ABSTRACT

The CEVAL simulation exercise is appropriate for use in a workshop setting with up to 30 persons. It gives non-administrative groups--school board members, parent advisory councils, teachers, and parents--experience in making evaluative decisions, from the perspective of a school principal evaluating five special programs in an elementary school. The exercise, which can be played in 50 to 90 minutes, is designed to acquaint the player with the frustrations and rewards of evaluation, as well as the educational and political context in which evaluation takes place. This document includes instructions for the workshop trainer and one copy of each of four sets of handouts for the participants: (1) summary of rules and background information about the school and its programs; (2) report from the evaluation consultant describing possible methods of evaluation; (3) assessment selection form, used to determine the amount of time devoted to different evaluation activities; and (4) interdistrict memo, which lists eleven questions asked by parents about the effectiveness of the basic education program. (Author/GDC)

TRAINER'S MANUAL

FOR

CEVAL ELEMENTARY SCHOOL SIMULATION EXERCISE

GENERAL PURPOSE

This exercise is designed for a workshop setting for up to thirty persons. In addition to this Manual, the exercise materials consist of an audiocassette and four sets of hand outs, each printed in a different color. The Summary of Rules and Background Information (blue) and the Report from the Evaluation Consultant (green) are returnable. The Assessment Selection Form (cream) and the Interdistrict Memo (white) are expendable.

This simulation is designed to give non-administrative groups -- school board members, parent advisory councils, teachers, and parents -- experience in making evaluative decisions in the "real world" of the school system. It acquaints the participants with the frustrations and rewards of evaluation, as well as the educational and political context in which most evaluation takes place. It may be played in a 50 minute period or expanded to an hour and a half.

THE CASSETTE INSTRUCTIONS

The instructions for the simulation are presented on an audiocassette tape. The easiest and most effective way for the trainer to gain an understanding of the simulation is to read the script as the cassette is playing and follow the instructions as they are given. The script with ADMINISTRATIVE INSTRUCTIONS is presented below, followed by a series of clarifying questions.

MATERIALS NEEDED -- IN ORDER OF USE

Trainer's Manual
Audiocassette tape
Audiocassette Player

Summary of Rules and Background Information (blue leaflet) 1 per participant, for return

Evaluation Consultant's Letter with Accompanying Report (green leaflet) l per participant, for return

Assessment Selection Form
(white sheet) lor more per table, expendable
Interdistrict Memo from Superintendent
(cream sheet) l per participant, expendable

, GETTING STARTED

Try to avoid the temptation to make everything perfectly clear. All required information is on the tape. It is best not to try and anticipate problems. Briefly explain to the participants that they are about to be involved in a simulation in which they will be asked to develop an evaluation plan for an elementary school. Divide them into working groups of three to five persons, and start the audiocassette player.

TIMING

Below is a suggested schedule for a 50 minute presentation. If you have a longer period of time available, DO NOT increase the amount of time spent in playing the game, but expand the discussion time. If the game playing time is expanded, it loses its sense of urgency.

Minutes	<u>Action</u>
00-05	Arrival, divide into groups and introduction.
05	Turn tape player on for background.
11	Hand out <u>blue</u> Summary leaflet as indicated.
12	Turn off tape player as indicated.
12-15	Participants review Summary Teaflet.
15-16	Turn tape player on for Consultant's Report.
16	- Hand out green Consultant's Report.
16	Turn tape player off as indicated.
16-20	Participants review Consultant's Report.
[•] 20	Turn tape player on for description of problem.
21	Hand out white Assessment Selection Form.
21 .	Turn tape player off as indicated.
21-40	Participants work on problem solving.
41	Turn on tape player for Superintendent's request.
41	Hand out cream interdistrict memo from superintendent
41	Turn tape player off as indicated.
41-45	Participants place checks by questions.
45	Discussion begins.

SCRIPT FOR THE

CEVAL ELEMENTARY SCHOOL SIMULATION EXERCISE

Office noises in background

Telephone rings twice

Office noises fade as conversation begins

SECRETARY:

"Good morning, Ceval Elementary School. May I help you? (slight pause) Yes, Mrs. Jones. No, I'm sorry, the principal's in a meeting. May I leave a message? (listens) You want Tommy taken out of the multigrade (as though writing message) Yes, I'll make sure he gets it. Goodbye."

Thewriter starts again.

