ABSTRACT `

Objectives of a research project were to determine current employer practices in personnel performance evaluation in New Hampshire, and to inform vocational teachers and guidance counselors of these employer practices so that they might make program or counseling service modifications to better acquaint vocational students with these practices. Interviews were conducted with twenty-three employers across the state to learn of their cyrrent . procedures in employee evaluations. Also, professional meetings of personnel managers and training seminars for personnel were attended to gain perspective and insight into the tasks personnel managers are required to do. Overall findings indicated that graduates who know what they want and what they have to cffer, and who cultivate human relations skills, will interview effectively and be more successful in landing a job. This report discusses the findings under three topics: how to get a job: evaluation prior to employment, how to hold a job: evaluation after employment, and the importance of work attitudes. Brief suggestions directed to vocational teachers for teaching work attitudes and interpersonal relations are included. These suggestions refer to use of the appended materials, which comprise the major portion of the report and include sample employer interview forms, employee performance evaluation forms, a listing of teacher resource materials. Introduction and Purpose

What makes a good vocational program? Are there any universally accepted 'criteria for vocational program quality?

A recent study conducted by the Center for Vocational Education at The Ohio State University (April, 1975) used the Delphi Technique to help develop a rank order of agreed-upon criteria for vocational program quality.

Using two rounds under the Delphi format, 66 criteria for quality were ranked by

more than 500 vocational educators from all levels of involvement.

As one might expect, the number one criteria was "Program content is current with occupational practice." It has been traditional to examine and re-examine vocational program content with craft committees to insure that this criteria of quality is present in all vocational programs.

However; once they are employed, vocational program graduates are evaluated from a number of points of view and the evaluation involves more than simply the vocational tasks performed. In fact, students who are employed in larger agencies—such as insurance companies, production industries, health services and retailing businesses—often find performance evaluations relate only in small ways to specific job skills. Factors such as interpersonal relationships, personal appearance, punctuality, motivation, and self-direction are given high priority as part of the periodic performance review.

Another study completed by the University of Tennessee (Porreca and Stallard, 1975) concluded that "affective domain competencies of students appears to be as important as cognitive and psycho-motor competencies in vocational-technical education."

Thus, while vocational educators are quite confident that the specific vocational skills taught in a given program are "current with occupational practice," We are not fully aware (nor are the students) of those other aspects of the world-of-work environment upon which our graduates will be evaluated.

To continue to develop quality vocational programs, we must know the full extent

of employer expectations above and beyond specific vocational skills.

It is the purpose of this research to learn of these employer expectations and accomplish the following two objectives:

- (1) To determine current employer practices in personnel performance evaluation in New Hampshire.
- (2) To inform vocational teachers and guidance counselors of these employer practices so that they might make program or counseling service modifications to better acquaint vocational students with these practices.

4

Methodologu

For the results of this study to be useful to the vocational teacher, first-hand knowledge of the actual methods employers currently use to evaluate their employees was essential.

The best way to gain this information was through face-to-face interviews with the personnel departments which have the responsibility for hiring of new employees and evaluating existing employees.

Interviews were conducted with twenty-three (23) employers across the state to learn of their current procedures in employee evaluations. These interviews were held with businesses and industries of diverse size and geographic location — industries representative of the occupational areas for which vocational education prepares students.

The interview process offered employers three methods of providing data and materials:

- (1) Employers responded to a standard set of prepared questions.
 - (2) Employers offered open-ended comments about their methods of employee evaluations.
 - (3) Copies of evaluation materials which employers use for employee evaluations were obtained.

The instrument used in the interviews posed the following five questions for directing the discussion:

- (1) Does your company/organization use a written evaluation form which deals with the performance of your employees? If so, could we please a sample copy?
- (2) In hiring new personnel, what are the six basic factors you feel are most important?
- (3) How are employee evaluations for pay raises or promotion conducted in your company/organization?
- (4) Who is involved in these evaluations?
- (5) What are the most common reasons for termination of an employee?

In addition to these standard questions, each personnel representative was asked. It to rank the relative importance of the following ten factors of work attitudes.

