Followup

ABSTRACT

These appendixes contain (1) correspondence related to selection of exemplary cooperative education programs for study in developing guidelines for planning, managing, and evaluating such programs and (2) materials collected from the programs identified relating to project management, objectives, program evaluation, and followup. (Volume I, the body of the report, which is bound separately, contains a brief description of procedures used in developing the guidelines, discusses the various components of the planning, management, and evaluation process, and outlines a training program for administrators.) INITIAL CONTACT LETTER SENT TO STATE DIRECTORS OF VOCATIONAL EDUCATION

Education TURNKEY Systems, Inc., and our associate contractor, Steiger, Fink, and Smith, Inc., were awarded a contract under Part C to design a systematic set of procedures for planning, managing, and evaluating cooperative education programs. The project is described briefly in the enclosed abstract.

One of our initial tasks is to identify particularly noteworthy existing management and evaluation systems for cooperative education programs. The purpose of this letter is to solicit your nomination of two cooperative education programs within your state which have developed effective and well-documented procedures for one or more of the following: needs assessment, planning, management, and/or evaluation. Your assistance would help us enormously in this initial effort.

Once we receive your nomination, and the telephone number of the responsible or knowledgeable LEA officials, we propose to contact them requesting descriptive information or other documentation of their procedures. We will then assess the procedures reported and synthesize appropriate components into our overall management system design. We would be pleased to share our results with you.

We appreciate your cooperation and look forward to the opportunity to build upon exemplary programs developed under your state leadership. Dr. Steiger and I would be delighted to discuss any aspect of this project with you by telephone. Please feel free to call us collect.

Your early response would be greatly appreciated.

Sincerely.

Charles L. Blaschke

President //

Enclosure: Abstract

PROJECT ABSTRACT

PROJECT NO.: 498AH50102

TITLE: Development of a System for Planning, Managing, and Evaluating

Cooperative Work-Study Programs

PROJECT MANAGER AND INSTITUTION: Charles L. Blaschke

Education TURNKEY Systems, Inc. 1660 L Street NV, Suite 1213 Washington, D.C. 20036 Tel.: (202) 293-5950

GRANT PERIOD: 1 July 1975 - 30 June 1976 (12 months)

PURPOSE OR OBJECTIVES:

The major objective of this project is to design a systematic set of procedures, forms and implementation instructions for planning, managing, and evaluating cooperative work-study programs conducted by educational institutions in coordination with community and industrial groups. In addition to the overall design, a needs assessment component, including procedures and training exercises, will be produced for use by planning and development staff involved in work-study programs.

PROCEDURES:

Relevant existing models for planning, managing, and evaluating projects, particularly work-study projects, will be analyzed, identifying appropriate components for synthesis into the above design and needs assessment component. Based upon an assessment of project directors'/administrators' needs in planning, managing, and evaluating special projects, the specifications for the overall design will be determined in collaboration with LEA and SEA officials, building upon the strengths of existing techniques. In addition to being practical, the design will also be flexible in order to accommodate situational conditions, urban/rural programs, and various types of industrial settings. Specifications for conducting cost-effectiveness analysis will also be addressed.

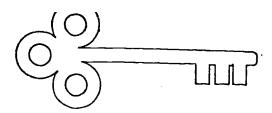

PRODUCTS OR RESULTS:

The results of this effort during the initial phase will be: a) a detailed specifications design for the overall model; and b) a needs assessment component available for use by the practitioner during the initial stages of planning and developing a work-study program. Both the design and the needs assessment component will be useful to LFAs in formulating a work-study program, particularly evaluation component.

SIGNIFICANCE:

With increasing placed upon work-study programs in the area of vocational education and the increased priority indicated by the president of Ohio State University's speech, the model design and needs assessment component will provide both a conceptual design and practical procedure for meeting a need which will increasingly expand.

FOLLOW-UP LETTER SENT TO STATE DIRECTORS OF VOCATIONAL EDUCATION WHO NOMINATED SITES AS EXEMPLARY PROJECTS

Thank you very much for your prompt reply to our request for nominations of exemplary cooperative education programs presently using noteworthy planning, management, and evaluation techniques. We are in the process of contacting the individuals designated in your letter to request documentation on their projects and, specifically, the techniques used in the above areas.

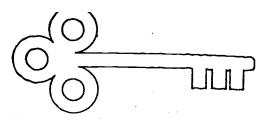

In light of some recent decisions at the Federal level, regarding priorities assigned to cooperative education (broadly defined), and discussions with Federal as well as state officials, the study effort which we are conducting appears to be significant indeed and very timely. The approach we are taking is a pragmatic one attempting to design a system which will be of practical utility to officials at the SEA and LEA level. Moreover, the documentation of planning, management, and evaluation techniques which we have reviewed indicates that serious thinking and design efforts have already been undertaken at several sites. As we continue to review these documents, we would be pleased to share with you our preliminary findings and observations prior to submission of the final report next year, if you feel such an interaction would be beneficial as you begin initial planning efforts under Part D and other activities. Please feel free to call us collect.

