ABSTRACT

A questionnaire was mailed to a random sample (n=395) of public, private (including proprietary) and church-related community and junior colleges for the purpose of identifying the nature of part-time students in such institutions, the extent to which they participate in or are included in college programs and activities, and the various ways in which college services respond to meet their particular needs. Responses were received from 131 institutions, a return rate of 33%. Over 85% of the responding institutions reported that they deliberately recruited part-time students, using a variety of methods such as newspaper and radio/television advertising, and mailings; fewer than one-fifth of the respondents provided special orientation programs for part-time students; approximately half of the colleges provided counseling services, although only 7% had counselors who served only part-time students; less than 20% had financial aid programs exclusively for part-time students; and two-thirds of the colleges charged part-timers activity fees, although such students were not entitled to participate in intercollegiate athletics, which are largely supported by such fees. It was concluded that part-time students were welcome customers but were not accorded much attention or service by their institutions. Recommendations to improve college services to part-time students and a list of institutions participating in the survey are included. (JDS)

INTRODUCTION

Hardly a college or university exists in the United States today that has not already experienced or is presently experiencing a dramatic shift in the nature of its student body. Older students, veterans, persons undergoing re-training, handicapped students; these and many other types of people are changing the look of campuses across the country. An especially significant growth area in student enrollment is evident in the number of part-time students in attendance; some statistics indicate that part-time students currently constitute approximately 55% of all post-secondary enrollment. Many colleges and universities, of course, have much higher percentages of part-time students enrolled.

In a time of ever-tighter budgets, combined with the often-frantic scramble of admissions people to recruit the dwindling number of high school graduates, the part-time student has suddenly acquired new stature; he or she is now avidly sought after, with the resultant tuition and fees provided by such students being looked upon as a welcome windfall in both enrollment figures and cash flow.

With this sudden, large influx of these part-time students, it is natural to ask questions, such as: "Who are these students? What effect are they having on college programs? What are colleges doing to respond to this influx?"

Because there has been very little research done on part-time students, it was determined by this writer to do a study that would attempt to at least more clearly identify the nature of part-time students, the extent to which they are participating in or being included in college programs and activities, and the various ways in which college services are responding to meet their various needs. It was further determined to limit the study to community and junior colleges. The majority of students at these colleges are part-time; further, the community and junior colleges have probably traditionally been more prone to and more open to recruiting, enrolling, and serving such students.

A four-page questionnaire¹ was developed and, based upon a random sample, was subsequently mailed with a cover letter² to 395 of the nearly 1200 community and junior colleges in the United States. Of these 395 colleges,³ 313 were public (100 were under local control, 213 were under state⁴ control), 51 were under private control (of which 16 were basically proprietary in nature), and 31 were under church control or were considered to be primarily church-related.

¹See Appendix A for a sample questionnaire.

²See Appendix B for a Sample letter that accompanied the questionnaire.

³See Appendix C for list of colleges by state and by control.

⁴Colleges under a combination of local and state control were listed as being under state control.

For purposes of this particular study, a part-time student was defined as "a person who carries no less than one credit nor more than eleven credits."

Results of the Survey

Of the 395 colleges surveyed, usable questionnaires were returned by 131 (33.2%) community and junior colleges. Of these colleges, 113 (86.3% of all who returned questionnaires) were public institutions.

TABLE I

QUESTIONNAIRES RETURNED

(see page 4)

The questionnaire was divided into two major areas of concern: "Student Concern and Services" and "Nature of Part-time Student Body." Because many of the questions asked about the nature of the part-time student body resulted in answers primarily statistical in nature and in answers that may often have already been gathered in state and federal reports, it was felt that the area of greatest "new" interest and concern and of greatest immediate importance to colleges and universities was that of the colleges' concerns for and services provided to these part-time students. Therefore, this report will address itself to this perhaps more interesting section of the questionnaire and the results obtained from it.

The first question asked of responding colleges was, "Does the college deliberately recruit part-time students?" All 131 colleges

* Institutions under State control or under Local control.

replied, with 112 (85.5%) indicating that they did deliberately recruit part-time students. Among public colleges, 87.5% answered in the affirmative to this question, as did 75% of the private colleges, and all but one church-related college.

