ABSTRACT

Implementation and expansion of class offerings was the primary focus of the second year of a project (in Evansville, Indiana) to determine the feasibility of establishing a center for continuing education for vocational level health occupations workers within the department of vocational education of a metropolitan school corporation. (The first year activities primarily concerned identification of needs, establishment of tentative administrative guidelines, and initiation of one new program.) Developing program curriculum content and activities according to established guidelines and criteria for accredited continuing education offerings was also emphasized in the second year along with refinement of administrative guidelines and improved communications to and from teachers. Programs for offering were selected on the basis of need as indicated from a survey conducted the first year of the project. Since the second year involved implementation, no research was conducted. Program effectiveness was perceptually evaluated by participants, instructors, and advisory committee members. A total of 201 students were enrolled in nine class offerings and community acceptance was perceived as favorable. An increasing number of employers paid or at least reimbursed participants' tuition costs. This report includes brief statements about conclusions, recommendations, and evaluation plans. The appendixes, which cover the majority of the document, present course descriptions for the courses offered during the project's second year. (SH).

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). ELT of the quality of the original document. Reproductions supplied by EDRS are the best that can be made from the RIC.

ABSTRACT FOR PROJECT NO. 52-75-D DEVELOPMENT OF A HEALTH OCCUPATIONS CONTINUING EDUCATION CENTER

This project was developed under a grant from the Indiana State Board Vocational Technical Education in cooperation with the Evansville School of Health Occupations, Evansville-Vanderburgh School Corporation.

This report is of activities for the second year of the project to develop a continuing education center for vocational level health occupations workers within the department of vocational education of a metropolitan school corporation. Primary focus for the year was on implementation and expansion of class offerings.

A total of nine class offerings were presented with an enrollment of 201. Course outlines for the nine offerings are included within the report.

Much reliance was placed on activities of advisory committees. It was found that operation of the center was more time consuming than had been anticipated. When applicable, accreditation or continuing education approval are sought for programs offered. Initial steps have been taken to do a cost analysis for each class and for operation of the total center in preparation for the transition of the project from a grant fund to a locally supported program.

Statement of the problem. This marks the completion of the second year of a project to determine the feasibility of establishing a center for continuing education for vocational level health occupations workers within the department of vocational education of a metropolitan school corporation. The first year activities primarily concerned identification of needs, establishment of tentative administrative guidelines, and initiation of one new program. Second year activities have been primarily concerned with implementation and expansion of program offerings.

Priority area. Primary emphasis has been given to expanding program offerings and to developing program curriculum content and activities according to established guidelines and criteria for accredited continuing education offerings. The guidelines have been established by various nursing organizations and other regulatory bodies for health care facilities. Programs developed have been submitted for accreditation or approval in those instances in which approval bodies have been established.

A second area of concern has been refinement of administrative guidelines and improved communications to and from teachers.

Strategies. Programs initially selected for offering during this present year were selected on basis of need as indicated from questionnaire survey conducted during the first year of the study. Additional classes and programs were developed in response to requests from community and occupational groups. Advisory committees were appointed to identify broad areas of course content, to assist with instructor recruitments, to give endorsement to the specific curriculum content which was developed by the course

instructor and the project coordinator, and to evaluate the program upon its completion. Advisory committee members included representatives from the target groups as well as from supervisory and educational groups. All program participants were asked to complete program evaluations upon completion of the classes. Student evaluations and instructor comments were shared with the advisory committees' post-program evaluation sessions.

Analysis. Since this was a year of implementation, no preliminary or related research was conducted. Program effectiveness was perceptually evaluated by participants, instructors, and advisory committee members. Primary focus this year was experimental in nature, i.e., to determine the effectiveness of the operation established and the ability of the available staff to carry out the activities determined to be a part of the operation.

Factors considered essential were related to time required for assistance to teachers, for the preparation of teaching materials and handouts, for recruitment activities, and for preparation of accreditation applications.

Findings. A total of 201 students were enrolled in nine class offerings. Two of the classes had been offered during the previous year. Five of the offerings were new. Curriculum was developed for the five new offerings and revised for those offered previously. Two of the classes were offered twice. Curriculum was developed for one class which will first be offered during the 1976-77 school year.