Phone rings

SECRETARY:

"Good morning, Ceval Elementary School. Hello, Mildred, how are things in the Superintendent's office? (slight pause) No, he's meeting with the new aides. Yes, I'm sure he knows of the meeting but let me check his calendar. Yes, he's got at. Mr. Wilson at 3:15 at his office. OK. Goodbye."

NARRATOR:

"Ceval Elementary School is located in a small unified school district in California. Assume that your group is the principal of the school. As principal you will be required to plan an evaluation of one or more of the special programs in the school, prepare a report for the board of education using the results of your evaluation, and then discuss the results of the simulation experience with the other participants. All materials presented on this tape will be summarized and handed out later, so you need not take notes.

There are five special programs in the Ceval Elementary School which you may want to evaluate. To give you a feeling for what they are and how they are working, we've gathered significant persons from each of these programs. Here is Ms. Phillips, a teacher from the 4-5-6 multigrade. Ms. Phillips, exactly what is the multigrade?"

MS. PHILLIPS:

"Basically, the multigrade is 90 kids and 3 teachers. Each teacher teaches his or her own specialty to the whole class. In teams of bookkeeping though, each teacher has responsibility for only one-third of the class. All three of us emphasize independent study, creative thinking and individualized instruction."

NARRATOR:

"How is the multigrade working out?"

MS. PHILLIPS:

"Oh, it's working out very well. A few parents have asked that their children be transferred, but that's natural."

NARRATOR:

"Do you think multigrade students work more independently and creatively than students in traditional classes?"

MS. PHILLIPS:

"I think so, I think so."

NARRATOR:

And Mr. Johnson also in the multigrade but responsible for starting the Individually Guided Mathematics Program . . . Mr. Johnson, exactly what is the Individually Guided Mathematics Program?"

MR. JOHNSON:

"Well, it; that's what is -- it's the Individually Guided Mathematics Program. Basically what we do is we give each student a test at the beginning of the year and determine where he or she is and we have them work at their own pace and meet their own goals. It's much better than the old way when we tried to teach all of the students the same concepts at the same time. This program is used only in the multigrade but we think other teachers will be using it soon."

NARRATOR:

"Has it improved your scores in the state test?"

MR. JOHNSON:

"Well, no -- I don't think it has. I'm not really sure but there are other advantages."

NARRATOR

"Like what?'

MR. JOHNSON:

"Students like math a lot better, they're not under so much pressure."

NARRATOR:

"Thank you, Mr. Johnson. And here's Ms. Silver, the Learning Center Coordinator. Ms. Silver, how do you like working in the Learning Center?"

ERIC

MS. SILVER:

"It's just terrific -- just great. I love it."

NARRATOR:

SILVER

"What happens in the Learning Center?"

"Oh, all sorts of things. We have tape recorders and cameras, typewriters, model railroads, rabbits, snakes and lizards. Kids come in to work on their own and in groups. Oh, they just do wonderful things."

NARRATOR;

"Have you experienced any problems with the Learning Center?"

MS. SILVER:

"Oh, some of the teachers feel that there is a lack of discipline and the kids don't work enough, but they're just not used to seeing kids turned on."

NARRATOR:

"And now, our two parents. First Mr. Flynn, one of the prime movers of the Basic Education. Program."

MR. FLYNN:

"I've prepared a statement, so I won't waste any of your time or mine. Time is very valuable, you know, and that's one of the' things we try to teach students in Basic Reading, writing, and Education class. arithmetic are studied to the exclusion of all other subject matter including art, social studies, health and current events. Discipline and formal manners are emphasized. Pupils stand when asking questions and shake hands with the teacher as they enter the All students are expected to do at least one hour of home work each evening. All are enrolled at the parents' request. It's a program a person can be proud of."

NARRATOR:

"Thank you, Mr. Flynn. And Mrs. Cardova, past president of the Parent Advisory Council."

MRS. CARDOVA:

"Yes, my committee helped to get the Hispanic reading materials in the school. Our children were falling way low on the reading scores and their reading books didn't say anything about the Chicano culture. The Hispanic reading materials were developed by Dr. Garcia out at State. They help the students learn how to read and use examples from our culture. Some of the parents in the new council don't like them because they're only mimeographed, and they say the children still aren't learning how to read."

NARRATOR:

"Have the children's scores improved?"

MRS. CARDOVA:

"I'm suré they have."

Hand out blue summary while narrator is talking.