TABLE II

RECRUITMENT OF PART-TIME STUDENTS

Type of Institution	YES	%	NO	%
Public	98	87.5	15	78.9
Private	9	8.0	3	15.8
Church	5	4.5	1	5.3
TOTAL	112	100.0	19	100.0

A variety of recruiting methods were used, including: Speaking to civic groups, mailings, radio-TV advertisements, and newspaper advertisements.⁵ Newspaper advertisements were the most frequently used method (76.3%). Eighty percent (80%) of the public colleges used this method, as did 75% of the private colleges. Mailings were used by 72.5% of all the colleges, 67.9% used the approach of speaking to civic groups, and 61.1% used radio-TV advertisements.

TABLE III

METHODS USED FOR RECRUITING PART-TIME STUDENTS

(see page 6)

⁵ Other methods included: evening school catalogs, high school counselors, personal contacts, visits to various institutions, career days at industries, extension centers, brochures, symposia, quarterly area newsletters, posters, shopping center displays, church bulletins, and contacting community agencies.

TABLE III

In spite of the wide-spread use of some recruiting method or methods for the purpose of enrolling part-time students, scarcely one college in four (28.2%) used special brochures designed for the recruiting and informing of part-time students. Of the public colleges, 27.4% used such brochures, and 41.7% of the private schools used them. Surprisingly, in their various college catalogs or bulletins, less than half of all colleges (47.3%) reported that they devoted special sections to or included information of special interest to part-time students.

Colleges were asked what methods of registration were available to part-time students. As might be expected, 100% (130 of 131 colleges) of the schools that responded to this question provided registration at the college. A registration method of fair convenience to many part-time students, that of off-campus registration, was provided by 56.5% of all colleges and by 62.8% of the public colleges responding. However, what are probably the most convenient methods of registration for part-time students--mail and telephone--were markedly lacking. Whereas about two of five schools, (41.2%) did use registration by mail, a mere 15.3% used the telephone to register part-time students.

TABLE VI

REGISTRATION METHODS AVAILABLE TO PART-TIME STUDENTS

(see page 9)

The orientation of students to college and to college life has long been a widely accepted activity at American colleges, both 2-year and 4-year; in fact, schools seem to be constantly seeking better ways to orient their students to their particular institutions. Nevertheless, not even one school in five (17.6%) of all schools responding indicated that they provided special orientation programs for part-time students. However, of the 23 schools that did provide orientation sessions for part-time students, twenty (87%) offered such programs every term during the school year.

Anyone who has ever worked with part-time students quickly learns of the multiplicity of concerns and problems that accompany their college attendance (i.e., family, employment, community obligations, finances, etc.). Approximately half (50.4%) of all schools surveyed did provide special counseling services for part-time students; however, only 7% of all schools had counselors who only served part-time students (and only 4.4% of public colleges--where most of the part-time students attend--provided such counseling services). Some kind of counseling service was available for part-time students during the day at 73.3% of the schools, during the evening at 67.9% of the schools, and on weekends at 6.1% of the schools. Although the availability of counseling for part-time students was encouragingly high, the fact still remains that at one of every four schools, no counseling was available during the day or night.

An earlier study into the financial needs of part-time students⁶ had indicated that "part-time students do experience financial difficulty in attending college," and that "in many cases, it is essential to continuing or terminating (or at least delaying) one's realization of educational goals."⁷ In spite of this apparently considerable need for financial assistance, 82% of the 105 colleges

⁶Paul L. Kegel, "Financial Needs of the Part-Time Student at Worthington Community College," December, 1975.

⁷Ibid., p. 21.

who responded to this question, and 65.6% of all of the 131 colleges in the survey indicated that less than 50% of their part-time students received any financial aid; of the 105 schools answering this question 36.2%, or more than one school in three, and 29% of all 131 schools reported that less than 10% of all part-time students received some financial assistance. Only 19 schools reported that 50% or more of their part-time students received any such aid.

TABLE XI

PART-TIME STUDENTS RECEIVING FINANCIAL AID

(see page 14)

Less than one school in five (19.1%) had financial aids of some sort that were available exclusively to part-time students; 18.6% of public colleges provided such aid. Scholarships were available exclusively for part-time students at only 8.4% of all colleges, and 9.2% of the colleges provided grants that were exclusively for part-time students. Clearly, the financial needs of part-time students would not seem to have been met to any appreciable extent.

*Includes Federal Programs, BEOG, VA, Work-study, NDSL.

