ABSTRACT

Forty-eight administrators and 477 teachers of severely and profoundly retarded students completed questionnaires regarding inservice training priorities. Questionnaire items related to participant biographics, knowledge, and skill produced a list of 24 training priorities, including resources for planning, behavior intervention techniques, medications, individual education plan, sequencing of instruction, diagnostic/prescriptive teaching, and knowledge of specific handicapping conditions. Analysis of the list suggested that curriculum and instruction and behavior management were the top priority broad training areas. (CL)

In the Fall of 1977, teachers and administrators in the developmental centers in New York State were surveyed in order to determine inservice training priorities. Teachers responded to a questionnaire in terms of their own training needs. Administrators responded to the same questionnaire in terms of perceived staff needs.

A system was devised for selecting training priorities which took into account the results from both teachers and administrators. The purpose of the system was to find a commonality among responses for the two groups. The list of training priorities which were identified within each section (i.e., part) of the questionnaire is presented in Figure 1.

2. Behavior Management

METHOD

Instrumentation:

The questionnaires were developed at the Research and Development Complex and consist of 5 parts. Part I contains items which relate to participant biographics. Part II contains 3 open ended questions. The 16 items in Part III relate to knowledge; the 30 items in Part IV to skill. Both Part III and Part IV require the participant to first rank each item in terms of its importance and then to rank it in terms of his knowledge or skill in the area. Part V asks the respondent to rank 11 items in terms of training need. The teacher questionnaire is presented in Appendix A; the Administrator in Appendix B.

Procedure:

The questionnaires were disseminated to teachers and administrators at each of the developmental centers by the Education Director who also collected and returned them to the Research and Development Complex.

Sample:

The sample of participants consisted of 477 teachers and 48 administrators; a response rate of 58% and 94% respectively. Figure 2 presents a breakdown of the sample by developmental center and includes both the potential and actual sample from each center.

Figures 3-11 presents biographic data for the teacher sample. The administrator sample is described in Figures 12-15.

RESULTS

FIGURES 16 - 22

The results are displayed in chart form. Part II is presented first followed by Parts III, IV & V. The latter three parts follow the format of the questionnaire.

Categories	Number of Total Responses	
	Teachers	Administrators
1. Parent Involvement	3	----
2. Establishing a Curriculum. Includes: a.) A.D.L. Activities of Daily Living; i.e., toilet training, feeding, socialization, etc. b.) General Curriculum Needs; i.e., development, basic skills, etc. This relates to NO specific population. For example, curriculum for the blind, deaf, etc.	40	14
3. Interpersonal Skills - teachers relating to other teachers, awareness of staff expertise.	7	1
4. Legal Aspects - State Mandates, etc.	29	2
5. General Knowledge of Specific Handicapping Conditions	22	2
6. Instructional Techniques for Specific Populations - i.e., deaf, profound retardates, blind, etc.	91	2
7. Total Communication. Includes: non verbal communication, use of sign language, Bliss Boards, etc.	15	3
8. Diagnostic and Prescriptive Teaching. Includes: assessment and evaluation of problems, determining I.Q.'s, I.E.P.'s, etc.	27	8
9. Developmental Tasks. Includes: language development and acquisition, perceptual motor development, comparisons between normal and limited development capacities and stages.	26	6
10. Use of Modification Tools and Devices. Includes: use of prosthetics	11	2
11. Classroom Management	8	----
12. Behavior Intervention Techniques. Includes: behavior modification, dealing with emotionally disturbed, aggression, etc.	43	15
13. Resources for Planning. Includes: new curriculums for specific populations; instructional materials for various functional levels; activities, i.e., arts and crafts, especially for severe and profound retardates; ways to motivate unresponsive children and young adults.	133	13
14. Research. Includes: past research done as well as new research in syndromes and methods and techniques.	5	----
15. Other. Includes: a.) Medical - use of medications, i.e., proper dosages, effects, and reactions. b.) Jobs for Clients - sheltered workshops, placement, etc. c.) Physical and Occupational Therapy d.) Funding e.) Neurodevelopmental Therapy	15 1 12 2 ----	2 ---- 2 1 1
16. No Response	158	8
17. None	----	1

Figure 22. Part V: Administrator Results

DISCUSSION

Examination of the results for Part II indicates that the majority of responses to the open ended questions were in the area of Curriculum and Instruction. A majority of the respondents seemed especially interested in 'Resources for Planning'.