Thank you again for your cooperation. We look forward to hearing from you.

Sincerely,

Charles Blaschke President

EDUCATION TURNKEY SYSTEMS, INC.

LETTER SENT TO SITES NOMINATED BY STATE DIRECTORS OF VOCATIONAL EDUCATION AS EXEMPLARY PROJECTS

Under contract to the U.S. Office of Education, Education TURNKEY Systems, and our subcontractor, Steiger, Fink & Smith, are gathering information on exemplary practices to be used in designing a systematic model for needs assessment, planning, administration, evaluation and follow-up in cooperative education/work experience programs. As noted in the enclosed letter, your program has been nominated by your state department of education as possibly contributing to this significant effort.

One of our first problems has been to clearly define three categories of programs which sometimes seem to get confused: cooperative education, work-study, and work-experience. We are using definitions based on those which the State Directors tentatively agreed upon at a recent USOE meeting:

COOPERATIVE EDUCATION: a program of on-the-job work experience related to the student's course of study and chosen occupation. Such programs have educational objectives, including specific skill training objectives, and the work experience is closely tied to classroom instruction.

WORK-STUDY: a program of employment to provide financial assistance to students who are in need of earnings from employment to commence or continue their vocational program. The employment is not necessarily related to the student's course of study.

WORK-EXPERIENCE: a program of on-the-job work experience designed to acquaint the student with the job setting. Such programs have educational objectives -- usually in the area of expanding the student's career horizons or introducing the student to job activities and requirements -- but not skill building objectives. A wide variety of programs, including most career education work units and post-secondary clinical experience programs, fall into this category.

Our study is concerned with both cooperative education and work-experience programs, but not with work-study programs. In gathering information, we feel it is essential to maintain the distinction between cooperative education programs

Page Two

with skill building objectives and the broader work-experience programs. Both types of programs are extremely valuable, but they differ in purpose and in management requirements.

We would greatly appreciate your cooperating in this project by furnishing us with the following information and materials, where available:

- 1. Identification of your program as cooperative education or work experience.
- 2. A written description of the program, its purposes and activities (e.g., excerpts from a proposal, etc.)
- 3. Description of procedures used for needs assessment, planning, administration, evaluation, and follow-up, particularly those procedures which have proved especially effective.
- 4. Any documentation of management procedures used such as handbooks, operating instructions, forms and data collection instruments.
- 5. Any other information you think might be of value to this study.

Thank you very much for your assistance. If you have any questions, please call me or Dr. Steiger collect at (202) 293-5950. When we have completed our study, we will be happy to share our findings with you.

Sincerely,

Charles L. Blaschke President Education Turnkey Systems, Inc.

COMMONWEALTH OF KENTUCKY

Department of Education

BUREAU OF VOCATIONAL EDUCATION

FRANKFORT 40601

October 30, 1975

Mr. Charles L. Blaschke, President Education Turnkey Systems, Inc. 1660 L St. N.W. Washington, D.C. 20036

Dear Mr. Blaschke:

In reply to your request for our nomination of two cooperative education programs within our state which have developed effective procedures for planning and management of their programs, we submit the following:

Agriculture program—
Dr. L. C. Brown, Head
Department of Agriculture
Western Kentucky University
Bowling Green, KY 42101

Distributive Educ. program--Mr. William Gottschlich Teacher Coordinator Newport High School Newport, KY 41071

Industrial Educ. program—
Mr. Ishmael Stevens, Teacher Coordinator
Ashland State Vocational-Technical School
Route 4, Box 336, Winslow Road
Ashland, KY 41101

Each program submitted above is unique in its procedures and operations as they are not only on different levels of training and areas of training, but also under different administrative systems. Therefore, we are submitting three candidates, instead of two as requested, for your investigation of procedures on planning, management, and evaluation of cooperative education programs.

Sincerely,

Carl F. Lamar, Assistant Superintendent

for Vocational Education

ASSISTANT SUPERINTENDENT

September 17, 1975

Mr. Charles L. Blaschke, President Education Turnkey Systems, Inc. Corporate Headquarters 1660 L Street, N.W. Washington, D.C. 20036

Dear Mr. Blaschke:

Congratulations on being named the recipient of the grant award for the Commissioner's Part C of the Vocational Education Act of 1963. We wish to commend your staff and that of Steiger, Fink and Smith for submitting a meritorious national priority proposal, "Development of a System for Planning, Managing, and Evaluating Comperative Education Work Study Programs."

We are keenly interested in the status and progress of this research effort and would like to discuss the project and its implications for the local administration of our cooperative education work study components. Dr. David White, Director of Program Planning and Supervision of this staff may be contacted to arrange admission date.

Again, congratulations, and much success to you in this endeavor.

November 5, 1975

Mr. Charles L. Blaschke, President Education Turnkey Systems, Inc. 1660 L Street, NW Washington D.C. 20036

Dear Mr. Blaschke:

I recently received communication from Edwin St. John, Chief of Occupation Skills Programs, Michigan Department of Education, Vocational Education Services, regarding Project No. 498AH50102 titled "Development of a System for Planning, Managing, and Evaluating Cooperative Work-Study Programs".

