THE CENTER FOR VOCATIONAL EDUCA

pencil.

III. THE MILLIMETRE (mm)

There are 10 millimetres in one centimetre. When a measurement is 2 centimetres and 5 millimetres, you write 25 mm [(2 x 10 mm) + 5 mm = 20 mm + 5 mm]. There are 1 000 mm in 1 m.

A. DEVELOP A FEELING FOR THE SIZE OF A MILLIMETRE

| Us | ing a ruler marked in millimetres, measur | e: . • | 1 |
|----|---|---|------|
| 1. | Thickness of a paper clip wire. | | mm |
| 2. | Thickness of your fingernail. | <u>, ',</u> | min, |
| 3. | Width of your fingernail. | 7 | mm |
| 4 | Diameter (width) of a coin. | • • • | шi |
| 5. | Diameter (thickness) of your penell. | , | mm |
| 6. | Width of a postage stamp. | | mm |

B. DEVELOP YOUR ABILITY TO ESTIMATE IN MILLIMETRES

You are now ready to estimate in millimetres. For each of the following items, follow the procedures used for estimating in metres.

| 1 | metres. | , | • | How Close |
|------------|-----------------------------------|------------------|------------------|-----------|
| | | Estimate (mm) | Measurement (mm) | |
| ., | Thickness of a nickel. | | 3 | |
|) <u>.</u> | Diameter (thickness) of a bolt. | | : | |
| } | Length of a bolt. | <u> </u> | | |
| ł. ' | Width of a sheet ` of paper. | | | |
| 5 . | Thickness of a board or desk top. | | · · · · | 4 |
| 3. | Thickness of a button. | | | • |

Exercise 1

AREA MEASUREMENT ACTIVITIES

Square Centimetre, Square Metre

WHEN YOU DESCRIBE THE AREA OF SOMETHING, YOU ARE SAYING HOW MANY SQUARES OF A GIVEN SIZE IT TAKES TO COVER THE SURFACE.

| I. THE SQUARE CENTIMETRE (cm ² |
|---|
|---|

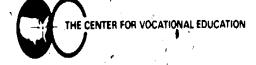

DEVELOP A FEELING FOR A SQUARE CENTIMETRE

- Take a clear plastic grid, on use the grid on page 6.
- Measure the length and width of one of these small squares with a centimetre ruler.

THAT IS ONE SQUARE CENTIMETRE! •

- Place your fingernail over the grid. About how many squares does it take to cover your fingernail?
- Place a coin over the grid. About how many squares does it take to cover the coin? _____cm²
- Place a postage stamp over the grid. About how many squares does it take to cover the postage stamp? _cm²
- Place an envelope over the grid. About how many squares does it take to cover the envelope?
- Measure the length and width of the envelope in centimetres. Length ____ cm; width _ Multiply to find the area in square centimetres.

cm x $cm = cm^2$. How close are the answers you have in 6. and in 7.?

B. DEVELORYOUR ABILITY TO ESTIMATE IN SQUARE CENTIMETRES

You are now ready to develop your ability to estimate 💎 🤝 in square centimetres.

Remember the size of a square centimetre. For each/of the following items, follow the procedures used for estimating in

| J ,* | | • | Estimate (cm ²) | Measurement (cm ²) | Were You? |
|------|--------------------------|----------|-----------------------------|--------------------------------|-----------|
| 1. | Index card. | | · | | 40 |
| . 2. | Book cover. | | | | • |
| 3. | Photograph. | • |) | <u> </u> | * |
| 4. | Window pane or desk top. | <i>S</i> | * | | |
| • | | | (10 | | |

THE SQUARE METRE (m²)

A. DEVELOP A FEELING FOR A SQUARE METRE

- Tape four metre sticks together to make a square which is one metre long and one metre wide.
- Hold the square up with one side on the floor to see how big it is.
- Place the square on the floor in a corner. Step back and look. See how much floor space it covers.
- Place the square over a table top or desk to see how much space it covers.
- Place the square against the bottom of a door. See how much of the door it covers. How many squares would it take to cover the door? m²

THIS IS HOW BIG A SQUARE METRE IS!

| v | | om v om v om = vo | m3 |

Are the answers the same in coand d.?

| В. | DEVELOP YOUR ABILITY | ТО | ESTI! | MATE | IN C | UBIC |
|----|----------------------|----|-------|------|------|------|
| | CENTIMETRES | | | | õ | |

You are now ready to develop your ability to estimate in cubic centimetres.

Remember the size of a cubic centimetre. For each of the following items, use the procedures for estimating in ,

| | Measurement (cm ³) | Were You? |
|----------------------|--------------------------------|------------------|
| Index card file box. | | · |
| Freezer container. | | ر ر ر |

Box of staples.

Paper clip box.

THE LITRE (1)

A. DEVELOP A FEELING FOR A LITRE

- Take a one litre beaker and fill it with water.
- Pour the water into paper cups, filling each as full as you usually do. How many cups do you fill?
- THAT IS HOW MUCH IS IN ONE LITRE!
- Fill the litre container with rice. THAT IS HOW MUCH IT TAKES TO FILL A ONE

LITRE CONTAINER!

Exercise 3 (continued on next page)

B. DEVELOP YOUR ABILITY TO ESTIMATE IN LITRES

You are now ready to develop your ability to estimate in litres. To write two and one-half litres, you write 2.5 l, or 2.5 litres. To write one-half litre, you write 0.5 l, or 0.5 litre. To write two and three-fourths litres, you write 2.75 l, or 2.75 litres.

For each of the following items, use the procedures for estimating in metres.

How Close Estimate Measurement Were You?

- Medium-size
 freezer container
- 2. Large freezer container.
- 3. Small freezer container.
- 74. Bottle or jug.

