ABSTRACT

This compilation of 209 document resumes provides educators with abstracts of research, curriculum, and other materials in vocational and technical education, and abstracts of funded research and development proposals. The resumes are arranged in ascending order according to ED (ERIC document) accession number, with each resume including the author(s), title, institutional source, sponsoring agency, availability, publication date, number of pages, subject terms which characterize the contents of the document, and a decument abstract. Subject, author, and institution indexes are provided. Availability information includes microfiche and hard copy \cdot prices from the ERIC Document Reproduction Service (EDRS). The section on projects in progress contains fifty-four resumes announcing ongoing curriculum development and research projects funded by the Vocational Education Amendments of 1968, parts C. D. I. and J. Included for each are title, principal investigator, recipient institution, start/end dates, supporting agency, contract and/or control number, and a brief project summary. Projects are listed by state, and names and addresses are provided for both individuals and institutions. (BL)

Foreword

Finding available information is a major task for researchers, curriculum specialists, teachers, administrators, and students. The National Center for Research in Vocational Education is dedicated to helping others find useful information.

Resources in Vocational Education is prepared bimonthly by the staff of the National Center for Research in Vocational Education under a contract with the U.S. Office of Education, Bureau of Occupational and Adult Education. Included are abstracts of pearch, instructional, and other materials in vocational and technical education, and abstracts of funded proposals. The full text of most documents announced in Resources in Vocational Education is available in microfiche or hard copy from the ERIC Document Reproduction Service (EDRS). Microfiche also is available in local ERIC microfiche collections.

We appreciate the contributions of state research coordinating units, curriculum coordination centers, instructional materials laboratories, local school systems, colleges and universities, and professional associations. Members of the profession are encouraged to send instructional and research material for possible inclusion in future issues of Resources in Vocational Education.

Robert E. Taylor, Executive Director National Center for Research in Vocational Education

Descriptors— Curriculum Development, Curriculum Research, Decision Making Skills.
 "Group Dynamics, Group Membership, Instructional Materials, *Interpersonal Competence, *Leadership Training, Material Development, Performance Based Education Secondary Education, *Skill, Development, student Attitudes, *Task Performance, Teacher Attitudes.

The project examined the effects of learned leadership/membership skills on performance in taskoriented groups, developed competence-based instructional materials to teach such skills, and examined the effects of such skills on individual and group knowledge, skills, attitudes, and performance. Following a literature review, mat rials review, and needs assessment, discussions and questionnaires gathered information from teachers, parents. counselors, managers, employers, and students. Specific needs having been established, the curriculum design and prototype modules were developed. Eight priority areas were identified as those to be addressed in the development effort. Group communication, knowing and using resources, evaluation, conflict resolution, planning, coordinating activities, sharing leaderships, and decisioninaking Extensive pilot testing over the following two years involved a variety of student settings-urban, suburban, rural; large schools and small; academically motivated students and underachievers; vocational. experimental, and traditional academic classes. Findings indicated that (1) administrators, teachers. and students appreciate the need for and value of instruction in the cooperative group interaction skills area. (2) the skills in this area of competence are difficult to teach, and (3) extended research and development-which would take into consideration further testing, teacher training, curriculum fusion. and curriculum design-would be of significant value. Appendixes contain the curriculum outline. operational definitions of effects to be tested in taskoriented groups, summary charts of selected evaluation items, and some reflections on and implications of the cooperative group interaction skills (CGIS) _curriculum_ (Author TA)

Identifiers-American Vocational Association

Issues, concepts, and strategies that impact directy on the ability of vocational education to deliver its services to special groups are the focus of this yearbook. Chapters by 24 different authors are divided into three sections. Section 1 provides an overview of special groups, how special groups evolved, their underlying structure and diversity, and how vocational education might be of benefit in solving some of their problems Section 2 contains chapters which focus on specific special groups and their individual status in society-at-large and describe in detail certain personal characteristics that tend to categorize persons into special groups. Scction 3 includes a series of chapters that give detailed attention to specific strategies that might be employed in delivering vocational education to special groups Programs for personnel development, integration of special services with instruction, and gencral administrative and organizational techniques are discussed. The special groups discussed include the handicapped, women, retirees and middle-age career changers, blacks. Native Americans, Mexican-Americans, prison inmates, migrants, welfare recipients, veterans, and youth. (TA)

Identifiers-United States

Written before the congressional deliberations which resulted in changes in the Vocational Education Act, this report makes the recomme dations for national priorities of vocational education legislation. The report is in two general sections (1) A National Planning Association (NPA) joint statement entitled "Strengthening Vocational Education in America" and (2) the basic report in six chapters and five statistical tables. The joint statement contains footnoted explanatory or contradictory comments by individual committee members. Chapter 1 provides an overview of current developments in vocational education and briefly discusses alternative issues. A discussion of enrollment changes, program changes, and the need to reach handicapped and disadvantaged students is contained in chapter 2 Economic and educational performance indicators in relation to vocational education programs are discussed in enapter 3. Chapter 4 considers the labor market changes and discusses rural urban differences Chapter 5 deals with dollar spending as an indicator of priorities, and chapter 6 discusses the grants system tied to specific legislative objectives. *Metric System, Natural Resources, Secondary
Education. Teaching Techniques. Units of Study.
*Vocational Education

Designed to meet the job-related metric measurement needs of agricultural mechanics students, this in tructional package is one of four for the agribusi-

ness and natural resources occupations cluster, part of a set of 55 packages for metric instruction in different occupations. The package is intended for students who already know the occupational terminology, measurement terms, and tools currently in use Each of the five units in this instructional package contains performance objectives, learning activities, and supporting information in the form of text, exercises, and tables. In addition, suggested teaching techniques are included. At the back of the package are objective-based evaluation items, a page of answers to the exercises and tests, a list of metric materials needed for the activities, references, and a list of suppliers. The material is designed to accommodate a variety of ind'vidual teaching and learning styles, e.g., independent study, small group, . ale-class activity. Exercises are intended to tacilitate experiences with measurement instruments, tools, and devices used in this occupation and job-related tas's of estimating and measuring. Unit I, a general introduction to the metric system of measurement, provides informal, hands-on experiences for the students. This unit enables students to become familiar with the basic metric units, their symbols, and measurement instruments, and to develop a set of mental references for metric values. The metric system of notation also is explained. Unit 2 provides the metric terms which are used in this occupation and gives experience with occupational incasurement tasks. Unit 3 focuses on job-related metric equivalents and their relationships. Unit 4 provides experience with recentizing and using metric instruments and tools in occupational measurement tasks. It also provides experience in comparing metric and customary measurement instruments. Unit 5 is designed to give students practice in converting customary and metric measurements, a skill considered useful during the transition to metric in each occupation (HD)

Designed to meet the job-related metric measurement needs of students interested in agricultural supplies and services, and agricultural production, this instructional package is one of four for the agribusiness and natural resources occupations cluster. part of a set of 55 packages for metric instruction in different occupations. The package is intended for students who already know the occupational terminology, measurement terms, and tools currently in use Each of the five units in this instructional package contains performance objectives, learning activities, and supporting information in the form of text, exercises, and tables. In addition, suggested teaching techniques are included. At the back of the package are objective-based evaluation items, a page of answers to the exercises and tests. a list of metric materials needed for the activities, references, and a list of suppliers. The material is designed to accommodate a variety of individual teaching and learning styles, e.g., independent study, small group, or whole-class activity Exercises are intended to facilitate experiences with

measurement instruments, tools, and devices used in this occupation and job-related tasks of estimating and measuring. Unit I, a general introduction to the metric system of measurement, provides informal, hands-on experiences for the students. This unit enables students to become familiar with the basic metric units, their symbols, and measurement instruments, and to develop a set of mental references for metric values. The metric system of notation also is explained. Unit 2 provides the metric terms which are used in this occupation and gives experience with occupational measurement tasks Unit 3 focuses on job-related metric equivalents and their relationships. Unit 4 provides experience with recognizing and using metric instruments and tools in occupational measurement tasks. It also provides experience in comparing metric and customary measurement instruments. Unit 5 is designed to give students practice in converting customary and merric measurements, a skill considered useful during the transition to metric in each occupation (HD)

Each of the five units in this instructional package contains performance objectives, learning activities, and supporting information in the form of text, exercises, and tables. In addition, suggested teaching techniques are included. At the back of the package are objectivebased evaluation items, a page of answers to the exercises and tests, a list of metric materials needed for the activities, references, and a list of suppliers The material is designed to accommodate a variety of individual teaching and learning styles, e.g., independent study, small group, or whole-class activity. Exercises are intended to facilitate experiences with measurement instruments, tools. and devices used in this occupation and Job-related tasks of estimating and measuring. Unit I, a general introduction to the metric system of measurement, provides informal, hands-on experiences for the students. This unit enables students to become familiar with the basic metric units, their symbols, and measurement instruments; and to develop a set of mental references for metric values. The metric system of notation also is explained. Unit 2 provides the metric terms which are used in this occupation and

gives experience with occupational measurement tasks. Unit 3 focuses on job-related metric equivalents and their relationships. Unit 4 provides experience with recognizing and using metric instruments and tools in occupational measurement tasks. It also provides experience in comparing metric and customary measurement instruments. Unit 5 is designed to give students practice in converting customary and metric measurements a skill considered useful during the transition to metric in each occupation. (HD)

The "start-up" industry training concept has received considerable attention as a way to better match workers and jobs, to "leapfrog" the industrial development process by attracting higher-wage industry to an area through upgrading local work forces, and to make it possible to increase the wages' of low-income workers. A study examined in detail, the programs of South Carolina, North Carolina, Virginia and Alabama and their effect on industrial relocation trends and the leapfrogging of the unemployed and underemployed into the labor force. Comparative analyses were made of the accomplishments, operational and support organizations. costs, and the start-up processes of all four States. The results of the regression analysis and cluster analysis did not support the hypothesis that training programs had influenced industrial location. They constantly showed that counties which, pre-program wise, had favorable employment, high education, population, and industrialization, continued to have them, while those that did not continued to do without. Curriculum materials presented in this Spanish-English guide, one of five developed as part of the vocational strategies project, are intended to provide vocational services to mildly handicapped special needs students mainstreamed into regular high schools Material is sequentially arranged, emphasizing those skills which a student needs to know initially, and those which become critical as the time of actual employment nears. The first unit. "Your Name and Some Important Things You Should Know," concerns basic knowledge and can be used as early as the first year in high school. Exercises are provided for budgeting time, learning to use public transportation, answering questions, and obtaining a Social Security card. The second unit. "Finding Jobs," covers processes for finding work through the media, the Yellow Pages of the telephone book, the employment ads, and the State employment office The third unit, "Applying for Jobs," gives students practice in filling out actual job applications and in mastering the job interview Contents for each of the 11 lessons in the three units include lists of learning objectives and needed materials, notes to the teacher, and copies of student written exercises (in both English and Spanish). A pamphlet on applying for a Social Security card is included (TA)

Instructional materials presented in this teaching guide, one of five developed as part of the vocational strategies project, are intended to provide vocational services to mildly handicapped special needs students thainstreamed into regular schools at the middle school level. The skill development described is based on the belief that preparation of special needs students (learning disabled, emotionally disturbed, and retarded) before they enter high school will facilitate their vocational learning later. The first section of the manual contains six lessons with student exercises that emphasize good work habits such as the importance of effort, punctuality, neatness, and cooperation through reading, role playing, and discussion. Also included in the job exploratory section are specific safety precautions which are stressed in lessons on tools. Students are introduced to selling and merchandising, mass production, assembly line, economics of cost, and ecology. The second section, vocational exploratory, pertains to social skill and prevocational development. The six lessons are on safety. blueprint reading, and several assembly projects. Lesson objectives, vocabulary, learning activities, and work self-evaluation sheets are included. (TA)

Designed as a guide to the inservice training of instructional aides in the Vocational Strategies for Special Needs Students Program, in Boston, this manual is intended to aid in the general training of paraprofessionals. The inservice training program outlined is aimed at developing the relationship building skills of the instructional aide at the shop training station, in the resource room, and in the counseling situation Part A of the s. anual contains a description of the prospective paraprofessional, the process for hiring, and the responsibilities of vocational instructional aides, a job application form, a discussion of staff structure including the roles of vocational (shop) instructor, resource room teacher, teacher counselor, and training coordingtor, and notes on where the use of paraprofessionals has been effective. Part B outlines the seven units of the training program which focus on specific vocational skills, clinical psychology, handicaps, study of work, and utilizing resources. Suggestions for the trainer include teaching procedures and techniques for the workshop sessions. Suggested format is seven units of workshops, each consisting of five sessions conducted by community experts on topics necessary to effective performance of vocational instructional aides and five complementary sessions conducted by the training coordinator for integrating instructional aides into the total support team and for involving them in verbal and written communication skills. Identifiers-Massachusetts, Massachuset's (Boston)

Instructional materials included in this guide were developed to provide vocational services to mildly handicapped special needs students mainstreamed into regular schools. Material represents strategies or directions in specific areas of occupational education, rather than specific curriculum guides; it is addressed to both the teacher and the student. Five specific areas are covered in the manual: Automotive mechanics, electronic assembly, mechanical assembly, printing, and welding. Related math and vocabulary sections are included. Emphasis is on activities and operations which are concretely and specifically job related. (The manual is intended for use with four other manuals produced by the vocational strategies project.) This first volume of a two-volume final report contains description and findings of a 3-year research and demonstration project in which a small human resource diagnostic and consulting service was established at a State land-grant institution (Utah State University) to provide a broadly based technical assistance program directed toward improving personnel systems, training approaches, and other manpower management practices of private firms and public agencies within the State and region. Chapter 1 is an overview and exceutive summary of the program designed to help employers and their workers improve organizational productivity, the utilization of human resources, and the quality of working life. Chapter 2 contains a brief project history, a summary statement of objectives originally set out for the project, and a description of project activities. The project findings are presented in chapters 3 and 4. Information obtained about several other employer service programs are presented in chapter 5 along with a brief summary of the related findings from the upgrading demonstration projects. Drawing upon the findings and conclusions contained the preceding three chapters, chapter 6 outlines a proposed model for delivering manpower advisory services to the employed workforce, explains how the proposed model might fit in as a component of national manpower policy, and makes suggestions for future directions (Volume II. bound separately, contains the technical appendixes to which reference is made in volume 1) (Author/JT)

Identifiers—Massachusetts, Massachusetts (Boston), New York, New York (New York)

The purpose of the study was to investigate three separate aspects of the process by which ex-addicts-in-treatment are prepared for, enter into, and function in the world of work. These aspects were the actual labor market conditions in two different urban settings-New York City and the greater Boston area, the specific institutional supports available to ex-addicts and addicts-in-treatment as those supports are perceived by both clients and providers of scrvice, and an analysis, by employers, of the perforniance and behavior of ex-addicts and addicts-intreatment once they have secured employment. Surveys were taken to define the practices of drug treatment programs In addition, a questionnaire was developed to isolate the key employment related issues and practices that comprise clients' and providers of service' perceptions of the rehabilitative situation Finally, through the development of a specific relationship with PACT (Provide Addicts Care Today), the Job-related behavior of ex-addicts and addicts-in-treatment was assessed Results indicated that (1) the two urban labor markets examined offer only limited options for meaningful, remunerative, and stable employment. (2) drug treatment programs, despite stated priorities involving preparation for employment, are neither structured, funded, nor staffed to adequately provide concrete employment related services. (3) chents rely more on their own rather limited resources in order to gain employment, and (4) ex-addicts who are hired and retained are rated by employers as above average in performance, compared to nonaddicts (SH)

Caucasians. *Educational Experience. *Employment Experience, *Expectation, Females. Labor Market, *Labor Supply. Males. Occupetional Aspiration, *Racial Differences. Racial Discrimination. Self Concept. Sex Discrimination. Work Attitudes

The research reported here examines the role of psychological expectancies as labor market supply characteristics of black and white men and women. Secondary analyses are carried out on data provided by the Survey Research Center 1972 national probability sample of adults 18 years and older drawn for the presidential election study. The report focuses on race and sex differences in previous labor market experiences, the relationship of these past experiences to current employment expectancies and gencral feelings of efficacy, and finally the effects of both market experiences and expectancies on current behavior Psychological expectancies are emphasized as the elements of motivation that should have unusual significance for understanding the dynamics of race and sex discrimination in the labor market There are five major chapters Chapter 1 describes the sample and measures used in the anasyses reported here. Chapter 2 describes the market speriences, perception of obstacles, and current expectancies of black and white men and women Chapter 3 examines the interrelationships of these variables with particular focus on the effects of years of schooling and previous market experiences on current expectancies Chapter 4 presents a general causal model in which expectancies are viewed as intervening influences between current market outcomes and variables at two earlier stages, original educational attainment at stage one and subsequent market experience at stage two. Three types of current market outcomes are analyzed with application of the model to the job status of blacks and whites. to women's and nien's scarch behavior, and to the work intentions of white housewives. Chapter 5, on implications for counseling and future research, describes the types of expectancy and experience measures and the design that will be needed to extend this line of interdisciplinary labor market rescarch. Identifiers-Rhode Island (Providence)

This first volume of a three-volume final report describes the activities of a 3-year project to design. develop, and implement a comprehensive delivery system to meet the career-related information, guidance, and referral needs of home-based adults, those 16 and older neither working nor attending school on a full-time basis. The volume begins with a brief history of the model, tracing the project's evolution through the various stages of development and describing major events related to the process of planning, operating, and evaluating the program. The next section describes the major activities and accomplishments of each of the model's five major components (1) Outreach, which used mass media and other approaches to attract clients, (2) counseling, which provided career information, guidance. and referral by telephone using paraprofessional counselors, (3) the resource center, which coilected and disseminated career-related materials for project staff, clients, and the community, (4) the information unit, which developed special directories and materials which supported the counseling process and could be sent to clients, and (5) research and evaluation, which provided project staff with feedback about the clients and the operation of the program. A third section describes the characteristics of the pilot site in Providence. Rhode Island, and how the project interacted with the community including its role in local adaptati ifter the research and development phase The fin ection discusses the project's efforts to share its experiences and findings with potential adaptors of the model and other interested persons outside Rhode Island (Volume 2 presents research and evaluation findings with primary focus on home-based adults who used the career counseling service. Volume 3 consists of appendixes) (TA)

Identifiers-Rhode Island (Providence)

This second volume of a three-volume final report presents research and evaluation findings of a 3-year project to design, develop, and implement a comprehensive delivery system to meet the careerrelated information, guidance, and referral needs of home-based adults, those 16 and older neither working nor attending school on a full-time basis. Primary focus is on home-based adults who used the career counseling service, which provided information, guidance, and referral by telephone using paraprofessional counselors. Section 2 details the demographic characteristics of 2,979 home-based adults, who called the service (August 1973 to March 1975) and examines the extent to which the nature of the callers changed over time. Section 3 describes characteristics of 1,157 home-based clients who used the service from March 1974 to March 1975 and explores clients' expectation from counseling, initial career objectives; and other factors. Section 4 presents data related to the nature and extent of activities engaged in by counselors and clients during the process of counseling. Section 5 examines the clients' career status at termination. Section 6 describes how clients reacted to and evaluated the services they received from the project. Section 7 deals with use of the resource center based on 268 noninstitutional visitors who used it in 1974. The final section of Volume 2 presents information collected during indepth interviews with 40 former clients (Volume 1 of the final report covers the nature, context, and products of the model. Volume 3 consists of appendixes to the project.) (TA)

Identifiers-California

The objective of this study was to develop an economic approach to the forecasting of allied health manpower in markets in the State of California. The health manpower categories considered included. (1) Medical technology, (2) occupational therapy, (3) dietetic and nutritional services, (4) physical therapy, (5) health administration, (6) environmentol health, and (7) speech pathology and audiology Four projection techniques were applied to the seven selected health-related fields. The first was a basic population ratio approach, the second a modified ratio approach that brings in a limited number of other factors affecting demand, the third an econometric approach that assumes equilibrium between supply and demand, and the fourth an econometric approach that assumes disequilibrium between supply and demand. A committee of economists from California State Universities and Colleges served in an advisory capacity to the project, and it was the consensus that the general approach used was methodologically sound. The study was limited to using existing sources of data, which differed in their completeness for the various fields. The forecasts developed are useful for curnculum planning, faculty staffing, and career development. An overriding theme resulting from the empirical work is that these allied health manpower markets are heterogeneous, i e, variables significant in one market were found not to be significant in another. The most significant issue that became apparent was the need for data of high quality. While the basic and modified ratio approaches are easily programed for staff use, the general conclusion is that the econometric approach with markets in equilibrium is the most viable. The report includes summary of the literature review, lists of data needs, and future research suggestions (WL)

A survey questionnaire was mailed to all active P. ace Corps Volunicers (PCVs) in the summer of 1975 Based on an internal analysis of the 3,479 respondents (a 66% return), the following findings represent the manner in which PCVs perceive their volunteer experience Perceived volunteer accomplishments and morale are very high Volunicers believe they are generally achieving the three Peace Corps goals. Volunteer assessment of four specific program areas (recrintment, training, program development, and program implementation) indicates considerable variations, the most serious problem for most volunteers being their relationships with the host country agencies Results led to the following recommendations (1) Program for planned positive impact so that jobs are better developed. sites more carefully chosen, and host country natronals less likely to be replaced. (2) undertake a concerted effort to strengthen the relationship between volunteers and their host country agencies. (3) spend less time providing direct support to volunteers and more time working to be sure that agencies are willing and able to support them, (4) place volunteers only in jobs where adequate supervision by host country agencies is provided and the role of the volunteers clearly understood. (5) provide more specific and accurate preservice information. (6) continue and increase where possible the practice of having trainees live with host country

families during training, and (7) carefully review the

placement of volunteers who teach English as their

primary job. The report includes country-specific

data on volunteer achievement and selected areas of

pended (WL)

Identifiers-Work Incentive Program

Selected research on the Work Incentive Program (WIN), legislated in 1967, and related research on low income families are reviewed with the aim of gathering empirical findings which illuminate the factors affecting WIN results and to contribute to discussion of future welfare, work training, and employment policies. Areas of research and discussion include the following: Work potential and work orientations of welfare persons, impact of WIN (input-cutput emphasis and process emphasis), altertile work incentives, family structure and personal motivation, and policy alternatives in historical perspective Results presented show that (1) welfare participants want to work, but substantial barriers (including poor health, low skills, need for child care) stand in the way of continuing labor force participation, (2) WIN has a beneficial effect upon some of those persons who receive services, but it is not clear which aspects of the WIN effort provide these beneficial results: (3) work-for-relief efforts are not cost effective; (4) when public service jobs are provided for welfare recipients, the recipients function very well, according to their work supervisors and self-evaluation, and (5) without provision of more jobs at which heads of households can carn sufficient wages to support their families above the poverty level. W!N can have only a marginal impact on the welfare situation. A nine-page annotated bibliography is appended (TA)

A project was designed to develop and test (phase 1), and implement (phase II) a research design for the study of student attrition in the Wisconsin vocational technical adult education (VTAE) system with the intent of identifying student attrition and determining its predictability. Phase I, the developmental aspect (described in this report), involved identification of attrition and the predictive variables, methods for data collection, data analysis, and report format by a consortium of four Wisconsin technical institutes in fiscal year 1976. The institutes conducted individual attrition studies for their individual schools with the specific objectives of (1) identifying the extent of student attrition categories such as job-outs, transfers, failures, or socioeconomic withdrawal, (2) identifying background characteristics, ability factors, and self-concepts which predict student attrition, and analyze their effects on attrition, and (3) determining program deficiencies if any and recommendations for changes. Some of the consortium's major conclusions were that information on dropouts is often sketchy and that data which is available is not always reliable; students' reasons for dropping out are often unclear or unable to be verbalized even to the early leaver; much attrition is related to a lack of commitment or motivation on the student's part, student assistance for a change of direction is not readily available once a student is participating in a full-time program, and if it is available, it is not recognized by the student Twenty-three recommendations are listed. The nine appendixes, which cover half the document, contain tabular information on student characteristics (SH)