Community acceptance has been good. An increasing number of employers are paying or at least reimbursing participant's tuition cost. In addition to a number of informal sessions and phone conversations with advisory persons,

fifteen meetings of the various advisory groups were held. Publicity and recruitment have been an incidental benefit of the extensive advisory group activity. There have been more requests for programs than time has permitted for development and implementation.

The Dietetic Assistants' Program has received national accreditation from the American Dietetic Association. Five additional class offerings have been submitted for approval from the Indiana Statewide Plan for Continuing Education in Nursing. The application for approval of the Central Service Technician Program is nearing completion.

Initial steps have been taken to collect data needed to do a cost analysis for each class and for the total center. Students were charged fifty cents per contact hour of instruction plus list price for required texts. No charges were made for handout materials, although for some classes this did represent a significant cost. Maximum number of handouts was required for the Dietetic Assistants' Program in which each student received a two-page program synopsis, a twenty-eight page course outline and a 159 page student manual. Twenty-four pages of field experience evaluation forms as well as unit tests were required for each student. Original copy for all student handouts was prepared by the school secretarial staff. Tests and several forms were also typed and reproduced by office staff. Because of the limited secretarial staff, many of the secretarial activities had to be done by the project coordinator.

All concerned have found the operation of a learning center for continuing education to be more time consuming than had been anticipated. Teachers have been employed who possessed vocational expertise but who possessed little if any background in classroom teaching and in the preparation of instructional materials or in the use of audio-visual equipment. Only one teacher had previous

experience teaching with the Evansville-Vanderburgh School Corporation and so there were many small but essential details requiring project leader follow-through. While rules of procedure have been established, there are still legitimate exceptions. Until these have been reasonably well identified, much time is required for individual consideration of these individual situations.

For some courses, applications for accreditation will have to be submitted to more than one organization. While each organization may request similar information, same organization will have its own format and so require preparation of additional applications.

Because of the anticipated increased enrollment and the number of students involved, the record keeping system for night classes had to be revised so that a student's total record of classes attended would be readily available as would a copy of the content for the classes attended.

The number of phone calls for program information increased significantly and added to the work load of the secretarial staff who handle most of the requests for program information. This added to the work load not only because of the time required in responding to each request but because of the added interruptions to on-going work load.

Evaluation. The course offerings have been evaluated by the Continuing Education Advisory Committee. Committee members generally feel that the Center is serving a vital purpose, that programs selected have been desirable and appropriate, and that the project activities definitely should be continued.

Individual programs have been evaluated by advisory committees established for the individual courses and by the class participants. Where feasible, changes have been made in course structure, class hours, instructors and text materials in response to participants' and committee members' recommendations.

A more formal evaluation is planned. Questionnaires will be distributed to past participants to determine their perceptions of relationship of course content to any changes in their work performance. Questionnaires will also be distributed to work supervisors and employers to determine their perceptions of any observable change in performance which could be related to class attendance.

Conclusions and recommendations. A total of nine programs serving various occupational groups has been offered this year as planned. Course outlines have been written for each course. A functional system of record keeping has been employed whereby all continuing education records of an individual student are readily located and course content verified. Much use has been made of advisory committees composed of program participants as well as appropriate resourse personnel. Informal program evaluation has been supportive.

Conduct of a center for continuing education has proven more time consuming than had been anticipated. In many instances deadlines were not met or if met, were done so only with great difficulty.

Response in terms of enrollment and in terms of requests for programs has been good. Requests for programs have exceeded ability to prepare and offer programs.

Recommendations are as follows:

- 1. Make provision for additional secretarial assistance in the coming year.
- 2. Reassess schedule of activities and mode of operation of center.
- 3. Provide group orientation sessions for new teachers when possible.
- 4. Make provision for continuation of center activities.

APPENDIX

SYNOPSIS OF COURSE

ADVANCED PHARMACOLOGY

PURPOSE:

To assist licensed practical nurses to increase their knowledge and skills in the administration of medications to reach performance standards for this function in health care institutions. This course also serves as a refresher course for registered nurses.