III. THE MILLILITRE (ml)

There are 1 000 millilitres in one litre. 1 000 ml = 1 litre. Half a litre is 500 millilitres, or 0.5 litre = 500 ml.

A. DEVELOP A FEELING FOR A MILLILITRE

- 1. Examine a centimetre cube. Anything which holds 1 cm³ holds 1 ml.
- Fill a 1 millilitre measuring spoon with rice. Empty the spoon into your hand. Carefully pour the rice into a small pile on a sheet of paper.

THAT IS HOW MUCH ONE MILLILITRE IS!

- 3. Fill the 5 ml spoor with rice. Pour the rice into another pile on the sheet paper.
 - THAT IS 5 MILLILITRES, OR ONE TEASPOON!
- 4. Fill the 15 ml spoon with rice. Pour the rice into a third pile on the paper.

THAT IS 15 MILLILITRES, OR ONE TABLESPOON!

THE CENTER FOR VOCATIONAL EDUCATION

| , | | |
|----|--|-------|
| B. | DEVELOP YOUR ABILITY TO ESTIMATE IN MILLII | ITRES |

You are now ready to estimate in millilitres. Follow the procedures used for estimating metres.

| | | Estimate (ml) | Measurement (ml) | How Close Were You? |
|----|------------------------|---------------|------------------|------------------------|
| 1. | Small juice can. | | · | 7 1 |
| 2. | Paper cup or teal cup. | | | \ |
| 3. | Soft drink can. | | | |
| d | Rottle | | | · . |

IV. THE CUBIC METRE (m³)

A. DEVELOP AFFEELING FOR A CUBIC METRE

- 1. Place a one metre square on the floor next to the wall.
 - 2. Measure a metre UP the wall.
 - 3. Bicture a box that would fit into that space.
 THAT IS THE VOLUME OF ONE CUBIC METRE!

B. DEVELOP YOUR ABILITY TO ESTIMATE IN CUBIC METRES

For each of the following items, follow the estimating procedures used before.

| | The state of the s | Estima (m ³ | | How nt Were | |
|----|--|---------------------------|--------------|----------------|--|
| 1. | Office desk. | | • | .# | |
| 2. | File cabinet. | | | | |
| 9 | Cmall room | , | , <i>*</i> * | | |

Exercise 3

MASS (WEIGHT) MEASUREMENT ACTIVITIES

Kilogram, Gram

The mass of an object is a measure of the amount of matter in the object. This amount is always the same unless you add or subtract some matter from the object. Weight is the term that most people use when they mean mass. The weight of an object is affected by gravity; the mass of an object is not. For example, the weight of a person on earth might be 120 pounds; that same person's weight, on the moon would be 20 pounds. This difference is because the pull of gravity on the moon is less than the pull of gravity on earth. A person's mass on the earth and on the moon would be the same. The metric system does not measure weight- it measures mass. We will use the term mass here.

The symbol for gram is g.

The symbol for kilogram is kg.

There are 1 000 grams in one kilogram, or 1 000 g = 1 kg.

Half a kilogram can be written as 500 g,or 0.5 kg.

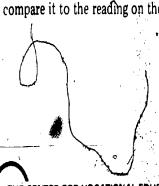

A quarter of a kilogram can be written as 250 g, or 0.25 kg.

Two and three-fourths kilograms is written as 2.75 kg.

I. THE KILOGRAM (kg)

DEVELOP A FEELING FOR THE MASS OF A KILOGRAM

Using a balance or scale, find the mass of the items on the table. Before you find the mass, notice how heavy the object "feels" and compare it to the reading on the scale or balance.

| ٠. | • . | (kg) | | |
|------------|---|---|---|---|
| 1. | 1 kilogram box. | | ' () | |
| 2. | Textbook. | | | • |
| 3. | Bag of sugar. | | 1 | • |
| 4. | Package of paper. | . 1 | • | 7 |
| 5 . | Your own mass. | | J | |
| В. | DEVELOP YOUR | ABILITY TO I | estimate in i | KILOGRAMS |

Exercise 4 (continued on next page)

THE GRAM (g)

A DEVELOP A FEELING FOR A GRAM

Take a colored plastic cube. Hold it in your hand. 7 Shake the cube in your palm as if shaking dice. Feel the 3/4 pressure on your hand when the cube is in motion, then when it is not in motion.

THAT IS HOW HEAVY A GRAM IS

Take a second cube and attach it to the first. Shake the cubes in first one hand and then the other hand; rest. the cubes near the tips of your fingers, moving your hand up and down.

THAT IS THE MASS OF TWO GRAMS!

Take five cubes in one hand and shake them around. THAT IS THE MASS OF FIVE GRAMS!

DEVELOP YOUR ABILITY TO ESTIMATE IN GRAMS

1.

.4.

Package of margarine.

You are now ready to improve your ability to estimate in ° grams. Remember how heavy the 1 gram cube is, how heavy. the two gram cubes are, and how heavy the five gram cubes are. For each of the following items, follow the procedures used for estimating in kilograms.

| | Estimate (g) | Measurement (g) | Were You? |
|-------------------------------|-----------------|-----------------|-----------|
| Two thumbtacks. | <u></u> , | | |
| Pencil. | · | <u>و پن</u> | • |
| Two-page letter and envelope. | | - 4 | |
| Nickel. | 1 | | , <u></u> |
| Apple. | | | · · |

THE CENTER FOR VOCATIONAL EDUCATION

Exercise 4

How Close

TEMPERATURE MEASUREMENT ACTIVITIES

Degree Celsius

I. DEGREE CELSIUS (°C)

Degree Celsius (°C) is the metric measure for temperature.

A. DEVELOP A FEELING FOR DEGREE CELSIUS

Take a Celsius thermometer. Look at the marks on it.