The purposes of the study were to (1) determine the overall perception of vocational education in Indiana as held by the general public. (2) determine if there are differences in perceptions related to the various areas within vocational education, (3) identify perceptions of vocational education by junior and senior high school students, elementary secondary teachers and school personnel, parents and patrons of a school district, employers of vocational education graduates, and young adults not currently in school, and (4) identify the determinants of negative and positive perceptions of vocational education. Telephone interviews (by trained interviewers) were conducted with 399 respondents drawn from a stratified random sample based on these factors: Geographical location, population density, number of vocational education programs, junior and senior high school students, parents, school personnel, and employers. Students and school personnel were frawn from a sample of 12 schools selected from a total of 341 schools in Indiana. Results showed that (1) vocational education in Indiana is perceived more favorably than unfavorably, however, the discipline areas of vocational education are not viewed in the same manner by the general public, parents, students school personnel, and employers, and (2) perceptions and opinions related to vocational education are influ, need to a greater degree by personal and physical exposure to vocational education programs rather than through indirect more passive approaches. Recommendations are included in this report. (SH)

Three project objectives were (1) to identify the competencies required for entry into the professional role of the teacher of vocational agriculture (exclusive of the technical competencies of scientific agriculture), (2) to validate the competencies identified, and (3) to initiate procedures for incorporating the validated competencies into the teacher education programs of the nine universities providing certification programs for vocational as iculture teachers in Texas A list of teacher competencies was developed based on review of the literature, a working conference of teacher educators, and a pilot test with vocational agriculture teachers The final list was incorporated in an instrument designed to illicit the respondent's opinion of the importance of each of 135 competency statements Responses were secured from 311 of the 349 vocational agriculture teachers serving as supervising teachers in Texas (89%) and from 22 of 24 teacher trainers (92%) and 14 of 15 State staff personnel (93%). Data were compiled and became the basic documentation for decisionmaking at a second working conference of teacher educators to initiate procedures for incorporation of the validated competencies into teacher education programs of the nine universities. Outcomes, in addition to the identification and validation of a core of essential p. ofessional competencies required by vocational agriculture teachers, include the establishment of a base for the development of curriculum materials and laboratory experiences through cooperation among the agricultural education departments of the State Another result has been development of

a transportable model that could be used by other vocational teacher education disciplines to accomplish similar outcomes. (The report includes the list of competencies with mean ratings for each respondent group.) (LAS)

Lientifiers-District of Columbia

An operational blueprint for health career education and training was designed to provide the District of Columbia public schools with a documented strategy for implementing a comprehensive, multifccal health careers program. The blueprint will establish a mechanism for interagency communication and cooperation at all levels, involving all aspects of health career education and training: establish a framework for identifying individual black, minority, and disadvantaged youth early in their secondary education in order to assist them in exploring careers in the health services field, and delineate the scope of counseling and related supportive services required to assist those students making a health career choice to successfully complete the selected career training and/or educational program. This report describes the development of the operational blueprint, emphasizing management functions related to implementation of health career education and training. Other components delineated include needs assessment. education and training, and student recruitment and counseling. The appendix briefly outlines criteria for certification for the following occupations: Dental assistant, dental laboratory technician, nurse aide, orderly, ward clerk, dietary aide, electrocardiograph technician, licensed practical nurse, certified laboratory assistant, prosthetist and orthodontist technician, physical therapist aide, and medical sec" ary. trator questionnaire. (HD)

Primary objectives of a national study were to quantify resource utilization patterns of vocational education programs effectively serving special needs populations and to develop a methodology for estimating resources required to successfully serve these populations Emphasis was placed on the disadvantaged, as defined in P L 90-576 Surveyed programs were selected from nominations by State consultants with responsibility for special needs programs. State advisory councils, and other selected sources. Ninety-eight program administrators (62% of the sample) completed a survey questionnaire designed to accept all measurable program resources. Seventy-eight program elements were classified into eight program components (Resource use patterns are documented in tabular form to facilitate program planning, budgeting, and review at all levels) A seven-step procedure, utilizing data provided by participating program administrators was developed (Estimates of needs are provided at national and State levels and for four types of program environments) Findings suggested that (1) while difficult, successful vocational education for the disadvantaged is being demonstrated, (2) significant numbers of eligible students are not served, (3) the 15% set-aside funds are inadequate 12-20 times more could be expended effectively This volume, one of a three-volume report on the national study, contains five chapters. Introduction. Literature Review, Issue Oriented Seminars, and State Plans Analysis, Methodology and Procedures. Results, and Conclusions Appendixes include summaries of two issue oriented seminars, sample correspondence, the master program list (coding system and system explanations), and the program adminisED 136 023

This volume is the second of a three-volume report of a national 'audy whose primary objectives were to quantify r .source utilization patterns of vocational education programs effectively serving special needs populations and to develop a methodology for estimating resources required to successfully serve these populations. It is a compendium of descriptions of successful program: "rving vocational education disadvantaged students. It is intended to be a resource document for those interested in developing and/or improving programs to serve the population (State consultants, local administrators, teachers, counselors, etc.) Fifty-five entries are included in the compendium, drawn from the total of 158 programs surveyed during the study The entries are categorized by program type and by program environment in order to facilitate the reader's particular interest in specific types of programs and settings Each compendium entry has been written to conform to a general format consist ing of seven parts. (1) Identification information. (2) program information, (3) instructional program. (4) special features. (5) results of evaluation efforts. (6) funding mechanisms, and (7) who to contact for more information (HD)

A study concerned with ways to increase occupational opportunities for women (but not intended as a study of sex discrimination) was undertaken to identify steps that can be taken to encourage young women to enter vocational areas that have been traditionally limited to males Eleven vocational and comprehensive high schools were located that had enrolled at least five females in one or more nontraditional courses. Although these schools had no programs to encourage females to enter nontraditional areas, females were enrolled in such areas as vocational agriculture, printing, industrial chemistry, or television arts. Ten of the eleven schools were

visited by members of the study team. In each. classes with females in traditionally male areas were observed and the teachers of these classes were interviewed Interviews were also conducted with counselors, administrators, and small groups of traditional and nontraditional students. A local coordinator was selected at each school who generated a sample of current and former students (in both traditional and nontraditional programs) A total of 1.014 permission forms were distributed and completed questionnaires were obtained from 520 students (51%). Questionnaires were collected by mail from 356 of 743 former students (48%). Questionnaires focused on attitudes, experiences, career plans, and family background. Questionnaires dealing with education, occupation, and attitudes were also collected from 366 (67%) of the parents of student respondents. The report presents data analysis. findings, and conclusions in three parts: (1) Influences on the students' choice of a nontraditional program and examination of their school experiences and attitudes, (2) counselors' and teachers' perceptions of and attitudes toward nontraditional enrollments, and (3) postgraduation employment experiences of students Questionnaires and interview guides are appended. Identifiers-Tennessee

The specific objectives of the project were to (1) computerize previously developed occupational information for on-line delivery capabilities as well as for development of computer output microfiche, (2) develop manual pinsorts to aid secondary and postsecondary students in exploring occupational information, (3) develop special materials for blinu students and for slow learners, (4) develop user guides on use of the various delivery systems, and (5) provide cost data on the different systems. An updated version of Tennessee's occupational information was computerized to provide on-line teletype terminal access to the information. Direct copy microfiche was developed from the printed data base Manual career exploratory pinsorts for accessing the junior high occupational information as well as the secondary-postsecondary version of the computerized information were developed. In addition. braille and audio tape materials were developed for use by blind students and filmstrips with audio tape narrations were developed for use by slow learners User guides were developed for use by students. parents, teachers, counselors, and librarians on the use of each of the different types of delivery systenis Evaluation data collected from students, parents, teachers, counselors, and librarians revealed all the occupational information delivery systems were accepted favorably. Suggestions were received from users for making minor revisions in each delivcry system to improve its use. This report includes a detailed description of the project's methodology. evaluation results, and summary of findings (HD) ED 136 027

Because Oregon has witnessed dramatic growth and interest in vocational education in the last 10 years as schools began implementing vocational education at an accelerated rate, the primary purposes of the project were to strengthen and expand applied research efforts in the areas of manpower analysis, counseling and guidance, and curriculum development. The project provided a means to furthe: the development of a "data base system" in Oregon with components related to manpower and curriculum development. It also provided for the completion of the Career Program Planning System (CPPS) in Oregon. With CPPS completed, Oregon is able to identify occupational needs for some 2,800 occupations in 18 major occupational areas. These areas include agriculture, marketing, health, food service, accounting, clerical, steno-secretarial, industrial mechanics, construction, electricity-electronics, metals, child care, clothing, institutional and home management, drafting, graphics, service occupations, and forest products. The development of CPPS also has provided a means to assign the number of trained vocational graduates to specific clusters and related U.S. Office of Education (USOE) instructional progress areas (This report describes project design and procedures and lists conclusions and recommendations Half of it consist of appendixes: Sample task analysis, task analysis procedures, task analysis questionnaire, learner module cover format, guidelines for module format, sample module, sample work experience training plan, and miscellaneous tables) (WL)

Identifiers—*Modified Area Skill Survey, *Modified Industry Occupation Matrix, Oklahoma

A study compared a Modified Area Skill Survey (MASS) with a Modified Industry/Occupation Matrix (MIOM) method of projecting manpower demand. The comparison was made with regard to the bias and precision of the estimates of the two projection methods on populations of varying size. To

achieve the compaison, each method was applied to the same population and estimates of future employment were obtained. A survey of the population was conducted one year later to obtain actual employment. The results were then tabulated for each projection method and a comparison of the results made using a paired sign test on the precision estimates and a paired tiest on the estimates of future employment. The results of the bias and precision comparisons were not conclusively in favor of either projection technique. However, the cost involved in implementing the two techniques is so drastically different, it was concluded that the MIOM is more desirable for counties of all sizes (Editor/JT)

This study, which grew out of increasing concern over vocational educators' tendency to seldom look at the "gestalt" of State vocational education organizational structure, shows some potential ways of looking at the vocational education system which have here-to-for not been attempted. This study also provides, for those who have not addressed the issue of "the system", findings which should give new insights into the forces working within vocational education which effect its output. Seven chapters are included (1) Introduction (The Problem, Purpose of the Study, Data, and Special Concerns and Limitations). (2) State Administration (State Boards of Education, State Board of Vocational Education, State Board of Vocational Education Structure, State Director of Vocational Education, State Vocational Staff Descriptions, Expenditures), (3) Delivery Systems (General Description of Schools by USOE Category, Delivery System Deecription, Descriptions, and Local Staff), (4) Program Effectiveness (Presentation of Effectiveness Data), (5) Data Treatment, (6) Data Presentation, and (7) Findings and Conclusions. The appendixes contain flow charts of four generalized patterns of organization; U.S official definitions of types of institutions: titles used by different States to describe institutions; data by State for changes in Federal expenditures per pupil, total expenditure per pupil, staff enrollments, and placement and completion: institutional types used by each State, and the data collection instrument and instructions (HD)

Education, Student Attitudes, Vocational Counseling, Vocational Followup

Identifiers-Idaho (Boise)

A secondary level career education program was implemented which focused on guidance, counseling, placement, and followup services for students within the Boise Independent School District, Idaho. Procedures followed in achieving project goals and objectives were (1) to develop a career and educational information center, (2) to use the center by involving students, teachers, and counselors, (3) to develop supplementary materials for the majority of school disciplines which will tie the subject area with career investigation, (4) to develop a placement service component which can involve all students in target schools, and (5) to develop a followup component which will point up the needs in career education. Following data analysis and evaluation, these recommendations were made: Permanent centers should be established at each high school. Each center should have a paraprofessional manager. The center must be adequately funded Followup and placement activities should be among the functions of the center, but the center should not have the sole responsibility of these functions The center must be located in a traffic pattern and be adequate in size to house student groups Establishment of a student procedure for use of the center is necessary. Inservice for school personne! in necessary for establishment. Appendixes contain materials and studies used during the project (TA)

Identifiers-Wisconsin

A study was conducted to determine the performance levels of competencies for job entry as a data processing programer. Specifically, the study sought to answer: (1) What tasks are performed by entry level programers? (2) How frequently are these tasks performed?, (3) What level of performance is necessary for these tasks? (4) How important are these tasks? and (5) What is the future projected need for these tasks? Both questionnaire and followup interviews were used. The population consisted of all data processing associate degree programing graduates at nine Wisconsin vocational, technical, and adult schools for 1973 to 1975 and their supervisors/employers. A questionnaire was developed in which respondents were asked to rate each of 75 tasks on a five-point scale relevant to four criteria: Frequency, performance, importance, and future need, Question naires were mailed to each of 508 graduates (one for the graduate, and one for his employer/supervisor). There was approximately

50% response Followup interviews were conducted with 26 graduates and 21 employers to supplement and verify the data. Both graduates and employers tended to rank the four areas the same for all six groups of tasks (systems analysis and design, program design, coding, testing and debugging, documentation, and miscellaneous). Interviews indicated that many businesses are using or are considering an on-line system in the near future. It was concluded that the Wisconsin vocational, technical, and adult education system is currently emphasizing the proper tasks needed for entry-level programers. Many employers indicated that operation experience was very important to being a successful entry-level programer (Recommendations are included and the questionnaire, interview guides, and complete findings and data analysis are included) (LAS)

Identifiers-Texas

A mailout questionnaire was used in a study which focused on three areas of inquiry (1) Needs assessment for job placement programs in public schools as viewed by superintendents of school districts and vocational administrators of occupational programs, (2) assessment of the perceived and established benefits of a placement program from the viewpoint of superintesidents, vocational administrators, and placement program personnel, and (3) criteria standardizations of placement programs to provide administrators at the State and local levels of education data for making management decisions Subjects were the 1.156 independent school district superintendents in Texas, the 236 vocational administrators of occupational programs in those districts, and the placement service program coordinators in the 32 schools operating placement programs Response from each group was over 70% Based on the study, several enteria appear to be factors in determining the priority on which applicants for employability skill development and job placement services should be evaluated. These include likelihood of administrative support, availability of facilities, high dropout ratio, urban and larger school districts, availability of vocational teaching units, schools demonstrating other areas of need such as low placement, commitment of local school districts to provide partial funding, and districts willing to abide by State guidelines to insure a uniform statewide effort. It is concluded that there are considerable perceived needs for and favorable attitudes toward the benefits of a placement program Appendixes contain the research methodology, sample description, sample recovery, survey instruments, and followup contact letter (TA)

Identifiers-West Virginia

A comprehensive third-party evaluation of a regional career education project covering an eight-county area in West Virginia focused on the project's most recent year of operation (1975-76) The evaluation attempted to measure the degree of attainment of stated goals and objectives and was designed to develop a guide and lend direction to local schools in designing comprehensive career education programs A process/product evaluation model focused on three developmental stages within the career education program. Career awareness (grades 3 and 6), career exploration (grade 9), and career preparation (grade 12). The process component, featuring specific operational and procedural (e.g., organization, materials, inservices) aspects of the program, was assessed by means of analysis of all available project records, interviews with selected personnel: county superintendents, principals, and teachers, and unobtrusive measures. The product component, incorporating expected changes in the behavior of selected students (in grades 3, 6, 9, and 12) and changes in attitude and knowledge of representative administrators and teachers, was studied through specialized tests It was found that the process dimension attained creditable success in both implementation and support and that career education awareness by teachers saturates the region. Since it was not possible statistically to attribute student career development gains directly to teacher participation, the establishment of behavioral objectives that relate learning activities (process) and learning outcomes (product) is recommended. (Appendixes, one-third of the report, contain demographic description, evaluation instruments, project publicity, and data tables) (TA)

A career-centered program in the Louisville, McComb, and Winona Municipal Separate Senool Districts, Mississippi, attempted to bridge the gap between the world of work and the school curriculum for students in grades 1-12 The following specific objectives were established. (1) To develop personal, social, economic and decisionmaking skills in all students, (2) to increase elementary students' awareness of the world of work, (3) to provide career orientation and exploratory experiences. for junior high or middle school students, and (4) to provide job preparation in a wide variety of occupational areas for students in grades 10-14. Thirdparty evaluation instruments were used to assess attitudes of teachers and students concerning the career concept. Data were collected by reviewing reports, conducting visits to the career projects, reviewing instructional materials, and interviewing teachers and administrators. It was concluded that there was sufficient public and teacher acceptance demonstrated to term the career project an asset to the school districts involved. One-fifth of the report is a project summary Goals, description, activities, and accomplishments. The third-party evaluation report, constituting the remainder of the report, contains a description of the countres, including an occupational breakdown of locale, description of the school system, background information and dcscription of the research project, including samples of newslefters and photographs of student activities, and evaluation analysis, conclusions, and summary (TA)

Conducting a survey of manpower training needs of business and industry in Connecticut and identifying elements of a vocational-career information delivery system were the two major focuses of the study described in this report. Content is presented in three chapters. Chapter 1 reviews and analyzes the manpower training needs survey and results. Some of the major findings/conclusions presented are (1) Connecticut's businesses are unable to tell Connecticut's educational agencies what they need in numerical terms from the various training programs administered by the State Long range needs of private firms are too poorly perceived to be a basis of planning by educational agencies (2) Although Connecticut's enterprises are critical about the quality of the vocational graduates reaching them, they are unaggressive and probably unled as to the direction to take in addressing the issue (3) There is no common occupational language employed across the State Chapter 2 discusses long range manpower forecasting techniques and other approaches and methods for predicting manpower needs. Chapter 3 brings together a number of considerations into a model which incorporates essential elements of a complete career guidance program. The appendixes contain raw data about occupational demand and supply. (SH)

The purpose of the study was to determine whether those persons employed in a secretarialclerical office position in the Lakeshore District (Wisconsin) felt there was a need in their occupational cluster for a series of continuing educational offerings; and if there was a need, on what bases could Lakeshore Technical Institute best develop and implement a series of continuing educational courses to fulfill that need. Que tionnaires were administered to 150 secretariai-clerical office employees in the Lakeshore District and 50 supervisory personnel with a response rate of 54.-67% for the secretarial-clerical employees and 46% for the supervisors. Conclusions showed that (1) most secretarial-clerical office personnel are employed under an employment policy whereby they receive reimbursement for educational tuition, (2) secretarial-clerical office personnel are interested in taking additional courses in secretarial skills areas, (3) office employees and supervisors perceive the secretarial-clerical office worker as needing the same levels of competency, and (4) most secretarialclerical office employees prefer to take course offerings on a grade basis leading to an associate degree. This report of the study presents a complete description of the study with emphasis placed on the findings and results. Recommendations and the measurement instruments are included. (SH)

Each unit begins with an overview followed by descriptions of objectives, rationale, and concept. The components are Lodging Services (Front Office Procedures, Reservations, Convention Planning, Bed and Board: "Back of the House" Operations,

and Lodging Service Resource Information); (2) Travel Services (Use of the Official Airline Guide, Use of Manuals, Making Reservations, Interviewing the Client, and Travel Services Resource Information); (3) Recreation, (Leading Groups, Planning and Organizing Programs, Designing a Playground, Individualized Skill Preparation, and Recreation Resource Information); and (4) Sports, Entertainment, and Cultural Services (Ticketing Systems, Communication Skills, Money Management, Individualized Skill Preparation, and Resource Information on Sports, Entertainment, and Cultural Services). Each of the four components consists of two major parts-resource information with suggested student activities and occupational preparation content. The resource information section provides information about the general characteristics of the hospitality and recreation industry. The occupational preparation section, divided into a teacher's guide and accompanying student materials, addresses the specific skills required for entry-level employment. (HD),

This curriculum guide is designed to help students develop career decisionmaking skills which they may use throughout their lives and examine and explore hospitality and recreation occupations. Nine units are included, with each consisting of a teacher's guide and student materials. The teacher's guide includes an overview, objectives, rationale, concepts, and activity. The student materials are organized by activity and include an overview and activity explanation Beginning units focus on the development of career decisionmaking skills in the context of hospitality and recreation occupations and later units emphasize the hospitality and recreation concepts and skills within the framework of career decisionmaking. The units are titled (1) What is A Career? (Career Decisionmaking, and The Future), (2) How Does One Plan For A Career? (Hobbies, Occupational Analysis, and Career Paths), (3) Fun In The Sun, (4) Leisure Then and Now (What was Leisure Like Then?, The Year 2000, Community Interviews, and Planning a Leisure Facility), (5) What Do You Need To Know? (Communicating Welcome to the Camp, The Diagram Game, What Should I Say Now?, Managing Money, and Keeping Records), (6) Working in Hospitality and Recreation (Rock Concert, Bouncing Ball, Crystal Lake Day Camp, Zoos and So Forth, and Independent Study), (7) What Are Some Hospitality and Recreation Jobs Like? (A Look at Hospitality and Recreation Occupations, and Interviewing an Employee-for Practice and for Real), (8) What Are You Interested In? (A Self-Profile and People/-Things/Ideas), and (9) What's Next (Lifestyle, Job Match-Whom to Hire? Is Everybody Happy?, and How About This Career?). (HD)

Descriptors-Behavioral Science Research. Disadvantaged Youth, Economic Disadvantagement, Educational Attitudes, *Educational Interest, High School Students, Low Income Groups. Marketing, *Minority Groups, *Motivation Techniques, Senior High Schools, Student Attitudes, Student Motivation, Student Recruitn ent. Vocational Education

Research was conducted to show how segments of the population of minority and disadvantaged you'h might be positively influenced by selective information campaigns to participate in vocational education programs The first-year effort (stage 1) undertook to measure student attitudes and to develop recommendations for using this information in communicating with youth regarding vocational education. The sample studied included students from six San Francisco Bay Area school districts located in low income areas with high minority populations. Q-methodology was used to group subjects into clusters or segments of students who had reacted similarly to 48 attitude statements. Of two distinct segments, the largest (type 1) reported agreement with positive attitude statements. Type 2 students, comprising one-third of the sample, were more negative. It was concluded (1) that messages for type 2 students needed to inform them of the positive aspects of vocational education programs and to be channeled through more credible and respected sources and (2) that those for type 1 students should focus on delivery information. explaining where and how to become involved in vocational education programs Stage 2 of the study involved developing and testing prototype information campaigns (slide tapes) aimed at each type. The messages were presented in seven classrooms in San Francisco Before the presentation students were asked to respond to a 10-item battery to classify them as type 1 or type 2 and then to complete a pretest. They then received (on a random basis) one of the messages and a postest. The results indicated again the existence of the two types of students However, with regard to immediate commitment (intent to take vocational education courses now) results were independent of treatments. The goal of the placement component of the 3year Lincoln Career Education Project. Nebraska, was to establish placement services for youth of participating project schools "Placement" referred not only to helping exiting senior high youth find einployment, but also to developing the knowledge. skills, and attitudes which lead to location of and placement in an appropriate job. Focus in the final year was on refining the exiting placement program model for high school seniors. Overall project results and accomplishments were these: Established and refined the general concept of career education among local school and central office staff, established and operated a community resource system. developed and pilot tested a model placement service for exiting seniors, and provided placement scrvice to several hundred exiting seniors during the 3-year period Evaluation and conclusions indicate that project components such as the community resource system and placement service were effective and useful It is suggested that in order for placement services to be effective a set of knowledges. skills; and attitudes should be built up over a period of years through a comprehensive and continuing career development program as well as through the oregular instructional program Description of the placement component, the conceptual model in chart form, and operational steps are included Forms and materials developed and used in this component are contained in Appendix A Appendix B contains the revised community resource catalog (TA)

Identifiers-- South Dakota

This report discusses the objectives of an exemplary project in sparsely populated southwestern South Dakota which involved nine schools' efforts in the past three years (1974-76) in bringing a varicty of vocational education courses to students that none of the districts would have been able to undertake individually, because limited financial resources and the small number of students in each would not have made such educational opportunities feasible. The publication is designed to show the degree to which project objectives have been achieved, and also to provide information which other schools in sparsely populated areas might use in implementing a program of vocational education opportunities through use of relocatable, self-contained facilities Discussion specifically covers project initiation, general and specific purposes, multi-district inception, activities preceding application for project, the program in operation, course codes, advisory committees, rotation schedules of mobile units, the multidistrict cur-24 goverriculum philosophy, multidistrict staffing,

nance, finance and budgeting, and project appraisal Detailed course descriptions are provided for the areas of General Metals, Building Trades, Electricity/Electronics. Auto Mechanics, Agricultural Technology I (Plant and Soil Science). Quantity Food Occupations, Health Occupations, Sales and Distribution, and Agricultural Technology II (Aniinal Science and Range Management) (HD)

Practical Nursing, *Program Development, Service Workers, *Video Cassette Systems. Vocational Education

The project was designed to determine the feasibility of having a vocational technical adult education (VTAE) district provide continuing education inservice training for health care facilities using videotape equipment so that employees could gain knowledge and skills without leaving the facility or having to involve time outside the normal working hours. The project was conducted using staff members from the Lakeshore Technical Institute (Wisconsin) to provide instruction, and the employees of the Sheboygan County Comprehensive Health Center (Wisconsin) as recipients of the instruction Ten hours of continuing education inservice training were provided for each employee in five 2-hour modules A total of 13 modules was produced one common module in communications in addition to four modules in each of the areas of dietary. housekeeping-janitorial, and nursing care services The project staff concluded that this type of continuing education inservice utilizing the videotape is viable and should therefore be recommended to other nursing homes and small hospitals. This report provides a full description of the project which covers evaluation, limitations, future plans, and recommendations. The appendixes cover the majority of the document and include the video orientation script, list of topics for nursing homes, study guide used in the inservice program, TV instructor preproduction considerations, a newspaper article, employees enrolled, guidelines for operating inservice continuous education programs, conference reports. and correspondence (HD)

Comprehensive Instructional Management System for Occupational Education in New York State. Final Report.