I have begun to collect and write the materials and information requested in the project format. I have established a completion date of December 15, 1975 to submit the information to you.

If this time schedule does not meet your needs, please advise. My correct telephone number is (616) 538-4200.

Sincerely.

Roy S. Lakanen, Director Vocational Education Wyoming Public Schools

James Boffman Bertha Gordon Philip Groisser Roxee Joly Abraham Wilner

BUREAU OF COOPERATIVE EDUCATION

Renee C. Sherline - Director

c. Responsibilities of the Coordinator

1. Administration of the Program

Administrative Responsibilities to the Cooperative Education Bureau

- a. Attend monthly meeting of Coordinators at the Board of Education
- b. Attend meetings with the Borough Coordinator
- c. Submit records and reports in accordance with dates specified in momently Cooperative Calendar. These include:

(1) Monthly Report (Form 1)

(2) Monthly Cooperative Education Attendance Report (to school secretary) (Form 2)

(3) Summer and Annual Earnings Reports (Forms 3 & 4)

(4) Annual Drop-Out Report (Form 5)

(5) Preparation of Rating Slips for each student in duplicate. (Form 6)

(6) Preparation of Graduate Slips in duplicate (Form 7)

(7) Preparation of a Change-of-Status card, filled in completely, for resignations, discharges, job terminations, returning to regular school program, and graduates. (Form 8)

(8) Roster of employed Co-ops, to Central Office (Form 9)

- (9) Any other reports due on the dates specified in the monthly calendar, i.e. commencement information, estimated register, etc. (Form 10)
- d. Make supervisory visits to industry as directed by the Central Office, and submit report. (Form 11)
- e. Requisition materials from the Central Office, i.e., brown envelopes, introduction forms, profile sheets, and change of status cards. (Form 12)
- f. Consult with your Borough Coordinator regarding individual placement problems.
- g. <u>Do not contact employers in private industry</u>. Whenever a problem arises contact the staff coordinator in charge of that account. Civil Service offices may be contacted directly.

Administrative Responsibilities Within the School

Principal and Assistant Principals

- a. Consult the administration concerning school schedules for Cooperative students ("A" Co-ops may be in school during the first week of the term. Generally, there is a lower homeroom period. When the "B" Co-ops arrive the following week, the man time must be afforded the official teacher to organize this group.)
- b. Euggest to Assistant Principals (Supervision) teachers who will relate well to Co-ops.
- c. Involve the Assistant Principals (Supervision) in the program and request that they recommend potential Co-opsitor the following term. This is especially helpful in the business area.
- d. Discuss with Assistant Principals (Supervision) ricular modifications based on current techniques and trends in industry. Relay information gained from your visits to industry and from students job experiences.

- e. Invite the Assistant Principal (Supervision, Business Department) to special Co-op happenings to increase awareness and acceptance of the Program. Arrange with this Assistant Principal for electric typewriters for Co-op students.
- f. Arrange with special advisors and official teachers to repeat weekly announcements to Co-ops. In special cases such as senior photographs, etc. the advisor should make arrangements to accommodate both groups. Follow up to see that this is done.
- 9. Plan with the administration a procedure for issuing bus passes to all Co-ops.
- h. Advise the administration of "success stories" of Co-ops and their accomplishments as evidenced by a good rating slip. Publicize the Program through bulletin boards, school newspapers, brochures and periodicals.
- Plan periodic term calendars for distribution to homeroom teachers, subject teachers and co-op students.

Program Committee

- a. Plan with this committee the programming of Co-ops:
 - (1) Subjects
 - (2) Periods
 - (3) Rooms

Guidance Department

- a. Attend Guidance meetings regularly.
- b. Advise counselors and grade advisors that you will review records of possible Co-ops. Seek referrals from them.
- c. Acquaint the guidance staff with the eligibility requirements, opportunities and purposes of the program and gain their support.
- d. Provide each grade advisor with a copy of the Cooperative Education Student Handbook.

Deams

- a. Advise Deans that you will handle discipline problems of your Cooperative students.
- ±. Enlist their aid when help is needed.
- Submit list of prospective Co-ops to Deans. They may have confidential information about a student which does not appear on the permanent record card.

Attendance Coordinator

- Obtain daily absentee list from the official teacher. Telephone the homes of absentees to ascertain reason for absence.
- b. Request that student bring a note from home explaining absence.
- encouraging good habits and establishing a pattern for absences from work.

- d. Collect "Attendance in Industry" slips each Monday, and enter attendance in the roll book according to school policy. (Enter a "w" if present during work week.) (Forms 13 & 14)
- e. Follow up missing "Attendance in industry" slips:
 - (1) Interview each student who fails to submit an "Attendance in Industry" slip on Monday morning.
 - (2) Ascertain reason for failure to submit slip on time.
 - (3) If this is the first offense, more than likely a personal interview will produce results. If this pattern continues, more drastic measures must be taken.
 - (a) Home contact
 - (b) Sending student to the employer to obtain slip after school
 - (c) Record negligence in returning "Attendance in Industry" slip on the report card for the specific marking period.
 - (d) Withhold final report card until all slips have been presented.