- 1. Find 0 degrees.

 WATER FREEZES AT ZERO DEGREES CELSIUS (0°C)

 WATER BOILS AT 100 DEGREES CELSIUS (100°C)
- 2. Find the temperature of the room. C. is the room cod, warm, or about right?
- 3. Put some hot water from the faucet into a container.

 Find the temperature.

 C. Dip your finger quickly in and out of the water. Is the water very hot, hot, or just warm?
- 4. Put some cold water in a container with a thermometer. Find the temperature. _____ °C. Dip your finger into the water. Is it cool, cold, or very cold?
- 5. Bend your arm with the inside of your elbow around the bottom of the thermometer. After about three minutes find the temperature. C. Your skin temperature is not as high as your body temperature.

NORMAL BODY TEMPERATURE IS 37 DEGREES CELSIUS (37°C).

A FEVER IS 39°C.

ο A VERY HIGH FEVER IS 40°C.

| B. | DEVELOP | YOUR | ABILITY | 07 | ESTIMATE | IN DEGREES |
|----|---------|------|---------|----|-----------------|------------|
| | CELSIUS | | | | , | , |

For each item, ESTIMATE and write down how many degrees Celsius you think it is. Then measure and write the MEASURE-MENT. See how close your estimates and actual measurements are.

| | | Estimate (°C) | Measurement (°C) | How Close Were You? |
|-----------|---|------------------|------------------|------------------------|
| 1. | Mix some hot and cold water in a container. Dip your finger into the water. | | • | |
| 2. | Pour out some of the water. Add some hot water. Dip your finger quickly into the water. | d . | | |
| 3. | Outdoor temperature. | | · . | |
| 4. | Sunny window sill. | <u><</u> | • • | |
| 5. | Mix of ice and water. | <u> </u> | | 1 |

ceiling.

$^{\text{unit}} 2$

OBJECTIVES

The student will recognize and use the metric terms, units, and symbols used in this occupation.

- Given a metric unit, state its use in this occupation.
- Given a measurement task in this occupation, select the appropriate metric unit and measurement tool.

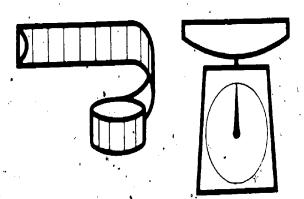

SUGGESTED TEACHING SEQUENCE

- Assemble metric measurement tools (rules, tapes, scales, thermometers, etc.) and objects related to this occupation.
- Discuss with students how to read the tools.
- 3. Present and have students discuss Information Sheet 2 and Table 2.
- Have students learn occupationallyrelated metric measurements by completing Exercises 6 and 7.
- 5. Test performance by using Section A of "Testing Metric Abilities."

METRICS IN THIS OCCUPATION

Changeover to the metric system is under way. Large corporations are already using metric measurement to compete in the world market. The metric system has been used in various parts of industrial and scientific communities for years. Legislation, passed in 1975, authorizes an orderly transition to use of the metric system. As businesses and industries make this metric changeover, employees will need to use metric measurement in job-related tasks.

Table 2 lists those metric terms which are most commonly used in this occupation. These terms are replacing the measurement units used currently. What kinds of jobrelated tasks use measurement? Think of the many different kinds of measurements you now make and use Table 2 to discuss the metric terms which replace them. See if you can add to the list of uses beside each metric term.

Information Sheet 2

METRIC UNITS FOR AUTO MECHANICS

| Quantity | Unit | Symbol | Use |
|-------------------------------------|---------------------|-----------------|---|
| , . | v. | | |
| Length | millimetre | mm | shaft size, length |
| | centimetre | g' cm | bearing sizes |
| Area | square centimetre | cm ² | piston head surface |
| Volume/capacity | cubic centimetre | cm ³ | cylinder bore |
| | cubic metre | m ³ | work or storage space |
| | millilitre , | ml | chemicals, lubricant oils |
| <i>f</i> | litre / | l | oil, fuel, gasoline storage |
| Temperature | degree Celsius | °C | thermostats, engine operating temperature ranges, oil temperatu |
| Mass | gram | g | tire weights |
| | kilogram | kg | batteries, engines |
| ` | metric ton | t | vehicles, load weights |
| Bending moment (moment of force) | newton metre | N·m | torque specifications |
| Pressure/vacuum | kilopascal | kPa | manifold pressure compression, air hose pressure |
| Velocity | kilometres per hour | km/h | speed of the vehicle |
| *Energy/work | kilowatt-hour | kW h | work efficiency of an engine |

*Note: Further metric definitions for mechanics are found in Rules for SAE Use of SI (Metric) Units, Society of Automotive Engineers, Inc., Available: Society of Automotive Engineers, Inc., 400 Commonwealth Dr., Warrendale PA 15096.

Table 2

TRYING OUT METRIC UNITS

To give you practice with metric units, first estimate the measurements of the items below. Write down your best guess next to the item. Then actually measure the item and write down your answers using the correct metric symbols. The more you practice, the easier it will be.

| • • . | Estimate | Actual |
|----------------------------------|----------|--------|
| Length 1. Palm width | | |
| 2. Hand span | | |
| 3. Your height | | · |
| 4. Ceiling height of this room | | |
| 5. Width of a paper clip | | , |
| 6. Thickness of a nickel | P 7 | , |
| 7. Length of a valve stem | . , | |
| 8. Width of this room | | |