This report describes the cooperative activities of the New York State Education Department, Cornell Institute for Research and Development, and Riverside Research Institute in a two-phase occupational education development project. (Phase 1 involved the designing, implementing, and evaluating of modularized curriculum for occupational education programs, and phase 2 constituted the design and demonstration of an implementation of the curriculum, i.e., class rosters, roster changes, student records and evaluation, etc., for use in classroom management and curriculum evaluation.) The body of the report describes objectives of the participating agencies, their activities, results of activities, and conclusions. Achievements and conclusions listed include the following: (1) A statewide system for curriculum change in occupational education was developed, (2) technical support was provided to formulate methods and processes for development and implementation of the support system, (3) teacher training with resultant production of modularized curriculum packages in automotive mechanics and office clerical areas occurred as planned and a pilot project was conducted to test the quality and usefulness of the modules, (4) the project was successful in generating teacher enthusiasm and work in organization of curriculum management materials, (5) the most problematic area of development was installation and utilization of the computer retrieval systems tested, so it was concluded that a technical support system should followup rather than parallel curriculum development, and (6) the success of the overall effort was such as to warrant continuation and expansion through a second phase of development currently underway. Appendixes (more than half of the report) contain a guide to the information flow and logistics subsystem used in field testing, sample curriculum modules for automotive mechanics (lu-brication service) and office training (mail handling), the ISS terminal manual, and checklists used in the project. Identifiers-Pennsylvania (Ebensburg)

The report covers the final year of a 3-year project to develop a career education continuum for grades K-14 in participating Pennsylvania school districts. Third-year objectives included procedures for working with select groups of students and teachers to refine successful components from the first two years. The general strategy of project staff acting as change agents for teachers, counselors, and students in relation to career education activities was continued in preparation for the assumption of career education activities by local personnel at the termination of the project. These activities were curriculum infusion for grades 1-8, teachers' inservice training (grades 1-8), Singer Carrels exploration component for grades 6-9, group counseling sessions for grades 6-8, and a model for community involvement. It was concluded that given the size of the staff and severe financial limitations, the project was very successful. Process and product objectives and project design are described. Major accomplishments, conclusions, discussion and recommendations are delineated for each of the components. A 38-page third-party evaluation by Educational Research and Development Associates is included Appendixes comprise 165 pages and include materials and information on curriculum infusion, the Singer Carrel program, materials relating to the career experience program, and the U.S. Office of Education monitoring team report. Descriptors-Administrator Attitudes, Attitudes, Cooperative Education, *Cooperative Programs, *Cost Effectiveness, Educational Accountability, Educational Assessment, Educational Benefits, Employer Attitudes, Employment, Employment Level, Employment Potential, Followup Studies, Tob Satisfaction, Program Attitudes, *Program Costs, Program Effectiveness. Questionnaires, Secondary Education, Student Attitudes, Vocational Development, *Vocational Followup, Wages, *Work Experience Programs

Work experience programs in secondary schools were examined to determine the costs and benefits associated with them. Data on students in these programs were compared with data on students with nonschool-supervised jobs and students with no jobs. Characteristics and experiences of current and former students were compared. A random sample was selected from the 50 largest standard metropolitan statistical areas east of the Mississippi and their contiguous nonmetropolitan counties. Data were obtained from 33 high schools in 15 school districts. Information on the costs of work experience and vocational programs was obtained from school records and questionnaires given to students and school officials. The report deals with vocational education, work experience, and cost-effectiveness analysis; economic costs and benefits; effects of cooperative education on post-high school employment experiences; monetary returns, effects on personal development, education, and employment, effects on career development and on students' perceptions of school and jobs; and cooperative education and the employer. It was concluded that from a strictly monetary point of view, investment in work experience, rather than nonwork experience vocational programs, is not justified; however, many other measures indicate the program achieves other educational, developmental, and attitudinal objectives. Appendixes contain questionnaires and codes, wage regressions of current and former students, and regression and factor analyses tables (TA)

Implementation and expansion of class offerings was the primary focus of the second year of a project (in Evansville, Indiana) to determine the feasibility of establishing a center for continuing education for vocational level health occupations workers within the department of vocational education of a metropolitan school corporation. (The first year activities primarily concerned identification of needs, establishment of tentative administrative guidelines. and initiation of one new program.) Developing program curriculum content and activities according to established guidelines and criteria for accredited continuing education offerings was also emphasized in the second year along with refinement of administrative guidelines and improved communications to and from teachers. Programs for offering were selected on the basis of need as indicated from a survey conducted the first year of the project. Since the second year involved implementation, no research was conducted. Program effectiveness was perceptually evaluated by participants, instructors, and advisory committee members. A total of 201 students; were enrolled in nine class offerings and community acceptance was perceived as favorable. An increasing number of employers paid or at least reimbursed participants' tuition costs. This report includes brief statements about conclusions, recommendations, and evaluation plans. The appendixes, which cover the majority of the document, present course descriptions for the courses offered during the project's second year. (SH)

Implications for Mainc's vocational technical institutes of changes in the pulp and paper industry are examined in this study designed to help vocational educators realize the importance of keeping current with the needs of employers in relevant labor markets. Information used was gathered from relevant literature and from indepth interviews with instrumentation supervisors in eight paper companies in Maine. Although emphasis is placed on the paper and pulp industry and the role of the instrument technician within this setting, this study also provides a general description and analysis of the tifficulties involved in keeping an occupationally oriented education program up to date with the needs of major employers in the relevant labor markets. The following major topics are covered. Role and Impact of Maine's Paper Industry, Technological Change in the Pulp and Paper Industry. Employment Trends, Changing Role of the Instrument Technician, Current Methods of Skill Development. Career Opportunities in Instrumentation, Necessary Training and Background for Instrumentation Summary and Conclusion of Results. A Conceptual Framework, and Recommendations for Vocational Education The three appendixes include the study's methodology, the interview guide. and a sample course description for the first two ars of a 4-year apprenticeship program in inED 136 057

The Eastern Connecticut State College Exemplary Project provided a program of professional study in career/vocational education for future teachers to infuse career education in their ongoing classroom experiences. The emphasis of the specific objectives was primarily on potential teacher outcomes such as awareness, understanding, and the ability to describe, identify, and design certain types of educational experiences focusing on the career needs of students and the infusion of career and vocational education within current classroom experiences. The program included both classroom and hands-on experiences in a variety of career/vocational areas. The teachers were able to take three courses in the following areas which constitute a minor in career/vocational education; Curriculum in career education, career education practicum. and internship in a local business, industry, or trade Project evaluation and data results indicated that students enrolled in the program showed significantly greater knowledge about career education than potential teachers who followed traditional liberal arts teacher education programs. Recommenwere made in the curriculum. administration, and resource areas for program implementation (TA)

Intended to be used as a teaching and learning guide, the basic course of study presented in these materials is designed to provide the essentials of the plumbing trade, insur 3 that students who successfully complete the course will have sufficient competencies for initial employment and ample orientation for growth and development. The course of study is designed as a 3-year curriculum involving approximately 1,500 hours of class and laboratory instruction. The material has been arranged in major divisions of the trade: (1) Pipes and Fittings, (2) Valves, (3) Cold Water Supply, (4) Hot Water Supply, (5) Drainage Systems, and (6) Fixtures. Most of the course material consists of job sheets, which indicate to the student what to do in performing various jobs assigned, and skill competency sheets. which supplement job sheets and indicate to the student how to perform the manipulative handling of tools and materials that make up the doing part of the occupation. They are simply written and highly illustrated. A cumulative reuse of the skill competencies continues throughout the entire job sheet collection. The job sheets are arranged in an order that gradually exposes the skill competencies to moure the introduction of each operation or skill competency in a controlled manner. Included for use by the teacher are general course objectives. suggested teaching methods and vehicles of instruction, and a list of items to be developed by the local teacher. Sample information sheets, sample assignment sheets, and a bibliography are included. (HD)

'Identifiers-Pennsylvania

The major purpose of the survey was to follow up the employed hearing-impaired vocationally trained graduates (high school) in Pennsylvama from 1970-1975 to determine (1) their views toward educational and guidance programs. (2) their views regarding relatedness or jobs held to training, (3) employers' views toward the graduates, and (4) parents' views toward the graduates' educational programs Six trained interviewers conducted interniews with graduates, their parents, and their employers. Seven basic instruments were also developed for the survey procedure. Some of the major conclusions were (1) the majority of graduates felt they had received enough information from available guidance services for selecting vocational programs, (2) many graduates responsed that they did not receive enough help from their school in finding a job, (3) about half the graduates reported their present job completely unrelated to their high school training, (4) in general, employers felt the graduates were adequately trained for entry level work skills and few needed job station changes for their handleap, and (5) many parents liked the educational programs but expressed the need for more language development, on-the-job training, educational counseling, followup services, practical living skills, and educational programs closer to home This summary covers the study's objectives, procedures, results, conclusions, and recommendations with major emphasis, on discussion of the results Fourteen tables of statistical data supplement the text. An explanation of the change that has taken place in the aims and purposes of educational policy of industralized societies as the relationship between the education and the occu, ation systems has changed over the course of the transformation of elite education into a mass phenomenon is the objective of this paper Analysis and discussion is based on the thesis that in the course of this transformation process social inequality has seen its legitimization challenged and that the demand that "overqualification" be avoided and the qualification processes be geared to the assumed requirements of the occupational system reflects the conscious or unconscious desire to give social inequality once again the legitimization that had been shaken by the expansion of higher education. A summary of the nolitical debate on the expansion of education is ollowed by an assessment of the way changes in the elationship between the education and the occupation systems are received in the literature. Attention is given to the ideas that expansion leads to overqualification and that i, promotes neither equality of opportunity nor any reduction in social inequality Current developments are then examined as evidence of a fundamental change in the way qualification and status d. tribution interact. An additional chapter is devoted to an examination of current trends and tendencies in selection processes in education The final chapter is a discussion of policy proposals that have been developed with the aim of coping with the problems that have arisen under the conditions now governing selection as a result of mass higher education. West German literature on the subject is given particular attention, developments in the US and Japan are discussed; and material on England and a number of other European countries are employed as well (JT)

Identifiers-United States

Statistical data on working women in the United States from age 16 to 70 and over are analyzed for the 1974-75, period. It is noted that the labor force participation of women has risen dramatically since 1950, although the rate has stabilized somewhat since the late 1960's (which is in marked contrast to the rate of their male counterparts, which has persistently declined) Data presented covers the following areas. Labor force status, marital status, occupations, income, and unrelated women living alone (SH)

Work Attitudes, Work Experience Identifiers-United States

The Youth in Transition project, a longitudinal study (which began in 1966) of a national sample of young men is described in this report (Major objectives of the project were (1) to explore Lhe effects of dropping out of high school, (2) to assess the degree to which educational and occupational attainments are predictable from tenth grade measures, (3) to determine the role of educational attainment in occupational attainment, as compared with the role of family background and intellectual ability, and (4) to determine the impacts of various post-high school environments and experiences on values, attitudes, and behaviors) The results from the fifth and final data collection process and a brief overview of the results of the previous four studies are presented in the introductory chapter. In chapter 2, educational attainment is treated as an outcome variable, also an extensive set of tenth grade measures is examined and the relationships of these measures with later aducational attainment are analyzed Chapters 3 and 4 focus on occupational attainments as outcome measures, with chapter 4 covering the job satisfaction aspect. In chapters 5 through 9, the changes that have occurred between 1966 and 1974 in motives, affective states, values. attitudes, aspirations, and behaviors are examined. The findings of the complete study are summarized in chapter 10 The appendixes contain a glossary providing a brief definition of each variable, various information on sampling and statistics, panel biases: population dropout rate, tabular data for figures. stability coefficients, a matrix on intercorrelations among measures, the 1974 questionnal e, and references (TA)

Identifiers--*Tennessee

To meet the needs of the State of Tennessee and the people involved in the administration of local vocational programs, an inservice training program for local vocational administrators was developed The basic approach to the project centered on the extern concept. Major components of the program included a summer conference, regional and statewide group meetings, individual instruction and assistance, and evaluation. Inservice participants were 15 potential directors of present directors of vocational programs who had been in the position for less than three years. Members (15) of the control group were selected from the statewide group of local directors of vocational education who had three or more years of experience in the position. Pre- and posttest instruments were used to measure changes in the 15 experimental group participants and 15 members of the control group. To assess the impact of the training program the Nonequivalent Control Group Design was used The results indicated there were significant differences in gain scores in which the experimental group was higher Nearly all of the participants' individual objectives which they identified in the summer workshop were completed during the program The conclusions indicated that (1) competencies of participants were measurable and did improve for the experimental group. (2) it is possible for participants to identify their own competency needs and use them to formulate a professional development strategy to devclop effective local administrators, and (3) the organized, planned extern program is a valuable activity for the new and emerging administrator (Author/HD)

Identifiers - Alabama

A description of the basic elements of a research based instructional system for educational personnel development for vocational programs is presented in this report. This description indicates how the system derives inservice competencies for teachers from pupil performance and eventually results in institutionalized change in preservice teacher education programs. The seven basic elements (all based on research studies) from which the instructional system was derived are described in separate sections Performance Catalogs from V-TECS/DELTA (Vocational-Technical Education Consortium of States/Designing Educational Learning from Task Analysis); Relating the Pupil to the Curriculum; Analysis of Teaching-Learning Activities Systems, The Instructional Supervision Training Program; Management by Objectives. Management Information Systems; And Teacher Education Modules The last two sections of this report are a discussion of the systemic design for uniting the research based elements and of progress in the development of the delivery system for per-

mance based instruction Although the docuant reflects Alabama's educational concerns, procedures and activities are applicable to other State educational settings. (SH)

ysis, Vocational Education

A project designed to develop valid performance based curriculum materials for selected occupational programs had the following objectives. (1) To identify a common core of basic skills for seven occupational cluster areas: (2) to prepare catalogs of performance objectives and criterion referenced measures for seven occupational cluster areas; (3) to field test the catalogs on incumbent workers in the occupational areas, (4) to conduct inservice education for curriculum developers on the utilization of performance objectives catalogs; (5) to utilize the performance objectives catalogs in designing curricular materials; and (6) to disseminate the catalogs to other States fe itilization in curriculum development. The project used an adaptation of the Air Force system for task analysis and performance objectives development to design the catalogs and then translate them into curricula materials. Catalogs developed addressed the following occupaparts clerk. tions Alterationist. auto bookkeeping/accounting/payroll clerk. cosmetology, licensed practical nursing, masonry, and nursery production. One result of the project was a model for an integrated approach to criterionreferenced curriculum development involving a process for literature review, task analysis of incumbent workers, performance objectives development, and curriculum field testing. The following products also resulted from the projects: (1) A state-of-the-art study of the curriculum development related to each occupation selected: (2) a list of occupational tasks required for each occupation selected; (3) a catalog of performance objectives, criterion-referenced measures and performance guides for each occupation, and (4) a variety of curriculum materials for each occupation studied. Questions aires were sent to 307 persons, with 135 responses returned (40%), to determine who had used the Michigan Consumer Education Center services and to determine attitudes toward Center ser-

vices. Five categories of persons were contacted Those local representatives who had coordinated inservice training sessions provided by the Center. 1973 and 1974 graduate summer workshop participants; a random sample of Annual Michigan Consumer Education Conference attendees. a random sample of persons using the Center's library loan services, and a random sample of those who actually visited the Center or utilized its consultant and advisory services in some way. Findings/conclusions showed that (1) of all respondents in all categories. over 80% of them had taught a consumer education course or unit within the last three years (reinforcing the current assumption that teachers actively involved in classroom setti igs provide the core of the Center's clientele, and that programs must continue to be planned primarily to meet the practical needs of teachers), (2) from the survey response. support for the Center by the users of its services is very strong. (3) programs and materials of the Center have received wide acceptance by those who have worked with them, and (4) the main burden for, the improvement of consumer education throughout the State really depends on those who directly implement programs at the local level. This evaluation report includes a definition and scope of consumer education; the history, goals, and services of the Michigan Consumer Education Cente . its objectives and accomplishments for the 1975-76 period; and its future directions. Personnei Policy

Identifiers-Seniority (Jobs)

The effects of the 1974-75 economic recession on the effort to en sure equal employment opportunity for the Nation's minority groups and women are examined in the first section of this report, which documents the layoff of disproportionately large numbers of minority and female workers during the recession, generally resulting from the fact that many were only recently hired and thus had earned little seniority. It is concluded that the recession seriously eroded affirmative action gains of recent years, frustrating the intent of Title VII of the Civil Rights Act of 1964. Executi Order 11246, as amended, and other programs macted to help mingrity and female workers n w the historic e-onomic gap between them and white male workers. The likelihood of continuing high a employment and future economic slowdowns, which threaten not only vulnerable minority and women workers with low seniority, but many white males, particularly youths, as well, is analyzed. The accial costs of such unemployment, particularly that involving job losers and discouraged workers are described. Two sections of the report discuss layoffs and seniority and review the legality of layoffs by seniority when disproportionate numbers of minorities or women are affected. Alternatives to layoffs are explored in the fourth section, some of them already widely practiced in Western Europe and by some industries in the US (e.g. reduction of hours. early retirement, rotation of layoffs, cuts in cost other than wages). In the concluding section suggestions are made for explicit Federal guidelines by the qual Employment Opportunity Commission with egard to the "last hired, first fired" conflict based n the principle that all seniority-based layoff poli-

cies should be invalid as they apply to any work force that does not mirror the relevant labor market and the composition of which cannot be explained successfully by the employer (JT)

Identifiers-Education Amendments 1976 Title II. Project Baseline, United States

This is the first part of a two-part fifth volume in a series of annual reports on the status of vocational education in the United States. It primarily reports the developments that have taken place each year in the numbers and characteristics of students enrolled, programs, costs, and results (The entire study, initiated by Congress in 1971, is known as Project Baseline) Chapter I is a brief overall summary of the past five years, and chapter II is a summary of the statistical tables in Part 2 (a separate document) of this report as well as previous years Information covers enrollment (expansion in 1974-75, growth among the States, occupational areas. co-op, youth organizations, percent of secondary students, analysis of data on women, disadvantaged and handicapped, and ethnic minorities), expenditures, completions and placements, instructional personnel, and manpower training under CETA. Chapter III discusses title II of the Education Amendments of 1976 (Vocational Education Act) and examines some serious data problems. Chapter IV discusses information on vocational education that has not been covered by previous and present statistical summaries i.e., impact of Federal legislation, strengths and weaknesses of vocational education today, student benefits, duplication between manpower training and vocational education. The financing of continued expansion of vocational education in the face of dwindling tax resources is discussed in Chapter V Chapter VI is largely a discussion of Project Baseline's roe in the five years of its existence and what its role may be in the future Appendixes include the text title II of the Education Amendments of 1976 and other data related to the Baseline project (SH)

Descriptors--*Cost Effectiveness. *Educational Programs, Job Training, Labor Economics, *Manpower Needs. Mathematical Concepts. Program Costs, *Tax Allocation. Tax Rates, Tax Support This paper examines the theoretical difficulties inherent in basing social investment decisions solely on considerations involving the additional tax payments and tax receipts the investment generates. Although the conceptual issues raised are quite general and could be applied to a wide variety of government financed investments, emphasis is on application to manpower training programs Following the introductory section, major topics discussed are Some Elementary Concepts in Public Project Analysis (a review). The Case of Manpower Training, and An Assessment of Tax Based Ratios. It is concluded that the use of any tax based cost/benefit ratio is conceptually invalid in that these ratios do not serve as adeque e proxies for the net increase in socially useful output received through manpower training programs and they discriminate quit: arbitrarily among people based on personal characteristics and other factors that have little relation to the question of economic efficiency (HD)

New Jersey. New York Project IDEA (Innovation Dissemination for the Education of Adults), a 2-year experimental program in the utilization of innovation, was designed to demonstrate the feasibility of a comprehensive strategy for disseminating and facilitating the utilization of selected program innovations in adult education Implementation of this strategy involved two interrelated activities an interregional demonstration and the establishment of a national dissemination network. Five intervention strategies (which are described separately in this report) were used in conducting the demonstration activities in the States of New York and New Jersey (Region II) and Kansas, Iowa, Missouri, and Nebraska (Region VII) These activities involved the selection of Program Innovation Centers (PIC's) and other dissemination methods for identifying improved program practices and products produced locally and for providing intensive technical assistance to interested programs in adapting and using practices and products The project's second set of activities, involving the national dissemination network, identified, reviewed, and disseminated improved practices, products, and systems and was responsible for three publications "IDEA Review," a quarterly inventory of innovation. "IDEA Bulletins." brief brochure descriptions of selected and recommended innovations, and "IDEA Report," a prototype of a more detailed analysis of a particular innovation or a replication manual. This report of project efforts includes a discussion of eight conclusions/findings (presented as "lessons learned") relating to the dissemination of practices and products for improved adult education programs, and recommendations for a national clearinghouse on adult education and for the role of State departments of education in dissemination activities. The appendixes provide examples of the project's three network publications (SH)

ldentifiers—Illinois

The Programmatic Approach to Guidance Excellence (PAGE 2) Project produced staff development materials for the career guidance components of program planning, curriculum-based guidance, and job placement. These materials make up the PAGE 2 Instructional Résource Package, intended to be used as a planning program for a comprehensive career guidance program for a local school district, and to provide inservice training materials that will enable career guidance personnel and others to assess individual and institutional needs, determine goals, state objectives, decide on appropriate activities, and devise appropriate evaluation procedures when planning and implementing career guidance programs. The project consisted of four phases: Search, materials 'development, field testing, and dissemination. The major finding from field testing was that the PAGE 2 materials had facilitated local education agency personnel in determining goals, assessing needs, establishing priorities, and designing a plan for implementing a comprehensive career guidance program. This final report includes a sample lesson (Establishing Goals for a Comprehensive Career Guidance System) from one of the modules to illustrate the style and content of the materials developed. Field testing, workshops, and dissemination activities are described in detail. Appendixes contain materials used in the project, including the career guidance facilitator's handbook contents page, national dissemination seminar evaluation report, and field test data workshop observation sheets. The purpose of the research project was to develop an applied or technical mathematics curriculum which would meet the needs of vocational-technical students at the community college level. The research project was divided into three distinct phases. Identifying the mathematical concepts requisite for job-entry competencies in each of the occupational areas, arranging these mathematical competencies into a structure of sequential units. and developing curriculum materials for each of these units. Staff members from 10 community colleges in Texas participated in the survey to help determine and validate job competencies for the occupational areas of diesel mechanics, auto mechanics, radio/TV repair, air conditioning, welding, machine shop, printing, drafting, and electronics The specific project results included (1) a list of mathematical concepts requisite for entry-level competencies in each of the selected occupational areas, (2) a set of structured, sequential technical mathematics units designed to meet the needs of vocational-technical students in the selected occupational areas, (3) curriculum guides for each of the technical mathematics units, (4) self-instructional learning packets for each of the technical mathematics units, and (5) performance-based pre- and posttests for each of the technical mathematics units. This fina! report consists of four major components: Narrative report; the taxonomy (composite and individual) of competencies (appendix C); five exemplary minimodules (appendix D); and curriculum guides for each of the major divisions of competencies identified in the taxonomy (appendix E). Appendixes C and D constitute most of the document. (HD)

