ABSTRACT

This compilation of approximately two hundred twenty-five document resumes provides educators with abstracts of research, instructional, and other materials in vocational and technical education, and abstracts of funded research and development proposals. The resumes are arranged in ascending order according to an ED (ERIC Document) accession number, with each resume including the author(s), title, institutional source, sponsoring agency, availability, publication date, number of pages, subject terms which characterize the contents of the document, and a document abstract. Subject, author, and institutional source indexes are provided. Availability information includes microfiche and hard copy prices from the ERIC Document Reproduction Service (EDRS). The section on projects in progress contains fifteen resumes announcing ongoing curriculum development and research projects funded by the Vocational Amendments of 1968, parts C, D, I, and J. Included for each are title, principal investigator, recipient institution, start-end dates, supporting agency, contract and/or control number, and a brief project summary. Projects are listed by state, and names and addresses are provided for both individuals and institutions. (BL)

 * Documents acquired by ERIC include many informal unpublished *
 * materials not available from other sources. ERIC makes every effort *
 * to obtain the best copy available. Nevertheless, items of marginal *
 * reproducibility are often encountered and this affects the quality *
 * of the microfiche and hardcopy reproductions ERIC makes available *
 * via the ERIC Document Reproduction Service (EDRS). EDRS is not *
 * responsible for the quality of the original document. Reproductions *
 * supplied by EDRS are the best that can be made from the original. *

Foreword

Finding available information is a major task for researchers, curriculum specialists, teachers, administrators, and students. The Center for Vocational Education is dedicated to helping others find useful information.

Resources in Vocational Education is prepared bimonthly by the staff of the AIM/ARM Project under a contract with the U.S. Office of Education, Bureau of Occupational and Adult Education. Included are abstracts of research, instructional and other materials in vocational and technical education, and abstracts of funded proposals. The full text of most documents announced in *Resources in Vocational Education* is available in microfiche or hard copy from the ERIC Document Reproduction Service (EDRS). Microfiche also is available in local ERIC microfiche collections.

We appreciate the contributions of state research coordinating units, curriculum coordination centers, instructional materials laboratories, local school systems, colleges and universities, and professional associations. Members of the profession are encouraged to send instructional and research material for possible inclusion in future issues of *Resources in Vocational Education*.

Robert E. Taylor, Director

Occupational Training Plans for Disadvantaged and Handicapped Students in Vocational Education: A Manual for Use in Cooperative Work Experience Programs.

Indiana Univ., Bloomington. School of Education. Spons. Agency—Indiana State Board of Vocational and Technical Education, Indianapolis; Indiana State Dept. of Public Instruction, Indianapolis. Div. of Vocational Education.

Pub Date—Jul 76.

Note—253p.

EDRS Price MF-\$0.83 HC-\$14.05 Plus Postage.

Descriptors—*Cooperative Programs, *Disadvantaged Groups, Disadvantaged Youth, *Handicapped Students, Instructional Programs, Job Training, Models, On the Job Training, Program Development, *Program Guides, Program Planning, *School Industry Relationship, Unskilled Occupations, *Vocational Education, *Work Experience Programs

This manual, developed to provide vocational instructors or coordinators with model training plans to be used to conduct concurrent work and education programs for disadvantaged and handicapped students, has the purposes of: (1) serving as a description of the kinds of content that should be included in a training plan, (2) serving as an example in discussing training plans with employers, (3) assisting vocational instructors in developing training plans, and (4) serving as one source of occupational content for several common occupations. Each training plan, or occupation, identifies the target population. The format shows approximate time needed to learn the job skill; a list of learning activities, on-the-job training needed, in-school time needed, and spaces for evaluation and for the individual study assignment. The training plans include

assembly line worker, automobile-service-station attendant, bus boy, carpenter's helper, cook helper, dishwasher, general farm hand, general housekeeper, grocery cashier, laundry worker, lawnmower repairman, machinist helper, mail clerk, physical therapy aide, steam table server, and stock clerk. The Changing Climate Toward Occupational Regulation: How Does It Affect Cosmetology Board Members?

Pub Date—26 Apr 76

Note—10p. Speech presented at the Annual Meeting of the Western Regional Conference of State Boards of Cosmetology (Boise, Idaho, April 26, 1976).

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage.

Descriptors—*Certification, *Cosmetology, Employment Qualifications, *Governing Boards, Letters (Correspondence), *Organizational Change, Organizational Climate, Public Opinion, Service Occupations, Service Workers, *State Licensing Boards, Vocational Education

This document contains two letters. The first letter, which might have been written by a cosmetology licensing board member to his mother, illustrates the changing climate toward occupational regulations and how it might affect the attitudes of

a board member. The second letter, the mother's reply, attempts to put some of the changes into a broader perspective. (HD)

Factors Related to the Success of New Mexico Vocational Agriculture Teachers as FFA Advisors: Summary of Research.

Ohio State Univ., Columbus. Dept. of Agricultural Education.

Pub Date—76

Note—21p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage.

Descriptors—Agricultural Education, Educational Research, *Faculty Advisors, State Surveys, Success Factors, *Teacher Characteristics, *Vocational Agriculture Teachers, Vocational Education, *Youth Clubs, Youth Leaders

Identifiers—FFA, Future Farmers of America, New Mexico

This study was designed to (1) identify competencies in which a New Mexico vocational agriculture teacher's perceived level of proficiency was related to the degree of success of his Future Farmers of America (FFA) chapter, (2) identify characteristics possessed by New Mexico vocational agriculture teachers which showed a significant relationship between that characteristic and the degree of success of the teacher's FFA chapter, and (3) identify characteristics possessed by New Mexico vocational agriculture teachers which showed a significant relationship between that characteristic and the teacher's perceived level of proficiency in advising and supervising FFA activities. The variables used for investigation were selected from a review of literature and were those thought to be related to the degree of success of an advisor's FFA chapter. This document contains the methodology, summary of findings, conclusions and recommendations, and implications for teacher education programs in the field of agricultural education and for further research. It also contains references and the questionnaire used. (HD)

The Hemophilia Games: An Experiment in Health Education Planning.

National Heart and Lung Inst. (DHEW/PHS), Bethesda, Md.

Report No.—DHEW-NIH-76-977

Pub Date—76

Note—94p.

Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (\$2.00)

EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage.

Descriptors—*Delivery Systems, *Game Theory, Health Education, *Models, Program Development, *Program Planning, *Simulation, Special Health Problems

Identifiers—*Hemophilia

The Hemophilia Health Education Planning Project was designed to (1) create a set of tools useful in hemophilia planning and education, and (2) create a planning model for other diseases with similar factors. The project used the game-simulations technique which was felt to be particularly applicable to hemophilia health problems, since as a planning

tool, games offer an opportunity to examine alternative forms of social organization, resource allocation, and distribution of decisionmaking power. A brief description of the project is presented in two major sections, Hemophilia Health Care Planning and Education: A Gaming Approach, and The Planning Process in Perspective: Major Recommendations. Appendix A, representing the major part of the document (55 pages), presents the complete record of the project proceedings, and is categorized into three parts: Hemophilia Health Planning Project-Project Design Protocol; Hemophilia Planning Meetings; and Outline of Planning Sessions, the largest part, which is a slightly condensed description of each of the hemophilia games, with full instructions given to the players, and the players' responses. Appendix B is a five-page glossary of terms. (HD)

SREB's Nursing Curriculum Project: Summary and Recommendations.

Southern Regional Education Board, Atlanta, Ga. Nursing Curriculum Project.

Spons Agency—Kellogg Foundation, Battle Creek, Mich.

Pub Date—76

Note—21p. For related documents see ED 090 843, ED 097 849, CE 008 525-526, and CE 008 776

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage.

Descriptors—Conceptual Schemes, *Curriculum Development, *Educational Change, Educational Development, *Educational Planning, Health Education, Higher Education, *Nursing, Paramedical Occupations, Program Evaluation

This manual reports the summary and conclusions of the series "Pathway to Practice," the Nursing Curriculum Project conducted by the Southern Regional Education Board (SREB). The project's aims, procedures and methods, and specific findings are identified, followed by a discussion of ten recommendations concerned with implications for the nursing curriculum. Recommendations cover the areas of differentiation of workers, common base of knowledge, levels of knowledge, Associate Degree curriculum, the Baccalaureate curriculum, the graduate program, continuing education, accommodating the learners, transcending institutional boundaries, and transcending disciplinary boundaries. The conclusion points out that if the Nursing Curriculum Project as a whole has a single message, it is that nursing must firmly reject its old image of simple dependency and substitute a true image of its complexity and dependability. Descriptors—*Academic Standards, Conceptual Schemes, Curriculum Development, Higher Education, *Job Skills, *Nursing, Paramedical Occupations, *Role Perception, *Systems Analysis, *Systems Development, Taxonomy

This fourth volume in the series "Pathways to Practice" presents the heart of the Southern Regional Education Board's Nursing Curriculum Project, which was designed to (1) develop a set of assumptions about societal systems that impinge on the environments of nursing; (2) determine broadly the future direction of health care delivery patterns; (3) determine the types and levels of nurses essential to the delivery system projected in the assumptions; (4) determine the characteristics of practice and thereby the competencies needed by each level and type of nurse provider envisioned; and (5) broadly define the body of nursing knowledge requisite for the development of the specified competencies in the graduate of differing programs. The five chapters cover: (1) Nursing at the Crossroads: The Dilemmas, (2) Nursing: A Critical Subsystem in Health Care, (3) A Role Structure for Nursing: Kinds and Levels of Practice, (4) A Taxonomy of Nursing Competencies, and (5) An Overview of the Theoretical Framework. Appendix A (Core of Nursing Knowledge) presents characteristics of entry level positions in the nursing field; appendix B is a five-page chart of expanded role programs in nursing in the Southern Region and lists institutions (by state), program title, length of program, degree received, and the director. A roster of members contributing to the project and references are also included. (HD)

 Identifiers—United States

A study was conducted to enhance basic knowledge concerning the activities and needs of curriculum developers with emphasis on those relating to vocational education. More than 300 persons actively involved in curriculum development in public education, business and industry, and government responded to a questionnaire based upon a list of 68 curriculum development activities in five categories: (1) Curriculum management and administration, (2) selection and organization of content, (3) selection and organization of materials, (4) design of instructional plan and alternative strategies, and (5) evaluation of curriculum. Ratings were given for the degree of problem/need encountered in the performance of each activity, and the relative importance of each to the respondent's job. In addition, background data were obtained from each respondent. In analyzing the data, the importance and problem/need ratings provided by respondents were combined to produce a summary "criticality" score for each activity. For the respondent group taken as a whole, the most critical activities were found to be in the categories of curriculum management and administration, content selection and organization, and evaluation. Eight groups of related activities were also identified, with differing criticalities for curriculum developers in local, state, and national R & D lab situations. (Author/HD)

Half of this paper is the text of a lecture, based on the author's involvement in a study by the Committee on Vocational Education Research and Development (R & D). Focus is on the summary of the study's recommendations in three areas: (1) Administration of vocational education R & D, (2) the content of vocational education R & D, and (3) the impact of vocational education R & D, which the author indicates is the most difficult to assess. He notes that vocational education researchers have not done well in disseminating research knowledge and in helping people become aware of the importance of the R & D effort that produced the knowledge. The second half of the paper consists of the author's answers to 16 questions from the audience concerning various aspects of future research and development efforts. (HD)

Business/Industry Internship for Occupational Teachers Project: Final Report.

Southern Illinois Univ., Carbondale.

Spons. Agency—Illinois State Office of Education, Springfield, Div. of Adult Vocational and Technical Education.

Report No.—PCE-A6-028

Pub Date—15 Aug 76

Note—52p.

EDRS Price MF\$0.83 HC\$3.50 Plus Postage.

Descriptors—Cooperative Programs, *Internship Programs, Models, Professional Continuing Education, *Program Effectiveness, Program Evaluation, *School Industry Relationship, Teacher Education, *Teacher Improvement, *Teacher Interns, Teacher Participation
 Identifiers—Illinois

After refining the Illinois Model for Occupational Teacher Internship, 20 practicing occupational teachers in public schools field tested the model to determine the nature and value of the concept of business/industry internships. Some major findings from data on intern evaluations revealed that (1) the internship provided an educationally meaningful experience, (2) understanding of their field was enhanced through learning about job attitudes and expectations, and experience with new equipment, (3) personnel at the work sites were willing and able to provide needed assistance, and (4) time to accomplish the internship was difficult to find. Evaluations from employers were positive, indicating that the interns sought out activities and were satisfied by their performance as professionals seeking to attain skills for later use in the classroom. It was concluded that the Illinois Model was acceptable in terms of transportability and diffusion. Suggestions and recommendations are made concerning teacher awareness of opportunities for internships in industry, and the part that schools and universities should play in such efforts. The appendixes contain various examples of forms and correspondence used in the study. (HD)

Descriptors—*Educational Administration, Educational Research, Graduate Students, *Graduate Study, Higher Education, Job Skills, Models, *Performance Based Education, Professional Training, *Program Administration, *Program Development, Program Evaluation, *Vocational Education

Phase IV of the project entitled Occupational Education Administration Project (OEAP) presents the results of a comprehensive assessment to evaluate the effects of OEAP with respect to achievement and subsequent administrative performance of participating students. (OEAP, as a total project, was designed to (1) field test the model performance-based Occupational Education Administration Program under typical graduate education conditions, (2) write and refine affective performance indicators, (3) conduct followup and reevaluation of the identified occupational education administration performance statements, (4) provide all program participants with the education necessary to obtain Illinois Level I Administrative Endorsement for Certification and (5) place program participants in occupational education administration

tive positions commensurate with their acquired abilities and credentials by a specified date.) It was concluded that a great deal of learning did occur during participation in OEAP and that OEAP alumni exited the project with substantial cognitive and affective proficiency in the 159 competencies which comprise the Occupational Education Administrator's professional role. The document includes further discussion of project conclusions, and suggestions for further research. Appendix A, Occupational Education Administration Project: Competency List with Cognitive and Affective Sample Indicators, covers the majority of the document (78 pages). Four additional appendices provide other information related to OEAP. (HD)

Carter, David M. And Others

Tasks: Essential to Successful Performance as a Tobacco Producer. Summary of Research.

Ohio State Univ., Columbus. Dept. of Agricultural Education.

Pub. Date—76

Note—19p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage.

Descriptors—*Agricultural Production, *Agricultural Skills, *Farm Management, Farm Occupations, Job Analysis, *Job Skills, Occupational Information, Occupational Surveys, State Surveys, *Task Analysis, *Tobacco, Vocational Agriculture

Identifiers—Ohio

The major purpose of the occupational survey was to identify the skills which are performed and essential for success for a tobacco producer. The specific objectives of this survey were: (1) develop and validate an initial task inventory for the tobacco producer, (2) identify the specific tasks performed by the tobacco producer, and (3) determine the relative importance of the specific tasks to successful employment as a tobacco producer. Procedures included constructing an initial task inventory, validating the initial inventory, selecting a sample of workers, collecting data, and analyzing data from 32 producers in Ohio. The 134 task statements were listed under eight duty areas: (1) liming and fertilizing tobacco crops, (2) controlling weeds, insects, and diseases, (3) establishing and maintaining tobacco plant beds, (4) setting tobacco, (5) topping and controlling suckers, (6) harvesting and transporting tobacco to storage, (7) housing tobacco, and (8) tying, marketing, and shipping tobacco. Half of this report consists of the list of tasks in each duty area followed by the percentage of the sample which performs that task and the average rating of importance for that task (on a scale of 1-3). Identifiers—Michigan

Designed to assist in the planning of statewide

programs of vocational agriculture in Michigan, this report is also intended to assist local educators, administrators, and concerned citizens in planning needed vocational agriculture programs in Career Education Planning Districts. Procedures and findings are presented of a comprehensive analysis of Michigan agricultural education programs and their relationships to agricultural manpower needs and job competency requirements on a statewide basis. Information is presented in the following categories. (1) Agricultural manpower needs primarily for Michigan vocational agricultural graduates over a 5-year period (1974-1979); (2) competencies needed by Michigan vocational agriculture graduates to enter various agricultural occupations; (3) typical characteristics of vocational agricultural programs in Michigan; (4) congruencies and differences in existing vocational agriculture programs in terms of jobs available, career patterns, competencies required for entry, and competencies being developed in present programs; and (5) recommendations for further study and related activities. Data is organized under the following occupational categories: agricultural production agricultural supplies/services, agricultural mechanics, agricultural products, ornamental horticulture, agricultural resources, forestry, and other. Descriptors—Educational Trends, *Handicapped, Higher Education, *Job Skills, Professional Personnel, *Professional Training, School Personnel, Special Education, Special Education Teachers, *Staff Improvement, *Teacher Education, Teachers, Teaching Workshops, Teaching Models, *Vocational Education

This report describes a workshop designed and implemented as a team effort by teachers from the vocational education and special education departments at the University of Illinois and the University of Kansas. It is noted that activities at the workshop revolved around meeting the unique needs of ten university-state department teams in developing and/or expanding their programs. In addition, to being useful to vocational and special educators interested in the personnel preparation process, this report is also designed for use by those individuals in local educational agencies who have the responsibility for staff development and inservice education. Part I describes the presentations and activities of the workshop, pre-workshop planning, and post-workshop followup. An evaluation of each of these major phases is also included. Part II is a description and analysis of the professional tasks which were identified as critical for personnel involved in vocational programming for special needs students. The personnel preparation models prepared by the ten attending teams are included in Part III. A list of participants, bibliography, and 11 appendixes (relating to the workshop and special education) are included. (HD)

Descriptors—*Computer Oriented Programs, Human Resources, Job Skills, *Manpower Utilization, Manuals, Military Personnel, *Program Administration, *Task Analysis, Technical Reports

Identifiers—CODAP, Comprehensive Occupational Data Analysis Programs, *Marine Corps, United States

Designed to aid in the orientation of personnel newly assigned to the Office of Manpower Utilization (OMU), Marine Corps Headquarters, this manual provides a brief overview of Marine Corps Task Analysis (TA) by presenting the basic steps in this process, which are (1) construct a task inventory, (2) administer self-report inventory, (3) analyze, using the Comprehensive Occupational Data Analysis Programs (CODAP), (4) recommend solutions to identified problems, and (5) secure approval of recommendations. OMU's major goal of improving the utilization of human resources in the Marine Corps is discussed, and the way the staff is organ-

ized to accomplish this is presented. Appendixes provide brief descriptions of TA terms and a synopsis of CODAP used to define jobs in an occupational field. (Author/HD)

Descriptors—Employment, Employment Opportunities, *Income, Labor Force, *Labor Market, *Labor Supply, Leisure Time, Males, *Mathematical Models, Tax Rates, Unemployment, Wages

Identifiers—Income Taxes

This paper discusses discrepancies between the observable labor market and the idealized world which is assumed in theory. The proposed solutions are focused on the development of an empirical model applicable to data on prime-age males from the Michigan Panel Study of Income Dynamics, but the author notes that many of these issues are relevant for the construction of models for other groups. The discussion covers five basic areas: (1) The potential limitations of the simple labor supply model, based only on income-leisure tradeoffs, are discussed. (2) Sources of randomness in observed labor supply behavior and its consequences for the stimulation of systematic labor supply responses are considered, and the intertemporal variation are discussed. (3) The model is extended to accommodate earnings opportunities other than a simple constant wage rate, with increasing marginal income tax rates and overtime premiums being the major factors considered. (4) Demand-related factors that prevent workers from achieving marginal equilibrium at their marginal wage rates are explored, and criteria are suggested for the selection of a sample of workers who are less seriously affected by these problems. (5) The treatment of time lost due to unemployment and illness is discussed in the context of a model developed by Samuel Rea, which is also applied to time spent commuting to work. (Author/HD)

Identifiers—Michigan

This manual contains a tabular report of the competency identification of job task analysis component (Part-Two) of the research project, entitled "Agribusiness and Natural Resources Education in Michigan: Employment Demand, Competencies Required, and Recommended Delivery Systems." The data is a tabular supplement to Chapter III of the final report. Lists of several hundred validated tasks or competencies are compiled into 100 tables providing information for use in developing performance objectives, instructional modules, or evaluation procedures related to 22 different occupations in the following four occupational clusters: agricultural production, environmental horticulture, farm implement repair, and biological-technical services in agriculture. Tables are arranged in seven different sets or series on the basis of similar information for each of the occupations/industries in the group. A complete analysis of one occupation can be made by use of one table of each series. (HD)

The Earnings Gap Between Women and Men.

Women's Bureau (DOL), Washington, D.C.

Pub Date—76

Note—15p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage.

