Climatic Factors; Community Development; Construction Management; Demography; Economic Factors; Energy; · Health Conditions: *Housing: *Low Income: Sanitary

Facilities: Transportation

ABSTRACT

Between May 29 and June 12, 1976, the participants of the "Triad Operations Workshop: Training of Documentation Specialists for Low-Cost Housing Technology Programs" attended the Habitat Forum at Vancouver, Canada. During that period they had collected a number of documents from the various organizations and institutes that took part in the Forum. This annotated bibliography has been made as an attempt to disseminate the information acquired, and to complement a recently published "Provisional Annotated Bibliography on Low Cost Housing and Related Topics" prepared by the East-West Technology and Development Institute. Both bibliographies are designed to become the stepping stone for a continuous undertaking of updating all information relevant to the subject matter. Countries represented at the workshop were: Indonesia; India; Korea; Pakistan; Philippines; 'Thailand: Australia: and the United States. (Author/AP)

Documents acquired by ERIC include many informal unpublished * materials not available from other sources. ERIC makes every effort * * to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality * of the microfiche^and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by FDRS are the best that can be made from the original. *****************

FOREWORD

Cooperative bibliographic formation is one of several information sharing strategies being examined by the Institute's TRIAD project. In this particular TRIAD strategy we are researching the feasibility of producing compatible annotated bibliographies of documents available in a seven-country network of research teams working on problems of dising and settlements for low-income people. The annotated bibliography produced here is but an intermediate output of this effort. It makes one of the terminal performance objectives of Module no. 11 (Annotated Bibliography Preparation) of the TRIAD Operations Workshop which gathered information specialists from the network at the East-West Center, Honolulu and at the Habitat Forum, Vancouver, Canada between the dates May 24 to July 2, 1976.

Armed with the mutual experience of producing this annotated bibliography the information specialists have now returned me to undertake the arduoustask of assembling compatible bibliography of document holdings at their institutions. In due time these of try bibliographies will be shared among the network institutions and filly merged as a Union Catalogue of document holdings in the network.

A debt of gratitude is due Mr. Tjandra Mual m, Chief Documentalist, Regional Housing Center, Bandung, Indonesia who coordinated the daily document gathering forays of the Workshop participants at Habitat, Vancouver, Canada and spent his evenings sifting crough the voluminous documents choosing approximately 100 items that would be most valuable for low-income people. Mr. Mualim also coordinated the abstracting of the document collection by the members of the Workshop upon return to Honolulu.

The difficult task of transforming a stack of citation cards into this document fell to the able hands of Harriet Ashitomi, TDI Intern, who carefully checked all citations, revised them for uniformity of style and supervised typing and print production. Miss Ashitomi also cataloged the actual document collection and produced a microfiche copy of each document.

Special thanks also are due to Mrs. Marian Inouye, TDI Resource Materials Specialist and Mrs. Barbara Bird, TRIAD Consultant for overseeing this entire activity and to Zaigham Jaffery, TDI Intern for coordinating the development of the subject headings used in the Bibliography.

A complete microfiche set of the documents treated in this bibliography is scheduled for implacement in each network institution by January 1976. We have made no attempt to secure copyright release from any of the document publishers as we consider our plan for limited dissemination of microfiche (10 set total) as part of a TRIAD project information diffusion research activity. We invite any mublisher not willing to participate in this experimental activity to inform us to this effect and we will withdraw and destroy the microfiche master and all copies of the document in question. Microfiche sets are not for sale and each institution in the Low-Cost Hodsing Technology Network will receive only a single set.

Fred Burian Research Associate TRIAD Project Director

August 25, 1976 Hondlulu, Hawaii

PREFACE

Between May 29 and June 12, 1976, the participants of the "TRIAD Operations Workshop: Training of Documentation Specialists for Low-Cost Housing Technology Programs" attended the Habitat Forum at Vancouver, Canada. During that period they had collected a number of documents from the various organizations and institutes that took part in the Forum. This Annotated Bibliography has been made as an attempt to disseminate the information acquired.