Preservice Education. Program Development. Program Effectiveness. Program Evaluation. Retailing, Teacher Education Curriculum. Vocational Education. Work Experience Programs Identifiers-New York. New York (Syracuse)

The primary objective of the Syracuse project was to make an empirical determination of the effectiveness of a competency-based (CB) distributive education program by comparing student achievement in three of its major components with similar traditionally organized courses at Syracuse. Buffalo, and Baruch. The three components were retailing, merchandising, and occupational work experience. In order to make the comparison, the three components were translated to a competency based format and implemented into the existing teacher preparation program. It was hypothesized that competency basing by the Houston "program translation" method would make possible implementation of the CB components in the limited time frame permitted

by the project. This proved to be the case The competencies developed were validated locally and statewide by a group of reactors including distributive education teachers, public school administrators, businessmen, and students. National validity was added by a comparison of the competencies with the technical objectives of the Lucy Crawford research study (1968). The competency based format was implemented in retailing in fall 1974 (N=67), in merchandising in spring 1975 (N=56). and in occupational work experience in fall 1975 (N=18). The project is developed and reported in a manner which provides a usable case history of the development and implementation of a CB program as well as an empirical comparison of student achievement in CB and nonCB programs. The study is also unique in that the components studied while part of a teacher preparation program are in a content area father than a professional education area (Author/HD)

Identifiers-Northern Montana College

In addition to the go'll of totally acquainting faculty members with the concept of performancebased education, the 1-year project at Northern Montana College had four major objectives. (1) Identify colleges, universities, technical institutes. and area vocational schools throughout the Nation which are currently conducting performance-based programs in vocational-technical teacher education and 2-year vocational-technical programs. (2) identify performance goals and delivery systems for each department within the vocational-technical division, (3) translate existing courses into performance-based criteria and implement their into the teaching schedule for field testing. (4) and begin implementation of a feedback system which is cssential to the process of evaluating and refining the performance goals and delivery systems adopted Faculty were scheduled for meetings with the project staff to establish specific timelines for the development of existing courses and/or programs Courses were identified for translation to a perform ance/competency approach via identification of performance goals, and in a number of cases modules were developed with explicit delingation of behavioral objectives and alternative learning activities. To obtain fredback concerning areas to be developed the staff conducted a survey of 507 graduates representing all program areas offered in the division Responses cnabled the staff to focus on specific courses to be adapted to the new mode: responses also guided development of delivery systems. For courses implementing performance based education during the project year, the staff designed d administered opinionnaires to obtain evaluative

a regarding the courses. Conclusions and recom-

indations are included in the report. Copies of the

graduate questionnaire and student opinionnaire are appended along with opinionnaire results for three courses. Auto Engines, Shop Maintenance, and the Nursing Program. (JT)

The CIOEDC (Comprehensive Illinois Occupational Education Demonstration Center) project, Site B. in Toledo, Illinois (from February 15, 1976 to June 30, 1976) was conducted in three phasesplanning, implementation, and demonstration Specific objectives for this site were to (1) supplement present programs of career awareness and exploration through implementation of newly developed activities in these areas. (2) provide students with an opportunity to enter the world of work with a saleable skill and further their training upon completion of a vocational program, (3) plan the demonstration of vocational education programs and activities, (4) evaluate the effectiveness and significance of vocational education programs and their relevance to the world today. (5) disseminate information regarding the implementation of occupational education activities in a rural setting, and (6) demonstrate occupational education programs during four conferences conducted on site. The following activities were implemented to accomplish these objectives OCCUPAC (Occupational Information Learning Package), ABLE Model Program, Vocational Information Project, WECEP (Work Experience and Carcer Exploration Program) SIVE (System for Individualizing Vocational Instruction). CVIS (Computerized Vocational Information System). Consumer and Homemaking Education. IOCP (Illinois Occupational Curriculum Project), a system for followup of vocational education graduates, three phase system for evaluation, and CERL (Carcer Education Resource Laboratory) In this report, each of the three phases of the project are described along with results and accomplishments Appendixes make up two thirds of the document and contain the following materials: CIOEDC dissemination and conference data. K-8 instructional program, 9-12 instructional programs, samples of instructional units, program management tools and objectives, occupational education resources, pub-

What competency-based instruction is and how it can help improve vertical articulation between the curriculum of secondary and postsecondary vocational-technical education programs in Minnesota is the focus of this booklet. Explanation consists of responses to the following questions (1) What is vertical curriculum articulation? (2) What is competency-based instruction? (3) How does a vocational program become competency-based? (4) How can competency-based instruction help the student? (5) What are the advantages of competency-based instruction? (6) How can competency-based instruction improve the total instructional program? (7) How can competency-based instruction be implemented? (8) What is personalized instruction? and (9) How can vertical curriculum articulation be achieved? Principles are illustrated with reference to a program to train flight attendants (JT)

Identifiers-Florida

A 1-year study was conducted to implement a computerized data system for the comprehensive evaluation of Individualized Manpower Training System (IMTS) Learning Resource Centers (LRCs). Data for the system were collected by the administration of student, staff, and center summary forms especially designed for the purpose by the University of West Florida. Original plans were to collect data at eight IMTS and three control sites. Data from five IMTS and two control sites entered the system. All completed forms were sent to the Florida Vocational Technical Adult Education (VTAE) Computer Service Center at St. Petersburg where the data was keypunched and machinestored. A copy of the punch card deck was sent to Baltimore, Maryland, where the analysis programs for the system were designed, written, and executed in general it was found that the installation of the IMTS procedures at the five LRCs were sufficiently uniform to permit meaningful comparison among the sites. If it is taken into account that this first run of the data system must be viewed as much an evaluation of the system itself as it was aimed at evaluating the IMTS programs, then the overall outcome of the experience can be rated as highly positive. (The report contains chapters on description of the IMTS system, aspects of evaluation system dcsign and implementation, data collection procedures, results of implementation, and summary, conclusions, and recommendations. Approximately half of the contents are appendixes of related materials, e.g., list of IMTS training packages, data collection forms, software for the analysis of the computerized data system, and raw data of IMTS site summary file.) State Surveys, Vocational Counseling, Vocational Directors. *Vocational Education Identifiers-Texas

The primary purpose of this study was to determine the need for Spanish-Eriglish bilingual vocational education programs in the secondary schools in Texas as perceived by bilingual directors, vocational directors, vocational counselors, secondary school counselors, and industry representatives Data were received from 636 respondents which consisted of returned opinionnaires from five groups, representing a 65% return. Six hypotheses related to the objectives were tested using descriptive statistics, analysis of variance with the Scheffe test where applicable, and Chi-square. Significant differences were found among the five groups regarding 19 to 28 perception statements, 7 of 15 attitude scale bipolar adjectives pertaining to the need for bilingual programs of vocational education. and 7 of 15 selected issues. In 69% of the group comparisons pertaining to the need for bilingual vocational education, industry representatives viewed the problem differently from the four school groups. Significant perception statements appearing most often concerned school districts' goals, *creating functionally literate individuals through bilingual education, confusion of bilingual education goals, and helping students feel a need for using English. Significant issues most commonly appearing concerned language difficulties, integration of bilingual and vocational programs, and requiring special training for teachers. The most common significant bipolar adjectives were bad/good, satisfying/frustrating, false/true, and rewarding/unrewarding. The report includes description of methodology, findings, summary, conclusions, implications, and recommendations. The opinionnaire and data tables are appended. (WL)

The purpose of this study was to define the role of occupational experience in preparing vocational business and office education teachers. A multistep procedure was utilized to identify purposes of occupational experience and to validate teaching competencies Second, a literature review was completed to generate a list of purposes of occupational experience The list of purposes was refined by two national panels of experts consisting of teacher educators and State supervisors in distributive education and business and office education. Third, teaching competencies that can be developed through occupational experience were validated The base for competency validation was a list of 95 competency statements compiled from the 384 validated performance elements for vocational education teachers which were identified in a study by Calvin J. Cottrell in 1971. A questionnaire was developed for rating each competency as to relative value of occupational experiences in developing that competency. It was mailed to randomly selected samples of (1) distributive education and business and office education teachers in the states of Colorado, Kansas, Missouri, Iowa, and Minnesota and (2) State supervisors and teacher educators in the U.S. Analysis of the identified purposes and teaching competencies provided a final listing of purposes of occupational experience agreed upon by State supervisors and teacher educators and a listing of teaching competencies that can be developed through occupational experience agreed upon by classroom teachers, teacher educators, and State supervisors. All results were analyzed in order to determine the value of occupational experience for vocational education teachers and recommendations were made for utilization of the results and for further research. The report includes data analysis, summary, conclusions, and recommendations. Questionnaires and competency lists are appended. (WL)

cal Occupations, *Technical Writing

Designed for those who are concerned with gathering job performance information, this manual presents methodology and techniques used to analyze jobs and to record the analysis. Chapter 1, an introduction, discusses briefly the uses of job analyses in trade and technical course construction and instruc-__ tional materials development, in career counseling and placement, as well as in competency and performance evaluation. Job analysis principles are presented in chapter 2: Complete and accurate identification of the job, complete and accurate description of the tasks of the job, and indication of the requirements the job makes upon the worker for successful performance. The other four chapters contain explanation and instructions for developing the various sections of a job analysis schedule. Chapter 3 deals with the first four items on a schedule (Job Title, Data and Number of Sheets, Alternate Titles, and Dictionary Title and Code). Chapter 4'deals with the "Work Performed" item of a schedule, which should present a statement regarding the tasks performed by a worker in accomplishing the purpose of his/her job. The guidelines for writing this section include focus on introductory sentences, task arrangement, treatment of unusual equipment and terms, and citation of degree of skill and percent of time Chapter 5 covers the items on a schedule dealing with performance requirements: Responsibility, Job Knowledge, Mental Application, and Dexterity and Accuracy. Chapter 6 deals with the comments section of a schedule: Equipment, Materials and Supplies, Definitions of Terms, and General Comments Three model job analysis schedules are appended: Part Programer (Numerical Control), Lubrication Man (Vehicle), and Check-Out Clerk (Grocery Store). Specific objectives of a project to translate V-TECS (Vocational-Technical Consortium of States) catalogs of performance objectives into viable programs of instruction ready for implementation in the secondary and postsecondary training institutions of the State of Kentucky were the following (1) To teach selected personnel to develop competency-based curriculum packages, (2) to develop 10 curriculum packages, in the areas of Auto Body. Bank Teller, Carpentry. Cashier Checker. Child Care, Dental Assistant, Food Preparation, Machine Shop. Secretarial, and Tractor Mechanic, and (3) to determine the usability of modules. Domain study. state-of-the-art, task booklet, field review catalog, and final catalog of objectives and criterion referenced measures were developed in six of the curriculum areas. Four handbooks were developed: Development of Kentucky's Model for Individualized Modules. Development of Vocational Education Modules. Development of the Instructor's Manual, and Management Handbook A slide-tape presentation was developed for curriculum writers and teachers to use as a basis for developing slides and tapes to supplement the modules. An 8-week workshop was conducted to develop individualized modules in the 10 areas. During the project approximately 500 modules were completed. Consultative services, workshops, and inservice training were provided to local school districts, area vocational schools, and institutions of higher learning. Modules developed were field tested in 20 schools in Kentucky. Appended to the report are copies of each of the four handbooks developed, a copy of the module evaluation form and of the field test observation record, and several workshop agendas. (JT)

Identifiers-*Illinois

The objectives of this study were (1) to obtain annual records on the first full-time career positions obtained by all agriculture graduates from the 2year and 4-year Illinois education institutions offering a degree in agriculture, (2) to assemble data in a manner that would show the marketability of graduates from the various professional agriculture programs for the given years, (3) to make the data available annually to high schools, 2-year colleges. and 4-year colleges offering agriculture advisement of students and parents relative to a career in agriculture and for curriculum building and updating These objectives, relative to the Illinois agriculture graduates of 1975, have been achieved Two questionnaires were used, one by each agriculture graduate of 1975 and one by an agriculture person from each of the Illinois agriculture colleges Approximately 100% response was obtained. The instruments and procedures for data collection have been developed and tested. With some modifications in the questionnaires, and further use, the resulting data, through time, will provide a sound historical base from which counselors, students, parents, and college planners may make decisions relative to agriculture programs and careers. The data may also be used by agriculture planners to show the importance of higher education in agriculture to nonagriculture college administrators, taxpayers, and others unfamiliar with education in agriculture. The report is organized into four sections (1) Introduction. (2) Procedures (Proposal Development, Development of the Questionnaires, Obtaining the Data from the graduates and from the Agriculture Personnel of the Colleges), (3) Presentation of the Data. and (4) Summary and Recommendations The questionnaires are included (HD)

Descriptors—Cognitive Measurement, *Cognitive Style, *Cognitive Tests, Evaluation Criteria, Maps. Occupational Surveys, *Occupational Tests. *Test Construction. *Test Validity. Vocational Counseling

The premise of this project was to reveal the differences in job-style requirements by using a tecnnique called cognitive-style mapping, the thesis being that each job or occupation requires a person having a particular cognitive style system compatible with the job style or requirements. Cognitive style mapping is a technique used to assess an individual's style for surviving in a given environment-educational, occupational, or social. The project was an extension of the present use of cognitive mapping techniques in a small number of schools on a pilot basis to determine a student's ' strengths and weaknesses in an effort to plan his survival for the first year of college. Cognitive mapping instruments and techniques developed in previous experimental or pilot modes by the principal investigator were redesigned and tested for discrimination. Employers of persons in the selected occupations were contacted by letter and in person to recruit participation of employees and their supervisors in responding to the survey instruments related to 28 elements of cognitive style. From the cognitive maps of successful or surviving individuals in the 10 surveyed occupations (accounting, credit and finance, secretarial, clinical lab assistant, medical assistant, licensed practice, nurse, drafting technology, electronics technology, surface mining operation technology, and welding technology), cognitive occupational maps were derived. A computer program for scoring and producing these and future individual and occupational maps was produced. It is concluded that cognitive mapping should be advanced from a pilot or test structure to operation status and be utilized in the Indiana, Vocational Technical College system The report contains the maps and analytical data for the ten job titles (JT)

Identifiers-Project EDNEED II, United States Project EDNEED II (Empirical Determination of Nationally Essential Educational Data), conducted from July 1975 to September 1976, was designed to document the extent to which data currently collected by State vocational education agencies could be used to answer prioritized Project EDNEED I questions (Project EDNEED I identified and priontized vocational education informational needs of users at the national, State, local levels.) The first phase of EDNEED II focused on the gathering and cataloging of all State vocational education agency data collection forms. Each item of information on a data collection form was classified in relation to the most appropriate Project EDNEED question(s) In the second phase, field visits were made to 10 States to gather more information on alternative approaches to answering the top priority EDNEED

I questions The field visits provided information on the problems that would be encountered in collecting the necessary data and aggregating them to the appropriate levels. In this first of a four-volume final report of Project EDNEED II, the informational needs identified in EDNEED II are discussed in relation to the data currently available at the State level as indicated by State agency data collection forms. The procedures used to derive and organize the vocational education data base are described, and an exemplary core of questions and data elements is presented which represents information that is both highly needed and widely collected. A procedure for empirically selecting alternative sets of questions is also described in defail (SH)

This is the second of a four-volume report of Project EDNEED II (Empirical Determination of Nationally Essential Educational Data), (Project EDNEED II, conducted from July 1975 to September 1976, was designed to document the extent to which data currently collected by State vocational education agencies could be used to answer prioritized vocational education informational needs for all 50 States and five US territories) This volume presents the data base that was constructed as a result of the comparison between needed and collected vocational education data from all 50 States and five of the US territories. The data base consists of 209 questions and 1,065 information elements. with accompanying indexes demonstrate for each information unit how "needed" and how "collected" it is, or the relative need and current availability of the information elements. The index of need reflects the combined ratings of Federal. State, and local user groups, with each level receiving equal importance weightings in the analyses. This volume also includes the project summary, an index to the files and questions, a foreward on the utility and organization of the data base, and a list of references (HD)

Identifiers - Project EDNEED II, United States

This third of a four-volume report of Project ED-NEED II (Empirical Determination of Nationally Essential Educational Data) is a directory of State agency data collection forms that were coded and analyzed during the course of the project. (Project EDNEED II, conducted from July 1975 to September 1976, was designed to document the extent to which data currently collected by State vocational education agencies could be used to answer prioritized vocational education informational needs of all, 50 States and five U.S. territories.) The directory consists of a cross-indexed listing of forms for each State and territory, arranged in alphabetical order. A seven column format is used which identifies forms by the following characteristics: (1) A unique index number, (2) the form number, if available, (3) the date or revision date, where available, (4) the full title, (5) a coded listing of unit(s) by which data was collected, (6) a coded determination of major content areas covered by the form, and (7) where possible, the title of those preparing, signing, and/or approving the form. In addition to documenting all the forms that were included in the Project ED-NEED II analyses, Volume III is intended to assist State agencies in locating data collection instruments that might facilitate their own development of forms. Identifiers-Project EDNEED II, United States

This is the fourth volume of a four-volume report of Project EDNEED II (Empirical Determination of Nationally Essential Educational Data), conducted from July 1975 to September 1976 to document the extent to which data currently collected by State vocational education agencies could be used to answer vocational education informational needs of users at the national, State, and local levels. This volume focuses on the results of the project's field visits (phase two of the project) to 10 States that were considered to be exemplary in the availability of data on vocational education which corresponded to the informational needs of the various user groups. The field visit results are organized around the 50 highest priority questions identified in the earlier phases of Project EDNEED I and II. (Phase one of EDNEED II involved analyses of all 50 States' vocational education data collection forms, which served as the hasis for selecting the States for visitation. Project EDNEED I identified and prioritized vocational education informational needs of users at the national, State, and local levels) The 50 questions are classified into the following nine topics, with each question including a discussion of different States' alternative approaches to answering the question Vocational curriculum and instructional characteristics, vocational curriculum expenditures by activities, vocational curriculum expenditures by object, vocational student characteristics, characteristics of the vocational completer/early leaver, local education agency vocational staff member characteristics, local school characteristics, local education agency

characteristics, and vocational education characteristics of the State education agency. Problems relating to data aggregation, format, and data element definition are also briefly discussed in this volume. (SH)

The major focus of this guide and its accompanying student manual (CE 010 397) is to help the student understand the manufacturing enterprise. (The guide and student manual are part of a me, iufacturing cluster series which addresses itself to career awareness, orientation, exploration, and preparation.) Seven sections are included. An overview of career education and manufacturing history is presented in the first two sections along with a discussion of the structure of manufacturing, which is systems oriented in order to show interrelationships and to promote understanding of it in three highest common denominators-functions, processes, and products. Sections 3 and 4 describe the generalized program development paradigms and includes both instructional and curriculum development models. Guidelines and a description of an exploration program in manufacturing occupations using the food and kindred products industry as an example are presented in sections 5 and 6. The last section contains the following 20 program product categories, with each containing selected activities and experiences and sources of information related to function. Ordnance and Accessories, Tobacco Manufacturers, Textile Mill Products, Apparel and Other Finished Fabric Products, Lumber and Wood Products, Furniture and Fixtures, Paper and Allied Industries, Printing. Publishing, and Allied Industries, Chemicals and Allied Products, Petroleum Refining and Related Industries, Rubber and Miscellaneous Plastics: Leather and Leather Products: Primary Metal Industries; Fabricated Metal Products, Machinery and Transportation Equipment, Machinery, Except Electrical Equipment; Electrical Machinery, Equipment and Supplies, Transportation Equipment; and Professional, Scientific, and Control Instruments. This manual is written as a direct followup to the Exploring Occupation in Manufacturing Student Manual. The purpose of which was to (1) promote an understanding of manufacturing industry, (2) acquaint students with structures of the many carcers, occupations, and jobs contained within manufacturing enterprise. (3) explore selected career fields by use of a typical program example, and (4) provide a generalized set of guidelines for further and related curriculum development in the exploration realin. This manual has the same purposes and continues them into the preparation phase by using a program

example in curriculum development guidelines. The program guide is designed to fit into the scope of secondary school programs in the academic, industrial, and vocational curricula. Content is presented in two sections, a general overview of quality control and the inspection field and a section on specific occupational preparation. The general overview section (22 pages) contains consideration of major influences and environment encountered within the manufacturing enterprise in the quality control career field, an overview of statistical usage in quality control, and description and prescription of the job and occupational hierarchy contained within the quality control career field. The occupational preparation section (92 pages) provides guidelines for development of curriculum in five major quality control categories found in most industries Blueprint reading, basic statistics, mechanical measurement, electrical measurement, and chemical measurement (LAS)

Part of a manufacturing cluster series which addresses itself to career awareness, orientation, ex-- ploration, and preparation, this guide and its accompanying student manual were written as a direct followup of the instructor's guide and student manual titled "Exploring Manufacturing Occupations " Four major sections are included. The first section provides the instructor with a brief outline for initiating a career preparation program in the overall area of manufacturing occupations. A brief overview of preparation in the specific areas of quality control and inspection are presented in the second section. The third section deals with a suggested method, or model, of development. preparation, and conduct of a program dealing with quality control and inspection. Twenty pages of individual items are provided which the instructor may use as a checklist to stimulate student interest and to reinforce the overall scope of inspection and quality control. Items are listed under the broader headings of What the Worker Does, What Licenses and Certificates are Required. Union Affiliation within Industry Communication Responsibilities. Education and Training Levels. Subjects and Courses Needed. Specializations in Inspection and Testing, and Machines. Tools, Equipment, and Work Aids. The fourth and major section is divided into two subsections. General Background and Occupational Information, which includes eight units. and Occupational Preparation, which includes the five units of Blueprint Reading. Statistics in Quality Control. Mechanical Measurement. Electrical Measurement, and Chemical Measurement Each unit presents objectives, teaching content, evaluation, and other information pertaining to the unit area An 18-page bibliography of texts and audiovisual materials is appended (SH)

Teachers

A study was conducted to determine the teacher competencies needed in order to develop valid and effective occupational learning experiences for educable mentally retarded (EMR) students based on available diagnostic test data and information Fourmember teams were selected from each participating school (four secondary and two postsecondary schools). Each team had a special educator, a vocational instructor, an audiovisual specialist, and a counselor, special educator, or vocational educator depending on the most effective team organization within the participating school. An action research design was used. As vocational teachers on the teams identified problems in modifying instructional materials, teaching strategies, and classroom procedures, team and staff members desig ted solutions. These solutions were then implemented by the vocational teacher and evaluated. Transportability of the developmental experiences and the resulting products were assessed with teams :n one or two of the other participating schools. Three workshops were conducted focusing on (1) identifying participants' competencies in relation to those needed to develop effective instruction: (2) techniques for effective communication, task analysis, rewriting reading materials, and developing mediated instruction, ar., (3) teaching techniques, classroo, management strategies, and practical evaluation. Some of the competencies which vocational teachers need to acquire are use of evaluation information in designing and managing instruction, behavior observation skills, performance evaluation techniques. individualizing instruction for EMR students, identification and restructuring of jobs, task analysis procedures, and skill in designing concrete learning experiences. Based on the evaluation of the workshops and critical competencies identified by the participants, a 2-week workshop agenda was developed which should provide the basic competencies needed. Two computer programs were also developed to retrieve jobs from a data bank which match specified DOT 10b titles (Dictionally of Occupational Titles) and present information on EMR characteristics. The suggested 2-week workshop agenda and the competency lists are included in the report. (Appendixes, bound separately, contain participant and staff vitas, materials from the three workshops, and other project materials) (JT)

