ABSTRACT

This is a book to help women who are thinking about entering or returning to college after spending several years as housewives and/or volunteers in their communities. The descriptive materials included will tell in general terms how the process of accrediting homemaking and volunteer experience might work: the skills that might be learned from different kinds of experiences, the information that colleges will look for in awarding credit, the kinds of credit that might be awarded, the costs involved, and some of the problems that might be encountered. The workbook section is a guide for evaluating one's own experiences and trying to obtain credit for them. Appended are: "I Can" competency lists; Catalyst National Network of local resource centers; directory of brokering programs; and a list of colleges that are members of the Council for the Advancement of Experiential Learning. Educational Testing Service
Princeton, New Jersey

1977

This material was prepared under grants from the Fund for the Improvement of Postsecondary Education. The "I Can" lists for volunteers have been expanded and adapted from materials developed with the Task Force on Volunteer Accreditation of the Council of National Organizations for Adult Education.

Acknowledgements

Our thanks go first to all of the women, both homemakers and volunteers, whose competencies inspired us to develop this workbook. We especially thank the many women and college representatives who wrote to us, talked with us, and attended our conferences as we planned and tried out these materials.

Secondly, we wish to thank the Fund for the Improvement of Postsecondary Education, not only for their financial support of this project, but also for their belief in the importance of providing a means to help colleges evaluate and award credit for volunteer work and homemaking experience. Special thanks go to Virginia Smith, Alison Bernstein, and Carol Stoel for their insights and encouragement.

We also wish to thank the members of the Council of National Organizations Task Force on Accreditation, who worked with us in developing some of the "I Can" lists for volunteers.

Finally, we wish to thank the individuals at Educational Testing Service who have assisted us in this work. Particular thanks go to Irene Smith who typed and re-typed the various working drafts as well as this workbook.

HOW TO GET COLLEGE CREDIT FOR WHAT YOU HAVE LEARNED
AS A HOMEMAKER AND VOLUNTEER

Ruth B. Ekstrom, Abigail M. Harris, and Marlaine E. Lockheed

INTRODUCTION

This is a book to help women who are thinking about entering or returning to college after spending several years as housewives, and/or as volunteers in their communities. Many women have learned a great deal from their experiences in the home and in voluntary organizations; they would like to be able to make others aware of what they have learned and of the new skills and competencies they have acquired. If you are one of these women, this book may help you find ways to get college credit for your experience.

Who gets college credit for their domestic and volunteer experience?

Sally Livingstone did. She organized Call for Action at radio station KABL in San Francisco. In this work, Sally directed 30 volunteers who found out about the community resources in the San Francisco Bay area and put together a reference book describing these resources. She also worked in cooperation with the radio station and developed public relations programs in other media (such as newspapers and television). The Credit by Examination for External Learning (CEEL) program at California State University in San Francisco made it possible for Sally to receive 10 hours of college credit for this volunteer work experience.

Other women might receive college credit for organizing a tenants' strike; for work as a volunteer in an art museum; for running a cooperative play group for children; for telephone counseling of people who call a crisis intervention center; for skills learned in quantity food preparation

for church suppers; for experience as a school board member; for horticultural skills acquired from a gardening club; or for work with women's rights or civil rights groups.

Reasons for Crediting Prior Learning. If you have always thought of college credits as something you get for spending a certain number of hours in a classroom, you may wonder how you can possibly receive credit for the things you have done and learned outside of any college. Many colleges are beginning to recognize that what is important in education is what a student has actually studied and learned and not the number of hours of teaching that a student has received or the amount of time she has spent in a classroom.

You can learn in many different ways and places. Some of your learning will come from school course work; some will come from the reading you have done; some will come from work experience; some will come from talking with others; and some will come from other kinds of experiences. Of course, it is possible that you could have done all these things without learning anything. However, most people would have learned a good deal from each of these activities. What is important if you wish to obtain college credit for your experiences is to be able to show that you have learned something from what you have done. If you have new skills and new ideas and insights, you can show that you have learned from your experience.

Experiential learning is being recognized in many different ways. A group of colleges interested in giving credit for learning by experience has been formed. This group has a program called the Council for the Advancement of Experiential Learning (CAEL), which will help its members and other colleges develop ways to evaluate what people have learned from different kinds of experience. Several states (e.g., California, Connecticut, Florida, Illinois,

New Jersey and New York) already have statewide "external degree programs" which give credit for off-campus learning. Similar programs are being planned in other states. Other groups are also trying to assist colleges and educational agencies in developing new and different ways to look at various kinds of learning and how they might be evaluated and assessed.

The Educational Testing Service/Fund for the Improvement of Postsecondary Education Project. One project which focused on ways to help people see how life experience can be evaluated for college credit has been conducted by Educational Testing Service under a grant from the Fund for the Improvement of Postsecondary Education. This project is concerned with how women's homemaking and volunteer experiences can be assessed. The book you are reading is one outcome of this project. There are also two other companion workbooks: Volunteer Work and College Credit (for volunteer groups and administrators of volunteers) and Evaluating Women's Life Experience Competencies for College Credit (for colleges).

How to Use This Book. This book has two main parts: Section I, Descriptive Information, and Section II, Workbook.

The descriptive materials will tell you, in general terms, how the process of accrediting your homemaking and volunteer experience might work. There will be a chapter describing different kinds of experiences and the skills that you might learn from them. Another chapter will tell you about the kinds of information that colleges may ask you for if you are seeking credit for your homemaking and volunteer experience. The different ways in which colleges may use this information will be described as well as the different kinds of credit that might be awarded. We will tell you what costs may be involved in trying to get these credits and also what the advantages are for you in seeking

this credit. We will also try to warn you about some of the problems and difficulties you may encounter in trying to obtain such credit. You should read all of the descriptive materials before you try to use the workbook.

The workbook is a guide for you to use in evaluating your own experiences and in trying to obtain college credit for them. The workbook will have questions for you to answer. No two people will use the workbook in exactly the same way. The workbook will also have places for you to keep a record about your homemaking and volunteer experience and your progress in obtaining college credit for these experiences.

You are the only person who can make the final decision about whether or not to seek college credit for your experiences--the power is in your hands. If you start on a program to get this kind of credit, don't hesitate to negotiate with one or more colleges to get what you want. You have the freedom to decide not to do what a particular college requires and to contact another college instead. If, after you get into a program involving credits for experiential learning, you find that the process seems too difficult, you can decide to take traditional courses instead or even to opt out of college entirely. Don't be afraid to try an experiential learning program like the kinds described in this workbook--you have much to gain and relatively little to lose. A college degree or specific college courses can open up many more career and life options for you.

2

SECTION I

DESCRIPTIVE INFORMATION

Chapter 1

WHAT KINDS OF SKILLS AND LEARNING DO WOMEN ACQUIRE
AS HOMEMAKERS AND VOLUNTEERS?

The first step in seeking college credit for your homemaking and volunteer experiences is to review what you have done. Eventually, you will need a written record of your experiences and what you feel you have learned from each of them. In this chapter we will describe some homemaking and volunteer activities and then discuss the kinds of skills and competencies which may be learned from these experiences. Finally, we will describe how competencies can be related to college courses and credits.

Some Examples of Homemaking Activities. What are some of the things which women do at home in caring for their house and family? Table 1 on the next page includes some of these activities.

Some Examples of Volunteer Activities. Almost any kind of job that is done for pay is done by someone as a volunteer. Don't think of volunteers in the old-fashioned way as "Lady Bountiful" bringing food or cast off clothing to a needy family once or twice a year. Today volunteers do many different things. If you are an elected but unpaid official in your community, such as a member of the school board, the library board, city council, etc., you are a volunteer. If you are an unpaid officer in your union or business group, you are a volunteer. If you have organized or worked in a welfare rights organization or tenants' rights group, you are a volunteer. If you have organized and run a Girl Scout cookie sale, you are a volunteer. If you have helped to register voters or to lobby for new or changed laws, you are a volunteer.

Table 1

Some Typical Homemaking Activities

- Budgeting, family financial planning and management.
- Child care--for infants, toddlers, other preschoolers, elementary school age, teenagers, etc. Includes physical care; planning play activities; teaching games, songs and skills; guiding moral development, etc.
- Communicating with others--includes writing letters, making phone calls, placing orders for goods and services, etc.
- Gardening and plant care--includes care of lawn, flower and vegetable gardens, houseplants.
- Home maintenance--includes diagnosing and correcting housing problems such as interior and exterior painting, roofing, wiring, plumbing, building bookshelves or cupboards, etc.
- Home nursing for children and adults--includes care during normal childhood diseases and also care of handicapped children and adults, senile adults, etc.
- Identifying and obtaining needed community services--finding out about Social Security, welfare, adoption, drug and alcoholism centers, etc., and how to get help from them.
- Interior decorating--planning for repainting, new slipcovers, curtains, or upholstery, new rugs or furniture, rearranging furniture, etc.
- Laundry and housecleaning.
- Meal planning and preparation.
- Pet care.
- Sewing, needlework--includes making clothing, slipcovers, curtains, etc., knitting, crocheting, needlepoint, etc.

The list in Table 2 on the next two pages is the index used by the Clearinghouse of the National Center for Voluntary Action to describe different types of volunteer programs. Not every kind of volunteer activity is listed here but this list should help you to start thinking about your own volunteer work experience. Don't be scared off by the large variety of volunteer activities. If you can demonstrate skills in even one of the areas, you may be able to obtain college credit.

Later on, we will try to describe volunteer work more completely. To do this, we will talk about the difference between the type of volunteer organization where the work was done and the kind of work activity. If, for example, your volunteer activities include doing work involving teaching people about the environment for both the Girl Scouts and the Sierra Club and also writing articles for the local newspaper about one of the Girl Scout troop's cookie sale, you would say that teaching about the environment is the same type of activity, even though you are doing it for two different volunteer groups. Writing about the cookie sale and teaching about the environment are different activities, even though you are doing them for the same organization (the Girl Scouts).

In the following section, we will try to help you think about what you have done in terms of where you did it, what you did, and the skills you learned.

Thinking about Skills and Competencies. As we mentioned, you will want to think about not only what you have done but, more importantly, what you have learned from doing these things.

Table 2

Clearinghouse Index of Volunteer Programs

Administration and Organization

Operating volunteer bureaus; mounting recruitment drives, award programs; volunteer orientation.

Civic Affairs

Stimulating community interest in government; assisting in voter registration; engaging in lobbying; proposing legislation.

Communications and Public Relations

Writing copy, newsletters, educational material, bulletins, radio scripts for programs; manning speakers bureaus.

Community Services

Serving on advisory bodies to government; organizing self-help groups; forming coalitions for planning and action; manning information centers; participating in broad community improvement programs.

Consumer Services

Educating people on how to get more for their money, how to budget, what to buy, pitfalls of credit; setting up co-ops and buying groups; answering consumer complaints and investigating fraud.

Cultural Activities

Teaching art, bringing theatre and music to schools and ghettos; acting as guides and lecturers in museums.

Education

Improving the educational level of young and old--serving as teacher aides, tutoring children and illiterates, teaching English as a second language, contributing to school talent banks, getting books to kids, bolstering library services; keeping children in school or returning drop-outs, providing scholarships.

Employment and Jobs

Counseling young people on careers; mounting career fairs; improving employment possibilities through job orientation; providing skill training, placement services.

Entrepreneurship

Assisting minority people in setting up their own businesses; providing consulting and advisory services, management training and financial assistance.

Family-, Youth-, and Children-Oriented Services

Serving as big brothers and sisters, starting and operating day care services; improving homemaking skills of the inexperienced; providing foster homes; brightening and enriching residential facilities like orphanages; adopting and acting as a problem-solver for underprivileged families.

Give-Away Programs

Providing emergency food, clothes, and household equipment to the needy and the disaster-stricken; brightening holidays with gifts; operating gift shops.

Health and Mental Health

Educating the young and old on prevention of disease, drug addiction, alcoholism; filling numerous roles in hospitals and clinics; becoming a member of a therapeutic team to rehabilitate the mentally ill, drug addicted; helping with reintegrating into the community; bringing medical services to the poor.

Housing

Improving existing structures in rundown areas, getting involved in problems of relocation, investigating offenses against fair housing laws, facilitating tenant-landlord relationships, advising new home owners on property management, mortgages, insurance, budgets.

Interracial/Interethnic/Intergroup Relations

Establishing programs to reach inner-city people; participating in efforts for integration; bridging the generation gap.

Legal Rights, Law Enforcement and Crime Prevention

Serving as a probation aide; providing law education for lay groups; improving police-community relations; befriending prisoners while in jail and afterwards; taking part in volunteer programs in juvenile institutions.

Nutrition

Teaching good eating habits, better food preparation; promoting school lunch programs; helping in school cafeterias; aiding in food distribution; delivering meals to the old, the ill, the handicapped.

Physical Environment, Except Housing

Fighting the further spread of pollution through research, data gathering and code enforcement; restoring land, waters; improving the urban scene; creating playgrounds and parks; cleaning up littered highways.

Psychological/Social Support Services

Providing companionship to the shut-in, the aged; becoming a foster parent; sharing housekeeping skills; giving telephone guidance and reassurance.

Recreation

Providing play activities and play space; coaching in sports; teaching arts and crafts; giving parties for children, senior citizens; making vacations possible for the disadvantaged, the retarded, the handicapped; promoting community swimming pools; serving in drop-in centers.

Transportation

Chauffeuring; driver education; safety education; programs including a driver training component.

In some colleges, you will be asked to show how the things you have learned are related to the courses which the college offers. You may be able to present materials showing what you have learned or to take written or oral examinations based on your knowledge that will give you credit for some courses. Each college has its own way of doing things so you must find out for yourself what any college you would like to attend will require of you. Later in this workbook, we will describe some of the problems you may find and talk about ways to deal with them.

You will find that a few colleges may talk about the things you have learned as "competencies." By this, these colleges mean a set of abilities or qualities which, if the college has a "competency-based curriculum," are required as part of a program or of all graduates. Most colleges with a competency-based program have some way of testing or evaluating students to see if they have achieved the particular skill or ability. For example, if one competency is "The student is competent in communication skills" (this is one of the competencies required at Mars Hill College in North Carolina), then you might be able to prove that you have this skill by presenting examples of your writing or presenting a tape recording of talks you have given. Instead of asking for samples of your writing or talks, the college might ask you to write a composition for them or to prepare and give a talk to a group of faculty and students.

In the workbook you will find an example of the kinds of competencies or skills that are learned in various kinds of volunteer and homemaking work. This sample of competencies for volunteers and homemakers is called the

"I Can" lists. No one in a given activity learns all of the things on any of these lists, but the "I Cans" should help you begin thinking about what you have learned and help you make your own list of competencies.

One of the main problems will be for you to understand for yourself just what skills and competencies you have learned and how to describe them to others. Colleges often have a special language of their own that they use in talking about courses and requirements. In the workbook, we will try to help you understand that language and also tell you about where you can get help in describing your knowledge to others.

Relevance of Competencies to Postsecondary Education. As we mentioned earlier, a few colleges have a competency-based program but many other colleges have a program based on taking certain courses. Colleges which stress courses and which do not award credit for learning from experience often argue that although experience may teach an individual how to perform job-related skills, experience does not give people an understanding of the theories and knowledge which determine how and when these skills are applied. They feel that understanding the theories behind what you do is better learned in the classroom. You may face the problem of showing such colleges that you understand the theories and reasons behind what you have done. This understanding may be of major importance to many colleges.

Most people grow in knowledge from doing things as well as from taking courses. After doing some things more than once you see alternative ways and reasons for doing something one way or another. Slowly you develop a theory

or understanding of why and what to do. College courses and programs often put the learning of a theory first and then help you to apply the understanding of that theory in the things you do in your life and your career.

Some colleges have a group of required courses which all of their students must take. In liberal arts programs, these courses may be the "general education" part of a college curriculum. The idea behind such requirements is a belief that there are some basic things which all college educated people should know and/or be able to do. Many colleges, for example, feel that being able to write well and communicate with others is an important skill for all of their students. If you have had volunteer experience writing newsletters, newspapers, radio or television articles or in developing program descriptions or training materials about your volunteer organization, you may be able to demonstrate to the college that you already have this kind of skill.

In some fields of study in college there are certain other requirements for all students. Often these requirements include an introductory course to give everyone the same basic overview and understanding of the field before more specialized courses are taken. You may be able to obtain credit for such courses on the basis of your experience. For example, if you have been active in the League of Women Voters or in working for a political party or candidate you might be able to obtain credit for an introductory course on the American political system.

Still another kind of course which some college programs require is a "field experience," "internship," or "practicum" course. These courses mean that you go outside of the classroom and try your skills in a real work experience. For

example, social service and counseling programs frequently require that you spend a semester working in a community agency. If you have already had this experience as a volunteer, you may not be required to take these practicum courses. Many home economics programs require their students to spend some time living in a "home management" house on the college campus so they can have the experience of running a home. If you are a homemaker now, you may be able to obtain credit for this kind of experience.

What kinds of skills and learning do women acquire as homemakers and volunteers? The list of activities is long and varied. Each woman has her own unique set of skills and experiences. The "I Can" lists in the workbook will help you review your own special competencies.

Chapter 2

WHAT KIND OF INFORMATION WILL THE COLLEGE WANT?

If you are thinking about getting college credit for your homemaking and/or volunteer experience, you must expect that the college will want to know a lot about what you have done. They will probably ask someone to work with you in getting a description of your experience. Most colleges will want to have one or more interviews or meetings with you to talk about your experience. After these meetings, they will probably ask you to write a description of what you have done.

Before you write out a detailed description or even decide definitely that you want to do the work involved in obtaining credit for your experience, you should first meet with someone from the college you plan to attend. You should find out exactly what kind of information the college wants and how the college wants you to prepare this information. Do not spend a lot of time writing a detailed record of your experience before you find out if the college you are interested in attending will want this kind of record.

Identifying Learning Experiences. The first step in preparing a description will be to make a list of your own volunteer and homemaking experiences. The easiest way to do this is to work backward year by year. Let's see how one woman's list looks:

Jane Jones - Now:

Member of the City Parks Commission; homemaker-mother of two teenage children.

- Last year:

Lobbied for increased parks appropriation before mayor's council.

- The three years before that:

Wrote articles for local newspaper on need for better parks for Neighborhood Parks Association.

- Five years ago:

Organized Neighborhood Parks Association and served as first president.

Jane has been involved in several different kinds of volunteer work. When her children were small, she organized a neighborhood play group with four other mothers. Each mother took care of all of the children one day a week and organized games, neighborhood trips, etc. for the children.