Health and Physical Education Department

- a. Arrange for physicals with this department for working papers. (See section on Processing)
- b. Review health records for limited Co-op placement.
- c. Contact physical education and health teachers to stress grooming and personal hygiene.
- d. Make arrangements with Assistant Principal (Supervisor of this Department) for a project for Co-ops who have not met Physical Education or Health Learning requirements.

Art and Music Departments

Make arrangements with the Assistant Principals (Supervision) of these departments for Music and Art projects or for the programming of these subjects for Co-ops who have not met the requirements.

Homeroom Teachers

Recommenc official teachers for Co-op classes.

- a. Keep the official teacher well informed of Co-op schedules.
- official class. Ex: school calendar, roll books, "A" and "B" rosters, etc. (Forms 15 & 16)
- .c. Assist the official teacher with records of Co-op students.

Subject Teachers

- a. Discuss with the subject teacher the importance of the So-op program and how meaningful it is to our Co-op students. Nork experience should be correlated with school instruction.
- Keep meachers constantly aware of the value of drawing upon students' experiences on the job as a motivation and enrichment of instruction.
- E. Handle discipline problems which arise in the subject class.
- d. Suggest curriculum changes that will particularly helpful to Co-op students. Relay relevant information gained in your visits to industry.

- e. Advise these teachers of Co-op schedules for term examinations, city-wide exams, collection of books, distribution of report cards, etc.
- f. Arrange to meet with the recitation teachers once a term.

Heads of Special Programs

Contact the Coordinators of Special Programs for referrals of students who have been successful in their programs (i.e. mini-school, STEP program) and have not been returned to regular school.

Parent Groups

- a. Attens meetings with parents and community to acquaint them with the $\frac{1}{2} \frac{1}{12} \frac{$
- b. Invite parents of "new recruits" to your orientation meeting.

INSTRUCTION:

THE COORDINATOR SHOULD MEET WITH THE OFFICIAL TEACHERS TO DISTRIBUTE THIS BULLETIN AND GO OVER IT WITH THEM. HELP THEM SET UP THEIR ROLL BOOKS ACCORDING TO YOUR INSTRUCTIONS. MODIFY THIS BULLETIN IN ACCORDANCE WITH THE PRACTICES IN YOUR SCHOOL.

#### SAMPLE

#### BULLETIN TO TEACHERS RE CO-OPS

#### Bulletin No. 1

To Official Teachers of Cooperatives:

Thank you for your willingness to work with and for our Cooperative group. The interest you have shown so far indicates your desire to serve these students wholeheartedly.

Since these students attend school every other week, you will receive special instructions from time to time which may differ slightly from standard procedure, it is also important that I receive certain information about them.

The beginning of the term is generally a hectic period since many of the students are new to the group and will look to your for guidance and instructions. Listed below are special instructions and suggestions:

- 1. Your roll book should be set up so that Groups A & B are separate.
- Indicate attendance for work week by a w/. If absent, w/a should be recorded.
- 3. Students who have not yet been placed in jobs must attend school every day, but attend classes only during their regular school week (A or B). An unplaced "A" student attends classes during "A" week. During "B" week, he/she reports to an assigned office within the school as a Service Aide. The student should be given an Attendance in Industry Slip on Friday of each school week. Attendance may be handled like that of a student who is working on a regular cooperative job or alternatively student may be required to report to official class daily.
- 4. Some students will report to the Board of Education for job placement on regular school days. These students are not to be marked absent. You will receive regular notification from me when this occurs.
- 5. "Attendance-in-Industry" slips are a legal record of the student's attendance at work. They are to be distributed on Friday before the work week and collected on Morday after the work week. After you have recorded the work attendance in the roll book, please put the "Attendance-in-Industry" slips in my mail box.
- 6. Money for bus tickets must be collected a week in advance.

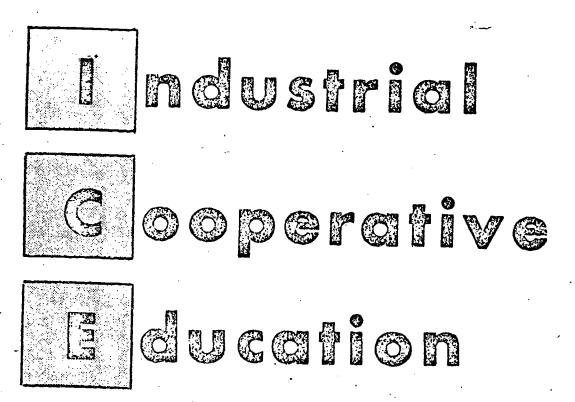

- I am available in Office during periods
  I shall be happy to assist you and the students with any problems.
  Please discourage students from leaving their classes to see me.
  Have them put their problems in writing, and place the slips in my mail box. I will send for them as soon as possible. This procedure will minimize loss of instruction. STUDENTS MAY NOT BE EXCUSED FROM SCHOOL EARLY TO PICK UP PAY-CHECKS.
- 8. Students may not be excused from work for any purpose except Regents examinations, 1/2 day of graduation rehearsal, and commencement. An individual slip must be prepared for each student to submit to the employer two weeks in advance of these dates.
- I check the roll books daily and often make home phone calls. A notation will be made in the back of the roll book.