Descriptors—Comparative Analysis, Educational Background, *Females, Income, *Males, Occupations, Professional Occupations, Racial Differences, *Salary Differentials, Tables (Data), Wages Identifiers—United States

Differences between the earnings of men and women suggest that women are being paid less for doing the same job. Factors that attribute to the wage differences are (1) women are concentrated in those occupations which are less skilled and in which wages are relatively low, (2) women working on full-time schedules tend to work less overtime than men, (3) although women are as well educated as their male counterparts in terms of median years of schooling completed, there are differences in the kinds of education, training, and counseling they receive, which directs them into traditional and low-paying jobs, and (4) women on the average have fewer years of worklife experience than men. Studies have shown, however, that even after adjusting for some of these and other factors such as age, region, and industrial concentration, much of the male-female earnings differential remains unexplained representing a maximum measure of discrimination. Discussion of wage differences is covered in the topics (1) Occupational Status, (2) Educational Attainment, (3) Work Experience, (4) Overtime Work, and (5) Differentials by Race. Eight tables, covering half the document, show different comparative aspects of male and female earnings. (WL)

Designed to contribute to planners' understand-

ing of the state of the art and to the improvement of health manpower planning, this monograph describes and evaluates various methods used to determine present and future health manpower supply and requirements. The methodologies presented, chosen after a review of the documents identified in the Inventory of Health Manpower Planning Activities of 1973 in the Bureau of Health Manpower, are considered to be practical with regard to the resources available to state and local health planners. This first volume provides an analytical perspective, the definition of terms, the factors that determine supply and requirements, the concepts that underlie each methodological approach, and the uses and limitations of health manpower statistics within the context of the subject area. A second volume is a manual that describes the methodology step-by-step. (WL)

Descriptors—Educational Programs, *Employer Attitudes, Employment Practices, Employment Statistics, *Graduates, *Job Skills, *Program Effectiveness, Program Improvement, Research, State Programs, State Surveys, *Vocational Education, *Work Attitudes
Identifiers—*Ohio

With the overall objective of gathering information concerning employer's attitudes, perceptions, and opinions of Ohio's vocational education program, along with insights as to the strengths and weaknesses of the program and how it might be improved to more fully meet the needs of Ohio employers, mail questionnaires were sent to the personnel departments of 1,000 firms randomly selected from the "Directory of Ohio Manufacturers." The sample included both employers who utilize and those who do not utilize vocational education graduates. The five basic types of question sets developed to provide the data base were attitude questions, attribute importance questions, employee rating questions, open-ended questions, and classification questions. After gathering the data, the attitudinal statements, rankings of employee attributes, and ratings of vocational education and other graduates on each employee attribute were analyzed first for the total sample of 251 respondents and then for individual employer classification variables such as size of firm, percentage of employees who are vocational education graduates, and types of employees utilized. Results showed that attitudes toward and perceptions of vocational education were, in general, quite favorable. Percentages of agreement on some key statements were (1) about 60%—experience with vocational education graduates has been quite favorable, (2) 76%—vocational education students should be given more practical experience in their training; (3) 13%—vocational education students are poorly trained in school, (4) 74%—vocational education needs to have an improved image, and (5) 73%—I would like to know more about this State's vocational education program. This report contains complete explanations of the objectives, research methodology, results, conclusions, and recommendations. (WL)

Transfer and Use of Training Technology in Air Force Technical Training: A Model to Guide Training Development. Final Report.

Human Resources Research Organization, Alexandria, Va.

Spons Agency—Air Force Office of Scientific Research, Washington, D.C.

Report No.—HumRROR-ED-76-43

Pub Date—Oct 76

Contract—F44620-74-C-0007

Note—58p.

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage.
Descriptors—Aerospace Education, *Curriculum Development, Educational Environment, Instructional Technology, Military Training, *Models, *Program Development, *Technical Education, Training Techniques
Identifiers—Air Force, United States

This guide describes the final stage in a project to develop an Air Force technical training development model and presents the model. Chapter 1 summarizes the total project and its objective to facilitate the effective use of training technology through the development of a model for matching training approaches or innovations with specific training settings. Chapter 2 summarizes the final phase in which researchers selected six different training efforts at three different schools of applied aerospace science and observed the work of Air Force training developers, closely interacting with them and discussing the nature and problems of the training development process. Chapter 3 describes revision of the previously developed model on the basis of this research. Chapter 4 presents suggestions for use of the model noting critical factors in a training setting and comparing the model (AF-TEC) with the MODIA system. Chapter 5 (half of the guide) presents the model in its two phases. Phase I, intended to be used early in the process of planning and developing a training program, e.g., developing the lists of tasks and blocking out the major sections of the training course (Major head-

ings are Objectives, Resources, Instructional Design and Management, Instructional Personnel, Student Characteristics, and Training Content), and Phase II, to be used in the actual development of the course when the detailed decisions are made concerning learning activities of the students: the preparation of a plan of instruction, study guides, workbooks, lesson plans, etc. (Major headings are: Instructional Personnel, Student Characteristics, and Training Content). Women Workers Today.

Women's Bureau (DOL), Washington, D.C.

Pub Date—Oct-76

Note—14p.

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage.

Descriptors—*Employment Statistics, *Family Characteristics, *Individual Characteristics, Labor Force, *Working Women

Identifiers—United States

This report indicates that although during the last 55 years the ranks of women workers have risen from only one out of five to two out of five of all workers, the profile of the average woman worker has greatly changed from that of a 28-year-old single factory worker or clerk of 1920 to that of a 35-year-old woman of today who may be found in any of a great number of occupations. It is noted that women accounted for nearly three-fifths of the increase in the civilian labor force in the last decade. Statistical profiles for women represent the majority of document and are presented for two characteristics: (1) Personal characteristics—age, marital status, children, education, minority races, and husband income and (2) employment characteristics—which cover worklife patterns, full-time and full-year workers, part-time workers, occupations, unemployment, earnings, working wives' contributions to family income, and family heads. A brief statement on the outlook of women workers is included. (WL)

Descriptors—Academic Achievement, *American Indians, *Career Education, *Career Planning, Class Attendance, Cultural Differences, Cultural Factors, Disadvantaged Youth, Dropout Attitudes, *Educational Needs, Human Resources, Motivation Techniques, Occupational Guidance, *Program Effectiveness, Program Evaluation, Reading Level, Secondary Education, Self Actualization, Student Alienation, Student Attitudes, *Student Motivation, Tables (Data), Tribes, Truancy, Vocational Counseling, Youth Problems

Identifiers—Colorado

Initial research conducted by the Colorado River Indian Tribes Rehabilitation Center revealed that lack of career information available to Indian youth, lack of Indian student direction and motivation, and resultant low academic achievement inadequately prepared these students for the world of work. Consequently, a new program (involving seminars, field trips, individual and group counseling, and follow-up counseling) for the provision and dissemination of career information was designed which included eight specific objectives. To test the effectiveness of the program objectives, a research design was established which used one treatment group and six control groups (composed of Indian and non-Indian youth) matched according to grade, sex, age, I.Q., and achievement. Highlights of significant findings are these: (1) There was increased awareness of services offered by the Colorado River Indian Tribes and of how school problems may be related to cultural factors, and a general impression that Indian students' attitudes toward school were much improved, (2) a significant reduction in school dropouts, (3) significant improvement in vocational awareness, (4) increased motivation toward future vocational opportunities, (5) reduced contacts with the law, (6) increased awareness of future employers, and (7) exposure to successfully employed Indians and Tribal members. The five papers included in this monograph represent an attempt on the part of the Office of Career Education to clarify differences between career education and vocational education. The first paper, "Everyone's Favorite Solution Can't Be All Bad—A Reply to James O'Toole," rebuts O'Toole's seven charges against vocational education. The second paper is "Career Education, Vocational Education, and Occupational Education: An Approach to Defining Differences." Concepts of work, career, vocation, occupation, leisure, and education are defined as they relate to career, vocational, and occupational education. Implications for change in vocational education in the academic setting are also discussed. The third paper, "Career Education and Work Experience Education: Can We Join Together?" discusses implications of the career education concept for work experience educators. "Business Office Occupations and Distributive Education: Keys to Career Education," the fourth paper, suggests ways in which business and office occupations and distributive education teachers could move to convert both academic teachers and vocational educators into "career educators." The fifth paper, "Career Education, Strategies and Dilemmas," summarizes the current status of career education and discusses basic attitudinal problems facing it. (TA)

Identifiers—Worker Traits Arrangement

This training unit provides persons involved in employment interviewing, vocational counseling, curriculum planning, and other manpower activities with a multifactor approach for obtaining information from an individual and relating the data to job requirements. It is intended to result in the development of the bridge between client potential and experience and the requirements of jobs, particularly for clients who need to make occupational or career choices or changes. The unit contains two training sessions (which include activities requiring use of the Dictionary of Occupational Titles—Volumes I, II, and the two supplements, Handbook for Analyzing Jobs, and Guide for Relating General Educational Development to Career Planning.)

and three appendixes. Session I, Application of Worker Traits to Client Appraisal, outlines techniques for obtaining information from the client in terms of worker traits, and requires participants to practice developing worker traits profiles for the clients in the case histories provided. Session II, Utilization of Worker Traits Arrangement (WTA) in Formulating Vocational Goals, outlines techniques and procedures for relating data about the client to appropriate career areas of specific occupations. It contains a step-by-step procedure for relating the client data profile to the profile of job requirements for the WTA group(s), and other activities. Appendix A contains practice exercises, appendix B contains an introduction to worker traits, and Orientation to Worker Traits Arrangement (WTA) is provided in appendix C. (TA)

Designed to apply to any unit regardless of strength, mission, organization, or equipment, this field manual provides trainers with methods and techniques of preparing and conducting individual

and collective training. Chapter I discusses the purpose and scope of this publication and explains the duties and relationship between the trainer (for whom this manual was written) and the training manager. Chapter 2 discusses the purpose of training. Chapter 3 describes a three-step, backward-planning process to prepare, conduct, and evaluate training of individuals to perform their duty assignment. Chapter 4 is an introduction to collective training, which prepares soldiers to perform those team or unit tasks essential to the accomplishment of a unit's operational missions. Chapter 5 offers examples which show company level trainers how the fundamentals of collective training are used to prepare and conduct equipment-oriented collective training. Chapter 6 deals with tactical collective training. The eight appendices include: Training Publications; Practical Exercises in Writing Training Objectives; Training Techniques, Aids, and Devices; Evaluating (Inspecting) Training; Tactical Exercises; Training Trainers to Train, Sample Lesson Plans; and an Index and Glossary of Training Terms. Legal Provisions on Expanded Functions for Dental Hygienists and Assistants. Summarized by State, Second Edition.
Health Resources Administration (DHEW/PHS), Bethesda, Md. Div. of Dentistry
Report No.—DHEW-HRA-75-21
Pub. Date—74.
Note—201p.

Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

EDRS Price MF-\$0.83 HC-\$11.37 Plus Postage.
Descriptors—*Dental Assistants, *Dental Hygienists, Dental Technicians, *Employment Qualifications, National Norms, *State Legislation, *State Licensing Boards, *State Standards Identifiers—United States

This second edition summarizes and interprets from the pertinent documents of each state, those provisions which establish and regulate the tasks of hygienists and assistants, with special attention given to expanded functions. Information is updated for all jurisdictions through the end of 1973, based chiefly on materials received in response to inquiries to State boards of dentistry. Although the most relevant and significant portions of the state dental laws were selected for summation and interpretation, every effort was made to retain or closely paraphrase the original text or, when it seemed appropriate, to quote directly. The National Summary section, consisting of five tables and a map, gives a composite picture of the status of expanded functions for dental auxiliaries on a nationwide basis, as these existed at the end of 1973. Education Teachers

Addressed to professional teacher educators or inservice administrators, this guide introduces a set of curriculum materials designed to train the potential vocational education curriculum specialist (VECS) according to identified competencies in the conceptualization, design, implementation, management, and evaluation of vocational-technical education curriculums. The guide briefly describes the history and development, purpose, organization, major features, and techniques for implementing the competency-based curriculum, which consists of 22 modules. 6 introductory modules to bring students with minimal preparation in vocational education to readiness for training in a core program; 15 core modules, which constitute specialization units in curriculum and program design, development, implementation, management, and evaluation; and an additional module containing two seminars and a field experience unit that provides opportunities for advanced professional application of the core competencies. The chapter headings of the guide are (1) The VECS Curriculum, (Development Cycle, Topics and Sequence, and Features of the Modules), (2) Administrative Considerations (Needs, Compatibility, Key Support, Initial Planning, and Installation), (3) Instructor Considerations (Instructional Strategies and Recommendations to the Instructor), and (4) Evaluation of the VECS (Institutional Level Evaluation, Instructional Level Evaluation, and Learning Experience Level Evaluation). The appendix briefly describes the content of each module followed by the goals and objectives on which the module is based. (HD)

One of six introductory modules in a 22-module series designed to train vocational education curriculum specialists (VECS), this guide is intended for use by both instructor and student in a variety of education environments, including independent study, team teaching, seminars, and workshops, as well as in more conventional classroom settings. The guide has five major sections. Part I, Organization and Administration, contains an overview and rationale, educational goals and performance objectives, recommended learning materials, and suggested reference materials. Part II, Content and Study Activities, contains the content outline arranged by goals. Study activities for each goal and its corresponding objectives follow each section of the content outline. Content focus is on historical, legal, and present definitions of vocational education, its fundamental concepts and basic objectives, the people served, and financial support. Part III, Group and Classroom Activities, suggests classroom or group activities and discussion questions keyed to specific content in the outline and to specific materials in the list of references. Part IV, Student Self-Check, contains questions directly related to the goals and objectives of the module, which may be used as a pretest or posttest or as a periodic self-check for students in determining their own

progress throughout the module. Part V, Appendix, contains suggested responses to the study activities from part II and responses to the student self-checks. (The preface indicates that approximately 20 hours of out-of-class study will be necessary to complete this module). (HD)

Descriptors—Administrator Guides, *Community Health Services, Demonstration Programs, Health Needs, *Medical Care Evaluation, Medical Services, Models, *Needs Assessment, *Program Planning, *Research Projects
Identifiers—Massachusetts (Boston)

Designed for health services planners and decisionmakers on the local level, this guide describes and explains a relatively low-cost short-term approach by which communities can estimate their needs for ambulatory health care services, determine the adequacy of resources to meet those needs, and understand major factors for improving ambulatory health care service delivery. The guide is one product of a demonstration study of ambulatory health care needs, resources, and priorities conducted in Boston, Massachusetts. Part One discusses the Boston study and briefly describes the basic approach presented in terms of its selection, limitations, and how it can be implemented. Part Two is a detailed description of the basic approach which involves a study comparing the actual use made of ambulatory care visits against use which would be expected from national and prepaid plan utilization experience. Explanations are provided for each of the 17 steps involved in conducting the six phases of the study. Part Three addresses things to consider in conducting the study, such as sources of information, potential problems and how to deal with them, and cost. Five appendixes are included: Data Needs and Availability Summary Chart, Listing of Tables Included in the Boston Study, Sample of Parts of Tables Used to Determine Use of Medical Services in Boston, Sample Neighborhood Profile, and Sample Scheduling and Staffing Needs and Cost Worksheet. Identifiers—Illinois, Indiana, Iowa, Michigan, Minnesota, Ohio, Wisconsin

This comparative study was conducted for the Wisconsin Advisory Council on Vocational Education in an effort to identify strengths and weaknesses of program delivery and accomplishments of several States—Illinois, Indiana, Iowa, Michigan, Minnesota, and Ohio—with a view towards making recommendations that would improve Wisconsin's total program approach and delivery. Methodology

involved gathering, compiling, and analyzing data from Federal report forms, and from interviews and information gathered from the appropriate State departments. Some of the major goals accomplished by the study were the identification of the clientele and the degree to which they are served by vocational education and placed on jobs in each State; the determination of expenditures for vocational education and the sources of these funds; the identification of State and local structures that accomplish the delivery of vocational education in each State; and the determination of programs and procedures for vocational education personnel development and ways in which vocational education is reaching those in need. Fourteen council recommendations precede the description and discussion of the study, which is presented in six chapters: (1) Background of the Study, (2) Vocational Education Student Enrollments and Placement-Follow-up Activities; (3) Funding For Vocational Education in the Midwest; (4) State and Local Structures Effecting Vocational Education Delivery; (5) Career Education, and (6) Teachers, Teacher Education, and Certification. The appendixes include 40 items about each State's organizational and administrative functions, educational delivery systems, and teacher certification requirements. (HD)

Descriptors—*Adult Basic Education, Basic Skills, *Correctional Education, Corrective Institutions, Educational Programs, Job Skills, Needs Assessment, *Prisoners, *Program Attitudes, *Program Effectiveness, Program Evaluation, Research, Skill Development, *Vocational Education

In an effort to better achieve the educational program objectives of developing specific salable skills, and developing skills leading to the General Education Development completion, 321 male and 23 female offenders enrolled in adult basic education, general education development, and vocational courses in Pennsylvania's eight State institutions were evaluated concerning their attitudes towards the quality of instruction and educational services offered. (The eight institutions are Camp Hill, Dallas, Graterford, Greensburg, Huntingdon, Muncy, Pittsburgh, and Rockview.) After analyzing data collected from two forms (Educational Evaluation Form and the Training Survey) completed by the subjects, it was generally concluded that the lack of resource materials and some supportive services (i.e. limited library materials and counseling services) is a problem. However, offenders have positive values and attitudes toward the education programs in terms of entering, opportunity, benefits, and self-reliance. The document presents 18 specific conclusions and discusses four institutional recommendations. Twenty-four tables supplement the discussion of the study, and brief descriptions of each institution's educational program are also provided. (WL)

Designed to assist teachers in improving instruction in agriculture and related areas, this curriculum guide is written in terms of student performance using measurable objectives, and is a suggested method of group instruction for students who are employed in an agribusiness program. The material is intended to cover those items which every student will most likely encounter in an agribusiness occupation. Areas of instruction are divided into seven sections, with each section consisting of one or more units. Each unit includes performance objectives, suggested activities for teacher and students, information sheets, assignment sheets, job sheets, visual aids, tests, and test answers. The sections are Employment Information, which includes units on Orientation, Training Agreement, and Organizations; Human Relations in Agribusiness; Selling and Salesmanship; Advertising; Marketing Agricultural Products; Operational Information, which includes Agribusiness Machines, Sales Procedures and Records, and Merchandise Control; and Agribusiness Management, which includes Credit Analysis and Management, Insurance, Tax Management, and Legal Aspects of Agribusiness. Descriptors—Curriculum, Curriculum Guides, *Driver Education, Emergency Programs, *Emergency Squad Personnel, Fire Fighters, First Aid, *Job Training, *Learning Activities, Manuals, Medical Services, Motor Vehicles, Police, *Rescue, Service Occupations, Skill Development, State Curriculum Guides, Vocational Education Identifiers—Virginia

Developed in response to the need for training and materials related to emergency vehicle operations, this guide is designed to aid in the implementation of recruit, inservice, or specialized training for an emergency vehicle operator. Following the introduction, an overall discussion of material to be covered in the classroom is provided. After the classroom instruction section, the guide is divided into three sections on practical application—law enforcement, fire, and emergency medical services—which present the different driving skills needed by the employees of these three agencies, due to the variations in vehicle characteristics and intended uses. Each of these three sections is self-contained, designed to be used in conjunction with the classroom instruction section. All three practical application chapters—law enforcement, fire, and emergency medical services—include specific details regarding the actual maneuvers to be performed on the driving range, illustrations indicating the general physical layout of each exercise, guides for grading procedures, and common student problems of which the instructor should be aware. In the final chapter, procedures for physically setting up an emergency vehicle operation curriculum. (EVOC)

program are described. Also included are a glossary of important terms, and a bibliography of texts, pamphlets, films, and other references. Driver evaluation forms are provided in Appendix. (WL)

Descriptors—Employment, *Employment Opportunities, *Employment Qualifications, *Employment Trends, *High School Graduates, Job Training, *Occupational Information

This document lists 61 occupations, each followed by a summary which gives highlights of job qualifications and training and employment trends (1974-1985) from the "Occupational Outlook Handbook." It is noted that special talents, attitudes, and personal characteristics not mentioned in this publication may be needed for many occupations and that suggestions for employment opportunities reflect conditions foreseen over the 1974-1985 period for the entire nation, for any single year or any specific locality. The number of people employed in each occupation in 1974 is also included. The 61 occupations are listed under the following broader categories: Industrial production and related occupations (foundry, machining, printing; and other); office occupations (clerical, banking, insurance, administrative); service occupations (cleaning, protective services, and other services); sales occupations (automobile, automobile service, insurance, models, real estate, and wholesale trade); construction occupations; occupations in transportation activities; scientific and technical occupations; mechanics and repairers; health occupations (dental, medical technologist, and other); and art, design, and communications-related occupations. Descriptors—*Behavioral Objectives, Elementary Education, Elementary School Curriculum, *Industrial Arts, Intermediate Grades

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, *North Carolina

This listing of behavioral objectives is designed to assist teachers in planning and developing learning activities in elementary industrial arts. It was developed from a project in Bertie County, North Carolina, in which industrial arts was correlated with the basic elementary curriculum. Separate behavioral objectives are presented for special education students and those in kindergarten through eighth grade. These objectives cover the following major areas: Manufacturing, Power, Transportation, Construction, and Communication. (Author/HD)

Descriptors—*Curriculum Development, Elementary Secondary Education, *Field Experience Programs, Higher Education, Instructional Materials, Instructional Programs, *Internship Programs, Learning Modules, Post Secondary Education, Specialists, Study Guides, Teacher Education, *Teacher Seminars, *Vocational Education

This seminars and field experience module is a part of a set of 22 modules designed to train vocational education curriculum specialists (VECS). It contains three sections: Seminar I, Authority Roles and the Curriculum Specialist in Vocational Education; Seminar II, Leadership Styles and Functions of the Curriculum Specialist in Vocational Education, and section three, a field experience (internship) program. Both Seminar I and Seminar II contain three headings: (1) Organization and Administration, which includes guidelines for using the seminar, overview and rationale, goals and objectives, and a list of references used to develop the seminar content; (2) Study Assignments and Activities, which provides a list of suggested research problems for students and a possible format and agenda for each class session; and (3) Lecture Notes and Discussion Questions, which contains a synthesis of information in relation to each stated goal and objective with associated discussion questions. The field experience (or internship program) section covers overview and rationale, responsibilities, placement, intern contract, intern conferences, evaluation, and suggested programs (project design and administration, operation of school programs, evaluation of school programs, educational research and development, and state, regional, and Federal program supervision). One of 15 core modules in a 22-module series designed to train vocational education curriculum specialists (VECS), this guide is intended for use by both instructor and student in a variety of education environments, including independent study, team teaching, seminars, and workshops, as well as in more conventional classroom settings. The guide has five major sections. Part I, Organization and Administration, contains an overview and rationale, educational goals and performance objectives, recommended learning materials, and suggested reference materials. Part II, Content and Study Activities, contains the content outline arranged by goals. Study activities for each goal and its corresponding objectives follow each section of the content outline. Content focus is on characteristics of individual learners and how they relate to learning, ways of studying individual learners, and ways of providing for individual differences in vocational education programs. Part III, Group and Classroom

Activities, suggests classroom or group activities and discussions keyed to specific content in the outline and to specific materials in the list of references. Part IV, Student Self-Check, contains questions directly related to the goals and objectives of the module, which may be used as a pretest or posttest. Part V, Appendix, contains suggested responses to the study activities from part II and responses to the student self-checks. (HD)

Part II, Content and Study Activities, contains the content outline arranged by goals. Study activities for each goal and its corresponding objectives follow each section of the content outline. Content focus is on the various purposes and components of decision-facilitation evaluations, the roles of the evaluator, the development or use of appropriate criteria and methodology for decision-facilitation evaluations, and the methods for preparing decision-facilitation evaluation plans and reports. Part III, Group and Classroom Activities, suggests classroom or group activities and discussions keyed to specific content in the outline and to specific materials in the list of references. Part IV, Student Self-Check, contains questions directly related to the goals and objectives of the module, which may be used as a pretest or posttest. Part V, Appendix, contains suggested responses to the study activities from part II and responses to the student self-checks. (HD)

Elementary Industrial Arts Curriculum Guide, Grades K-8 & Special Education. Revised.