Speeches, *Vocational Education Identifiers—United States

The first part of this document is the text of a speech which examines some of the critical events that American society will face during the next 10 years and analyzes these events in light of educational needs primarily at the elementary and secondary levels. The author first notes 15 social trends, identified through the efforts of Research for Better Schools, Inc (RBS), that will influence the education of the young in the decade ahead. (Some of RBS's activities have been a design for four alternative educational possibilities based on RBS research; the conducting of two national symposia to explore with educators, economists, and others, how today's social trends and technological trends are likely to influence tomorrow's schools, and the establishing of a consortium of schools, school districts, and other agencies with the express purpose of helping compare future-oriented goals and activities) In view of expected social trends and changes, the author notes specific implications for career and vocational education. In the discussion of the creation of a comprehensive plan to utilize RBS research results in schools, nine goals for schools are identified, and based on the cited goals, RBS's four alternative designs for schools are described. The second part of this document consists of the author's response to questions relating to future educational leadership, the cost of education, and school-community involvement (SH)

Identifiers-Minnesota

From the statewide assessment of mathematics performance conducted by the Minnesota Department of Education, specific study findings for 17year-olds attending public and non lic schools included demographic data and information on student attitudes toward education programs and mathematics, and mathematics achievement Data analyses suggested that students with no vocational education courses performed better in areas of higher mathematical concepts but that students with the most vocational education scored higher in practical applications of mathematical skills. The expectation that students in career and vocational education mathematics activities would acquire mathematical skills relevant to the world of work appeared confirmed. The major recommendation was that vocational educators should formulate mathematics objectives for their students so that a specific prediction of achievement differences might be tested. This project report includes 10 data tables including one that summarizes the findings. (MF)

Results of a questionnaire survey of 24 reading teachers from selected junior colleges in the State of Mississippi are presented in 22 tables with comments, summary, and conclusion The 22 data categories are (1) number of male and female reading teachers reporting, (2) age range of reading teachers, (3) number of years of experience in teaching, (4) the highest degree held, (5) major field of highest degree held, (6) number of students enrolled in various reading programs per teacher unit. (7) number of vocational/technical students enrolled in the reading programs per teacher unit, (8) opinions of the vocational reading teachers as to the separation of academic students and vocational students in reading, (9) methods utilized in selecting students for reading instructors, (10) regularity of discussion of students' reading between reading instructor and regular instructor, (11) reading level range of vocational students, (12) indications of the subject areas profiting mos' from reading instruction, (13) reading tests administered to vocational/technical students, (14) indications of when various reading tests were administered. (15) the person administering the reading test to vocational/technical student, (16) utilization of vocational/technical materials,

(17) types of materials utilized in teaching reading. (18) utilization of vocabulary lists from content of vocational/technical programs. (19) scheduling of visual and/or auditory acuty tests. (20) suggestions and/or needs in program improvement for vocational/technical studer is in reading. (21) expenditure of funds for instructional materials. and (22) utilization of instructional materials (HD)

Students from 16 different vocational, technical areas of study in seven postsecondary complexes in Mississippi (representing a cross-section of all junfor colleges in the State) were administered the Nelson-Denny Reading Test to identify reading levels The FORCAST readability formula (Klare, 1974) was used to determine the readability level of ea.h of the 230 textbooks used in the postsecondary vocational and technical courses. Results showed that the mean reading levels of all students varied from I to 4 grade levels from the mean readability levels of texts-used in instructing them. All of the texts measured indicated reading levels above the 10 6,3 grade level Overall, the vocational areas indicated a 1 57 larger discrepancy than the technical areas The report presents and discusses data on the number of students, reading range, and mean reading grade level for each of the 16 different vocational /technical areas of study. It also lists title, bibliqgraphic information, and mean readability level for every text used in each of the 16 areas (1) Auto body and fender repair. (2' ito mechanics. (3) farm equipment. (4) heating, realignation, and air conditioning. (5) industrial electricity. (6) machine shop. (7) practical nursing. (8) radio and TV repair. (9) sheet metal, (10) welding. (11) cosmetology. (12) data processing. (13) distribution and marketing. (14) drafting and design, (15) electronics, (16) secretarial science (HD)

This volume i

This volume is one of a four-volume final report of a research project developed to identify the jobs and training needs for the area of wastewater land treatment systems and related agricultural occupations. The overall purpose of the project is presented in terms of its six subobjectives (1) To identify the agricultural occupations related to the Muskegon Wastewater Management System County (MCWMS) and determine job needs. (2) to perform a task analysis on each of the identified agricultural occupations related to the MCWMS. (3) to write student terminal performance objectives and develop modules of instruction, (4) to explore the possibilities of utilizing the MCWMS as an educational tool. (5) to develop student awareness information. and (6) to implement an articulated curriculum with actual programs. Overall findings presented showed that nationwide employment of individuals working in conventional wastewater treatment systems as well as modern systems is expected to rise rapidly through the mid-1980's and that there is a need for student modules of instruction for the agricultural occupations. Appendixes constitute the majority of the document Major appendixes are titled Task Analysis Survey Instruments, Selected Pages (9 pages). A Sample of the Format Used for Writing Student Terminal Performance Objectives and Instructional Modules (12 pages). An Explanation of the Components in the Instructional Modules (2 pages). Bibliography of Documents Reviewed and Used for the Project (11 pages). Survey Question and Results Concerning Using the MCWMS as an Educational Tool (5 pages), and A Discussion of Possibilities and Approaches for Implementing Vocational and Technical Agricultural Programs in Career Education Banning District #21 (14 pages) (SH)

Descriptors—Adult Programs. *AJult Vocational Education. *Educational Assessment. *Employer Attitudes. Graduate Surveys. Part Time Students. Program Evaluation. *State Programs. State Surveys. Student Attitudes. *Vocational Followup Identifiers—*Oklahoma

An evaluation study assessed the part-time vocational training courses offered to adults by the Oklahoma State Department of Vocational Technical Education for training or retraining pur poses in order to prepare people for a new occupation. The three objectives were to determine if the present system of gathering followup data is adequate considering cost for methods, to determine from the graduates their evaluation of the program's curriculum, facilities and equipment, instruction, and placement assistance, and to determine from employers their evaluation of the adult students' quality and quantity of work, and the students' skills and abilities in the occupation. The population consisted of all completers enrolled as preparatory students (those training or retraining for a job) in part-time adult classes during fiscal year 1975 (5,-673 adults) The survey, based on a stratified random sampling technique, produced 660 questionnaire responses from completers of seven different vocational programs in 45 separate school sites. The employer survey, limited to employers of those completers that were working in the field for which trained, produced 125 questionnaire responses. The dominant conclusion was that most of the students and their employers are very satisfied with part-time adult preparatory training in Oklahoma Significant results are summarized in six separate sections of the report. Part-time Adult Completers. Employed Part-time Adult Completers. Comparison of Employed Completers Related and Unrelated. Employer Survey, Health Occupations Completers, and Nurse Assistants, Recommendations are included (WL)

Identifiers - Fox VAlley Technical Institute WI. Wisconsin, Wisconsin (Appleton)

Following a 3-year feasibility study, Fox Valley Technical Institute (FVTI) converted 18 vocational-technical education programs to year-round operation Each of these programs is being implemented based on the departmental plan best suited for the particular program, so that the maximum number of students may be served at the lowest possible cost Students may register and enter programs daily, weekly, monthly, or at other time combinations Data from surveys of FVTI students and staff, prospective students, and employers of FVTI graduates revealed that most of the school staff and employers generally favored the extended school year, although the students generally did not A schools management system for the year-round operation was developed. A copy of the table of contents from the systems manual is appended Advantages and disadvantages of the year-round operation are listed, with recommendations to those considering a conversion to this type of program (MF)

Information on the background of the project from which this model was developed, and a brief project description are presented in the beginning section (eight pages) of this document. (The major objective of the project was to develop a statewide articulated food service curriculum model related to realistic employment competencies to be used in the articulation of food service programs in secondary and postsecondary vocational and technical institutions.) The remainder of the document presents the curriculum model, which includes 13 food service job titles grouped into three major categories: Production/Back-of-the House Jobs (kitchen helper, food service worker, dietary aide, pantry worker, short order cook, assistant cook, cook, and baker assistant); Service/Front-of-the House Jobs (bus attendant, waiter/waitress, host/hostess, and bartender); and Mid-Management Jobs (manager and food service supervisor). Job competencies are grouped into five major categories (The number of competencies presented follows the category.): (1) General Knowledge Competencies (34), (2) Food Preparation Competencies (53), (3) Serving Competencies (12), (4) Work Simplification and Maintenance Competencies (8), and (5) Management and Supervision Competencies (15). Each competency, identified by a curriculum area, competency number, related jobs, and cognitive and/or affective objective, is presented with a three-column format which outlines content to be covered, learning expenences/resources, and evaluation. Major appendixes include definitions of food service jobs included in the model and their "Dictionary of Occupational Titles" code numbers, and a listing of job competencies for the three major food service categories. Identifiers-Project Baseline, United States This is the second part of a two-part volume of Project Baseline's annual report on the status of vocational education for the 1974-75 period. It is a statistical almanac containing three major sections and an appendix. Section I contains the tables based on data collected in fiscal year 1975. These tables are divided into four groups: Tables 1-16 include enrollment figures, tables 17-20 concern completions and placements, tables 21-35 present expenditures, and tables 36 and 37 contain teacher and teacher education information. Tables 32-35 show part C and part D expenditures and Federal allocations. Section II (tables 38-72) includes tables based on data collected during the past five years. Comparisons are made between the years by States and by area of concern. The tables are arranged in four sections. Enrollment (tables 38-58), completions and placements (tables 59-62), Expenditures (tables 63-72), and teachers (table 72). Section III consists of miscellaneous tables (73-85). Table 73 depicts the purchasing power of vocational education expenditures over the past 13 years. Table 74 covers enrollment by sex and table 75 depicts enrollment by ethnic group. Table 76 is a 1-year table showing enrollments in special programs. Tables 77-85 give a breakout of enrollments by sex in each of the occupational areas and in special programs. (HD)

Identifiers-United States

This description of a methodology for examining the supply of educated manpower and the demand for their services consists of two major sections. which are devoted to the supply and demand of educated manpower respectively. In the first section, the supply of educated manpower and the demand for educational inputs are considered, the main discussion centering on production of educated manpower. In an illustration of the suggested approach. "educated manpower" is defined as the persons who attain a certain reading ability at a given educational level, and the "production function" is the production function of reading ability Based on an empirically estimated production function of reading ability for U.S. public schools, the author examines whether the "teachers-don'tcount" hypothesis can be accepted and indicates how questions as to whether US public schools operate efficiently can be answered. In the second section the demand for educated manpower and the supply of other goods and services are considered based on the production functions of various industries requiring educated manpower (Only the aggregate production function, using income or earning data as a measure of output, are examined) The last section considers some of the implications and limitations of the study (Author, WL)

The analysis presented in this report was designed to make available to policymakers a comprehensive study of child care arrangements, preferences, and costs as of 1971, using data from the National Longitudinal Surveys of Women and Young Women his analysis yields results which both complement id update the earlier Low and Spindler report ti-

tled "Child Care Arrangements of Working Mothers in the United States (ED 040 738) Data is presented according to the study sample, which was divided into two racial groups-blacks and whiteswhich were further subdivided into three categories by the age of the woman's youngest child (These categories are women whose youngest child was under three years of age, three to five years of age, and six to thirteen years of age, referred to in the study as infants, preschoolers, and young school-aged children, respectively) This report is divided into four major sections The first section explores the kinds of child care arrangements used by employed mothers. The second section examines child care expenditures The third section analyzes the characteristics of women who prefer some form of child care other than their current arrangement. The fourth section summarizes and emphasizes the policy implications of the findings Ninetcen tables of comparative data are included. (WL)

A model of an "ideal" high school career education program with a system for assessing a high school's progress toward the ideal are presented in this document. An introduction describes briefly the source of the model, a project to demonstrate the most effective methods and techniques of career education at the secondary level in four high schools in New Hainpshire. Part 1 is the system for assessment of high school career education efforts. It is made up of (1) six questionnaires, one on each career education goal, (2) goal prioritizing forms. (3) a community partnership checklist to rate school and community involvement, and (4) a summary profile form to graphically display eareer education development in a one-page format. Part 2 is a conceptual tramework for high chools in New Hampshire It includes 13 comprehensive goals (from which the 6 career education goals were selected) with a list of general conditions that should be met if each goal is to be achieved. Part 2 also includes a more complete discussion of many of the aspects to be assessed in Part 1 and provides the hilosophy behind the assessment system (TA)

The Technical Instructor Course at Lackland Air Force Base is (according to the author) effectively preparing Air Force men and women as competent instructors in a wide variety of highly skilled technical specialties for the over 3500 courses conducted with Air Training Command. The course was developed to meet the need for qualified experienced technicians as competent technical instructors. Of approximately six weeks duration, the course is divided into two blocks of instruction. Block I is four weeks and three d' i in the classroom, and Block II is two weeks of practice teaching. Some of the broad topics that are covered in the course are learning processes, communicative skills, instructional objectives, methods and techniques, media, tests and measurement, counseling, and practice teaching The program (which is fully described in this paper) is helping to meet the Air Force's need and has possible application for other institutions in upgrading the instructional methodology and technique requirements of qualified technicians selected to become instructors (HD)

ldentifiers-College Level Examination Program, *Florida

Approximately three years after a sample of vocationel education teachers in Florida took the General Examinations. College-Level Examination Program (CLEP), the impact of the use of CLEP scores by teachers (392) in their professional developmes t was assessed indicators of professional growth vere teaching rank, salary, and degree status. Teathers who used CLEP for credit and/or admission to degree programs in vocational education advanced in rank and degrees held with greater frequency than teachers making no use of their scores. No difference in salary increases between the two groups was found Subjects overwhelmingly endorsed the use of credit for prior off-campus learning in furthering their professional development Conditions favorable to the study prevailed in Florida when the study was made, (1) The CLEP cests were given at no cost to the teachers. (2) State universities in Florida modified their admissions standards to allow subjects to enter degree programs of study with CLEP scores, and (3) a uniform cutoff score was used by the universities for granting credit for CLEP. Unless a generally similar set of circumstances prevailed elsewhere, the degree of association between the use of CLEP scores and indicators of professional growth reported in this study might not occur (Author/HD)

The 1977-75 program plan is presented for the National Institute of Education (NIE) Education and Work Group, which sponsors research on the nature of the relationship between schooling and work and develops pr. ..rams which aim at increasing the ability of youth and adults to choose, enter, and progress in careers without regard to the barriers imposed by sex or race on career aspirations. Background on the need for national research and development in career education, goals and conceptual framework for the NIE career education prograin (in progress since 1973), and sub-problems identified for addressing the goals are discussed in detail Nine strategy packages are then presented for program Each describes the problem, recent history, projected 1977 activities, relationship to earlier work, and references. Headings for the strategy packages are (1) career decisionmaking and measurement of career information. (2) career awareness and career choices, (3) restricted occupational socialization in young children, (4) counseling and information services. (5) expanding career exploration opportunities for junior high, senior high, and postsecondary students, (6) work skills required when mobility rather than occupational stability is typical. (7) co finated planning for career preparations, (8) Lert lication of occupational competencies after Griggs, and (9) adult continuing education The remainder of the book (over half the total contents) consists of abstract of over 100 projects completed or in progress. Each includes name and address of the principal researcher, project description, intract number, and funding level. Projects are indexed by principal researcher, topic, and name of affiliate, firm, or institution. A list of NIE publications on education and work is also included (TA)

This report describes the rationale for competency-based vocational teacher education, and a methodology by which synthesized competency lists for the preparation of vocational and career education personnel at various levels were developed during Phase 1 of a project to examine the applicability of competency-based teacher education to Massachusetts. Synthesized competency lists are included for vocational educators at the teacher, middle manager, and administrator levels. Competency statements are also included for personnel to administer career education programs at the elementary, junior, and senior high levels, including counselors, coordinators, and administrators Findings and recommendations for the project are presented. The appendixes (mo : than hair of the total contents) include all or avai sources of competency studies used in this project. The intention is that the document may be used as a comprehensive compilation of research in this field) Competency lists contained in the appendixes are as follows: Model Curricula for Vocational and Technical Teacher Education: Performance Elements and Examples of Module Titles and Performance Objectives, For Intial Teacher Preparation in Both Broad-Based Voca-'onal Education an'. Specific Service Areas; For Middle Managemen! Positions; For Administrative Positions, For New And Related Areas-Career Education, Community College Instructions, Part Time Vocational Education Call Staff, and Vocational Counselors. The career education competency questionnaire is also appended. (TA)

Identifiers-*Distributive Education Ciubs of America, Texas

A project is reported which accomplished the following objectives: (1) Developed greater awareness among high school distributive education teacher-

coordinators and State and area staff toward the competency based concept as applied to the Texas DECA (Distributive Education Clubs of America) Association's competitive events program. (2) identified major research and development efforts that focused upon the competency-based approach in distributive education. (3) prepared a core of 10 teacher-coordinators to provide leadership in their area as the competency-based competitive events are implemented on a full-scale basis at the area and State levels, (4) developed a philosophy, implementation plan, and system of recognition for the events program in Texas. (5) developed competency-oased competitive events for 10 occupational categories at two levels. Master employee and manager-owner. and (6) consulted with State and area staff in operating competency-based competitive events at the 1977 area and State c iferences in five occupational categories at one level, master employee. About one-sixth of the report consists of the project overview; lists of recommendations on philosophy, operations, recognition, and event identification system: a list of the project staff; guidelines for writing of competitive events; and thoughts on evaluation instruments for the DECA experimental competitive events The major portion of the document is the competericy-based event summaries developed in 10 occupational areas: (1) Apparel and accessories, (2) automotive, (3) food marketing, (4) food service, (5) general merchandising. (6) hardware, (7) home furnishings. (8) petroleum. (9) retail trade, other, and (10) virolesaling A total of 200 events are included, one for 10 different instructional areas at two levels (master employee and manager-owner) within each occupational area Each summary includes a list of competencies the event evaluated (knowledge, skills, and attitudes)

Identifiers-Pennsylvania The objective of the Pennsylvania longitudinal vocational development study was to produce and disseminate vocational development research to vocational directors and counselors to help them have an impact on vocational guidance and job placement activities Ministudies were conducted using previously collected data relating in school student and program data to out-of-school success and satisfaction. Findings from the studies were written in eight monthly reports (which are appended), from October 1975 through May 1976, and sent to all area vocational-technical schools as well as selected university and State education personnel The ministudy dealt with such topics as student experiences with high school, job, and college. success after high school as measured by job status, salary, and college achievement, sex and curriculum differences related to success and so isfaction, and several other issues. Although school personnel offered lip service concerning the usefulness of this type of research, no invitations were received to visit schools and help school personnel to use the results of the research, so the extent to which the impact part of the objective was met is questionable (MF)

On the Declining Labor Market Value of School-

Pub Date-Apr 77

Note-52p. Paper presented at the Annual Meeting of the American Educational Research Association (New York City, April 4-8, 1977) EDRS Price MF-\$0.83 HC-\$3.50 Plus Postage.

Descriptors-College Graduates, Economic Change. Economic Research. *Educational Benefits. Employment Trenes. Higher Education. Income. Labor Market. Research Reviews (Publications). Statistical Data, Statistical Studies, Trend Analysis, Vocational Followup

Issues regarding the relationship between schooling and labor market success are examined in this paper through review of previous research and consideration of additional data. The review of existing evidence on the changing labor market position of college graduates focuses on the work of Margaret Gordon and Richard Freeman with some attention to several other authors whose work is closely related to theirs. A reanalysis of questions on the relative earnings of recent college graduatus uses data from two sources. The Current Population Report's series "Consumer Income" and data on the experiences of new labor market entrants since 1967 taken from the National Longitudinal Surveys sponsored by the Department of Labor On the issue of whether there have been changes in relative earnings among recent male college graduates, th thor concludes that the existing work is incomplete and involves mappropriate comparisons, casting doubt on the usefulness of findings and implications. He draws the following conclusions from reanalysis of published data (1) There are declines in relative earnings among new labor market entrants as a group and (2) declines in relative earnings among older and more experienced college graduates. He contends that results do not support the hypothesis that a recent oversupply of college graduates has led to declines in relative earnings among new college graduates. (Author/JT)

Social Planning, *Socioeconomic Influences. Technical Assistance

The discussion paper consists principally of two checklists of preoperational research needs for development projects in developing nations. (Preoperational research is focused on the possibility or fear bility of introducing a given innovation. its implications, and necessary modification.) The checklists, the first on factors relevant for agricultural program planners and the second on implications for a family planning project, group preoperational research needs as quantitative and qualitative data in nine categories Kinship, economic and political and bureaucratic structure, legal system, educational system, medical/nutritional/sanitary beliefs and practices, religion and ethics, other cultural factors. and current exposure to other innovations. The author contends that it is useful to sy tematize needed information so that the social planner may be made aware of the multiplicity of factors affecting his projected input in a development activity, e.g., his introduction of new agricultural techniques or of a contraceptive device (MF)

Identifiers-Pennsylvania. Pennsylvania (Allegheny County)

The Job Placement Center project implements those job placement services outlined in the 'School-Based Job Placement Model" (ED 077 959), developed in 1972 by the Pennsylvania Research Coordinating Unit for Vocational Education. The project's purpose was to assimilate and extend this model to meet the job placement needs of 46 suburban school districts in Allegheny County (Pennsylvania). The seven project objectives related to establishing student workshops and information and evaluation centers, and conducting student placement and followup activities The Intermediate Unit-Based Job Placement Center was designed to assist all public and nonpublic school ... idents in grades 9-12, excluding students in the 1 ittsburgh City Schools, Its services were also available to those high school graduates of the 46 school districts, area vocational-technical schools, and nonpublic schools who had been out of school less than nine months. Two major evaluations were carried out in the project: (1) Evaluation of the job information workshops completed by participants at the conclusion of each workshop and (2) overall evaluation of the job placement center project through questionnaires sent to counselors, parents, and students. Although survey data indicated that several components of the program should be improved, overall it was concluded that the services of the Job Placement Center program were helpful, and it received favorable ratings in its first year of operation. The first five pages of the document contain the project report. The remainder of the document contains 10 appendixes of materials used in the project. including letters, brochures, sample forms, evaluation questionnaires, and questionnaire results. (TA)

Teaching, Technology Identifiers—*New England

Primary information furnished by college placement directors in New England revealed that recruiting for the 1976 New England college graduates started slowly in the fall of 1975 but picked up in the early months of 1976 Most placement officials reported slight increases in the number of recruiters visiting college campuses. Chemical engineers continued to be actively sought but civil engineers' prospects were hurt by weakness in the construction industry. Accounting majors were receiving attractive offers but supply may be outrunning the demand for them. The health field had many openings although registered nurses, for example, might not have been selected for their first choice of a position in the middle as far as job opportunities were concerned were the graduates in the business area. Graduates with majors in scientific fields and those with computer science courses should have been able to find suitable positions. Those with majors in education, humanities, and social sciences, on the other hand, found it more difficult to find jobs for which they had been trained.