A great many part-time students, especially older women students, have small children; in many instances, some type of baby-sitting or day care service may be necessary or highly desirable in order for a part-time student to attend classes or take more than a minimal load of classes. In spite of the fairly obvious burden that small, usually pre-school age children place upon their college-attending parents, only one school in four (26%) provided some type of child care service and/or facilities for their part-time student-parents. Less than 5% (4.6) of all schools provided such a service evenings, a time when the majority of part-time students attend classes. Of course, a reasonable assumption here may be that, at least in two-parent families, one parent is home evenings while the other parent attends classes. However, the increasing number of single-parent families and the fact that a great many people work evenings would seem to indicate a greater need for evening child care services for part-time students. Finally, less than 1% of all schools provided any week-end child care services.

TABLE XIV

CHILD CARE SERVICES AND FACILITIES AVAILABLE TO PART-TIME STUDENTS

(see page 17)

If there was one single area in which colleges excelled at meeting the needs of their part-time students, it was that of making library facilities and services available. Library facilities were available to part-time students during the day at 98.5% of all colleges responding; during the evening, they were available at 96.2% of all colleges; and on weekends, library facilities were available at slightly over half 51.9% of all colleges responding. In this area, at least, it appears as if part-time students were

adequately provided for.

TABLE XV

AVAILABILITY OF LIBRARY FACILITIES TO PART-TIME STUDENTS

(see page 19)

Likewise, food services seemed to be available at a rather high level to part-time students. During the day, food services were available at 90.8% of all schools; evenings, 83.2% of the schools said some type of food services were available. However, on weekends, less than three schools in ten (28.2%) provided food services that part-time students could avail themselves of. Of course, it is quite likely that most schools in the survey did not operate a regular program of classes on weekends; hence, there probably was no need for weekend food services for any students.

TABLE XVI

AVAILABILITY OF FOOD SERVICES TO PART-TIME STUDENTS

(see page 20)

Most colleges fund student activities by means of some sort of activity fee. This fee may be included in the tuition⁸ or it may be a separate fee (either so much a credit or a set amount regardless of credit load). Of the 118 schools that answered this question, two of every three (67.8%) charged part-time students for an activity fee; at half of these schools (52.5%), off-campus students were charged an activity fee. What is encouraging from the viewpoint of the part-time students is that of the 95 colleges answering this question and 96.6% of the 88

⁸The Minnesota State Community College System charges so much tuition for each credit; each individual college may then determine how much of all monies collected will be allocated for student activities. Thus every student is, in effect, charged for student activities.

public colleges that answered this question said that such fees entitled part-time students to all the same benefits and opportunities to participate in student activities as full-time students. Some colleges provided an option in that part-time students did not need to pay the activity fee unless they wished to participate in some student activity or activities. In those cases in which there were no activity fees charged at all, part-time students could participate in activities the same as could full-time students.

However, at no college did the payment of the activity fee entitle part-time students to participate in intercollegiate athletics. Considering the fact that, typically, a large portion of each activity dollar is dedicated to intercollegiate athletics, colleges should probably give some thought to adjusting the amount part-time students are charged for the activity fee, or, on the other hand, allow part-time students to become involved in intercollegiate athletics.

In recent years, colleges have attempted to more fully include students in the governance of their respective institutions. However, this survey indicates that part-time students would not appear to have been included to any marked extent in community and junior college governance. For example, part-time students served on student committees at less than half (41.2%) of all colleges surveyed. At only slightly more than one school in four (27.3%) did part-time students serve on all-college committees. Although it is likely that many schools do not include any students on college advisory boards or committees, this survey indicated that at less than one school in four (22.1%) did part-time students regularly serve on such advisory boards.

TABLE XIX

PART-TIME STUDENTS INVOLVMENT IN COLLEGE GOVERNANCE

(see page 24)

Finally, colleges were asked to indicate in what ways part-time students were kept informed about college activities and events. A variety of methods were employed, including the college newspaper, bulletin boards, weekly bulletins, public address systems, campus television, student radio, local media all-college mailings, student handbooks, the faculty, class announcements, student bulletins, calendars of events, etc. Approximately half (48.9%) of all the colleges included in this survey utilized a combination of the college newspaper and all-college mailings as methods of keeping part-time students informed. However, it was quite clear from the survey results that very few colleges had or used specific informational apparatuses for part-time students. For example, only 2.3%

TABLE XIX

PART-TIME STUDENTS' INVOLVMENT IN COLLEGE GOVERNANCE

of all the colleges responding (and no public colleges are included in this figure) had a special bulletin board for part-time students; only 13.7% used all-college mailings specifically to inform part-time students; a mere 1.5% of all schools had a special newsletter for part-time students. In general, then, colleges did not appear to make any special efforts to keep part-time students informed, but instead relied upon the usual informational methods utilized for so-called regular (i.e., full-time) students.