- 1. PERSONAL HYGIENE AND APPEARANCE: the person is appropriately attired.
- 2. TRAINABILITY: the person accepts constructive criticism, follows instructions willingly and performs consistently:
- 3. SELF-CONFIDENCE: the persons believe their own actions influence future events.
- 4. RESPECTFULNESS: the person respects co-workers, supervision and property.
- 5. TRUSTWORTHINESS: the person can handle information discreetly and respects confidences.
- 6. OPTIMISM: the person expects good from people and satisfaction from the natural course of events.
- 7. WORKING LEXIBILITY: the person is willing to work hours requested, is on time and is present all days required.
- 8. **RESPONSIBILITY:** the person is able to handle responsibility justly and able to work under stress.
- 9. AMBITIOUS: the person is striving for advancement or growth.
- 10. COOPERATIVE: the person is able to work well with others.

Twenty-three employers (see Appendix A) were identified and interviewed. In most cases the personnel representative hired from two or more of the vocational education areas. For example, a large electronics company might employ secretaries, engineers, draftsmen and machinists. The employers were selected based on these considerations:

- Located in New Hampshire
- All vocational education areas were represented
- Both urban and rural employers were represented
- Small, medium, and large employers were represented

In addition to the interviews, the researchers also attended professional meetings of personnel managers and participated in training seminars for personnel. From these we were able to gain perspective and insight into the tasks personnel managers are required to do. Employee evaluation is critical because so much is at stake — for the people rejected, for the people hired, for the people promoted, and for the people fired.

The interviews were designed to find the answer to two basic questions:

- (1) What techniques are being used during the interviewing process to determine which potential employee to hire?
- (2) What techniques are being used once an employee is on the job to assess his or her potential and performance?

Findings

There are many more qualified applicants applying for most jobs than can possibly be hired. Personnel management has a difficult task in finding the best person for the company. The definition of "best person" is a person who will be an asset to the company — one who will stay with the company and work hard. Personnel people are trained in the art of communication-questioning skills, listening skills, and understanding non-verbal communications. It is their job — within legal confines — to gather as much information about an applicant in order to make the best possible hiring decision.

The job market in New Hampshire continues to be very tight. And the new vocational graduates enter this market with some strong strikes against them. Specifically, the graduates are:

- Young
- Inexperienced
- Statistically not stable on the job.

Vocational teachers have the opportunity to change these debits to credits. Our findings clearly indicate that graduates who know what they want and what they have to offer, and who have cultivated human relations skills, will interview effectively and be more successful in landing a job.

- Our findings are extensive and will be presented in three broad areas;
 - 1. Evaluation prior to employment "How to Get a Job"
 - 11. Evaluation after employed "How to Hold a Job"
 - III. The Importance of Work Attitudes

How to Get a Job: Evaluation Prior to Employment

The minute a vocational graduate makes contact with a potential employer, the evaluation process begins. Thus, competition for jobs begins long before a person even has the opportunity to demonstrate his or her vocational skills. Graduates of vocational programs, therefore, require skills in the job interview process if they are to improve their chances of obtaining the job they want. Actual forms which personnel managers use in the interview process are available in Appendix B.

In many organizations the interview process itself has a number of steps beginning with the initial contact with the receptionist.

When the job applicant is brought to the company, sometimes the personnel receptionist will "code" the application form with some brief general impressions of the applicant. The receptionist may also choose to pass the application on to personnel or file it away.

The second step is usually a meeting with a member of the personnel department. The purpose of this stage of the interview process is important to keep in mind. Here the applicant has a chance to convince personnel that he or she has the necessary qualifications and is the right person for the job. Personnel managers look for the relevant information needed to make the hire/reject decision. The interview with personnel usually emphasizes identification of work habits and attitudes. Specifics being considered are aptitude, personality, motivation and character. Personnel will be alert to the manner of response passes that may indicate avoidance of critical issues—and will investigate further in these areas. In essence, every possible factor is considered by the interviewer and then evaluated. It is his job to decide if the jeb specifications and the applicant's skills will match.

The third part of the screening process is performed by the department supervisor who assesses the applicant's specific job skills. This interviewer also assesses work attitude factors. Personality traits often play an important role — it is in the company's best interest to hire a person who will be an asset, a person who will get along well with other employees.

While variations in the evaluation prior to employment often occur, affective domain competencies are always considered. Sometimes an informal score card is maintained on each applicant with all interviews being recorded. Such a record is important and valuable when large numbers of applicants apply for a given position. This pre-employment record is destroyed as soon as the applicant is hired or rejected.