It should be noted that the present collection does not pretend to be all-encompassing, nor does it claim to be authoritative in the subject matter: Housing and Settlements for Low-Income People. The present compilation is meant as a mere complement to the recently published Provisional Annotated Bibliography on Low-Cost Housing and Related Topics prepared by the East-West Technology and Development Institute. Moreover, both bibliographies are designed to become the stepping stone for a continuous undertaking of updating all information relevant to the subject matter, both printed and non-printed, which are and will be in the possession of the participating institutes of the Network on Low-Cost Housing Technology.

The materials are categorized according to 30 subject headings each of which, to avoid confusion and provide ease of classification, has been defined as well as its related areas enumerated. The classification is far from satisfactory nor complete, but is hopefully sufficient as a start.

The annotations were made by all of the 15 Workshop participants, as a part of their training, and as such may lack professionalism but certainly not credibility.

Tjandra Mualim Coordinator Habitat Forum Bibliography

SUBJECT HEADINGS: SCOPE/DEFINITION

NOTE: Subject headings include relevant bibliographies.

1 General

Material dealing generally with various aspects of human settlements for low income groups and general bibliographies.

2. Housing

Housing projects, housing statistics and surve, urban housing, low and moderate income housing, rental housing, public housing, case studies, feasibility studies and evaluation.

3. Housing Research :

Housing research, demonstration/experimental houses, model houses, expansible houses, demountable houses, emergency shelters, disaster housing, mobile homes and related research on the concepts, materials and design of new research in the field of housing.

4. Indigenous/Rural Housing

Rural and indigenous housing solutions, rural improvements, development of rural housing and other rural community facil-

5. Cooperative Housing

Management organization, economics/financing, case studies, and other topics related to cooperative housing. (See also Self-Help Construction.)

6. Self-Help Construction

Self-help, aided self-help, mutual help and all material on public participation, quality of life, mental, physical and public health considerations, and related topics dealing with the improvement of human settlements and their impact, organization, etc: (See also Social and Health Aspects.)

7. Construction Materials

Composition, properties, uses and research on construction materials, both indigenous and new, effects of climates and other natural factors (wind, earthquake, fire, etc.) on the materials.

8. Construction Methods and Management

Trends in building and housing construction industry, industrialized and prefab building, management, factor mix (labor/capital intensive), structural engineering, on site construction methods, prefabrication and other related topics, owner built housing, construction manuals and construction management topics,

9. Architectural Design

Design factors, architectural designs and concepts for low income groups, recreational and community facilities, traditional architecture, aesthetics, physical/site relationships and design for special groups (handicapped, working matters, aged, single persons workers, etc.).

10. Climatological Aspects

Climatic factors in the design of housing for low income groups, influence of climate on health environment building materials, topography and climate; comfort factors, ways and means of achieving this through current and indigenous solutions.

11. Housing Policies and Legal Aspects Sites and services, government subsidies, rent control, land use control, land reform, building codes, zoning, paralegal aspects, standards, national housing policies, etc.

12. Housing Management

Maintenance, modernization and conversion, repair internal rules, tenant relations contractual agreements, training of housing managers, and other aspects of housing management, especially as these concern low-income people.

13. Demographic Aspects

Population structures and profiles, population research, migration and other related topics, population, density-growth, family size, income and effect on housing, etc.

4. Social and Health Aspects

Social and health aspects of human settlements, ways, methods and concepts for their improvement, impact and case studies, etc. (See also Sanitary Engineering.)

15. Economic Aspects

Economic development, housing finance, feasibility studies, economics of housing and housing analysis, base studies, economic conditions, development forecasting, planning, policy, research, employment/income generation, etc. (See also Financing Methods.)

16. Financing Methods

Savings and loans, direct loans, property improvements loans, construction loans, amortization, mortgage and other methods/arrangements used to finance housing for/by low-income groups. (See also Economic Aspects.)

17. Ecological Aspects

Pollution (water, air, and land), ecological management and environment, as related to low-income human settlements...