Bertie County Public Schools, N.C.

Spons Agency—Bureau of School Systems (DHEW/OE), Washington, D.C. Div. of Supplementary Centers and Services, North Carolina State Dept. of Public Instruction, Raleigh.

Pub Date—Sep 70

Note—144p.; For a related document see CE 009 190

EDRS Price MF-\$0.83 HC-\$7.35 Plus Postage.

Descriptors—Course Content, Curriculum Guides, Elementary Education, *Industrial Arts, *Industrial Education, *Learning Activities, Learning Experience, Psychomotor Skills, *Skill Development, Special Education, Supplementary Textbooks, Teaching Guides

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, North Carolina

Elementary textbooks containing references to technology and the industrial society form the base for this curriculum guide, which is designed to assist teachers in a more effective method of using these references for the benefit of students. A brief course outline and suggested projects involving power, transportation, communications, manufacturing, and construction, are offered for special education

students. Manufacturing activities are suggested for the kindergarten level. For each grade, 1 through 8, the guide provides, using a column format, specific topics of study, with each topic including references, and suggested activities. The reference indicates a book listed in the textbook bibliography for that grade. Other references to the same topic are also listed and are included in the bibliography. Topics include communications, construction, manufacturing, transportation, power, services, and pollution. Safety rules in industrial arts are discussed; descriptions are provided for tools and their use. A partially annotated section on resource materials is included; listing books, pamphlets, magazines, films; and field-trip contacts. (TA)

Identifiers—Wisconsin

This document contains information on the vocational/career education programs which have been funded by the 1968 Vocational Amendments and Wisconsin's 17 vocational technical and adult education districts to provide services to special needs students. It is designed to assist teachers and administrators in the Vocational, Technical and Adult Education (VTAE) system in identifying and sharing common areas of interest as they provide services to students. Both sections, Section I, Disadvantaged and Handicapped, Occupational Programs, and Section II, Consumer and Home-making Education Programs for Disadvantaged and Handicapped, list project/program entries by district and categorize each according to pre-vocational, supportive service, or curriculum areas. Each entry includes a descriptive title, location (address and telephone number), information and administrative contact, type of handicapped student served, and a brief program description. The index provides a quick reference for the identification of programs by area. (HD)

Available from—Choice Magazine, 100 Riverview Center, Middletown, Connecticut 06457 (\$6.95)

Document Not Available from EDRS.

Descriptors—*Bibliographies, *Junior College Libraries, Junior Colleges, Library Guides, *Periodicals, Resource Guides, *Technical Education, *Vocational Education

Designed as a periodical selection tool to aid community college librarians in developing a periodical collection for new or expanding vocational-technical programs within their own colleges, this bibliography lists periodical titles that represent the combined holdings of representative community college libraries all over the county. Major program headings are (1) Agricultural and Natural Resources Programs; (2) Allied Health and Related Programs; (3) Applied Arts Programs; (4) Business Office, and Related Programs; (5) Engineering Technology and Related Programs; and (6) Public Services and Related Programs. Periodical titles (including address and the name of any abstracting and indexing services cited in the publication) are listed under 98 different vocational-technical program headings within the six major program headings. It is noted that the listing is not intended to be all-inclusive or evaluative for the curriculum listed. (WL)

Descriptors—Career Education, Definitions, Educational Needs, Educational Problems, Elementary Secondary Education, Employment Opportunities, Employment Potential, Exceptional Child Education, Gifted, Handicapped Students, Low Income Groups, Minority Groups, Needs Assessment, Student Development, Work Attitudes

The three papers included in this monograph represent attempts on the part of the Office of Career Education to face the need for improving delivery of career education to special portions of the population. The first paper, "Career Education for Minority and Low-Income Persons," states that for this segment of the population, career education has been a matter of over-promise and under-delivery. Promises and problems are discussed in three categories: (1) Conceptual assumptions of career education, (2) process assumptions of career development, and (3) programmatic assumptions of career education. The second paper, "Career Education for Gifted and Talented Persons," discusses some of the special problems involved in developing career education programs for gifted and talented students, such as career decisionmaking, the development of talent, and work experience. In the third paper, "Career Education and the Handicapped Person," statistical predictions concerning underemployment and unemployment of handicapped high school graduates during the next four years are cited to emphasize the need for making career education opportunities available. Stressed as particularly relevant for the handicapped are basic career education principles such as the right to choose from a wide range of personally meaningful work opportunities and emphasis on accomplishments and discovery of an individual's talents rather than his limitations. This main volume of a two-volume final report

presents findings of a national study of women students in area vocational-technical schools comparing and contrasting nontraditional women (those enrolled in programs where nationally 0% to 25% of the students are women) and traditional women (those enrolled in programs in which nationally 75% to 100% are women) to determine what factors are influential in students' selection of nontraditional or traditional occupational training in nonprofessional occupations and to analyze the data with regard to seven broad occupational areas and sex stereotypes of particular occupations. Chapter headings are (1) Introduction, (2) Executive Summary: Major Findings and Implications, (3) Demographic Characteristics of Students, (4) Educational Personnel, (5) Persons Influencing Decision Making, (6) Impact of Counseling Methods and Techniques, (7) Relevance of High School Preparation, (8) Motivational Factors, (9) Problems and Difficulties of Women in Non-Traditional Vocational Training, (10) Employment of Students, (11) Alternative Occupations Considered by Women, and, (12) Women in "Mixed" Vocational Training. The appendixes contain methodology and methodological tables, questionnaires, glossary, and statistical symbols. (Supplementary tables are in the second volume.) (HD)

Measuring Wage and Occupational Discrimination: A Comprehensive Approach. Institute for Research on Poverty Discussion Papers.

Wisconsin Univ., Madison, Inst. for Research on Poverty.

Spons Agency—Department of Health, Education, and Welfare, Washington, D.C.

Pub Date—Aug 76

Note—30p.

EDRS Price MF\$0.83 HC\$2.06 Plus Postage.

Descriptors—Employment Level, Employment Patterns, Employment Practices, Employment Qualifications, Equal Opportunities (Jobs), Females, Labor Problems, Males, Mathematical Models, Measurement, Salary Differentials, Sex Discrimination, Wages, Working Women

Many economists have tried to explain existing

wage differentials between men and women. A new approach compares the relative importance of occupational discrimination with that of wage discrimination. This model allows for variation both in occupational distribution and in wages resulting from differences in job qualifications and productivity indicators. It was demonstrated that the usual approach to wage discrimination is a special case of this general model with some restrictive implicit assumptions. A multinomial logit model was used to stimulate the occupational distribution of women that would exist if they faced the same structure of occupational determination as men. Results indicate that there would be more women in managerial and skilled labor jobs and fewer women clerical and service workers. Wages were then estimated as a function of productivity measures for men and women in each occupation so that the components of the wage differential could be calculated. Results indicate that almost the entire differential could be eliminated by ending both forms of discrimination, with occupational discrimination accounting for one-third to one-half of the differential and pure wage discrimination the remainder. The Impact of the Censoring Problem on Estimating Women's Occupational Attainment Equations. Institute for Research on Poverty Discussion Papers.

Wisconsin Univ., Madison, Inst. for Research on Poverty.

Spons Agency—National Inst. of Child Health and Human Development (NIH), Bethesda, Md. Center for Population Research, National Inst. of General Medical Sciences (NIH), Bethesda, Md.; National Inst. of Mental Health (DHEW), Bethesda, Md.

Pub Date—76

Contract—ST01GM01526-10

Note—29p.

EDRS Price MF\$0.83 HC\$2.06 Plus Postage.

Descriptors—Employment Experience, Employment Opportunities, Employment Patterns, Equal Opportunities (Jobs), Family Influence, Mathematical Models, Measurement Techniques, Research, Sex Discrimination, Statistical Analysis, Working Women

Since research on sex differences in occupational attainment suggests that working men and women attain essentially the same mean level of occupational attainment and do so through quite similar processes, the censoring problem as a potential source of bias in estimating equations for these comparative occupational attainments is investigated. (The censoring problem is defined as a sampling problem in that the sample of working women contains an overrepresentation of successful women, since women who can afford not to work will stay out of the labor force unless they find a job commensurate with their education.) After reviewing and rejecting some alternatives that could correct this problem, a model (developed from an extension of Heckman's set of equations that relate to women's occupational characteristics) is presented for obtaining the structural parameters for the whole female population by accounting for the censoring problem. The censoring problem was found to be minimal and not a reasonable explanation for the apparent similarities between men and women in the process of occupational attainment. It was concluded that before accepting the finding of sexual equality in occupational rewards, the following possibilities should be explored: (1) That the model is misspecified and if certain variables (for example, the status of first job) were included, the process of occupational attainment for the sexes would differ, and (2) that certain dimensions of sexual inequality in occupational rewards are not being tapped by the concept, occupational status. Descriptors—*Higher Education, *Institutional Role, *Research Needs, Speeches, *Vocational Education

Half of this paper is the text of a lecture on the role of the university in job-related education in which the author suggests what universities ought to learn from vocational education. Pointing out that the challenge goes deeper than vocational or professional education, he challenges universities to have an eye for theory and practice, an eye for student career decisions and job prospect trends, an eye for the values of the liberal arts, and an eye for trends and directions in many advanced and complex professional fields. He contends that allegations that colleges and universities are flooding the job market with people with unusable college degrees are unfounded, but notes that vocational education establishments tell their story well by keeping better records on their graduates and what they are doing. The second half of the paper consists of the author's answers to four questions from the audience of educational research and development personnel. (HD)

The Pittsburgh Plan, a voluntary hometown plan designed to place minorities in local building trade unions, is described in detail from the perspective of its operations, its effectiveness in carrying out its purpose, and the individuals it serves. A benefit-cost analysis of the Pittsburgh Plan is presented. The significance of the results and its shortcomings are discussed and parametric variations on all significant parameters are performed to test its sensitivity. On the macro or program level, descriptive analyses are presented and alternate program structures derived. Analyses of the historical costs involved in all phases of the Pittsburgh Plan are performed and reported from different perspectives. On the micro level, attention is focused on the individual being served by this program. Multivariate statistical tools are used in analyzing such characteristics as seen to govern or indicate individual success. Based upon the results of analyses on both the individual level and the program level, alternate program structures and program content are explored. In order to permit easier and more explicit investigation of the ramifications of alternate program policies, structures, and content, two simple linear programming models are developed and their range of applicability demonstrated. A "weighted sum of benefit-cost ratios" criterion is used as another means of selecting alternate program recruitment and selection policies. (Author/WL)

Women, Families and Non-Formal Learning Programs. Program of Studies in Non-Formal Education: Supplementary Paper No. 6.

Michigan State Univ., East Lansing. Inst. for International Studies in Education.

Spons Agency—Agency for International Development (Dept. of State), Washington, D.C.

Pub Date—[76]

Note—112p.

EDRS Price MF-\$0.83 HC-\$6.01 Plus Postage.

Descriptors—*Economic Development, *Family Role, *Females, Foreign Countries, Human Development, Human Resources, International Studies, Literacy, *Nonformal Education, Program Development, *Program Planning, *Social Development

Directed to educators in both formal and non-formal systems, policy makers, program planners, and others concerned with social and economic development, this preliminary paper reports a study which examines the role of women and families in social and economic development with the purpose of presenting a family ecological framework for identifying the competencies needed by families to facilitate their social and economic functioning, which would in turn provide a basis for assessing needs and resources for determining non-formal education programs supportive to social and economic development at community and national levels. The report is based on a distillation and

summary of primary information (discussions with university colleagues and international scholars), analysis of a considerable body of data which has been assembled and catalogued (published research reports, monographs, and policy statements prepared by governmental and non-government agencies), and a series of group discussions in the United States and Thailand. The four chapters are entitled (1) Family and Development, (2) Contributions of the Family to Human Resource Development: Non-Market Activities of Families, (3) Role and Status of Women in Social and Economic Development, and (4) Summary and Implications for Non-Formal Education-Program Planners. A bibliography follows each chapter. (WL)

Descriptors—*Educational Environment, *Educational Needs, *Productivity, *Program Development, Resource Allocations, Speeches, *Vocational Education

Half of this paper is addressed to the national phenomena of shrinking resources and expanding needs and their effect on society. After noting that increased productivity can be a major intervention factor in mitigating their effect, the author gives ideas about how vocational education can become increasingly productive and where it might begin. The second half of this paper consists of the author's answers to nine questions concerning the role of vocational education programs in relation to increased productivity, program planning, and program development. Identifiers—*Air Force

A listing of technical reports (1968 through 1975) dealing with personnel and training research conducted by the Air Force Human Resources Laboratory (AFHRL) is presented in this bibliography. (The research has been conducted by professional personnel representing a variety of disciplines, including psychologists, operations research specialists, mathematicians, computer analysts, economists, electronic engineers, aeronautical engineers, and technical support personnel.) The table of contents provides a grouping of the research by year. Five indexes are appended: Personal Author, Civilian Corporate Author, Project, Title, Division, and Keyword. (Author/HD)

Developed in an attempt to clarify the concept of agribusiness and intended for use with its companion document, "Teaching the Meaning and Importance of Agribusiness," this manual is designed to assist youth in understanding the magnitude of agribusiness, and shows that agribusiness involves the removal of traditional farm functions to off-farm sites. To aid in understanding the meaning, nature, and importance of agribusiness, the manual addresses the following questions in separate units: What is agribusiness? How is agribusiness related to agriculture? What is the "chain of agribusiness"? How did agribusiness evolve? How can the evolution of agribusiness be depicted? What contributed to the evolution of agribusiness? How important is agribusiness? and What are some terms that are used in describing agribusiness? A selected bibliography and sources of additional information are appended. (HD)

Industrial Arts Performance Objectives, 1976. Four Clusters: Construction Technology, Graphic Communication Technology, Manufacturing Technology, Power and Energy Technology.

Spons Agency—Michigan Industrial Education Society, Inc.; Michigan State Dept. of Education, Lansing.

Pub Date—76

Note—210p.

EDRS Price MF-\$0.83 HC-\$11.37 Plus Postage.

Descriptors—*Behavioral Objectives, Construction (Process), Graphic Arts, *Industrial Education, Manufacturing, Power, Mechanics, Secondary Education, Skill Development, Technical Education, *Training Objectives, Vocational Education. This compilation of objectives was prepared by 35 industrial education teachers in the state of Michigan. It is indicated that these performance objectives should not be viewed as complete course objectives but rather as a listing of objectives which can be used where appropriate. After an introductory section, providing a general outline of a school safety program for the industrial arts school shop or laboratory, objectives are presented for 10 subareas grouped in four clusters: (1) Construction Technology (Residential Architectural, Wood Technology); (2) Graphic Communication Technology (Graphic Arts, Design and Sketching, Mechanical Drawing); (3) Manufacturing Technology (Metal Technology, Plastic Technology); and (4) Power and Energy Technology (Electricity-Electronics, Small Engines). A listing of required tools and equipment is provided for each performance objective. The appendixes contain the lists of writers, reviewers, and the editing group; the Michigan Safety Standards List; and a safety inspection checklist. (WL)

Identifiers—United States

Data on the characteristics and labor market experiences of illegal aliens in the U.S. work force were collected by voluntary interviews with 793 apprehended illegal immigrants who had worked at least two weeks in the U.S. From the resulting diverse collection of case histories, it was concluded that (1) illegal workers in the U.S. are likely to be disadvantaged persons with little education and few skills and employed in low-level jobs (most reported employment as the primary motive for migration and sent an average of \$105 a month to their homeland to help support an average of 4.6 people); and (2) since illegal workers are successful in finding low-level jobs due to work experience in their own countries, and appear to be highly motivated and productive, an increasing supply of illegal aliens is likely to depress the educational and skill level of the workforce, depress labor standards in the secondary sector, cause displacement of low-skill legal resident workers, and create a new class of disadvantaged workers. Data are provided for the survey respondents on demographic characteristics, work experience, backhome socioeconomic conditions, reasons for migration, and on their contact with various governmental systems. U.S. immigration policy and practices are discussed, as well as the role and impact of illegals on the U.S. labor market. Appended to the report are results of another survey of illegal immigrants and the interview schedule. (NJ)

Identifiers—*Africa, Africa (Central), Cameroon, Central African Republic, Chad, Gabon

The final report is the result of a survey requested by the United States Agency for International Development (USAID) and undertaken by the Organization for Rehabilitation through Training (ORT) of four countries (Cameroon, Chad, Central African Republic, and Gabon) and a conference on vocational training sponsored by the Economic and Customs Union of Central Africa (UDEAC). Four parts are contained within the report. Part 1 consists of an introduction explaining the origins of the survey, how the conclusions were established, the purpose of the study, and the methodology used. General conclusions and recommendations are also included, together with an inventory of existing institutions in the region and a list of abbreviations. Part 2 deals with the project proposals, among which are the creation of (1) a regional center for the training of automation technicians, (2) a marine merchant school, (3) a training center for taxidermists, (4) a training center for computer programmers and analysts, (5) a training center for technicians in industry and education, (6) a technical teacher training institute, (7) hotel trade and hunting guide schools, (8) a training school for watch and instrument repair, and (9) an agricultural mechanics training center. Part 3 contains results of each survey, including facility inventories, manpower and training needs estimates, and conclu-

sions and recommendations. The UDEAC conference report is found in part 4. (NJ)

This notebook of career counseling materials is a compilation of career information on nursing and the allied health fields. The first section provides general information useful in choosing a health career on such topics as career planning, career mobility, employment prospects, financial aid, terminology in health job titles, and an annotated bibliography of health career information. The major portion of the guide consists of career information on 66 health occupations organized under 11 occupational categories: Dental, dietary, administration, medical laboratory, medical machine services, medical practitioners and assistants, nursing, public health and health education, records and office services, rehabilitation, and other. Types of information provided for each health occupation include description of occupation, desirable personal qualities, educational requirements and list of Illinois educational programs, employment prospects, salary, career mobility, list of reading materials, addresses of professional organizations, and further sources of information. Identifiers—United States

Major purposes of the urban cooperative work education programs study were to assess the effectiveness of secondary and postsecondary cooperative education programs in the nation's hundred largest cities and to analyze the postprogram experiences of both participants and nonparticipants. Thirty case studies were compiled from 19 secondary and 11 postsecondary cooperative education programs located in cities. Interviews were conducted with 675 students participating in the 30 programs and with a cohort group of 774 vocational

students not enrolled in the programs to compare their school and job experiences and satisfaction. More participants than nonparticipants had positive attitudes and were employed, with the postsecondary participants scoring higher in the satisfaction areas. In addition, a followup study of participants and nonparticipants in the 50 primarily nonurban programs studied in part I of the assessment study indicated that where comparable data were available the outcomes were approximately the same. Study conclusions were that the program populations of minority, disadvantaged, and average to below-average students were generally competent and well-motivated and had high job placement rates, except in cities with high unemployment. Major constraints to expansion of the cooperative programs were lack of a sufficient number of coordinators and adverse economic conditions. (The final report, which provides more detail, is available in three volumes.) (MF)

Descriptors—*Auto Mechanics, *Curriculum, Curriculum Guides, *Diesel Engines, Engines, *Equipment Maintenance, Industrial Arts, Job Skills, *Mechanical Skills, *Mechanics (Process), Post Secondary Education, Secondary Education, Teaching Guides, Technical Education, Trade and Industrial Education, Units of Study (Subject Fields)

Designed to prepare students to be engine mechanics working on automotive and large stationary diesel engines, this instructor's guide contains eight units arranged from simple to complex to facilitate student learning. Each contains behavioral objectives, a content outline, understandings and teaching approaches necessary to develop the content, including page references for selected textbooks, and review discussion questions and statements. Unit 1 presents an introduction to the parts and functions of the diesel engine, the use of basic hand tools; job safety, and the relationship between this course and perceived occupational goals. Cylinder heads and their function, analysis, removal, cleaning procedure and valve adjustment are the focus of unit 2. Engine removal, disassembly, and cleaning are discussed in unit 3. Engine parts inspection, unit 4, includes inspecting engines for cleanliness, cracks, and serviceability; determining reasons for part failure or wear; listing all parts requiring service; and listing and ordering replacement items. Unit 5 involves the student in engine part repair, reassembly and reinstallation. Engine accessories such as air conditioners, starting systems, fuel filters and others are examined in unit 6. Unit 7 concerns engine diagnosis and tuneup, and unit 8 focuses on injection systems and controls. Also included are a sample final examination, notes on using audiovisual materials and on preparing and using transparencies, a glossary, a directory of diesel engine and equipment manufacturers from which instructional materials are available, and a bibliography including lists of textbooks, reference books, pamphlets and charts; films, filmstrips and slides, film loops, transparencies and transparency masters; An appendix includes safety information, material on metric measurement, conversion charts, and worksheets. Report No.—VT-103-434

Pub Date—74

Note—756p.