CONCLUSION

If the information gathered in this study is indicative of what is generally true of community and junior colleges in the United States, then it appears that the part-time student is a welcome customer, but one who is definitely not accorded much attention or service by the institution he or she attends.

Colleges very avidly seek to enroll part-time students, employing a great variety of recruiting methods in their searches. Nevertheless, little special effort is expended in developing and using recruiting materials that are designed particularly with the part-time student in mind. In general, one might say that colleges expend as little time and effort as possible to recruit, enroll, and serve such students. Registration procedures are designed primarily for the convenience of full-time and day-time students. Once in the door and registered, the part-time student can depend upon little likelihood of receiving any formal orientation to college life, any special counseling help, any financial assistance, or care for his or her children while attending classes; further, he or she will very likely not play any appreciable role in the college's governance. Finally, he or she will probably be poorly informed at best about the things he or she needs or wants to know in order to have a reasonably satisfying experience in college. Little wonder that attrition rates are so very high among part-time students!

In those areas that cause the colleges the least effort, time, and money, services to part-time students are for the most part

quite acceptable. Library facilities and food services that must of necessity be available to full-time students are, apparently, quite equally available to part-time students. Similarly, colleges seem to be very fair in the administration of their charges for student activities: part-time students either do not pay or, if they pay, they are entitled to whatever advantages accrue to full-time students who pay the so-called activity fee--with the afore-mentioned⁹ exception that part-time students may not participate in intercollegiate athletics.

All of which suggests some steps that might be taken by community and junior colleges that value the presence of part-time students, that wish not only to attract them but additionally to retain them among their student bodies.

⁹pp. 18-24 of this report.

PROPOSED ACTION

Before any action may be taken by any college in order to better serve part-time students, it is absolutely imperative that a college be firmly committed to the belief that part-time students are an integral and valued segment of the total college student body. Colleges must agree that in every sense the part-time student is a first-class student who deserves to be viewed and treated at least as well as full-time students; in fact, the part-time student may even have to be accorded special treatment at times because of his or her special needs, problems, and concerns. With such a commitment firmly in mind, colleges should consider incorporating the following suggested steps for better serving their part-time students:

1. Develop special printed materials (brochures, sections of the college catalog, posters, advertisements, flyers, etc.) that address themselves particularly to the part-time student and his or her needs, concerns, and aspirations;
2. Design methods, times, and locations for registration according to the convenience of part-time students. In particular, colleges should consider registration by phone or mail, registration at the students' places of business, registration in convenient, heavily trafficked locations such as shopping centers, churches, downtown storefronts, courthouses or other municipal and public buildings, libraries, etc. The key here is to take registration to the students, not force the student to always have to come to the college in order to register. Similarly, registration times must include such "odd" hours as evenings and weekends. Materials for registration should be of a nature that they can be quickly and easily completed;
3. Orientation programs should be designed specifically for the part-time student, and address their special needs and concerns. Orientation sessions should be conveniently scheduled as to time and place, and should be provided every college term. It might be wise, too, to develop a pre-packaged orientation course that a part-time student might independently study if more formal "live" programs

- are unavailable or if a student is unable to attend the regular orientation sessions. At the least, part-time students should be included in the college's usual orientation programs; such programs then should be sure to include information of interest to part-time students;
4. Faculty members should be familiarized with data concerning the extent of part-time student enrollment at the college, and made aware of the special needs, problems, and concerns of such students;
 5. Counselors, too, must become fully aware of the presence of part-time students among the student body, and accept the fact that such students also need counseling, that such students have problems and concerns that deserve the professional help that the counseling staff may give them. Hopefully, counselors will view part-time students and their welfare as both a professional responsibility and challenge. Counselors, of course, will have to be assigned work schedules that will make them available to part-time students when such students are on campus and are able to avail themselves of such counseling services. Especially, this will mean that counselors will have to be on duty evenings and weekends if they are to meet the college's responsibility to these students;
 6. Financial aids offices will have to become more cognizant of the monetary needs of part-time students. They will not only have to find ways to acquaint part-time students with financial assistance presently available to them, but also to actively search for and develop new funding sources to help such students. Lack of sufficient funds may well be the single most important reason part-time students drop out of college or delay completion of their program of study; it behooves every college that values their part-time student enrollment to try to find the ways and means to ease or resolve the financial stress of part-time students;
 7. Child care services for part-time students are vitally important, particularly to women who wish to continue their educations. Either such services must be provided, at low cost or for free, by the colleges, or colleges must subsidize such care--directly to child care services in the community or directly to the parent-student in the form of increased financial aids. However, child care services are provided, it is advisable that they be provided as other services are provided; that is, for the student when the student needs such services: days, evenings, weekends;
 8. Part-time students must feel that they are in fact part of the college and important members of the student body. They should be urged to participate in college activities to whatever extent they desire and are able to participate. Naturally, then, college activities should not always be scheduled at the convenience of full-time students or so-called