Examination of the results for Parts III and IV (Figures 17-20) are not as clear cut. A preliminary perusal indicates that although teachers and administrators considered most items to be of moderate or high importance, administrators tended to rate items higher. In addition, administrators judged teacher's knowledge and skill to be lower than did teachers themselves.

In order to clarify these results and base the training recommendations on a procedure which would take into consideration both importance and knowledge or skill level as reported by teachers and administrators, the procedure presented below was used for items in Part III and IV of the questionnaire. The method weights the high importance and low knowledge (or skill) categories higher than the moderate knowledge (or skill) category. In this way, training priorities emerge in areas considered to be the most important and in which teachers have the least amount of knowledge or skill.

- Procedure:
1. For each group (i.e. teachers and administrators), the items in a given part were first ranked by importance using the percentage of respondents in the high importance category.
 2. Then an item score was devised by summing (a) the percentage in the high importance category, (b) one-half the percentage in the moderate knowledge or skill category, and (c) the percentage in the low knowledge or skill category. For example, Item 1, Figure 17 received a score of $69 + .5(60) + 15 = 114$.
 3. The item scores were ranked from highest to lowest for teachers and again for administrators.
 4. A comparison was made of the top 8 items for both groups (i.e. teachers and administrators). Those items which appeared in the top 8 for both groups were selected as top priority training items.
 5. A comparison was then made of the top 8 items based on the importance rankings (see No. 1 above) for both groups. Those items which were ranked in the top 8 and which had not already been selected on the basis of item scores were added to the list of training priorities.

The rankings for both groups based on (1) importance and (2) knowledge or skill for Parts III and IV of the questionnaire are presented in Figures 23 - 26.

<u>Teachers</u>			<u>Administrators</u>

Figure 26. Part IV: Rank of Items by Item Score.

Examination of the results of Part V (Figures 21 and 22) indicates that none of the items received an overwhelming vote for first place. Therefore, in order to interpret the results meaningfully, the percent of respondents who ranked each item first, second or third was summed. These sums were then ranked. The results of this analysis are presented in Figure 27.

Teachers			Administrators		
Rank	Sum	Item	Rank	Sum	Item
1	50	Establishing a Curriculum	1	67	Diagnostic/Prescriptive Teaching
2	49	Resources for Planning	2	48	Establishing a Curriculum
3	45	Diagnostic/Prescriptive Teaching	3	46	Behavior Intervention Techniques
4	44	Knowledge of Specific Handicapping Conditions	4	42	Knowledge of Specific Handicapping Conditions
5	40	Behavior Intervention Techniques	5	36	Modification Tools
6	35	Neuropsychological Syndromes/Research	6	33	Resources for Planning
7	34	Classroom Management	7	31	Classroom Management
8	31	Modification Tools	8	27	Neuropsychological Syndromes/Research
9	28	Legal Aspects	9	20	Parent Involvement
10	24	Parent Involvement	10	19	Legal Aspects
11	23	Interpersonal Skills	11	14	Interpersonal Skills

Figure 27. Part V: Sum of the Percent Ranking Each Item First, Second or Third.

On the basis of all of the analyses presented above, it is possible to identify areas which have been selected by both teachers and administrators as priority items from each section of the questionnaire. A list of these items was presented in Figure 1 (see page 1). Examination of that figure indicates that two broad training areas were elicited from both teachers and administrators by the needs analysis. These are:

1. Curriculum and Instruction, and
2. Behavior Management.

More specific training priorities within these three categories are presented below. A miscellaneous category containing additional specific training priorities which do not fit into any of the two broad areas but which, nevertheless, should not be overlooked, has also been included.

Category	Part	Item
<i>Curriculum and Instruction</i>		
Resources for Planning	II	13*
	V
Establishing a Curriculum	II	2
	V
Materials	III	6**
Activities	III	7
Individual Education Plan	III	16
Sequencing of Instruction	IV	16
Performance Assessment	IV	14
Developing Program Goals	IV	6
Relate Goals to Objectives	IV	8
Instructional Techniques for		
Specific Populations	II	6
Instructional Techniques	III	11
<i>Behavior Management</i>		
Behavior Management Systems	III	15
Behavior Management	IV	19
Behavior Intervention Techniques	II	12
	V
<i>Miscellaneous</i>		
Medications	III	10
Developmental Tasks	III	3
Specific Handicapping Conditions	III	1
	V
Staff Interaction	IV	30
Awareness of Self and Others	IV	20

*items for Part II refer to categories presented in Figure 16.