When Jane took the play group to the neighborhood park, she noticed that the park was littered and dirty, that many swings and other play equipment were broken so the children could not use them. She talked with the families of the children in the play group and other families in the neighborhood about the bad condition of the park. When they were unable to get the city to do anything about the park, Jane organized the neighborhood for a park clean-up campaign. This became a yearly activity and eventually a Neighborhood Parks Association was formed. As president of the Neighborhood Parks Association, Jane wrote a letter to one of the city newspapers about the bad condition of this and many other neighborhood parks in the city. As a result of her letter, the newspaper editor asked her if she would like to write a series of articles about the need for better parks. Last year Jane made an appointment with the mayor and several city officials to find out, for her newspaper articles, why the parks were in such bad condition. When they told her that the city did not have enough money for the parks, she began to attend the open meetings of the mayor's council and to talk with the council members about the need for more money for neighborhood parks. As a result of Jane's efforts, the money for the parks was increased. This year the mayor asked her to be one of the five members of the City Parks Commission.

When you finish your list, go back through it and group your activities into related areas; this will help you see the patterns in your experience.

You will need to separate your activities according to the kind of work activity. Remember that we discussed earlier the difference between the type of organization where the work was done and the kind of work activity. Among the kinds of organizations where volunteer work is done are: health and hospital groups; educational groups; justice, legal rights, and law enforcement groups; religious groups; political groups; and professional and union groups.

Among the kinds of volunteer work done are: administration; public relations and fund raising; direct service to other people (such as serving as a tutor; a counselor, or a youth group leader); and indirect service to others (such as doing research about community needs or lobbying for new laws).

This is a good time for you to read through the "I Can" lists in Appendix A. These lists will give you an idea of some of the kinds

of competencies which other women have acquired from their volunteer work and homemaking experience. Do not think that you should be able to do all or most of the things listed in any area even if you have had a lot of volunteer and homemaking experience.

After you have read the "I Can" lists, you are ready to develop your own list. You may want to use the "I Can" lists to help you or you may prefer to write your "I Cans" in your own words. Sally, a woman who organized a play group for her own and other neighborhood children, made the following list:

As the organizer and operator of a play group, I can:

- Get other parents to work cooperatively with me;
- Set up and keep a work schedule, including coping with emergency changes;
- Plan activities appropriate for preschool children;
- Teach games to preschool children;
- Teach arts and crafts to preschool children;
- Tell stories to preschool children;
- Teach children about their neighborhood and community;
- Plan and prepare nutritious meals suitable for preschool children;
- Give first-aid for simple emergencies;
- Recognize the symptoms of common childhood diseases.

If, for example, you have worked to raise money for a church, school, or health-care organization, you would turn to the "I Can" list for a Fund Raiser to see how many of these skills are things which you have learned or can do. Then you would write down a list of the skills and knowledge which you have as the result of working as a fund raiser, adding to the "I Can" lists as needed.

There are two basic ways of organizing descriptions of your volunteer and homemaking experience. If you have worked almost exclusively with one volunteer agency or program but have had numerous jobs within that program, you will probably want to concentrate on the activities of the program and the skills you acquired in these activities. Similarly, if most of your homemaking

activities have involved child care, you will want to concentrate on this area. If, on the other hand, you have worked in a number of different volunteer programs or agencies, or have done a great variety of homemaking activities, you will probably want to look for the common aspects which you can identify across these experiences. For example, if you keep your family budget and financial records, have been a bookkeeper for the local thrift shop, the treasurer of the PTA, and district chairperson for the Girl Scout cookie sale, you have gained a variety of skills in financial management.

Documenting Your Experiences. After you have read through the "I Can" lists and have developed your own "I Can" list of competencies, you will probably be asked by the college to demonstrate that you can do and have learned the things you have listed. This is often referred to as "documentation" of your experience. Documentation means presenting evidence to support a statement. If you say that you know or can do certain things, colleges will want to have some evidence or indication of what you have learned. Some schools may call this developing a "portfolio."

There are three basic ways in which you can demonstrate your competencies: (1) by taking examinations; (2) by presenting evidence from others; and (3) by presenting your own evidence about your experience. Even when colleges do not typically award credit for prior or experiential learning, they may be willing to do so if you take an examination.

Examinations. There are two different kinds of examinations which may be involved in assessing your competencies and prior experience: (1) testing programs which are designed for students in many different colleges; and (2) tests designed by a particular college, itself, for its own students.

There are three national standardized testing programs which have been designed to help colleges assess what people have learned from various kinds of experience. These are the College-Level Examination Program (CLEP), the American College Testing Proficiency Examination Program (ACT-PEP), and the New York State Regents External Degree Examination (REDE).

The College-Level Examination Program is given at test centers all over the United States and in some foreign cities. There are two types of examinations: (1) the General Examination, and (2) the Subject Examination. The General Examinations cover five areas: English Composition, Humanities, Mathematics, Natural Sciences, and Social Sciences-History. The material in these examinations is similar to what is covered in beginning level college courses in these areas. The amount of credit awarded is up to the individual school, but colleges may award as many as 27 credit hours or one full year of credit if you pass all five of these examinations with a satisfactory grade. The Subject Examinations measure what you might have learned if you had taken specific college courses. For more information about these examinations and their content, turn to the workbook section.

The New York Regents External Degree Examination (REDE) was originally developed by the University of the State of New York but they are now accepted by colleges in many parts of the country.

The ACT Proficiency Examination Program covers what you might learn in specific college courses. For more information about these examinations and their content, turn to the workbook section.

Other standardized examinations which colleges may use to assess what you have learned from your experience include the Advanced Placement Examination,

the achievement tests of the American College Testing Program or the College Entrance Examination Board, the Undergraduate Program Field Test, or the Graduate Record Examinations.

There are some problems which may occur in obtaining college credit by examination. Colleges may differ over what they will accept as a "satisfactory" passing grade on these tests. Some colleges will allow you to omit an introductory or required course on the basis of these examinations, but will not award credits toward a degree for this, so you would still have to take the same number of courses. Colleges may also have rules about the number of credits by examination which they will accept. Before you take these examinations, you should be sure that the college you want to attend will accept them. You should also be sure that you take standardized examinations only when they are really appropriate ways to measure what you have learned from your experience. Most such tests have descriptive booklets with sample questions which can help you to decide if the examination covers the kinds of things you have learned.

The other type of examination which may be used to help the college assess what you have learned is that developed by the college itself. Some colleges have developed or are willing to develop their own special examinations to assess what students like yourself have learned from their experiences; other colleges use the same examination that students usually take at the end of a course.

Sometimes colleges, even though they do not usually award credit for learning from prior experience, will allow students to "challenge" a course. When you ask to challenge a course, you are saying to the college that you think you already know the things being taught in that course. Sometimes colleges ask students who challenge a course to take a "challenge examination"; this may be

the final examination for the course or some other written test. The examination given by a college may be an oral examination or a demonstration rather than a written test. Oral examinations involve your talking with one or more faculty members and answering their questions about what you have done and learned. Demonstrations involve your showing others what you can do; for example, you might be given some financial information and asked to draw up a budget.

Colleges may sometimes allow you credit for a course which you have challenged if you take and can successfully pass a more advanced course in the same subject. For example, if you have learned some Spanish in your volunteer work in a Mexican-American neighborhood, you might want to challenge the Introductory Spanish course at your college. The college might then agree to give you credit for Introductory Spanish if you take Intermediate Spanish, for credit also, and pass it satisfactorily. At other times, a college may ask you to meet with the professor who teaches the course you are challenging and let her/him decide how to assess what you have learned and whether or not you should receive credit for the course. Whenever you are asked to meet with a faculty member to talk about what you have learned from your experience, you should think about the best way to present what you have learned. The two documentation approaches discussed below will help you do this.

Evidence from Others. There are three kinds of evidence from others which you may use to document what you have learned: (1) descriptions of the instruction or training which you received, (2) descriptions of your volunteer job, and (3) evaluations of the work which you did.

Colleges are just beginning to recognize that volunteer jobs, like paid jobs, often involve a considerable amount of training and formal instruction. There are two offices now working to evaluate the training and instructional programs offered by business, industry and volunteer groups: (1) the University of the State of New York's Office of Noncollegiate Sponsored Instruction; and (2) the American Council on Education's Office on Educational Credit. Each of these offices visits training programs and, after observation and careful study of their content, prepares a recommendation about the equivalency of the volunteer training program to college course credit. Volunteer training programs for the Literacy Volunteers of America, the New York Botanical Garden, and the Boy Scouts of America are among those which have already been evaluated by these offices.

If you hope to receive college credit for what you have learned in the training programs for your volunteer work, it is important for you to have a careful description of this training. This description should include a summary of what you were taught, by whom, the number of hours or days of instruction, and the instructional materials (books, films, etc.) used. If possible, include in the material you prepare for a college a copy (not the original) of any certificate or letter which confirms that you completed this training satisfactorily. If the training program is one that is given regularly by a nationwide volunteer organization, you may want to write to the national office to see if they have prepared such a description of their training programs to help women like yourself or if they have had their training program evaluated by either of the two offices mentioned above. If the training program is one given

regularly by a local volunteer group, they may be willing to help you and other women who are interested in obtaining college credit for volunteer work competencies in preparing a program description.

A second kind of evidence from others is job descriptions. Descriptions of volunteer jobs should indicate in detail the kinds of tasks which you have done, the amount of supervision which you received, and the amount of responsibility which you had. (In business such descriptions often include the number of people supervised and/or the size of the budget for which an individual is responsible.) If you are seeking credit for homemaking activities or if the volunteer organizations in which you work do not have job descriptions, you may be able to prepare a job description yourself.

The third way to document your experience with evidence from others, is to obtain a report or evaluation of the work which you did. Such reports are usually obtained from the person(s) who supervised your work. However, for some kinds of jobs, evaluations from co-workers or clients could be appropriate. When you get such a report, whether from a supervisor or someone else, it should include a description of the nature of the work you did; the particular duties you performed; the amount of time you spent doing this; and an evaluation of the quality of your work. The name, address and job title of the supervisor or evaluator should be indicated. Some volunteer agencies keep records of this kind of information and can help you with this. If you are asking someone to write a report or evaluation for you, it is important that they understand that this report is different from the usual letter of recommendation; this report should stress what you learned as a result of doing this work and the competencies which you gained.

Homemakers may also find that they can use evidence from others to document their competencies. If, for example, you have been working closely with your family doctor to understand the problems which your handicapped child faces and to learn how to deal with these, the doctor may be able to write a description of what you have read about the problems of the handicapped and the techniques which he has taught you, or which you have discovered, that can be used with handicapped children.

Colleges may use evidence from others in two ways: (1) to verify or check that what you have said is accurate; or (2) to validate your experience. Typically, a less detailed verification report is asked for when the college assesses your learning from the experience in some other way (by examination, writing a paper, etc.). When the college says that they will use the description to validate your experience, they will want a really detailed report from someone about what you did and what you learned; this report will substitute for any other kind of assessment. Do not ask to have reports prepared by others until you are sure that your college will use them and until you know exactly how the college wants to have this information described and sent to them.

The problems involved in getting evidence from others are chiefly related to the lack of records and other information about volunteer work and training volunteer groups. There is a companion to this workbook designed to help volunteer organizations and agencies understand more about the problems involved in assessing volunteer experience for college credit and what they can do to help women like you. You may want to tell the volunteer groups you work with

about this workbook. It is called Volunteer Work and College Credit. It can be ordered from Educational Testing Service, Princeton, New Jersey 08541 and costs \$3.00.

Your Own Evidence. If the work which you have done as a volunteer did not involve taking training courses or being supervised by others, or if you are seeking college credits for your homemaking experience, you may find that the best evidence to document your competencies is what you, yourself, can prepare for the college. Some of the common ways in which this kind of evidence is presented are: (1) portfolios; (2) written descriptions; (3) checklists; and (4) work samples.

The portfolio is probably the method most frequently used by colleges to assess prior learning experiences. Many colleges which use this approach offer special workshops to help students learn how to prepare portfolios. A tool which can help you, if your college asks you to prepare a portfolio about your experience, is Assessing Prior Learning: A CAEL Student Guide by Aubrey Forrest. It is published by CAEL (Council for the Advancement of Experiential Learning), American City Building, Columbia, Maryland 21044 and costs \$3.00. As this book indicates, portfolios are intended to "facilitate and support a request for credit or recognition for prior learning." A typical portfolio might include: (1) a table of contents; (2) your autobiography; (3) descriptions of learning; (4) specific requests for credit or recognition of learning; and (5) an appendix. Usually, such a portfolio will stress the descriptions of learning section; actual documentation, such as work samples, is included in the appendix.

Some colleges will not want you to prepare a formal portfolio but will, instead, ask you to write a description of what you have done and the things that you have learned from this experience. Sometimes, if the college is trying to relate different kinds of experiences which you have had to several courses or fields of study, it may be necessary for you to write more than one such descriptive paper. For example, if you are seeking college credit in child growth and development on the basis of what you have learned as a mother and also seeking credit in the management of human resources on the basis of what you have learned as the president of a volunteer group; you would probably be asked to write separate descriptions for these two topics.

Occasionally, colleges which do not typically grant credit for experiential learning may do so if you ask a faculty member if you can prepare a paper on your volunteer or homemaking experience as part of a program of "independent study." Independent study usually involves a student and a professor agreeing together about what kind of work the student will do and how much credit will be granted. Often such courses involve students reading and/or working on their own (or independently) and meeting only occasionally with the professor; frequently the student is asked to write one or more papers describing what s/he has learned from the reading and/or work. Do not hesitate to talk about your volunteer and homemaking experience with the professor in any college course which you take. Most professors will be interested in how your experience relates to their course or field of study; such conversations may help to open up an opportunity for you to do an independent study paper about your experience.

Some colleges which regularly assess experiential learning may ask you to read through checklists of things related to specific fields of study and

to indicate those topics which are most relevant to your own experience. The college then uses these checklists to focus the content of other assessment-- whether by the use of examinations, portfolios, or other techniques. Checklists also help colleges compare students who have had similar experience or who feel they have learned similar things from different kinds of experience.

Still another way of providing evidence to a college to document your competencies is by having samples of your work. If your work involved written reports, articles, diaries, work logs, or other similar records, these can be used as evidence to support your statements about what you have learned. If you have made clothes, painted pictures, designed or decorated a home, or done other things where you can show work samples, the college may ask to see one or more products which are examples of what you have done. Sometimes work samples involve doing what you have learned. For example, you might be asked to demonstrate what you have learned about teaching or working with children, in cooking, or in counseling adults by actually teaching, or cooking, or counseling.

Remember, you should not begin to prepare a portfolio or any other kind of evidence until you know exactly what kind of information your college will want.

When you use examinations to help document what you have learned, it is your responsibility to select those tests which are appropriate to your experience. When documentation involves assessment by the college itself, with the help of evidence which you or others provide, the college should try to get as clear an understanding as possible about what you have learned so that

they can relate this learning to their instructional program and so that they can assess it properly. Some of the ways in which colleges may assess your learning are described in the next chapter.

What kind of information about your volunteer work and homemaking experiences will colleges want to have? They want to know what you have learned from these experiences. Be sure when you talk with people at a college or when you prepare a written description of your experience, that you stress what you have learned from doing these things.

Chapter 3

HOW COLLEGES MAY USE THE INFORMATION YOU PROVIDE

Colleges ask for the kinds of information described in the preceding chapter for two reasons: (1) to verify that you really have done the things which you say you have done; and (2) to assess what you learned from these experiences. In verifying and assessing your experience, the college is trying to decide if you have had the kind of learning experience for which they award college credit and, if so, how much and what kind of credit should it be.

Verification

Verification is usually done by the college counselor who works with you. It is usually a quick and informal process. If you have written records or certificates from your volunteer jobs, these will usually be accepted as proof of what you have done. If you do not have written records, your counselor would probably want to write or phone some of the volunteer organizations where you have worked to verify your experience.

Assessment

Every college has its own way of assessing experience. The counselor who works with you will tell you what your college expects. The information which the college asks for, like the portfolios, descriptions, and examinations described in the preceding chapter, will be used to assess your experience.

Before a college can assess life experiences, it must first decide what kind of learning has taken place. It is necessary to identify the kind or content of the learning in order to choose the best way of assessing or evaluating it; identifying the kind of learning which has occurred also helps colleges to select the people best able to assess the experience.

One of the first choices you and the college counselor must make is to decide what method should be used to assess the experiences which you have had. If the kind of experience is one which is closely related to what is taught in college courses, formal assessment methods may be selected.

Formal assessment involves the use of tests or examinations. This may be a test, like the College Level Examination Program (CLEP) or some of the other examinations described in the preceding chapter, which are given in many different colleges. The college may also decide to use a test or examination which has been designed for the licensing or certification of people for certain jobs. For example, if you have experience in caring for preschool age children and can pass an examination which is used for the licensing of workers in child care centers, many colleges would consider this the equivalent of passing the courses which are normally offered to prepare people for this licensing examination. Similarly, if you are able to pass the licensing examination to be a practical nurse, colleges may accept this test as evidence that your experience is equivalent to the courses they offer to train practical nurses.

Another kind of formal assessment occurs when the college uses its own examinations to evaluate your experience. These may be the same tests or examinations which are used in the regular college courses. Or they may have been especially developed, by faculty members and other people who are expert in the area, for use in assessing certain types of experiential learning.

Remember when we talk about tests, that there are many different kinds. Many people are familiar with the multiple-choice paper-and-pencil tests and with the essay examinations that are often given in schools. However, colleges may also use performance examinations. In these tests, the student is asked

to do something rather than to write about it or to answer written questions. For example, you might be asked to demonstrate certain cooking skills in order to obtain credit in home economics. Sometimes a performance test may involve the college having people observe you while you are at work. A kind of assessment related to performance tests is called a simulation. In a simulation you are also asked to do something but in a situation that has been made-up to help people evaluate your performance rather than in the actual circumstances where the task is usually done. For example, if you have learned about counseling from working in a crisis intervention center, the college might decide to assess your knowledge of counseling techniques by having different people pretend, or simulate, that they were coming to the center to get help from you for various kinds of problems; you would be asked to work with them and counsel them just as you would for real clients at the center. In using either performance tests or simulations, the college may ask two or three people to watch your work. These people will usually have some kind of checklist or rating scale on which they can indicate what things they saw you do and, also, how well you did them. These ratings help the college to reach a final decision on the quality of your performance.

Informal review methods also often use faculty members or other individuals who are expert in a given field as evaluators and assessors of what you have done. This method differs from formal review in that the result is usually a decision to award or not to award credit rather than assigning you a test score or rating. Two techniques which are frequently used in the informal review of experiential learning are the interview and the portfolio evaluation.