18. Energy

Conventional and alternative, renewable and non-renewable sources of energy (direct solar, wind, tidal, muscle, bio-mass, geo-thermal, marine-thermal, fossil, atomic, etc.) conversion processes, and applications, especially as appropriate to the needs of low-income people. Also energy conservation, policies, natural resources, waste disposal and re-cycling.

19. Sanitary Engineering

Waste disposal, water supply, sewage disposal, drainage, and re-cycling waste, products, waste utilization as related to low-income settlements.

20. Urbanization

Growth of cities, rural-urban migration, urban sprawl, especially as these trends relate to low-income people.

21. Regional Planning

Macro/micro level planning, state/provincial planning, planning legislation, land use controls, industrial (location) policies and planning, planning for new and remote settlements, preservation of historical sites, etc.

22. Rural Planning

Planning specifically related to the improvement of human settlements in rural areas and their integration into the fabric of the region, province/state, and nation.

23. City Planning

City planning development growth, and management, metropolitan area planning, master plan studies and surveys, metropolitan/city level legislation, zoning, land use control municipal government, new towns, garden cities, satellite cities, model cities, planned communities, etc.

24. Community/Neighborhood Planning

Community/neighborhood level planning, urban renewal, slum clearance, and surveys. Planning of site residential areas, shipping, and business districts, institutional areas, community centers and planning legislation.

25. Education/Community
Development

Increasing the awareness of the community, technical assistance and education, community literacy, ways, means, methods, techniques, manuals for community development, home economics, community nutrition, community improvement projects, case and impact studies, surveys, etc. (See also Self-Help Construction.)

26. Squatters and Marginal Settlements

Slums, squatters, re-settlement schemes, slum clearance/improvement, or slum development and related case studies on low-income settlements.

27. Land Reclamation

Desert control, swamp, fill or drainage, terracing, and other techniques whereby land is made available for human settlements.

28. Appropriate Technology

Philosophy, concepts, and theories of the development and use of appropriate technologies.

29. Agricultural Development

Irrigation, agro-industry, agronomy, extension and training, production, farm management, and other topics as related to low-income settlements.

30. Traffic and Transportation

Traffic engineering/lay-out, and materials that affect housing and settlement of low-income people.

9. United Nations Conference on Human Settlements. Habitat facts. Vancouver: United Nations Conference on Human Settlements, 1976, 14 p.

Provides a brief general introduction to the visitor to the Habitat Conference. The first section presents background, reasons for Habitat, the all-encompassing importance of human settlements, the main objectives, and the participants. A distinction is made between the Habitat Forum of the Non-Governmental Organizations (NGOs): the programs of each are explained in separate sections. The dual role of Canada as host of, and chief participant in, Habitat is summarized. This document also contains data on the total cost of Habitat, the location of meeting rooms and events, the structure of the conference, etc. (A. McCullough)

 Stockholm: International Co-operative Housing Committee of the International Co-operative Alliance, 1976; 15 p.

This paper describes the cooperative housing in the United Kingdom, Germany, Denmark, Finland, Sweden, Poland and Czechoslovakia. (K.S. Súh)

- Cooperative Housing

The squatter problem in Zambia -- the need for self-help housing. The solution -- site and service scheme: (J. Grey)

- Self-Help Construction
- 2.. Shonga, B.W. and Thomas, N.E., eds. <u>Self-reliance in Zambia: the Zambia report of non-governmental organizations for Habitat</u>. Kitwe: Mindolo Ecumenical Foundation, 1976, 48 p.

An overview of the growth pattern of housing needs in Zambia and the efforts of the people to provide it through self-help methods. The conclusion states that to be self-reliant, people need resources, scope for their own initiatives, information and decision making power. Also gives recommendations for international and national concern and organization, including information on organizations that have taken part in development work. (Suparti)

- Self-Help Construction
- 3. United States. Department of Housing and Urban Development. Aided selfhelp housing: its history and potential. Washington, D.C.: Department of Housing and Urban Development, 1976, 50 p., bibl.