NARRATOR:

"Thank you, Mrs. Cardova. Those are the spectal programs; Basic Education, Multigrade, Hispanic Reading Materials, Learning Center, and Individually Guided Mathematics Program. Spend a few minutes studying the background on the CEVAL School and Community in the blue leaflet, as well as each of the programs as outlined with an eye to making decisions about what should be evaluated."

Bing, pause

Stop tape player

Allow one or two minutes to study programs

Start tape

Hand out green consultant's letter with the available assessment information report while consultant is talking.

Bing, bing, bing, pause

EVALUATION CONSULTANT:

"Yes, it's all in the report. The covering letter explains, what I've done. I didn't come up with an evaluation plan per se. What I've done is to develop a list of tests, interviews, surveys and other assessment activities which you, as principal, might want to undertake. I think each one of the activities would yield useful information. The problem is, of course, that if you tried to do all of the things I have outlined here, you wouldn't have time for anything else. So you've got some decisions to make. I've tried to make them as easy as possible by giving you an estimate of how many hours of your time each activity is likely to take, and preparing data tables which give you an idea of what the completed results will look like.

I hope this report is useful to you. I've enjoyed working at the school."

NARRATOR:

"Spend a few minutes reviewing the Evaluation Consultant's report as it will/serve as the *basis for your evaluation."

Bing, pause

Stop tape player

Start tape player

Bing, bing, bing, pause

NARRATOR:

"Assume that it is the beginning of the school year. You know that it is possible that the Superintendent or the board will ask you to prepare a report on one or all of the programs at any time during the year. You have also decided that you can afford no more than 5% of your time or 135 hours during the year on evaluation. Which of the five programs are you going to evaluate? Are you going to get a little information on each program, or evaluate one very thoroughly? What kind of information are you going to get? Select the assessment information you want by circling the number of hours you want on the white Do not go over 135 hours. You have approximately 20 minutes to make your selection. Do this now."

Bing, pause

Stop tape player

Allow approximately 30 minutes to select assessment instruments

Start tape player, hand out white Assessment Selection Form

Hand out <u>cream</u> superintendent's memo while secretary is talking (see below)

Ring, hing, hing, pause

SECRETARY:

"Hello, Ceval Elementary School. Oh, hello, Mildred. No, he didn't make it to the board meeting last night. Can I take a message? (pause) Basic Education parents were upset. (as though writing message) They want Basic Education in all the schools of the district. I see. The board wants a report on the Ceval experience at Tuesday's meeting. A list of questions? OK, I'll tell him. I'll expect them in the inter-district mail this afternoon. Thanks, Mildred."

NARRATOR:

"You should now have the questions the board wants answered. Assume that you have access to all of the data which you selected with your 135 hours. Place two checks by each question you feel you would be able to answer well, one check by each question you could answer minimally, and a zero by each question which you would not be able to answer at all. Do this now."

Bing

Turn tape player off ..

CLARIFYING QUESTIONS

- Why is it called Ceval?
 Ceval stands for <u>California</u> <u>EVAL</u>uation project.
- 2. How should the participants be divided at the beginning of the simulation?

Before the simulation begins, divide them into groups of threes. If there is one "extra" person, form a four person group. If there are two "extra" persons, form a two person group. Each group should have a table or desk on which to work.

- 3. Should they be given warnings about how much time to use? Yes, give a 6, 5, 2, and 1 minute warning.
- 4. Will they need more instructions than are presented on the tape?

Generally no, but you should be prepared to answer their questions. It is probably best to answer each group's questions individually rather than explain your answer to the entire group.

5. What if they believe 5% of a principal's time is unrealistic?

We have surveyed several hundred principals and when asked how much time they are likely to spend on evaluation, over 75% of the participants answered 5%.