OBJECTIVES:

To enable the student to a competence in the typical computations in drue and using both metric and apothecary systems; (2) is a competence in the safeguards required in administering descential pharmacology information; (4) mow basic understanding of assential pharmacology information; (5) relate the role of drug therapy to specific disease conditions; (6) apply nursing knowledge and skill in observing and reporting the success of, or unfavorable reactions to, drug therapy in selected health problems; (7) comprehend the full range of responsibilities in administering medications and correlate various nursing actions with the drug therapy.

CONTENT:

Quick review of math and injection techniques; drug computation, classification and idiosyncrasies; drug administration, using safety precautions and identifying nurse's legal responsibilities; drug therapy and administration in relation to the body systems; drug therapy and administration in relation to cancer; and miscellaneous categories relating to pharmacology such as intervenous therapy, administration of antibiotics, and use of disinfectants.

INSTRUCTOR:

Carol Haller, R.N., B.S.N.

DATES:

September 16, 1976 - January 27, 1977

CLASS SESSIONS: 9:00 - 11:40 A.M. on Thursday mornings for 15 weeks

TOTAL HOURS:

40 (submitted to ISPCEN for CEU's)

PLACE:

North Annex Building, Room 206

FEES:

\$29.00 (includes textbook-\$9.00)

ENROLLMENT:

25 maximum

ADMISSION REQUIREMENTS

L.P.N. or R.N. Graduate practical nurses awaiting state board examination may enroll upon the discretion of the coordinator.

CRITERIA FOR COMPLETION:

Passing grade of "C" (80-87) or hetter. Regular attendance with

no more than two absences.

SYNOPSIS OF COURSE

SIGN LANGUAGE COURSES

Developed through the assistance of the Evansville Council of the Deaf and Hard of Hearing, Inc. and Vocational Rehabilitation Division of Indiana Rehabilitative Services.

BEGINNING SIGN LANGUAGE

To enable students to acquire a basic understanding of the language PURPOSE:

of the deaf and encourage an awareness and interest in the deaf

community.

OBJECTIVES: To assist students to: (1) become aware of the language, social and

vocational problems of the deaf; (2) learn fingerspelling, signing and non-verbal communication with a vocabulary of approximately 300 signs; (3) develop reception of fingerspelling and signing.

CONTENT: History and background of the manual alphabet and sign language,

instruction and practice in fingerspelling, signing, and non-verbal

communication.

Lawrence, Sign Language Made Simple, Gospel Publishing House, 1975. TEXT:

INSTRUCTOR: Susan Leibundguth, B.A. in Psychology

DATES: September 21 - December 7, 1976

CLASS SESSIONS: 6:00 - 9:00 P.M. on Tuesdays for 12 weeks

(submitted to ISPCEN for CEU's) TOTAL HOURS:

PLACE: North Annex Building, Room 308

FEES: \$27.95 (includes textbook--\$8.95 and handouts)

ENROLLMENT: 15 maximum

ADMISSION Post high school and/or minimum age of 17. If uncertain of eligi-REQUIREMENTS:

bility for beginning or intermediate class, contact instructors:

Susan Leibundguth, 477-0855 or Larry Brice, 425-1367.

CRITERIA FOR 1. Indication of expressive mastery of manual communication with a vocabulary of approximately 300 signs. COMPLETION:

2. Familiarity with the concepts and terminology of the deaf world.

3. Participation and completion of required activities.

4. Regular attendance with no more than two absences.

5. Passing grade of "satisfactory" if requirements are met.

CENTRAL SERVICE TECHNICIAN TRAINING PROGRAM

PURPOSE:

To train individuals to become more efficient, skilled and knowledgable in the area of central service.

OBJECTIVES:

To assist students to: (1) understand the principles and demonstrate the procedures of preparation, sterilization, inspection and distribution of materials and equipment needed for direct patient care in hospitals; (2) function as leaders in the central service department, assisting in training of new aides and auxilliary personnel.

CONTENT:

Includes general terminology associated with central service, interdepartmental and intra-departmental communication; introduction to microbiology; introduction to anatomy and physiology; demonstration of methods of "manufacturing sterile items" by cleaning, packaging, sterilizing and storage of equipment; handling and operation of equipment; and discussion of safety standards and precautions.