This report also discusses government spending in relation to college graduates, recruiting to meet affirmative action goals, relocation, and the value of a college education TA)

Technology Identifiers—*New England

Based on interviews with placement officers at more than 24 colleges in New England and information sought from corporate placement officials and college seniors, the job outlook for many 1975 New England college graduates seemed favorable according to early spring indications. Campus recruiting, as measured by the number of firms scheduling campus visits, was fairly active in late 1974 but worsened as the economic downturn continued in 1975 In areas of occupation, demand for most angineers was relatively favorable, there was a strong demand for accounting majors, and some encouragement for general business graduates, but liberal arts and science graduates faced a less favorable outlook There were favorable opportunities in the health field, while teaching jobs continued to be scarce, other fields offered mixed opportunities Other fields/topics discussed in this report are agriculture, communication, computer sciences. conservation. library science, oceanography and ocean engineering, pharmacists, urban planning, criminal justice, associate degree graduates, effects of affirmative action plans, effects of the energy crisis on 1975 recruiting, and the search for a job (TA)

Descriptors-*Advisory Committees. *Agency Role, Community Involvement, *Educational Legislation, Elementary Secondary Education, *Federal State Relationship. Organizations (Groups), Resource Guides, School Industry Relationship, *State Agencies, State Departments of Education, State Federal Aid, *Vocational Education

This resource book for members of State advisory councils on vocational education provides an overview of how they may best approach their mission and discharge their responsibilities. It is based on the thinking of many authorities in the field of occupational education vis-a vis citizen advisory groups, analyzes the provisions of the several relevant ws in light of congressional intent; and it helps in terpreting the U.S. Office of Education "Rules and Regulations," its interpretations of the rules and regulations, and its "Guide for Developing a State Plan " In addition, considerable "how-to-do-it" information is included, taken from the experience of a number of State advisory councils. The four major sections are Responsibilities and Mission of the State Advisory Councils on Vocational Education, Formal and Informal Relationships with Various State and Local Agencies and Organizations, Relationships with Federal Agencies, and Operation of the State Advisory Council on Vocational Education. Identifiers-Rehabilitation Act of 1973

This training guide was developed by the West Virginia Research and Training Center staff in response to the mandate of the Rehabilitation Act of 1973 which emphasized that vocational rehabilitation caseloads must contain a large proportion of severely handicapped clients. It is designed to assist the rehabilitation staff in organizing and recording the kinds of activities, tasks and contacts necessary to establish and maintain a system of referral sources and a flow of cases, especially the cases of the severely handicapped. The guide contains a series of exercises which show the reader where improvement might be needed in his/her referral process. Topics discussed are the inventory, assessment, efficiency, priorities, goals, and time structuring. (SH)

Identifiers- Mining, United States

A project was designed to produce a broad description of current mining training programs and to evaluate their effectiveness with respect to reducing mine injuries. The research strategy was built on the ranking of mines according to the effectiveness of their training with an effective training effort being defined as that training which is associated with concurrent or subsequent low or reduced injury or

severity rates. Aggregate training and injuries data were used to evaluate the overall training effort at 300 mines as well as specific efforts in twelve categories of training course objectives (Data was gathered from articles in training and mining publications, telephone and mail contacts, and onsite visits to over 40 mining companies.) From such evaluations, recommendations were derived with particular emphasis being placed on identifying program characteristics that tend to be associated with effective training. Recommendations were also formulated with reference to role changes in industry and government interaction with respect to training programs, new or additional training programs, changes in the types of course materials and training methodologies, and recommendations concerning new areas of investigation. This document, the first of a two-volume report, is a summary consisting of narrative descriptions of several training programs found in the survey of the mining industry, the mafor results of an analysis of relationships between various measures of training and injuries, and the main conclusions and recommendations (HD)

Descriptors -Attendance, Behavioral Science Research, *Employee Attitudes, Employee Responsibility, *Feedback, Field Studies, *Goal Orientation. Group Unity. *Job Development, *Job Satisfaction, Labor Turnover, Man Machine Systems, Task Performance, Work Attitudes

A study examined the effects of feedback on the 10b attitudes and behavior of female sewing machine operators. The control group design involved all 165 piecework operators at the experimental site (a garment factory in a large southwestern city) and a random sample of 54 operators selected from a sister plant of the same manufacturer 10 miles away Pre- and posttests were administered one year apart Treatment involved implementing several program elements. Variety in job assignments, task identity (grouping into subassembly teams). task significance (repairs became responsibility of team members), autonomy (supervisors would monitor work only between teams), and feedback (daily to each team on its quality levels as a group and by operation) While significant improvements occurred in the cohesion and goal commitment of operators in subassembly work teams, these improvements were especially likely to occur among long-term operators Marked improvements in product quality were associated with feedback from management. Turnover and absenteeism also decreased, but overall satisfaction did not increase and intrinsic job satisfaction actually decreased. Operator work expectations increased as a result of their involvement in this field experiment. (Findings are discussed with reference to theoretical and practical issues in work systems redesign) (Author/TA)

Identifiers - United States

Objectives of the 3-year Volunteers in Rehabilita tio, Project (VIR) were to (1) document the scope and extent of volunteer participation within rehabilitation facilities. (2) prepare and test the effectiveness of handhooks designed to promote and improve volunteer programs, and (3) provide training experiences that could modify negative attitudes of facility leaders and guide the development of volunteer programs. To reach these objectives, three major project activities were performed First, a questionnaire was administered nationally to facility executive directors or administrators, auxiliary presidents, volunteer coordinators, and individual volunteers to gather information about volunteer participation and activities. This resulted in the second activity-the development and testing of handbooks relating to volunteers, for use by volunteers and nonhospital and hospital rehabilitation facilities. The final project activity involved a series of eight seminars which focused on using the project-developed handbooks and other training tools, broadening acceptance of different forms of volunteering, providing new knowledge, and developing important skills relating to volunteer activity. This final report of the VIR project details all project activities, background information, and results. The appendixes include the project questionnaire, a listing of the handbooks developed, and other information related to the project (.)

One of a series of 11 arts and humanities career exploration guides for grade 7-12 teachers, counselors, and students, this curriculum guide is intended to help teachers help students explore arts and humanities careers in regular grade 7-12 arts and humanities courses Freus throughout the four sections is on augmenting, rather than replacing, traditional curriculum. The introduction presents a rationale for the exploration of careers in regular secondary arts and humanities courses and gives an overview of the whole series of guidea, which were pilot teated during 1974-76 as one of the occupational cluster curriculum development projects to facilitate the delivery of career education. Sections 2 and 3 suggest teaching objectives (What do you want your atudents to learn about occupations in the arts and humanities fields?) and connecting strategies (How do teachers introduce career exploration into regular classroom curriculum?). The major portion of the guide consists of the 391 activities for students activities for exploring any and all occupations (13), activities for dance (6), activities for music (70), activities for theater and media (60), activities for visual arts and crafts (60), activities for writing (50), and activities for humanities (133) Appended are a list of job titles under the headings of dance, music, theater and media, visual arts and crafts, wri ing. and humanities; a chart representing the importance of regular school subjects for selected occupations, and a list of addresses for arts associations and for humanities associations that provide career information. Design, *Field Experience Programs, *Humanities Instruction, Learning Activities, Program Administration, Program Planning, Resource
G *ides, *School Community Cooperation, Secondary Education

One of a series of 11 arts and humanities career exploration resource guides for grade 7-12 teachers, counselors, and students, this program planning guide suggests several curriculum models for out-ofschool programs to augment traditional school courses. Chapter 1 introduces the guide and suggests its uses for administrators, teachers, and counselors. Chapter 2 describes a method for conducting a preliminary survey of community resources (organizations and people available to help the schools by providing sites for various experiences). Cnapter 3 describes curriculum models Some are short-term activities which mainly help students explore arts and humanities careers, e.g., interviewing workers, shadowing workers, going on field trips, and private study Models for long-term experiences include independent study or volunteer project, teacher aids and student tutors, internship, and apprenticeship. The following components are presented for each curriculum model. General information (design, grade level, credit/salary, time commisment), description, objectives and student activities, and supplementary resources. Chapter 4 offers planning and coordinating suggestions in such areas as funding, legal considerations, union rolationahip, recruiting and preparing students, and monitoring and evaluating programs for out-ofschool experiences. Concluding the chapter are brief descriptions of several programs which link arts and humanities workers with the school system. Appendixes list possible community sites for out-ofschool programs, selected unions involved in arts and humanities occupations, and State arts councila which award financial grants to school systems and can also help educators with limited local sites for out-of-school programs get in touch with appropriate workers in other communities who could assist in a program. Workers (Horticulture). *Ornamental Horticulture. Secondary Education. Skill Development. Student Projects. *Turf Management, Vocational Agriculture

The 88 activity gurdes in this document are intended to supplement the initial or organized instruction of the agricultural teacher at the secondary educational level. Some of the activities require one student to complete, others may need two or more students working in a team. Some activities also require followup checking within a few days to months Thus long-range planning and activity schedules are experienced by the students, and are typical of out-of-school work experiences. The activity guides cover the areas of grounds maintenance (41 activities), greenhouse (21 activities). landscaping (16 activities), and horticulture mechanics (10 activities), and are numbered consecutively for convenience in making assignments to the students. Each guide includes the title of the activity (e.g., pruning established evergreens, sodding a lawn area, and composting), tools and equipment needed, materials and supplies needed, procedures. special information, and a referral number for crossreference between or among other guides related to the activity to which the student is assigned. (HD)

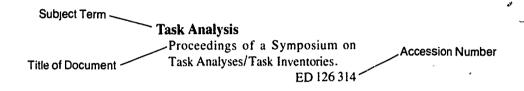

Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the Thesaurus of ERIC Descriptors, are in alphabetical order.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the report can be found under that number in the Resume Section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collec-

AUTHOR INDEX

This Index lists documents under the nation of their author(s). The Index is arranged in alphabetical order by the author's last name.

As shown in the example below, the Accession Number is displayed below and to the right of the title. Additional information about the document can be found under that number in the Resume Section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection

INSTITUTION INDEX

This Index lists the titles of documents under the institution responsible for them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. As shown in the example below, the Accession Number is displayed below and to the right of the title. Additional information about the document can be found under that number in the Resume Saction.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Sample Project Resume

PROJECTS IN PROGRESS

The resumes in this section announce ongoing research and curriculum development projects funded by the Vocational Education Amendments of 1968 (P.L. 90-576), Parts C. D. I. and J.

The projects are arranged alphabetically, first by state and then by title within each state.

Complete names and addresses are provided for both the individuals or organizations conducting the research and for the funding agencies.

Curriculum Management in Vocational-Technical Education.

Principal Investigator: Drake, Bob, Iverson, Maynard

Recipient Institution: Auburn University, Auburn, Alabama 36830

Start-End Dates: Start Date 1 Jul 77, End Date 30 Sep 78

Supporting Agency: Alabama State Department of Education. Division of Research and Evaluation, 858 State Office Building, Montgomery, Alabama 36130

Contract and/or Control No.: RCU-029

Summary of Project: The purpose of the project is to determine priorities for curriculum development and curriculum management functions in vocational-technical education in Alabama and to develop a curriculum development plan Specific objectives are to (1) identify the state's critical needs areas for curricular information and materials in occupational subjects at all levels. (2) identify the state's critical needs areas for curriculum development and curriculum management functions in vocational-technical education. (3) identify and/or develop an operational model for classifying, sequencing, and systematizing curricular information and materials in vocational-technical education, and (4) develop operational procedures for collecting, classifying, and evaluating the content of curricular information and materials, including materials needed for special group learners, for teaching occupational subjects at all levels. Procedures will include (1) utilizing a steering committee: (2) conducting invitational conference of state educators to assess s'ste's curriculum development efforts. (3) establishing curriculum evelopment priorities and identifying available curriculum development and management resources, and (4) developing a curriculum development and management plan

VTP-2934

Planning and Managing Youth Organization Meetings.

Principal Investigator: Peacock. Randall

Recipient Institution: Alabama State Department of Education, Montgomery Alabama 36130

Start-End Dates: Start Date 1 Nov 77, End Date 30 Sep 78

Supporting Agency: Alabama State Department of Education. Department of Research and Evaluation, 858 State Office Building, Montgomery, Alabama

Contract and/or Control No.: RCL-030

Summary of Project: The purpose c' he project will be to provide 133 VICA advisers with (1) training in techriques of conference planning. (2) training in techniques of conference management. (3) an opportunity to apply conference Planning and management techniques to an actual conference situation. (4) an opportunity to evaluate student performance through activities developed from competency based instructional objectives, and (5) an opportunity to interact with representatives of labor, management, and industry concerning entry-level competencies desired of vocational education program completors. This project will be conducted in conjunction with the 1978 United States Skill Dlympics and National VICA Leadership Conference. Two separate two-day workshops will be held to train 133 participants in conference planning and management skills. The 133 participants will then be given an opportunity to apply these skills in an actual conference

VTP-2935

Assisting Basic Learning Competence in the Postsecondary Vocational Technical Schools of Florida.

Principal Investigator: Perkins, L. Hobdy, Tully, G. Emerson

Recipient Institution: University of West Florida, Pensacola, Florida 32504

Start-End Dates: Start Date 1 Sep 77, End Date 30 Jun 78 Supporting Agency: Florida Department of Education, Division of Vocational

Education, Knott Building, Tallahassee, Florida 32304

Contract und/or Control No.: 7-2C21

Summary of Project: The purpose of the project is to assess general education competencies in six of Florida's postsecondary vocational-technical schools Specific objectives are to (1) field test instruments designed to facilitate entry-level placement of vocational-technical teachers and administrative personnel in administration of tests designed to mea ure competency-based outcomes. (2) determine the extent to which vocational-technical students generally display mastery of basic learning in general education, (3) further the competency-based concept in vocational-technical education, and (4) provide a basis for a comparative evaluation of the general and special educational needs of younger adults (age 18-21) with older adults (22 and older) enrolled in vocational-technical schools. Procedures will include (1) inviting the schools to participate. (2) training teachers in test administration, (3) administering tests of competency measures, and (4) scoring tests and communicating results to the participating schools

VTP-2936

Coordinators of Special Evaluation Activities.

Principal Investigator: Perkins, L. Hobdy

Recipient Institution: University of West Florida Pensacola, Filorida 32504

Start-End Dates: Start Date 1 Jul 77, End Date 30 Jun 78

Supporting Agency: Florida Department of Education, Division of Vocational

«LEducation, Knott Building, Tallahassee, Florida 32304

Contract and/or Control No.: 7-1M11

Summary of Project: The purpose of the project is to coordinate special evaluation activities necessary for the improvement of vocational programs. services, and activities in Florida Procedures will include (1) providing technical assistance in the development, implementation, and revision of a commehensive evaluation system for vocational education. (2) aiding in preparation of resource materials for evaluation, (3) assisting in developing designs and implementing impact studies to determine effectiven is of funded projects, (4) conducting analyses of evaluation data obtained, (5) assisting in preparation of reports and documents to facilitate use of evaluation data for program improvement, and (6) assisting in the design and implementation of dissemination, diffusion techniques to identified agencies and institutions

VTP-2937

Development and Validation of a Competency-Based, Preservice Inservice Learning System for Vocational Teachers (Continuation).

Principal Investigator: Perkins, L. Hobdy

Recipient Institution: University of West Florida, Pensacola, Florida 32504

Start-End Dates: Start Date 1 Jul 77, End Date 30 Jun 78

Supporting Agency: Florida Department of Education, Division of Vocational Education, Knott Building, " llahassee, Florida 32304

Contract and/or Control No.: 7-1C12

Summary of Project: The purpose of the project is to coordinate special evaluation activities necessary for the improvement of vocational programs. services, and activities in Florida Procedures will include (1) providing technical assistance in the development, implementation, and revision of a comprehensive evaluation program for vocational education, (2) aiding in preparation of resource materials needed to conduct this evaluation. (3) assisting in developing designs and implementing impact studies to determine effectiveness of funded projects, (4) conducting impact assessments of vocational dissemination and diffusion strategies. (5) analyzing evaluation data obtained; (6) assisting in report and document preparation to facilitate use of evaluation data for program improvement, (7) assisting in the design and implementation of dissemination/diffusion strategies for evaluation data; and (8) providing consultative services for implementing product assessment techniques to identified agencies and institutions

VTP-2938

Development of Criteria for Teachers Use in Reviewing and Selecting Instructional Materials for Competency-Based Programs.

Principal Investigator: Harrington. C Tracy

Recipient Institution: University of West Florida, 308 Johnston Building, N Monroe Street, Tallahassee, Florida 32303

Start-End Dates: Start Date 1 Oct 77, End Date 30 Jun 78

Supporting Agency: Florida State Department of Education. Bureau of Research/Evaluation, Knott Building, Tallahasse Florida 22304

Contract and/or Control No.: 7-1C13

Summary of Project: The purposes of the project ⇒ (1) assess in depth the needs of vocational teachers in the area of reviewing and selecting instruca "state of the art" paper on review selection tional materials. (2) pre procedures currently being used in Florida Vocational Schools, (3) develop and evaluate a set of review/selection procedures and criteria designed for use by vocational teachers, and (4) develop and evaluate an instructional module designed to train vocational teachers : the use of the review/celection procedures and criteria. Procedures will include. (1) needs assessment and diffusion planning. (2) identification and evaluation of existing approaches to reviewing and selecting materials and development of a "state of art" paper. (3) development and field-testing criteria for reviewing and selecting materials, and (4) development and evaluation of an instructional module for training vocational teachers to use the review selection criteria

VTP-2939

A Pilot Project Designed to Demonstrate a Model to be teed in the Evaluation of a Research Coordinating Unit (Continuation)

Principal Investigator: Hinley, Hugh

Recipient Institution: Florida State University. Department of Industrial Arts Education, Tallahassee, Florida 32376

Start-End Dates: Start Dai- 1 Jul 77, End Date 30 Jun 78

Supporting Agency: Florida Sic e Department of Education, Division of V scational Education, Knott Building, Tailahassee, Florida 32304

Contract and/or Control No.: 7-1C11

Summary of Project: The purpose of the project is to assess the overall impact of vocational education research and exemplary projects on educational practices in Florida Procedures will be to (1) identify patterns of monetary support for Research Coordinating Units sponsored research and exemplary projects, (2) identify and describe target population and participant groups. (3) identify institutional change resulting from participation impact. (4) identify utilization of R&D products. (5) design and implement a model for the annual update of the impact at 1 evaluation products, procedures, and processes developed through the RCL effort, and (6) prepare contract and grant materials and products for microfiching

VTP-2940

Georgia Vocational Education Information System. Principal Investigator: Simpsont Wiley H

Recipient Institution: Georgia State Department of Education, State Office Building, Atlanta, Georgia 30334

Start-End Dates: Start Date 1 Jul 77. End Date 30 Jun 78

Supporting Agency: Georgia State Department of Education State Office Building, Atlanta, Georgia 30334

Contract and/or Control No.: 45-10-C506

Summary of Project: The purpose of the project is to design, develop, and implement a Vocational Education Informa ion System including data systems for students, inventory followup, facilities, sta 7, and financial data to be utilized by state and local planners and providers of Vocational Education Programs The design, development, and implementation of the Vocational Education Information System will be based on the utilization of four regional data centers. Collection instruments will be keypunch size cards filled out at the local system and mailed to the data center in their assigned region Statewide compilation of data needs will be made for state and local utiliza-

VTP-2941

Research Proposal for Adapting Existing Group-Structured Curriculum at Augusta Area Technical School to a Performance-Based Curriculum Geared to the V-TECS Catalog.

Principal Investigator: Powell, Raymond C

Recipient Institution: Augusta Area Vocational-Technical School, 2025 Lumpkin Road, Augusta, Georgia 30906

Start-End Dates: Start Detc 1 Nov 77; End Date 30 Jun 78

Supporting Agency: Georgia State Department of Education, State Office Building, Atlanta, Georgia 30334

Contract and/or Control No.: C654

Summary of Project: Specific objectives of the project will be to (1) develop a model for converting group-structured curriculum to performance-based curriculum, (2) develop and implement a pilot study to include two instructional programs at Augusta Area Technical School; and (3) develop or identify performance objectives, criterion-referenced measures, and performance guides for each major instructional unit. Procedures will include (1) appointing a steering committee, (2) surveying needs of local industry and businesses. (3) conducting assessment of existing curriculum at Augusta Tech, (4) identifying broad program objectives, (5) identifying, collecting, and researching V-TECS catalogs and other materials necessary for developing a performance-based curriculum model. (6) developing a model for pilot study, (7) developing and implementing pilot programs. (8) disseminating results of pilot study and materials developed in I nase I, and (9) developing plans and procedures for Phase II

VTP-2942

Development and Field Testing of Curriculum Modules for Teaching Occupational Survival Skills-Phase Four.

Principal Investigator: Neison, Robert E.

Recipient Institution: University of Illinois. Champaign-Urbana. Illinois 61801

Start-End Dates: Star: Date 1 Jul 77, End Date 30 Jun 78

Supporting Agency: Illinois Office of Education, 100 North First Street. Springfield, Illinois 62777

Contract and/or Control No.: RD2-A8-501

"mmary of Project:. The purpose of the project is to identify and/or develop measurement scales to determine the effectiveness of the Occupational Survival Skills Modules (OSS) in helping students develop atti- des, motivations, and perceptions that will aid them in obtaining and maintaining a meaningful, satisfying, and productive working career and presenting a final revision of the O'sS modularized instructional units to the Illinois DAVTE The 12 curriculum modules will be field tested and evaluated in selected high schools in Illinois. Instruments will be develop of to obtain formal data from the field test teachers and students. Informal G. ia will be collected by means of observation, interviews, and discussions with field test teachers and students. The 12 curriculum modules will be revised based upon the formal and information data collected. Instruments will be identified and or develored to measure the effectiveness of the OSS modules with regard to at' -tive 'carning

VTP-2943

Implementation and Demonstration of an Innovative Child Care Program. Principal Investigator: Severns. Charles

Recipient Institution: Springfield Public Schools, Springfield, Illinois Start-End Dates: Start Date 1 Sep 77, End Date 30 Jun 78

Supporting Agency: Illinois Office of Education, 100 North First Street. Springfield, Illinois 62777

Contract and/or Control No.: RD2-A8-542

Summary of Project: The purpose of the project is to (1) identify a target population to be served by the child care program, i.e., 109-120 students at the ninth grade level, (2) conduct inservice and program planning activities for the instructional staff, (3) pilot the program and assess its effectiveness in terms of meeting student needs. (4) provide for parent, student, and community involvement and input in the implementation and assessment of the program, and (5) demonstrate the program to other instructional and administrative personnel within District 186 and the state. Procedures will be to (1) select a target population of the ninth grade students to be served by the program, (2) prov te inservice training for instructional personnel involved in teaching the child care program, (3) initiate the program in the 1977-78 school year at Jefferson Middle School, (4) involve parents, students, and community persons in the implementation and assessment of the program, and (5) demonstrate the program to other teachers and administrators within the district and state LEAs

VTP-2944

A Manual of Competency Matched Instructional Resources for Developing Coal Mining Curriculums.

Principal Investigator: (atz. Douglas S

Recipient Institution: CONSERVA. Incorporated. Raleigh. North Carolina

Start-End Dates: Start Date 15 Oct 77, End Date 30 Jun 78

Supporting Agency: Illinois Office of Education, 100 North First Street, Springfield Illinois 62777

Contract and/or Control No.: RD1-B8-551

Summary of Project: The purpose of the project is to (1) develop a catalog of validated underground coal mining occupational competencies. (2) identify and categorize existing multi-media coal mining instructional materials, and (3) match available multi-media instructional materials with validated coal mining occupational competencies. Procedures will be to (1) constitute a Project Technical Advisory Committee, (2) identify and list exemplary occupational collections, validate the competencies listed above through a process of rating, prioritizing, and review, (4) invalidate above through a process of rating, prioritizing, and review, (4) invalidate, and ist exemplary occupational competencies and maich with available instructional/training aids for development of each competency listed, and (6) prepare a final report including an inventory of available institutional/training resources, and the procedure for use of the catalog in the development of secondary level competency-base coal mining curriculums

VTP-2945

The Continuation and Expansion of a Research and Development Informa-

Principal Investigator: White, Thomas R.