POST-GAME DISCUSSION

It is possible for people to participate in a simulation such as this, believe that it is very valuable and not be able to identify what they learned or why they value it. The purpose of the discussion, and it is the most important part of the experience, is to help the participants articulate the possible learnings which can be gleaned from the simulation. Before moving to an abstract discussion of concepts and ideas, however, it is often necessary to give the participants a chance to express their immediate feelings, frustrations and impressions. One way to allow this to happen is to identify. the highest and lowest scoring group and ask them to describe the strategy they adopted in selecting their assessment instruments. As the two groups report, encourage the others to expand, confirm, agree or disagree with what is being said. Then move from this to a more generalized discussion by asking the participants to answer this question: "Anyone playing this game is likely to come to the following conclusions." You might have to give them a few examples and get them started. Once they begin, encourage them to list as many ideas as possible. The concepts listed below are likely to emerge:

- · A. One should be aware of the relative cost of data.
 - B. One should take advantage of inexpensive data.
 - C. One can learn a great deal about a program without conducting a giant research project.
 - D. It is risky to rely on subjective evaluations.
 - E. It takes time to evaluate.
 - F. There are many different reasons and uses for evaluative data.
 - G. Parents, boards and teachers are all likely to be interested in different aspects of the educational program.
 - H. If one is going to do a better job of evaluating one probably will have to figure out a way toget more time.
 - I. One has to decide how much a good evaluation is worth.
 - J. One can be asked for an evaluation at any time.
 - K. Some programs need to be evaluated more than others.

19

CEVAL ELEMENTARY SCHOOL SIMULATION EXERCISE

SUMMARY OF RULES AND BACKGROUND INFORMATION

\ In this simulation you will be asked to:

- Identify programs to be evaluated in the Ceval Elementary School
- 2. Select the instruments which will give you the information for your evaluation.
- 3. Discuss and analyze your choices.

Description of Ceval Elementary School

AREA: 20% \$36,000 to \$44,000 5% \$55,000 to \$80,000

25% rent or lease

Groups which Influence School Policy:

Strong teachers' group which reviews and comments on all major policy decisions by administration and board.

Active parent advisory council with strong representation from Chicano Community.

A 3-3 conservative liberal split on the board with one member who votes with either group depending on the issue.

A press which features all controversy and considered by some to be hostile to the school and district.

Three or four articulate parents who are not members of any group, but make their influence felt whenever school policy affects their children.

General Mood of Community:

General demand for quality education at reduced cost. State, district and parents insisting on demonstrable achievement.

Results of State Testing Program:

Ceval Elementary School is below the district in mathematics and reading at both the second and sixth grade level.

Special Programs at the Ceval Elementary School:

Two years ago, a variety of programs were incorporated into the school to increase the effectiveness of the teaching process, They include:

Basic Education

At each grade level, there is one basic education class. All pupils are assigned by parent request. Reading, writing, and arithmetic are studied to the exclusion of all other subject matter including art, social studies, health, and current events. Discipline and formal manners are emphasized. Pupils stand when asking questions and shake hands with the teacher as they enter the room. All students are expected to do at least one hour of homework each evening.

Learning Center

The Learning Center is staffed by a full-time teacher who is supposed to work closely with all other members of the staff. The focus of the Center is on individu-

alized instructions and self-directed learning. Pupils work in groups and as individuals on preassigned as well as self-selected projects. The purposes of the Center are to: (a) increase the ability of pupils to begin and complete work independently, (b) to provide learning experiences which would not normally be available in the regular classroom, (c) to increase the pupils' creativity and range of interests and (d) to make it easier for the teacher to assign individual study projects.

Multigrades

There are two multigrade classes. One which combined grades 1 through 3 and the second, grades 4 through 6. The 1-3 class contains 96 students, has 3 teachers and 4 volunteer aides. The 4-6 class has 90 students, 3 teachers and 2 volunteer aides. The purpose of the multigrades are to: (1) allow teachers to specialize in the teaching of subject areas and thus improve the academic excellence of the students, (2) increase the social and intellectual interaction of pupils across age groups, (3) increase the ability of pupils to work independently, (4) increase respect for students of different ages.

• Reading Program for Bilingual Pupils

A special reading program published by Hispanic Press has been instituted at the demand of a small group of Chicano parents. The main purposes are to increase the ability pof bilingual students to read English and to gain an appreciation and awareness of the Chicano culture. All teachers are required to use these materials with the Chicano students in their classrooms.

Individually Guided Mathematics Program

A K-6 individually guided mathematics program built on the developmental concepts of Piaget and designed to improve the mathematical excellence of the pupils. Used only in the multigrades.

Some Reasons for Evaluating the Special Programs:

None of these aforementioned programs have mandatgry evaluation requirements, however, there are good reasons for evaluating each of the special programs.

Learning Center

There is some disenchantment with the Learning Center. Some of the teachers have complained that the pupils which they send to the Center are not well supervised, that there is too much noise, and that the books and equipment are not properly maintained. Other teachers are wondering if the Center is used enough to justify the services of a full-time teacher.