KEEP IT RUNNING WITH METRICS

| | It is important to know what me | netric measurement to use. Show |
|------|---|---------------------------------|
| what | measurement to use in the followi | ing situations. |
| 1. | The stroke of a piston | |
| 2. | Length of the fuel line | |
| 3. | Length of a fambelt | |
| 4. | Diameter of a cam shaft | , |
| 5. | Volume of a fuel tank | |
| 6. | Capacity of an acetylene cylinder | |
| 7. | Amount of water in a radiator | |
| 8. | Mass of battery fluid in a 12-volt battery | |
| 9., | Tire pressure for automobile | |
| 10. | Crankshaft main journal size | 9. |
| 11. | Bore of a cylinder |) t |
| 12. | Volume of oil for crank case | |
| 13. | Capacity of a radiator | 1 |
| 14. | Temperature of cooling system while idling engine | , |
| 15. | Mass of small engine | |
| 16. | Length of exhaust pipe | |
| 17. | Spark plug gap | |

| Í8. | Diameter of a piston head | | | | |
|-----|--|---|---|---|-------|
| 19. | Distance from shop or store to your home | V | | | |
| 20 | Length of positive battery cable | | _ | ī | , |

UNIT 3

OBJECTIVE

The student will recognize and use metric equivalents.

 Given a metric unit, state an equivalent in a larger or smaller metric unit.

SUGGESTED TEACHING SEQUENCE

- Make available the Information Sheets
 (3 8) and the associated Exercises.
 (8 14), one at a time.
- 2. As soon as you have presented the Information, have the students complete each Exercise.
- 3. Check their answers on the page titled ANSWERS TO EXERCISES AND TEST.
- Test performance by using Section B of "Testing Metric Abilities."

METRIC-METRIC EQUIVALENTS

Centimetres and Millimetres

Look at the picture of the nail next to the ruler. The nail is 57 mm long. This is 5 cm + 7 mm. There are 10 mm in each cm, so 1 mm = 0.1 cm (one-tenth of a centimetre). This means that

$$7 \text{ mm} = 0.7 \text{ cm}$$
, so $57 \text{ mm} = 5 \text{ cm} + 7 \text{ mm}$

= 5 cm + 0.7 cm

= 5.7 cm. Therefore 57 mm is the same as 5.7 cm.

Now measure the paper clip. It is 34 mm. This is the same as 3 cm + _____mm. Since each millimetre is 0.1 cm (one-tenth of a centimetre), 4 mm = _____cm. So, the paper clip is 34 mm = 3 cm + 4 mm

= 3 cm + 0.4 cm

= 3.4 cm. This means that 34 mm is the same as 3.4 cm.

Information Sheet 3

Now you try some.

- a) 26 mm = ____ cm
- e) 132 mm = ____ cm
- b) 583 mm = ____ cm
- f) 802 mm = ____ cm
- c) 94 mm = ____ cm
- g) 1400 mm = ____ cm
- d) 680 mm = cm
- h) 2 307 mm = ____ cm

Exercise 8

Metres, Centimetres, and Millimetres

There are 100 centimetres in one metre. Thus,

2 m = 2 x 100 cm = 200 cm.

3 m = 3 x 100 cm = 300 cm,

8 m = 8 x 100 cm = 800 cm,

36 m = 36 x 100 cm = 3 600 cm.

There are 1 000 millimetres in one metre, so

2 m = 2 x 1 000 mm = 2 000 mm

3 m = 3 x 1 000 mm = 3 000 mm,

6 m = 6 x 1 000 mm = 6 000 mm,

24 m = 24 x 1 000 mm = 24 000 mm.

From your work with decimals you should know that

one-half of a metre can be written 0.5 m (five-tenths of a metre), one-fourth of a centimetre can be written 0.25 cm (twenty-five hundredths of a centimetre).

This means that if you want to change three-fourths of a metre to millimetres, you would multiply by 1 000. So

 $0.75 \text{ m} = 0.75 \times 1000 \text{ mm}$

750 mm. This means that 0.75 m = 750 mm.

Information Sheet 4

Fill in the following chart.

| metre m | centimetre cm | millimetre mm |
|------------|------------------|--------------------------|
| 1 | 100 | 1 000 |
| 2 | 200 | 1 |
| 3 | , | |
| 9 | | |
| | | 5 000 |
| 74 | | |
| 0.8 | ******80**** | द त्तः । इ. ५ में तकतः ल |
| 0.6 | | 600 |
| | 2.5 | 25 |
| | | 148 |
| | 639 | |

Exercise S

Millilitres to Litres

There are 1 000 millilitres in one litre. This means that

2 000 millilitres is the same as 2 litres,

3 000 ml is the same as 3 litres,

4 000 ml is the same as 4 litres,

12 000 ml is the same as 12 litres.

Since there are 1 000 millilitres in each litre, one way to change millilitres to litres is to divide by 1 000. For example,

 $1\,000\,\text{ml} = \frac{1\,000}{1\,000}\,\text{litre} = 1\,\text{litre}.$

2 000 ml = $\frac{2000}{1000}$ litres = 2 litres.

And, as a final example,

$$28\ 000\ \text{ml} = \frac{28.000}{1\ 000}$$
 litres = 28 litres.

What if something holds 500 ml? How many litres is this? This worked the same way.

> $500 \text{ ml} = \frac{500}{1000} \text{ litre} = 0.5 \text{ litre (five-tenths of a litre)}$. So 500 mlis the same as one-half (0.5) of a litre.

Change 57 millilitres to litres.

 $57 \text{ ml} = \frac{57}{1000} \text{ litre} = 0.057 \text{ litre (fifty-seven thousandths of a}$ litre).

Information Sheet 5

Now you try some. Complete the following chart.

| millilitres (ml) | litres (Ì) |
|---------------------|---------------|
| 3 000 | 3 |
| 6 000 | |
| | 8 |
| 14 000 | |
| | 23 |
| 300. | 0.3 |
| 700 | |
| | 0.9 |
| 250 | |
| ı | 0.17 |
| 275 | |

Litres to Millilitres

What do you do if you need to change litres to millilitres? Remember, there are 1 000 millilitres in one litre, or 1 litre = 1 000 ml.