Recipient Institution: Indiana University, School of Education Research, and Dissemination Service, 133 South Jordon, Biodiningtor. Indiana 4°401 Start—End Dates: Start Date 1 Oct 77, End Date 30 Sep 78

Supporting Agency: Indiana State Board of Vocational and Technical Education. 17 West Market Street. Room 401. Illinois Building, Indianapolis, Indiana 46204

Contract and/or Control No.: 29 78

Summary of Project: The purposes of the project are to (1) develop a comprehensive, multifunctional system for acquiring, organizing, storing, and disseminating research and development information which will nieet the identified-needs of vocational educators in the state, (2) catalog and store reports and products currently available which were produced in or received by the state, and (3) continue to abstract, synthesize, and edit information about selected Indiana research and development efforts into a series of newsetters and technical report publications and to disseifinate these products to appropriate state and national triget audiences. Procedures will include (1) conducting a user needs analysis and a systematic analysis and synthesis of the many components of comprehensive, inultifunctional information systems, including riteria and methods of selection, acquisition, organization, storage, retrieval, and dissemination (2) identify topics, (3) select, revise, and edit material, (4) produce eight technical reports and four newsletters, and (5) disseminate products to target audiences.

VTP-2946

Distributive Education Competency Based Curviculum Models by Occupational Clusters.

Principal Investigator: Davis, Rodiney

Recipient Institution: Eali State University, Muncie, Indiana 47306

Start-End Dates: Start Date 1 Oct 77, End Date 30 Sep 78

Supporting Agency: Indiana State Board of Vocational and Technical Education, 47 West Market Street, Room 401, Illinois Building, Indianapolis, Indiana 46204

Contract and/or Control No.: 60-78

Summary of Project: Objectives of the project are to (1) organize and in, orporate the existing wealth of distributive education corriculum materials a.id resources into the three-year program. (2) revalidate the content of the program itself. (3) match appropriate competencies to the revalidated, content by occupational cluster/job title, (4) develop appropriate teaching methodologies/student learning activities for competency development. (5) devise evaluative criteria suitable for determining the degree of competency development, and (6) synthesize products of objectives one through five into curriculum models. Procedures will include (1) using the Delpin technique to revalidate the content of the existing three year distributive education program. (2) completing the literature search and review. (3) developing the curriculum model format. (4) constructing the curriculum model format and curriculum models (5) approving the constructed models via the project advisory committee. (6) preparing for inservice training, and (7) providing inservice training for field testers.

VTP-2947

Impact of Vocational Education Research and T evelopment Products in Indiana.

Principal Investigator: Kim. Jin Eun

Recipient Institution: Indiana University, Department of Vocational I ducation, Bloomington, Indiana 47401

Start-End Dates: Start Date 1 Jul 78, End Date 30 Jun 79

Supporting Agency: Indiana State Board of Vocational and Technical Education, 17 West Market Street, Room 401, Illinois Building, Indianapolis, Indiana 46204

Contract and/or Control No.: 26-78

Summary of Project: The purpose of the project is to assess the impact of vocational education on research and development products funded through the State Board of Vocational and Technical Education Specific objectives are to (1) develop a framework or assessing research and development projects. (2) analyze inpois to research and development activities by program areas. (3) evaluate the quality of research and development products. (4) identify diffusion and adoption rates, and (5) assess impacts of adopted research and development products. Procedures will include (1) reviewing related evaluation studies, (2) developing an evaluation framework, (3) examining official records on research and development projects. (4) reviewing research and development products by a review panel. (5) developing instruments, (6) collecting data by mail. (7) visiting field sites, (8) analying collected data, and (9) preparing a final report

ÝTP-2948

olement a Student Job Placement System.

Recipient Institution: Indiana Vocational-fechnical College-North Central Region, Price Building, Twenty-Second and Unser Streets, Logarisport, Indiana 46974

Start-End Dates: Start Date 1 Oct 77, End Date 30 Sep 78

Supporting Agency: Indiana State Beard of Vocational and Technical Education, 17 West Market Street, Roc n 401, Illinois Building, Indianapolis, Indiana 46204

Contract and/or Control No.: 123-78

Summar of Project: The purpose of the project is to develop a career counseling a c job service which will establish communication lines between community agencies, business, industry, labor, and training programs in the lyfech-North Central Region and to orient ine public to this service. Procedures will include (1) preparing a master list of potential employers and establishing contact and rapport with them. (2) preparing and distributing information about job counseling and job placement to trainees, employers, and target audiences. (3) designing and implementing a followup system for collection of information concerning job opportunities and placement. (4) employing a full-time counselor, (5) designing a community resource directory of employers and their needs. (6) establishing and maintaining placement record for past and present students. (7) developing followup procedures for placement. (8) designing and implementing a placement system which will continue, and (9) designing modifying, and implementing report forms.

VTP-2949

The implementation of a Regional Planning and Communications Model. Principal Investigator: D. Loker. Eugene H

Recipient Institution: New Albany-Floyd County Consolidated School Corporation, 802 East Market Street, New Albany, Indiana 47150

Start-End Dates: Start Date 1 Oct 77, End Date 30 Sep 78

Supporting Agency: Indiana State Board of Vocational ad Technical Education 17 West Market Street, Room 401, Illinois Building, Indianapolis, Indiana 46204

Contract and/or Control No.: 59-78

Summary of Project: The purpose of the project is to continue objectives of the River Hills project, including (1) implementing a regional planning system for vocational education. (2) improving communications pertaining to ocational education, and (3) incorporating vocational education into the region's economic development efforts. In addition. is project aims to (1) implement the products of these activities into the regional educational planning and economic development efforts, (2) broaden the scope of regional communication in relation to vocational education. (3) expand planning and communications into an adjacent economic region by establishing and providing assistance to a satellite office. (4) seek alternate sources of funding for maintaining the River Hills project and the satellite office, and (5) using information from the project's first year to confirm and support the development and implementation of competency-based curriculum in se lected occupational areas. Procedures will include (1) reviewing funding sources. (2) applying for supplemental funding. (3) operating the satellite center. (5) coordinating regional planning and communications. (6) support ing performance based curriculum. (7) assessing and coordinating reduction of sex stereotyping, (8) collecting and analyzing data, and (9) making a final

VTP-2950

. Indiana Vocational-Technical Education Research and Service Center Task

Principal Investigator: Gannon, F B

Recipient Institution: New Educational Directors, Incorporated, Sox 307. Crawfordsville, Indiana 47933

Start-End Dates: Start Date 1 Oct 77, End Date 15 Mar 78

Supporting Agency: Indiana State Board of Vocational and Technical Education, 17 West Market Street, Room 401. Illinois Building, Indianapolis. Indiana 46204

Contract and/or Control No.: 129-78

Summary of Project: The purpose of the project is to provide the State Board of Vocational Technical Education with an analysis of the extent to which FY 1976 and FY 1977 Part C and Part D projects accomplished the objectives stated in their funding proposals. In addition, characteristics which are common to "s' acessful" projects, and those common to "unsuccessful" projects will be identified. Procedures will include. (1) obtaining funded propose als, revisions, final reports, and products from the State Board of Vocational Technical Education (SBVTE) (2) developing review and summary procedures; (3) reviewing and analyzing projects to find out the extent to which each met its obligations. (4) completing a second review and analy. by a second reviewer; (5) using an arbitrator review in the event that the first and second reviews are not in accord, (6) preparing and revising a summary document and presenting it to appropriate SBVTE staff for review, and (7) releasing the summary document to the SBVTE

VTP-2951

A Multi-Media Approach to Increasing Communication of Vocational Education in Indiana.

Principal Investigator: Moore, Barbara A

Recipient Institution: Pardue University, West Lafayette, Indiana 47907

Start-End Dates: Start Date 1 Oct 77, End Date 30 Sep 78

Supporting Agency: Indiana State Board of Vocational and Technical Education, 17 West Market Street, Room 401, Illinois Building, Indianapolis, Indiana 46204

Contract and/or Control No.: 21-78
Summary of Project: The purpose of the project is to develop materials (hend books, slide-tape presentations, etc.) explaining the organization, operation, and benefits of vocational education in Indiana. These materials will be used to explain vocational education to school administrators and guidance personnel, as well as persons not familiar with vocational education. Procedures will include (1) organizing the advisory committee. (2) reviewing the literature, (3) developing the handbook, (4) developing slide tape presentation, (5) field testing the handbook and slide tape presentation. (6) refining and revising the handbook and slide tape preservation, and (7) printing and disseminating the materials

VTP-2952

Plan for a Multi-County Vocational Education Communications Center. Principal Investigator: Cunningham. Davis

Recipient Institution: indiana Vocational Technical College, 3501 First Ave nue. Evansville, Indiana 47710

Start-End Dates: Start Date 1 Sep 77, End Date 31 Aug 78

Supporting Agency: Indiana State Board of Vocational and Technical Educa tion, 17 West Market Street, Room 401, Illinois Building, Indianapolis. Indiana 46204

Contract and/or Control No: 73-78

Summary of Project: The purpose of the project is to better inform the publics served by area educational institutions of the various programs and series offered by the institutions. Procedures will include (1) establishing a centralized office with a full-time counselor and secretary. (2) disseminating infor mation about vocational education, (3) holding dirons for and providing counseling to interested persons. (4) making presers. Julis to area groups, (5) gathering information about area institutions offering programs or courses in vocational education, and (6) promoting communication and understanding between the staffs of these institutions

VTP-2953

Slide/Tape Communication Presentation for Madison, Grant, and Tipton Counties.

Principal Investigator: Oakes, Nancy Suc

Recipient Institution: John H. Hinds Area Vocational School, R. R. 4, Elwood, Indiana 46036

Start-End Dates: Start Date 1 Jul 77, End Date 30 Jun 78

Supporting Agency: Indiana State Board of Vocational and Technical Education, 17 West Market Street, Room 401. Illinois Building, Indianapolis. Indiana 46204

Contract and/or Control No.: 101-78

Summary of Project: The purpose of the project is to develop a slide/tape presentation and printed narrative in order to communicate the philosophy, purposes, and training available through vocational education to the people of Madison. Tipton, and Grart counties. Specific objectives are to (1) upgr de existing materials. (2) promote the philosophy of vocational education throughout the area; (3) assist in the development of communication skills of vocational students currently enrolled in vocational programs in Madison and Tipfon counties through youth organization presents ions and involvement in the slide/tape presentation; and (4) generate enthusiasm for vocational education among the population via firsthand knowledge of existing and projected programs available in the area. Procedures will include (1) using program materials available through the state department and individual schools, (2) taking slides of actual school activities; (3) using musical and narrative background developed by students, employers, instructors, and advisory committee members, and (4) reviewing and selecting final presentation slides and materials

VTP-2954

Standard and Optimum Vocational Technical Equipment Requirements and Their Adequacy.

Principal Investigator: Walter, Corrine W

Recipient Institution: Indiana Vocational Technical College. P.O. Box 1763, Indianapolis, Indiana 46206

Start-End Dates: Start Late 1 Oct 77, End Date 30 Sep 78

Supporting Agency: Indiana State Board of Vocational and Technical Educa tion, 17 West Market Street, Room 401, Illinois Building, Indianapolis, Indiana 46204

Contract and/or Control No.: 67-78

Summary of Project: The purpose of the project is to determine and disseminate standard equipment listings required for each course offered by the college and to supplement such records with the variation to basic equipment needs mandated to meet regional employment requirements. Specific objectives will be to (1) prepare and disseminate a standardized listing of minimum and optimum equipment requirements for vocational training programs. (2) make an annotated inventory of all equipment used for each course citing the age, condition, replacement cost, availability of repair parts, modification required to meet safety standards, and anticipated obsolutionee date, (3) make a comparative analysis to determine standardizatio is ariables to meet required regional training needs, and (4) develop a cross referenced system to show the utilization of equipment core son to multiple curricula. Procedures vall include (1) designing fortus for collection of information on standard and optimum equipment requirements and for inventory of current equipment. (2) collecting data about recommended needs and current equipment. (2) preparing equipment listings. (4) reviewing process and finalizing equipment lists, (5) inspecting and documenting current equipment with projection of needed equipment and minimum specifications, (6) designing and preparing standard optimum equipment lists for dissemination, and (7) reporting and finalizing project activities

VTP-2955

A Student Tracking Program for Postsecondary Vocational Technical Education.

Principal Investigator: Wood, Glenn

Recipient Institution: Indiana Vocationai Technical College-Evansville, 3501 First Avenue. Evansville. Indiana 47710

Start-End Dates: Start Date 1 Sep 77, End Date 31 Aug 78

Supporting Agency: Indiana State Board of Vocational and Technical Education, 17 West Market Street, Room 401, Illinois Building, Indianapolis, Indiana 46204

Contract and/or Control No.: 53-7°

Summary of Project: The project's purpose is to proniote accountability of instructional and supporting services of the college through observable results of the student's education. Specific objectives are to (1, identify instruments suitable for the project. (2) develop a methodology most suitable 10 obtain desired information, (3) develop summary and analysis methods, and (4) develop a system of data analysis for most effective use at the local level Procedures will include (1) using information and training received by the college staff at a placement seminar. (2) supplementing this thformating by using available tested instruments of consultant services, (3) using personnel in the counseling and placement offices to share responsibility for project development, and (4) developing questionnaires and forms

VTP-2956

West Central and Rennase Principal Investigator: H-Recipient Institution: Wc ery Street, Francesville. Vocational 1 evelopment Program. agh, Jerry

trai School Corporation, 117 East Montgomana 47946

Start-End Dates: Start Date 1 Aug 77, End Date 30 Jun 78

Supporting Agency: Indiana State Board of Vocational and Technical Educa tion, 17 West Market Street. Room 401, Illinois Building, Indianapolis, Indiana 46204

Contract and/or Control No.: 108-78

Summary of Project: The purpose of the project is to develop curriculum to meet niarket demands in Region Ten. Specific objectives are to (1) identify the job market in Region Ten, (2) survey students from Rensselaer and West Central regarding vocational interests, and (3) form a feasibility study from the information obtained from the students and employers. Procedures will include. (1) contacting business and industrial leaders and surveying school communities to determine employment needs. (2) administering Vocational Interest Surveys to il members of the freshman through senior clauses, and (3) analyzing the employment characteristics and student interests in order to develop curriculum

VTP-2957

Job Development, Placement, and Followup.

Principal Invistigator: Jordan Kenneth

Recipient Institution: Lewiston School Department, Lewiston, Maine 04240 Start-End Daces: Start Date 1 Sep 77, End Date 30 Jun 78

Supporting Agency: Maine Research Coordinating Unit, Bureau of Vocational

Education. Augusta. Maine 04333

Summary of Project: The objectives of this continued project are to (1) form and utilize a working advisory committee. (2) place special emphasis on work placement activities for disadvantaged individuals within the student popula tions served, (3) actively provide technical assistance to school systems which wish to provide work placement services for students. (4) integrate project activities into existing curriculum programs, and (5) promote structural adoption of project activities by existing school personnel and administrative units

VTP-2958

North Haven Project for Career Development.

Principal Investigator: Gjelton. Thornas G

Recipient Institution: North Haven Commun. School North Haven Maine 04853

Start-End Dates: Start Date 1 Jul 77 End Date 30 Sep 77

Supporting Agency: Maine Research Coordinating Unit, Bureau of Vocational Education, Augusta, Maine 04333

Summary of Project: The purpose of the project is to equip students in a small. geographically isolated community with skills and experience which can assist them in making career decisions upon-leaving school. Specific objectives are to (1) isolate the successful programs and activities developed under the North Haven Project for Career Development to date (2) gather supplementary resources and information which help to further elucidate issues in the problem area and reinforce the approach developed at North Haven, (3) identify approaches to these issues found successful in other schools. (4) compile a comprehensive report including the above information, and (5) publish and distribute this report throughout Maine. Procedures will include (1) extensive discussions with North Haven staff summarizing activities and programs. (2) visits to other small, rural schools. (3) consultations with individuals active in the implementation of project activities, such as coordinator of student exchanges, staff development consultan s, evaluators, etc. and (4) employing a director to do project travel, research, writing, and to publish and distribute the final report

VTP-2959

IJ

Occupational Guidance for Disadvantaged Youth

Principal Investigator: Seager. Eleanor M.

Recipient Institution: H O M E Co-Op. Box 408 Orland. Maine 04472

Start-End Dates: Start Date 1 Sep 77, End Date 30 Jun 78

Supporting Agency: Maine Research Coordinating Unit. Bureau of Vocational

Education, Augusta, Maine 04333

Summary of Project: The purpose of the project is to develop an exemplary occupational education component within the HOME Learning Center's adult high school diploma program which would three the needs of disadvantaged youth and adults. Procedures will include (1) evaluating students' interests, abilities, and training needs through individual contact, evaluative technimes, and classroom contact, (2) providing opportunities for students to expand their horizons, both geographically and in terms of values and career choices, (3) running one Job Life planning course during the year. (4) continuing to establish and solidify statewide and local agencies serving persons looking for career information, (5) making referrals of students to agencies and assisting clients in job placement, and (6) attempting to make agencies and emloyers more responsive to the new 3 of students and lowincome residents of the area.

V FP-2960

The Dissemination of Occupational Education Research, Adult Basic Education, and Other Community College and Technical Institute Information Principal Investigator: Boone, Edgar J

Recipient Institution: North Carolina State University, Department of Adult and Community College Education, Raleigh, North Carolina 27607

Start-End Dates: Start Date 1 Jul 77, End Date 30 Jun 78

Supporting Agency: North Carolina State Board of Education, Raleigh. North Carolina 27602

Summary of Project: The purpose of the project is to support the continued development and publishing of the "Community College Review" in order to disseminate occupational education, adult basic education, and other coinmunity college and technical institute information and research. Procedures will include. (1) employing an editor, managing editor, research assistant, and secretary. (2) contracting with a profestions' firm for the printing, promotion, and distribution of four quarterly issues of "Community College Review", (3) promoting subscriptions, (4) providing evaluations of the proper proration of articles as they relate to funding sources, and (5) appointing an editorial board composed of recognized state and national authorities in the field of community college education

VTP-2961

Adaptation of Vocational Education Programs for Special Needs: A Slide/-Tape Presentation.

Principal Investigator: Crawford, Glinda

Recipient Institution: University of North Dakota, Grand Forks, North Dakota 58202

Start-End Dates: Start Date 1 Jul 77, Fnd Date 1 Jun 78

Supporting Agency: North Dakota State Board for Vocational Education 900 East Boulevard, Bismarck, North Dakota 58505

Contract and/or Control No.: RR-62

Summary of Project: The purpose of the project is to provide audio visual instructional materials in the form of a slide/tape presentation that will be used in workshops to instruct vocational education personnel in the methodologies which can be used in providing instruction to special needs students in North Dakota schools. Project personnel will develop a series of slules and accompanying tapes which provide a step-by-step instructional procedure for handling the special needs students in vocational education programs. The materials developed will be a component of an EPDA grant to the project personnal and be fully articulated with the materials developed under that major funding grant. Workshops will be provided to vocational education instructors in the utilization of the materials developed under the LPDA s:ant through the medium of the slide/tape presentations developed under the terms of this contract

VTP-2962

Audio Visuals for Special Needs in Occupational Flome Economics. Principal Investigator: Butts. Richard

Recipient Institution: Magic City Campus, Minot, North Dakota 5870!

Start-End Dates: Start Date 1 Jul 77, End Date 30 Jun 78

Supporting Agency: North Dakota State Board for Vocational Education, 900 East Boulevard, Bismarck, North Dakota 58505

Contract and/or Control No.: RR-59

Summary of Project: The purposes of the project are to develop instructional materials for special needs students in the area of home econ innes and to provide audio visual aids to supplement the instructional materials developed under the terms of the project. The project personnel will continue the activity initiated last year in the development of instructional materials in the area of home economics occupations for special needs students. Project personnel will take slides of students utilizing the equipment and related components of the occupation being taught. These slides will a company the instructional materials. The project will be in a revision/development phase for the majority of the term of the project and will be responsible for providing a complete set of audio visual instructional aids to accompany any instructional materials. These audio visual aids and instructional packages will be made available to all vocational education programs offering instructios, to special needs students in home economics

VTP-2963

Career Awareness Materials and P ogram for Special Needs Students. Principal Investigator: Haas. Carl

Recipient Institution: Dickinson Public Schools, Dickinson, North Dakota 58601

Start-End Dates: Start Date 1 Jul 77. End Date 30 Jun 78

Supporting Agency: North Dakota State Board for Vocational Education, 900 East Boulevard, Bismarck, North Dakota 58505 Contract and/or Control No.: RR-61

Summary of Project: The purpose of the project is to establish a learning sequential package which is compatible to special needs students in the area of career awareness. The material developed will provide an opportunity for special needs students to obtain an understanding of the jobs and necessary skills to perform successfully in those jobs. Utilizing some material which has previously been developed and expanding on those materials, the project personnel will supplement the instructional package to include a broader range of career opportunities for special needs as opposed to actual job skills in the occupations being discussed. The custing materials will be utilized to identify the skills and the occupations, but not skill training as such

VTP-2964

The Development of a Common Program of Study for Auto Mechanics in North Dakota

Principal Investigator: Hunt, Jim

Recipient Institution: Lake Area Vocational Center, Devils Lake, North Dakota 58301

Start-End Dates: Start Date 1 Sep 77, End Date 30 Jun 78

Supporting Agency: No.th Dakota State Board for Vocational Education, 900 East Boulevard, Bismarck, North Dakota 58505

Contract and/or Centrol No.: RR-71

Summary of Project: Th ject's purpose is to develop a common program , education auto mechanics programs in the state of study for the vocation of North Dakota at the secondary level and to utilize existing materials Civeloped by various state agencies in the upgrading of auto mechanics programs in North Dakota. A committee of auto mechanics instructors will develop a common core curriculum for auto inechanics utilizing as the basic set of instructional materials the Auto Mechanics I and Auto Mechanics II developed by the state of Oklahoma. The curriculum committee will determine what instructional materials will need to un developed to supplement the existing Auto Mechanics I and Auto Mechanics II for purposes of imple menting these materials in the state of North Dakota. A complete set of instructional materials will be provided to every auto mechanics instructor in the state of North Dakota through a workshop condited by the paper personnel

VTP-2965

The Development of a Common Program of Study for Building Trades in North Dakota.

Principal Investigator Sorum, Lyle

Recipient Institution: Fargo Public Schools, Fargo, North Dakota 58102

tart-End Dates: Start Date 1 Sep 77 End Date 30 Jun 78

Supporting Agency: North Dakota State Board for Vocational Education, 900 East Boulevard, Bismarck, North Dakota 58505

Contract and or Control No.: RR-66

Summary of Project: The project's purpose is to develop a common program of study for building trades in the state of North Dakota by utilizing existing materials available from the various state agencies. A course of study which would be common to all building trades programs in the State of North Dakota will be developed utilizing the residential carpentry program from the state of Oklahoma as the major component. The normon program will supplement the existing residential carpentry materials to include other areas of building trades such as drafting, masonry, plumbing, and wiring. A committee of building trades instructors will be responsible for developing the common course of study. A complete set of the guidelines for the common course of study and the necessary instructional materials will be provided to all building trades instructors through an inservice workshop following the developmental phase of the project.

VTP-2966

The Development of a Common Program of Study for Electronics in North Dakota.

Principal Investigator: Haakenson, Harvey

Recipient Institution: Bismarck School System Bismarck North Dakota 58501

Scart-End Dates: Start Date 1 Sep 77, End Date 30 Jun 78

Supporting Agency: North Dakota State Board for Vocational Education, 900 East Boulevard, Bismarck, North Dakota 58505

Contract and/or Control No.: RR-67

Summary of Project: The purpose of the project is to develop a common course of study for electronics programs in the state of North. Dakota using as the basic core of instruction the electronics curriculum developed by the state of New Mexico. A common core of instruction will be detected which will utilize the electronics curriculum available from the state of New Mexico and supplemented by materials available through other state agencies such a Missouri. A committee of electronics instructors will determine what materials can be utilized in the state of North Dakota to fit the needs of lectronics in the state.