Multigrades

The multigrade has been a controversial program since the beginning. There seems to be no logical reason for the power which the mere mention of the program has to polarize parents and teachers alike. There is likely to be a battle over this program in some form or another sometime in the future.

Reading Program for Bilingual Pupils

The group of Chicano parents who persuaded the board to accept the Hispanic program for the Ceval School has fallen out of favor with the rest of the Chicano community. The group who is now in power controls the Parent Advisory Council and is reviewing all of the work by the former group and may put pressure on the board to abandon the Hispanic reading program. It would be helpful if you and the board have an idea of the effectiveness of the program in order to make a wise decision.

Individually Guided Mathematics Program

Two members of the board are interested in getting individualized learning in math, science and reading established in the entire school and not just mathematics in the multigrades. It would be valuable to know how effective the program is in the event the board calls for a report

Basic Education Program

There is a move by the parents who were instrumental in having the basic education classes put in the school to convert the entire school to a basic education plan. It would be very helpful to know how the basic education pupils compare to other pupils in mathematics, writing and reading as well as in social studies, art, music and physical education in case they are successful in getting the school board to consider their suggestion.

To: Susan Greene, Principal CEVAL ELEMENTARY SCHOOL

Re: Possible evaluation activities

In preparing the enclosed report, I have listed a number of evaluation procedures which would yield useful and interesting data. Realizing that your time is limited, I have estimated the number of administrative hours which each procedure is likely to require.

In addition, I have prepared tables for receiving the data of each evaluative procedure to help you visualize the kind of data each procedure will yield.

I hope this information will be helpful as you develop your evaluation plan for the coming year.

Sincerely,

MARTIN WINSTON, Ph.D. Evaluation Consultant

INTERDISTRICT MEMO

To: Susan Greene, Principal, CEVAL ELEMENTARY SCHOOL

From: Superintendent Hanson

Re: CEVAL EXPERIENCE WITH BASIC EDUCATION

At last night's board meeting, a group of parents headed by Mrs. Baker accused the board of dragging its feet on the question of providing Basic Education classes for all of the schools in the district. In response, the board asked for a report on the Ceval experience for the next board meeting. The question they asked was: What are the advantages and disadvantages of the Basic Education program as experienced by the Ceval Elementary School? I would think if you could answer the questions I have formulated below, that the board would be well satisfied.

- 1. Do the Basic Education students make as much progress in reading as students who are not in Basic Education?
- 2. In Mathematics?
- 3. In Language Skills?
- 4. In Science?
- 5. In Social Studies?
- 6. In Art and Music?
- 7. Do the teachers of the school consider the Basic Education program worthwhile?
- 8. Do the parents?
- 9. Are the Basic Education students as innovative and creative as the other students?
- 10. Are there any motivational problems associated with Basic Education?
- 11. Do Basic Education students have more than their share of discipline problems?

RULES
AND
BACKGROUND INFORMATION

CEVAL ELEMENTARY SCHOOL SIMULATION EXERCISE

SUMMARY OF RULES AND BACKGROUND INFORMATION

In this simulation you will be asked to:

- Identify programs to be evaluated in the Ceval 1. Elementary School
- Select the instruments which will give you the 2. information for your evaluation.
- Discuss and analyze your choices. 3.

Description of Ceval Elementary School

A small unified school district in California LOCATION:

K-6 GRADES:

NUMBER OF

651 **STUDENTS:**

22 Teachers: PERSONNEL:

Volunteer Aides: 9 Administrator: Non-certificated:

33% Spanish speaking, English as a second LANGUAGE:

language

67% English speaking

33% Chicano RACIAL 10% Blacks MAKE-UP:

57% Caucasian

30% below \$20,000 VALUE OF

20% \$21,000 to \$35,000 HOMES IN AREA:

20% \$36,000 to \$44,000 5% \$55,000 to \$80,000

25% rent or lease

Groups which Influence School Policy:

Strong teachers' group which reviews and comments on all major policy decisions by administration and board.

Active parent advisory council with strong representation from Chicano Community.

A 3-3 conservative liberal split on the board with one member who votes with either group depending on the issue.

A press which features all controversy and considered by some to be hostile to the school and district.

Three or four articulate parents who are not members of any group, but make their influence felt whenever school policy affects their children.