So,

- 2 litres = $2 \times 1000 \text{ ml} = 2000 \text{ ml}$
- 7 · litres = 7 $\times 1000 \text{ ml} = 7000 \text{ ml}$
- 13 litres = $13 \times 1000 \text{ ml} = 13000 \text{ ml}$,
- $0.65 \text{ litre} = 0.65 \times 1000 \text{ ml} = 650 \text{ ml}.$

Information Sheet 6

Now you try some. Complete the following chart.

| litres l | millilitres ml |
|-------------|-------------------|
| . 8. | 8 000 |
| . 5 | 1 |
| 46 | |
| | 32 000 |
| 0.4 | |
| 0.53 | |
| | 480 |

Exercise 11

Grams to Kilograms

There are 1 000 grams in one kilogram. This means that

2 000 grams is the same as 2 kilograms,

5 000 g is the same as 5 kg,

700 g is the same as 0.7 kg, and so on.

To change from grams to kilograms, you use the same procedure for changing from millilitres to litres.

Information Sheet 7

Try the following ones.

| grams g | kilograms kg |
|------------|-----------------|
| 4 000 | 4 |
| 9 000 | |
| 23 000 | |
| | 8 |
| 300 | |
| 275. | |

Exercise 12

Kilograms to Grams

To change kilograms to grams, you multiply by 1 000.

$$4 \text{ kg} = 4 \text{ x } 1000 \text{ g} = 4000 \text{ g},$$

23 kg = 23
$$\times 1000 g = 23000 g$$
,

$$0.75 \text{ kg} = 0.75 \times 1000 \text{ g} = 750 \text{ g}.$$

Information Sheet 8

Complete the following chart.

| kilograms kg | grams g |
|-----------------|------------|
| 7 | 7 000 |
| 11 | |
| | 25 000 |
| 0.4 | Ţ. |
| 0.63 | |
| | 175 |

Exercise 13

Changing Units at Work

Some of the things you use in this occupation may be measured in different metric units. Practice changing each of the following to metric equivalents by completing these statements.

| a) 50 cm of hose is | • |
|----------------------------------|---|
| b) 250 ml of solution is | |
| c) 5 cm diameter hose is | |
| d) 2500 g of grease is | |
| e) 120 mm of bar steel is | |
| f) 0.25 litre of motor oil is. | |
| g) 2 000 kg of sand is | |
| h) 0.5 litre of concentrate is | |
| i) 500 g of solder is | |
| j) 500 ml of brake fluid is | |
| k) 0.5 t of floor sweep is | |
| 10·m of wire is | |
| m) 2.5 cm diamter pipe is. | , |
| n) 2 400 mm wall panel length is | |

UNIT 4

OBJECTIVE

The student will recgonize and use instruments, tools, and devices for measurement tasks in this occupation.

- Given metric and Customary tools, instruments, or devices, differentiate between metric and Customary.
- Given a measurement task, select and use an appropriate tool, instrument or device.
- Given a metric measurement task, judge the metric quantity within 20% and measure within 2% accuracy.

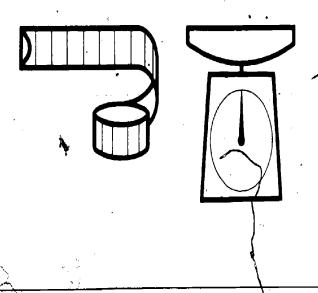

SUGGESTED TEACHING SEQUENCE

- 1. Assemble metric and Customary measuring tools and devices (rules, scales, ⁰.C thermometer, drill bits, wrenches, micrometer, vernier calipers, feeler gages) and display in separate groups at learning stations.
- Have students examine metric tools and instruments for distinguishing characteristics and compare them with Customary tools and instruments.
- 3. Have students verbally describe characteristics.
- 4. Present or make available Information Sheet 9.
- 5. Mix metric and Customary tools or equipment at learning station. Give students Exercises 15 and 16.
- 6. Test performance by using Section C of "Testing Metric Abilities."

SELECTING AND USING METRIC INSTRUMENTS , TOOLS AND DEVICES

Selecting an improper tool or misreading a scale can result in an improper sales form, damaged materials, or injury to self or fellow workers. For example, putting 207 pounds per square inch of pressure (psi) in a tractor tire designed for 207 kilopascals (about 30 psi) could cause a fatal accident. Here are some suggestions:

- 1. Find out in advance whether Customary or metric units, tools, instruments, or products are needed for a given task.
- 2. Examine the tool or instrument before using it.
- 3. The metric system is a decimal system. Look for units marked off in whole numbers, tens or tenths, hundreds or hundredths.
- 4. Look for metric symbols on the tools or gages such as m, mm, kg, g, kPa, etc.
- 5. Look for decimal fractions (0.25) or decimal mixed fractions (2.50) rather than common fractions (3/8) on drill bits, feeler gages, etc.
- 6. Some products may have a special metric symbol such as a block M to show they are metric.
- 7. Don't force bolts, wrenches, or other devices which are not fitting properly.
- 8. Practice selecting and using tools, instruments, and devices.

Information Sheet 9

WHICH TOOLS FOR THE JOB?

Practice and prepare to demonstrate your ability to identify, select, and use metric-scaled tools and instruments for the tasks given below. You should be able to use the measurement tools to the appropriate precision of the tool, instrument, or task.

Select and demonstrate or describe use of tools, instruments, or devices to:

- 1. Determine the necessary shop floor space to park a conventional size automobile.
- 2. Replace water pump and heater hoses.
- 3. Determine the free-travel in the clutch pedal.
- 4. Measure fuel pump pressure.
- Perform a compression test on an engine.
- 6. Pull the head of an engine, replace head gasket, and replace head.
- Adjust valve settings.
- 8. Describe the difference between a Customary and a metric crescent wrench.
- Replace brake lines.
- 10. Renew an exhaust system.