VTP-2967

The Development of a Common Program of Study for Office Occupations in North Dakota.

Principal Investigator: Skarp, Toin

Recipient Institution: Southeast Vocational Center. Oakes, North Dakota 58474

Start-End Dates: Start Date 15 Jul 77, End Date 30 Jun 78

Supporting Agency: North Dakota State Board for Vocational Education, 900 East Boulevard, Bismarck, North Dakota 58505

Contract and/oc Control No.: RR-64

Summary of Project: The purpose of the project is to evaluate the existing office education program of study and to determine the content of the upgraded course of study. A secondary objective will be to evaluate existing office education materials available from various state agencies for the purposes of designing a basic core curriculum for oifice education programs in the state of North Dakota. Existing state agency materials will be evaluated for the purposes of determining their effectiveness in providing an instructional package to the North Dakota office education instructors. A basic core curriculum will be developed utilizing existing state inaterials and adopting or adapting these materials in their current form as necessary. A curriculum committee of 20 histructors from the secondary, postsecondary, and teacher education program. In the state will be utilized to develop the basic core naterials.

VTP-2968

Educational Specifications Handbook on Facilities and Instructional Equipment for North Dakota Secondary School Industrial Arts Programs.

Principal Investigator: Bender, Myron

Recipient Institution: University of North Dakota, Grand Forks, North Dakota 58202

Start-End Dates: Start Date 1 Sep 77, End Date 31 Mar 78

Supporting Agency: North Dakota State Board for Vocational Education, 900 East Boulevard, Bismarck, North Dakota 58505

Contract and/or Control No.: RR-65

Summary of Proje it. The purpose of the project is to develop a handbook for industrial arts programs in the state of North Dakota relative to the educational specifications on facilities and instructional equipment. Project personnel will gather all necessary information from existing state agencies and determine which of these specifications best fit the needs of industrial arts programs in North Dakota. Guidelines will be developed for all industrial arts programs in the state of North Dakota. A handbook will be developed by project personnel and will be made available to all school systems in the state of North Dakota who wish to receive a copy. This handbook will be used as the guide for determining the reimbursement of industrial arts equipment and the establishment of new programs.

VTP-2969

Floriculture Identification Filmstrips.

Principal Investigator: 113as Carl

Recipient Institution: Dickinson Public Schools Dickinson North Dakota 58601

Størt-End Dates: Start Date 1 Jul 77, End Date 1 Jun 78

Supporting Agency: North Dakota State Lord for Vocational Education, 900 East Boulevard, Bismarck, North Dakota 58505

Contract and/or Control No.: RR-63

Su imary of Project: The purpose of this project is to develop a series of filmstrips in agriculture that are directly related to the area of floriculture. Project personnel will establish a procedure for identifying all floriculture native to the state of North Dakota and will as a result of this identification, develop the necessary shdes to put together a filmstrip that will be made available to all agriculture programs in the state. The materials developed under this contract will be used as a supplement to the existing curriculum package in vocational agriculture. The filmstrips will be made available at cost to all school systems in the site which desire to purchase them.

VT1'-2970

Health Occupations Curriculum Development Project.

Principal Investigator: Hunt, Jun

Recipient Institution: Lake Area Vocational Center, Devils Lake, North Dakota 58301

Start-End Dates: Start Date 2 Sep 77, End e 30 Jun 78

Supporting Agency: North Dakota State Board for Vocational Education, 900 East Boulevard, Bismarck, North Dakota 58505

Contract and/or Control No.: RR 70

Summary of Project: The purpose of the project is to continue the curriculum upgrading activity in the area of health occupations which was initiated last year, and to add to the instructional materials previous, developed by providing additional supplementary instructional materials. A committee of health occupations instructors will continue the first phase of development of curriculum guidelines for health occupations by supplementing the existing materials with instructional aids and additional task analyses. An inser-

vice workshop will be held to introduce the materials to all health occupations instructors on completion of the project. A common set of instructional materials will be made available to all health occupations programs in the state of North Dakota.

VTP-2971

Incorporation of Consumer Education Lessons in Adult Basic Education Programs in North Dakota.

Principal Investigator: Shurr. Harriet

Recipient Institution: James Valley Vocational Center, Jamestown, North Dakota 58401

Start-End Dates: Start Date 1 Jul 77, End Date 1 Jun 78

Supporting Agency: North Dakota State Board for Vocational Education, 900 East Bouleverd, Bismarck, North Dakota 58505

Contract and/or Control No.: RR-60

Summary of Project: The purpose of the project is to provide a component of consumer education in adult basi, education programs in two cities in the state of North Dakota. Once de cloped and field tested, these materials will be made available for any program in the state. The project personnel will compile a package of instructional materials utilizing all common consume, education materials currently available and develop a sequential learning package from these materials. The materials will be subsequently field tested in two locations. Bismarck and Jamestown, in the state of North Dakota for purposes of determining their use in other greas. The materials will be modified as necessary and a complete set of inaterials made available for use in other programs.

VTP-2972

Project to Develop a Statewide Promotional Package for ERIC Materials for Vocational Education Personnel.

Principal Investigator: Berntsen, Pat

Recipient Institution: ERIC Center, University of North Dakota, Grand Forks, North Dakota 58202

Start-End Dates: Start Date 15 Oct 77 End Date 15 Jun 78

Supporting Agency: North Dakota State Board for Vocational Education 900 East Boulevard, Bismarck, North Dakota 58505

Contract and/or Control No.: RR-69

Summary of Project: The project's purpose is to develop a promotional pack age consisting of brochures and other audio visual aids for purposes of expanding the use of the ERIC system in the state of North Dakota Several workshops will be held including one at the North Dakota Teachers Convention and other similar gatherings of instructors to pronicte the ERIC Center at the University of North Dakota, Brochures will be in to all vocational education instructors in the state of North Dakota ** . ich a set of forms to be used in requesting ERIC searches. The ERIC mer will develop a brochure which will be mailed and will supplement his brochure with an audio visual package which can be loaned to all school systems in the state for purposes of determining how the service can be provided to their schools Increase utilization of the ERIC system is the major contribution of this activity. The ERIC Center at the University of North Dakota will supple ment the instructional materials available to teachers through the utilization of ERIC search procedures

VTP-297.

Validation of Home Economics I and Agricultural Mechanics I Curriculum Manuals.

Principal Investigator: Frazier, William D

Recipient Institution: Oklahoma State Department of Vocazional and Technical Education. Department of Research and "avaluation. Stillwater, Oklahoma 74074

Start-End Dates: Start Date 1 Nov 77, End Date 15 Jun 78

Supporting Agency: Oklahoma State Department of Vocational and Technical Education, 1515 West Siath Avenue, Stillwater, Oklahoma 74074

Contract and/or Control No.: 1001

Summary of Project: The purpose of the validate the curriculum manuals, develop by Oklahoma State Department of Vocational and Technical Education, in terms of student achievement. No field tests: ve yet been conducted on an item analysis. Thus, the model developed will meet the need whereby future manuals can be validated. The design will be based on those populations of teachers in Oklahoma who are teaching either Home Economics I or Agricultural Michanics. I A letter will be sent to each of the identified teachers requesting that they indicate which units they plan to teach during the second semester. Five of the identified units will be randomly selected on which to obtain student test results. A random sample of 10 teachers will then be drawn to identify the classes of students. Teachers will collect the student achievement data and submit the results for each student to the project staff. An item analysis will be used to identify strengths and weaknesses in the curriculum.

VTP-2974

Community College Followup Pilot Project.

Principal Investigator: Blucher, Bob

Recipient Institution: Lane Community College, 4000 East 30th Avenue, Eugene, Cregon 97405

Start-Erd Dates: Start Date 15 Sep 7. End Date 30 Jun 78

Supporting / gency: Oregon State Board of Education, Salem, Oregon 97310 Summary of Project: The project's purpose is to revise and field test the comnunity college followup survey instrument so that the data collected is more seful to program administrators and federal data collection requirements are met Procedures will include (1) obtaining the student followup data requirements of the Education Amendments of 1976. (2) defining the data needed by the community college for program evaluation purposes, (3) reviewing the present community college followup system to identify data requirements not being met, (4) 'dentifying new sources of data, (5) revising the instrument to meet new recuirements. (6) confirming adequacy of revised questionnaire with appropriate state and community college personnel. (7) assuring the statistical validity and reliability of the community college student followup procedures. (8) field testing the instrument on a minimum of 100 subjects selected from a population of the college's 1976-1977 graduates and early leavers, (9) conducting a telephone survey of the followup of all nonrespondents. (10) documenting all survey procedures, and (11) reporting results of the field test to the ocumunity colleges

VTP-2975

Development of Career Education Materials in the Basic Subject Matter

Principal Investigator: McDermeit, Eldon

Recipient Institution: Marion County Intermediate Education District, 3180

Center Street, N.E., Salem, Oregon 97301 Start-End Dates: Start Date 1 Apr 77, End Date 30 Jun 78

Supporting Agency: Oregon State Board of Education, Career Education Division, 942 Lancaster Drive, Northeast, Salem, Oregon 97310

Summary of Project: The purpose of the project is to initiate the development of a core career education curriculum for grade levels eleven and twelve wherein students not enrolled in the vocational cluster programs can meet their career development coinpetencies within the basic subject matter areas Specific objectives are to (1) design a minimum of two course goals for each of five existing career education program goals. (2) design a minimum of two performance indicators for each identified course goal, (3) develop a minimum of ten career-centered activities in a inimmum of five subject inatter areas that would satisfy the stated performance indicators as evidence of meeting designated course and program goals, and (4) design a minimum of two extensive career development activities within each of a minimum of five subject matter areas whereby students would obtain entry-level skills in their t matter chosen area of work Teams of up to five secondary level relected to teachers and counselors in up to five areas of instruction wil design the materials. They will be brought to a central location, receive a joint orientation to the format, organization, and content of existing insterials for lower grade levels, and then design the materials for each subject matter area. They will be brought back together periodically to correlate and coordinate the writing efforts. Following development of the materials, they will be printed for field testing in the fall semester. They will thereafter be revised as per field test suggestions for early spring publication

VTP-2976

Course of Study Project (Continuation of 19-7803).

Principal Investigator: Welch, Frederici G

Recipient Institution: Pennsylvania State I inversity, Division of Occupational and Vocational Studies. 119 Rackley Building, I niversity Park Pennsylvania 16802

Start-End Dates: Start Date 1 Oct 77, End Date 30 Jun 78

Supporting Agency: Pennsylvania State Department of Education, Harrisburg.
Pennsylvania 17126

Contract and/or Control No.: 85-8001

Summary of Project: The purpose of the project is to (1) provide a guide to helping the beginning and established teacher deliver complete and reliable education in his or her occupational specialty area, (2) continue Phase II of the nine occupational areas that have been developed in the past year. (3) expand the trade and job analysis into a complete course of study which will identify occupations and include information and operation sheets, etc., and (+) provide a base for which needed occupational competencies can be identified and established in the future. The V-TECS process will be used wherever possible and available. A committee of highly skilled tradesmen. teachers have been selected, representing each section of the state, brought together with graphic illustrators, technical writers, and curriculum special ists at the Pennsylvania State University, to compile a complete Course of Study in the occupational area. The course of study will include all operations (compete cies) and a series of jobs which will allow the student, in an organized man er to practice the needed competencies so that they can become skilled it the total occupational specialty. The material will be deve-

loped in such a way that it will easily be adaptable to special needs students with low readability and will be developed to be utilized as individualized instruction by the various teachers

VTP-2977

Effectiveness of a Gaming Strategy to Enhance Vocational Maturity and Commitment.

Principal Investigator: Weis, Susan F

Recipient Institution: Pennsylvania State University. Division of Occupational and Vocational Studies, 212 Rackley Building, University Park, Pennsylvania 16802

Start-End Dates: Start Date 1 Oct 77, End Date 30 Jun 78

Supporting Agency: Pennsylvania State Depa: ment of Education, Harrisburg, Pennsylvania 17126

Contract and/or Control No.: 83-8001

Summary of Project: The major purpose of the project is to investigate the effectiveness of a gaming strategy on the vocational maturity and commitment of learners at three educational levels. 8th grade (prevocational), 10th grade (vocational) and 12th grade (vocational) as a compliment y educational effort to a newly initiated curriculum in food service education. Procedures will include: (1) developing and reproducing a slide-tape orientation for the use of a Restaurant City game, (2) securing cooperation of six schools that would be willing to assist as experimental or control sites for this project. (3) presenting the game to students in cooperating schools and assess the effects of such exposure through a precessive positiest design using Crites. Career Maturity. Inventory and the Vocational Commitment Index and (4) disseminating the game and results of the project to the vocational education community.

VTP-2978

VEDS Feasibility Study.

Principal Investigator: Ruoss L 1 loyd

Recipient Institution: Lancaster-Lebanon Intermediate Unit Number 13 1110 Enterprise Road, East Petersonburg Pennsylvania 1°520

Start-End Dates: Start Date 1 Oct 77, End Date 30 Jun 78

Supporting Agency: Pennsylvania State Department of Fiducation Marrisburg Pennsylvania 17126

Contract and or Control No: 19-7807

Summary of Project: The purpose of the project is to conduct a study to assist the National Center for Educational Statistics in determining the feasibility of a proposed national information system. The Pennsylvania study will test the following and employer evaluation of vocational graduates components as required by the Act and despeed by the Center An exhaustive procedural format will be followed in compliance with the requirements is specified in ReP #77 101 as modified by mutual consent of the Center and the Pennsylvania Department of Education.

VTP-2979

Vocational-Technical Course in Petroleum Production (Continuation of 20-6802).

Principal Investigator: Crumrine, Myron A

Recipient Institution: Bradford Area School District 50 Congress Street Bradford, Peansylvania 16701

Start-End Dates: Start Date 1 Oct " End Dat, 30 Jun "8

Supporting Agency: Pennslys in a State Department of Education Harrisburg, Pennsylvania 17126

Contract and or ontrol No.: 20 7828

Summary of Project: The purpose of the project is to (1) train high school students for employment in the petroleum industry or related areas thus making an opportunity for employment which will co-corage students to remain in the community. (2) identify now strategies for communication and cooperation between the public schools, the University of Pittsburgh's petroleum technology course, and local industry. (3) provide live work experione's on the training site which will encompass all areas of the petroleum prox action occupation, and (4) provide a student with entry level skills encompassing the many and varied activities which a skilled oil field worker cocumters. This course is designed to train workers for the various skills which must be possessed by the modern oil field worker. The course is being conducted on a working oil lease rather than a traditional shop setting. One of the first areas of training will be the development of an attitude of responsibility towa 4 the job. During routine activities, the problem which occur in the oil production will develop therefore, the ability to recognize that some thing is wrong, diagnose the problem, and correct it. If he included in the students' training

VTP-2980

Community College Vocational Instructor Education and Training Profile

Principal Investigator: Zeiler*, Louis E

Recipient Institution, Clark College, 1800 Last McLoughlin Boulevard, Vancouver, Washington 98663

Start-End Dates: Start Date 1 Jul 77, End Dite 30 Jun 78

Supporting Agency: Washington State Commission for Vocational Education, Research Coordinating Unit, Building 17, Aircustrial Park, Olympia, Washington 98504

Summary of Project: The purpose of the process is to provide an information base related to preservice and inservice ining for vocational instructors necessary to develop future training curriculum of or vocational staff in Washington Procedures will include (1) analyzing voluntary responses received from vocationally certified administrators and instructional staff in the Washington State Vocational Community College system, (2) obtaining names and addresses of persons to be surveyed from the State Board for Community Colleges, (3) coordinating research efforts with a representative of the State Board of Community Colleges and the assistant director of vocational education, (4) using followup mailings and telephone calls to increase response rate, and (5) analyzing the data by computer at Clark College or another state agency

VTP-2981

Computer Assisted Reinforcement Training (CART)

Principal Investigator: Wilson, John W.

Recipient Institution: Clover Park Vocational Technical Institute, 4500 Steilacoom Boulevard, S.W., Lakewood Center, Washington 98499

Start-End Dates. Start Date 1 Mar 77, End Date 30 Aug 78

Supporting Agency: Washington State Commission for Vocational Education. Research Coordinating Unit, Building 17, Airdustrial Park, Olympia, Washington 98504

Summary of Project: The purpose of the project is to demonstrate the effectiveness of computer assisted reinforcement training of handicapped and disadvantaged students by increasing their basic skills achievement score (as measured. standardized achievement tests) from the base established in a pretest to an increase in a postiest by August 31, 1978. Specific objectives are to (1) develop and test at least three basic skills computer programs in five training areas. (2) determine most economical means of vocational instructor author/computer program desclopment. (3) determine most effective mix of 'intelligent terminal' programming to larger computer mainframe, and (4) decrease dropout rate of handicapped disadvantaged students. Procedures will include (1) using a staff consisting of programmer(s) and vocational instructor(s) to work with a vocational counselor of the handicapped and disadvantaged to develop trial computer programs. (2) using the team to develop a program unique to the socational program and designed to strengthen the basic skills ability of the handicapped and disadvanlaged student. (3) developing and trying out a trial program. (4) administering the Renton skills check to students in the experimental program and evaluating results. (5) orienting students to the use of the terminals, (6) developing or commercially obtaining additional computer programs niceting project objectives. (7) administering the skills che k at the end of the project, consparing the dropo it rates, and completing the evaluation, and (8) directing preparing the final report

VTP-2982

Development of a Strategy to Overcome Sex-Role Eurriers in Vocational Education Programs.

Principal Investigator: Andrews, Mildred

Recipient Institution: Shereline Community College, 16101 Greenwood Asenue, North, Seartle, Washington 98133.

Start-End Dates: Start Date 11 Jul 77, End Date 30 Nov 77

Supporting Agency: Washington State Commission for Vocational I ducation Research Coordinating Unit, Building 17, Airdustrial Park (22) mp. 3. Washington 98504

Summary of Project: The purpose of the project is to assess sex role barners a cetting sociational education programs at the college and to delive strate gies for overcoming them. In addition, a plan to increase feinale entry into nontraditional sociational areas will be researched organized, and implemented. Procedures will include (1) interviewing college sociational education instructors in various fields. (2) interviewing females students and graduates of nontraditional sociational programs and assessing their experiences in challenging sex role barriers. (3) into the findings of the survey into two current course offerings entitled. Women in the Professions and Directions for Women. (4) maintaining contact using project duce for to serve a secontact and resource person and (5) dung a final evaluation of the project of the project.

VTP-2983

Education and Work Mins Conferences. Principal Int. — gator Schmidt Sev.

Recipient Institution: Washington State Vocational Guidance Association, 3403 North 21st Street, Taconia, Washington 98406

Start-End Dates: Start Date 1 Mar 77, End Date 1 Jun 78

Supporting Agency: Washington State Commission for Vocational Education, Research Coordinating Unit, Building 17, Airdustrial Park, Olympia, Washington 98504

Summary of Project: The project's purpose is to develop procedures for implementing mini-education work conferences at the local level as a means of upgrading vocational guidance personnel services by increasing their understanding and awareness of local labor market conditions. These procedures will be field tested by sponsoring and supervising five such mini-conferences at selected sites in the state of Washington Procedures will include (1) selection of five regional sites. (2) development of guidelines and procedures for developing and presenting workshops. (3) selecting workshop coord nators at the local level (4) training workshop coordinators. (5) planning and presenting the workshops, and [64 conducting internal and external workshop evaluation.

VTP-2984

Perspectives of Local Advisory Committees of Vocational Education.

Principal Investigator: Syhlman, Bill

Recipient Institution: Eastern Washington State College, Chency Washington 99004

Start-End Dates: Start Date 1 Sep 77, End Date 31 Aug 78

Supporting Agency: Washington State Commission for Vocational Education, Researc': Coordinating Unit, Building 17 Airdustrial Park, Olympia, Washington 98504

Summary of Project: The purpose of the project is to determine the perspectives of local advisory committee members towards vocational education Specific objectives are to (1) determine how advisory committee members are utilized in local situations. (2) identify ways and means to more effectively use advisory committees, and (3) provide data to teacher education agencies and local vocational education administrators so they can design and implement more effective involvement of advisory committees. Procedures will include (1) conducting an ERIC search and doing related research to determine previous efforts regarding the perspectives of advisory committees. (2) designing a research instrument which would be field tested with a select group of advisory committee persons. (3) sending the questionnaire to a random sample selected from state sources. (4) analyzing and interpreting data, and (5) disseminating the results.

VTP-2985

Pilot Preparatory Program for Hearing Impaired Students.

Principal Investigator: Schroeder, Jim

Recipient Institution: Spokane Falls Community College, 3410 Fort George Wright Drive, West, Spokane, Washington 99204

Start-Erd Dates: Start Date 1 Jul 77, Enc. Date 31 Aug 78

Supporting Agency-Washington State Commission for Vocational Education.
Research Coordinating Unit. Building 17, Airdustrial Park, Olympia, Washington 98504

Summary of Project: The purpose of the project is to provide hearing impaired students with an orientation to the college and to give faculty and staff members an orientation to these students. Procedures will include (1) studying heart ation programs of other institutions, (2) determining which aspects of these programs should be included in the design of the great project. (3) selecting invervice training material, (4) guiding protitive hearing impaired students through the orientation program, (5) hold a mini workshops and conferences for faculty, staff, and administration to acquaint them with specific techniques which can be used in teaching hearing unpaired students, (6) using an interpreter to work on selection of orientation materials, (7) testing students for evaluation and guidance purposes, and (8) evaluating the program and designing a regular orientation program for the hearing impaired.

VTP-2986

Self-Paced Instructional Material for Industrial Electricity.

Principal Investigator: Cox. Richard A

Recipient Institution: Spokane Community College, 2-90 Greene Street, North, Spokane, Washington 99207

Start-End Dates: Start Date 15 Jun 77, End Date 31 May 78

Supporting Agency: Washington State Commission for Vocational Education Research Coordinating Unit, Building 17, Airdustrial Park, Olympia, Washington 98504

Summary of Project: The purpose of the project is to develop self-paced materials manuals for students in each of the three quarters of the indus hal electricity program in order to decrease the dropout/failure rate from the current 40 percent to less than five percent by June 1, 1978. Procedures will include: (1) writing and preparing the manuals. (2) doing a first quarter field test and attendant evaluation and rewriting. (3) doing a second field test and necessary rewriting, and (4) completing the final test an 1 project evaluation.

VTP-2987

Women and Work Exposition.

Principal Investigator: Oxreider, Ann

Recipient Institution: Scattle Central Community College, Human Development Center, 1705 Bloadway, Scattle, Washington 98122

Start-End Dates: Start Date 1 Sep 77, End Date 30 Apr 78

Supporting Agency: Washington State Commission for Vocational Education, Research Coordinating Unit, Building 17, Airdustrial Park, Olympia, Washington 98504

Summary of Project: The purpose of the project is to increase by 10 the number of women entering SCCC trades programs by designing and field testing a model for presenting Women and Work Expositions which focus on trade fields for women. Specific objectives will be to (1) meet special needs of low income female students and, or community members by providing them with accurate career information on fields which will allow them upward mubility and a secure job future. (2) help career counselors to update career resource information for students, and (3) produce a model for presenting women and work expositions. Procedures will include: (1) designing a Women and Work Exposition. (2) isolating each phase of the design proc ess in order to record specific details concerning financing and budgeting, creating program format and evaluation, seeking co-sponsors, choosing a site, etc., in order to produce a replicable model of the entire process, (3) publicizing and prese ting the exposition, (4) evaluating the individual component of the expos .on, and (5) ascessing the changes in women's enrollment in the SCCC trades program