If you were asking Minnesota Metropolitan State College for assessment of your volunteer leadership experience, your interview might include some of the following questions:

1. What long-range and short-term goals form the basis of the principal organization which you have served in a leadership capacity? To what extent were you a determining factor in establishing or re-directing those goals?
2. In light of these long-range and short-term goals, what action priorities have been established? What has been your role in establishing these priorities? What factors do you see as the primary determinants of appropriate priorities for directing the work of a volunteer organization?
3. Is there ever a reason for disbanding or substantially altering the objectives and functions of an organization such as this? If so, under what circumstances? To what extent have you been involved in such a procedure, and how would you evaluate the success of the changes?
4. In what ways are the goals and specific priorities of this organization similar to, or different from, those of other types of organizations of which you have been a member, or which you have served in a leadership capacity? (This may include other volunteer organizations or those supported with a different financial and membership base.)

Don't worry if these particular questions are hard for you to answer.

Remember that the questions which you will be asked will probably be different so that they will fit your own experience.

If you were asking this same college to assess your homemaking experience, you might be asked questions like these:

1. In your household who pays the bills, and on what schedule are these payments made? How were these determinations made and why?
2. What procedures did you and other members of your family, if any, use in establishing your budget? Without specifying amounts, generally describe proportions used for various components of the budget. How would you evaluate the effectiveness of the budget plan which you are now using?
3. If you do not use a formal budget in operating your home, what form of financial management do you use? How would you evaluate its effectiveness?
4. What procedures do you use to determine when to buy a new household item, such as an appliance or a piece of furniture? Why do you use that procedure?
5. What methods do you use to determine which products are of appropriately high quality? Explain your criteria for judging both quality products and places from which to buy those items.
6. Have any changes in your financial situation or life style necessitated changes in buying patterns? Explain those and evaluate their effects on your decisions regarding when and what to buy.
7. To what extent have you or your family placed money in some type of savings or investment program? Without specifying amounts or programs, explain your reasons for choosing those programs.

In what ways were your choices related to factors such as number and age of children, your own or your spouse's age, future plans, etc.?

8. In selecting the savings or investment program, how much information were you able to gather regarding those programs, and what procedures did you use in obtaining necessary information?
9. What strengths and weaknesses do you see in your own skills in financial management? Are there additional areas of study or skill development which you feel would enhance your effectiveness in this area? Have you undertaken any additional study in this area?

When a college reviews your portfolio or other materials which you have prepared for them, they will ask the faculty members or other experts who have been asked to be a part of the assessment team to look at and read about what you have done. Then they will meet together to make a decision about awarding credit.

When a college decides to assess life experience for the awarding of credit, it must set standards against which these experiences can be evaluated. The purpose of the assessment process is to provide the college with the kind of information it needs to determine if the competencies which a student has acquired from her experiences meet the standards which the college has set for the awarding of credit. Colleges go about setting these standards in different ways. However, most colleges rely on the opinion of faculty members or of other people who are expert in an area. In informal review, they ask these people to compare what you present as evidence of your competency

against the standards which they feel represent an acceptable amount and level of learning to receive credit. The experience which these faculty members and other experts have had with other learners help them to set the standards for assessment and the awarding of credit. Or these people may compare the competencies which you have acquired from your volunteer or home-making experience with those competencies which they expect their students to achieve from certain courses or field work experiences. When colleges use formal assessment procedures, they may compare your test score or performance with that of students who have taken certain courses.

Types of Credit

Once the college has assessed your competencies and decided that they meet its standards, it must then decide on the amount and type of credit which it will award you. Colleges differ greatly in how they handle the awarding of credit for experiential learning. You should find out from your counselor or advisor what the rules and policies are for your college. Most colleges have some limit on the number of credits which they will award for experiential learning. Most colleges will require that you take some regular college courses in order to complete the work for a degree.

The college may decide to award you credit to meet certain institutional or competency requirements. For example, your experience in writing newspaper articles about your volunteer organization may be assessed as having taught you competencies equivalent to what the college teaches in its required English Composition course or in giving you the same communication competencies which the college requires every student to demonstrate in some way. The college might decide, instead, that this competency was equivalent to a certain number of credits in English but not exactly the same as any course, or it

might decide to indicate these credits as being the same as having taken certain English courses. It might decide that this competency would mean that you did not have to take English Composition but not award you any credits. Or you might be able to take an advanced level course in writing without having to take the introductory course.

If your experience is not closely related to certain courses, the college may decide to indicate that you have been awarded a certain number of credits from this kind of assessment but it will not indicate these credits as being for English or psychology or some other specific area of study.

As we mentioned earlier, sometimes the college may award you credit for certain experiences as independent study credits, only after you have taken an introductory level course and passed it satisfactorily.

Before you make a final decision about entering a college, you should find out exactly what its policy is about awarding credit for experiential learning. Ask if the college has a limit on the number of credits which can be received, how these credits will affect the courses which you are required to take, and the comparative cost (both in terms of money and time) of receiving credits from courses and from the assessment of your competencies.

How do colleges use the information you give them about your volunteer work and homemaking experience? They use it to assess what you have learned. From this assessment they can decide on the kind and amount of college credit which you should receive for this experiential learning.

Chapter 4

COSTS, BENEFITS AND POSSIBLE PROBLEMS

The reason that many students are interested in college programs which award credit for experiential learning is that they believe these programs will allow them to obtain a college degree at less expense and more rapidly than by taking a traditional college program. Many students also believe that by attending a college which accredits experiential learning they will not have to waste time taking courses which duplicate what they have already learned. However, because each college sets its own policies about the awarding of credit, these beliefs may not always be true. You need to find out the policies of the colleges which you are thinking of attending in order to determine if the program offered will really meet your needs while saving you time and money. Think of this in terms of costs, benefits, and tradeoffs. You are spending time and money now for future gains. If you have college experience you will probably have more options and opportunities open to you.

Costs of Attending College

The first cost which most people think of in connection with attending college is the cost of paying tuition for taking courses. Tuition varies a great deal from one college to another. In general you will find that the tuition costs for you will be lower at public colleges than at private colleges. However, because of the great variation from one college to another, you should ask what the tuition charges are for each college you are thinking about attending. Many colleges, but not all, adjust their tuition charges if a student is taking only one or two courses (attending part-time) rather than taking the number of courses which the college considers to be the number of courses a

"full-time" student will usually take. Sometimes it is possible to take more courses than the number which is usual for a "full-time" student without having to pay a higher cost. It is important for you to study the costs of each college carefully in order to compare the total price for completing the program. If the tuition cost is "per credit," multiply the cost per credit times the number of credits that will be required of you to graduate. If the tuition cost is "per course," multiply the cost per course times the number of courses you will need to graduate. In addition to looking at the tuition charge, you should see if there are additional special fees and charges. You should also see how many courses you are able to take for the tuition and fee charged and how this number of courses relates to that required to complete the program.

Sometimes the cost per course at a college looks low until you realize that the college requires an unusually large number of courses for the completion of a degree.

Most colleges which award credit for experiential learning charge some sort of fee to a student for evaluation and assessment. This fee is usually used to pay for the cost of having a counselor work with the student in preparing information about the learning experience and for the time spent by the faculty members who assess the materials presented. Sometimes, but not always, the costs of tests involved is included in the fee. You should also ask if the college has a required course for students preparing portfolios for evaluation and if there is an additional charge for this course. It is important for you to find out what charges a college has for the assessment of experiential learning. Be sure to think about this assessment charge in relation to the number of credits which you may receive.

For example, if a college requires you to take and pay for a course which will help you learn how to develop a portfolio of materials so that your experiential learning can be evaluated, but you have only the experience relevant to one course, it would be just as costly, in terms of your money and time, to have your experiential learning evaluated as it would be to take the traditional college course. In general, the more different experiences which you have had which can be evaluated for possible credit, the more likely it will be that attending a college which awards such credit will result in a savings of money and time for you. This is why experiential learning programs tend to be more appropriate for mature adults than for adolescent students who have had more limited experiences.

You should check, too, to find out what kind of financial aid (scholarship, loan, or other kinds of help) each college has. Some colleges will give financial aid only to full-time students; others will give aid to part-time students as well as full-time students. You may find that some colleges with high costs are able to give you more financial aid than some lower-cost colleges. Few colleges provide special kinds of financial aid to help students meet the costs of assessing experiential learning.

There are still other, more hidden, costs in attending college. These include the cost of travel to and from the college, the cost of textbooks, and other study materials and the cost of meals away from home. Depending on your family situation, you may also have to include the cost of child care and/or other household help in determining your college costs. If you have children and do not live too far from the college, it may be possible for you to use the child care facilities on the campus. Not all colleges, however, provide child care facilities and the time when your classes are held or the distance which you

must travel could make the use of such facilities impractical for you even if they are available.

Still another hidden cost is the effect of attending college on your opportunity to do paid work. If you are doing paid work outside your home now, you may find that your college classes conflict with your hours of work or limit your opportunities to work overtime. You may also find that the combined pressures of your college courses and your family responsibilities will make it necessary for you to work less than full-time. If you are working and plan to attend college, be sure to check with your employer to see if the company will provide money to meet some of your college expenses or will allow you to have time off to attend classes. ~~Many companies pay college tuition for work-related courses taken by their workers. Check, too, to see if the colleges which you are interested in will award credit for the job-training courses which many companies give.~~

A less obvious kind of cost of attending college is the expenditure of time. As mentioned above, the time you spend in the college classroom cannot also be spent in paid or volunteer work or in caring for your family. ~~But the time in the classroom is not the only time which attending college requires.~~ You must also remember the time necessary for studying and the time involved, as well as the cost, for traveling to and from the college campus. A slightly less expensive college program which requires you to travel a long distance and spend a considerable amount of time away from home could be, in reality, more costly to you than a more expensive college which is conveniently located.

Benefits of Seeking College Credit for Your Competencies

As we said earlier, college programs which award credit for experiential learning are popular because they often allow the student to complete college

at a lower cost and/or more rapidly than do traditional programs. Even when this is not the case, the individual who receives credit for prior learning is able to have more flexibility in her college program; she may take more advanced courses rather than spending time covering material she already knows or she may be able to take more electives because she has received credit for required courses.

There is still another, less obvious, benefit to you in reviewing for possible college credit the competencies which you have acquired from your volunteer work and homemaking experience. That is the opportunity which this review gives you to evaluate these experiences, and your own capabilities. Too often, people do not value the kinds of work, like homemaking and volunteer jobs, which are ~~done without a salary. One thing we hope that you will learn by reviewing what~~ you have done and by identifying the competencies which you have acquired is that you have grown intellectually and learned from these experiences.

Attending college will open up many new interests and opportunities for you. You will meet new people, learn new things, and acquire new skills. The costs, in terms of time and money spent now, can be balanced against the future advantages which this experience will give you.

Possible Problems Which You May Meet

The first problem which you are likely to encounter is that not all colleges will give you credit for your prior learning experiences. Sometimes this is because the college feels that it is too difficult to evaluate and assess learning which has taken place off its campus and away from faculty supervision. Other colleges have decided not to give credit for prior learning because, by doing so, they forego receiving tuition money. Sometimes state rules are such that colleges receive state funds on the basis of the number of students attending class; such

states have few public colleges giving credit for experiential learning.

Even when you have located a college which accredits prior learning and which has the program you want, you may still face a problem. Not every department or program in a college may be equally willing to assess your experience for possible credit. Usually, the more closely related your experience is to the content of the college course, the easier it will be to get credit for your experience. In general, but by no means always, the more applied learning types of college programs (such as business) are more likely to award credit for prior experiential learning than are more theoretical programs (like philosophy).

Probably one of the most frustrating problems which you can encounter with experiential learning credits is to discover that, if you transfer to a new college, these credits may not be accepted in the same way as are credits from traditional courses. If you expect that you may be transferring, say from a junior or community college to a four-year college, try to find out what kinds of credit the four-year colleges you might transfer to will and will not accept.

As we have commented earlier, even when colleges do award credit for prior learning experiences, many colleges have only given this kind of credit for paid work. Colleges may be less willing to give credit for volunteer work or homemaking experiences either because they feel that only paid work is "meaningful," because they feel that volunteer work and homemaking are not "real" work and therefore do not provide the same kind of opportunity to learn, or because they feel that the kinds of things which one learns from volunteer work and homemaking are not relevant to what is taught in colleges. We disagree with all of these. We feel that the nature of the work done and the quality of the experience, not the salary paid, is what is important. We feel that most people are as committed and dedicated

to meaningful volunteer work and to homemaking as they are to paid work.

And we believe that volunteer and homemaking experiences not only offer as much of an opportunity to learn as paid work but may offer an especially rich opportunity to develop interpersonal and other skills which are independent of any of the financial incentives found in paid work.

SECTION II
WORKBOOK

Chapter 1

COLLEGE PROGRAMS FOR DIFFERENT LIFE GOALS

When you are making a decision about selecting a college or about selecting a program of courses in a college, it is important for you to think about the reasons why you want further education. Some people go to college because they feel that it will help them get a better job or because the kind of job they want requires college training. Others go to college to explore various life choice possibilities, or to learn more about a subject which has become of interest to them. Many people attend college for still other reasons or for a combination of several of these reasons.

1. What would you like to be doing:

a. five years from now? _____

b. ten years from now? _____

2. What things do you need to learn or be able to do, in addition to your present skills and knowledge, in order to reach these goals? _____

3. Which of these things can you learn at college or from other kinds of formal training? _____

If you are interested in attending college in order to get a particular job or to get a better job, it is important for you to find out first if the job really does require college training and, if so, exactly what kind of college course or program is necessary. You will probably want to talk with employers or career counselors to find out more about job requirements before you decide whether attending college will help you obtain the job you want. Career counselors can also help you in finding out about the kinds of jobs which you might get using the skills, competencies, and education which you already have.

Where can you go for help?

There are several places where you may be able to receive career counseling.

First check what resources are available in your own community. If you are not sure how to start, ask the high school guidance counselor or a librarian to help you locate counseling resources. Women's centers often have counselors available or can direct you to such help. An organization called Catalyst has a program to help women who wish to return to work. They have developed a network of centers which provide career and/or educational counseling for women. In Appendix B of this workbook there is a list of the members of Catalyst Network. Another group, called the National Center for Educational Brokering, is trying to help adult students "find their way into and through the experience of postsecondary education." A directory of these brokering programs is included in Appendix C.

Does your community or a nearby one have a counseling center or educational broker which can help you?

Yes _____ No _____

Its name, address and phone number: _____

4. Who are some of the people who can help you find out more about job requirements, if this is your interest?

	<u>Name</u>	<u>Address</u>	<u>Phone</u>
Counselors:			
Possible employers:			
Women now holding such jobs:			

When you talk with a career counselor or prospective employer, be sure to mention the skills which you have developed from your volunteer work and home-making experience. Did you know that the U.S. Civil Service Commission, as well as several states, recognizes volunteer work experience and evaluates applicants on the basis of relevant skills?

There are several groups and programs which can help you relate your experience to careers. Some of these include:

Catalyst

Philadelphia, Pennsylvania 19118

Wider Opportunities for Women
1649 K Street, NW
Washington, D.C. 20006

Catalyst publishes workbooks which describe various careers. The other three programs help women to make the transition from homemaker and volunteer to paid employment. Is there a similar program in your area?

Yes _____ No _____

Its name and address: _____

You may find that you can get the kind of job you want by taking a few specific courses rather than by completing an entire college degree program. When you meet with the college counselor to talk about entering college, you will have to decide whether you should be taking courses which give degree credit or whether noncredit courses will meet your needs. You will also need to decide if you should enter a college program which leads to a degree or certificate or if you need to take only those courses directly related to your goals.

If you are interested in attending college primarily to explore various life choice possibilities or to learn more about something which interests you, you will also need to talk with the college counselor about the kind of courses or programs which will best meet your needs.

Chapter 2

DECIDING ON YOUR COLLEGE PROGRAM

Before you select a college, you should think about the kind of college program that will meet your needs.

If you are interested in taking college courses which will lead to a certificate or a degree, then you must take credit courses. However, if you want to learn more about a given topic or to explore various career possibilities, noncredit courses may meet your needs. Credit courses are entered on the college's record of your work. If you want a copy of this record, you should ask for a transcript. A sample of a letter requesting an academic transcript is given on the next page. The transcript usually gives the name of the courses which you have taken, the number of credits which the college assigns to that course, and the grade which you received (if grades are given). A transcript will help you if you move from one college to another; it will also give you a record of your college work to show to an employer. Noncredit courses are not usually recorded by colleges on a transcript. If you are taking noncredit courses, you should keep a careful record of the name of each course, a description of the course, the name of the college and the instructor, and the number of hours of instruction which you received. When you are looking for a job, you may be asked for a description of your education and experience; if so, you should be sure to list any noncredit courses you have taken as well as your credit courses.

SAMPLE LETTER
TO REQUEST COPIES OF ACADEMIC TRANSCRIPTS

Your address
and the date

Registrar
School name
and address

Dear Registrar Representative:

I am applying for fall/winter/spring/summer admission to name(s) of college(s). As part of the application procedures, it is necessary to have forwarded to them by (date) copies of my academic records.

I was a student of _____ from fall 19__ to spring 19__. I graduated/ was due to graduate in June 19__ with a high school diploma/BA/BS/AA degree in (field of study). My records would be listed under the following name _____ . My birthdate is _____ and my student number/social security number is _____.

Please let me know immediately if you have trouble locating my transcript.

I am requesting _____ copies of my transcript. Please send one to each of the following places:

(have one sent to yourself)

I have enclosed a check for \$ _____ (two dollars per transcript) made payable to you, i.e., Registrar, _____ (college name). If the charge for this service is more than two dollars per transcript, please bill me.

Thank you for your assistance.

Sincerely,

(Type name)

1. Think back over your goals and your reasons for attending college. Will credit or noncredit courses be best for you?

Credit _____ Noncredit _____

Why? _____

If either credit or noncredit courses will meet your needs, be sure to compare costs for both types of courses. Noncredit courses are not always cheaper than credit courses.

If either credit or noncredit courses will meet your needs and all other factors are equal (cost, convenient location, etc.), it is probably wiser to take credit courses. This allows you to keep your options open. Then, if your goals change, you will be on the way to the college credits you need for a degree or certificate.

As we mentioned earlier, some college programs lead to a degree while others may not. The most common college degree is called the bachelor's degree. It is usually given for the completion of the four school years full-time work. Junior and community colleges usually award an associate degree upon the completion of the equivalent of two school years of full-time work. If your eventual goal might be a bachelor's degree, be sure that all the junior college credits you take will transfer to the four year college you want to attend. Graduate school study leads to the master's and doctor's degrees. College degrees are required for certain jobs, such as a school teacher or lawyer. Other jobs do not require a college degree. However, there are often college courses which can be useful to you in a job that does not require a degree.