EDRS Price MF-\$1.33 HC-\$40.85 Plus Postage. Descriptors—Behavioral Objectives, *Business Education, Career Education, *Cooperative Education, Curriculum Guides, High School Curriculum, Instructional Materials, *Learning Activities, *Learning Modules, Occupational Clusters, *Office Occupations Education, Secondary Education

This business and office occupations curriculum guide organizes modules of instruction into the four career clusters: Stenographic and secretarial; clerical, accounting and data processing, and preprofessional. Each cluster is comprised of related learnings for entry-level positions in a variety of business and office occupations. Information is provided for each cluster on function, job opportunities, training, duties, and personal traits. Each module of instruction contains activities for one to four levels of competency consisting of student performance objectives, measurement criteria, content outline, and learning activities. Appropriate grade level and approximate teaching time are also suggested. Modules are included for typing, shorthand, communication arts (five modules on language skills: listening, reading, oral communication, and writing), telephone techniques, job application, mailing process, reference sources, recordkeeping, bookkeeping, data processing, business math, adding and calculating machines, word processing, travel, business law, machine transcription, duplicating, human relations, filing and records management, and business organization. A separate section for cooperative office education contains modules on orientation, decisionmaking, and career exploration, along with a description of cooperative office education, suggestions for program development, public relations, followup and evaluation, and labor laws and minimum wage. Sample forms for use in cooperative office education programs are appended. (NJ)

Identifiers—United States

This is the second of a three-volume final report of a study to assess the effectiveness of secondary and postsecondary cooperative education programs in the nation's hundred largest cities and to analyze the postprogram experiences of participants and nonparticipants. This volume presents the findings of the 24-month followup study of students formerly enrolled in the programs and their nonenrolled counterparts and compares the two groups. (Volume 1 an overview of the entire study, describes methodology and findings and Volume 3 contains the individual program case studies.) The 50 program sites included 30 occupational training (cooperative work education) programs, 14 dropout prevention programs, and 6 career exploration programs. The followup study team interviewed 803 former students who had participated in work education programs (and had been interviewed two years previously during part I of the study) and also

701 nonparticipating comparison students. Findings of the followup study are detailed in 46 tables and 2 figures, indicating employment status and stability, wage levels and job satisfaction, and comparisons. Data from this study are also compared with data collected by the National Center for Educational Statistics in a series of national longitudinal studies of the educational and vocational experiences of high school seniors. This third volume of the final report on urban cooperative work education programs contains summaries or case studies of the programs in 19 secondary and 11 postsecondary schools throughout the country. (Volume 1, an overview of the entire study, describes the methodology and findings, and Volume 2 is a detailed analysis of the followup study of program graduates.) The case studies provide general descriptions of the 30 sample programs and illustrate how the principles of cooperative education were adapted to particular goals, local education agencies, school structures, and specific urban problems. Statistical data is presented on student enrollments, completions, placement and followup information, and student interviews. Each case study is divided into two sections: (1) Program description (purpose, participants, setting, administration and organization, history, student eligibility, program structure, job development, instruction, and student evaluation) and (2) issues (coordinator, counseling, promotion and public relations, advisory committee, work stations, career goals, and completion, placement, and followup). Identifiers Vocational Education Amendments 1976

The accomplishments and activities of the National and State Advisory Councils, the implications of the Vocational Education Amendments of 1976, and opportunities and problems now facing voca-

tional education are discussed. The author comments that the amendments (1976) are primarily concerned with defining the Federal role in vocational education, and that other legislative administrative efforts would include simplifying the administration of program funds, construction of additional facilities, and improved planning. Quality control, equal opportunity, data collection, teacher recruitment, and program effectiveness are recognized as major challenges facing vocational education. (TM)

Identifiers—Army

Concepts currently used in conveying technical information about the operation and maintenance of equipment in the U.S. Army were investigated. The objective was to develop a more cost effective maintenance program by reducing personnel costs through a more effective software link between the hardware and maintenance personnel. The study objectives were organized into seven major tasks: (1) To identify new concepts for maintenance that hold promise for reducing the cost of equipment ownership, (2) to analyze the new concepts in order to identify the fundamental elements responsible for their effect upon maintenance cost, (3) to match fundamental elements to particular Army situations, evaluate their validity, and make cost projections, (4) to review the fundamental elements against the commodity systems and project the cost of ownership which could accrue through use of these elements to produce all Army technical manuals, (5) to prepare a specification which includes all the fundamental elements tailored to appropriate Army situations, (6) to prepare a sample manual based on the specification, and (7) to prepare a plan for testing the sample manual. This report summarizes interim reports for each of the seven tasks. (Author/NJ)

Identifiers—National Advisory Council on Vocational Education

This report presents the findings of the National Advisory Council on Vocational Education's

(NACVE) national study of the degree to which public vocational education programs in secondary institutions are continuous with those in the same or closely related fields of postsecondary instruction. Methodology involved a survey of the 56 state advisory councils on vocational education of which 48 responded (85.7%). Conclusions, based on the survey responses and on a literature review, indicated that (1) there is planned articulation between secondary and postsecondary levels of instruction in slightly less than 40% of the responding states; (2) where granted, advanced placement is more often based on criteria other than completion of secondary vocational programs; (3) articulation occurs most frequently in programs in apprenticeable occupations, occupations requiring licensure; or those which might be continued at the higher education level; and (4) about 50% of the states have some form of statewide coordinating council, and about 60% have local coordinating councils involving representatives from both secondary and postsecondary vocational education administration. Based on report findings and conclusions, NACVE offers four recommendations, two for the U.S. Office of Education and two for State Advisory Councils on Vocational Education. Survey responses are summarized in tabular and narrative form, and the survey instrument and other project materials are appended. (MF)

To aid the teacher in providing instruction in small business ownership and management for students at the secondary, adult, continuing education, or community college levels, this curriculum guide contains 14 units, each consisting of introduction, objectives, content, and suggested activities. Suggested activities include projects, group dynamics, simulations, role playing, case studies, and assignments. A number of special activities included in each unit are categorized according to the areas of creativity and innovation, coping with change and competition, achievement motivation, problem-solving and decisionmaking, human relations ability, and developing a positive self-image. Most units contain at least one case study depicting a real-life business situation regarding the unit topic. Units are entitled (1) The Nature of Small Business, (2) Determining Product and Market, (3) Selecting the Location, (4) Obtaining Initial Capital, (5) Choosing the Legal Form of Organization, (6) Managerial Planning, (7) Recordkeeping, (8) Financial Management, (9) Credit and Collections, (10) Advertising and Sales Promotion, (11) Employee and Community Relations, (12) Obtaining Information and Assistance, (13) Insurance, and (14) The Future of Small Business. Descriptors—*Curriculum Evaluation, Evaluation Criteria, Formative Evaluation, Higher Education, *Inservice Teacher Education, Instructional Materials, Learning Modules, Material Development, Performance Based Teacher Education, Program Descriptions, Program Effectiveness, Secondary School Teachers, *Special Education, Special Education Teachers, *Teacher Education Curriculum, Teaching Skills, *Vocational Education, Vocational Education Teachers

A detailed formative evaluation was conducted on a series of seven competency-based inservice modules designed for use by currently employed vocational and special educators. The topics of the module series focused on instructional development and on coordination of services and programming for special needs students in secondary programs. A series of major questions was developed which addressed the evaluation of the competencies included in the modules, formative interim evaluation, and product-outcome evaluation. Evaluation information was gathered from six separate sources: A panel of experts, field test participants, local program administrators, relevant documents, participant-observers, and the products developed by the field test participants. Formative evaluation data were gathered for each module and analyzed at three levels: Microanalysis, macroanalysis, and a more global assessment of the series and of selected aspects of the delivery systems used in the inservice-field test. The report includes a literature review, description of methods and procedures, and presentation of findings with summary and recommendations. The appendix (one-third of the document) contains the various evaluation instruments, description of modules, and other related material. (NJ)

Note—15p.; Paper presented at the American Industrial Arts Association conference (Des Moines, Iowa, April 18-23, 1976)

EDRS Price MF-\$0.83 HC-\$1.67 Plus Postage.

Descriptors—*Academic Freedom, *Individualism, Industrial Arts—Teachers, Interaction, Speeches, *Teacher Responsibility, *Teacher Role, Teaching Quality

There is a need for the spirit of freedom in the teaching profession since in some respects the teacher's fulfillment is dependent upon the freedom that the teacher is willing and able to exercise in his/her profession. Teaching freedom means the opportunity to develop the potential for teaching excellence according to the teacher's individuality in dealing with the individual differences among the students. Many teaching institutions have generated robots, programed to follow precise directions for every aspect of educational programs with no individual thinking or judgment. Rigid, prescribed programs cannot exist where teachers understand and respect their freedom, and the persistent companion of freedom is responsibility. The teacher must see his acceptance of freedom in the light of the much larger dimension of human understanding. The competent professional soon realizes the fallibility of highly prescriptive programs for all students in a given class or grade level. He needs the freedom to design and deal with content toward the maximum individual development of each student. If the teacher is willing to give up this freedom and responsibility of decisionmaking, he should be aware of what he accepts in its place. (MF)

Descriptors—Educational Responsibility, Elementary Secondary Education, *Handicapped Students, *Industrial Arts, *Special Education, Speeches, *Student Adjustment

The problem of teaching industrial arts to students with special educational needs is addressed. Some of the handicaps of special education students are considered, including retardation, sight, hearing, neurological, orthopedic, and gross motor problems, learning disabilities, emotional disturbances, and multiple handicaps. The prevocational industrial arts special education program in which the author is involved is described. Several individual problems concerned with students' academic, social, emotional, and physical handicaps are discussed, along with demonstrated methods of handling them. The author then looks at some usual industrial arts activities and compares special education achievement with achievement found in the normal classroom. Several practical suggestions are offered for choosing projects, planning activities, selecting materials, selecting and using tools, sequencing tasks, and eliciting student cooperation. The paper concludes by briefly describing fiscal and administrative support for the program and program evaluation. (NJ)

Descriptors—Education, Educational Responsibility, Energy: Historical Reviews, *Industrial Technology, Matter, *Production Techniques, Speeches, *Technological Advancement

Focus in this paper is on the importance of materials technology, the matter and energy crises, and the interrelatedness of our increasing need for materials; and the implications for education. Following a short history of what materials have done for man and what man has done with materials, particularly in the development of various metals and composites, from the earliest records to the space age, the author notes that it was mainly through the rise of education in this country that science and technology grew to have a profound effect on the national economy and that the rapid development of materials technology in the past 30 years is one of the primary reasons for such seeming impossibilities as jet passenger planes. He observes that this materials technology development is continuing and challenges educators to look carefully at processes now shaping our world and those expected in the near future, not just to keep abreast of technology but to teach it to those who must follow. The Manufacturing Education Curriculum Project's feasibility study concerned with industrial arts curriculum development in manufacturing for the senior high school level is described. The need for an industrial arts curriculum which meets and reflects present and future trends is discussed in the introduction, followed by a review of the organizational process and a listing of the objectives developed to facilitate the proposed project. Both the sources and the rationale which accompanied the curricular research and technological research are examined, resulting in the identification of 11 trends in the manufacturing process. Six courses, developed from a review of curriculum guidelines (based on research by educational theorists and technologists), project research, and proposed directions, are listed and described. These courses include (1) Introduction to Manufacturing Systems, (2) Metal and Non-Metal Processing, (3) Graphic Communication Material Processing, (4) Producing and Servicing Electro/Mechanical Products, (5) Producing and Servicing Electrical/Electronic Products, and (6) Contemporary Manufacturing Problems. Parameters and Constraints Affecting the Course, Course Descriptions (including Organization, Management, and Evaluation Needs), and an outline of the conclusions based on project research are included. Descriptors—Curriculum, Curriculum Development, Educational Alternatives, Educational Needs, Futures (of Society), Higher Education, *Industrial Arts, *Industrial Arts—Teachers, Industrialization, Instructional Improvement, *Instructional Innovation, *Teacher Education, Technological Advancement, *Technology

The argument for technology education and its relationship and relevance to teacher education courses is presented, and centers around three assumptions: (1) The term technology education can be defined, (2) technology has permeated our society, and (3) industrial arts education might not be able to withstand the complexities of a technological society. Viewpoints concerning the definition of technology education (assumption 1) are reviewed; the relevant consistencies among these definitions are enumerated, and a new definition is offered. Basic concern is then centered on the growth and expansion of technology in twentieth century United States and the implications that this has for industrial arts curriculum (assumption 2). It is noted that as a result of this growth, a need has developed for review of the directions that industrial arts has and will be taking (assumption 3). It is concluded that the responsibility for educational programs to reflect cultural trends and therefore technology exists, and that much of the apprehension would be dismissed if technology were considered a process rather than a thing. Also included in the paper is a rationale and outline of a technology education curriculum. (TM)

Descriptors—Art Materials, Career Awareness, Career Education, Educational Objectives, Educational Philosophy, Elementary Education, *Elementary School Curriculum, *Industrial Arts, Instructional Aids, Learning Activities, Speeches

Part I of this paper deals with the major philosophies of elementary industrial arts. Five philosophy groupings are identified: Industrial Arts (1) as a means of developing habits, attitudes, problem solving abilities, and interests, (2) as a means to meet developmental needs of children, (3) as a program for involving students in making objects for the inherent value of the objects themselves, (4) as a vehicle through which children acquire occupational awareness, and (5) as a means of correlating and enriching the elementary curriculum. The values and benefits of an elementary industrial arts program—satisfying needs, clarifying and enriching and broadening concepts, applying knowledge, increasing desire to learn, developing problem solving skills, producing three-dimensional objects, increasing understanding of industry and technology, and developing desired behaviors and attitudes—are enumerated and discussed in part 2. Included in part 3 is a listing of tools, materials, and construction activities which were identified in a study of 20 career education programs as being most effective. (TM)

Identifiers—North Carolina (Albemarle Region)

This doctoral dissertation presents and demonstrates an inductive model used in the Albemarle Region (State Planning Region R), a 10-county area of North Carolina, for determining health occupations education needs and resources. Data were collected from over 1200 area health personnel utilizing three basic types of instruments which were developed specifically for the study: One for each of several health agencies, one for health professionals, and one for health workers. Information sought included the identification of health education programs and resources (both current and planned), the identification of perceived manpower shortages in health fields, and the identification of perceived inservice and continuing health education needs of health professionals and other health workers according to an established priority. Although the data analyses involved only the health education needs of the Albemarle Region, implications are given for applications of the procedure for determining educational needs in other occupational areas. Appendixes include background information on area health education systems, analysis of the reported needs, and copies of seven instruments which were employed during the study. (DE)

An experienced community health worker describes her experiences in the field as a basis for recommended guidelines for the role, philosophy, aims, and goals of community health workers. The role of the community health worker as a member of the health care team is explored, and the problem of recognition for community health workers is considered along with the need for and problems involved with continuing education. The author offers some attitudinal and behavioral guidelines for facilitating continued study in the health care field based on her own described developmental experience. In conclusion, concrete suggestions are presented for community health workers to organize and gain recognition. Appendixes consist of a community health worker pledge, self-evaluation forms, a community health worker job description and title definition, recommended readings, and a description of the West Valley College community health worker associate degree program. Descriptors—Advisory Committees, Agency Role, *Agricultural Education, *Educational Planning, Educational Responsibility, *Futures (of Society), National Organizations, *Organization, *Professional Associations, Speeches

Identifiers—*American Vocational Association

This paper envisions one possible future relationship between the Agricultural Education Division of the American Vocational Association and its

Agricultural Education Advisory Council. The author imagines that the year is 1985 and describes some of the imaginary changes that have occurred in the interim. These changes involve the establishment of a national professional organization of agricultural educators, initiation for planning that emanates at the State level, and the adoption of futures planning or the careful probing of the future to identify alternatives and examine the possible consequences of each. In each of these imagined changes, the lay-expert advisory council has played a key role in stimulating action for change and in serving as a communication link between the profession and industry. In conclusion the author returns to the present and reiterates his theme more explicitly: (1) The future is being shaped by decisions, or lack of decisions, which are made each day; (2) those who continuously carefully examine the alternative futures and their consequences are best able to make conscious decisions to bring about the most desirable future; and finally (3) the agricultural education profession must unify its efforts and initiate the ongoing futures planning process in which the advisory council can be of continued assistance. (Author/NJ)

Identifiers—Michigan

A study was conducted to assess the agricultural manpower needs in Michigan in terms of present jobs available and jobs projected over the next five years, to identify and validate competencies needed for agricultural entry upon graduation from high school, and to determine the degree of congruency and discrepancy between the characteristics of the present programs of vocational agriculture and the evidence of need based on manpower needs, competencies needed, and student interests and aspirations in agriculture. The methods included were (1) a manpower needs assessment survey of three major occupational areas; (2) the identification and validation of several hundred competencies; and (3) an in-depth review of all ongoing programs of vocational agriculture in 1973-74, including an assessment of the agricultural interests and aspirations of 4,571 tenth graders in 12 schools. Manpower data were obtained from 144 farm operators, 100 nurserymen, and 50 farm equipment dealers. Projections indicated that, over the next four years, twice as many farmers will be needed than are presently being prepared. Output from high school ornamental horticulture and agricultural mechanics programs will have to increase by 500% and 300%, respectively, per year, if supply is to catch up with the projected manpower needs. The number of students with interest in avocational and vocational

instruction in agriculture was far in excess of the enrollment in vocational agriculture. (Author/HD)

Descriptors—Certification, Evaluation Criteria, Health Occupations, Health Occupations Education, Job Analysis, *Job Skills, Occupational Information, *Occupational Therapists, Performance Based Education, Post Secondary Education, *Professional Continuing Education, *Standards