Upon completion of the course, the student is awarded a certificate of achievement; if he so desires he may take the registry examination provided by the International Association of Hospital Central Service Management (IAHCSM) and upon passage of the exam may become registered and append the title Registered Central Service Technician (RCST) to his name. He is also eligible for affiliate membership in the IAHCSM.

TEXT:

IAHCSM, The Central Service Technician, 1st. ed., Clissold Books, Inc., 1969.

Jorow, The Central Service Technician at Work, Springer Publishing

Company, 1975.

Reference books as designated by the instructor.

INSTRUCTOR:

Evalyn Moers, R.N.

DATES:

September 28, 1976 - May 10, 1977.

CLASS SESSIONS: 6:30 - 9:00 P.M. on Tuesdays for 30 weeks.

TOTAL HOURS:

75 classroom hours, minimum of 30 hours of supervised clinical practice in student's employing institution.

PLACE:

North Annex Building, Rooms 303 and 304

FEES:

\$53.50 (includes textbooks and handouts--\$15.00)

ENROLLMENT:

25 maximum

ADMISSION REQUIREMENTS: Current employment in a hospital central service department. Minimum age of 17. Letters of recommendation needed from the Adminis-

trative Manager of Central Service and the Supervisor of Central Service

CRITERIA FOR COMPLETION:

- 1. Demonstrate a technician's level of competency.
- 2. Grade of "satisfactory" on all classwork.
- 3. Grade of "satisfactory" on all clinical practice.
- 4. Regular attendance at class with no more than three absences.

EVANSVILLE SCHOOL OF HEALTH OCCUPATIONS LEARNING CENTER

COURSE OUTLINE

Begins September 28, 1976-Ends May 10, 1977 Class every Tuesday except Dec. 21 & 28, 76

Hours				
Session #4 Anat. And Phy. cont'd, Respiratory and Digestive Systems 2½ hours St. Mary's Hospital	Acquire a basic knowledge of the digestive system, and the equipment and supplies used as related to central service.	Know anatomical charts. Know how to handle, sterilize and inventory supplies in hospitals.	Respiratory Technology: A Procedure Manual - Doris Hunsinger Karl J. Linsnerski, Jerome J. Maurizi, Mary L. Phillips. Copyright 1973 - Reston Publishing Company, Inc. Know anatomy & physiology covered by the 6th session	
Barrioria Barrioria Carrioria				
Session #5 Anatomy and Phy. cont'd Urinary and Circulatory Systems 2½ hours North Annex	Gain a basic understanding of the urinary system and the assoicated equipment and supplies used as related to central service.	Pronounce, spell and name the organs of the urinary system. Name types of supplies and irrigation solutions available: G.U. cart supplies Renal dialysis supplies and trays Pyelograms, cystograms Catheters Toomey syringes Glycine-Normal Saline Solutions.	Display & discussion of supplies from hospitals.	Test over Session 4
Rooms 303 - 304	Gain a basic understanding of the circulatory system and the associated equipment and supplies used as related to central service.	Identify heart, arteries, and veins on anatomical chart. Recognize and discuss fluid therapy supplies and code blue box or carts as supplied by different hospital central service departments.	Display of I.V. solutions and tubings from hospitals.	45
ERIC				4 U

llours	:			
Session #6 Introduction to Microbiology 2½ hours North Annex Rooms	Gain a basic understanding of microbiology by study of bacteria, methods of control, and the effect of infections in hospitals.	Classify bacteria. Explain methods of control. Explain means of destruction.	Lecture. Slides of bacteria. Use microscope to identify bacteria.	Test over Session 5
Session #7 Introduction to Transmission of Bacteria 2½ hours North Annex Rooms 303-304	Gain a basic understanding of routes and modes of transmission of bacteria. Role of Central Service personnel Surveillance program. Control of traffic in central service department.	Exercise better personal hygiene. Handle supplies more competently for own safety. Decontaminate, clean, and prepare supplies to be dispensed. Demonstrate gown and glove technique. Demonstrate hand washing technique.	Lecture. Demomstration and return demonstration of gowning, gloving, and hand washing.	
Session #8 Introduction to Asepsis 2½ hours North Annex Rooms 303 -304	Acquire a basic understanding of asepsis: Surgical technique Techniques for cleaning. Housekeeping in central service department.	Describe fundamentals of cleaning, methods of clean- ing, cleanliness of staff, and cleaning agents.	Lecture. Display of cleaning agents. Films: Medical Asepsis and Isolation Technique.	47

