ABSTRACT

As part of a continuing series of studies conducted at Delaware County Community College since 1974, this Information Exchange Procedures study presents direct and full costs per full-time equivalent (FTE) enrollment in broad instructional areas, unit costs per credit hour by discipline and by program, program full costs per student credit hour, as well as comparisons of direct costs for instructional, administrative, and support areas for 1974/75-1976/77. Study results indicated occupational programs had significantly higher direct and full costs per FTE; disciplines with the lowest average section size, such as French, Spanish, and respiratory therapy generally had higher direct costs per credit hour; and more accurate allocation of full costs produced significantly lower full costs per credit hour for fire science technology, liberal arts, and engineering and higher costs for clerical studies, nursing, and respiratory therapy. Significant increases in direct costs for occupational and general programs could have resulted from allocating student wages and capital costs, itemized separately in 1974/75 and 1975/76, to other categories in 1976/77. Total regular instruction direct cost per credit hour increased from 18.51 in 1975/76 to 22.42 in 1976/77. (Author/TR)

## INTRODUCTION

The Information Exchange Procedures (IEP) are a set of cost-study techniques which enable a college to examine its expenditures for instructional and support services, disciplines, and curriculums in an objective manner which provides comparable information from one year to the next.

The cost information developed through IEP is intended to be used as a "management tool" for monitoring and improving efficient use of resources.

Delaware County Community College (DCCC) has conducted an IEP study for the past three years. Each year we have improved the methodology used to allocate full costs. This year's IEP study was able to allocate full costs on more of an actual usage basis.

DCCC's IEP study is an on-going effort. Research and Budget Office personnel will continue to refine the cost study process and will work with College managerial personnel to analyze and use the results of the study.

The following pages present DCCC's IEP data for the 1976-77 fiscal year as well as comparisons of the past three years' IEP data.

## IEP TERMINOLOGY

Primary Cost Centers - areas that provide services directly related to the primary mission of the College.

Support Cost Centers - areas that provide supporting services of primary cost centers. (e.g., Library, Business Office, Admissions/Records, etc.).

Direct Cost - Cost directly related to providing services through departments (e.g., salaries, supplies, fringe benefits, duplicating, postage, and telephone costs).

Indirect Cost - the direct cost of operating the support cost centers. In cost accounting, these costs are allocated or prorated across primary cost centers based upon actual usage parameters (e.g., square footage assigned to biology labs, number of purchase orders processed for drama). This year's study prorated the following actual usage parameters:

Capital \$	# Telephones
# Purchase Orders	# Full-time Employees
# Vouchers	# part-time Employees
Square Footage	Coadjutant Salaries
Postage	# Copies
Contracted Printing	Average Class Size

Full Cost - the sum of direct cost and allocated indirect cost of support services.

Unit Cost - a computed figure showing the average cost to produce a credit hour taught.

Funding Sources - an IEP cost study includes all funds expended by the College including federal and state grants and independent operations.

## HIGHLIGHTS

1. Direct and full cost per FTE support the hypothesis that occupational programs have a significantly higher cost than any other College programs (page 3).
2. This year's IEP includes separate direct and full cost figures for Continuing Education, Avocational, Volunteer, and the Police and Security Academies (page 3).
3. In general, those disciplines with the lowest average section size have the higher direct costs per credit hour (page 4).
4. Some disciplines which have a relatively low direct cost per credit hour have a high full cost per credit hour due to dedicated space, number of items purchased, etc. (e.g., drama, biology) (page 4).
5. The more accurate allocation of full cost for 1976-77 has produced some significantly lower full costs per credit hour for Fire Science Technology, Liberal Arts, and Engineering and a significantly higher full cost per credit hour for Clerical Studies, Nursing, and Respiratory Therapy (page 7).
6. The 1976-77 direct expenditures for Academic Administration and Executive Management are significantly higher due to inclusion of AIDP funded activities (pages 9, 10).
7. The direct expenditure for Public Relations is much lower for 1976-77 since the costs for Contracted Printing were allocated back to the actual users.
8. For 1976-77 Student Wages and Capital Costs were allocated back to other activity centers as part of direct cost. This may account for the significant increase in the direct cost for the occupational and general programs (pages 9, 10).
9. The total regular instruction direct cost per credit hour has increased from 18.51 in 1975-76 to 22.42 in 1976-77.