Consists of the overview and comprehensive survey on aided and cooperative self-help housing in several countries in South America, Africa and the U.S. particularly in financial and technical supports. Three projects in Chile, Zambia and California are samples cited and illustrated. (Y. Charuburana)

- Self-Help Construction
- Cooperative Housing
- 4. Unwin, Richard. The story of self-help enterprises: a history of self-help housing in the San Joaquin Valley. Visalia, Calif.: Self-Help Enterprises, 1976, 29 p.

Organization and projects of Self-Help Enterprises, from initiation of rural home building projects by the American Friends Service Committee through its expansion and development over more than 10 years. The philosophy and concepts of self-help are explained, and the phases of the housing process are described: finding and organizing participants, educational meetings to familiarize participants with financial and other aspects, and the actual home-building process. Such problems as land acquisition and securing loans and grants which were encountered are discussed. Sources of financial support are mentioned for each project, and a table of funding sources is provided. Innovations and experimentation aimed at providing time and labor saving methods of construction are noted in addition to off-shoot and associated programs offering employment and skills training. Progress report; update to 1976 and mailing address are included. (B. Ryan)

HOUSING POLICIES AND LEGAL ASPECTS

1. Boyer M. Christine, ed. Uneven development patterns among human settlements: an analysis of the public record and recommendations by six regional pre-Habitat conferences. Washington, D.C.: Kettering Foundation, n.d., 43 p.

Reports of regional pre-Habitat conferences held at six universities which were selected by the U.S. Department of State with the purpose of providing forum for public debate around the issues of national growth and human formation of the United States policy vis-a-vis the United Nations Conference on Human Settlements. (Y. Charuburana)

- Housing Policies and Legal Aspects
- Social and Health Aspects
- 2. Franklin, Herbert M.; Osman, John; and Rivkin, Malcolm D. A critique of the president's 1976 report on national growth and development. Washington, D.C.: Kettering, Foundation, 1976, 22 p.

The National Forum on Growth Policy is an organization of 25 American agencies which believes that the federal government must plan and coordinate national growth and development. They criticize President Ford's 1976 Report on National Growth and Development for three basic reasons.

- (1) it does not contain recommended national goals, policy or programs
 - it lacks a theoretical framework to interpret the meaning of analytical information
- (3) it fails to clearly articulate its assumptions and define its

They argue that the 1978 report should evaluate and recommend new institutions to improve the process of policy development, with maximum participation by public and private sector interests. (A. McCullough)

- Housing Policies and Legal Aspects
- Germany (Democratic Republic). Ministry for Building Construction. Habitat DDR. (trilingual). Berlin: Ministry for Building Construction, 1976, 141 p.

Discussion of current housing policy, town and settlement planning, land use, and construction activity in the German Democratic Republic: Sociopolitical and economic conditions in the republic are explored and a summary of the program for future housing construction and development presented. (B. McKinley)

- Housing Policies and Legal Aspects
- Regional Planning

LEGAL ASPECTS

4. Germany (Federal Republic). Ministry for Regional Planning, Building and Urban Development. National report of the Federal Republic of Germany.

Bonn: Ministry for Regional Planning, Building and Urban Development, 1976, 102 p.

The official English version of the Federal Republic of Germany's national report submitted at the U.N. Conference on Human Settlements, comprising regional settlement and urban development legislation, transportation systems, and settlement structure. (T. Mualim)

 - Regional Planning
- 5. Grimes, Orville F., Jr. Housing without frills: an overview of housing for Low-income urban families: economics and policy in the developing world.

 Washington, D.C.: World Bank, 1976, 5 p.

The paper deals with the study of housing policy options among urban planners and policymakers in developing countries. The focus is on housing that low-income families can afford. (N. Jayaraman)

- Housing Policies and Legal Aspects
- '- Economic Aspects
- 6. International Dévelopment Conference. <u>To shelter humanity: a symposium on world housing needs and environment.</u> Washington, D.C.: American University, 1975, 60 p.