The personnel workers in New Hampshire are fully aware and respectful of the legal structure which restricts the questions job applicant is required to answer. In fact, it was suggested that students be taught the laws governing equal employment opportunities.

How to Hold a Job: Evaluation After Employment

Personnel evaluation after employment is a more extensive and formal process.

Nearly every employer has a probationary period for the new employee. During this time a mutual evaluation of the employer-employee relationship and the job environment takes place. It is understood that during this period either party can terminate the employment with no recriminations.

Most employers have required procedures and forms which are used in periodic employee evaluations. These forms show clearly that employee evaluations hinge strongly ompersonal and attitudinal factors as well as cognitive and psychomotor skills.

Most New Hampshire employers evaluate their employees for three reasons: pay raises, promotion, and personal improvement. Evaluations for these purposes are usually performed at the same time and with the use of the same questionnaires. Some employers, however, believe these evaluations should be done separately to allow employee growth and development to be emphasized and separated from salary and promotion considerations.

There are three different types of job evaluations performed. One for hourly wage positions; one for salaried non-exempt, such as office workers and technicians, and one for salaried exempt or managerial positions. The affective domain competencies appear to be more important in the salaried positions.

In all of these positions the evaluation usually begins with the immediate supervisor. Some instruments used are included in Appendix C. The criteria used include cognitive, psychomotor, and affective domain competencies. The employee's evaluation and his supervisor's evaluation are then compared and a decision is reached concerning the pay raise or promotion.

The importance of Work Attitudes

Each of the twenty-three (23) employers was asked to rate the relative importance of the ten factors which comprise working attitudes. While there were some differences, the following pattern was recorded.

WORKING ATTITUDES

	•	Extremely Important	Very Important	Not Important	Definitely Not	Does Not Apply
1. PERSONAL HYGIENE AND APPEAR-ANCE: the person is appropriately attired.				٠,		•
2. TRAINABILITY: the person accepts constructive criticism, follows instructions willingly and performs consistently.		4		,	· ·	
3. SELF-CONFIDENCE: the person believes his own actions influence future events.	•			•	- ·	- ,
4. RESPECTFULNESS: the person respects co-workers, supervision and property.	` ' (•	, •			
5. TRUSTWORTHINESS: the person can handle information discreetly and respects confidences.	· ·.		\			
6. OPTIMISM: the person expects good from people and satisfaction from the natural course of events.	· ·			•	•	,
7. WORKING FLEXIBILITY: the person is willing to work hours requested, is on time and is present all days required.	•					
8. RESPONSIBILITY: the person is able to handle responsibility justly and able to work under stress.	<i>.</i> `.		-	•	,:	
 9. AMBITIOUS: the person is striving for advancement or growth. 10. COOPERATIVE: the person is able to work well with others 	. •					

ERIC Full Text Provided by ERIC

An analysis of the above table indicates: -- .

- The factors of TRUSTWORTHINESS and WORKING FLEXIBILITY were rated . the highest in terms of employer importance.
- The factors of PERSONAL HYCIENE and APPEARANCE, RESPECTFULNESS, and COOPERATIVENESS were close seconds.
- Other characteristics added to the list in the "other" category involved being Dependable, Hard-working, Economic-minded, and Stable.
- There were a number of occupations with specific characteristics which one might expect, such as:
 - Personal hygiene and appearance were extremely important in health related occupations as well as business and office occupations.
 - Trainability was ranked very high in the manufacturing and technical industries.
 - Self-confidence was a factor which employees looked for in identifying future leadership potential.
 - Responsibility was another factor in identifying leadership or supervisory potential.

How the Vocational Teacher Can Make a Difference

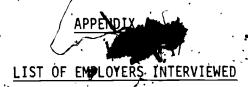

This study has demonstrated that if a vocational education program is to be considered "current with occupational practice," there must be provision for instruction in the importance of work habits, attitudes and interpersonal communication skills as part of the program.

When asked if they address work habits and attitudes in their programs, vocational teachers and counselors usually indicate that these concepts are implied or discussed all the time. In fact, some of these factors are part of the grading process. However, this is not enough. If our vocational program graduates are to be fully prepared for entering and maintaining employment, a more substantial instructional effort in the teaching of work attitudes and interpersonal relations is required.