2. Review your goals and reasons for attending college again. Do they require that you obtain a college degree?

Yes _____ No _____

Why? _____

3. If your goals require a college degree, what kind of degree is needed?

_____ Associate degree

_____ Bachelor's degree

_____ Master's or Doctor's degree

_____ Other (What? _____)

Next you need to decide whether you should attend college full time or part time. In many colleges, full-time attendance means that you will take four or five courses each term (quarter or semester). Many courses meet for about one hour two or three times during a week. Others may meet for two or more hours but only once a week. Thus, if you attend college full time, you might expect to be in classes from eight to fifteen hours each week. In addition, you may need to spend more time at the college to do work in the library, in a laboratory, or other things related to your course work. Of course, you will have reading and other homework to do for each course you take. You should plan on spending one to two hours doing reading and other homework for each hour of class work. Part-time work means that you take fewer courses than a full-time student. Don't forget to figure on some time, too, for getting to and from the college.

In deciding whether to attend college full time or part time, you need to think about your other responsibilities. You need to think about the time you

need to do things at home, for your family, and to do your paid and/or volunteer work.

4. About how many hours each week do you now spend doing things in your home and/or for your family? _____

a. Can you spend fewer hours on these if you attend college?

Yes _____ No _____

b. What are some of the ways that you could reduce or change the amount of time you now spend on homemaking and family responsibilities?

- Do some things less frequently. _____
- Change the days or time of day when certain kinds of work are done. _____
- Find someone else (husband, child, parent, relative, neighbor, friend) to help you do these things. _____
- Find a person or service whom you can hire to do these things. _____
- Other. _____

5. About how many hours a week do you now spend on paid and/or volunteer work? _____

a. Can you spend fewer hours on these if you attend college?

Yes _____ No _____

b. What are some of the ways that you could reduce or change the amount of time you now spend on paid and/or volunteer work?

- Work fewer hours. _____
- Work different hours or shift. _____

- Ask employer or volunteer agency for time off to attend college classes. _____
 - Other. _____
-
-
-

c. If you work fewer hours, will you be able to pay college costs and meet your other financial responsibilities? Yes _____ No _____

Now, go back over your responses to this section. Do you think you should plan to attend college full time or part time?

Full time _____ Part time _____

Why? _____

If you are in doubt about which to do, it is probably better to start by attending college part time. You can then get a better idea of how much time the college work will take and decide if, in the future, you can manage a full-time program.

If, however, you are going to need a scholarship or other financial aid in order to attend college, you should check very carefully as to whether or not full-time attendance is required for such aid. Some colleges and scholarship programs will not aid students who are taking part-time work.

Chapter 3

FINDING OUT ABOUT COLLEGES

The next step is for you to find out about colleges which you might attend. If you have already talked with a counselor, you may have been given the names of some colleges in your area which will meet your needs. If you have not talked with a counselor, you now need to learn how to get information about colleges. As mentioned earlier, there is a directory of educational brokering services in Appendix C. These services try to help adult students find out the right college and program for them. If there is no educational brokering service near you, write to the National Center for Educational Brokering, 405 Oak Street, Syracuse, New York 13203. Other sources of information about colleges are the counseling centers and women's centers which are members of the Catalyst network.

Your local telephone directory should have a list of the colleges in your area.

If you go to your public library they will probably have books and other information about colleges and how to select a college. Find out, too, if the library has copies of college catalogues which you can use.

You might also try to make an appointment to talk to the guidance counselor at a high school near you. The counselor can give you some information about colleges and can tell you how to go about selecting a college.

You will probably want to collect information about three groups of colleges: (1) colleges in your area; (2) colleges which offer an external degree, that is, colleges which do not require on-campus class attendance; and (3) colleges which offer special degree programs for adult students.

As you learn more about each college, you should try to obtain information that will help you decide which college is best for you. Many catalogues have

a list of the people who can give you certain kinds of information. If you do not know who to contact at a college, call the admission office and ask to talk with someone who can answer your questions. This may be an admission office staff member, a counselor who works with adult students, or a counselor who works with women students. Some colleges have special offices to deal with "returning" or "resumed education" students. Don't hesitate, if the person you are talking with cannot answer your questions, to ask them to give you the name of someone at that college who can give you the information you need.

The first thing you need to find out is whether or not the college has the kind of program you are interested in taking. Most college catalogues list the courses that are given by the college. Descriptions of colleges usually tell the areas in which degrees are offered.

1. What kind of courses or degree program do you want to take?

2. List below the names of some colleges that you have learned about which give these courses.

Next you need to see if the colleges which have the courses you want will meet your other needs. For example:

- Does the college allow students to attend either part time or full time?
- Does the college require students to be enrolled in a program which leads to a degree?
- Does the college provide special services for women or mature students, such as special counseling or child care facilities?

This information usually can be found in the college catalogue.

3. List below the names of the colleges which both meet your needs and have the courses you want to take.

Not every college is interested in giving credit for your past learning. If this is important to you, you should, when you write to or telephone colleges on your list, ask if the college awards credit for experiential or nontraditional learning. If the first people you talk with don't know the answers, ask them to tell you who would know and then contact that person. To help you locate such colleges, a list of colleges which belong to the Council for the Advancement of Experiential Learning (CAEL) Assembly is given in Appendix D. However, not all of these colleges may credit experience from volunteer work and homemaking activities. Also, there may be other colleges in your area which provide credit for experiential learning but which are not a part of the CAEL group.

4. What colleges on the list you have prepared (those that meet your needs and have the courses you want) also give credit for experiential learning?

Another kind of college which may provide you with credit for your experience are colleges which offer external degrees. Statewide programs for external degrees now exist in many states. These programs do not usually involve regularly scheduled classes but, instead, have students working closely with a faculty member who evaluates what the student has learned from past experiences and helps the student with new learning activities. Some of these external degree programs are called Universities Without Walls, Open Universities, or by other special names. Because external degree programs do not require that you regularly attend classes on campus, but instead try to arrange for a faculty member in your area to work with you, you may find that an external degree program at a college many miles from your home is more convenient than attending a nearby college.

5. Is there a statewide external degree program in your state?

Yes _____ No _____

6. What external degree programs offer the courses you want and meet your other needs?

Colleges also offer other special programs geared to meet the needs of adult students. Some of these involve having courses scheduled on weekends or in the evening. Some involve instruction by television. Some involve having the student spend a week on campus at the beginning and end of each semester or quarter but working at home independently the rest of the time. Still others involve correspondence courses.

7. What are the names of some colleges with special programs for adult students?

8. Do any of these offer the courses you want and meet your other needs?

Yes _____ No _____

Which ones? _____

Chapter 4

THE ADMISSION INTERVIEW

Now you are ready to select one or two colleges from those which you identified in the last chapter of this workbook and to request an admission interview.

You should ask for an appointment with the person in the admission office who is the counselor for adult students or for programs for mature women who are entering or re-entering college. If you are going to be asking questions about college credit for your prior learning experiences (volunteer work and/or homemaking), be sure to tell this to the person who is setting up the appointment for you. You may be able to get this information from the admission counselor or you may need to talk with a special counselor who handles experiential learning programs.

You should be ready to tell the counselor(s) about your goals and about your educational background. You should be ready to ask about the admission process; the courses available to you; the required courses which the college has; the availability of credit for experiential learning; and costs. Remember that you are shopping for the best college program for you. Check what is available as carefully as you would shop for any other major purchase. If the first college you talk with does not seem to be able to meet your needs, make appointments at other colleges. Some sample questions are on the next few pages.

Questions for You to Ask

1. What are your admission requirements?

a. Will I have to complete an application form?

Yes _____ (Get a copy of it.) No _____

b. Is there a fee for applying for admission?

Yes _____ (How much? _____) No _____

c. What transcripts or other school records are required?

d. Are entrance examinations required?

Yes _____ What one(s)? _____

How do I apply to take it? _____

How much will it cost? _____

No _____

e. Is there an application deadline?

Yes _____ (When? _____) No _____

f. Are there any other admission requirements?

Yes _____ (What? _____)

No _____

g. Do you have materials describing the application process?

Yes _____ (Get one) No _____

2. What are your financial aid policies?

a. Is aid available to part-time students as well as full-time students?

Yes _____ No _____

b. Is financial aid application form required?

Yes _____ (Get a copy.) No _____

c. Is there a fee for submitting a financial aid application?

Yes _____ (How much? _____) No _____

d. Is there a deadline for submitting a financial aid application?

Yes _____ (When? _____) No _____

e. Do you have a student loan program?

Yes _____ (Get information about it.) No _____

f. Do you have a work-study program?

Yes _____ (Get information about it.) No _____

g. Do you have materials describing your financial aid program and scholarships?

Yes _____ (Get a copy.) No _____

3. What are course costs and requirements?

a. How many courses or credits must I take?

(Be sure to find out the total number required for graduation or certification and also the number which you will actually have to take.)

b. What is the cost of a course or credit?

c. How many courses or credits can be taken in a term (semester, quarter)? _____

d. Will this college accept my transfer credits from another college?
 Yes _____ (How many credits can be accepted? _____) No _____

e. Will this college let me get credit by examination?
 Yes _____ What examination(s)? _____

What is their cost? _____

How many credits are possible? _____

No _____

f. Does this college give credit for experiential learning?
 Yes _____ What is the cost for this? _____
 How many credits are possible? _____

No _____

If you are interested in a particular program, curriculum or department, be sure to ask to talk with someone who can tell you about it in detail.

4. What services does this college provide for students like me?

Child care: Yes _____ (Cost _____) No _____

Counseling: Yes _____ (Cost _____) No _____

Employment opportunities: Yes _____ Part-time or full-time _____
 On or off campus _____
 How much can be earned? _____

Health care: Yes _____ (Cost _____) No _____

Program for Adult Women Students: Yes _____ No _____

Women's Center: Yes _____ No _____

Other: What? _____

Reviewing Your Background. The admission counselor will probably want to know something about your previous education and your learning experiences.

The materials below are to help you review what you have done.

1. Previous formal education:

a. High school

Where? _____

Did you graduate? _____

What year? _____

If you did not graduate, do you have a high school equivalency certificate? Yes _____ No _____

What courses did you take in high school? _____

Which did you like best? _____

Which did you like least? _____

b. College

(1) Where? _____

For how many years? _____

What courses did you take? _____

Which did you like best? _____

Which did you like least? _____

College

(2) Where? _____

For how many years? _____

What courses did you take? _____

Which did you like best? _____

Which did you like least? _____

College

(3) Where? _____

For how many years? _____

What courses did you take? _____

Which did you like best? _____

Which did you like least? _____

c. Other schools (vocational school, business school, etc.)

What kind of school(s) did you attend? _____

(1) Where? _____

For how long? _____

What courses did you take? _____

Which did you like best? _____

Which did you like least? _____

(2) Where? _____

For how long? _____

What courses did you take? _____

Which did you like best? _____

Which did you like least? _____

2. Nonformal learning experience:

a. What paid jobs have you had?

(1) Job _____

For how long? _____

Did it involve special training programs for you? Yes ___ No ___

If yes, what kind of training? _____

Do you have descriptions of the job and recommendations from your employer? Yes ___ No ___

(2) Job _____

For how long? _____

Did it involve special training programs for you? Yes ___ No ___

If yes, what kind of training? _____

Do you have descriptions of the job and recommendations from your employer? Yes _____ No _____

(3) Job _____

For how long? _____

Did it involve special training programs for you? Yes _____ No _____

If yes, what kind of training? _____

b. What kind(s) of volunteer work have you done?

(1) Volunteer job _____

For how long? _____

Did your volunteer job involve special training programs for you?

Yes _____ No _____

If yes, what kind of training? _____

Do you have descriptions of your volunteer work and recommendations from your supervisor? Yes _____ No _____

(2) Volunteer job _____

For how long? _____

Did your volunteer job involve special training programs for you?

Yes _____ No _____

If yes, what kind of training? _____

Do you have descriptions of your volunteer work and recommendations from your supervisor? Yes _____ No _____

(3) Volunteer job _____

For how long? _____

Did your volunteer job involve special training programs for you?

Yes _____ No _____

If yes, what kind of training? _____

Do you have descriptions of your volunteer work and recommendations from your supervisor? Yes _____ No _____

c. What other learning experiences have you had?

Homemaking: _____

Travel: _____

The two tables which follow are to help you keep a record of what you learn from these admissions interviews. You will want to compare both the costs involved and the time required. While most people will probably wish to select the college that can provide them with the lowest cost relevant program requiring the least time, you may decide that completing a program quickly is more important than cost or that you would prefer a lower cost program that takes longer.

When you have selected the college that seems best for you, the check-list on pages 72 and 73 will help you and your counselor work together to be sure that all information necessary for your admission is on hand.

Comparison of Costs

	<u>College A</u>	<u>College B</u>	<u>College C</u>
a. Cost per course or credit	\$ _____	\$ _____	\$ _____
b. Number of courses or credits I must take	_____	_____	_____
c. Total cost of courses (a x b)	\$ _____	\$ _____	\$ _____
d. Additional costs			
Fees	\$ _____	\$ _____	\$ _____
Charges for assessing experiential learning	\$ _____	\$ _____	\$ _____
Testing charges	\$ _____	\$ _____	\$ _____
Travel	\$ _____	\$ _____	\$ _____
Child care	\$ _____	\$ _____	\$ _____
Other	\$ _____	\$ _____	\$ _____

Deadline with late fee _____		
Degree, nondegree, continuing education, potential transferability of credits		
Determining transferability of credits from prior college work		
Assessing prior learning to coincide with meeting degree requirements		

IV. Student Services Information

Discussed

- Academic Advisory Services
- Child Care Facilities (on and off campus)
- Counseling Services
- Employment (part-time, on and off campus)
- Health Care
- Housing (on and off campus)
- Recreational Facilities
- Transportation (public and car pooling)

* Required for admission
** Required if applicable

Chapter 5

REVIEWING YOUR EXPERIENCE TO OBTAIN CREDIT FOR PRIOR LEARNING

This chapter of the workbook can only give you an overview of how the process of obtaining credit for your experiential learning may work at the college you are attending. You should find out if the college has a more specific guide or course to help you. If not, you may wish to purchase Assessing Prior Learning - A CAEL Student Guide (order from CAEL, American City Building, Columbia, Maryland 21044 and costs \$3.00).

1. Does your college have a handbook for students who are seeking credit for prior experiential learning?

Yes _____ Is there a cost? _____ If yes, how much? _____

No _____

2. Does your college have a special course to help students who are seeking credit for prior experiential learning?

Yes _____ Is there an additional fee? _____ If yes, how much? _____

No _____

There are several basic steps which are involved in the process of accrediting experiential learning. We shall divide them into two main groups:

1. Initiating the Procedures for Accrediting Prior Learning
 - a. Identifying your learning experience.
 - b. Identifying the skills and competencies underlying these experiences.
 - c. Clustering and labeling related skills and competencies.
 - d. Determining ways of documenting your skills and competencies.

2. Assessment

- a. Identifying relevant courses or departments.
- b. Determining the method of assessment.
- c. Forming an evaluation team.
- d. Writing a documentation agreement.
- e. Documentation, measurement, and evaluation.

You will begin by reviewing your experience. The rest of this workbook chapter will help you do this. The following chapters will help you with documentation and with the assessment process.

Reviewing Your Experience. The first step is to make an outline of your homemaking and volunteer experience.

Start by writing down the things that you are doing now; then work backward, making a list using dates. Use extra sheets of paper for the earlier years.

At Home

Volunteer

Now:

_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

Last year:

_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

At Home

Volunteer

Year before last: _____

Earlier: _____

At Home

Volunteer

Earlier: _____

Think about the skills and competencies which you acquired from each of these experiences.

Now turn to the "I Can" lists in Appendix A and read through them. As you do this you may be surprised to realize that you had been thinking about some of your experiences too narrowly. For example, you may have thought of your work editing the PTA newsletter as being related to a youth-serving organization rather than being a way of learning about the field of public relations and communications. Revise your notes on your experience after you have read the "I Can" lists.

A note of caution: The "I Can" lists may make you think that someone who has had experience in one or more of the topic areas should have acquired all of the skills described. This is not the case. The "I Can" lists are lists of representative skills and knowledge which people might have gained by doing these jobs. Other skills, too, may have been gained which do not appear on the lists. You may wish to add skills you think are missing.

Now go back over your list to look for patterns in your experience. For example, if you have edited a newsletter for one club and produced a TV program for another, these are both activities related to the field of communications. Similarly, teaching children for your religious group and training adult volunteers at your hospital both involve instructing others. The example below shows how you can list your activities in topical clusters.

Topical Clusters

Communications

Editing women's group newsletter.

Producing TV program about clean air.

Speaking at meetings of environmental groups.

Speaking at meetings of women's groups.

Now use the space below to develop your own topical clusters.

Two columns of horizontal lines for writing. The right column contains some faint handwritten marks, including a vertical line on the second line and a horizontal line on the third line, and a small mark on the sixth line.

Now you are ready to make your own "I Can" lists.

Turn to each topic area which is related to your own experience. Make a list, in your own words or using the words in these lists, to describe your own competencies. If, for example, you have worked to raise money for a church, hospital, school, or health care organization, you should turn to the "I Can" list of a Fund Raiser to see how many of these skills are things which you have learned. Then you should write down a list of the skills and knowledge which you acquired as a fund raiser, adding to the "I Can" lists a needed.

In my work as a _____, I can:

In my work as a _____, I can:

Lined writing area with 23 horizontal lines.

In my work as a _____, I can:

Chapter 6

RESOURCES FOR DOCUMENTING YOUR EXPERIENCE

After you have reviewed your experience, read through the "I Can" lists, and developed your own lists of skills and competencies, you need to think about how you might be able to document your experience. If you are going to prepare a portfolio as part of the assessment process, these resources will be especially important. If you and your counselor decide that another type of assessment would be better for you, it may be less important for you to have material to document what you have done and learned.

One way of documenting your experience is to describe any instruction or training which you received. If, for example, in your work as a fund raiser you attended a training program which taught you something about the psychology of fund raising; how to prepare written material for a fund raising campaign; how to research potential givers, etc.; you should write a description of that training. This description should include a summary of what you were taught, by whom, the number of hours or days of instruction, and what instructional materials (books, films, etc.) were used. You may want to contact the volunteer agency to see if they can give you a description of the training program. In talking with volunteer agencies, you should ask if their training program is one of those which has been evaluated by the American Council on Education to determine its equivalency to college courses.