The purpose of this project was to develop a methodology to establish standards of job performance and continuing education opportunities for maintaining competency of occupational therapists. The report contents include (1) Statement of the Problem (The Need for Re-Certification, Problems in the Design of the Re-Certification Program, and the American Occupational Therapy Association (AOTA) Continuing Certification Program); (2) Purpose and Scope of the Project; (3) Methodology for Establishing Standards of Job Performance in Specialty Practice Areas (Problems Encountered, Evaluation of the Methodology, and Recommendations for Revision and Refinement of the Methodology); (4) Methodology for Establishing Relevant Continuing Education Programs (Problems Encountered, Evaluation of the Methodology, Potential Applicability of the Methodology for Other Health Care Professions); and (5) Summary and Conclusions (Implications of the Contract Results and Analysis and Identification of Needs for Further Study). The appendices include (1) AOTA Continuing Certification Program, (2) Project Time-Table, (3) AOTA Data Questionnaire (1973), (4) Task Force Members and Consultants, (5) Delineation of Roles and Functions in the Five Specialty Areas, (6) Selected Bibliography on Performance Evaluation and the Development of Standards, (7) Packet of Information on Peer Review, (8) Sample Data Abstract Form Used in Chart Audit Study, (9) Standards of Job Performance in the Five Specialty Areas, (10) Data Abstract Forms for Chart Audit/Record Review, (11) Knowledge and Skills Required of an Advanced Level Occupational Therapist Practicing within the Specialty Area of Mental Health, (12) A Self-Study Program for the Occupational Therapist as a Mental Health Practitioner, and (13) The OATA Proposed Continuing Education Plan. Descriptors—*Data Collection, Guidelines, Manpower Utilization, Military Personnel, Occupations, Research, Research Methodology, *Sampling, *Task Analysis, Technical Reports

Identifiers—Marine Corps

The specific objective of the research described in this report was to develop guidelines for decision-making by the Office of Manpower Utilization (OMU), Marine Corps Headquarters, in the selection of occupational field (OF) sample sizes to which task inventories will be administered. The report is designed to provide action-oriented answers to major questions about both size of samples to be drawn and the strategy for planning and conducting the data collection process. Generally accepted essential requirements for the design of optimum samples are discussed and major implications of these requirements are spelled out as they apply to samples in Task Analysis (TA). A summary of requirements for a sampling design for OMU is given along with research findings that suggest a uniform optimum size for OMU samples. A recommended sampling strategy is also outlined for guidance in data collection. The appendices, covering half the document, present in tabular form data from stability tests conducted in the analysis of responses to different occupational field task analysis inventories. Descriptors—Conference Reports, *Educational Research, *Federal Legislation, Post Secondary Education, *Research Methodology, Research Projects, *Research Utilization, Secondary Education, Speeches, *Vocational Education

Major contents of these conference proceedings are 10 addresses presented to the whole conference of 62 educators or to small interest groups. Major addresses were (1) "The Importance of Research in Vocational and Technical Education," by J. Robert Warmbrod, (2) "The Impact of Federal Funds and Establishment of Priorities for Research in Vocational and Technical Education," by Glenn Boerrigter, and (3) "Limitations on Data Collection Under New Federal Legislation," by Daye Alexander. Three shorter addresses are on the impact of research at the secondary and postsecondary levels in vocational education. Four presentations to special interest groups deal with proposal writing and project planning, planning and conducting, evaluation and followup studies, developing management information systems, and critique and selection of designs for investigating problems in vocational

technical education. Short summaries of four recently completed research projects and an analysis of evaluation forms are also included along with four appendixes: Conference program, list of conference participants, reference materials on proposal writing and project planning, and Virginia vocational education management information reporting forms. Task Analysis for Legal Assistant Program. Final Report.

Lakeshore Vocational, Technical, and Adult Education District, Cleveland, Wis.

Spons Agency—Office of Education (DHEW), Washington, D.C.; Wisconsin State Board of Vocational, Technical, and Adult Education, Madison.

Pub Date—Aug 76

Note—58p.

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage. Descriptors—Educational Research, *Legal Assistants, Post Secondary Education, State Surveys, *Task Analysis, *Vocational Education Identifiers—Wisconsin

The Legal Assistant Task Analysis Project was undertaken to provide data related to the importance of tasks and the frequency of tasks that are, or could be, assigned to an assistant. In order to accomplish this, a task survey form was constructed and distributed to a sample of attorneys in (1) private practice, (2) companies or corporations, and (3) government positions. The form included 123 tasks arranged in nine categories: General law-office work, real estate problems, estate planning and probate, commercial law, business enterprises, criminal law, domestic relations, personal injury and other trial work, and tax work. The responses (335) were then analyzed to determine the mean frequency and importance of each task, which resulted in the selection of (1) 12 essential tasks; (2) 96 nonessential, but recommended for inclusion, tasks; and (3) 15 nonessential and not recommended for inclusion tasks.

The tabulated data will be utilized in the development and evaluation of the recently approved Legal Assistant Program at Lakeshore Technical Institute at Cleveland, Wisconsin, a pilot 2-year associate degree program for the State of Wisconsin Vocational, Technical and Adult Education System. The major portion of the document consists of tabulations of the survey responses, other survey materials, and the 123-item task list with the task frequency and task importance ratings. (Author/HD)

The Development of Guides for Teacher Preparation in Driver Education.

Human Resources Research Organization, Alexandria, Va.

Spons Agency—National Highway Traffic Safety Administration (DOT), Washington, D.C.

Pub Date—Jun 74

Contract—DOT-FH-11-7602

Note—32p.

EDRS Price MF-\$0.83 HC-\$2.06 Plus Postage. Descriptors—Curriculum Development, *Driver Education, Educational Research, Instructional Materials, *Material Development, Program Guides, Secondary Education, *Teacher Education

This paper describes the Human Resources Research Organization's (HumRRO) development of teacher preparation guides for driver education (one for secondary school teachers and the other for commercial instructors) through the use of a process that has been commonly utilized by educational technologists in preparing instructional programs and materials. It is noted that the guides were developed to provide institutions preparing driver educators with a body of information that would enable them to develop programs that could meet the needs of their students and that could be administered within the teacher preparation resources available to them. HumRRO's development of the guides is described under the headings (1) Analysis of Instructional Requirements (Survey of Teacher Preparation Standards, Analysis of Driver Educator Functions, Curriculum Development, Curriculum Administration); (2) Establishment of Instructional Objectives (The Driver Educator as a Driver, Survey of Driver Educators); (3) Determination of Guide Content (Sources of Information, Organization of Guide Content); (4) Evaluation; and (5) Concluding Statement. A diagrammatic model for development of the guides is included along with three appendixes entitled Components of the Highway Transportation System, Guide for Teacher Preparation in Driver Education Outline, and Sample of Driving Task from Part III: "Passing." Descriptors—Annotated Bibliographies, Curriculum Development, *Drafting, Educational Resources, Instructional Programs, *Occupational Information, *Performance Based Education, Post Secondary Education, *Program Development, Program Improvement, Resource Guides, Secondary Education, Teaching Guides, Vocational Education

Identifiers—Maryland

*Designed to assist the classroom teacher in keep-

ing abreast of the most recent instructional and technical developments in the field of drafting, this guide includes information that has been identified and validated by incumbent workers, trade unions, professional organizations, and teachers. It is also designed to be of use to curriculum specialists, administrators, and supervisors in the development of a performance-based instructional program. Four sections are included: How to Develop and Implement a Performance-Based Instructional Program describes this type of program and discusses its various components; Occupational Information covers, in relation to drafting, the nature of the work, working conditions, places of employment, training, qualifications and advancement, employment outlook, earnings, and 11 D.O.T. job descriptions. This section is also designed to serve as a complement to technical instruction and as a source of guidance information; Curriculum Resources presents descriptions of a variety of instructional and curriculum materials, including curriculum guides, learning activity packages, course outlines, books, transparencies, film, and filmstrips; and General Resources describes resources within Maryland and the nation. A source listing, providing addresses of various institutions, commercial business and publishers, and other organizations, is appended. (HD)

Descriptors—Affirmative Action, *Annotated Bibliographies, Career Choice, *Career Opportunities, *Employer Opportunities, Employment Qualifications, Employment Trends, Females, Labor Force, *Professional Occupations, Resource Guides, Sex Discrimination, Sex Role, Sex Stereotypes, *Skilled Occupations, *Working Women

This bibliography was developed to disseminate information about publications which focus on women's employment in nontraditional fields. It is intended to serve such people as vocational education administrators, education researchers, counselors, teachers, and students considering occupational choices. The literature described is available nationwide and includes magazine and journal articles, books, dissertations, pamphlets, brochures, and government documents. Entries cover three subject categories: Women in Non-Traditional Occupations contains general information about sex-role stereotyping, women in the work force, and employment categories which are non-traditional; Women in Non-Traditional Skilled/Vocational Occupations contains material on non-traditional occupations which do not require a baccalaureate degree; Women in Non-Traditional Professional Occupations includes those occupations which require, at minimum, a baccalaureate degree. Listed alphabetically by title, each entry includes the author(s) or editor, source of publication, publisher or name of journal, date, number of pages, cost (where applicable), and an annotation. Appended materials provide names and addresses of sources for materials; resources for additional information; and author/editor, title, and subject/occupation indexes. (TA)

Descriptors—*Administrator Attitudes, *Career Education, Educational Research, Principals, School Superintendents, Secondary Education, *Vocational Education
Identifiers—Washington

A study was conducted to determine whether or not superintendents and secondary school principals in the State of Washington understand and support vocational education. A three part questionnaire was developed from existing instruments to ascertain understanding and attitudes of school administrators as well as knowledge of select characteristics. The survey instrument was mailed to all 257 superintendents and to 200 principals who were randomly selected from a population of 343 persons. A response rate of 80.5% (73% for principals and 84% for superintendents) was achieved. Major conclusions revealed that (1) Most secondary principals and superintendents (93.4%) do not have a broad understanding of vocational education and that 87.6% cannot even differentiate vocational education from career education; (2) most administrators (89.8%) do not have a favorable attitude toward vocational education nor are they in favor of expanding vocational education with present funding; (3) administrators who can differentiate vocational education from career education are more supportive of vocational education than are principals and superintendents who cannot make this distinction; and (4) administrators in general do not differ in any appreciable way on the selected social variables (parenthood, type of school district, sex, age, and others) from administrators who are in favor of expanding vocational education if available funds remain the same. Seven specific recommendations are presented to local and State vocational education agencies and groups for increasing understanding and support for vocational education. (HD)

Descriptors—*Apprenticeships, Audiovisual Communication, Business, Educational Research, Higher Education, *Industrial Training, Industry, *Performance Based Education, Post Secondary Education, *Technical Education, Vocational Education, Workshops

A series of five workshops were held to disseminate, to 39 industrial and college and 61 Bureau of Apprenticeship and Training (BAT) personnel, information about the principles, methods, and effectiveness of Performance Based Training (PBT) in apprentice programs. Following the workshops, 90% of the industrial and 61% of the BAT personnel indicated they would recommend the use of PBT for industrial training. Sixty-four percent of the industrial and college participants have started or plan to use PBT in their training programs. Nearly 75% of these are well satisfied with the results produced by PBT. Some of the major results reported include 10% reduction in equipment downtime, more productive apprentices earlier in their training, faster training at reduced cost, better safety performance, and better work quality. The data offers evidence that such workshops are an effective means of communicating research results and new methods to industry and schools. The majority of this report is composed of the following appended material: Workshop program; list of participants; workshop

questionnaire; workshop questionnaire-responses-industry; workshop questionnaire-responses-Department of Labor participants; followup questionnaire; followup responses; report of a study on performance based education in technical and apprentice training; and a 28-page annotated bibliography on performance based training. Descriptors—*Change Strategies; Changing Attitudes, Demonstration Projects, *Equal Education, *Females, Models, Program Development, Secondary Education, *Sex Role, *Sex-Stereotypes, Student Recruitment, *Vocational Education

Identifiers—Texas

The overall objective of the project was to develop a model adaptable throughout Texas that would enable school districts to increase and maintain female enrollment in vocational programs that had traditionally been dominated by males. In meeting this overall objective, other secondary objectives also had to be met. These included providing information to all the female students at the demonstration school about the educational and career opportunities available to them through vocational education; recruiting females into traditionally male vocational classes; providing the necessary support services to these females enrolled in these courses; informing teachers, parents, and the community in general about the availability of good jobs; and improving the image of vocational education so that students, parents, and teachers would see it as a viable alternative to traditional academic courses. This report discusses the project under four major categories: Developing the Recruitment Model; Assessing and Changing Attitudes, Relationship with Industry and Unions, and Summary and Recommendations. The appendix includes a pre- and posttest for students, Survey for School Personnel, and Telephone Survey for Parents and Community. (HD)

Descriptors—Course Content, Course Organization, *Courses, Curriculum Guides, Educational Programs, *Emergency Squad Personnel, Federal Government, *Job Training, *Medical Assistants, Medical Services, Program Administration, Safety, Standards, Teaching Guides

To assist the States in implementing Federal standards for emergency medical services (under the Highway Safety Act of 1966), this guide has been prepared to aid in organizing, conducting, and standardizing a basic training course for emergency medical technicians (EMTs). Part I is a guide for a course designed to develop or upgrade the skill levels of all individuals involved in providing emergency medical care services. It contains a detailed outline of the course; prerequisites for both students and instructors; suggested scheduling and class size;

requirement for facilities, training aids, and materials; and guidelines for conducting the course and for testing and grading students. The introduction indicates that the course emphasizes the development of student skill in recognition of symptoms of illnesses and injuries and proper procedures of emergency care, with reliance placed heavily on demonstration and practice as a teaching method. Each of the 25 lessons is designed to allow practice of specific skills covered in the lesson, and practice, test, and evaluation sessions are designed to assure attainment of proficiency levels in all skills. These lessons are intended to involve 71 hours of classroom training plus 10 hours of in-hospital observation and training for a total of 81 hours. Part II is a guide to aid State officials in organizing and presenting an orientation program for coordinators of the basic training course. (HD)

Descriptors—*Cognitive Ability, *Measurement Instruments, *Military Personnel, Performance Factors, *Research, *Task Performance, *Test Construction
Identifiers—*Navy

Two rating instruments for evaluating the performance of men in Navy jobs by supervisors were developed based on the need to know how effectively men of varying ability perform different tasks. Specific Navy jobs were selected for the development of the performance instruments according to the following job factors: Highly populated, representation of different job characteristics, likelihood of common tasks across billets, representation of low aptitudes, and availability of Navy Occupational Task Analysis Program (NOTAP) data. The resulting two instruments developed were the Performance Analysis Inventory (PAI) and the Task Proficiency Inventory (TPI). The PAI analyzes performance in terms of worker-oriented variables and is based upon job analyses using a modification of McCormick's "Position Analysis Questionnaire." The TPI analyzes performance in terms of job-oriented variables and is based upon job analyses conducted by the Navy Occupational Task Analysis Program. Within the limitations of a comparison of experimental and operational data, both the PAI and TPI show less leniency and halo effects, and better discrimination than the Performance Evaluation Report used in the Navy. Both experimental instruments will be used in subsequent research on the performance of men in different mental categories. (Author/HD)

This Area Health Education Centers (AHEC) directory catalogues the Federal, State, local, and private decentralized professional health education programs initiated in direct response to the recommendations of the 1970 "Carnegie Commission Report of Higher Education and the Nation's Health." The introductory section briefly presents the history of the area health education concept, the identification and classification of AHEC-type programs, AHEC classification prototypes, and definitions of the five elements which comprise these classifications. Following the introduction, maps indicating the geographic distribution of AHEC and AHEC-type programs are presented. The remainder of the directory identifies 140 AHEC and AHEC-type programs throughout the country, which are located in 38 states. Each entry is listed by State, and includes the title of the program, classification, funding, executive director, and program address and telephone number. (SH)

 Identifiers—Missouri

The pilot project was intended to provide the industrial arts metals teachers with experiences and opportunities needed to help them plan, develop, and introduce occupationally-oriented information, activities, and experiences into industrial arts classes. Fourteen industrial arts metals teachers in the State of Missouri were selected from grades 8, 9, and 10 in those school districts having vocational education programs in metals, machine shop, and/or vocational programs related to the cluster of occupations in the metals industry. The teachers participated in an inservice practicum whose content was based on survey findings sent to industrial arts metals teachers, vocational education metals teachers, selected firms within the metals industry, and representatives of labor. Teachers were pretested before the practicum, offered the practicum, then posttested. Evidence of the achievement of the project's purpose was provided by gains reported from pretest and posttest evaluations. Also, evaluative comments by participants supported the pretest and posttest evaluations. This report explains the total

project in four sections: (1) Introduction, (2) Methodology, (3) Presentation and Analysis of Practicum Activities, and (4) Conclusions and Recommendations. Ten Appendices and 12 tables are included. (HD)

Descriptors—Building Trades, *Curriculum, Curriculum Guides, Diesel Engines, Driver Education, Equipment, *Equipment Maintenance, *Equipment Utilization, Instructional Materials, *Job Skills, Mechanical Equipment, *Motor Vehicles, Operating Engineering, Post Secondary Education, Safety, *Skill Development, Vocational Education
 Identifiers—*Heavy Equipment, Trucks

This curriculum guide uses six units to classify the areas of study which are taught under the broad category of Heavy Equipment Operation and Maintenance. The units are Safety and First Aid (1.0.0), Heavy Equipment Maintenance (2.0.0), Heavy Equipment Operation (3.0.0), Truck Driving (4.0.0), Diesel Mechanics (5.0.0), and Construction Surveying (6.0.0). The units and sections within the units are identified by a three place numbering system: the first number refers to the unit of study, the second refers to a section within the designated unit, and the third refers to the task or objective within the designated section. Since the six units separate the material into readily accessible divisions for teaching purposes, any one of the units 2.0.0 through 6.0.0 can be taught as a separate offering. Within each unit like tasks are collected into sections for instructional continuity. Each section details tasks which have been identified as essential or desirable for the development of entry level skills in the job field, with each task written as a measurable objective in a format which includes the following: Title of the competency (task), objective, equipment, special preparation (in some tasks), student action, performance check, and resources. Student Attitudes Toward Vocational Education. Research and Development Series No. 114.
 Ohio State Univ., Columbus. Center for Vocational Education.

Spons. Agency—Office of Education (DHEW), Washington, D.C.

Pub Date—Mar 76

Contract—OEG-0-74-1670

Note—128p.

EDRS Price MF\$0.83 HC\$7.35 Plus Postage.

Descriptors—Comparative Analysis, *Disadvantaged Youth, *Educational Attitudes, Educational Research, Grade 9, Junior High Schools, Junior High School Students, *Males, Public Schools, Racial Differences, *Student Attitudes, Surveys, *Vocational Education, Work Attitudes
 Identifiers—Maryland, Maryland (Baltimore)

The objective of this project were to determine (1) the basic dimensions of educational and career-related attitudes of black inner-city junior high school age students, and to compare these attitudes to those of their white counterparts, (2) how atti-

tudes were related to the preference of educational programs expressed by these students, and (3) whether the public image of vocational education as perceived by these students was different from that of other programs. A Student Attitude Survey was devised which solicited students' opinions about specific educational programs, dropping out of school, occupations, occupational activities, school activities, and opinions about education and work generally. The survey was given to male ninth grade inner-city students in the public school system of Baltimore, Maryland. The findings imply that vocational education does not suffer from a poor public image in the socioeconomic levels studied, and that black students do not hold substantially different attitudes toward work and education than do white students. Fourteen supplementary tables and eight appendixes compose the majority of the document. The appendixes contain the sample letters to teachers, English teachers, parents, and respondents; the consent form; VARIPART Procedure; instructions from Student Opinion Survey, and sample constructed two-mode data matrices. State and Local Responsibilities for Planning Occupational Education. A Study of the Effect of Alternative Allocations of Responsibilities on the Process of Planning. A Report.

Educational Facilities Labs., Inc., New York, N.Y. Spons Agency—North Carolina State Univ., Raleigh. Center for Occupational Education.

Pub Date—[76]

Note—109p.

EDRS Price MF-\$0.83 HC-\$6.01 Plus Postage.

Descriptors—Administrative Organization, Board of Education Role, Educational Planning, Educational Policy, Educational Responsibility, Financial Problems, Leadership Responsibility, Legal Problems, Local Government, Models, Organization, Organizational Climate, Program Planning, School Districts, State Departments of Education, State Government, State Legislation, State School District Relationship, Statewide Planning, Vocational Education

Intended as an aid to those involved in State level planning for occupational education, this report (1) identifies the different legal, organizational, and financial constraints which directly affect the process and product of planning for occupational education; (2) determines the effect which different mixes of State and local responsibilities for planning have on the process and product of planning for occupational education; and (3) identifies specific instances (i.e., State and local planning agencies, policies, etc.) where alternative planning environments exist, and where alternative policy models have been implemented. (The report is based on a questionnaire/telephone interview investigation of how planning for occupational education is conducted at the State and local levels in a sample of 14 States whose policies and procedures provided examples of all significant alternatives with regard to funding policies, organizational relationships, and legislation.) Chapter 1 is a discussion of the problems of planning from the standpoint of the need for the State and local agencies to share planning responsibilities. Chapter 2 demonstrates the interrelatedness which exists between planning activities and the environment in which they take place, focusing on the many "givens" in educational systems which significantly affect the kinds of planning which can be done and pointing out that changes in these "givens" may have to be accomplished before the intended planning practices may be implemented. Chapters 3 through 7 present in-depth discussion of the effect which alternative policies and environmental conditions have on the process of planning and delivering occupational education. (HD)

Identifiers—Oregon

The focus of this report is on infusing career education content into vocational teacher education programs. It is one of seven similar reports dealing with program development in career education for teacher, counselor, and administrator preparation. (All of the reports were developed from the project, "Statewide Infusion of Career Education into the Preparation of Teachers, Counselors, and Administrators," which focused on the following three aspects of preparing educational personnel for expanded and extended roles in career education: Staff development for college and university faculties; program development for teacher, counselor, and administrator preparation; and teacher certification and program accreditation.) This report is divided into two sections. The first section presents the results of the work done by the Vocational Education Task Force in identifying, collecting, reviewing, and organizing a body of career education information for use in the preparation of vocational teachers. The second section provides an example of a vocational teacher education course syllabus, infused with career education content, along with the accompanying student performance record and teaching/learning activities for the course. The appendix contains the form used by different task forces in identifying, describing, and classifying career education elements. (TA)

Interpretive Study: Mainstreaming Vocational Education for the Handicapped in California Secondary Schools. Final Report.