llours	(Market and Bennone to)	fine acquein wrizene ante c	ψ) 	
Session #9 Introduction to Chemistry 2½ hours North Annex Rooms 303-304	Gain a basic understanding of chemistry as related to central service.	Classify chemical agents. Distinguish between antiseptic, disinfection, sterilitant, and sanitizing agents.	Lecture. Check PH of solutions.	Test over Session 6, 7, and 8
Session #10 Introduction to Materials Management Concept 2½ hours Deaconess Hospital	Gain insight into control of supplies in hospitals through Materials Management.	Discribe this concept as related to nursing and management: Purchasing Receiving Staring Distribution	Lecture. Tour of Deaconess Hospital facilities to show flow of supplies to other departments. Demonstrate computor method of obtaining charges.	
Session #11 Introduction to Principles of Sterili- zation 2½ hours North Annex Rooms 303/304	Acquire a basic understanding of sterilization principles as related to the central service department.	List and define methods of sterilization: Amprolene Flash Gas Pasteurmatic Steam	Lecture. Filmstrips	
rinciples of terilization ont'd. Use of Biological addicators at Monitor, as ERICS.	Comprehead the use of biological indicators and mechanical monitoring.	. •	Lecture. Dsiplay of indicators and load- acators, Keeping of records as recommended by Joint Commission. Demonstration of pasteurmatic at Deaconess. Demonstration of an- prolene gas sterilizer used by St. Mary's.	40

Synopsis of Course Outline

PROGRAM FOR THE EDUCATION OF DIETETIC ASSISTANTS

Principal instructor: Venita Hargis, R.D.

Sponsored by the Evansville School of Health Occupations

Participants: A basic course for personnel currently employed in dietary departments in health care facilities.

Purpose: To prepare qualified applicants to function effectively as food service supervisors.

Classes: Classes will meet in room 305, North High School Annex, each Wednesday starting September 8, 1976 from 6:00 to 8:30 P.M., except December 22 and 29, and March 30. This schedule covers 90 hours of instruction in a 36 week period. Classes end June 1, 1977.

Field Experience: Field experience begins September 9 following the first class and ends June 1, 1977. A minimum of 4 hours per week is required for all units except Unit VI for which a minimum of 5 hours per week will be required.

The field experience is obtained in the student's place of employment under the supervision of the <u>registered dietitian</u> who functions as a consulting dietitian or full time dietitian for the institution. A complete manual for the field experience is provided.

Projects should be completed in the allotted time. The preceptor prepares a written evaluation of each project. This evaluation and your written work required by any project must be submitted to your classroom instructor on the date due.

At the conclusion of the program the preceptor evaluates the total effectiveness of the student as a food service supervisor.

Textbooks: American Hospital Association, <u>Food Service Manual for Health</u> Care Institutions

Robinson, Basic Nutrition and Diet Therapy
Fowler and West, Foods for Fifty
Other materials as provided

FUNCTIONS OF THE DIFTETIC ASSISTANT AS DESCRIBED BY THE AMERICAN DIETETIC ASSOCIATION

The dietetic assistant participates in the implementation of the food service operation through such activities as:

- 1. Planning menus according to established patterns
- 2. Training, scheduling, supervising and evaluating employees
- 3. Supervising food production and service
- 4. Maintaining quality control
- 5. Maintaining established standards of sanitation and safety
- 6. Supervising record keeping
- 7. Maintaining an adequate system of patient nutritional care

SUPERVISION AND MANAGEMENT SKILLS

(From routine management development courses, the following skills emerged as really needed. Training in these produced far greater results in successful supermission. The twelve final needs as determined were:)