Summaries of papers and panel discussion reports presented at the symposium reflecting the views of well-known scientists on various aspects and problems on human settlements, meant as a prelude to the U.N. Conference on Human Settlements. New answers to questions arising from ethical and political imperatives, social and psychological factors, environmental considerations and population questions. (For a complete report of the symposium and selected responses contact Director, World Human Needs Program, School of International Service, The American University, Washington, D.C. 20016, U.S.A.) (Suparti)

+ Housing Policies and Legal Aspects + Economic Aspects

HOUSING POLICIES AND LEGAL ASPECTS

Leaf Rapids Development Corporation, Ltd. Leaf Rapids Manitoba: a bold new concept for community development. Winnipeg, Canada: Leaf Rapids Development Corporation, Ltd., n.d., 18 p.

This report concerns the planning and development of a new mining town in northern Canada; Leaf Rapids, Manitoba. In July 1971, the Manitoba Government created the Leaf Rapids Development Corporation, Ltd., in charge of planning; development, and initial management of the new community. In the development of new northern towns, a number of elements—social, natural, economic, and cultural—are critical to the creation of a stable living environment. (R. Guioguio)

- Housing Polices and Legal Aspects

Muller, Fred; Trapman, lan; and Foque, Pichard. Inhabiting a finite but equitable world. The Hague: Ministry of Housing and Physical Planning, 1976, 69 p., bibl.

This book examines "the prospects of providing housing in a world in which prosperity is fairly shared, natural resources are conserved and the integrity of the environment is maintained." The project was carried out by the Academy of Architecture, Rotterdam, Holland. The study is based on 5 major pronouncements and on two principles: (1) it is highly desirable for human beings to ensure that their world can continue to exist; and (2) the available resources should be equitably distributed. The major purpose of the study was to provide an insight into the housing problem and to show that "we can successfully inhabit a finite but equitable world." (Z. Jaffery)

- Housing Policies and Legal Aspects
- Ecological Aspects

Rao, B. Bhaskara. Housing: 2000 A.D.; a long-range perspective for India. (abstract). n.p.: n. pub., 1975, 11 p.

The study on "Housing-2000 A.D." contains a discussion on the current housing situation in India. The projections of housing needs, housing subsidies, manpower, building materials and other related subjects are discussed. (N. Jayaraman)

- Housing Policies and Legal Aspects

HOUSING POLICIES AND LEGAL ASPECTS

10. United Kingdom. Department of the Environment. As good as new: housing and area improvement policy in the United Kingdom. London: Department of the Environment, 1976, 32 p., bibl.

The paper explains policies for improving older houses and their surrounding environment in the United Kingdom. The main body of the paper deals with analysis of the problem, aims of the policy, measures taken, and evaluation of the results and conclusions. (N. Jayaraman)

- Housing Policies and Legal Aspects
- 11. United Kingdom. Department of the Environment. National statement of
 United Kingdom to the United Nations Conference on Human Settlements.

 London Department of the Environment, 1976, 10 p.

This paper describes the practical experiences of the environmental problems of urbanization in U.K.:

- 1. new planning of environment
- 2. policy of renewal and rehabilitation
- building on a human scale in the city (K.S. Suh)
- Housing Policies and Legal Aspects
- 12. United States. Agency for International Development. Preparing a national housing bolicy. Washington, D.C.: Agency for International Development, 1974, 42 p., bibl.

Stresses the importance to a developing country of a comprehensive national housing policy. Presents the overall framework within which a comprehensive national housing policy statement can be developed. (B. Phoonchai)

- Housing Policies and Legal Aspects
- 13. Yeung, Yue-man. Location of housing for urban development plans in Southeast

 Asia. Ottawa: International Development Research Centre, 1976, 17 p.,

Views the provision of housing in Southeast Asian cities which should be related to the socio-economic conditions of societies at large. Points out that many urban development plans neglect the location factor. It further discusses land availability which the author regards as being a critical factor in the development of low-cost housing. The paper also touches on the physical properties of the location such as topography, height of water table, exposure to strong winds, intensity of sunshine and rainfall, liability to flooding, and availability of ground water. Due alteration is also recommended to be given to socio-economic guidelines: priorities in screening applications. (T. Mualim)

- Housing Policie's and Legal Aspects

- Climatological Aspects

DEMOGRAPHIC ASPECTS

1. Engel; Randy. A pro-life report on population growth and the American future. n.p.: n.pub., 1972, 54 p.

The report presents background information on the Commission on Population Growth and the American Future. In light of this federal report the goals, programs, and resources of the Population Control Movement are presented. (B. McKinley)

- Demographic Aspects
- 2. International Planned Parenthood Federation. <u>Population</u>. London: International Planned Parenthood Federation, 1973, 39 p.