California State Dept. of Education, Los Angeles. Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date—76

Note—83p.

EDRS Price MF-\$0.83 HC-\$4.67 Plus Postage.

Descriptors—Equal Education, Guidelines, Handicapped Students, Program Design, Regular Class Placement, Secondary Education, Special Education, State Surveys, Vocational Education

Identifiers—California

An interpretive study of mainstreaming guidelines and practices had its origin in the growing need to identify the components of vocational programs, services, and activities designed to increase and improve the vocational education opportunities for handicapped persons in California secondary schools. The objectives of the study were: (1) to develop guidelines for establishing mainstreaming opportunities in vocational education for the handicapped; (2) to identify characteristics and provisions of vocational programs that are mainstreaming the handicapped; and (3) to provide a step-by-step procedural manual for mainstreaming handicapped in vocational programs that will provide pertinent information for field practitioners. The project officially started July 1, 1975, with research into the development of mainstreaming guidelines and criteria in accordance with Federal and State plans and directives. The second phase consisted of developing guidelines and corresponding data collection instruments, i.e., the structured interview/questionnaire. The third phase involved the selection of representative local education agencies by the Project Advisory Committee for inclusion in the study. On-site interviews were conducted with representatives from each of the participating local education agencies during the months of February through May 1976. This final report represents the fourth and final phase, bringing together findings, conclusions, and recommendations. Half of the report consists of such project materials as the interview/questionnaire guidelines, the instrument itself, and data summaries. (WL)

There are many possible directions that can be

taken to open equal opportunity to all who want work, especially for the handicapped. Since more service-producing industries are expected to grow in the future than goods-producing industries, and accurate job forecasting is good but must be accompanied by adequate education and training, the growth of human services and meaningful careers must be encouraged. With plans being made to involve the handicapped in the world of work, additional planning must be made now for the desired changes in the occupational distribution of the handicapped. Eliminating cultural stereotypes, disseminating career information, and earlier training and education are ways to eliminate existing inequalities. Education for careers requires programmatic cohesion and preparation at all educational levels with cooperation among rehabilitation counselors, special educators, career educators, and vocational educators. Revisions in the transportation system, redesign of jobs, buildings, etc., Federal and State laws, fringe benefits, and group health insurance are areas that must be examined for the disincentives they contain for work. Affirmative action means active day to day cooperation between handicapped employees, employers, and the government. (TA)

Comprehensive Occupational Data Analysis Programs (CODAP): Use of REXALL to Identify Divergent Raters. Interim Report for Period May 1976-September 1976.

Air Force Human Resources Lab., Lackland AFB, Tex.: Occupational and Manpower Research Div. Report No.—AFHRL-TR-76-82
Pub Date—Oct 76

Note—19p.

EDRS Price MF-S0.83 HC-S1.67 Plus Postage.

Descriptors—Computer Oriented Programs, *Data Analysis, *Individual Differences, *Job Skills, Research Methodology, *Supervisors, *Task Analysis, Task Performance, *Validity
Identifiers—CODAP, Comprehensive Occupational Data Analysis Programs, *REXALL

REXALL is a flexible program within the CODAP (Comprehensive Occupational Data Analysis Programs) system designed primarily for analyzing judges' task-factor ratings, and may be used for identifying divergent raters. Divergent raters are those whose ratings are significantly different from the other raters' ratings. They may be the noncooperative raters who simply generate an arbitrary pattern of responses rather than try to follow the instructions, or they may invert the rating scale, or they may actually perceive the tasks differently. This report uses data from an actual study to show how REXALL is used to detect divergent raters and to decide whether or not to delete them from the study since they may invalidate task means computed from ratings. It then uses the raw data from the study to verify the validity of the decisions made on the basis of the REXALL output. (Editor/WL)

Descriptors—*Armed Forces, Career Education, *Career Opportunities, Career Planning, Cooperative Programs, *Educational Opportunities, *Military Training, Senior High Schools

Identifiers—Department of Defense, Indiana University, *VIEW, Vital Information for Education and Work

Armed Services-VIEW (Vital Information for Education and Work) is described as a cooperative program with the Department of Defense which (1) introduces career opportunities and training available through volunteer service enlistment, (2) will be provided to senior high schools at no cost, and (3) presents materials in both printed and microfilm form which identifies related military and civilian careers. The first section of this document discusses different aspects of the Armed Services—the Armed Services lifestyle, pay and benefits, educational op-

portunities, ROTC, Air Force, Army, Coast Guard, Marine Corps, Navy, Service academies, officer candidate programs, Reserves and Guard, flight training and direct appointments, and women in the Armed Services. The second section provides descriptions for 105 jobs, with each job including a job title, civilian DOT ("Dictionary of Occupational Titles") number, related military and civilian occupations, qualifications, training and skills needed, and an Armed Services rating. Pub Date—May 76

Note—41p.

EDRS Price MF-S0.83 HC-S2.06 Plus Postage.

Descriptors—Administrative Organization, Business, Depressed Areas (Geographic), *Economic Development, Educational Facilities, Federal Government, Government Role, *Industrial Education, Industry, Management Systems, *Manpower Development, Social Influences, State Government, *Technical Education, *Vocational Education, *Vocational Schools, Vocational Training Centers

Planners, administrators, economists, and all others involved with human resources and economic development are cautioned to never underestimate the role that vocational education can play in attracting new and expanding industries. Industrial expansion means new capital investments, a vital factor to the future well being of economically depressed areas. New investments when accomplished by new jobs and adequate opportunity to train for jobs have a positive psychological effect on both those in the labor force and the owners and managers of business and industry. Capital investments in an economic region attest to the faith that indigenous personnel, the corporation, leaders of local, State, and Federal agencies have in the area's future. The monograph is in three parts. Part I discusses the role that facilities play in attracting new capital investments in distressed economic areas. Four subjects are covered: (1) Instructional Facilities: Constructed to Serve Their Role in Industrial Development; (2) State-Equipment Pools: A Key Factor in Providing Trained Manpower for New Industries; (3) Mobile Vo-Tech Facilities Serve Training and Development Needs; and (4) Special Schools for Industrial Training: A Different Concept of Mobile Training Facilities. Part II focuses on the role that adequate State and local vo-tech management systems play in focusing training funds toward real and identifiable training needs: The Product and the Package of Management Information; An Effective Vo-Tech Management Information System; and Management Systems Work in State Vo-Tech Agencies. Part III consists of suggestions for making Federal agencies more effective in assisting industrial and economic development. (WL)

Descriptors—Educational Trends, *Instructional Programs, Military Personnel, *Military Training, *Skill Development, *Special Education, *Train-

ing Techniques

Descriptions of major categories of training, and methodology, techniques, status, and trends are presented in this discussion of military training. After noting the five categories of training—recruit, officer acquisition, specialized skill, flight, and professional development education—emphasis is placed on a discussion of recruit, or basic training, and specialized skill training. The section on recruit training covers the length of training, the goals, and a description of the various instructional programs. The specialized skill training section provides a general discussion of course length, changes in instructional approaches, and different areas of specialization. Concluding remarks point out that (1) all training is becoming subject to cost-effectiveness scrutiny, (2) the trend is toward performance-based job-oriented training that employs a variety of methods and media and employs criterion-references testing, and (3) emphasis is on greater flexibility in training approach and training time, with a greater reliance on the individual both as learner and job performer. A bibliography is appended. (WL)

Identifiers—CETA, *Comprehensive Employment and Training Act, United States

Written for State and local operators of Health Education and Welfare (HEW)-funded health service, health manpower, and health planning programs, this guide is intended to serve four major purposes: (1) Provide selected insights into the Comprehensive Employment and Training Act (CETA) and how it works; (2) point out potential areas for cooperation which, from study or field experience, hold the promise of benefit to the clients and administrators of both CETA and health programs; (3) present a brief analytical framework for identifying other arrangements not specifically outlined in this guide; and (4) review the HEW management techniques that have proven their value in negotiation and implementation of existing arrangements between CETA and health programs. One section of the guide focuses on description of CETA programs and the relationships between them and health programs. Nine specific examples of coordination opportunities are presented in another section, e.g., combining resources to develop a demonstration training program for disabled youth. Analysis, identification, and implementation of coordination arrangements are discussed in the final section, and an illustrative agreement is appended. (WL)

Identifiers—CETA, *Comprehensive Employment and Training Act

Written for education administrators, primarily for those dealing with Federally funded adult education and vocational education programs at State and local levels, this guide is intended to serve four major purposes: (1) Explain the Comprehensive Employment and Training Act (CETA) and how it works, (2) point out potential areas for coordination which may benefit the constituents and administrators of CETA, adult education, and vocational education, (3) present a brief and practical analytical framework for identifying other coordinative arrangements, and (4) review the key management techniques that have proven their value in negotiation and implementation of coordination arrangements. The approach suggested has six steps: Acquire knowledge about CETA, assess your own program's needs or unmet objectives, analyze areas of commonality where CETA might fit your program's needs, discover possible opportunities to coordinate with CETA, weigh the costs and benefits of coordination, and, if applicable, negotiate and implement a joint project. One section of the guide focuses on description of CETA programs and the relationships between them and adult education and vocational education programs. Eleven specific examples of coordination opportunities are presented in another section, e.g., combining resources to develop a career education referral center. Analysis, identification, and implementation of coordination arrangements are discussed in the final section, and an illustrative agreement is appended. (WL)

Identifiers—CETA, Comprehensive Employment and Training Act, Department of Health Education and Welfare, DHEW

This coordination guide has been written as a reference for Comprehensive Employment and Training Act (CETA) Prime Sponsor administrators, planners, and operations staff who are interested in pursuing coordination opportunities with Health, Education, and Welfare (HEW) employment-related programs. It is intended to serve four major purposes: (1) Provide selected insights into what vocational rehabilitation, vocational education, adult education, Title XX, and health programs do, and how each works, (2) point out potential areas for coordination which, from study of field experience, hold the promise of benefit to the clients and administrators of both CETA and the HEW programs selected; (3) present a brief and practical analytical framework for identifying other arrangements, and (4) review the key management tech-

niques that have proved their value in the negotiation and implementation of coordination projects. A chapter on analysis, identification, and implementation addresses the coordination process and provides information on analyzing one's own program and those of HEW counterparts in order to identify potential coordination arrangements which have the highest probability of success. Summaries of coordination examples are then given for each of the five types of HEW programs listed in purpose 1 above. Each example covers the following: Issues facing CETA, and the subject HEW program, how coordination can help, how it might work, how CETA can benefit, how HEW can benefit, risks to CETA, risks to the subject HEW program, and how to reduce risks. Painting Services: An Instructor's Guide for a Program in Trade and Technical Education—Automotive Industries Occupations.

New York State Education Dept., Albany, Bureau of Occupational and Career Curriculum Development.

Pub Date—76

Note—57p.

EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage.

Descriptors—*Auto Body Repairmen, *Auto Mechanics (Occupation), *Curriculum, Curriculum Guides, *Job Training, *Painting, Post Secondary Education, Secondary Education, Teaching Guides, Technical Education, Trade and Industrial Education, Units of Study (Subject Fields)

Designed to assist instructors in preparing secondary and adult students for employment in the field of auto damage correction, as automotive refinishers, this guide outlines six units of instruction. (It was developed as one part of a three-part, 2-year course in auto damage correction: Body services, frame services, and painting services.) The six unit titles are: (1) Introduction (overview of the course content and requirements, work and safety habits, and introduction to auto refinishing), (2) Automotive Paint Shop Layout, Materials, and Equipment, (3) Surface Preparation, (4) Undercoats, (5) Topcoats, and (6) Decorative Finishes. Methods and materials are suggested for enriching the course and achieving a more effective presentation. A two-column format is used, the left-hand column contains suggested topics which are keyed to specific objectives; the right-hand column gives related factual information, as well as instructional suggestions and page references for selected textbooks. At the conclusion of each unit, topics for review discussion are included. A sample final examination is also provided. A list of suggested aids is given in the

bibliography; Textbooks, reference books, booklets and charts, films, filmstrips, slides, film loops, and transparencies. (WL)

Descriptions of programs in this volume were compiled to increase awareness of innovative career education practices. The listings attempt to describe what happens in programs which meet or succeed standards of innovation; programs which represent a range of sizes, student characteristics, budgets, funding sources, locations and emphases. Descriptions are collected in three sections: (1) Comprehensive public school programs, involving all or most schools of a city or district; (2) supplementary public school programs, which generally are smaller in scope, and may be designed for a particular group or age of student or may be developmental and involve limited numbers of teachers or administrators; and (3) alternative and community-based programs, which provide combinations of skills training, career counseling, and basic education, usually in settings outside the traditional public school system. Publications or documents which provide more information about their operations are listed with each description. Where the publications are not available directly from the program, sources are supplied. Preceding each of the three sections is an index displaying basic program information such as size, budget, funding sources, student and staff numbers, and grade levels. (TA)

Identifiers—Maryland

An instrument was developed to enable a comparison of work values of teachers, parents, and students. It was then utilized to investigate the differences between student groups, within and between schools of different curricula, between vocational and academic teachers and parents of students. The instrument, based on constructs obtained from a literature review, sought to measure

the degree of commitment to three work values categories: The Classical (Protestant) Work Ethic, the Consumer (work for profit) Work Ethic, and the Meaningful-Work Ethic. A pilot study was conducted to test its validity and reliability. Data for the main study was gathered from four senior high schools in Baltimore County, Maryland. Approximately 2500 students in grades 10 and 11, and 180 teachers participated in the study. Data obtained from the instrument were used to test five hypotheses: (1) Tenth and eleventh grade students from four different high schools scored significantly different means on subtests of the instrument, (2) students from four different schools scored significantly different means on the three work ethic subtests, (3) tenth and eleventh grade students from two different curriculums (vocational and college prep) scored significantly different means on their performance in reacting to three work ethic subtests, (4) academic teachers scored significantly different means than vocational teachers as measured by the three work ethic subtests, (5) students scored significantly different means than teachers when tested on the instrument incorporating three work ethic subtests. Treatment and analyses of data are reported, and the findings are discussed. It is noted that after completion of the study it was decided that an etiological approach to structuring items within seven work ethics would produce more exact and useful information and that accordingly a new instrument was developed for a second phase of the study. These 10 presentations were made at a State conference to explore the problems and possibilities of job placement as background for implementing a Statewide guidance program with emphasis on counseling, placement, and followup for selected target groups. Focus is on three issues of job placement: (1) Where do the responsibilities for job placement lie? (2) What approaches to job placement have been successful? (3) What commitments has Indiana made to placement for all students? Titles are (1) "Moral Education for the Future," by Harold Shanc; (2) "Whose Job Is Job Placement?" by Genevieve V. Kline, Dean Ransburg, Richard Morrison, and Edward Hornback; (3) "Career Resource Center Van," (4) "Student Placement Services—An Integral Part of Career Education," by Jack Martin; (5) "Placement in Motion," by Ray Wasil; (6) "Placement—The Acid Test of Career Education," by Lillian Buckingham; (7) "The CAPS System—Computer Assisted Placement Services—Pennsylvania," by M.U. Eninger; (8) "Placement and Follow-Up As It Relates to the Family Rights and Privacy Act," by David Prasse; (9) "Indiana Looks at Placement," by Sparkie Crowe; and (10) "College Students As Blocks of Wood," by Robert Greenberg. A list of conference speakers and participants is included. (WL)

Descriptors—Computer Oriented Programs, *Data Collection, *Graduates, *Measurement Instruments, Models, *Program Development, Research Methodology, Secondary Education, Statewide Planning, *Vocational Education, *Vocational Followup

The objectives of this project were to: (1) identify instruments that could be utilized to obtain followup information of vocational graduates, (2) develop a methodology that could be used to obtain followup information of vocational graduates, (3) field test the instruments and methodology for data collection on sample schools, (4) develop a method for summarizing and analyzing data that could be used by both local and state agencies, (5) provide a system for interpretation of the data to insure usage of the data at local levels in addition to usage at statewide levels; and (6) train local vocational guidance personnel to use the system developed. An advisory committee was appointed to guide the project staff in the preparation of instruments and methodologies, which were then field tested in three to five local schools. Job performance as assessed by the student and by the employer was obtained. Perception of guidance and placement assistance was also secured as well as an interview with a sample of guidance personnel at the local level. The primary outcomes of this project were the development of three elements that could be utilized in a statewide system for followup of vocational graduates: (1) A Student Followup Model, (2) a Counselor Followup Model, and (3) an Employer Followup Model. The purposes of this guide are to familiarize K-12 administrators with the concept of career education and to provide suggestions for planning and developing a career development program in a local school. It outlines a practical strategy for getting career development adopted and implemented at the local level. Topics covered are as follows: Need for career education, rationale for career education, definition of career education, general goals of career education, developmental phases of career education, characteristics of career education, suggested content and activity emphases in career development programs, models for career education, suggested career education experience by grade level, objectives for career education, summary of selected career education goals, a plan for implementation, steps for implementation, the need for local commitment to inservice training, planning for inservice training, guidelines for career education inservice programs, statewide conference on

career, education, faculty, meeting-suggested agenda, system-wide advisory council, community resource questionnaire, and a North Dakota State directory of contact persons for career education. A bibliography is also included. (TA)

Identifiers—Arkansas

A project was conducted to develop and implement a school and community-based guidance, counseling, placement, and follow-up program that would place counselors and support personnel in an optimum position to meet the individual career-planning needs of every student, including the occupationally inclined. Specific project goals were to develop and implement group and individual guidance services, a viable placement service, and follow-up services for those students who have exited from the school system, and to involve the community in planning and operating the expanded services. The programs were conducted in four Arkansas schools. It was found that the restructured and re-oriented services resulted in the better ordering of priority needs and focusing on procedures for using employment information; exploring alternative work experience activities in the community, and providing placement in next-step services for all students. Throughout the body of the report are examples of programs and forms used in conducting the program. A third party evaluation containing data analysis of the program constitutes one-third of the report. (TA)

Identifiers—California

Central to this project, which designed a staff development prototype, was the need for preservice

and inservice staff development designed to improve skills required for successful performance of guidance personnel. The project was conducted during an 18-month period in five phases. Phase 1 involved integrating existing California and American Institutes for Research (AIR) models for career guidance program development. Phase 2 entailed the national search for staff development materials, and the development of a system of modules and workshops to teach some basic skills needed to develop programs consistent with the integrated model produced in Phase 1. Phase 3 was a pilot test of this prototype staff development program with selected school personnel. In phase 4, the system was field tested in both preservice and inservice settings. In phase 5, information about the program and results of the field testing were disseminated. Results of the project were mixed, with competencies increasing to a degree, and attitudes toward the experience a mixture of positive and negative. It was noted that a number of improvements and refinements could be made in both the materials and their delivery to strengthen their impact on the career counseling area of education. This report includes a complete description of the project methods (activities and accomplishments, problems, and staff utilization), results, and conclusions and recommendations. (Author/TA)

Descriptors—Administrative Agencies, Adult Education Programs, Attitudes, Educational Legislation, Evaluation, Criteria, *Evaluation Methods, *Federal Legislation, Interviews, Management, *Program Administration, *Program Evaluation, Questionnaires, *Standards, *State Programs, Vocational Education

A process assessment was conducted to determine the effectiveness of the procedure used by the Bureau of Occupational and Adult Education, U.S. Office of Education (USOE), in conducting State Management Evaluation Reviews for Compliance (MERC) with Federal legislation and regulations governing public vocational and adult education programs. The purpose was to assure that the continuation of the MERC process be of greatest value to the future relationship between Federal and State agencies. The objectives of this assessment were: (1) To determine the feasibility of continuing the program, (2) to determine ways to improve the process, (3) to identify cost to States for the review, (4) to identify benefits to the States, and (5) to identify benefits to USOE. Utilizing a structured interview approach, Sierra Planning and Research Associates (SPRA) contacted personnel in 5 of the 13 States which had been reviewed by MERC. SPRA also interviewed personnel in six regional offices and various personnel from the central USOE. Additionally, SPRA observed the MERC review in Idaho. A total of 87 persons were interviewed by SPRA, and data from these various sources yielded 14 recommendations which are categorized as follows. (1) The MERC process should be better organized, (2) communications should be improved among all personnel, (3) the MERC process should be reviewed periodically to remove or alter unsuitable items, and (4) the process should be systematized through the development and usage of a procedures manual. The general conclusion of the investigators is that the MERC process should be continued on a regular basis as practically all the people interviewed held the concept of MERC in esteem. (Author/HD)