**items for Parts III and IV refer to items within the questionnaire.

Figure 28. Summary.

It is interesting to note the following items are among those which do not appear to be in much demand by teachers or administrators.

Part III	Item 14	career education (i.e., work experiences and placement)
Part III	Item 4	state and federal mandates such as due process, PL 93-380, PL 94-142
Part III	Item 12	classroom research
Part III	Item 8	philosophical or theoretical basis of instruction
Part IV	Item 2	use test results to determine abilities, disabilities, learning style, and operational style
Part IV	Item 3	use test results to help determine realistic expectations
Part IV	Item 22	maintain and use prosthetic aids in the classroom
Part IV	Item 23	apply the principles of learning and instruction
Part V		parent involvement
Part V		legal aspects
Part V		interpersonal skills

For the most part the item rankings were similar for the two groups. Only two items in Part IV were highly discrepant. Teachers attached less significance than did administrators to Items 24 - develop and maintain a record keeping system, and Item 30 - interact positively with other educational staff. However, administrators thought that Item 30 was so important (it was ranked 1st) that it has been included in the list of training priorities.

APPENDICES

APPENDIX A - TEACHER QUESTIONNAIRE

APPENDIX C - ITEM DESCRIPTORS

APPENDIX A
TEACHER QUESTIONNAIRE

PART I

FACILITY _____

ID _____

1. Present Teaching Situation (Please place the specific number of students in your classes) 1 at
in each of the categories. The same student will be entered at least twice and three times
if he is multiply handicapped.)

Retardation

Other Disabilities

Chronological Age

- ☐ Profound
☐ Severe
☐ Moderate
☐ Mild

- ☐ Visually Impaired
☐ Hearing Impaired
☐ Speech Impaired
☐ Physically Handicapped
☐ Emotionally Disturbed

- ☐ Preschool
☐ School Age Primary (K-3)
☐ School Age Intermediate (4-6)
☐ School Age Junior High (7-9)
☐ School Age Senior High (10-12)
☐ Adult

2. Present Teaching Position

- ☐ Teacher ☐ Teaching Assistant ☐ Para Professional/Aide
☐ Other (Specify _____)

3. ☐ Total Number of Years Teaching
4. ☐ Total Number of Years Teaching in Present Position
5a. ☐ Total Number of Hours in Education or Teacher Preparation Courses
5b. ☐ Total Number of These Directly Related to Special Education
6. ☐ Highest Degree Attained
7. ☐ Sex
8. ☐ Age

PART II

1. I need information on the following specific topics:
2. I need to know how to use instructional materials in the following areas:
(Indicate content, handicaps, and levels.):
3. I need the following specific training:

PART III

Directions: Listed below are areas related to the provision of instruction for handicapped learners. First, indicate the importance of each area by circling 1 if the area is very important, 2 if the area is moderately important, and 3 if the area is not important. Circle 4 if you have no opinion. Second, indicate your knowledge in each area by circling 1 if your knowledge is high, 2 if your knowledge is adequate, and 3 if you feel a need for additional training. Circle 4 if you have no opinion.

I FEEL THAT I HAVE ADEQUATE KNOWLEDGE ABOUT:

		HIGH		LOW		NO
						OPINION
		1	2	3	4

PART IV

Directions: Listed below are skills related to the provision of instruction for handicapped learners.

I FEEL THAT MY STAFF HAS AN ADEQUATE WORKING KNOWLEDGE OF HOW TO:

		NO			
		HIGH		LOW	OPINION
1.	interpret the results of diagnostic evaluation	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
2.	use test results to determine abilities, disabilities, learning style, and motivational style	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
3.	use test results to help determine realistic expectations	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
4.	assess the education related performance of my students	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
5.	use assessment results to develop educational prescriptions	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
6.	develop program goals	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
7.	develop instructional objectives	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
8.	relate program goals to instructional objectives	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
9.	task-analyze behavior	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
10.	match instructional materials to instructional objectives	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
11.	use alternative instructional materials	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
12.	construct appropriate instructional materials	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
13.	match instructional activities to instructional objectives	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
14.	assess the performance of students	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
15.	prioritize areas of instruction	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
16.	determine appropriate sequencing of instruction	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
17.	determine the appropriate instructional mode (i.e. teaching technique)	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
18.	alter the learning environment to accommodate student differences	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
19.	manage behavior in the classroom	Importance 1	2	3	4
	Staff Skill 1	2	3	4	
20.	apply the principles of behavior modification	Importance 1	2	3	4
	Staff Skill 1	2	3	4	