"day" students, but at such hours and places as are also convenient for part-time students. Part-time students should be considered, at least proportionate to their numbers, for appointment to all college committees and boards;

9. A concerted effort should be made to keep part-time students informed about the college and about the matters of concern to them. A college newsletter directed to part-time students and their interests might be the best way to keep them informed and at the same time help these students feel they really are an important part of the college. Periodic mailings and special bulletin boards would also aid in this effort.

There undoubtedly are many additional and far more imaginative efforts that colleges might make in order to better serve their part-time students, but the important thing is to recognize the existence, worth, and needs of such students, and then to undertake an honest, committed, and ongoing effort to serve these students. Every student deserves the college's concern, but the part-time student appears to be long overdue for his or her share of that concern.

WORTHINGTON COMMUNITY COLLEGE

PART-TIME STUDENT SURVEY OF
TWO-YEAR COLLEGES: 1975-76

Please answer all questions:

I. Name of College _____ Year Established _____
Public _____ Private _____ Church-related _____
State Control _____ Local Control _____ Other _____; specify _____

II. Student Concern and Services

1. Does the college deliberately recruit part-time students? ___ Yes ___ No

If yes, indicate recruiting methods: Speak to civic groups _____
Mailings _____
Radio-TV ads _____
Newspaper Ads _____
Other; specify _____

2. Does the college have a special brochure(s) for recruiting part-time students? ___ Yes ___ No

If "no", does the college catalog/bulletin contain special sections or information for part-time students? ___ Yes ___ No

3. Part-time students may register: (check all appropriate answers)

At the college _____
By Telephone _____
By Mail _____
Off-campus locations _____

4. Is there a special orientation session(s) for part-time students?
___ Yes ___ No
Each Term? ___ Yes ___ No
Only in the fall? ___ Yes ___ No

5. Special counseling services exist for part-time students? ___ Yes ___ No
Counselors whose sole job is to serve part-time students? ___ Yes ___ No
Counselors to serve part-time students are on duty ___ day ___ night ___ weekends,

6. What percent of your part-time students are receiving some form of financial aids through the college? (include BEOS, NDSL, VA Benefits, etc.) _____ per cent.

7. Do you have any financial aids that are available only to part-time students? ___ Yes ___ No

If yes, check all that apply: Local Scholarships _____
Local Grants _____
Local Loans _____
College Employment _____
Other; specify _____

8. Do you provide day care facilities/service for children of part-time students? ___ Yes ___ No

	Yes	No
Days	_____	_____
Evenings	_____	_____
Weekends	_____	_____

9. Library facilities are available to part-time students? Yes No
 Days

--	--

 Evenings

--	--

 Weekends

--	--
10. Food Services are available to part-time students? Yes No
 Days

--	--

 Evenings

--	--

 Weekends

--	--
11. Are part-time students charged for an activity fee*? Yes No
 Do off-campus students pay this fee? Yes No
12. Does such an activity fee entitle part-time students to all the same benefits as full-time students? Yes No
 If "no", please explain differentiation _____

13. May part-time students participate in: Yes No
- | | | | |
|---------------------------|--|--|--|
| Musical groups | | | |
| Intramurals | | | |
| Publications | | | |
| Student Government | | | |
| Clubs | | | |
| Intercollegiate Athletics | | | |
| Drama | | | |
| Social Activities | | | |
| Other; _____ | | | |