Once more may I thank you for your assistance. Please feel free to consult with me whenever the need arises.

Cooperative Coordinator

milwaukee public schools

OPERATIONAL GUIDELINES

#### DUTIES OF PERSONNEL

#### A. Teachers

Two different types of instructional content and activity are included within the total in-school phase of the Industrial Cooperative Education (I.C.E.) program. One type of content and activity is directed toward providing each student/learner with information and experiences technically related to his career objective. Since various industrial career objectives are represented within any given group of I.C.E. enrollees, it is necessary to involve various specialized teachers in the process of providing the full spectrum of related technical information and experiences required. For example, it is probable that each Industrial Education teacher on the staff will have several I.C.E. enrollees enrolled in his classes. After being identified by the I.C.E. teacher/coordinator, it will be the responsibility of those teachers to provide the I.C.E. enrollees with information and experiences which are technically related to their respective career objectives. The other type of instructional content and activity included within the total in-school phase of I.C.E. serves to provide each student/learner with an opportunity to become acquainted with numerous general topics considered to be of common importance to all workers in industry. This important part of the in-school phase of I.C.E. is conducted by the teacher/coordinator. In so doing, he accomplishes the teaching duties which comprise a salient portion of his total responsibility as an I.C.E. teacher/coordinator.

#### B. Teacher/Coordinator

In addition to the actual responsibility for classroom instruction cited above, the Industrial Coopeative Education program teacher/coordinator performs numerous duties which may be classified under several broad headings and categorized as follows:

-- Identifies and Selects Program Student/Learners

Describes the program to students

Works with teachers, guidance counselors, administrators

Provides occupational information

Gathers information on students

Schedules programs for student/learners

Counsels student/learners and their parents

Assists student/learners with career planning

-- Identifies and Selects On-the-Job-Training (0.J.T.) Stations

Enlists participation of cooperating employers

Identifies suitable training stations for each student/learner

Orients employers, training supervisors and co-workers

Prepares students for job interviews

Assists student/learners to obtain placement in on-the-job-training stations

Prepares and processes training agreements

-- Insures that Various and Progressive Training is Given in O.J.T. Stations
Establishes responsibilities for those involved in O.J.T.

Assists in the development of training plans

Consults with and assists the training supervisors

Maintains emphasis on training

Determines and implements mode of evaluating progress of student/learners

-- Coordinates the In-School Related Technical Instruction with the O.J.T. Activities

Determines needed instruction by conferring with in-school teacher and with 0.J.T. supervisor

Advises those concerned how to compliment and supplement one another's efforts

Appraises outcomes and makes adjustments as necessary

-- Assists Student/Learners to Make Personal Adjustments

Advises student/learners as regards correction of poor personal habits

Counsels those with socio-economic problems

Assists those with educational problems

Attempts to resolve behavioral problems for those so affected

-- Assists Student/Learners to Adjust to the "World of Work"

Assists student/learners with problems which arise in the O.J.T. situation

Confers with training supervisors regarding "adjustment" problems

Evaluates the student/learners progress in the O.J.T. situation

-- Accomplishes Administrative Activities

Develops localized program objectives

Conducts necessary surveys

Works with program advisory committee

Plans and develops curriculum

Communicates school policy

Prepares reports

Prepares budget requests

Participates in professional meetings

#### -- Directs Student/Learner Club Activities

Serves as club advisor

Guides club members in planning and organizing activities

Participates in club group activities

#### -- Evaluates Program Processes

Determines what needs to be evaluated

Determines who should do the evaluating

Determines the most feasible means of accomplishing the evaluation

Prepares the evaluation instruments

Activates the evaluation procedure

Adjusts program processes as necessary in accord with results of evaluation

#### -- Maintains Good Public Relations

Relates within the school and the school community

Cooperates with the industrial community

#### VI. PROVISION FOR SPECIAL COMPENSATION FOR TEACHER/COORDINATOR

#### A. Pre-School-Year Service

Provision will be made by the Board of School Directors to employ each Industrial Cooperative Education teacher/coordinator for twenty full days each summer prior to the beginning of the school year. Each teacher/coordinator will be paid his regular daily rate for each of the twenty days. The primary task to be accomplished during the twenty-day, pre-school-year period is to arrange for placement of each program student/learner in an on-the-job-training station commensurate with his career objective. To accomplish this task, the teacher/coordinator will interview numerous potential employers and he will advise and counsel each student/learner and his parents.

#### B. Local Travel Allowance

Provision will be made for each Industrial Cooperative Education teacher/coordinator to receive reimbursement for the expense of operating his privately owned automobile in connection with the Industrial Cooperative Education program. Reimbursement will be a per diem function of a flat monthly rate, and will be paid once a month during the regular school year and during the period of preschool service.