Aims at assisting the study of the history and future trends of population growth and its impact on individual and family welfare, national, social and economic development. Includes sources of information on population, food supplies, education, urbanization and housing. (T. Mualim)

- Demographic Aspects
- Social and Health Aspects

World Population Society. Population factors and human settlements needs notes and projections. n.p.: World Population Society, n.d., 9 p.;

This paper deals with notes and projections on population factors and human settlements needs prepared by World Population Society. Projections for rural and urban population growth for countries of Asia, Africa and Latin America with 1970 populations over 1,000,000 under three assumptions of family size are dealt with. (N. Jayaraman)

1. Griffiths, Nan. Women in the urban environment: proceedings of National Workshop on the Concerns of Women in Shaping the Urban Environment;
October 15-17, 1975, Ottawa Hull. (English and French texts). Ottawa-Hull: National Capital Commission, 1975, 88 p., bibl.

The rationale for the workshop, its objectives and results are stated in a brief summary: Background information regarding circumstances often found in contemporary urban environments which are particularly detrimental to the well-being of women, and ill-suited to evolving social patterns and lifestyles. Three need groups are identified: sole support parents; senior citizens; women in two-parent families. Delineation of specific problems encountered by each of these groups in urban situations, especially with respect to inadequate physical design of housing, etc., is followed by a series of related planning recommendations and proposals. A final section is entitled, "Strategies and Suggestions for Improving Women's Input into the Planning Process." Appendices are a list of workshop participants and resource people, and a tatalogue of position papers and reports from participants. (B. Ryan)

ECONOMIC ASPECTS

Canadian Real Estate Association. A statement, for Habitat. (trilingual).
 Toronto: Canadian Real Estate Association, n.d., 6 p.

There are two basic themes in this document. The first is that Canadians, with their high standard of living, will not be able "to fully comprehend the appalling plight of the Third World." On this point, it is hoped that attention can be focused on these problems so that they will be alleviated. The second theme is a statement that Canada's housing needs can best be met by the operation of the unregulated market economy; government intervention should be limited to policies which enhance the operation of the free market. (A. McCullough)

- Economic Aspects
- 2. Echeverria, Luis. <u>Human settlements in Mexico: message from President Luis</u>
 Echeverria. Mexico: n. pub., 1976, 19 p.

Calls for increasing efforts to solve the interrelated problems of conservation, high population growth and food scarcity. Emphasizes that inequitable development, both international and intra-national, must be eliminated; since economic exploitation has caused many of the roblems that confront us today. Points out that physical and spatial planning must take into account socio-economic considerations in order to improve human settlements and to satisfy social needs and aspirations. Envisions the need for a new International Economic Order and pledges Mexico's participation in international collaborative efforts. Mexico's policies and programs are presented in summary form. (A. McCullough)

- 3. INECO. The management of the environmental system: a policy for habitat. Rome: INECO, 1976, 12 p.

Problems of planning, management and control of the natural environment at the national level are considered, with reference to local, regional and international concerns. The four components of the "environmental system" are defined as: social, economic, natural environment, and their policy aspects. The example of Italy is used to provide background, and a case is made for the management of territory on a national scale, Discussions of the cost of environmental resources and the depletion of and protection of natural resources lead to the conclusion that planning should start from an analysis of the natural environment, letting the three other components of the environmental system determine optimal parameters. The relationship between social and environmental systems is noted, and a statement is made that the man-built environment should be treated with the natural environment as a resource. In considering the planning process and the environmental system, policy and environmental models are seen as methods of achieving the goals which are determined by each country. (B. Ryan)

- 3. Reyes Navarro, Carlos and Sordo Cedeño, José Ramón. Planning criteria and strategies for human settlements in Mexico. Mexico: Instituto Interdisciplinario de Planeacion Urbano-Regional, 1976, 18 p.