General Mood of Community:

General demand for quality education at reduced cost. State, district and parents insisting on demonstrable achievement.

Results of State Testing Program:

Ceval Elementary School is below the district in mathematics and reading at both the second and sixth grade level.

Special Programs at the Ceval Elementary School:

Two years ago, a variety of programs were incorporated into the school to increase the effectiveness of the teaching process. They include:

• Basic Education

At each grade level, there is one basic education class. All pupils are assigned by parent request. Reading, writing, and arithmetic are studied to the exclusion of all other subject matter including art, social studies, health, and current events. Discipline and formal manners are emphasized. Pupils stand when asking questions and shake hands with the teacher as they enter the room. All students are expected to do at least one hour of homework each evening.

• Learning Center

The Learning Center is staffed by a full-time teacher who is supposed to work closely with all other members of the staff. The focus of the Center is on individu-

alized instructions and self-directed learning. Pupils work in groups and as individuals on preassigned as well as self-selected projects. The purposes of the Center are to: (a) increase the ability of pupils to begin and complete work independently, (b) to provide learning experiences which would not normally be available in the regular classroom, (c) to increase the pupils' creativity and range of interests and (d) to make it easier for the teacher to assign individual study projects.

Multigrades

There are two multigrade classes. One which combined grades 1 through 3 and the second, grades 4 through 6. The 1-3 class contains 96 students, has 3 teachers and 4 volunteer aides. The 4-6 class has 90 students, 3 teachers and 2 volunteer aides. The purpose of the multigrades are to: (1) allow teachers to specialize in the teaching of subject areas and thus improve the academic excellence of the students; (2) increase the social and intellectual interaction of pupils across age groups, (3) increase the ability of pupils to work independently, (4) increase respect for students of different ages.

Reading Program for Bilingual Pupils,

A special reading program published by Hispanic Press has been instituted at the demand of a small group of Chicano parents. The main purposes are to increase the ability of bilingual students to read English and to gain an appreciation and awareness of the Chicano culture. All teachers are required to use these materials with the Chicano students in their classrooms.

Individually Guided Mathematics Program

A K-6 individually guided mathematics program built on the developmental concepts of Piaget and designed to improve the mathematical excellence of the pupils. Used only in the multigrades.

Some Reasons for Evaluating the Special Programs:

None of these aforementioned programs have mandatory evaluation requirements, however, there are good reasons for evaluating each of the special programs.

Learning Center

There is some disenchantment with the Learning Center. Some of the teachers have complained that the pupils which they send to the Center are not well supervised, that there is too much noise, and that the books and equipment are not properly maintained. Other teachers are wondering if the Center is used enough to justify the services of a full-time teacher.

Multigrades

The multigrade has been a controversial program since the beginning. There seems to be no logical reason for the power which the mere mention of the program has to polarize parents and teachers alike. There is likely to be a battle over this program in some form or another sometime in the future.

Reading Program for Bilingual Pupils

The group of Chicano parents who persuaded the board to accept the Hispanic program for the Ceval School has fallen out of favor with the rest of the Chicano community. The group who is now in power controls the Parent Advisory Council and is reviewing all of the work by the former group and may put pressure on the board to abandon the Hispanic reading program. It would be helpful if you and the board have an idea of the effectiveness of the program in order to make a wise decision.

Individually Guided Mathematics Program

Two members of the board are interested in getting individualized learning in math, science and reading established in the entire school and not just mathematics in the multigrades. It would be valuable to know how effective the program is in the event the board calls for a report.

Basic Education Program

There is a move by the parents who were instrumental in having the basic education classes put in the school to convert the entire school to a basic education plan. It would be very helpful to know how the basic education pupils compare to other pupils in mathematics, writing and reading as well as in social studies, art, music and physical education in case they are successful in getting the school board to consider their suggestion.

EVALUATION

CONSULTANT'S

REPORT

To: Susan Greene, Principal CEVAL ELEMENTARY SCHOOL

Re: Possible evaluation activities

In preparing the enclosed report, I have listed a number of evaluation procedures which would yield useful and interesting data. Realizing that your time is limited, I have estimated the number of administrative hours which each procedure is likely to require.

In addition, I have prepared tables for receiving the data of each evaluative procedure to help you visualize the kind of data each procedure will yield.

I hope this information will be helpful as you develop your evaluation plan for the coming year.

Sincerely,

MARTIN WINSTON, Ph.D. Evaluation Consultant