PART IV (con't)

		HIGH		LOW OPINION	
		1	2	3	4
21.	apply the principles of human growth and development in planning instruction	Importance 1	2	3	4
		Staff Skill 1	2	3	4
22.	maintain and use prosthetic aids in the classroom	Importance 1	2	3	4
		Staff Skill 1	2	3	4
23.	apply the principles of learning and instruction	Importance 1	2	3	4
		Staff Skill 1	2	3	4
24.	develop and maintain a record keeping system	Importance 1	2	3	4
		Staff Skill 1	2	3	4
25.	maintain lines of communication with interdisciplinary team members for information sharing and feedback	Importance 1	2	3	4
		Staff Skill 1	2	3	4
26.	communicate with parents or parent surrogates regarding the development of their child's educational program	Importance 1	2	3	4
		Staff Skill 1	2	3	4
27.	train parents or parent surrogates to work with their handicapped child	Importance 1	2	3	4
		Staff Skill 1	2	3	4
28.	provide support to parents	Importance 1	2	3	4
		Staff Skill 1	2	3	4
29.	help students develop an awareness and understanding of themselves and others	Importance 1	2	3	4
		Staff Skill 1	2	3	4
30.	interact positively with other educational staff	Importance 1	2	3	4
		Staff Skill 1	2	3	4

PART V

Directions Rank the items below in terms of your training needs. Place a "1" in front of the item which is most needed, a "2" in front of the item which is second most needed, a "3" in front of the third most needed item, and so on. Please rank all the items.

- ___ Parent Involvement
- ___ Establishing a Curriculum
- ___ Interpersonal Skills
- ___ Legal Aspects
- ___ Knowledge of Specific Handicapping Conditions
- ___ Diagnostic/Prescriptive Teaching
- ___ Neuropsychological Syndromes/Research
- ___ The Use of Modification Tools such as prosthetic aids
- ___ Classroom Management
- ___ Behavior Intervention Techniques
- ___ Resources for Planning (e.g. suggestions for activities and materials)

APPENDIX C
ITEM DESCRIPTORS

ITEM DESCRIPTORS

Part III.

1. specific handicapping conditions

2. modification tools such as prosthetic aids

3. developmental tasks or abilities at the infancy and early childhood level

4. state and federal mandates such as due process, PL 93-380, PL 94-142

5. local, state, and national resources, funding, and services

6. available relevant materials which are effective

7. a range of activities appropriate for my students

8. philosophical or theoretical basis of instruction

9. the areas of expertise possessed by interdisciplinary team members

10. medications: types, uses, and side effects

11. effective instructional techniques and procedures

12. classroom research

13. evaluation instruments and techniques

14. career education (i.e., work experiences and placement)

15. behavior management systems

16. Individual Education Plan

Part IV

1. interpret the results of diagnostic evaluation

2. use test results to determine abilities, disabilities, learning style, and operational style

3. use test results to help determine realistic expectations

4. assess the education related performance of my students

5. use assessment results to develop educational prescriptions

6. develop program goals

7. develop instructional objectives

8. relate program goals to instructional objectives

9. task analyze behavior

10. match instructional materials to instructional objectives

11. use alternative instructional materials

12. construct appropriate instructional materials

13. match instructional activities to instructional objectives

14. assess the performance of students

15. prioritize areas of instruction

16. determine appropriate sequencing of instruction

17. determine the appropriate instructional mode (i.e., teaching technique)

18. alter the learning environment to accommodate student differences

19. manage behavior in the classroom

20. apply the principles of behavior modification

21. apply the principles of human growth and development in planning instruction

22. maintain and use prosthetic aids in the classroom

23. apply the principles of learning and instruction

24. develop and maintain a record keeping system

25. maintain lines of communication with interdisciplinary team members for information sharing and feedback

26. communicate with parents or parent surrogates regarding the development of their child's educational program

27. train parents or parent surrogates to work with their handicapped child

28. provide support to parents

29. help students develop an awareness and understanding of themselves and others

30. interact positively with other educational staff