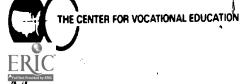

MEASURING UP IN AUTO MECHANICS

For the tasks below, estimate the metric measurement to within 20% of actual measurement, and verify the estimation by measuring to within 2% of actual measurement.

| | | Estimate | Verify . |
|-----|--|----------|------------|
| 1. | Work space or bench large cough to work on engine of automobile. | | • |
| 2. | Volume of tool box. | | , |
| 3. | Floor area of classroom or work space. | | |
| 4. | Find the largest available entry into classroom. | • | |
| 5. | Volume of an engine cylinder. | - | |
| 6. | A fuel line requires 600 mm of tubing. From several cut pieces, select the piece for the job with the least waste. | | |
| 7, | Select new bearing to fit a crankshaft. | a e | |
| 8. | Select the amount of fluid for brake master cylinder. | 3 | Eddin Chia |
| 9. | Change the spark plugs. | | • |
| 10. | Select the amount of oil for a complete oil change. | | <u></u> |

Exercise 15

Exercise 16

UNIT

OBJECTIVE

The student will recognize and use metric and Customary units interchangeably in ordering, selling, and using products and supplies in this occupation.

- Given a Customary (or metric) measurement, find the metric (or Customary)
 equivalent on a conversion table.
- Given a Customary unit, state the replacement unit.

SUGGESTED TEACHING SEQUENCE

- Assemble packages and containers of materials.
- Present or make available Information Sheet 10 and Table 3.
- 3. Have students find approximate metric-Customary equivalents by using Exercise 17.
- 4. Test performance by using Section D of "Testing Metric Abilities."

METRIC-CUSTOMARY EQUIVALENTS

During the transition period there will be a need for finding equivalents between systems. Conversion tables list calculated equivalents between the two systems. When a close equivalent is needed, a conversion table can be used to find it. Follow these steps.

- 1 Determine which conversion table is needed.
- 2. Look up the known number in the appropriate column; if not listed, find numbers you can add together to make the total of the known number:
- 3. Read the equivalent(s) from the next column.

Table 3 on the next plage gives an example of a metric-Customary conversion table which you can use for practice in finding approximate equivalents. Table 3 can be used with Exercise 17, Part 2 and Part 3.

Below is a table of metric-Customary equivalents which tells you what the metric feplacements for Customary units are.* This table can be used with Exercise 17, Part 1 and Part 3. The symbol ≈ means "nearly equal to."

| 1 m ≈ 3.28 feet 1 foot ≈ 0.305 m 1 m ≈ 1.09 yards 1 yard ≈ 0.91 m 1 km ≈ 0.62 mile 1 mile ≈ 1.61 km 1 cm² ≈ 0.16 sq in 1 sq in ≈ 6.5 cm² 1 m² ≈ 10.8 sq ft 1 sq ft ≈ 0.09 m² 1 m² ≈ 1.2 sq yd 1 sq yd ≈ 0.8 m² 1 hectare ≈ 2.5 acres 1 acre ≈ 0.4 hectare 1 cm³ ≈ 0.06 cu in 1 cu in ≈ 16.4 cm³ 1 m³ ≈ 35.3 cu ft 1 cu ft ≈ 0.03 m³ 1 meta | $\begin{array}{llll} 1 \text{ ml} \approx 0.2 \text{ tsp} & 1 \text{ tsp} \approx 5 \text{ ml} \\ 1 \text{ ml} \approx 0.07 \text{ tbsp} & 1 \text{ tbsp} \approx 15 \text{ ml} \\ 1 \text{ l} \approx 33.8 \text{ fl oz} & 1 \text{ fl oz} \approx 29.6 \text{ ml} \\ 1 \text{ l} \approx 4.2 \text{ cups} & 1 \text{ cup} \approx 237 \text{ ml} \\ 1 \text{ l} \approx 2.1 \text{ pts} & 1 \text{ pt} \approx 0.47 \text{ l} \\ 1 \text{ l} \approx 1.06 \text{ qt} & 1 \text{ qt} \approx 0.95 \text{ l} \\ 1 \text{ l} \approx 0.26 \text{ gal} & 1 \text{ gal} \approx 3.79 \text{ l} \\ \text{gram} \approx 0.035 \text{ oz} & 1 \text{ oz} \approx 28.3 \text{ g} \\ 1 \text{ kg} \approx 2.2 \text{ lb} & 1 \text{ ton} \approx 907.2 \text{ kg} \\ \text{kPa} \approx 0.145 \text{ psi} & 1 \text{ psi} \approx 6.895 \text{ kPa} \\ \end{array}$ |

| 9 | 228.6 | 0.9 | 22.86 | .09 | 2.29 | .009 | 0.23 |

10 inches = 254 mm

12 inches or 1 feet = 304.8 mm or 30.48 cm

Table 3

ANY WAY YOU WANT IT

| 1. | You are working in a repair shop or auto parts house. With the change to metric measurement some of the things you order, sell or use are marked only in metric units. You will need to be |
|----|--|
| | familiar with appropriate Customary equivalents in order to communicate with customers and suppliers who use Customary |
| | units. To develop your skill use the Table on Information Sheet 10 and give the approximate metric quantity (both number and |
| | unit) for each of the following Customary quantities. |

| Customary Quantity | Metric Quantity |
|---------------------------------|-----------------|
| 2 lbs. of heavy lube | _ |
|) 4 qts. of brake fluid | |
| c) 3/4 in. pipe | |
| d) 10 lbs. of sawdust | . |
| e) 18 in. bar steel | |
|) two-gallon can | |
| 3) 30 ft. of air hose | • |
| 1) 4 fl. oz. of additive | |
|) two-mile distance | |
|) 2 in. bolt | |
| () 2 fl. oz. of silicone spray | |
|) 1 lb. of hand cleaner | |
| n) 1 gal, of solvent | |
| 1) 1 ft. length of hose | |
|) 1/4 in. drill bit | , a |