Identifiers—Florida

Based on the need to develop an outline of the procedures and methods used in vocational education in Florida, which would then form the basis for communication, discussion, and development of a multi-State consortium for the production of performance objectives and criterion measures for occupational education, this report, one of five under a project to develop a multi-State consortium, reviewed four projects (developed in cooperation with the Florida Educational Research and Development Program) designed to develop pre-objectives, performance objectives, and criterion-referenced measuring devices. (The projects studied were (1) Automotive Mechanics Assessments, (2) Producing Assessment Instruments in Ornamental Horticulture, (3) Employability Skills Projects, and (4) Typewriting Communications.) This report is divided into three parts: Part 1 is an introductory and procedural presentation; part 2, the text of the report, is an informational outline of the procedures and methods used by the Florida Research and Development Program to develop performance objectives and criterion-referenced measures in occupational education. The third or final part includes the appendixes related to the further development of a multi-State consortium. (HD)

Identifiers—Vocational Technical Education Consortium States

This report was intended to provide a basis and rationale for the organization and development of a multi-State consortium to produce catalogs of performance objectives and criterion-referenced meas-

ures in occupational education. Information is centered around two elements which are the major concerns: (1) The accountability phenomenon and its possible effect on occupational education, and (2) efforts of the States to cooperate on a formal basis for the improvement of occupational education in the public sector. It is noted that this report will be used to present to vocational educators and others who may be interested in the formation of a consortium the present status of efforts in this direction and the elements which specifically relate to the national movement toward accountability in education. After a brief introduction, information is presented under the following headings: Method of Procedure; The Status of Occupational Education in the United States—Are We Ready for the Implication of Educational Accountability; The Accountability Movement—What's in It for Occupational Education?; Performance Objectives and Criterion-Referenced Measures—Possibilities for Getting Accountability to the Classroom?; The Educational Consortium—Another Exercise in Futility, Or Is It an Answer?; and Findings and Conclusions of the Study—Or Putting It All Together. A bibliography and appendixes are included. (HD)

Identifiers—Vocational Technical Education Consortium States

The primary objective of this report, one of five reports under a project to develop a multi-State consortium, is to provide a collection of information concerning the activities and actions resulting from efforts to form a consortium. Materials presented are the results of actions of representatives of States invited to participate in a conference (held in Atlanta, Georgia, April 3-5, 1973) designed to develop an interest in forming the consortium and to provide a rationale for its operation. Four major sections briefly discuss (1) the conference, (2) actions taken by the States following the conference, (3) activities of the ad-hoc steering committee in the formation of the multi-State consortium, and (4) the status of the formation of the Vocational-Technical Education Consortium of States. The appendixes, which cover the majority of the report, present the conference program, list of participants, and conference motions and actions; recommended changes in the tentative organizational structure and agreement form for the formation of a multi-State consortium, the tentative agreement form and organizational structure for a multi-State Consortium; minutes and agenda of the ad-hoc steering committee; and the final agreement form and organizational structure for a multi-State consortium. This guide is designed to assist in the preparation of students for employment in some area of finance and credit or to help those individuals already working in the field to upgrade their skills. It is noted that the contents have been carefully selected by business people and educators working in the field of finance and credit. After a brief introduction offering suggestions for use of the guide, four units are presented. Unit 1 is an overview of the field of finance and credit along with some career information. Unit 2 covers the duties and personal characteristics needed to perform the basic jobs related to the granting of credit. Unit 3 covers the duties and personal characteristics needed to per-

form the basic jobs related to the collection process. Unit 4 presents the various Federal and State laws that govern the procedure of granting credit and collecting debts. Each unit follows a four column format listing performance objectives, instructional suggestions, student learning experiences, and evaluation suggestions. The appendix contains a sample of a student project. A bibliography and directory are also appended. (HD)

This report identifies and reviews projects and strategies that have proved successful in eliminating sex bias in vocational education. The information is intended to facilitate the development of affirmative measures by the States to eliminate sex discrimination in vocational education programs and to aid them in complying with regulations of Title IX of the Education Amendments of 1972. The 24 projects described are grouped into four categories according to major purpose: (1) To increase career awareness, (2) to recruit women into non-traditional vocational training, (3) to increase commitment and concern of education personnel through conferences, and/or (4) to develop materials for use by students, parents, and community. Some of the projects are in various stages of completion. Developing materials, evaluating project successes, and/or writing final reports. For each project, contact person, address, and telephone number are provided and the funding source is identified. General conclusions drawn from the analysis of the projects reviewed are presented, and four other lists of resources are included (with addresses and phone numbers). These three self-contained home economics miniunits on clothing and textiles are part of a set of 21 designed to provide middle school/junior high boys and girls opportunities to explore several areas of study within a 6-, 9-, or 12-week period of instruction. Units are designed to be free of sex-role stereotyping and are identified as level I (suggested for grades 6-7) or level II (suggested for grades 8-9). The suggested time required for completion of a unit varies from 3 to 9 weeks, those incorporating laboratory experience requiring 6 to 9 weeks. Titles and levels of these three units are Clothing Care and Repair (level I); Personality, Lifestyle, and Clothing (level I); and Consumer Clothing (level II). Each unit is composed of: (1) an introductory page that includes a brief description of the focus of the unit, a statement of rationale and objectives, and suggested grade level and time for completion; (2) the body of the unit composed of conceptual content (statements which identify the concepts and generalizations relevant to the objectives) and the suggested learning approach, and (3) support material, which identifies by number and page the suggested materials to be used in pupil-teacher interaction (Some materials are included; some are to be secured from the source identified at the end of the unit). A brief synopsis of all 21 miniunits plus description of the development and field testing of the units are also included. (HD)

Descriptors—*Auto Parts Men, Instructional Materials, *Job Skills, *Occupational Information, Performance Based Education, Sales Occupations, *Sales Workers, *Task Analysis, Teaching Guides, Trade and Industrial Education

Developed by industry representatives and educators for use by vocational instructors, this guide focuses on the tasks and competencies necessary for a student to develop in order to secure employment as a counterperson in automobile, agriculture, and truck parts. The task list is an outline of various skills and proficiencies and covers sales, in-store merchandising, outstore advertising, communications, store layout, trade magazines, security, orders, tickets, forms, parts and equipment identification, services, inventory and stock, and miscellaneous topics. The competency record, a replacement for the traditional report card, lists student competencies to be checked upon accomplishment and relates directly to the skills found in the task list. A list of industry representatives involved in developing the task list and competency record is also included. (TM)

One of a series of 12 in the secretarial/clerical area, this booklet for the vocational instructor contains a job description for the medical secretary, a task list under 17 areas of competency, an occupational tasks competency record (suggested as replacement for the traditional report card), a list of industry representatives and educators involved in developing the materials, and statements of competencies and a separate competency record for the area of human relations and personal development. Job duties listed for the medical secretary are concerned with three principal areas: Patient contact, office procedure, and medical specialization. In addition to the usual secretarial skills the medical secretary list covers knowledge of terminology, anatomy, physiology, pharmacology, disease conditions, and how to put the knowledge to use. Areas of competency in human relations and personal development are included (communication, self-development, personal appearance, office attitude, social and business etiquette, and job-seeking skills). Statements of competencies may be graded at either the secondary or postsecondary level, and the competency records are intended to follow the student through vocational training at both levels. Tasks in the task list are cross referenced with those in the booklets for other secretarial/clerical jobs. (MF)

Identifiers—*Key Punch Operators, Minnesota

One of 12 in the secretarial/clerical area, this booklet for the vocational instructor contains a job description for the data entry operator, a task list of areas of competency, an occupational tasks competency record (suggested as replacement for the traditional report card), a list of industry representatives and educators involved in developing the project, and statements of competencies and a separate competency record for the area of human relations and personal development. Job duties listed for the data entry operator are to operate key-punch, data recorder, verifier, and other data recording machines, with the ability to transcribe data from various source documents onto punch cards, tape, or disks in any computerized business or agency. Areas of competency in human relations and personal development are included (communication, self-development, personal appearance, office attitude, social and business etiquette, and job-seeking skills). Statements of competencies may be graded at either the secondary or postsecondary level, and the competency records are intended to follow the student through vocational training at both levels. Tasks in the task list are cross referenced with those in the booklets for other secretarial/clerical jobs. (MF)

Identifiers—Minnesota

One of a series of 12 booklets in the secretarial/clerical area for the vocational instructor, the secretary/shorthand task list competency record contains a job description, a task list of areas of competency, an occupational tasks competency record (suggested as replacement for the traditional report card), a list of industry representatives and educators involved in developing the project, and statements of competencies and a separate compe-

teny record for the area of human relations and personal development. Job duties listed for the secretary include a wide variety of office tasks and general clerical tasks with emphasis on transcription of shorthand and machine transcription. Other general responsibilities noted are in the areas of reception, office coordination, recordkeeping, written communication, telephone and mail handling, and reprographics. Areas of competency in human relations and personal development are given as are communication, self-development, personal appearance, office attitude, social and business etiquette, and job-seeking skills. Statements of competencies may be graded at either the secondary or postsecondary level, and the competency records are intended to follow the student through vocational training at both levels. Identifiers—Minnesota

One of 12 in the secretarial/clerical area, this booklet for the vocational instructor contains a job description for the secretary (non-shorthand), a task list of areas of competency, an occupational tasks competency record (suggested as replacement for the traditional report card), a list of industry representatives and educators involved in developing the project, and statements of competencies and a separate competency record for the area of human relations and personal development. Job duties listed for this secretarial occupation include a variety of general clerical tasks with the emphasis on machine transcription. Additional responsibilities noted include reception, office coordination, telephones and mail, typing, filing, and office supplies. Areas of competency in human relations and personal development are included (communication, self-development, personal appearance, office attitude, social and business etiquette, and job-seeking skills). Statements of competencies may be graded at either the secondary or postsecondary level, and the competency records are intended to follow the student through vocational training at both levels. Tasks in the task list are cross referenced with those in the booklets for other secretarial/clerical jobs. (MF)

Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the *Thesaurus of ERIC Descriptors*, are in alphabetical order.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the report can be found under that number in the Resume Section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Post Secondary Education

The Annual Pennsylvania Conference on Post-secondary Occupational Education: Articulation in Vocational Education (7th).
ED 132 434

Prisoners

Evaluation of 1975-76 Vocational and Basic Education Programs in the Eight Pennsylvania State Correctional Institutions.
ED-132 388

Production Techniques

Materials Technology; 200 Years and the Future.
ED 133 440

Productivity

Productivity: Implications for Vocational Education. Occasional Paper No. 19.
ED 132 438

Professional Associations

Relationship Between the Agricultural Education Division and the Agricultural Education Advisory Council—One Possible Future.
ED 133 448

Professional Continuing Education

A Project to Develop a Methodology to Establish Standards of Job Performance and Continuing Education Opportunities for Maintaining Competency of Occupational Therapists. AOTA Continuing Competency Project. Final Report.
ED 133 453

Professional Education

Area Health Education Centers: A Directory of Federal, State, Local and Private Decentralized Health Professional Education Programs—Health Manpower References.
ED 133 471

Area Health Education Centers: A Directory of Federal, State, Local and Private Decentralized Health Professional Education Programs. Health Manpower References. A Supplement.
ED 133 472

Graduation and Withdrawal from RN Programs. A Report of the Nurse Career-Pattern Study.
ED 132 385

Professional Occupations

Women in Non-Traditional Occupations—A Bibliography.
ED 133 460

Professional Training

Vocational Education for Special Needs Students: Competencies and Models for Personnel Preparation. Final Report. A Report on the National Workshop on Vocational Education for Special Needs Students (January 13-15, 1976).
ED 132 303

Program Administration

An Assessment of School Supervised Work Education Programs. Part II: Urban Cooperative Work Education Programs and Follow-Up Study. Final Report. Volume 3: Thirty Case Studies of Urban Cooperative Education Programs.
ED 133 431

Career Development. Administrator's Guide.
ED 133 509

The Implementation of a Model Competency-Based Graduate Program in Occupational Education Administration: Phase IV. Final Project Report.
ED 132 299

Introduction to Marine Corps Task Analysis. Training Manual II. Technical Report No. 10.
ED 132 304

MERC Report: State Management Evaluation Reviews for Compliance. Final Report.
ED 133 512

Vocational Education Curriculum Specialist (VECS). Module 12: Managing Vocational Education Programs. Study Guide. (Teaching/Learn-

ing Module).
ED 132 413

Vocational Education R & D in the Past Decade: Implications for the Future. Occasional Paper No. 18.
ED 132 297

Program Attitudes

Evaluation of 1975-76 Vocational and Basic Education Programs in the Eight Pennsylvania State Correctional Institutions.
ED 132 388

Program Coordination

Articulation: A Study by the National Advisory Council on Vocational Education.
ED 133 434

CETA and HEW Programs

Education and CETA: A Coordination Guide for Adult Education and Vocational Administrators.
ED 133 501

Health and CETA: A Coordination Guide for Health Administrators.
ED 133 500

Program Descriptions

Annotated Bibliography of the Air Force Human Resources Laboratory Technical Reports 1968 through 1975. Final Report for Period January 1968-December 1975.
ED 132 439

Program Design

An Assessment of School Supervised Work Education Programs. Part II: Urban Cooperative Work Education Programs and Follow-Up Study. Final Report. Volume 3: Thirty Case Studies of Urban Cooperative Education Programs.
ED 133 431

Interpretive Study: Mainstreaming Vocational Education for the Handicapped in California Secondary Schools. Final Report.
ED 133 491

Vocational Education Curriculum Specialist (VECS). Module 3: Current Trends in Vocational Education. Study Guide. (Teaching/Learning Module).
ED 132 379

Program Development

Advising People about Cooperatives.
ED 133 473

Arkansas Research Project. A Unified School-Community Approach to Remodel Guidance Services and Expand Next Step Placement and Follow-Up. Final Report.
ED 133 510

Assisting Industrial Arts Teachers in Integrating Occupationally-Oriented Activities into Their Existing Instructional Programs. Final Report.
ED 132 475

Career Development. Administrator's Guide.
ED 133 509

Career Education Catalog. Annotated Listings of Selected, Diverse, and Innovative Programs.
ED 133 505

Career Education in Vocational Teacher Education.
ED 133 482

The Implementation of a Model Competency-Based Graduate Program in Occupational Education Administration: Phase IV. Final Project Report.
ED 132 299

Individualizing Instruction in Vocational and Technical Education.
ED 133 490

Productivity: Implications for Vocational Education. Occasional Paper No. 19.
ED 132 438

Resource Guide for Performance-Based Drafting Instruction.
ED 133 459

SIRF: System for Implementing Review and Follow-Up.
ED 133 508

Transfer and Use of Training Technology in Air Force Technical Training: A Model to Guide Training Development. Final Report.
ED 132 361

A Validated Program Development Model and Staff Development Prototype for Comprehensive Career Guidance, Counseling, Placement and Followup. Final Report.
ED 133 511

Program Effectiveness

Arkansas Research Project. A Unified School-Community Approach to Remodel Guidance Services and Expand Next Step Placement and Follow-Up. Final Report.
ED 133 510

Articulation: A Study by the National Advisory Council on Vocational Education.
ED 133 434

An Assessment of School Supervised Work Education Programs. Part II: Urban Cooperative Education Programs and Follow-Up Study. Executive Summary.
ED 133 423

An Assessment of School Supervised Work Education Programs. Part II: Urban Cooperative Work Education Programs and Follow-Up Study. Final Report. Volume 2: Work Education-Program Outcomes—A Twenty-Four Month Follow-Up Study.
ED 133 430

An Assessment of School Supervised Work Education Programs. Part II: Urban Cooperative Work Education Programs and Followup Study. Final Report. Volume 1: Overview of Thirty Urban Cooperative Education Programs.
ED 133 429

An Assessment of Vocational Education in Wisconsin—1976.
ED 132 387

Business/Industry Internship for Occupational Teachers Project. Final Report.
ED 132 298

Career Guidance for Indian Youth. Final Report.
ED 132 366

Evaluation of 1975-76 Vocational and Basic Education Programs in the Eight Pennsylvania State Correctional Institutions.
ED 132 388

Perceptions of Vocational Education in Ohio by Employers.
ED 132-356

A Study of the Pittsburgh Plan. Final Report.
ED 132 436

Program Evaluation

MERC Report: State Management, Evaluation Reviews for Compliance. Final Report.
ED 133 512

Needs Assessment and Career Education. An Approach for States.
ED 133 539

Policy Implications of Current Research in Agricultural Education. Central Region Research Conference in Agricultural Education. Proceedings of Annual Meeting (29th, Columbia, Missouri, July 29-31, 1975).
ED 132 302

Vocational Education Curriculum Specialist (VECS). Module 13: Basic Concepts in Educational Evaluation. Study Guide. (Teaching/Learning Module).
ED 132 414

Vocational Education Curriculum Specialist (VECS). Module 14: General Methods and Techniques of Educational Evaluation. Study Guide. (Teaching/Learning Module).
ED 132 383

Program Guides

Occupational Training Plans for Disadvantaged and Handicapped Students in Vocational Education: A Manual for Use in Cooperative Work Experience Programs.

ED 132 286

Program Improvement

Vocational Education, Curriculum Specialist (VECS). Module 5: Laying the Groundwork for Vocational Education Curriculum Design. Study Guide. (Teaching/Learning Module).

ED 132 407

Vocational Education R & D in the Past Decade: Implications for the Future. Occasional Paper No. 18.

ED 132 297

Program Planning

A Guide to Assessing Ambulatory Health Care Needs in Your Community.

ED 132 384

The Hemophilia Games: An Experiment in Health Education Planning.

ED 132 291

A Model for Planning Patient Education—An Essential Component of Health Care.

ED 133 495

Needs Assessment and Career Education: An Approach for States.

ED 133 539

Women, Families and Non-Formal Learning Programs. Program of Studies in Non-Formal Education. Supplementary Paper No. 6.

ED 132 437

Recruitment

A Study of the Pittsburgh Plan. Final Report.

ED 132 436

Regional Cooperation

A Project for the Development of a Multi-State Consortium for the Production of Performance Objectives and Criterion Measures in Occupational Education. Second Report. A Status Report on Occupational Education, Accountability, Performance Objectives, Criterion-Referenced Measures, and Educational Consortia.

ED 133 515

Regional Programs

Technical Education and Vocational Training in Central Africa. Feasibility Survey of the Regional Development of Rapid Vocational Training: Cameroon, Central African Republic, Chad, and Gabon.

ED 133 421

Regular Class Placement

Interpretive Study: Mainstreaming Vocational Education for the Handicapped in California Secondary Schools. Final Report.

ED 133 491

Repair

Snowmobile Repair.

ED 132 392

Rescue

Virginia Emergency Vehicle Operator's Curriculum Guide.

ED 132 394

Research Methodology

Development and Demonstration of an Inductive Method of Health Education Needs Assessment in a Geographic Area of North Carolina.

ED 133 444

Methodological Approaches for Determining Health Manpower Supply and Requirements. Volume I. Analytical Perspective.

ED 132 354

Methodological Approaches for Determining Health Manpower Supply and Requirements. Volume II. Practical Planning Manual.

ED 132 355

Regional Research Conference in Vocational and Technical Education for Secondary and Post-Secondary Personnel. Annual Research Conference in Vocational and Technical Education (1st, Blacksburg, Virginia, April 16-17, 1976).

ED 133 455

Vocational Education Curriculum Specialist (VECS). Module 4: Assessing Manpower Needs and Supply in Vocational Education. Study Guide. (Teaching/Learning Module).

ED 132 405

Research Needs

Vocational Education R & D in the Past Decade: Implications for the Future. Occasional Paper No. 18.

ED 132 297

Research Projects

A Guide to Assessing Ambulatory Health Care Needs in Your Community.

ED 132 384

Research Utilization

Regional Research Conference in Vocational and Technical Education for Secondary and Post-Secondary Personnel. Annual Research Conference in Vocational and Technical Education (1st, Blacksburg, Virginia, April 16-17, 1976).

ED 133 455

Resource Centers

Vocational/Technical Materials for Community College Resource Centers.

ED 133 503

Resource Materials

Vocational/Technical Materials for Community College Resource Centers.

ED 133 503

REXALL

Comprehensive Occupational Data Analysis Programs (CODAP): Use of REXALL to Identify Divergent Raters. Interim Report for Period May 1976-September 1976.