- 1. Skill in achieving results with the instruments at hand especially in directing, training, and coordinating available without exhibiting undue personal irritation or com
- 2. Acceptance without protest of all authority and any way legally limits or conditions one's own authority.
- 3. Skill in expressing oneself, preferably both in speaking and in writing.
- 4. Skill in doing many things well and in moving swiftly and smoothly from task to task.
- 5. Skill in dealing with the unexpected and unusual and in accepting interruptions without annoyance or loss of efficiency.
- 6. Skill in separating major from minor issues and in foreseeing consequences so as to make relatively quick but sound decisions.
- 7. Willingness to listen and patience in listening before making decisions.
- 8. Skill in reaching needed objectives without reliance upon rigid or petty rules.
- 9. Skill in formulating policies and in interpreting goals so as to motivate both effort and production.
- 10. Skill in properly evaluating new ideas and changing circumstances.
- 11. Skill (diplomatic) in evading or resisting "distractors" and digressive items.
- 12. Skill in correctly interpreting what is said or written.

SUGGESTIONS FOR MAINTAINING AND IMPROVING RELATIONS

WITH YOUR BOSS

Never take anything for granted.

Work should be both checked and inspected.

Work is not complete until the completion has been reported.

Never let your boss be surprised.

Report your own mistakes immediately.

Call attention to problems as soon as you perceive them—and try to suggest a solution. If possible, an alternative solution should also be ready for discussion.

When you bring a problem to him, be sure you have all the facts.

When you bring an idea to him for a change, be sure you can explain clearly why the change is needed, what the change will cost in terms of equipment and manpower, and how other departments might be affected by the change.

Do not do anything for one person that you cannot or will not do for another under similar circumstances.

Ask questions, but explain why the questions are asked.

Plan ahead.

Make your boss look smart.

Use Questions Like These

Open Questions that invite the other erson to express freely what he thinks ad feels---never make him feel that he in a box or fenced in in any way.

Example: Tell me, Joe, how does this coblem look to you?

Leading Questions that give direction the reply but are not restrictive in my way. Example: How did you go about orking out your solution to the probem?

Cool Questions that appeal to reason not that involve the emotions as little s possible. Example: Now what would ou say the first step toward a solution hould be?

Planned Questions that are thought out n advance as part of a logical sequence. xample: What would your suggestion be m this?

Treat Questions that let the respondent know he can make a real contribution by expressing his views. Example: You can help me a good deal on this, Joe. What is your suggestion?

Window Questions that help you look into the respondent's mind---and see his feelings, too. Example: How does this problem look to you, Joe? Why do you feel that way about it?

Not Questions Like These

Close-Out Questions that force the other person into a point of view other than his own---make him feel he must conform to some preconceived pattern. Example: Now if you were convinced that taking this action is morally wrong, you wouldn't be for it, would you?

Loaded Questions that put the respondent into a "hot spot" whatever his answer may be. Example: What made you think that your solution to the oblem was the only right one?

Heated Questions that reflect the feelings of the asker and incite those of the respondent. Example: We've already been round and round on that one, so what do you think we should do?

Impulse Questions that just happen to pop into the asker's mind. Example: By the way, what do you think about the way your boss handled this?

Trick Questions that seem to ask a frank cpinion, but that actually put the respondent on the spot. Example: What should we do about this, Joe? Fire Bill or just transfer him?

Mirror Questions that simply reflect your own point of view. Example: Here's the way it looks to me, Joe. Do you agree with this?

SOME TIPS ON EFFECTIVE COMMUNICATIONS

SPEAKING

- 1. If you want someone to do something, state clearly who is to do it and exactly what is to be done.
- Speak distinctly and avoid distracting speech habits (and ah, you know, mumbling, etc.)
- 3. Keep messages as brief as is consistent with getting the message across. Don't ramble.
- 4. Give the "why" as needed to gain understanding and cooperation.
 - 5. Speak pleasantly and remember your face and body also speak for you.
 - 6. Remember your listener interprets your message in terms of what he knows, feels about the subject what he past experiences have light, what words he understands, and the light about you and his relationship to you.
 - 7. What a word means to you may not be what it means to someone else.
 - 8. Check to be sure you are understood when there is any doubt.
 - 9. Every occupation has a language of its own which may not be understood by others.