Suggestions for teacher action:

- (1) Vocational programs should have explicit instruction in personal development including work habits, attitudes, and interpersonal communication skills.
- (2) Vocational students must receive first-hand experiences in job-seeking skills. The can be accomplished in a number of ways, such as:
 - a. Study, complete, and discuss sample job application forms as those in Appendix B.
 - b. View films on the job interview process.
 - c. Role-play the job interview with fellow students and instructors.
 - d. Invite a local personnel manager to the classroom to discuss the job interview process and to demonstrate (role-play) various interview situations.
 - e. Assist the students in writing a resumé.
- (3) Vocational students must be knowledgeable in the purposes and methods which employers use to evaluate their on-the-job performances. The materials included in Appendix C provide a number of examples of actual evaluation instruments currently used by employers. These might be used by students to self-evaluate their performance in the vocational education program.
- (4) Vocational teachers should have access to a wide variety of instructional materials and media which address the areas of career and personal development. Commercial production of these materials has increased dramatically over the past few years and their cost is most reasonable. While some of the materials are designed for specific vocational areas, and their cost are program most are program and can be used in a variety of vocational program.
- most are generalized and can be used in a variety of vocational program areas. A comprehensive bibliography of instructional materials for teachers appears in Appendix D.
- (5) Feedback to students enrolled in vocational programs should include information on work habits, attitudes, and interpersonal skills as well as grade reporting on program content and vocational skills.

SAMPLES: PERFORMANCE EVALUATION FORMS

PERFORMANCE RATING,

NAME	DATE
DEPARTMENT	JOB TITLE
Check one of the descriptive phrases in the employee.	each factor which most clearly describ
FACTOR I - JOB KNOWLEDGE, concerns how coabout all the types of work, methods, prajob is accountable.	ompletely the employee has learned actices, procedures for which his
 Limited knowledge. Regularly needs Fair knowledge, but still requires of Confidence in his knowledge, but still Well informed on requirements. Rarely for it when needed. An expert. Outstanding ability in an employees have a high regard for his 	casional checking. I needs coaching on details. Ly needs assistance and asks Oplying knolwedge. Fellow
Comment:	
FACTOR II - PERFORMANCE	•
 Approaches job in unimaginative and too much time, effort and materials Erratic, inconsistent, easily discour adjusting to new work. Has limited Steady, predictable. Does what is as beaten path. Completes work on time wasted time. Self-starter. Adjusts to new situation Most other fellow employees respect Unusual initiative: makes extremely vals consistently productive, handles and uses time effectively. 	are used. raged. Difficulty in accomplishments. ked, but doesn't leave the with a minimum amount of lons readily. Resourceful. his abilities. valuable contributions.
Comments:	
FACTOR III - DEPENDABILITY	, /,
 Absentee and punctuality record are pany difficulties. Does not handle well as sometimes lacks common sense. Attended desirable. Accurate, but still require of attending and industry. Attendant Constantly dependable and thorough. Always punctual. Very good attendants. Entirely reliable. Tends to influence. 	ell, confidential information. ance is somewhat less than uires monitoring. nces some infrequent lapses ce is reasonably good. Rarely needs checking.

FACTOR IV - ATTITUDE, concerns the impact his behavior has on others, reflections of his attitudes towards his job and towards his co-workers. Concerns the employee's receptiveness to suggestions, new ideas, constructive criticism, whether from his subordinates or his superiors.

1. Hostile and frequently uncooperative. May do his own job as he sees it and resists doing any more. Disturbing influence.

2. Goes along with required activities but tends to resist new ideas. Apt to be a difficult person to correct? Rarely cooperative person when the situation is not to his immediate advantage.

3. Usually gets along well with others.

4. Always willing to cooperate with his superiors and fellow employees.

5. Is team oriented. An informal group leader who constructively influences others.

Comment:

1. Does the employee's present position permit the best use of his capabilities

What specific types of positions should this employee be considered for?

Has he indicated a special interest in any other type of work? What should he do or we do to prepare the employee for the other position, if applicable?

3. What training or educational course(s) has he taken in the last twelve months?

This performance rating has been discussed with me.