ED 133 493

Role Perception

A Proposed System for Nursing. Theoretical Framework, Part 2. Pathways to Practice, Vol. 4.

ED 132 293

Salary Differentials

The Earnings Gap Between Women and Men.

ED 132 351

Measuring Wage and Occupational Discrimination: A Comprehensive Approach. Institute for Research on Poverty Discussion Papers.

ED 132 432

Sales Workers

Parts Counterperson. Auto, Agriculture & Truck. Task List Competency Record.

ED 133 540

Sampling

Guidelines for Sampling in Marine Corps Task Analysis. Technical Report No. 11. Evaluation of the Marine Corps Task Analysis Program.

ED 133 454

School Industry Relationship

Business/Industry Internship for Occupational Teachers Project. Final Report.

ED 132 298

Occupational Training Plans for Disadvantaged and Handicapped Students in Vocational Education. A Manual for Use in Cooperative Work Experience Programs.

ED 132 286

School Secretaries

Educational Office Personnel: Task List Competency Record.

ED 133 545

Secretaries

Administrative Assistant and Correspondence Specialist: Task List Competency Record.

ED 133 543

Correspondence Supervisor: Task List Competency Record.

ED 133 542

Legal Secretary: Task List Competency Record.

ED 133 544

Medical Secretary: Task List Competency Record.

ED 133 541

Secretary/Non-Shorthand: Task List Competency Record.

ED 133 548

Secretary/Shorthand: Task List Competency Record.

ED 133 547

Service Occupations

Beauty Culture: A Teacher's Guide to an Employment Orientation Course for Special Needs Students.

ED 132 419

Hospitality: A Teacher's Guide to an Employment Orientation Course for Special Needs Students.

ED 132 420

Laundry: A Teacher's Guide to an Employment Orientation Course for Special Needs Students.

ED 132 421

Sewing: A Teacher's Guide to an Employment Orientation Course for Special Needs Students.

AUTHOR INDEX

This Index lists documents under the name(s) of their author(s). The Index is arranged in alphabetical order by the author's last name.

As shown in the example below, the Accession Number is displayed below and to the right of the title. Additional information about the document can be found under that number in the Resume Section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

INSTITUTION INDEX

This Index lists the titles of documents under the institution responsible for them. The Index is arranged in alphabetical sequence by the name of the university, agency, association, etc. As shown in the example below, the Accession Number is displayed below and to the right of the title. Additional information about the document can be found under that number in the Resume Section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Sample Project Resume

| | | | |
|----------------------------------|--|---|--|
| Accession Number | VTP-2675 | Title | Correlation of Local Employment Needs and Vocational Progress. |
| Principal Investigator | Glenn Sample | Recipient Institution (including address) | Indiana Vocational Technical College, 616 Wabash Avenue, Lafayette, Indiana 47905 |
| Start—End Dates | September 1, 1976 to August 31, 1977 | Supporting Agency (including address) | Indiana State Board of Vocational and Technical Education, 17 West Market Street, Room 401, Illinois Building, Indianapolis, Indiana 46204 |
| Contract or State Control Number | 5-77-C-15 | | |
| Abstract | <p>Summary of Project: The overall purpose of this project is to determine local employment needs and the corresponding vocational technical programs that will supply the necessary trained manpower. Specific objectives are: (1) to develop employment profiles that include information on projected needs, skill, and training requirements; (2) to develop a market share prediction model to determine the number of job opportunities for graduates of vocational technical programs; (3) to determine the performance skills developed in vocational technical programs; (4) to develop a methodology for correlating local employment needs with vocational technical programs performance skills in Region 4; and (5) to communicate the findings of this project to regional and state vocational technical educators and industrial and legislative leaders. The general design of the first phase is to implement tasks one through eight of the Educational Needs Assessment Methodology. The second phase deals with developing a methodology to match employer required performance skills for various job titles with the performance skills developed in the Ivy Tech training programs. The third phase is to develop a market share equation of the various employment needs of the region for use by Ivy Tech program planners.</p> | | |

PROJECTS IN PROGRESS

The resumes in this section announce ongoing research and curriculum development projects funded by the Vocational Education Amendments of 1968 (P.L. 90-576), Parts C, D, I, and J.

The projects are arranged alphabetically, first by state and then by title within each state.

Complete names and addresses are provided for both the individuals or organizations conducting the research and for the funding agencies.

VTP-2874

Development, Field Testing, and Dissemination of a Comprehensive Curriculum Guide in Exploratory Business.

Principal Investigator: Clayton, Dean; Ruby, Ralph

Recipient Institution: University of Arkansas, Fayetteville, Arkansas 72701

Start—End Dates: Start Date 1 Apr 77; End Date 30 Jul 78

Supporting Agency: Arkansas State Department of Education, Division of Vocational, Technical and Adult Education, Little Rock, Arkansas 72201

Summary of Project: The purpose of the project is to develop and field test instructional materials for an exploratory business curriculum. Objectives are to (1) plan and conduct personnel development experiences for selected business education teachers in competency-based instructional concepts; (2) develop instructional materials for a comprehensive curriculum guide to explore the careers and competencies in vocational business education; (3) field test the instructional materials under development; and (4) disseminate the finalized curriculum guide for statewide implementation. Some 12 modules will be identified which will cover the entire spectrum of small business ownership. Content specialists will develop technical content materials for the selected entrepreneurial modules. A selection of onsite teams will pilot test the materials. Staff development activities will include three seminars and a two-week workshop. The project will culminate with self-contained instructional modules in the identified areas of entrepreneurship and media for maximizing vocational technical education for adults.

VTP-2895

Increasing Career Awareness and Exploration for Adults Making Career Decisions.

Principal Investigator: Winquist, John

Recipient Institution: Lane Community College, 4000 Thirtieth Avenue East, Eugene, Oregon 97405

Start—End Dates: Start Date 1 Jan 77; End Date 31 Dec 77

Supporting Agency: Oregon State Department of Education, 942 Lancaster Drive, Northeast, Salem, Oregon 97310

Summary of Project: The purpose of the project is to develop and implement use of extensive awareness and exploration materials for 10 vocational programs offered at Lane Community College. Procedures will include: (1) determining vocational programs for demonstrations; (2) surveying instructional areas to determine department contributions; (3) contacting business and industry in the community to help provide information and develop multimedia learning material and onsite job visitations; (4) developing audiovisual and written materials; (5) setting up viewing stations for current and potential students; (6) selecting appropriate students for the program; (7) meeting with students individually or in small groups to assess or clarify their initial interests; (8) preparing students for on-the-job experience; (9) visiting job sites; (10) reviewing student's experiences; and (11) obtaining input from counselors, staff, and community contacts for evaluation and further planning.

VTP-2896

Utilizing Parent and Community Resources.

Principal Investigator: Grimes, Daniel B.

Recipient Institution: Lane County Intermediate Education District, 1200 Highway 99 North, Eugene, Oregon 97402

Start—End Dates: Start Date 1 Jan 77; End Date 30 Dec 77

Supporting Agency: Oregon State Department of Education, 942 Lancaster Drive, Northeast, Salem, Oregon 97310

Summary of Project: The project's objective is to develop, field test, revise, and disseminate a guide for utilizing parent and community resources in the elementary school to enhance career awareness activities in rural, urban, and suburban settings. Procedures will include: (1) soliciting materials from selected model projects throughout the state; (2) selecting five consultants to write the handbook; (3) selecting pilot schools; and (4) monitoring pilot school projects.

VTP-2897

Assessing Employment Opportunities for Students Completing Vocational Education Programs.

Principal Investigator: Hari, Nancy K.

Recipient Institution: Russell County Schools, Lebanon, Virginia 24266

Start—End Dates: Start Date 1 Jul 77; End Date 10 Jun 78

Supporting Agency: Virginia State Board of Education, Richmond, Virginia 23216

Summary of Project: The project's objective is to assess employment opportunities in Russell County and the surrounding area for students completing vocational education programs. The project director, in cooperation with the high school counselors and vocational teachers, will assess the employment opportunities in Russell County and the surrounding area for students completing vocational education programs. During the actual assessment, information will be gathered and will culminate in the establishment of occupational information centers which will contain informative material in the form of slides, files, brochures, and a notebook listing the names, addresses, and phone numbers of employers. These occupational information centers will be established in each of the three high schools and at the vocational center so that all students completing vocational programs will have access to the information.

VTP-2898

Assessing Employment Opportunities for Students Completing Vocational Education Programs in the Prince Edward County School Division.

Principal Investigator: Miller, John D., Jr.

Recipient Institution: Prince Edward County Schools, Farmville, Virginia 23901

Start—End Dates: Start Date 1 Jul 77; End Date 10 Jun 78

Supporting Agency: Virginia State Board of Education, Richmond, Virginia 23216

Summary of Project: This project will develop a guide to potential employers of students completing vocational-technical programs. Project objectives are to (1) assess employment opportunities for students completing vocational programs within a 50-mile radius of the vocational-technical center; (2) determine the types and kinds of jobs available; (3) locate potential employ-

ers; (4) determine opportunities for advancement and prevailing rates of pay; (5) determine potential trends in the labor market; (6) determine the need for additional vocational-technical programs; and (7) promote articulation between business/industry and the staff of the vocational-technical center. A questionnaire will be developed, field tested, and revised. A listing of businesses and industries in the survey area will be compiled and contact will be made with businesses and industries by personal visit or letter. The guide will be distributed to vocational students, vocational technical instructors, and guidance personnel.

VTP-2899

Assessing Employment Opportunities for Vocational Education Graduates in York County.

Principal Investigator: Ramsey, Rolene

Recipient Institution: York County Public Schools, Yorktown, Virginia 23490

Start—End Dates: Start Date 1 Jul 77; End Date 10 Jun 78

Supporting Agency: Virginia State Board of Education, Richmond, Virginia 23216

Summary of Project: This project is designed to assess the possible full-time employment opportunities for students who are completing vocational education programs in York County. Objectives are to (1) provide current, accurate, and local employment information to all York County public high school students; (2) provide the vocational education program in York County with additional input for curriculum development; and (3) provide the guidance departments and job placement department with additional information pertaining to labor market conditions and employment information. A list of employers to be surveyed will be developed from sources within the county. A survey form will be developed and administered to employers, using the cooperative education coordinators, job placement counselor, selected students, and community groups as interviewers. Data identifying places of employment for various occupations will be collected, processed, and placed in a computer system. The information gathered will be shared with appropriate agencies in the area.

VTP-2900

To Assist LEA's in Implementing Competency-Based Instructional Programs in Vocational Education.

Principal Investigator: S. Ned

Recipient Institution: Old Dominion University, Norfolk, Virginia 23508

Start—End Dates: Start Date 1 Jul 77; End Date 30 Jun 79

Supporting Agency: Virginia State Board of Education, Richmond, Virginia 23216

Summary of Project: The overall objective of the project is to assist teachers in the implementation of performance-based curricula, thereby improving the teaching methods and techniques employed. Specific objectives are to (1) provide for an increase in the number of local education agencies being served and thus a significant increase in the number of instructors receiving training in competency-based instructional (CBI) through the use of V-TECS materials, (2) allowing a continuation of the present preservice and inservice training at the teacher education colleges and universities in eastern Virginia, and (3) generate an increase in the number of students receiving CBI and thus a significant increase in the rate and quality of learning of students enrolled in vocational education programs. A graduate teaching assistant will be assigned two, three-semester hour classes each semester to teach in the area of undergraduate inservice trade and industrial education. As a result of this assistance, the project director will be able to devote 50 percent time to assisting Local Education Agencies (LEA) with teacher training in CBI and the use of the V-TECS.

VTP-2901

A Follow-up of Former Vocational Student Completions and Early Leavers.

Principal Investigator: Underwood, Winston L.

Recipient Institution: Botetourt County Vocational Schools, Fincastle, Virginia 24090

Start—End Dates: Start Date 1 Jul 77; End Date 30 Jun 78

Supporting Agency: Virginia State Board of Education, Richmond, Virginia 23216

Summary of Project: The followup report received from the Virginia Education Reporting System indicated that only 60 percent of the graduates and early leavers responded to a survey. The purpose of this project is to contact 90 percent of all graduates and those who left school early on the local level to improve upon present methods of followup and to gather significant information as a sounder basis for curriculum revision. Objectives are to (1) accurately determine whether or not graduates and early leavers are employed in a training-related field, (2) determine how graduates and those leaving school early obtained employment, (3) ascertain if the graduate students who left school early are satisfied with their present jobs, and (4) determine average pay scales for both early leavers and graduates. Followup of graduates will be implemented primarily through written correspondence and questionnaire. Personal contact, as well as contact with present and former employers, relatives, and friends will also be used. Data collected will

be used to determine whether or not the student needed additional training, if the graduate or student who left school early is/was satisfied in his/her present or former job and to determine an average pay scale for graduates and early leavers.

VTP-2902

A Follow-up Study of 1977 Graduates from the Newport News Public Schools.

Principal Investigator: Cummings, Paul

Recipient Institution: Newport News City Public Schools, Newport News, Virginia

Start—End Dates: Start Date 1 Jul 77; End Date 10 Mar 78

Supporting Agency: Virginia State Department of Education, Richmond, Virginia 23216

Summary of Project: The project's purpose is to assess the needs of graduating students of Newport News school system and to provide guidance for upgrading and improving curriculum in the area of vocational education and industrial arts. Objectives are to (1) determine if the educational system is meeting the needs and requirements of high school students in the area of vocational education; (2) re-evaluate the present vocational programs in the system; and (3) facilitate the implementation of new programs. A questionnaire will be developed and mailed to 1977 graduates of Newport News Public Schools. The data analysis will be presented in a percentage relationship with respect to the number of questionnaires returned. Tables and figures will be utilized in portraying results of the analysis.

VTP-2903

Implementing Competency-Based Instructional Programs in Vocational Education (Using Performance Objectives and Criterion-Reference Measures).

Principal Investigator: Young, William P.

Recipient Institution: Arlington County Schools, 4751 North 25th Street, Arlington, Virginia 22207

Start—End Dates: Start Date 1 Aug 77; End Date 30 Jun 80

Supporting Agency: Virginia State Board of Education, Richmond, Virginia 23216

Summary of Project: This project will assist teachers in implementing performance-based curricula and improve the teaching methods and techniques employed. Specific objectives are to (1) provide basic learning resources needed by teachers in implementing the V-TECS (or other) competency-based materials (CBI); (2) provide technical assistance to teachers in such areas as incorporating CBI materials into existing instructional programs and developing learning modules as needed; (3) encourage teachers to recognize the student as the focal point in utilizing the performance-based approaches to vocational and technical education, and (4) develop a sequence of learning activities which will facilitate the articulation of programs in the middle schools, senior high schools, and advanced training programs. Teachers will be surveyed to determine the interest in the necessity for establishing a credit or noncredit course. A schedule, based on this information, will be prepared. James Madison University or Virginia Commonwealth University and Virginia Polytechnic Institute and State University will be contacted to determine the availability of staff and the requirements for awarding credit. One of these institutions will be asked for assistance in providing training. Announcements will be prepared to establish enrollment for the course. During the first year, a three-credit course will be conducted. In the second year, half-day workshops will be conducted as a preservice activity, monthly meetings concerning use of V-TECS materials will be held, and a second three-credit course will be offered. In the third year, a third credit course will be offered, individual and group projects will continue to be developed, and materials previously developed will be refined. (Note: Similar projects are being conducted at 23 other schools in Virginia.)

VTP-2904

A Plan to Produce and Distribute an Instructional Package for Teaching the Concepts of Competency-Based Instruction in Distributive Education's Inservice and Preservice Teacher Education Programs.

Principal Investigator: Hephner, Thomas A.

Recipient Institution: Virginia Commonwealth University, Richmond, Virginia 23284

Start—End Dates: Start Date 1 Jul 77; End Date 1 Jul 80

Supporting Agency: Virginia State Board of Education, Richmond, Virginia 23216

Summary of Project: The purpose of this project is to develop and make available an instructional package for use in preparing prospective distributive education teachers at Virginia Polytechnic Institute and State University, Virginia Commonwealth University, Old Dominion University, and James Madison University. Current competency-based instructional (CBI) materials (including written outlines and supplementary media) being used for inservice training will be studied and adapted or modified for the preservice package. Behavioral objectives and a pretest/posttest assessment will be prepared for each unit. An extensive use of media correlated to the state

behavioral objectives will be the major instructional resource. The printed portion of the instructional package will be developed first in rough draft form and evaluated by the institutions involved. Changes and modifications may be made at that time. The final product will be demonstrated at a two-day conference at a central site in Virginia. Representing each university will be two faculty members who have been designated by their program directors as potential users of the materials.

VTP-2905

A Plan to Produce and Distribute an Instructional Package for Teaching the Concepts of Competency-Based Instruction in Home Economics Preservice Teacher Education Programs.

Principal Investigator: Webb, Anita

Recipient Institution: Virginia Polytechnic Institute and State University, Blacksburg, Virginia 24061

Start—End Dates: Start Date 1 Jul 77; End Date 1 Jul 80

Supporting Agency: Virginia State Board of Education, Richmond, Virginia 23216

Summary of Project: This project will develop and distribute preservice instructional packages for competency-based instructional training to all nine teacher education institutions in Virginia. Current competency-based instructional material used for inservice training will be adapted and/or modified for the preservice package. An inservice package including pretest/posttest and behavioral objectives will be written for the teaching of competency-based instructional concepts and their implementation in home economics. Media correlated with the state objective will be developed and the rough draft form of the instructional package will be field tested at two institutions and revised as needed. The final product will be demonstrated for the nine institutions during a two-day conference at a central site in Virginia. Potential users of the materials at each institution will be invited to the conference and be given complete copies of the materials to take back to their respective institutions.

VTP-2906

Vocational and Technical Consortium of States in Virginia.

Principal Investigator: Vogler, Daniel E.

Recipient Institution: Virginia Polytechnic Institute and State University, Blacksburg, Virginia 24061

Start—End Dates: Start Date 1 Jul 77; End Date 30 Jun 80

Supporting Agency: Virginia State Board of Education, Richmond, Virginia 23216

Summary of Project: The purpose of the project is to develop catalogs of the performance objectives, criterion-referenced measures, and performance guides for which Virginia is responsible through V-TECS. Specific objectives are to (1) determine what has been developed in performance objectives and criterion-referenced measures in the selected occupational areas; (2) survey incumbent workers in the selected areas to determine the tasks performed and the relative amount of time spent on each; (3) use the survey results in developing catalogs of performance objectives, criterion-referenced measures, and performance guides; (4) field test the catalogs to determine their instructional validity and to prepare a final version of the catalogs reflecting the field test results; and (5) provide consulting assistance in the statewide inservice training effort on the use of the catalogs. A state-of-the-art study will be conducted and an occupational inventory will be developed. A domain report will be prepared and a group of incumbent workers will be surveyed. A field review version of the catalogs will be prepared, and the final catalogs will reflect the results of the field review.

VTP-2907

V-TECS and VEMS Materials.

Principal Investigator: Vogler, Daniel E.

Recipient Institution: Virginia Polytechnic Institute and State University, Blacksburg, Virginia 24061

Start—End Dates: Start Date 1 Jul 77; End Date 30 Jun 78

Supporting Agency: Virginia State Board of Education, Richmond, Virginia 23216

Summary of Project: The objectives of this project are to (1) print 20 V-TECS catalogs of performance objectives, criterion-referenced measures, and performance guides which are applicable to Virginia vocational education programs in sufficient quantities as determined by the Division of Vocational Education, State Department of Education; (2) identify and secure copies of competency-based instructional (CBI) materials for possible use in Virginia and print selected materials in sufficient quantity for vocational instructors; (3) print user's manuals, procedural guides, and reports which support the management information system in Virginia; and (4) distribute all printed materials to designated vocational educators. Twenty V-TECS catalogs, the user's manuals, participant's guide, and reports will be printed through arrangements with Virginia Polytechnic Institute and State University and/or as part of the scheduled training program in selected printing programs in local school divisions or vocational centers in Virginia. As the printing of the documents is completed, distribution will be made according to directions

from the Division of Vocational Education, State Department of Education.

VTP-2908

Wyoming Vocational/Occupational Education Research Project.

Principal Investigator: Durkee, Jim

Recipient Institution: Department of Vocational Education, College of Education, University of Wyoming, Laramie, Wyoming 82070

Start—End Dates: Start Date 30 Sep 76; End Date 1 Oct 77

Supporting Agency: Wyoming State Department of Education, State Office Building West, Cheyenne, Wyoming 82002

Summary of Project: The purpose of the project is to develop an organized system of research activities for vocational/occupational education in Wyoming. Procedures will include: (1) developing a list of needed research activities for the State Department of Education and the Department of Vocational Education; (2) conducting followup studies of former vocational/occupational education students; (3) evaluating current manpower opportunities, and studies and coordinating them with training programs; and (4) conducting necessary research activities for program planning and evaluation. The entire state will be included in the project with involvement of all educational institutions, agencies, and organizations involved in manpower projections.