WRITING

- 1. Be sure to include the following on written messages: date, to whom and from whom.
- 2. State the main idea as early in the message as possible. Follow with any needed instructions and explanations.
- 3. Keep a copy of letters, messages or directives you send and file them in an orderly manner. If the original is lost, you won't have anything to refer back to if you don't. You will be surprised how often you can forget what you said, to whom you said it and when.

LISTENING

- 1. A supervisor spends 70% of his time communicating, and 45% of this is spent in listening. Learn to be a good listener.
- 2. If someone has a problem, give him enough time to talk about it.
- 3. Show that you are interested and willing to listen. Don't doodle or fuss with other things or look at your watch every few minutes. Keep your attention and your eyes on the speaker.
- 4. Listen with intent. Ask yourself what the speaker is really trying to say to you. If you don't understand, then try to repeat to him what he is telling you so that he can correct you if you have gotten it wrong.

110

- 5. Use your eyes to help you listen. The speaker's face, use of hands, the way he sits or stands——all these can tell you something about his feelings and concerns which you may not pick up from the words he is using.
- 6. Your employee can't talk while you are talking. Give him a chance; don't interrupt.
- 7. If you want to get the full message from someone, let him change the subject when he is ready. Don't you do it.
- 8. Use questions that fit the need and encourage the speaker to continue on and "zero" in on the topic. Remember the speaker is trying to clear his own thoughts as he goes along. (See sample questions, Questions That Fit the Need.)
- To get information avoid questions that can be answered by a "yes" or "no".
 They tend to shut off communications.

PERSONNEL DUTIES AND

RESPONSIBILITIES OF A SUPERVISOR

- 1. Select employees for advancement since vacancies should be filled whenever possible with well-qualified persons who are now working for the organization.
- 2. Train and develop employees to do their present work and to be prepared for more difficult and responsible assignments.
- 3. Select for specific jobs new employees who may later develop knowledges and skills for other jobs.
- 4. Induct both old and new employees on jobs which are new to them.
- 5. Appraise the performance of employees.
- 6. Recommend wage or salary increases when a merit system is used.
- 7. Keep employees informed on departmental and company problems and developments.
- 8. Develop and maintain morale.
- 9. Give instructions and make work assignments.
- 10. Maintain discipline.
- 11. Administer rewards and reprimands.
- 12. Follow through on all assignments and commitments.
- 13. Listen to employees.
- 14. Keep appropriate records.
- 15. Prepare appropriate reports.

SYNOPSIS OF COURSE

INTERMEDIATE SIGN LANGUAGE

PURPOSE:

To increase signing ability and understanding of the language of

the deaf.

OBJECTIVES: To help students to: (1) build upon their basic signing ability to

achieve a vocabulary of approximately 600 signs; (2) develop ability to understand deaf signers; (3) increase knowledge and understanding

of the deaf; (4) develop a desire to work with deaf persons.

CONTENT: Lecture, demonstration, and practice in signing and receiving;

class sessions using the "total immersion" concept whereby all communication between instructor and students is conducted through

total communication, using fingerspelling, signing and non-verbal

communication.

TEXT: Lawrence, Sign Language Made Simple, Gospel Publishing House, 1975.

INSTRUCTOR: Larry Brice, B.S.

DATES: September 27 - December 13, 1976

CLASS SESSIONS: 6:00 - 9:00 P.M. on Mondays for 12 weeks

TOTAL HOURS: 36 (submitted to 3PCEN for CEU's)

PLACE: North Annex Building, Room 308

FEES: \$27.95 (includes textbook--\$8.95 and handouts)

ENROLLMENT: 20 maximum

ADMISSION Post high school and/or minimum age of 17. Completion of beginning sign language course or its equivalent with ability to fingerspell and know approximately 300 signs. If uncertain of eligibility for

intermediate class, contact instructor, Larry Brice, 425-1367.

CRITERIA FOR 1. Demonstrate an intermediate level of giving and receiving signs.

COMPLETION: 2. Achievement of a vocabulary of approximately 600 signs.

3. Participation and completion of required activities.

4. Regular attendance with no more than two absences.

5. Passing grade of "satisfactory" if requirements are met.

SYNOPSIS OF COURSE

INTRODUCTORY MEDICAL TERMINOLOGY

PURPOSE: To acquire an introductory knowledge of medical terminology which may

lead to, or enhance employment in the health care field.