Mexico is offered as an example of a human settlements problem situation and solutions are proposed to 'percolate up' through local, regional and national incentives. A history is given of the development of Mexico City as a single, physically interior, national center of urbanization industrialization, employment, population, and cultural and educational activity. This has been encouraged by centralized government and transportation systems. Mexico's problems of development are related to uneven distribution of population in relation to natural resources. new trend toward spontaneous development of peripheral regions, stimulated by the growing importance of agriculture, petroleum, and tourism, is noted. It is suggested that, to avoid further migration to a single urban center; this trend should be encouraged. National goals are set A scheme for the development of 'confederations of cities' suggets the formation of cohesive regions composed of smaller interdependent cities, each emphasizing unique development (in agriculture, industry, education, etc.), linked by a rapid transit bystem. It is noted that political, socio-cultural, and economic development must be coordinated. (B. Ryan)

- 3. Netherlands. Ministry of Housing and Physical Planning. The rules of physical planning in the Netherlands. The Hague: Ministry of Housing and Physical Planning, n.d., 33 p.

Several brief definitions of physical planning are offered, and the relationship between physical planning research and policy is noted by way of introduction to a comprehensive outline of the legislation and organization of physical planning within the system of administration of the Netherlands. Historical development of government concern with national physical planning is sketched. The Netherlands' system is described as consisting of three hierarchical levels: State: Provinces and Municipalities. Within each level, 'departments' are organized around specific areas of interest. Responsibilities of the administrative bodies of each level are clearly defined, as are the formal roles' and relationships among them. Channels of citizen participation in planning are evident. The legal planning instruments at the disposal of the administrative bodies are described. It is emphasized that the aim of physical planning legislation is to coordinate policy decisions among the hierarchical levels. The procedures through which this can occur are the subject of publication. (B. Ryan)

- Land Reclamation
- 4. Yeomans, P.A. The Australian Keyline plan for the enrichment of human settlements. Matraville, Australia: Murray Valley Development League, 1976, 53 p., bibl.

Yeomans makes here an impassioned appeal to participants of Habitat Forum to consider as a basis for land use planning the "Australian Keyline Plan" which he has been developing and experimenting with for 30 years. In brief, the keyline approach is a method of siting the water collection ditches and storage reservoirs in a landscape which is dictated by the topography of the site. The result, when transport corridors are also added in consonance with the land forms, is a skeletal frame on which the pattern of human settlements can most advantageously be sited. The keyline approach also includes the creation of deep soil. (100-150 cm) forests through which urban effluent would be land treated and purified for safe re-use further down stream. Finally, the Keyline includes techniques for avoiding salt build up in irrigated soil and for very rapid transformation of subsoil into fertile soil (20 inches added in 18 months!). The author notes that the trend of the biosphere since life first evolved, has been the continual enrichment of the planet. He asserts that the keyline approach promises to make human settlements over from a threat to this enrichment process into its most effective instrument. (J. Morgan)

TRAFFIC AND TRANSPORTATION

1. Banque Mondiale. Transports urbains: politique sectorielle. (French text). Washington, D.C.: Banque Mondiale, 1975, 118 p.

Recounts the transportation situation in urban areas of developing countries as it is today, talks of the problems from population growth and the resource and fund constraints. It details policy measures to effect the urban transport of access control. Subsidies for mass transit and coordinated approaches to urban transport are considered. The experiences and position of the World Bank in support of investment programs in urban transport are given. The Bank's investment plans in this sector in the 1975-79 five-year period are outlined. (J. Morgan)

- Traffic and Transportation
- Italian Art and Landscape Foundation. <u>More streets for people</u>. New York: Italian Art and Landscape Foundation, n.d., 119 p., bibl.

Emphasis is laid on the urgent need to establish pedestrian precincts within the most congested areas of the world's cities. Examples of several major world cities are given. The book is full of evocative drawings and photographs, and is jointly authored by well-known experts on environmental engineering and urban planning such as Lewis Mumford, Bernard Rudofsky, Saul Steinberg, etc. (T. Mualim)

- 3. National Council of Social Service: People and their settlements: aspects of housing, transport and strategic planning in the U.K. London:
 Bedford Square Press, 1976, 107 p.