1. Do the volunteer agencies you worked with have descriptions of their training programs?

Yes _____ (Get copies.) No _____

2. Do you have a certificate or other evidence of your training?

Yes _____ (Make copies.) No _____

3. Have there been articles in the volunteer agency's newsletters or magazines which describe the training programs you took?

Yes _____ (Get copies.) No _____

4. Is this training program one which has been evaluated by the American Council on Education for its equivalency to college courses?

Yes _____ No _____

The following page is a sample form which you might use to prepare a description of your volunteer training.

Documentation of Training

Name of training program: _____

Name and affiliation of instructor(s): _____

Brief description of the program (objectives, outline): _____

Number of hours or days of training received: _____

Instructional materials used (books, films, etc.): _____

Additional information: _____

A second way to document your volunteer experience is to obtain an evaluation report from the volunteer agency or from the person(s) who supervised your work. This report should indicate the nature of the work you did, the amount of time which you spent doing it, and an evaluation of the quality of your work. The name, address and job title of the supervisor should be indicated. Some volunteer agencies keep records of this information and may be able to help you with this. Even if the agency does not have a record of your time and work, they may have other kinds of material (job descriptions, articles about their program, etc.) which you can use.

1. Do the volunteer agencies you worked with have records showing the nature of your work and the amount of time you spent doing it?
Yes _____ (Get copies.) No _____
2. Did you have a supervisor who evaluated your volunteer work?
Yes _____ (Contact her/him for copies of the evaluation or a supporting letter.)
No _____
3. Do you have letters from your volunteer agency, supervisor, co-workers, or clients congratulating you on your work or praising you for your accomplishments as a volunteer?
Yes _____ (Make copies.) No _____
4. Have you received any awards for your volunteer work?
Yes _____ (Makes copies of award and/or news articles about it.)
No _____
5. Do you (or the volunteer agency) have copies of any newspaper or magazine articles that tell about your skills as a homemaker or volunteer?
Yes _____ (Get or make copies.) No _____

6. Do the volunteer agencies you worked with have job descriptions for the things you did?

Yes _____ (Get copies.) No _____

7. Do the volunteer agencies have articles about their programs which you could use as documentation resources?

Yes _____ (Get copies.) No _____

8. Do you or the volunteer agencies have any other materials which could help you document your experiences?

Yes _____ (What? _____)

No _____

The next three pages have two samples of how you might prepare descriptions of your volunteer work. The one called "Documentation of Volunteer Experience" will be more useful if you held a specific kind of volunteer job. The one called "Samples of Work Experience" will be more useful if your volunteer experiences have been less structured.

The "Samples of Work Experience" format can also be used to describe your homemaking skills and competencies. You would, of course, omit the name and address of the volunteer agencies. However, you might substitute the name of someone who could verify your statements (for example, your family doctor if your activities involved caring for a handicapped or retarded child).

Documentation of Volunteer Experience

Name of job: _____

Brief description of job:

(1) Major responsibilities and duties: _____

(2) Competencies developed in this position: _____

(3) Number and type of people supervised: _____

(4) Size of budget for which this position is responsible: _____

(5) Amount of time spent in training:

(a) Formal _____

(b) On-the-job _____

(6) Amount of time spent on-the-job:

(a) Hours per week _____

(b) Number of years _____

(7) Name and address of supervisor(s): _____

(8) Awards or special recognition received: _____

Samples of Work Experience

Description of work done: _____

How work was organized and reasons for this approach: _____

Competencies developed in this activity: _____

Name and address of volunteer agency and/or supervisor(s): _____

(ATTACH WORK SAMPLES)

Still another way to document your experience is to provide examples of what you have done. If, for example, in your work as a fund raiser you wrote letters asking for money or pamphlets about the organization for which you were raising the money, you should have copies of these in your workbook or portfolio. If your work involved organizing others to raise money, you should write a description of what you did and how you did it (for example, how you decided what kind of fund raising campaign to have; how you selected and trained the other fund raisers; how you monitored their work, etc.). As a homemaker, you may have clothing which you have designed or recipes which you originated.

Do you have samples of things that you have done that could be used to document your competencies?

Yes _____ (What? _____

No _____

If you have materials of the sort described in the questions above, they will be useful to you in preparing a portfolio. If you do not have such materials, you may find that a demonstration interview, or credit-by-examination will be the best way for you to have your learning assessed.

Chapter 7

THE ASSESSMENT PROCESS

As we said earlier, the assessment process involves selecting the areas or departments to be involved; determining what method will be used; forming an evaluation team; preparing an assessment agreement; and the assessment itself.

The first step is to look back at the topical clusters which you prepared to describe your competencies. Talk with your counselor to find out how these relate to courses taught in your college and what departments are involved.

What departments or areas of concentration are related to your competencies?

Next, you and your counselor should talk about the best way to have your competencies assessed. You may also want to talk about this with faculty members in the department(s) involved. Remember that there are many different ways in which colleges can assess your learning. Think about what the best way would be for each area. Use the worksheets to help you in your planning.

Some of the formal kinds of assessment are tests and examinations. These might be standardized tests like CLEP or the ACT-PEP, college-prepared examinations, or performance examinations. The next page gives the addresses for CLEP and ACT-PEP and the names of some typical examinations. Other kinds of informal assessment would involve preparing a paper describing what you have done, a demonstration or simulation, an interview, or preparing a portfolio.

Credit-by-Examination Programs

American College Testing-Proficiency Examination Program (ACT-PEP)
P.O. Box 168
Iowa City, Iowa 52240

Examinations include Accounting, African and Afro-American History, Business Environment and Strategy, Criminal Justice, Corrective and Remedial Instruction in Reading, Finance, Health Education, Management of Human Resources, Marketing, a variety of topics related to Nursing and Operations Management. A free descriptive booklet, registration packet, and study guides are available.

College-Level Examination Program (CLEP)
Educational Testing Service
Princeton, New Jersey 08541

Examinations include General Examinations in English composition, mathematics, natural science, social sciences and humanities; Subject Examinations include topics in business, dental auxiliary education, education, humanities, mathematics, medical technology, nursing, science, and social sciences. A free descriptive booklet, CLEP May Be for You, and registration guide are available from College Board Publication Orders, Box 2815, Princeton, New Jersey 08541.

Portfolio covering: _____

Simulation of: _____

Other: _____

Next you are ready to form an evaluation team. This is a group of people, which will typically include your counselor, and one or more faculty members, who will work with you in reviewing what you have done and in deciding how to evaluate it and award the credits. If you are going to take standardized examinations for your assessment, it may not be necessary for you to have an evaluation team. The worksheet will give you a place to record who is on your evaluation team.

Worksheet for Forming Evaluation Teams

Area _____

Members

Area _____

Members

Area _____

Members

Area _____

Members

The next step is for you and your team to prepare an assessment agreement. The agreement should describe the subject(s) in which you will be assessed, the method(s) of assessment, and the number of credits which may be assigned. The first stage of this is usually a draft outlining what will likely happen. Often this draft estimate must be reviewed by various college officials to assign more specifically the exact categories of content, to relate it to specific courses in the college catalogue, and/or to approve the number of credits suggested. The assessment agreement is returned to you and your counselor after it has been approved.

Worksheet for Assessment Agreement

Content of Assessment: _____

Relation to Subject Area or Course Designation: _____

Method of Assessment: _____

Number of Credits: _____

Student: _____

Counselor: _____

Assessment Team: _____

Approved: _____

Date: _____

Your are now ready for the assessment to take place. This will involve taking the examination, preparing the portfolio, having the interview, or doing whatever you and your team agreed would be done.

The faculty will then decide on whether or not you should be given credit and/or assign you a grade. On written examinations this decision may be based on your test score. In evaluating papers, interviews, portfolios, etc., the faculty will make the decisions in the same way as they do for course work.

After you have received your credits, you and your counselor should be sure that they are recorded on your college record or transcript.

GOOD LUCK!

"I CAN" COMPETENCY LISTS - VOLUNTEER - SECTION I

ADMINISTRATOR/MANAGER

The administrator/manager is concerned with the development and/or implementation of program(s) involving paid and/or volunteer staff. This involves the utilization of people, material, money and time. There are two types of administrator/managers: those concerned with the total functioning of an organization, and those concerned with the functioning of a particular project within the program.

In carrying out my responsibility as an Administrator/Manager I can:

- Develop long-range goals and objectives that foster organizational growth and continuity.
- Develop specific goals and plans for a specific project.
- Identify the method of evaluating effectiveness in meeting the goals and objectives.
- Identify the resources in personnel, money, materials, time, and authority needed to accomplish the established objectives.
- Establish priorities based on the importance of each objective to goal attainment and on the resources available.
- Identify needs and opportunities for volunteer service.
- Enlist the support of the governing body and staff in the utilization of volunteers.
- Interpret the organization and its systems for the delivery of services to the public and to people in need of assistance (see Public Relations).
- Work creatively within the structure of relationships and the setting of the organization, i.e., local agency to national office, etc.
- Be aware of the effects of changing socioeconomic conditions, cultural patterns, and knowledge about the helping professions and their effects upon volunteer resources and services.
- Organize the program or project into its component parts and determine the sequence in which these activities need to be performed.
- Develop and utilize flow charts, PERT charts, and other visual materials to describe the program's or project's work flow.

- Articulate the philosophy of the organization.
- Use problem solving and decision making skills.
- Develop and work within an agenda.
- Identify channels to change (see Advocate/Change Agent).
- Determine the need for and develop alternative plans to meet emergencies.
- Delegate responsibility and establish accountability methods to determine if these responsibilities have been met.
- Describe and use techniques which will elicit new ideas and proposals.
- Solicit and make constructive use of negative and positive feedback.
- Manage effectively in high pressure situations.
- Use techniques for crisis management and describe why different types of crises require different techniques.
- Use methods of conflict resolution and describe when they are appropriate.
- Establish effective communications throughout the organization.
- Coordinate the execution of simultaneous projects
 - Establish mechanisms for coordination.
 - Determine when coordination is needed.
- Serve as a spokesperson for the organization (see Public Relations).
- Meet accountability demands of others by preparing reports which include:
 1. Evaluation of success in meeting objectives.
 2. Records of financial status.
 3. Data on time and personnel utilization.
- Prepare written summaries of project and organizational accomplishment (see Public Relations).
- Develop staffing plans (see Personnel Manager).
- Prepare and use a budget (see Financial Manager).

This list is not a complete description of the skills which an Administrator/Manager may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

FINANCIAL MANAGER

Managing finances involves allocating and monitoring the use of personnel, time and resources so as to exercise control of money and resources for an organization, program or activity.

As a financial manager, I can:

- Plan and prepare budgets using
 - fund budgeting
 - program budgeting
 - other budgeting techniques (specify) _____
 - Present the rationale and justification for a budget.
 - Understand and interpret a budget
 - Prepare budget projections based on historical analysis and cost trends.
 - Prepare cost estimates from data about the utilization of personnel, time, and materials.
-
- Establish procedures to monitor income and expenditures.
 - Establish procedures (incentives, etc.) which encourage fiscal responsibility.
 - Monitor income and expenses so as to exercise fiscal control or, when necessary, adjust existing budgets.
 - Demonstrate a knowledge of basic bookkeeping techniques.
 - Demonstrate a knowledge of basic accounting procedures.
 - Apply appropriate accounting and/or bookkeeping techniques in maintaining financial records.
 - Establish and maintain fiscal records and procedures which will meet external audit and/or accountability requirements.
-
- Plan an investment program in keeping with organizational needs and objectives.
 - Demonstrate a knowledge of various types of investments and the advantages and/or disadvantages of each: _____ Stocks, _____ Bonds, _____ Money Market Instruments, and _____ Other.

- Apply the "total return" concept to investments when appropriate.
- Monitor an investment program and evaluate its effectiveness in relation to:
 - organizational needs
 - other investment programs
 - economic and market indicators.
- Establish work flow and work loading procedures.
- When income and cash flow analyses indicate that it is appropriate, plan and execute appropriate short-term investments.
- Conduct salary administration and performance reviews for paid workers.
- Establish and maintain quality control procedures for individuals and products.
- Train others in financial management procedures (see Trainer for related skills).

- Determine prices on the basis of cost and overhead factors when a product or service is sold.
- Discuss the social implications of investment decisions (how company policies can affect the environment, minorities, women, etc.) and decide if an investment is appropriate to the philosophy of my organization.
- Know how to obtain information about both the economic condition and the activities of a company before making an investment decision and/or voting proxies.

This list is not a complete description of the skills which a financial manager may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

PERSONNEL MANAGER

Personnel management involves allocating and monitoring the utilization of human resources within an organization, program, or activity.

As a human resources manager, I can:

- Determine the number and type of individuals and the amount of time needed to accomplish a given task or activity
 - Prepare a staffing plan and present the rationale for it
 - Prepare staffing need projections on the basis of historical data and analysis
 - Prepare staffing need projections on the basis of problem survey data (see Problem Surveyor)
 - Explain the relationship between a particular job and organizational/agency/program mission (see Trainer)
 - Prepare cost estimates for the use of personnel and their time (see Financial Manager)
-
- Determine the cost/effectiveness of alternative plans for personnel allocation
 - Select and/or recruit individuals for a variety of jobs
 - Prepare job descriptions
 - Prepare advertisements to recruit personnel (see Public Relations)
 - Target advertisements toward paid and/or volunteer workers
 - Demonstrate an understanding of the needs and motives which lead people to take part in volunteer work
 - Arrange for and/or conduct the organizational socialization of personnel (see Trainer)
 - Arrange for and monitor the job training of personnel (see Trainer)
 - Demonstrate a knowledge of the psychological principles which govern people's behavior in work situations
-
- Establish and maintain procedures to monitor work quality and quantity
 - Monitor the quality and quantity of work performed by individuals and/or task groups
 - Counsel with workers who are not performing up to organizational standards
 - Develop and use techniques which will minimize conflicts between paid and volunteer workers
 - Demonstrate the ability to use appropriate techniques to solve interpersonal problems (see Counselor)

- Use recognition or other psychic rewards to keep volunteer workers involved and productive
- Help volunteers see the relevance of their organization/agency experience to their long-range career goals and/or personal development
- Develop and maintain a system of evaluative records of job performance
- Help supervisors deal with personnel problems
- Maintain time and salary records for paid workers
- Conduct salary administration and performance reviews for paid workers (see Financial Manager)
- Conduct performance reviews for volunteer workers
- Handle out-placements and terminations
- Train others in personnel management (see Trainer)
- Understand and keep informed about labor laws (such as Taft-Hartley)
- Review and keep up-to-date on changes in State and Federal laws for employee compensation and benefits
- Develop an affirmative action program and monitor compliance
- Plan and implement programs for staff development
- Plan and monitor a retirement program
- Deal with employee relations problems and develop programs to meet employee relations needs
- Plan and implement personnel policies and review them regularly for needed changes

This list is not a complete description of the skills which a personnel manager may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

TRAINER

Training involves teaching others specific jobs, skills, and/or tasks. It involves the teaching and/or organizational socialization of other workers.

In my work as a trainer, I can:

- Articulate the philosophy of the organization/agency
- Explain the relationship between a particular job and organizational/agency/program mission
- Demonstrate my knowledge of kinds of learning and/or of different learning theories
- Demonstrate my knowledge of teaching methods and materials
- Identify training needs (see also Problem Surveyor)
- Make a training plan which includes:
 - Learning objectives
 - Teaching design
 - Teaching method
 - Budget for training costs
 - Schedule and site considerations
 - Materials, both written and audio-visual
 - Evaluation techniques
- Determine the cost/effectiveness of various training approaches
- Determine the suitability of various training approaches for individuals with different backgrounds and experiences
- Develop written materials for use in training
- Develop audio-visual materials for use in training
- Develop training manuals for other trainers to use
- Administer a training program, including:
 - Selecting and recruiting training personnel
 - Selecting training methods and materials which are both appropriate to the group and cost/effective
 - Setting training goals
 - Conducting the training of those who will train others
 - Monitoring the progress of those being trained

- Monitoring the progress of those doing the training
- Modifying training programs and techniques if the goals of the program are not being achieved
- Evaluating the effectiveness of the training program
- Monitoring and evaluating the job performance of those who were trained

- Develop and maintain a library of training materials
- Conduct a training session
- Train others to do specific job(s) or task(s)
(Specify _____
_____)

- Make an effective oral presentation
- Demonstrate knowledge and use of group interaction techniques
- Know how and when to use different role-playing techniques in training
- Help those being trained to see the relevance of their training experience to their long-range career goals and/or personal development
- Prepare and evaluate reports on training programs
- Evaluate the training programs of others

This list is not a complete description of the skills which a trainer may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

ADVOCATE/CHANGE AGENT

Advocacy is an activity on behalf of an individual, a group, or an issue which is designed to improve conditions, programs, or services. Advocates work in areas such as legal rights, housing, education, environment, and social welfare and attempt to change or improve existing conditions.

In carrying out my work as an advocate/change agent, I can:

- Identify areas where change is needed (see Program Surveyor for related skills).
- Select methods and data which will document the need for change (see Researcher and Program Surveyor for related skills).
- Define and delimit the basic issues in a problem area.
- Demonstrate knowledge of the basic concepts relevant to an issue in fields such as:
 - legal rights (civil and criminal)
 - housing and community planning
 - education
 - environment
 - welfare and social services.
- Describe the public policy issues relevant to a problem.
- Demonstrate knowledge of the processes of change using:
 - theoretical model(s)
 - real-life examples.
- Describe methods which can be used to bring about change including:
 - lobbying
 - political campaigns
 - public relations.
- Identify the relevant constituencies concerned with a problem (both pro and con) and describe their position in relation to the problem.
- Identify significant individuals and groups (such as community leaders, government officials, and legislators) who can help to implement change in a specific problem area.
- Build good working relationships with those who will be affected

- Identify opposition groups and select techniques which will best counter their plans and arguments.
- Demonstrate understanding of the legislative process and how it can be used to implement change.
- Demonstrate knowledge of the laws and customs applying to lobbying.
- Use communication skills to persuade others (see Public Relations for related skills).
- Identify potential sources of financial support (see Fund Raiser and Researcher for related skills).
- Obtain financial support for a cause or program (see Fund Raiser and Researcher for related skills).
- Build good working relationships with legislators and government officials (local, state or federal).
- Monitor legislative bodies, public institutions' and agencies' actions relevant to the problem.
- Draft model legislation.
- Plan and organize coalition building.
- Conduct negotiations with an awareness of the necessity of compromise.
- Present arguments and evidence to support a position (see Public Relations and Researcher for related skills).
- Keep others informed about progress using:
 - verbal communication
 - written communication (see Public Relations for related skills).
- Train others to develop advocate/change agent skills (see Trainer for related skills).
- Develop techniques to maintain change.