2. Use the conversion tables from Table 3 to convert the following:

| a) | 254 mm | = | in. | d) | 2.25 in. | = | mm , |
|------------|-----------|---|-----|------------|----------|---|------------------|
| b) | 0.025 in. | = | mm | e) | 0.25 in. | = | mm |
| c) | 7.1 mm | = | in. | f) | 10 in. | = | mm |

| _ | | <i>f</i> . | * | | |
|-----|-------------|------------|-----|-----------|-----|
| g) | 0.008 in. = | mm | i) | 250 mm = | in. |
| h) | 152 mm = | in. | j) | 1 000 mm= | in. |

3. Complete the Requisition Form using the items listed. Convert the Customary quantities to metric before filling out the form. Complete all the information (Date, For, Job No., etc.).

Requisition one of each of the following:

- a) 25 ft. of 5/16 in. fluid hose
- b) 12 fl. oz. spray can of paint
- c) 5 lb. spool of 50/50 solder
- d) 1 ft. by 2 ft. piece of gasket material
- e) 1 gal. of parts cleaning solvent

SECTION A

- 1. One kilogram is about the mass of a:
 - [A] nickel
 - [B] apple seed
- ([C] basketball
 - [D] Volkswagen "Beetle"
- 2. A square metre is about the area of:
 - [A] this sheet of paper
 - [B] a card table top
 - [C] a bedspread
 - [D] a postage stamp
- 3. Fuel pump pressures of automobile engines are normally given in:
- [A] kilometres
 - [B] grams per cubic centimetre
- [C] kilopascals -
- [D] kilolitres
- 4. Torque pressure is measured in:
 - [A] newton metres
 - [B] kilopascals
 - [C] grams per metre
 - [D] centimetres

- 6. The correct way to write twelve thousand millimetres is:
 - [A] 12,000 mm.
 - [B] 12.000 mm
 - [C] 12 000mm
 - [D] 12 000 mm

SECTION B

- 7. A part 20 centimetres long also has a length of:
- [A] '2 000 millimetres
- · [B] 200 millimetres
- [C] 2 millimetres
- [D] 0.2 millimetre
- 8. Seven hundred fifty grams of heavy gear lube is the same as:
 - [A] 0.75 kilogram
 - [B] 750 000 kilograms
 - [C] 7 500 kilograms
 - [D] 7.5 kilograms

SECTION C

- 9. For measuring in millimetres you would use a:
 - [A] container
 - [B] pressure gage
 - [C] rule
 - [D] scale
- 10. For measuring kilopascals you would use a:
 - [A] pressure gage
 - [B] rule
 - [C] scale
 - [D] container

- 11. Estimate the length of the line segment below:
 - [A] 23 grams
 - [B] 6 centimetres
 - [C] 40 millimetres
 - [D] 14 pascals
- 12. Estimate the length of the line segment below:
 - [A] 10 millimetres
 - [B] 4 centimetres
 - [C] 4 pascals
 - [D] 23 milligrams

SECTION D

- 13. The metric unit for liquid measure which replaces the fluid ounce is:
 - [A] hectare
 - [B] millilitre
 - [C] litre
 - [D] gram
- 14. The metric unit for liquid measure which replaces the gallon is:
 - [A] gram
 - [B] kilogram
 - [C] kilolitre
 - [D]' litre

Use this conversion table to answer questions 15 and 16.

| mm` | in. | mm | in. |
|------------------|-------|------|------|
| | | | |
| 100 | 3.94 | 10 | 0.39 |
| 200 | 7.87 | 20 | 0.79 |
| 300 | 11.81 | 30 | 1.18 |
| 400 | 15.74 | 40 | 1.57 |
| 500 | 19.68 | 50 | 1.97 |
| 600 | 23.62 | 60 | 2,36 |
| 700 | 27.56 | 70 | 2.76 |
| ⁴ 800 | 31.50 | 80 . | 3.15 |
| 900 | 35,43 | 90 ' | 3.54 |

- 15. The equivalent of 610 mm is:
 - [A] 61 in.
 - [B] 24.01 in.
 - [C] 6.10 in. \
 - [D] 30 i
- 16. The equivalent of 460 mm is:
 - [A] 12.34 in.
 - [B] 24.00 in.
 - [C] 11.41 in.
 - [D] 18.10 in.

- 5. The correct way to write twenty grams is:
 - [A] 20 gms
 - [B] 20 Gm.
 - [C] 20 g.
 - [D] 20 g

THE CENTER FOR VOCATIONAL EDUCATION

ANSWERS TO EXERCISES AND TEST

EXERCISES 1 THRU 6

The answers depend on the items used for the activities.

EXERCISE 7

Currently accepted metric units of measurement for each question are shown in Table 2. Standards in each occupation are being established now, so answers may vary.

EXERCISE 8

- 2.6 cm
- e) · 13.2 cm
- 58.3 cm b)
- 80.2 cm
- 9.4 cm
- f) 140.0 cm
- 68.0 cm
- 230.7 cm h)

EXERCISES 9 THRU 13

Tables are reproduced in total. An-· swers are in parentheses.