In order to be reimbursed, each month the teacher/coordinator must fill out a Reimbursement for Transportation Expense card. The sample card, which is illustrated, shows what items must be filled out on the card. He must check

Charles L. Blaschke, President Education Turnkey Systems, Inc. Corporate Headquarters 1660 L. Street, N. W. Washington, D. C. 20036

Dear Mr. Blaschke:

Mr. Chezlaw Schmidt, Administrator of Career and Vocational Education, Glendale Union High School District No. 205, has asked me to furnish you the information and materials requested in your letter of November 3, 1975.

As Teacher-Leader of Careers and Vocational Education, I am a member of the Glendale Educational Management System, which is responsible for an approved ESEA Title III project, " a comprehensive accountability system for a school district".

The purpose of the project is to provide a systematic process for effective planning, implementing, monitoring and evaluation for all aspects of the educational program with cooperative relationships among the general public and various segments of the educational enterprise. More specifically, to provide effective communication and decision making and to improve instruction and student learning.

This project is in the second year of its efforts to achieve intensive evaluation of the top priority learner goals and general evaluation of the remaining goals of the Glendale Union High School District, as well as evaluation of achievement of each local school's learner goals priorities. The documents which I am sending are extracts from this project as they relate to Cooperative Education. The materials I am enclosing are those which I feel most accurately meet your request. These documents

#### 3. Goal

Identify the goal of the program as described in this project. (A goal is a statement of broad direction, purpose, or intent based on the identified needs. A goal is general and timeless; it is not conceived with a specific achievement within a specified time period.) Refer to Part I of the instruction booklet.

To offer a cooperative agriculture education vocational work experience program, including an individualized, self-pacing, continuous progress curriculum, designed to help students acquire those skills/competencies necessary for entry level employment in the agriculture field.

### 4. Measurable Performance Objectives

Performance objectives for the program, service, or activity must be stated in measurable terms. To be measurable, the objective statement must include the outcome desired, the level of achievement, the conditions of evaluation, and the time required for completion.

The proposed project must list the program objectives and should avoid listing student objectives. There should be a direct relationship between the listed objectives and the goals listed in Part I of the instruction booklet.

- During the 1975-76 school year, cooperative agriculture education will be provided for a minimum of twenty students of whom at least eighteen will acquire saleable skills necessary for employment.
- 2. By the end of 1975-76 school year, each student enrolled in the program will have had an opportunity to complete 175 hours of related classroom instruction.
- 3. By the end of the 1975-76 school year, each student enrolled in the program will have been provided an opportunity to complete a minimum of 350 hours of paid cooperative work experience
- 4. During the 1975-76 school year, the teacher/coordinator will continue to use an individualized self-pacing, continuous progress curriculum.
- 5. By December 1975, at least 80% of the students enrolled in this program will be members of the Future Farmers of America (FFA).
- Each student who completes the program will have developed job entry level skills necessary
  to retain employment and to be certified employable by the teacher/coordinator and the
  cooperative work experience sponsor.
- 7. By June 1976, the teacher/coordinator will have attended at least five hours of work experience education in-service training.
- 8. By June 1976, the coordinator will have made at least two visitations per quarter to each work experience station where a student is employed.
- 9. By June 1976, the coordinator will have made at least one evaluation of the students' work per quarter with the assistance of the employer.

ERIC

*Full Text Provided by ERIC

- 4. Measurable Performance Objectives (continued)
- Fall Semester: By October 15, 1975 the coordinator will have averaged 6 contacts per week for possible work stations.
   Spring Semester: By March 1, 1976 the coordinator will have averaged 6 contacts per week for possible work stations.
- 11. By June 1976, the coordinator will have an individualized record on each cooperative work experience student.
- 12. By June of 1976, the coordinator will have a written report evaluating the efficiency of fulfilling the performance objectives.
- 13. During the 1975-76 school year, the coordinator will have established working relations with labor, employment offices and other agencies to assist in identifying jobs.
- 14. During the 1975-76 school year, a minimum of 35% of the students enrolled in the program will be minority, handicapped, or disadvantaged students.
- 15. By June 1976, the teacher/coordinator will have conducted a follow-up study of at least in 90% of the cooperative work experience students through the use of a questionnaire and/or personal interview method.

7

## COOPERATIVE VOCATIONAL EDUCATION PROGRAM

of the

PROVIDENCE SCHOOL DEPARTMENT 1491 Broad Street Providence, Rhode Island 02905 461-3646

A Cooperative Program in Education

Elisha C. Moniz Supervisor

June 1975

#### PROGRAM OBJECTIVES

To:

- 1. Develop an awareness in the student of the real relationship that exists in the world of work and learning in school thereby maintaining the student to seek further growth and development which will enhance his future life style.
- 2. Develop in the student individual qualifications for subsequent full-time employment or advanced study.
- 3. Encourage the student to continue his schooling by permitting him to satisfy his financial needs through part-time employment.
- 4. Enhance the student's occupational preparation by involving him in the real world of work.
- 5. Help the student develop the necessary social skills and work attitudes and habits necessary for job tenure or entry into other vocational training programs.
- 6. Help the studer. develop a viable career plan based on realistic self-appraisal and accurate occupational information.
- 7. Provide the student with early occupational experiences which are vital in making immediate and long range career decisions.