Papers presented at the conference held in London in January 1976, organized by the National Council of Social Service on behalf of voluntary organizations as a contribution to the Habitat Forum, Vancouver, June 1976. The conference focused on participation in Settlement planning in the U.K. Debate was concentrated within three areas --housing, transport and strategic planning. (B. Phoonchai)

TRAFFIC AND TRANSPORTATION

4. Thompson, Greg. Light rapid transit: a description and definition; a background report for the livable region 1976/1986. Vancouver: Greater Vancouver Regional District, 1975, 20 p.

This booklet explains the concepts behind light rapid transit — i.e. a modern version of the old street car. Many photographs show the variety of vehicle designs and techniques of integration of LRT lanes with traffic and pedestrian areas in European cities. LRT is presented as an intermediate solution between simple buses (with the congestion delays and pollution associated with them) and "conventional rapid transit" (with expensive, heavy engineering and right of way costs). LRT moves people fast, takes relatively little space (as little as a 20 ft. way for both directions), involves lower capital costs than rapid transit, is silent and produces little pollution, and is found to be congenial in pedestrain ways. The report was prepared to clarify what the LRT system proposed for the Greater Vancouver Regional District would look like. (J. Morgan)

- Traffic and Transportation

5. World Bank. Rush-hour background information. Washington, D.C.: World Bank, 1976, 19 p.

Includes two documents produced by the World Bank's "Singapore Traffic Restraint Study": (1) Watson, Peter L. and Edward P. Holland, "Congestion Pricing -- The Example of Singapore," reprinted from Finance and Development, (n.d.), and (2) "Interim Report -- Impacts of the Area License Scheme on Work Trips to the Restricted Zone." These articles report on Singapore's experiment with an "area licensing" scheme. The idea is that access to the highest congestion area of the city (c. 2mi²) requires a special license during the morning rush hour. The license costs U.S. \$60/month. Complementary strategies also implemented include a park and ride scheme with shuttle buses running into the restricted zone from parking lots at the perimeter. Buses and commercial vehicles are exempted, as are car pools (4+ people) and motorcycles. Implementation (in May, 1975) went smoothly, thanks to careful planning, phasing, and publicity. Overall the policy is called a success. The number of vehicles entering the zone during the hours of operation was cut by 40%. Problems encountered are noted. The second paper presents an interim report on travel behavior change due to the scheme. Data were gathered from a sample survey on some 200 households. The analysis suggests that great reduction in the number of cars entering the restricted area is due to a modest modal shift and a considerable spreading of the morning peak. (J. Morgan)

THE EAST-WEST CENTER is a national educational institution established in Hawaii by the United States Congress in 1960. Its purpose is to promote better relations and understanding between the United States and the nations of Asia and the Pacific area through cooperative study, training, and research. Since 1975, the Center has been administered by a public, nonprofit educational corporation, officially known as the "Center for Cultural and Technical Interchange Between East and West, Inc." An international Board of Governors consisting of distinguished scholars, business leaders, and public servants guides Center policies.

Each year more than 1,500 men and women from more than 60 nations and dependencies in the region participate in Center programs that seek cooperative solutions to problems of mutual consequence to East and West. Working in research and development projects with the Center's multidisciplinary and multicultural staff, participants include visiting scholars and researchers; leaders, policymakers, and other professionals; and graduate degree students, most of whom are also enrolled at the University of Hawaii. For each Center participant from the United States, two participants are sought from the Asian-Pacific area.

Center programs are conducted by five institutes addressing problems of communication, culture learning, food, population, and technology and development. A limited number of open grants are awarded each year for degree education and innovative research in areas not encompassed by institute programs.

The U.S. Congress provides basic funding for Center programs and a variety of awards to participants. Because of the cooperative nature of Center programs, financial support and cost-sharing are also sought from Asian and Pacific governments, public and private sectors, and individuals. The Center campus is on land adjacent to and provided by the University of Hawaii.