This list is not a complete description of the skills which an Advocate/Change Agent may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

PUBLIC RELATIONS/COMMUNICATOR

Public relations refers to a method of increasing knowledge and understanding of an organization and/or its program; it is concerned with disseminating information to individuals and groups outside of the organization or agency and with processing information from outside the organization.

In carrying out my work in public relations, I can:

- Conceptualize communications and public relations programs which interpret the goals of the organization.
- Plan and develop a public relations program.
- Identify target audiences.
- Determine the communications technique(s) appropriate to each audience.
- Gather information by:
 - conducting interviews
 - confirming facts
 - identifying trends
 - locating background data
 (see Researcher for other relevant activities)
- Identify representatives of other organizations and of local, state and federal government to receive information about organizational activities.
- Establish an interchange with appropriate representatives from:
 - members of the target group
 - volunteer coordinating agencies
 - private and civic organizations
 - business, industry and professional groups
 - foundations
 - local government
 - state government
 - federal government
 (see Fund Raiser and Advocate /Change Agent for other relevant activities)
- Write:
 - news stories
 - feature stories

- scripts for radio/television
- other materials describing the organization and its program for the public
 - (see Trainer for internal publications)
- Prepare audio-visual materials, video-tapes, and/or films
 - Use audio and/or video-tape equipment
 - Use photographic equipment
 - Direct acting, speaking, and filming
- Prepare visual materials
 - Photograph events for news media or other publications
 - Design and prepare art work
 - Design displays and/or posters
- Coordinate development of materials for production
 - Edit publications
 - Edit films and/or tapes
 - Design layouts
 - Work with printers, publishers, producers
- Work with mass media (press, radio, television)
 - Select optimum outlets for placement of material and identify contacts
 - Adapt and edit materials to mass media standards
 - Conduct press conferences
 - Maintain good relations to facilitate placement of material
- Speak publicly
 - Deliver speeches
 - Promote an organization, program, or service (see Advocate/Change Agent)
 - Participate as a member of a panel or debate group
 - Give interviews
 - Conduct or moderate interviews, panel discussions, debates
(see Fund Raiser and Trainer for other related activities)
- Publicize and promote organizational materials
- Plan distribution of publications and other materials

This list is not a complete description of the skills which a public relations/communicator volunteer may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

PROBLEM SURVEYOR

Surveying a problem area is the process of assessing current status and/or needs in order to identify areas and types of future activity. The process of problem surveying is closely related to that of researching and typically precedes that of program development. (The problem surveyor usually collects original data; for more information on utilization of data collected by others, see Researcher.)

In carrying out my work as a problem surveyor, I can:

- Develop plan(s) for investigating the problem area
- Identify and obtain information about
 - the target populations affected by the problem
 - the sources of power which can facilitate or block the implementation of change (see Change Agent/Advocate for related activities)
 - the existing programs, resources, and other factors which impact on the problem
- Assess the impact of the preceding factors on the problem area by various data collection techniques such as interviewing, surveying, public discussions, etc. (see Researcher for related activities)
- Compile a list of specific needs or problems within the problem area
- Prioritize those needs and problems which are most important and practical to pursue
- Define potential actions in terms of cost-effectiveness
- Describe the problem area(s) for purposes of program development by
 - summarizing data for ease in interpretation
 - keeping records of contacts and resources
- Describe the nature of organizational and community structures as they relate to the problem area and its potential solutions.

This list is not a complete description of the skills which a problem surveyor volunteer may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

RESEARCHER

Research is a systematic means of investigating a topic or problem. It involves generating verifiable data which will support program planning and development and/or the implementation of change.

In carrying out my work as a researcher, I can:

- Select problem area(s) relevant to organizational needs
- Limit the research focus by:
 - conceptualizing issues
 - defining variables
 - operationalizing measures
 - identifying the unit of analysis
 - generating hypotheses
- Collect background information
 - Locate information sources such as:
 - written materials
 - data banks
 - interviews
 - surveys
 - Summarize past experience with problem
 - Evaluate the utility of past efforts
- Design research
 - Select research design
 - Select sampling techniques
 - Select survey techniques
 - Develop practical plans of identifying:
 - needs
 - time
 - costs
 - personnel
- Manage proposal development
 - Locate potential sources of funding
 - Write proposal to include:
 - background
 - design
 - time and cost estimates

- Meet with funding agencies to promote the proposal
- Adapt proposal to meet requirements of funding source
- Obtain data
 - Foster cooperation with community groups and/or relevant institutions and agencies to gain their support for the research
 - ✓ Recruit and train data collectors
 - Select appropriate data collecting instruments
 - Design and validate new data collecting instruments
 - Obtain informed consent of participants
 - Obtain data from existing information banks
 - Use appropriate sampling and survey techniques
 - Monitor data collection for quality control
- Process data
 - Develop coding procedures
 - Train coders
 - Supervise coders for quality control
 - Select and implement other data reduction procedures
 - Develop computer programs appropriate for the research design
- Analyze and summarize data by using
 - Averages or other measures of central tendency
 - Measures of dispersion or deviation
 - Measures describing relations (correlations)
 - Other techniques of bivariate or multivariate analysis
 - Tables or other means of categorical aggregation
 - Graphs and charts
 - Tests of significance
 - Experimental effects analysis
 - Non-experimental causal analysis
- Make inferences from data
- Make conclusions and recommendations from data
 - Formulate planning recommendations
 - Make recommendations for further study
 - Develop policy recommendations
- Write research report(s)
- Disseminate research results to appropriate groups

This list is not a complete description of the skills which a researcher may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

FUND RAISER

Fund raising is the development of a system of financial support for an organization, program, or activity.

In my work as a fund raiser, I can:

- Assess needs so as to determine what financial support is required (see Problem Surveyor for related skills)
- Plan a fund raising activity, including:
 - Identifying objectives and specific goals
 - Identifying potential sources of funds from:
 - Government (local, state, federal)
 - Business and industry
 - Foundations
 - Individuals
 - Other organizations
 - Selecting methods and strategies appropriate both to organizational image and potential funding sources
 - Estimating requirements for people, materials, and time
 - Estimating cost of a fund raising effort
- Demonstrate knowledge and understanding of the code of ethics regarding fund raising
- Demonstrate knowledge and understanding of tax laws and other regulations which affect fund raising
- Utilize the tools of fund raising by:
 - Demonstrating knowledge of resources such as foundation directories, directories of government programs, etc.
 - Demonstrating a knowledge of financial management (see Financial Manager)
 - Demonstrating knowledge of proposal preparation skills (see Researcher for related skills)
 - Demonstrating knowledge of techniques in preparing promotional materials (see Public Relations for related skills).
 - Demonstrating an understanding of the motivations and needs involved in contributing to a group, organization, or program, and methods to build on these
- Administer a fund raising program, including:
 - Selecting or recruiting staff and workers
 - Training others in fund raising techniques (see Trainer for related skills)

- Making work assignments and monitoring progress
- Setting and communicating goal
- Coordinating multi-faceted efforts
- Assessing and reporting on progress
- Modifying plans to meet changing circumstances
- Raise funds by selling a product or service, including:
 - Selecting products or services to sell which are appropriate to organization/agency image
 - Selecting a clientele or target population
 - Researching cost/benefit factors for alternative products, services, and delivery systems (see Financial Manager).
 - Planning and monitoring product or service delivery
 - Selecting and recruiting sales personnel
 - Training sales personnel
 - Selecting sites, territories and/or locations for sales on the basis of clientele, cost, etc.
 - Determining if sales permits, leases, etc. will be needed and obtaining them
 - Planning and implementing methods to monitor personnel, money, and materials (see Financial Manager)
 - Planning and implementing publicity for the product or service (see Public Relations)
 - Maintaining records which will help others planning similar sales programs
 - Developing techniques or procedures for return or repayment of products, sale of slow moving products, etc.
- Raising funds by staging a special event, including:
 - Selecting the type of event which will be appropriate to organizational/agency image
 - Deciding if the event should be targeted to a specific clientele or to the general public
 - Determining the cost/benefits of alternative types of events
 - Planning and implementing publicity (see Public Relations)
 - Organizing a plan for staging the event
 - Selecting and recruiting individuals to work on various types of tasks and activities

- Training staff and participants (see Trainer)
- Obtaining and organizing materials
- Determining if permits and permission will be needed and obtaining them
- Selecting sites and locations for the event on the basis of factors such as target population, cost, etc.
- Monitoring the work of staff
- Keeping records that will be of use to others planning similar special events
- Raise funds from government, corporations, and/or foundations by:
 - Researching special interests of potential funding sources (see Researcher)
 - Preparing a proposal
 - Contacting appropriate funding sources
 - Promoting a proposal, project, or special need
 - Preparing reports which demonstrate organizations or agency accountability to the funding agency
- Raise funds from the public through a campaign including:
 - Planning campaign theme and organizational strategy
 - Recruiting workers for different levels of responsibility and different kinds of tasks
 - Training and motivating workers (see Trainer)
 - Preparing materials to be used in the campaign (see Public Relations)
 - Monitoring the progress of the campaign
 - Revising staffing and strategy to deal with emergencies or with inadequate public response
 - Preparing reports which will be of assistance to others planning similar campaigns.

This list is not a complete description of the skills which a fund raiser may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

COUNSELOR

Counselors advise people who are seeking help and assistance with a problem. Informal counseling often occurs in conjunction with other activities, such as managing personnel or serving as an advocate/change agent. Formal counseling programs frequently require training prior to beginning work; paraprofessionals and volunteers in these programs typically work under the supervision of a professional.

In my work as a counselor, I can:

- Establish rapport with the person seeking advice.
- Use techniques which help people to talk spontaneously.
 - Select an appropriate physical setting for counseling.
 - Show receptiveness by giving attention and by listening carefully.
 - Use reinforcements (both verbal and nonverbal) for encouragement and support.
- Describe how facial expression, posture, and tone-of-voice affect communication.
- Build client confidence toward the counseling agency.
- Demonstrate my questioning skills.
 - Use exploratory questions to obtain background information.
 - Know how and why to use open-ended questions.
 - Use probing techniques to obtain further information.
 - Describe two-step probing and its use.
 - Adapt my questioning to the background of the person and to the nature of the problem.
 - Use double-edged questions to help individuals obtain greater insight.
 - Avoid leading questions.
 - Use softening techniques when using direct questions.
 - Phrase questions so as to help the respondent "save face."
- Demonstrate my listening skills.
 - Describe the qualities which make for an effective listener.

- Show how my objectives (both long range and short range) as a listener influence my listening approach.
- Use techniques to determine if what I have heard is what the person wanted me to hear.
- Use techniques to give listening feedback.
- Describe different counseling techniques and show how and when each is used.
- Describe the psychological theories on which different counseling techniques are based.
- Demonstrate my awareness of the legal and ethical problems related to confidentiality.
- Demonstrate techniques to control the interchanges in counseling situations.
 - Use techniques to expand or limit the focus of the discussion as needed.
 - Use methods to help a person expand the options under consideration.
 - Use methods of values clarification.
 - Describe how to determine when a situation needs to be referred to others.
 - Discuss various approaches to decision-making and the rationale for each.
 - Control the pacing of the interchange.
 - Use techniques to exclude irrelevant detail.
 - Use interview guides when appropriate to structure the situation.
- Identify an individual's problems and difficulties by a variety of methods.
 - Question and interview an individual to obtain information.
 - Observe an individual's interactions with others or performance to identify problems.
 - Work with an individual's family, co-workers, teachers, or others to identify problems.
 - Use tests or other diagnostic devices to identify problems.
- Take notes unobtrusively during counseling or an interview, and use these notes later in dealing with the client's problem.

- Describe the kinds of information necessary to handle different types of counseling problems.
- Interpret data and use it in counseling.
 - Interview and background.
 - Observational data.
 - Test data.
 - Other. (Specify _____.)
- Do referral counseling.
 - Build resources for referral.
 - Describe methods and consideration in using referral resources.
 - Use appropriate techniques for people seeking help for themselves and for others.
 - Demonstrate the special skills needed in phone referral counseling.
- Do intake or entrance interviewing, screening, and placement.
- Determine the urgency of a problem or concern and handle it appropriately.
- Handle crisis intervention.
 - Identify crisis situations.
 - Deal pro-actively with the people surrounding the crisis.
 - Describe responses to different kind of crisis situations.
 - Demonstrate my ability to prioritize in handling a crisis and the factors to be considered.
 - Describe the special skills needed for dealing with particular crisis situations.
 - Alcohol problems
 - Drug problems
 - Disasters (earthquake, flood, etc.)
 - Poisoning
 - Rape
 - Other (Specify _____.)
- Demonstrate techniques for dealing with people who complicate rather than aid in a crisis situation.

- Demonstrate the skills required in career counseling and life guidance.
 - Use tests and other devices to assess aptitudes and interests.
 - Describe resources which can be used to assess interests and determine alternatives.
 - Use methods to implement and follow-up decisions.
- Demonstrate the skills used in intensive individual counseling, group counseling, and therapy situations.
 - Describe the cues which can be used to assess state (emotional, physical, etc.).
 - Distinguish between techniques appropriate for group and individual counseling or therapy.
 - Describe the cues which can be used to determine the effectiveness of counseling.
- Demonstrate skills which support professional counseling.
- Use special techniques in group counseling to develop group solidarity, deal with group conflict resolution, elicit self-disclosure, etc.
- Use cues to help understand group processes and interaction.
- Demonstrate skills used as support for professional counseling.

This list is not a complete description of the skills which a counselor may have acquired. The space below is provided for you to list other competencies.

YOUTH GROUP LEADER

A youth group leader devises and implements programs which help young people develop and learn.

In carrying out my work as a youth group leader, I can:

- Articulate the philosophy of the organization or sponsoring group
 - Describe how the components of the program relate to organizational philosophy
 - Demonstrate a knowledge of child growth and development
 - Demonstrate a knowledge of theories of learning
 - Demonstrate a knowledge of teaching methods and materials
(Specify areas _____)
-
- Select activities which will help children learn desired skills and attitudes
 - Determine the cost/effectiveness of alternative program components
 - Plan a youth group program, including:
 - Defining program objectives
 - Involving group members in program planning
 - Selecting activities which will most efficiently lead to meeting the program objectives
 - Selecting activities which are most appropriate for the age, background, and experience of group members
 - Preparing program materials
 - Determining the budget for the program
 - Deciding on methods to evaluate the program
 - Administer a youth program, including:
 - Selecting and/or recruiting others for various responsibilities
 - Training other adults as leaders or assistants (see Trainer)
 - Training youth group members for leadership roles within the organization
 - Working with adult members of the supervising board or agency
 - Determining the effectiveness of various program components in meeting organizational goals
 - Assessing the effectiveness of other leaders

- Coordinating activities of various groups
- Securing financial resources (see Fund Raiser)
- Direct a youth group, including:
 - Organizing and conducting meetings
 - Teaching
 - games
 - crafts
 - music
 - dance
 - interpersonal skills
 - democratic processes
 - dramatics
 - health and safety
 - art
 - outdoor/camping skills
 - religion
 - conservation
 - homemaking
 - citizenship
 - other (Specify _____)
- Demonstrating a knowledge and use of techniques and equipment specific to the organization's program
- Abiding by the organization's standards
- Providing guidance and counseling to young people as appropriate (see Counselor)
- Using audio-visual equipment
- Demonstrating a knowledge of children's games
- Storytelling, including demonstrating a knowledge of children's literature
- Demonstrating a knowledge of safe procedures for children's activities
- Demonstrating the ability to use appropriate techniques to deal with interpersonal conflicts
- Describing how youth groups serve as socializing agents

This list is not a complete description of the skills which a youth group leader may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

GROUP LEADER FOR A SERVING ORGANIZATION

Leading groups of people for a serving organization involves helping people grow and develop within an organizational structure.

In carrying out my responsibility as a group leader for a serving organization, I can:

- Plan and coordinate activities
- Secure resources, human and physical
- Provide counseling services for people, where applicable (see Counselor)
- Organize committees to carry out tasks
- Keep records of individual and group progress
- Prepare budgets and keep financial records (see Financial Manager)
- Organize and conduct meetings
- Understand and deal with conflict
- Teach games, crafts, songs, dances, interpersonal skills, socialization, democratic process
- Use audio-visual equipment
- Abide by organization's standards
- Use proper safety precautions
- Know and use techniques and equipment specific to the program

This list is not a complete description of the skills which a group leader for a serving organization may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

MUSEUM STAFF ASSISTANT (DOCENT)

Docents describe and discuss museum exhibits with groups of individuals to facilitate a better understanding of what is being seen; they may work in art galleries or museums; in historical buildings, museums, reconstructions, or parks; in science or natural history museums; in zoos; or in parks. Other types of museum staff assistants may work in preparing, preserving, or restoring materials for display, in caring for plants or animals, in performing tasks or activities as part of the museum's demonstrations, or in conducting research.

As a staff assistant (docent), I can:

- Plan and prepare a lecture-tour for children and/or adults
- Translate information and facts to a level of understanding appropriate to the background and experience of the audience
- Deliver a lecture-tour without notes but following a suggested outline
- Modify the information given in a lecture-tour to suit children of various ages
- Develop and use techniques which arouse curiosity and provoke discussion during the lecture-tour
- Demonstrate a knowledge of and the ability to use a library and other reference resources
- "Read the nature" of a group during the first 10 minutes of a lecture-tour and modify the remainder of the lecture-tour as appropriate
- Know the criteria on which to judge a work of art
- Plan a lecture-tour to meet specified educational objectives
- Know the criteria on which to judge other lecturers
- Speak in public with confidence
- Understand and use techniques of group dynamics
- Understand and explain the policies of the organization or institution
- Demonstrate knowledge of:
 - Art history
 - Art techniques
 - World and/or national history
 - State and/or local history
 - Plants
 - Animals
 - Science

- Describe methods of investigation (see Researcher)
- Prepare museum support materials (see Public Relations)
- Demonstrate my knowledge of teaching methods and materials
- Develop written materials for use in lecture-tours
- Use audio-visual materials in conjunction with lecture-tours
- Demonstrate craft techniques
- Take part in "living history" depictions/demonstrations
- Explain the reason and purposes for museums, zoos, etc.
- Know how to care for living plants and/or animals which are part of the collection
- Know how to care for and maintain the materials and equipment in the collection
- Develop and maintain a library of materials relevant to my lecture-tour specialty
- Train others to work as staff assistants (see Trainer)
- Work with members of the professional staff and/or with members of the supervising board

This list is not a complete description of the skills which a museum staff assistant may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

TUTOR/TEACHER'S AIDE

A tutor/teacher's aide helps an individual or group of individuals to learn something or to improve their learning techniques. The tutor differs from the trainer in that trainers instruct individuals in the performance of specific jobs or tasks while tutors teach more general skills (such as reading) or knowledge which is applicable to a wide range of tasks or activities.