#### DEFINITION

CCOPERATIVE VOCATIONAL EDUCATION: A program of vocational education for students who, through a cooperative arrangement between the school and employers, receive instruction - including required inschool academic courses and related vocational instruction - by the alternation of study in school with a job in a related occupational field. These two experiences must be planned and supervised by the school and employers so that each contributes to the student's education and to his employability. Work periods or school attendance may be on alternate half-days, full days, weeks, or other periods of time. (R. I. State Plan for the Administration of Vocational Education).

W.5

COOPERATIV

ZE WILLION

MANUAL

Livingston, New Jersey

Elaine Gompf, Coordinator

#### AIMS AND OBJECTIVES

To provide students with specific vocational training in order to provide for articulation between classroom and the job.

To have the student examine the necessity of good human relations and put them into practice.

To allow the student to put his classroom learnings to practical use.

To provide an opportunity for the development of certain desirable work habits such as industriousness, responsibility, self-reliance, and punctuality.

To provide opportunities and experiences for the development of social skills and the ability to get along with others.

To gain a better insight into the problems involving employer and employee relationships.

To develop a better understanding between schools and the business community.

To allow the student to gain a certain degree of salable work experience for post-graduation employment.

To expose students to various office occupations which may not have been considered in the classroom.

To provide needed learning experiences which cannot be gained in the classroom.

#### ADVANTAGES

#### For the Student:

Provides practical training of the kind that makes the student more efficient and valuable to his future employer.

Provides experience for meaningful vocational guidance.

# SYSTEM FOR IMPLEMENTING REVIEW AND FOLLOW-UP

developed by

Pandue Waiversity West afayette, Indiana

> in cooperation with

Indiana State Board for Vocational-Teshnical Education

### ABSTRACT

TITIE:

Development of a Statewide System for Follow-Up of Vocational Graduates That Has Implementation for Usage by Local Educational Agencies

PROJECT DIRECTOR: Dr. William B. Richardson

INSTITUTION:

Purdue University

EFFECTIVE DATES:

October 15, 1974 - October 14, 1975

## OBJECTIVES OF PROJECT:

To identify instruments that could be utilized to obtain follow-up information of vocational graduates.

To develop a methodology that could be used to obtain follow-up information of vocational graduates.

To field test the instrument and methodology for data collection

To develop a method for summerizing and analyzing data that could be used by both local and state agencies.

5. To provide a system for interpretation of the data to insure usage of the data at local levels in addition to usage at statewide levels.

6. Train local vocational guidance personnel to use system developed.

PROCEDURES OF IMPLEMENTATION: up system for vocational graduates. An advisory committee was appointed This project developed a statewide followto guide the staff in the selection of instruments and methodologies. Three to five local schools were used as pilot centers to test instruments and methodologies developed. Job performance as assessed by the student and by the employer was obtained. Perception of guidance and placement assistance was secured as well as an interview with a sample of guidance personnel at the local level. A handbook was developed which will provide an interpretation of the data. Workshops were held for state staff personnel so that they could determine how the system operates.

# CONTRIBUTION TO VOCATIONAL & TECHNICAL EDUCATION:

The primary outcomes of this project were the development and fieldtesting of instruments and methodologies that could be utilized in a statewide system for follow-up of vocational graduates.

The unique aspects of the proposed projects were objectives 5 and 6 as it is proposed to provide a system for interpretation of the data and provide for workshops to train local guidance personnel in the usage of

Also, the project varied from the traditional and obtained the students' perception of guidance and placement.

In like manner, perception of job performance as assessed by the student was obtained.

1.32

#### PROCEDURES FOR CONDUCTING

#### A SIRF FOLLOW-UP

#### STEP BY STEP USE:

The balance of this booklet will be devoted to specific step by step procedures to implement the SIRF system in your school. The remaining discussion will be divided into 4 parts:

- 1. Preparing for the followup
- 2. Carry out the followup
- 3. Summarizing and analyzing the data using the computer
- 4. Hand analysis of the data
- 5. Interpreting the data and reporting results.

#### PREPARING FOR THE FOLLOWUP

Step 1: The part of the model at the right outlines the major activities in Step 1. The step is designed to unify data on students as they enter, interact with, and exit the program.

- A. Obtain basic descriptive data on each student. Please re fer to student data cards, Form A located on p. 27 of the SIRF manual. These cards should be filled out, filed and continuously updated on each student.
- B. Fill out Form B on p. 29 on any student who changes status during the program prior to completion. Examples of the use of this form include: termination, change of study option, unsatisfactory progress, etc.
- C. Form C on p. 31 should be completed on each student as he exits the program.

These three forms are the heart of the student data storage. A well kept, up-to-date file on each student is essential to the successful operation of the SIRF system.

#### CARRYING OUT THE FOLLOWUP

Step 2: The part of the model at the right outlines the major activities in Step 2. These activities are aimed preparation for Follow-Up.