14. Do part-time students regularly serve on: Yes No
- | | | | |
|-------------------------|--|--|--|
| Student Committees | | | |
| All-College Committees | | | |
| College Advisory Boards | | | |

15. How are part-time students kept informed about college activities? (Check all appropriate answers.)
- | | | | |
|--|--|--|--|
| College newspaper | | | |
| Special Part-time Student Newsletter | | | |
| Special Part-time Student Bulletin Board | | | |
| All-college mailings | | | |
| Other; specify _____ | | | |

III. Nature of Part-time Student Body

1. Total College enrollment (credit only), Fall Term, 1975:

	Male	Female	Total
Full-time			
Part-time			
Total			

2. Part-time enrollment is higher this year than last year Yes No
 Part-time enrollment is higher this year than 5 years ago Yes No

*Typically, such a fee is used to support athletics, clubs, Student government, musical activities, student publications, etc.

3. What per cent of your part-time students enrolled at your college for the first time ever, Fall Term, 1975? _____ per cent
4. Per cent of part-time students who attend classes: Days _____ %
Evenings _____ %
Weekends _____ %
5. What per cent of your part-time students are enrolled for:
Transfer programs _____ %
Occupational/terminal programs _____ %
Neither _____ %
6. What per cent of your part-time students are enrolled for:
Special interests _____ %
Job advancement or security _____ %
Retraining _____ %
Other; specify _____ %
7. What per cent of your part-time students are working for:
Degrees (AA or above) _____ %
Certificate* _____ %
No degree or certificate _____ %
8. What per cent of your part-time students already hold:
Degrees (AA or above) _____ %
Certificates _____ %
Other; specify _____ %
9. What is the average credit-load (for a single quarter or semester) for your part-time students?
- | Credits | Per cent |
|---------|----------|
| 1- 2 | _____ % |
| 3- 5 | _____ % |
| 6- 8 | _____ % |
| 9-11 | _____ % |
10. The average GPA of part-time students is (check one) _____ higher than, _____ lower than, _____ the same as that of full-time students.
11. What is the average age of your part-time students?
- | Age | Per cent |
|----------|----------|
| Under 18 | _____ % |
| 18-21 | _____ % |
| 22-24 | _____ % |
| 25-29 | _____ % |
| 30-40 | _____ % |
| 41-50 | _____ % |
| 51-60 | _____ % |
| Over 60 | _____ % |
12. What per cent of your part-time students are married? _____ %

*such as a 1-year LPN program, 10 month auto mechanics program, etc.

13. What per cent of your part-time students are veterans? _____ %
What per cent of your entire student body are veterans? _____ %

14. What per cent of your part-time students are employed? Per cent
full-time _____
part-time _____
Not at all _____

IV. If you have any comments you wish to make regarding this study and/or the nature and needs of part-time students at community/junior colleges, please use this space:

If you wish to have a copy of the results of this survey, please check _____.

Name of person completing questionnaire (optional) _____
Title _____

Thank you again for your help.

WORTHINGTON COMMUNITY COLLEGE
Worthington, MN 56187
507 372-2107

Dean of Students Office

February, 1976

Dear Dean of Students:

Part-time students are EVERYWHERE! But who are they? What are they like? What effect are they having on college programs? What are colleges doing about them?

If you are interested in finding the answers to these and other questions regarding the people who now nation-wide constitute the majority of community and junior college students, you can help by completing the accompanying questionnaire which is part of a nation-wide survey we are undertaking to learn more about part-time students.

Basically we are trying to identify more clearly the nature of part-time students, the extent to which they are participating in college programs, and the ways in which college services are responding to meet their various needs. We feel that this study is particularly important because to date there has been so little research done on the part-time student.

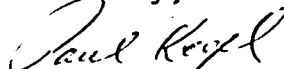

The questionnaire can usually be completed in 15 minutes (yes, we timed it). It has been sent to 390 of the nearly 1200 community and junior colleges in the United States. Results of this survey will be compiled and made available to every participating college which wishes a copy.

Please answer every question as accurately and completely as possible. Where exact statistics are not available, please estimate. Feel free to use the ample marginal space to add comments, explain answers, etc. For purposes of this study, a part-time student is defined as a person who carries no less than one credit nor more than eleven (11) credits.

A return-addressed, stamped envelope is enclosed for your convenience. We would appreciate it if you would return the questionnaire by February 27, 1976.

Thank you very much for your help and interest.

Sincerely,

Paul L. Kegel
Dean of Students