In my work as a tutor/teacher's aide, I can:

- Establish a good working relationship with the learner.
- Develop positive student attitudes toward learning by:
 - Selecting tasks of appropriate difficulty.
 - Telling the learner when a job is well done.
- Encourage and support the learner by:
 - Complimenting the learner for good work and good thinking to develop a positive self-concept.
 - Showing acceptance of the learner by giving attention and by listening carefully.
 - Helping the learner respond to increasingly difficult material.
 - Showing receptiveness to learner efforts.
- Work cooperatively with the learner's teacher and/or school.
 - Abide by school rules relating to tutors or aides.
 - Be positive about the teacher and school in discussions with the learner.
 - Follow the teacher's plan of instruction.
 - Provide the teacher with information on learner progress.
- Provide advice and informal counseling to the learner, when appropriate (see Counselor).
- Identify learner needs and difficulties:
 - By direct observation of and/or interaction with the learner.
 - From test data or other diagnostic devices.
 - Through discussion with the teacher(s) who regularly instruct(s) this learner.
 - Through discussion with other school personnel (counselors, psychologists, etc.).

- Determine learner interests and plan instructional activities around them.
- Plan a lesson or series of lessons including:
 - Objectives
 - Teaching methods and techniques
 - Instructional materials (both written and audiovisual)
 - Evaluation techniques
- Pace instruction at a speed appropriate to the learner.
- Set and monitor instructional objectives.
- Select instructional material and techniques appropriate to learner background and experience.
- Demonstrate my knowledge of learning theories and their application.
- Demonstrate my knowledge of teaching methods and materials.
- Develop written materials for use in tutoring.
- Develop audiovisual materials for use in tutoring.
- Develop and maintain a library of materials for use in tutoring.
(Specify subject and/or level _____.)
- Demonstrate my knowledge of the subject(s) which I tutor.
(Specify _____.)
- Evaluate learner progress.
 - By observation
 - By oral questioning
 - By use of tests or other evaluative devices
- Use questioning techniques appropriate to instructional objectives.
- Make an effective oral presentation to a group.
- Demonstrate a knowledge of group interaction techniques and of their use.
- Train others to be tutors (see Trainer).

This list is not a complete description of the skills which a tutor/teacher's aide may have acquired. The space below is provided for you to list other competencies.

"I CAN" COMPETENCY LISTS - HOMEMAKER - SECTION II

MANAGER OF HOME FINANCES

The manager of home finances is concerned with the responsible allocation and monitoring of finances related to home and/or family management.

As a manager of home finances, I can:

- Plan ahead and set monetary goals
- Budget existing funds
- Maintain family financial records
- Demonstrate knowledge of the fundamentals of investment by explaining which investments were made or considered and why
- Demonstrate knowledge of the rationale for various kinds and amounts of insurance by indicating which policies were obtained or considered and why (Health, Life, Tenant, Auto, etc.)
- Demonstrate my skills as a consumer or monitor of consumption by:
 - Buying and using various products in the commercial market
 - Knowing the advantages and disadvantages of various kitchen utensils available for cooking, serving, and storing foods
 - Knowing about different cleaning products and tools -- how to do the job most effectively and easily
 - Knowing about various patent medicines and sundry items -- when they are needed, how to determine which brand is the most effective and economical, and how much to use of them
 - Selecting good schools and knowing about the community resources which are available
 - Selecting and purchasing clothing which will be appropriate and durable
 - Determining which repairs are most appropriately and cost effectively done by a professional
- Demonstrate my knowledge of laws which can affect family finances by:
 - Describing laws related to finances and such circumstances as death, divorce, child support, etc.
 - Describing bankruptcy laws and procedures
 - Describing home/business laws and procedures
 - Describing laws related to income taxes, Social Security taxes, etc., and use them to maximize savings and/or income
 - Describing social services legally available from the government or service agencies and the process of obtaining them.
- Demonstrate my knowledge of real estate by:

- When selecting a house or apartment, know how to evaluate structure, plumbing, wiring, sewage, etc.
- Evaluate a real estate purchase by:
 - Describing how to obtain information on taxes, loans, zoning, forecast real estate charges, etc.
 - Discussing the relative importance of these factors
- Prepare and defend income tax returns

This list is not a complete description of the skills which a manager of home finances may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

HOME NUTRITIONIST

A home nutritionist is concerned with the responsible need assessment, planning, management and delivery of the nutritional aspects of the home.

As a home nutritionist, I can:

- Demonstrate knowledge and understanding of the basic elements of nutrition by:
 - Assessing the nutritional needs of the people and/or animals for whom I am responsible nutritionally.
 - Describing the variations of nutritional needs relative to age, exercise, present condition (overweight, average, underweight), metabolism, etc.
 - Describing alternative sources for meeting various nutritional requirements (vitamins, milk substitutes, etc.).
 - Describing symptoms of various nutritional deficiencies or excesses and their remedies (such as poor night vision from lack of vitamin A).
 - Describing the ramifications of the restricted diets with which I am familiar.
 - Describing the basic nutrients (fats, carbohydrates, proteins, vitamins, and minerals) and how they are digested and used by the body.
- Demonstrate skills related to nutritional planning and cost effectiveness by:
 - Using effectively the resources available to me or potentially available to me, i.e., available time (mine and others'), abilities, supplies (freezer, refrigerator, oven, mixers, utensils, storage space, etc.), information, and money and how they influence my ability to be effective.
 - Dealing with a sudden change in resources.
 - Obtaining help from social service agencies if my resources are limited, or suddenly reduced, or changed by emergency.
 - Buying in bulk or in smaller quantities, depending upon the appropriateness of each to the situation.

- Obtaining food from various sources (growing one's own, co-ops, farmers' markets, specialty stores, large chain grocery stores).
- Selecting foods at various stages of the preparation process (i.e., "raw" form, semi-prepared, prepared, etc.).
- Describing positive and negative effects of special diets with which I am familiar.
- Demonstrate my knowledge of different nutritional needs by:
 - Describing how nutritional needs vary relative to age
 - Describing nutritional needs during pregnancy and nursing
 - Describing how nutritional needs vary relative to body weight, exercise, and environment
- Demonstrate skills associated with food preparation and storage by:
 - Describing the methods I have used to store various kinds of foods (canning, freezing, etc.).
 - Describing the unique properties of various food products, i.e., leavening agents, preservatives, etc.
 - Describing the safety precautions and methods of dealing with emergencies which may occur during food preparation.
 - Describing methods of determining the meaning and corrective procedures for various cooking conditions or problems.
 - Properly using various food preparation, appliances, utensils, etc.
 - Describing the meaning of terms used in cookbooks.
 - Describing the characteristics of measurement and converting quantities from one measurement system to another.
 - Describing special food preparation techniques for serving large numbers of people or for unusual nutritional needs such as ethnic, gourmet, fat free or food allergy diets.
 - Describing differences in food selection and preparation in various cultures.

- Demonstrate skills in meeting nutritional needs outside the home by:
 - Describing the advantages and disadvantages of food sources which might be considered while traveling.
 - Describing sources of food, other than restaurants, for use while traveling or camping (dehydrated foods, wild foods, etc.).
- Demonstrate knowledge of food poisoning by discussing its causes.
- Demonstrate my knowledge of laws related to nutrition including content and labeling laws, health and cleanliness laws, etc.
- Teach others good nutritional practices.

This list is not a complete description of the skills which a home nutritionist may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

HOME CHILD CARETAKER

The home child caretaker is responsible for providing for the physical, emotional, intellectual and moral needs of a child at different stages of development. In providing this care, the home child caretaker must assess the child's needs, identify the appropriate care and implement such care within the financial, spacial and temporal limitations of the particular setting within which the child resides.

As a home child caretaker, I can:

- Identify the nutritional needs of a child (see Home Nutritionist), including:
 - Selecting among alternate liquid diets for an infant (mother's milk, animal milk formulae, vegetable milk formulae).
 - Determining when to add solid foods to a child's diet, including consulting with medical and paramedical personnel regarding nutritional needs.
 - Devising ways of helping the older child deal with the limitations of a special diet when that is necessary.
- Recognize and respond to a child's need for a loving and emotionally supportive environment.
- Identify and provide a safe stimulating environment for a child, including:
 - Providing safe bedding for an infant.
 - Providing stimulating play environment appropriate for pre-school child.
 - Teaching a growing child to develop safe play procedures.
 - Teaching school age children how to identify safe play areas.
 - Purchasing or making materials to develop a child's intellectual and physical growth.
 - Teaching the child games and activities appropriate to her/his age and interests.
- Make effective use of medical services for the child, including:
 - Consulting doctors regarding preventative medicine, and immunizations, etc.
 - Obtaining emergency medical services when necessary.

- Determining the extent of public medical facilities and deciding when it is appropriate to use them.
- Arrange and supervise social experiences for a child which will promote ethical and moral development.
- Identify and select appropriate educational environments, including:
 - Choosing appropriate day care facilities when needed.
 - Choosing appropriate pre-school facilities when needed.
 - Consulting with teachers regarding the child's educational development.
 - Consulting with teachers regarding the child's social/emotional, physical, and cognitive development.
- Identify and provide appropriate clothing for a child at different stages of development (see Home Clothing and Textile Specialist), including:
 - Identifying appropriate clothing for different seasons.
 - Identifying and providing appropriate clothing when moving to different climate.
 - Identifying other factors to consider in clothing selection (growth rate, fabric durability, etc.).
- Evaluate books and movies and determine their suitability for a child.
- Identify resources in the community which can be used to augment school and pre-school activities, including:
 - playground facilities
 - art and craft workshops
 - libraries and museums
 - dance and music programs
 - sports programs
 - youth groups (religious, scouting, etc.)
- Demonstrate skills which help make life interesting to a growing child (e.g., story telling, singing, etc.).
- Identify resources in the community which may be utilized to improve the living conditions for the child, including:
 - Consumer services (such as diaper service, nursemaid service, counseling programs, etc.).
 - Public services (such as: AFDC, Medicaid, food stamps).
 - Direct benefit to the child (such as: diaper service, medicaid, food stamps, Big Brother, etc.).
 - Indirect benefit to the child (such as: counseling services, Parents-without-Partners, etc.)

- Recognize and treat childhood diseases, including:
 - Identifying such diseases and describing their symptoms.
 - Determining what immediate remedy is needed.
 - Determining whether to consult with a doctor.
 - Describing books which are helpful resources in dealing with childhood diseases.
 - Describing emergency procedures for various conditions.
- Describe and recognize the milestones in human development.
- Identify emotional disturbances or learning difficulties in a child which need professional treatment or added attention, and obtain appropriate consultative advice.
- Recognize the nonverbal cues and behaviors which indicate tensions or problems.
- Provide legal, moral and ethical guidance for a child, appropriate to the child's age, including:
 - Familiarizing a child with laws which may affect her/him.
 - Familiarizing a child with codes of moral conduct deemed appropriate by the parent.
 - Devising ways of helping a child to take responsibility for his/her behavior.
 - Devising ways of helping a child to recognize the consequences of alternative behaviors.
 - Devising ways of helping a child to recognize the patterns of behavior, appearance, etc., which are accepted by society and to assist the child in determining personal responses to these patterns (respect for elders, etiquette, social amenities, implicit dress codes, etc.).
 - Determining and describing means of incorporating the interpersonal qualities which I value into the relationship which I have with a child.
 - Devising ways of helping a child to express his/her emotions in acceptable ways.
 - Describing my approach to punishment and reinforcement of a child's behavior and discuss the basis for this approach.
- Describe ways to develop self-sufficiency in a child.

- Demonstrate my understanding of the special needs of a child with a physical or emotional handicap, of a gifted child, of a child in a single parent home, of a child of a highly transient family, etc., including:
 - physical needs
 - emotional needs
 - educational needs
- Identify the special needs of a child who has a sudden change in his or her environment, such as death of a close friend or relative, addition of a new family member (infant or aged), divorce of parents, etc., and develop ways to meet these special needs.

This list is not a complete description of the skills which a home child caretaker may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

HOME DESIGNER AND MAINTAINER

A home designer and maintainer plans and executes home decorating ideas and is responsible for the proper care of the home.

As a home decorator and maintainer, I can:

- Demonstrate my knowledge of the textile aspects of the home (see Home Clothing and Textile Specialist).
- Demonstrate my knowledge of the properties of wood, including:
 - listing the similarities and differences between various kinds of woods and their finishes
 - selecting different kinds and qualities of wood for different purposes
 - identifying different woods and various finishes
 - understanding the need for and methods of refinishing wood products
- Demonstrate my knowledge of the properties of metals, including:
 - identifying different metals
 - selecting different kinds of metal for different purposes
 - understanding the methods for maintaining metal products
- Demonstrate my knowledge of the properties of plastics, including:
 - identifying different plastics
 - selecting different kinds of plastics for different purposes
 - understanding the methods for maintaining plastic products
- Demonstrating my knowledge of the properties of various fabrics (see Home Clothing and Textile Specialist).
- Demonstrate my knowledge and skills in carpentry, including:
 - proper use and maintenance of tools used in carpentry
 - designing carpentry projects
 - executing carpentry projects
 - repairing wood products
- Demonstrate my knowledge and skills in creative home sewing or artwork, including:
 - upholstering
 - designing window treatments

- Demonstrate my knowledge and skills in home maintenance and repair, including:
 - preventing problems in the plumbing, electrical and heating systems in the home.
 - diagnosing problems in the plumbing, electrical and heating systems in the home.
 - correcting problems in the plumbing, electrical and heating systems in the home.
 - managing the overall maintenance of the home, including:
 - assessing what needs to be done.
 - determining the costs and time involved including the consequences of postponing the project.
 - prioritize tasks.
 - determine which tasks I can do.
 - select people to make other repairs
 - explain my legal recourse if repairs are made poorly or improperly.
 - explain my legal recourse if the owner of the dwelling I rent fails to keep the building adequately maintained.
- Demonstrate my knowledge of creating an effective home environment, including:
 - Analyzing the physical elements to be considered in planning and decorating a room (placement of windows, heating system, room dimensions, etc.).
 - Analyzing the non-physical elements to be considered in home design (use by children, aged, or handicapped, cleaning and preservation of decor, flexibility, family values, etc.).
 - Analyzing the resources currently available (existing furniture, carpeting, accessories, etc.).
 - Determining possible changes or additions and the consequences of each.
 - Creating original home designs.
 - Describing ways in which the major design elements (color, light, space) can be used to alter room appearance.

- Selecting and arranging products which reflect the above considerations.
- Identifying aesthetic guidelines for evaluating and formulating design (i.e., balance, proportion, emphasis).
- Research products or materials with which I am unfamiliar.
- Research architectural and/or home furnishing periods of historical or regional interest.
- Manage yard and garden care (see Home Horticulturist).
- Maintain, diagnose problems, and repair motorized equipment (lawn mower, automobile, etc.), or electric appliances (blender, toaster, lamps, etc.).
- Prevent conditions which increase the potential for fire or other hazardous situations (worn wiring, spilled flammable liquids, crowded stairs, etc.).
- Selecting products which will not present hazards.
- Prepare my family to handle various emergencies which may occur (tornado, fire, hurricane, etc.).

This list is not a complete description of the skills which a home designer and maintainer may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

HOME CLOTHING AND TEXTILE SPECIALIST

A home clothing and textile specialist is responsible for planning, providing, and caring for wearing apparel (fabric, fur, jewelry, etc.) and textile products found in the home (curtains, slipcovers, wall hangings, etc.).

As a home clothing and textile specialist, I can:

- Demonstrate knowledge of the properties of various kinds of fabrics and materials used in the home or for wearing apparel by describing:
 - Care and maintenance properties (cleaning, wear, vulnerability to stains or heat, etc.)
 - Pliability and structure
 - Differences in method of production
 - Relative costs
 - Terms used to describe these materials or their properties
- Analyze the wearing apparel needs of people taking into consideration such factors as age, figure, size, budget, kind and level of activities, fashion, and individual differences and interests.
- Demonstrates skills used in producing clothing or home textile products by:
 - Using patterns, according to accepted standards, to make clothing or other home textile products.
 - Making alterations of patterns or merging two or more patterns to make clothing or other home textile products.
 - Creating my own patterns from which to make clothing or other home textile products.
 - Describing proper use and maintenance of tools and equipment used in textile construction (sewing machine, loom, etc.).
 - Describing the process I use to create, design, and implement a textile related idea.
 - Using a variety of different techniques in my specialty (embroidering, leather work, tailoring, spinning, weaving, macrame, knitting, crocheting, upholstering, etc.).

- Showing how different fibers produce different effects.
- Describing ways of determining the kind of results which occur when different techniques, colors and materials are combined.

- Demonstrate skills and knowledge related to maintenance of wearing apparel and home textile products including:
 - Describing proper cleaning or preserving procedures.
 - Describing procedures for altering, mending, and/or remodeling.
 - Describing storage considerations.

- List and explain terms used in my specialty area (warp, skein, bias, flat fell seam, etc.).

- Discuss the history of my specialty and describe how methods and materials have changed.

- Identify the technique, period, and origin of various textile and/or clothing samples.

This list is not a complete description of the skills which a home clothing and textile specialist may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

HOME HORTICULTURIST

A home horticulturist is concerned with the practical aspects of growing (procuring, planting, maintenance, etc.) of trees, fruits, vegetables, flowers, and ornamental plants.

As a home horticulturist, I can:

- Demonstrate my knowledge of the environmental influences which affect plant growth by:
 - Describing the properties of various kinds of soil including:
 - how to test the soil
 - how to change soil properties
 - the kind of plants which need or provide various soil properties
 - how to improve soil drainage or prevent erosion
 - how to get assistance with soil problems
 - how to mix fertilizers appropriately
 - how to prepare compost or alter the soil properties organically
 - how to prepare soil prior to planting
 - how to maintain soil after the growing season - if outdoors
 - how to explain any tools frequently used in soil work
 - Describing methods of providing an optimum environment for the various kinds of plants I grow (moisture in the air, lighting, temperature, etc.).
 - Describing methods of protecting plants from the adverse effects of environmental influences which I can't alter.
- Demonstrate my knowledge of the biological functioning of plants by:
 - Naming all the parts of various kinds of plants and the function they serve for the plant.
 - Describing the process by which a plant gets its nourishment.
 - Describing the process of regeneration for various kinds of plants.
 - Describing the classification system used in ordering plants into groups.
- Demonstrate my knowledge of planting and transplanting procedures by:
 - Identifying the special care to be taken while transporting and transplanting a tree, shrub, or plant.