Exercise 9

| metre m | centimetre cm | millimetre mm |
|------------|------------------|------------------|
| 1, | 100 | 1 000 |
| 2 | 200 | (2000) |
| 3 | (300) | (3 000) |
| 9 | (900) | (9 000) |
| (5) | (500) | . 5 000 |
| 74 | (7 400). | (74 000) |
| 0.8 | 80 | . (800) |
| 0.6 | _(60) | 600.≁ |
| (0.025) | 2.5 | 25 |
| (0.148) | (14.8) | 148 ř |

SUGGESTED METRIC TOOLS AND DEVICES NEEDED TO COMPLETE OCCUPATIONAL MEASUREMENT TASKS

In this occupation the tools needed to complete Exercises 6, 15, and 16 are indicated by "*."

- * A. Assorted Metric Hardware—Hex nuts, washers, screws, cotter pins, etc.
- * B. Drill Bits-Individual bits or sets, 1 mm to 13 mm range
 - C. Vernier Caliner—Pocket slide type, 120 mm range
- D. Micrometer—Outside micrometer caliper, 0 mm to 25 mm range
- ★ E. Feeler Gage—13 blades, 0.05 mm to 1 mm range
 - F. Metre Tape-50 or 100 m tape
 - G. Thermometers—Special purpose types such as a clinical thermometer
 - H. Temperature Devices—Indicators used for ovens, freezing/cooling systems, etc.
- ★ I. Tools—Metric open end or box wrench sets, socket sets, hex key sets
 - J. Weather Devices—Rain gage, barometer, humidity, wind velocity indicators
- * K. Pressure Gages—Tire pressure, air, oxygen, hydraulic, fuel, etc.
 - L. Velocity-Direct reading or vane type meter
 - M. Road Map-State and city road maps
- * N. Containers—Buckets, plastic containers, etc., for mixing and storing liquids
 - O. Containers—Boxes, buckets, cans, etc., for mixing and storing dry ingredients

Most of the above items may be obtained from local industrial, hardware, and school suppliers. Also, check with your school district's math and science departments and/or local industries for loan of their metric measurement devices.

¹Measuring devices currently are not available. Substitute devices (i.e., thermometer) may be used to complete the measurement task.

Let's Measure Metric. A Teacher's Introduction to Metric Measurement. Division of Educational Redesign and Renewal, Ohio Department of Education, 65 S. Front Street, Columbus, OH 43215, 1975, 80 pages; \$1.50, must include check to state treasurer.

Activity-oriented introduction to the metric system designed for independent or group inservice education study. Introductory information about metric measurement; reproducible exercises apply metric concepts to common measurement situations; laboratory activities for individuals groups. Templates for making metre tape, litre box, square centimetr

Measuring with Meters, or, How to Weigh a Gold Brick with a Meter Stick.

Metrication Institute of America, P.O. Box 236, Northfield, IL 60093,
1974, 23 min., 16 mm, sound, color; \$310.00 purchase, \$31.00 rental.

Film presents units for length, area, volume and mass, relating each unit to many common objects. Screen overprints show correct use of metric symbols and ease of metric calculations. Relationships among metric measures of length, area, volume, and mass are illustrated in interesting and unforgettable ways.

Metric Education, An Annotated Bibliography for Vocational, Technical and Adult Education. Product Utilization, The Center for Vocational Education, The Ohio State University, Columbus, OH 43210, 1974, 149 pages; \$10.00.

Comprehensive bibliography of instructional materials, reference materials and resource list for secondary, post-secondary, teacher education, and adult basic education. Instructional materials indexed by 15 occupational clusters, types of materials, and educational level.

Metric Education, A Position Paper for Vocational, Technical and Adult Education. Product Utilization, The Center for Vocational Education, The Ohio State University, Columbus, OH 43210, 1975, 46 pages; \$3.00.

Paper for teachers, curriculum developers, and administrators in vocational, technical and adult education. Covers issues in metric education, the metric system, the impact of metrication on vocational and technical education, implications of metric instruction for adult basic education, and curriculum and instructional strategies.

Metrics in Career Education. Lindbeck, John R., Charles A. Bennett Company, Inc., 809 W. Detweiller Drive, Peoria, IL 61614, 1975, 103 pages, \$3.60, paper; \$2.70 quantity school purchase.

Presents metric units and notation in a well-illustrated manner. Individual chapters on metrics in drafting, metalworking, woodworking, power and energy, graphic arts, and home economics. Chapters followed by several learning activities for student use. Appendix includes conversion tables and charts.

Metric Practice Guide ASTM E 380-72e. American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103, 1972, 34 pages, \$1.50, paper.

Detailed presentation on SI units and symbols, style and usage, rules for conversion and rounding. Appendices on terminology, development of SI units, and conversion factors. Includes current base and derived SI units, and approved deviation from SI.

Taking the Tricks Out of Metrics, Metric Training Department, Creative Universal, Inc., Tower 14, 21700 Northwestern Highway, Southfield, MI 48975, 1976, 4 booklets; \$3.00 each, \$12.00 set, discounts.

Series of booklets presents step-by-step directions, questions, answers on how to read metric measurement tools: micrometers, vernies calipers, rules, dial indicators.

METRIC SUPPLIERS

Brown & Sharpe Manufacturing Co., Precision Park, North Kingstown, RI 02852

Industrial quality micrometers, steel rules, screw pitch and thickness gages, squares, depth gages, calipers, dial indicators, conversion charts and guides.

Dick Blick Company, P.O. Box 1267, Galesburg, IL 61401

Instructional quality rules, tapes, metre sticks, cubes, height measures, trundle wheels, measuring cups and spoons, personal scales, gram/kilogram scales, feeler and depth gages, beakers, thermometers, kits and other aids.

The L. S. Starrett Company, 121 Crescent Street, Athol, MA 01331

Machine tool precision measuring devices, inicrometers, calipers, dial indicators, steel rules.

Snap-on Tools, 8074-A 28th Avenue, Kenosha, WI 53140

Metric automotive hand tools.