- A. Identify students for followup is first activity. Please refer to pages 9-10 of SIRF manual. It is our recommendation that:
  - 1) Follow-up all recent grads
  - 2) Sample at 3 and 5 years
- B. Once decisions are made as to what students are to be followed-up, the next activity is to prepare a cover letter and instrument for each student. On page 33 is the instrument for you to review. Also, on pages 45-47 are three samples of cover letters. You should use an instrument and cover letter that best suit your needs.
- Identification numbers. Before the questionnaires are sent out, each student needs to be given an identification number. This number will be used to keep track of which students have responded. They may also be used to sort students into areas. For example, if you have two programs in Agriculture, Agriculture and Horticulture, you may wish to give the students in Ag numbers between 1 and 99 while the students in Horticulture get numbers between 100 and 199. You may use up to

seven digits for this ID number. An alternative method is to assign every student a five digit number for identification purposes and use an O.E. Code to designate areas. In this case, a list should be made as follows:

ID # Name and Address O.E.

Code
(indicating
area)

The ID number is then placed on the questionnaire before it is sent out. When the questionnaire is returned and ready to be decoded, the ID number is looked on the list. Then the O.E. Code is entered in the first seven columns. and the ID number in the last five columns of the coding form.

O.E. Code student # school

- D. Mail the questionnaire and cover letter.
- E. Non-respondents. After 14 days, mail a non-personal reminder letter to each non-respondent. After 28 days mail a personalized letter and second instrument.
- F. After 45 days, telephone a percentage (10-15%) of those still not responding. Keep this 10-15% separate so that comparisons can be made to determine non-respondent bias.

- G. Try to update addresses of students whose questionnaires are returned undeliverable. Correct the student data storage. Determine number of non-respondents whose addresses are unknown for final report purposes.
- H. It is important that all efforts be exerted to get a high return rate of questionnaires. Please refer to page 44 in the manual for clues to increasing the return rate.

#### ANALYZING AND SUMMARIZING THE DATA

#### USING A COMPUTER

IF YOU ARE NOT GOING TO USE COMPUTER TO ANALYZE DATA GO TO STEP 4.

Step 3: Analyzing and Summarizing data. As question-naires are returned they should be carefully examined to detect errors. All completed questionnaires should be sorted neatly according to anticipated computer usage.

- A. After questionnaires are examined for cojrectness, they are to be coded on a code form. Please refer to pages 50-52 of the SIRF manual. Page 52 opens out.
- B. Decoding: During this discussion refer to pages 50 and 51 in the Appendix.

Page 50 is a sample copy of a returned questionnaire. Page 52 is a sample copy of a coding form. These should be available to you from wherever you get computer cards.

Step 1: Transfer ID or OE Code to first seven columns. If OE code is used, ID number may be placed in last five columns

Step 2: The answer to question one goes in column 8 on the coding form. Put a one in column 8 if the answer is male and a two if the answer is female (this corresponds to

the numbers beside the answers). Questions 3, 4, 5, 6, 8, 9, 10, 11, 12, 13, 15, 17, 20, 23, 24, 27, 28, 29, 32, 33, 34, are handled in the same manner.

Step 3: Write in the age (from question two) in columns 9 and 10.

Step 4: On question 7, May becomes 05, and 1975 becomes 75. Enter 0575 in columns 15-18.

Step 5: Questions 14, 18, and 22 are two part questions—a yes—no response and a reason response. The yes—no response goes in one column (#25 for question 14) and the reason re sponse in another (#26 for question 14).

Step 6: Questions 16 and 31 have multiple responses. If an answer is marked that number should be placed in the column indicated.

Step 7: Questions 18 and 26 are wage questions. The wage should be entered as four digits in columns 38-41. Example: 0250 = \$2.50/hour.

Step 8: Question 30 is treated as six separate questions, each with five answers. Each question is treated like question one.

- C. When all questionnaires are coded on the code form(s) you are ready to consult a computer person about the computer analysis. Three things will need to be done:
  - 1. Key punch computer cards from code form.
  - Transfer computer program to your computer.
  - 3. Run cards through computer to obtain summary of data.
- D. The cards may be keypunched in your data processing center. Care should be taken to insure that the keypunching is accurate.
- E. The computer program is included in Appendix. This program is designed for a 360/60 IBM computer. It is ready to be put in this computer or a similar one. A computer consultant is needed to install the program.
- F. Once the program is operational, the cards prepared, it is then a matter of running the cards and obtaining output.

#### HAND ANALYSIS OF THE DATA

# IF YOU USED THE COMPUTER SKIP TO STEP 5.

Step 4: Analyzing the data by hand can be accomplished by traditional methods of frequency counts and percentages. Please examine the tables in the SIRF manual on pages for a guide in hand tabulating data.

### INTERPRETING THE DATA AND

#### REPORTING RESULTS

Step 5: The computer program produces 9 computer cables. Also, the user is as ed to read page 12 of the manual for some ideas on the capabilities of the program. By use of card sorts several comparative analyses can be produced.

### Enrollment Data