- Describing the qualities of a plant to be considered prior to purchasing or transplanting.
- Describing the growing season of various plants and how to determine when and where to plant seeds or seedlings.
- Selecting appropriately between the varieties of plants or seeds available to me.
- Demonstrating planting techniques
- Selecting containers appropriate for various types of ornamental and/or indoor plants.
- Demonstrate my knowledge of hazards affecting plants and how to remedy them by:
 - Describing the differences between animals and insects which are harmful to the plants I grow and those which directly or indirectly help the plant I grow (bees and cross pollination, lady bugs which eat aphids which eat leaves, etc.).
 - Detecting and diagnosing plant damage effectively .
 - Preventing damage to plants from insects and animals by using organic and/or inorganic methods.
 - Using various methods of weed control.
 - Describing the cost effectiveness aspects of the various methods of insect and weed control described above.
 - Describing the resources available to me to obtain assistance with these kinds of problems.
 - Using and explaining any tools or materials used in pest or weed control.
- Demonstrate my knowledge of plant maintenance by:
 - Arranging my resources to allow for optimum plant maintenance.
 - Diagnosing a need for a change in maintenance procedures and proceeding to test my diagnosis.
 - Providing the care that various different plants need for optimum growth.
 - Harvesting effectively.
- Demonstrate my knowledge of a particular method or part of a method of growing or caring for plants (organic gardening, creating hybrids, etc.).

- Demonstrate my indepth knowledge of a particular kind of plant and its care.
- Demonstrate knowledge of harvesting vegetables, fruits, and flowers.
- Demonstrate my knowledge of the proper care for plant products (flowers once they have been cut; vegetables once they have been harvested).
- Demonstrate knowledge and techniques of plant pruning:
 - facilitating growth and/or flowering
 - seasonally
 - after transplanting
 - for ornamental effects
- Demonstrate my knowledge and skills as a landscape architect, including:
 - Evaluating and planning growing space based on needs and use
 - Selecting trees, plants, paving, etc., appropriate to the site and use
 - Changing outdoor areas in accordance with changing capabilities for care and maintenance
 - Changing outdoor areas in accordance with changing use
 - Evaluating plants, trees, shrubs, etc., before purchase for their suitability to climate, location, growing conditions, etc.
 - Determining the cost of implementing and maintaining a given landscape plan.

This list is not a complete description of the skills which a home horticulturist may have acquired. The space below is provided for you to list some of the other competencies which you have acquired:

COLLEGES WHICH ARE MEMBERS OF THE
COUNCIL FOR THE ADVANCEMENT OF EXPERIENTIAL LEARNING
(CAEL)

COUNCIL FOR THE ADVANCEMENT OF EXPERIENTIAL LEARNING (CAEL)

Institutional Members

ALABAMA

Birmingham So. College
800 8th Avenue W.
Birmingham, Alabama 35204
(Attention Neal R. Berte, President)

University of Alabama in Birmingham
University Station
Birmingham, Alabama 35294
(Attention John T. Anderson
Director of Special Studies)

University of Alabama
P.O. Drawer CD
University, Alabama 35486
(Attention Bernard Sloan
Dean, New College)

University of South Alabama
Mobile, Alabama 36688
(Attention Howard M. Phillips
Vice President for Academic Affairs)

ARKANSAS

University of Arkansas at Little Rock
Little Rock, Arkansas 72204
(Attention T. Harri Baker
Director, Innovative Programs)

Mississippi County Community College
P.O. Drawer 1109 P
Blytheville, Arkansas 72315
(Attention Larry Carter)

East Arkansas Community College
P.O. Box 1039
Forrest City, Arkansas 72335
(Attention Galen F. McBride
Dean of Academic Affairs)

ARIZONA

UP WITH PEOPLE
3103 N. Campbell Avenue
Tucson, Arizona 85719
(Attention Jackson S. Hipps
Director, Educational Programs)

Northland Pioneer College
 1400 North 8th Avenue
 Holbrook, Arizona 86025
 (Attention Marvin L. Vasher, President)

CALIFORNIA

Los Angeles Community College
 2140 West Olympia Boulevard 310
 Los Angeles, California 90006
 (Attention William G. Thomas
 Chancellor, c/o New Dimensions)

University of California, Los Angeles
 Los Angeles, California 90024
 (Attention Jane S. Permaul
 Dean, Experimental Educational Programs)

California State University, Los Angeles
 5151 State University Drive
 Los Angeles, California 90032
 (Attention Thomas W. Graham
 Dean of Continuing Education and Innovative Programs)

Cerritos Community College
 11110 E. Alondra Boulevard
 Norwalk, California 90650
 (Attention Mrs. Olive P. Scott
 Dean of Academic Affairs)

California State College - Dominguez Hills
 1000 East Victoria Street
 Dominguez, California 90747
 (Attention Barbara Chrispin)

California State University and College
 400 Golden Shore
 Long Beach, California 90802
 (Attention Fred H. Provost
 Dean, New Program Development and Evaluation)

The Consortium of California State University and Colleges
 400 Golden Shore
 Long Beach, California 90802
 (Attention Barrie D. Bortnick
 Coord. Competency Assessment and Evaluation)

California State University, Long Beach
 1250 Bellflower Boulevard
 Long Beach, California 90840
 (Attention Richard H. Wilde
 Asc Vice President/Academic Affairs)

La Verne College
 1950 Third Street
 La Verne, California 91750
 (Attention Wayne L. Miller
 Dean, Undergraduate Sector)

University of California
 San Diego
 LaJolla, California 92093
 (Attention Cory Carlson
 Earl Warren College
 U-022)

National University
 4141 Camino del Rio S.
 San Diego, California 92108
 (Attention Robert C. White
 Assistant to the President)

Whitehead College of the University of Redlands
 1200 E. Colton Avenue
 Redlands, California 92375
 (Attention Gordon Charles Atkins
 Provost)

Orange Coast College
 2701 Fairview Road
 Costa Mesa, California 92626
 (Attention J. E. Garmon
 Associate Dean, Director, Career Center)

Coastline Community College
 7112 McFadden Avenue
 Huntington Beach, California 92647
 (Attention Bernard J. Luskin)

Golden West College
 15744 Golden West Street
 Huntington Beach, California 92647
 (Attention Donald L. Randol
 Registrar)

Chapman College
 333 N. Glassell
 Orange, California 92666
 (Attention Bert C. Williams
 Dean, Undergraduate Studies)

Santa Ana College
 17th Street at Bristol
 Santa Ana, California 92706
 (Attention Richard J. Sneed
 Vice President, Academic Affairs)

The Fielding Institute
 226 East De La Guerra
 Santa Barbara, California 93101
 (Attention Frederic M. Hudson, President)

California State College, Bakersfield
 Bakersfield, California 93309
 (Attention Thomas M. Watts
 Dean, Behavioral Sciences)

City College of San Francisco
 50 Phelan Avenue
 San Francisco, California 94112
 (Attention Warren R. White
 Dean, Evening Division and Summer Session)

University of San Francisco
 2130 Fulton Street
 San Francisco, California 94117
 (Attention Michael M. Howe
 Director, Continuing Education)

San Francisco State University
 1600 Holloway Avenue
 San Francisco, California 94132
 (Attention Urban G. Whitaker
 Dean, All-University Programs)

University of California, Berkeley
 2536 Channing Way
 Berkeley, California 94270
 (Attention Barbara Graves
 Administrator, Field Studies Program)

St. Mary's College
 P.O. Box 397
 Moraga, California 94575
 (Attention Nancy Dyar
 Director, Office of External Degree Program)

Peralta C for Non-Traditional Study
 2020 Milvia Street, Suite 200
 Berkeley, California 94709
 (Attention Nancy Tappey, President)

University of California, Santa Cruz
 292 Central Services Building
 Santa Cruz, California 95064
 (Attention Eugene H. Cota-Robles
 Academic Vice Chancellor)

Raymond College/University of the Pacific
 Stockton, California 95211
 (Attention Andy F. Key
 Director, U. W. W.)

Humboldt State University
 Arcata, California 95521
 (Attention Janice Erskine
 Division of Interdisciplinary Studies)

California Community Colleges
 1238 S Street
 Sacramento, California 95814
 (Attention Harry Sherer
 Specialist, Academic Affairs)

COLORADO

Arapahoe Community College
 5900 S. Santa Fe Drive
 Littleton, Colorado 80120
 (Attention Jeanette M. Dunn
 Assistant to the President)

Metropolitan State College
 250 West 14th Avenue
 Denver, Colorado 80204
 (Attention Catherine M. Warrick
 Dean)

Community College of Denver
 12600 W. 6th Avenue
 Golden, Colorado 80401
 (Attention William M. Boast
 Dean of General Studies Red Rocks Campus)

University of N. Colorado
 Faculty Apartments Unit 1
 Greeley, Colorado 80630
 (Attention Richard J. Wood
 Associate Director, The Center for Non-Traditional and
 Outreach Education)

CONNECTICUT

University of Hartford
 200 Bloomfield Avenue
 West Hartford, Connecticut 06117
 (Attention Bruce W. Jorgensen
 Director of Special Programs College of Arts and Science)

The Hartford Graduate Center
 275 Windsor Street
 Hartford, Connecticut 06120
 (Attention Judd N. Adams
 Instructional Design Specialist)

Eastern Connecticut State College
 Student Center
 Willimantic, Connecticut 06226
 (Attention Betty R. Tipton
 Associate Dean)

Sacred Heart University
 P.O. Box 6460
 Bridgeport, Connecticut 06606
 (Attention Charles E. Ford
 Academic V.P. and Dean)

DISTRICT OF COLUMBIA

Washington International College
 1239 G Street, N. W.
 Washington, D. C. 20005
 (Attention Deborah Bender
 Director, Admissions and Records)

Campus-Free College
 1239 G Street, N. W.
 Washington, D. C. 20005
 (Attention Mark I. Cheren
 Coordinator for Program Advisor Affairs)

Center for Human Services
 5530 Wisconsin Avenue, N. W.
 Washington, D. C. 20015
 (Attention Hyman H. Frankel, President)

University of D. C./Mt. Vernon Campus

 Washington, D. C. 20015
 (Attention Jeanne Evans Lea
 Acting Dean, School of Continuing Education)

The American University
 308 Asbury Building
 Washington, D. C. 20016
 (Attention Lenore Saltman
 Program Development Specialist)

Trinity College
 Michigan and Franklyn Avenue
 Washington, D. C. 20017
 (Attention Claire McCormick
 Assistant to Academic Dean/Research and Development)

DELAWARE

Delaware Technical and Community College
 P.O. Box 897
 Dover, Delaware 19901
 (Attention William C. Pfeifer)

FLORIDA

Florida Department of Education
 Tallahassee, Florida 32304
 (Attention Myron R. Blee)

Valencia Community College
 P.O. Box 3028
 Orlando, Florida 32802
 (Attention Gloria Raines
 Vice President for Academic Affairs)

Florida Southern College
 8578 Avenue C
 Orlando, Florida 32809
 (Attention Robert Hedrick
 Director McCoy Program)

Brevard Community College
 1519 Clearlake Road
 Cocoa, Florida 32922
 (Attention Raymond J. Kosiba
 Dean, Provost Cocoa Campus)

Miami-Dade College
 11011 S. W. 104th Street
 Miami, Florida 33176
 (Attention J. Terence Kelly
 College Director Occ. Ed.)

Florida International University
 Miami, Florida 33199
 (Attention Issac Palmore)

Broward Community College
 225 East Las Olas Boulevard
 Fort Lauderdale, Florida 33301
 (Attention Willis Holcombe
 Assistant to the President)

Nova University
 3301 College Avenue
 Fort Lauderdale, Florida 33314
 (Attention Deborah B. Glass
 Director)

Hillsborough Community College
 P.O. Box 22127
 Tampa, Florida 33622
 (Attention Rene E. Villa)

University of South Florida
 Tampa, Florida 33620
 (Attention D. Keith Lupton
 Director)

Eckerd College
 P.O. Box 12560
 St. Petersburg, Florida 33733
 (Attention Clark H. Bouwman)

GEORGIA

Atlanta Junior College
 1630 Stewart Avenue, S. W.
 Atlanta, Georgia 30310
 (Attention Christine W. Unger
 Chairperson, Humanities Division)

Clayton Junior College
 P.O. Box 285
 Morrow, Georgia 30260
 (Attention Billy R. Nail
 Dean of the College)

HAWAII

Leeward Community College
 96-045 Ala Ike
 Pearl City, Hawaii 96782
 (Attention Joanne Louise Pertz
 Stud Rec Evaluation Specialist)

IOWA

Iowa Lake Community College
 100 1/2 North 6th Street
 Esterville, Iowa 51334
 (Attention Gene Schorzmann
 Assistant Superintendent of Instruction)

Loras College
 Dubuque, Iowa 52001
 (Attention John E. Hess
 Director of Community Education)

Drake University
 2700 University Avenue
 Des Moines, Iowa 50311
 (Attention Charles Z. Roetpger
 Assistant Dean, Continuing Education)

American College Testing Program
 P.O. Box 168
 Iowa City, Iowa 52240
 (Attention Aubrey Forrest
 Director, Instructional Design and Assmt.)

St. Ambrose College

 Nazareth, Michigan 49074
 (Attention Mary Reichling
 Coordinator for Academic Advising)

Siena Heights College
 1247 East Siena Heights Dr.
 Adrian, Michigan 49221
 (Attention Peter L. Bouvier
 Director, General Studies Division)

Ferris State College School of Allied Health
 Swan 105
 Big Rapids, Michigan 49307
 (Attention Jeffrey F. Cross
 Coordinator of External Degree Programs)

MINNESOTA

Metropolitan Consortium for Competence Based Education
 Inver Hill Community College
 St. Paul, Minnesota
 (Attention E. Sharon Hayenga
 Director of Competence Based Education/External Degree Program)

Metropolitan State University
 Suite 1190
 Metro Square
 7th and Roberts Streets
 St. Paul, Minnesota 55101
 (Attention George Ayers
 Vice President for Academic Affairs)

University of Minnesota
 105 Walter Library
 Minneapolis, Minnesota 55455
 (Attention Barbara Knudson
 Dean, University College)

Winona State University
 Winona, Minnesota 55987
 (Attention Pauline Connel
 Project Director)

St. Mary's College
 Winona, Minnesota 55987
 (Attention Brother Leonard Courtney
 Professor of Education)

St. Cloud State University
 St. Cloud, Minnesota 56301
 (Attention Lowell Gillett
 Acting Vice President for Academic Affairs)

College of St. Benedict
 St. Joseph, Minnesota 56374
 (Attention Sister Emmanuel Renner
 Dean, Continuing Education)

MISSOURI

Webster College
 St. Louis, Missouri 63119
 (Attention Barbara Ann Barbato
 Director of Contract Center)

Park College
 2420 Pershing Road, G-10
 Kansas City, Missouri 64050
 (Attention Barbara J. Higdon
 Dean, School for Com. Education)

Pioneer Community College
 560 Westport Road
 Kansas City, Missouri 64111
 (Attention Queen F. Randall
 Dean of Instructional Systems)

Ottawa University
 605 W. 47th Street, Suite 317
 Kansas City, Missouri 64112
 (Attention Keith Shumway
 Dean of Non-Traditional Studies)

Columbia College
 8th and Rogers
 Columbia, Missouri 65201
 (Attention Benelle E. Reeble
 Associate Dean and Registrar)

Stephens College
 Columbia, Missouri 65201
 (Attention James Waddell
 Associate Dean of the Faculty Dir.,
 University Without Walls)

University of Missouri
 429 Clark Hall
 Columbia, Missouri 65201
 (Attention Lynn W. Martin
 Director, Intercampus Instruction)

MONTANA

Montana State University
 Bozeman, Montana 59715
 (Attention Irving E. Dayton
 Vice President for Academic Affairs)

University of Montana
 Main Hall 107
 Missoula, Montana 59812
 (Attention James Hall
 Dean, Center for Continuing Education)

NORTH CAROLINA

University of North Carolina at Chapel Hill
 121. Abernethy Hall 002A
 Chapel Hill, North Carolina 27514
 (Attention Norman Howard Loewenthal
 Program Coord. for Independent Study)

Saint Augustine's College
 1315 Oakwood Avenue
 Raleigh, North Carolina 27611
 (Attention Thelma Roundtree
 Vice President for Academic Affairs)

Shaw University
 118 E. South Street
 Raleigh, North Carolina 27611
 (Attention McLouis Clayton
 Director, Center for Alternative Programs of Education)

Appalachian State University
 413 E. Howard Street
 Boone, North Carolina 28608
 (Attention James W. Jackson
 Dean, Contg Ed, Ed Innovation & Cha.)

Mars Hill College
 POB 539
 Mars Hill, North Carolina 28754
 (Attention Glenn C. Trantham
 Director of Experiential Education)

NORTH DAKOTA

Mary College
 Apple Creek Road
 Bismarck, North Dakota 58501
 (Attention Thomas P. Johnson
 Vice President, Academic Affairs)

NEBRASKA

Central Technical Community College
 P.O. Box 1024
 Hastings, Nebraska 68901
 (Attention Michael E. Paradise
 Campus President)

NEW HAMPSHIRE

University System of New Hampshire
 Taylor Hall
 Durham, New Hampshire 03824
 (Attention Maurice E. Olivier
 Assistant Dean, School of Continuing Education)

NEW JERSEY

Bloomfield College
 Bloomfield, New Jersey 07003
 (Attention Mary Kay Mulligan
 Director of Academic Advising)

Kean College
 Morris Avenue
 Union, New Jersey 07083
 (Attention Nathan Weiss, President)

Ramapo College of New Jersey
 Mahway, New Jersey 07430
 (Attention Martha Sachs
 Director of Adult Learning)

Bergen Community College
 Paramus, New Jersey 07652
 (Attention S. Charles Irace
 Vice President)

Glassboro State College
 Bole Annex
 Glassboro, New Jersey 08028
 (Attention Donald Pierpont
 Director of Center for Experiential Education)

Stockton State College
 Pomona, New Jersey 08240
 (Attention Dr. Laurence R. Marcus
 Asst. to the Vice President for Academic Affairs)

Educational Testing Service
 Princeton, New Jersey 08541
 (Attention Winton H. Manning
 Vice President, Developmental Programs)

Thomas A. Edison College, Forrestal Center