OBJECTIVES: Students are expected to: (1) learn basic medical terms, prefixes and

suffixes which are frequently encountered; (2) acquire basic knowledge of the gross anatomical structure of the human body; (3) understand the purpose and content of commonly encountered medical records; (4)

become familiar with the members and concepts of the health care team.

CONTENT: Includes lecture, word lists, word exercises and handouts relating

to prefixes, suffixes, and medical terminology associated with the

body systems.

TEXT: Young and Barger, Learning Medical Terminology Step By Step, 2nd ed.

The C.V. Mosby Company, 1971.

INSTRUCTOR: Eureda Hendershott, Accredited Record Technician

DATES: September 14, 1976 - January 25, 1977

CLASS SESSIONS: 6:00 - 8:00 P.M. on Tuesdays for 18 weeks

TOTAL HOURS: 36 (applied to American Medical Record Association for CEU's)

PLACE: North Annex Building, Room 305

FEES: \$30.00 (includes textbook \$9.75 and handout materials)

ENROLLMENT: 25 maximum

ADMISSION Open to any interested individual who has completed high school or

REQUIREMENTS: its equivalent (G.E.D. test).

CRITERIA FOR Passing grade of "C" (80-87) or better. Regular attendance with

SYNOPSIS OF COURSE

LEADERSHIP SKILLS FOR CHARGE NURSES IN LONG TERM CARE FACILITIES

PURPOSE: To prepare licensed practical nurses for the role of charge nurses

in long term care facilities. Registered nurses welcome.

OBJECTIVES: Assist the participant to: (1) achieve a deeper understanding

of the long term patient; (2) extend knowledge in the principles of

management and develop leadership skills related to the care of

long term patients, the nursing team, and the institution.

CONTENT: Overview of the role of charge nurses in long term care facilities;

understanding the psychological, physical, and rehabilitative needs of long term patients and management of the related nursing care; functions of a leader in the nursing team with instruction on admission and discharge plans, patient assessment, nursing histories, care plans, charting and record keeping, report forms, and daily

work sheets; communication, supervision, and evaluation of employees; exploration of the legal aspects of nursing; and requirments for

licensure and accreditation of the institution.

TEXT: Smith and Huber, Concepts in Leadership for the Licensed Practical

Nurse, The C.V. Mosby Company, 1973.

INSTRUCTOR: Elizabeth Shaw, R.N., B.S.N., M.A.

DATES: September 27, 1976 - January 17, 1977

CLASS SESSIONS: 6:30 - 9:10 P.M. on Mondays for 15 weeks

TOTAL HOURS: 40 (submitted to TSPCEN for CEU's)

PLACE: North Annex Building, Room 305

FEES: \$27.95 (includes textbook--\$6.95 and handouts)

ENROLLMENT: 25 maximum

ADMISSION

REQUIREMENTS: L.P.N. or Roll presently employed in a long term care facility.

Recommendation of the Director of Nursing Service in the facility.

CRITERIA FOR 1. Demonstrate leadership and management abilities through various COMPLETION: means of evaluation.

2. A grade of "satisfactory" on all classwork and field projects.

3. Regular attendance at class with no more than two absences.

SYNOPSIS OF COURSE

PSYCHOLOGY OF ILLNESS

To assist eligible health care workers to expand their knowledge PURPOSE:

and understanding of the emotional problems associated with illness.

Participation in the course will enable the student to: (1) develop **OBJECTIVES:**

skills in communicating with patients and co-workers; (2) understand the importance of self awareness before caring for others; (3) recognize the inter-relationship of the mind and the body and realize the emotional implications of physical illness; (4) cope with the emo-

tional adjustments to illness.

Instruction on understanding yourself and others; principles of CONTENT:

communication including transactional analysis; emotions and illness; and patients with special needs such as body image disturbance, drug dependency, sensory deprivation, pain and suffering, the geriatric

and dying patient, and the sick child.

Noonan, Emotional Adjustment to Illness, Delmar Publishing Company, TEXT:

1975.

Jane Eberhart, R.N. **INSTRUCTOR:**

October 5 - December 7, 1976. DATES:
