ABSTRACT

The document presents multiple-choice exercises designed by the National Assessment of Educational Progress (NAEP) to measure the ability of students (ages 9 through 17) to recognize and describe various works of art. The objective is to provide classroom teachers easy access to released and tested art assessment materials. For each exercise, information is presented on objectives, time required, administration, photographic and source information, and age groups for which the exercise is most appropriate. Exercises and documentation are in loose leaf format to facilitate scrting and copying. Most exercises involve photographs of art works. The document is presented in three major sections. Section I reviews assessment procedures upon which the exercises are based and explains documentation which accompanies the exercises. Section II presents objectives used to develop the exercises (including that students should know about art and perceive and respond to various aspects of art), describes the content range of the exercises, and offers a directory of exercises. The final section, which comprises the bulk of the document, presents approximately 100 multiple-choice exercises. Students are directed to view photographs of art works and answer questions concerning major themes, quality, color intensity, and the importance of art to the human experience. (DB)

Reproductions supplied by EDPS are the best that lan be made from the original document.

The National Assessment of Educational Progress is funded by the National Institute of Education. It is under contract with the Education Commission of the States. It is the policy of the Education Commission of the States to take affirmative action to prevent discrimination in its policies, programs and employment practices.

ISBN 0-89398-011-0

The National Assessment of Educational Progress is an education research project mandated by Congress to collect and report data, over time, on the performance of young Americans in various learning areas. National Assessment makes available information on assessment procedures and materials to state and local education agencies and others.

The work upon which this publication is based was performed pursuant to Contract No. OEC-0-74-0506 of the National Center for Education Statistics and the National Institute of Education; also, Grant No. NIE-G-80-0003 of the National Institute of Education.

Documentation	11

INTRODUCTION

The purpose of this exercise set is to provide easy access to released exercises administered in the second National Assessment of Educational Progress (NAEP) art assessment, conducted in 1978-79. After each assessment, some of the exercises are kept confidential and used in subsequent assessments. The other exercises are released for use by interested educators.

Exercises and documentation are in loose-leaf format to facilitate the sorting and copying of exercise text. Exercises that do not involve photographs of artworks are in the public domain and may be used without restriction. Most of the art exercises, however, contain photographs of artworks. These artworks are not in the public domain; persons wishing to reproduce and use such photographs must obtain permission from the sources given in the exercise documentation.

This set contains a copy of each art released multiple-choice exercise. Documentation for each exercise includes basic reference numbers, exercise objective and subobjective classifications, total exercise times, administration, photographic and source information. Achievement data from the most current assessment, data on changes in performance from the previous assessment and information on exercises requiring written or drawn responses are not included here; they will be published in later reports. Detailed information about objectives is found in the art objectives booklet (Art Objectives, 1971), which is included with this loose-leaf set. Information about exercise development, administration, sampling and other procedures will be documented in the Procedural Handbook: 1978-79 Art Assessment (forthcoming).

Part 1 of this released exercise set briefly explains NAEP's assessment procedures and describes the documentation provided for the exercises. Part 2 includes the objectives and subobjectives used to develop and report the art exercises, a brief description of the content range of the affective exercises and a list of released exercises with timing information. Part 3 contains copies of all the released multiple-choice exercises and the related documentation.

Exhibit 1 shows the number of released art cognitive, affective and background exercises administered to various age groups.

PART 1

NATIONAL ASSESSMENT PROCEDURES AND EXERCISE DOCUMENTATION

The exercises in this set were administered to three different age groups of students -- 9-year-olds, 13-year-olds and 17-year-olds attending school. Most exercises were administered in booklets (packages) containing 30 to 35 exercises. Exercise packages were accompanied by paced audiotapes. The announcer read aloud the text and response options for each exercise and told respondents when to go on to the next exercise. The total administration time for each package, including introduction, sample exercise and background questions, was about 45 minutes.

Age groups and their assessment dates were as follows:

Age Groups	Birthdates	Assessed During
9-year-olds 13-year-olds 17-year-olds	January to December 1969 January to December 1965 October 1961 to September 1962	January to February 1979 October to December 1978 March to May 1979

Each package of exercises was administered to a national sample of between 2,600 and 2,700 students; no student took more than one package. About 90% of the exercises were multiple-choice, with a machine-scorable oval to the left of each response choice. The remainder of the exercises were open-ended and required the respondent to make a drawing or write a short essay. This exercise set contains only the released multiple-choice exercises. Copies of the open-ended exercises, associated scoring guides used to categorize students' responses and data for these items will be available at a later time.

Each exercise is reproduced essentially as it was seen by the respondent. The oval for the correct answer to cognitive items has been darkened. Some exercises required three booklet pages. So that students could see the entire exercise at once, pages were designed to fold out; these items are designated by a page labelled "FOLDOUT." Each exercise is followed by a documentation page containing information about exercise administration. This information is described in Exhibit 2, using as a sample the documentation for Exercise R102024-62A-23.

During some years National Assessment has administered exercises to supplementary samples of 17-year-olds who were not in school. However, during the 1978-79 assessment, only 17-year-olds enrolled in school were sampled.

EXHIBIT 2. Sample Documentation Page

- A. NAEP NO.: R-10 2024-62A-23
- B. Objective: Perceive and Respond to Aspects of Art

Aspects of art are defined as: sensory qualities of color, line, shape and texture; compositional elements such as structure, space, design, balance, movement, placement, closure, contrast and pattern; expressive qualities such as mood, feeling and emotion; subject matter, including (1) objects, themes (the general subject of a work, i.e., landscape of battle scene), events and ideas (general presymbolic meanings) and (2) symbols and allegories; and expressive content, which is a unique fusion of the foregoing aspects.

Subobjective: Go beyond the recognition of subject matter to the perception and description of formal qualities and expressive content (the combined effect of the subject matter and the specific visual form that characterizes a particular work of art).

- C. Exercise Type: Multiple-Choice

Explanation of Documentation Page

A. Exercise Number

The exercise number contains up to 15 characters beginning with the letter R or U. The first letter indicates whether the exercise is released (R) or unreleased (U). All exercises in this set are released and hence have an R in the left-most position.

The six-character number following the released/unreleased designation is a unique item identification number used by National Assessment to reference data and documentation for each exercise. The first character in the number indicates the major objective that the item is designed to measure: "1" = Objective I, "2" = Objective II, and so forth. The third character in this number indicates the subobjective being measured under the major objective: "1" = Subobjective A, "2" = Subobjective B, and so on. The fifth and sixth characters are unique numbers given to each exercise.

The next set of three characters indicates when and how many times the exercise was administered. The first character in this set—indicates the first assessment year that the exercise was administered; in this case, the "6" means the 6th assessment year of National Assessment, which was 1974-75. The second character indicates the number of assessments in which the item has been used; in this case, the item has appeared in two assessments. The third character gives the latest assessment in which the exercise was used. The "A" in this case indicates the 10th assessment year, which was 1978-79. All of the released exercises in this set were administered in both 1974-75 and 1978-79; thus, all have "62A" designations.

The final set of characters indicates the age levels to which the exercise was administered. The following code is used: "1" = age 9; "2" = age 13; "3" = age 17; "12" = ages 9 and 13; "23" = ages 13 and 17; "123" = ages 9, 13 and 17. Thus, the "23" in the example means the item was answered by 13- and 17-year-olds.

B. Objective, Subobjective

These are statements of the objective and subobjective that the item is designed to measure. See Art Objectives (1971) or Part 2 of this released exercise set for a complete listing of the art objectives. Two exercises in this set are not referenced to any objective. These exercises are ROO0001-62A-3 and ROO0002-62A-2. Both of these exercises ask students for background information concerning art activities.

C. Exercise Type

This line indicates whether the exercise is a drawing exercise, a short-answer exercise or a multiple-choice exercise; in this exercise set,

3

only multiple-choice exercises are included.

D. Age Difference (not shown in Ewhibit 2)

On some exercises measuring Objective II, 13- and 17-year-olds were given five response alternatives (e.g., strongly agree, agree, undecided, disagree, strongly disagree; definitely yes, yes, undecided, no, definitely no), while 9-year-olds responded to only the center three alternatives (e.g., agree, undecided, disagree; yes, undecided, no). These exercises are indicated by a line titled "Age Difference."

E. Overlap and 1978-79 Package-Exercise

The overlap line shows the age group(s) to which the exercise was administered. In this case, the exercise was administered to 13- and 17-year-olds. The "1978-79 Package-Exercise" line indicates the item booklet (package) number and the number of the exercise in the booklet for the 1978-79 assessment. In this case, the exercise was the 10th exercise in booklet 13 for both ages 13 and 17.

F. Total Time in Seconds

The total time in seconds allowed for the administration of the exercise is given for each applicable age level. This time includes the time allotted for the paced audiotape to read the stimulus and response options and the time allowed for students to respond to the item. In this case, 57 and 58 total seconds were allowed at ages 13 and 17, respectively. Exercise times for the same exercise may vary across ages both because different ages may require different amounts of time and because tapes for each age group were recorded separately, which may introduce small variations.

G. Source Information

The source information gives the source of any copyrighted materials used in the exercise. The sources are referenced to the stimulus or response options as appropriate. Persons wishing to use exercises containing copyrighted materials must contact the appropriate sources for permission since National Assessment's permission applies only to National Assessment's use.

H. Administration Notes (not shown in Exhibit 2)

Occasionally, statements were read by the announcer that were not included in the exercise text. Such statements are described in the administration notes. For instance, when a number of questions with "yes," "no," "I don't know" response options appear on the same page, the announcer informed

4

the students that "yes," "no" and "I don't know" would not be read aloud for each question. These statements were included in the total time allowed for an exercise.

WORK CITED

Art Objectives, 1974-75 Assessment. Denver, Colo.: National Assessment of Educational Progress, Education Commission of the States, 1971. ERIC no. ED 051 255. ISBN 0-89398-001-3.

PART 2

THE ART OBJECTIVES

The objectives for National Assessment's 1978-79 art assessment are identical to the objectives for the 1974-75 assessment. Some revisions to the objectives were thought to be desirable by National Assessment's art consultants; however, restricted funding and lack of developmental time made revision impractical. The art objectives and subobjectives are listed below. The art objectives booklet (Art Objectives, 1971) presents examples of specific behaviors that might be expected of each age group with respect to these objectives. Objectives I, IV and V involve cognitive measures; Objective II involves affective measures, and Objective III deals with producing art.

The number of released exercises in this set designed to measure each objective and subobjective appears in parentheses to the left of the particular objective and subobjective. Objective III involves the production of art and does not include any multiple-choice items; therefore, no exercises measuring this objective are included in this released exercise set.

Art Objectives

(5) I. Perceive and Respond to Aspects of Art

Aspects of art are defined as: sensory qualities of color, line, shape and texture; compositional elements such as structure, space, design, balance, movement, placement, closure, contrast and pattern; expressive qualities such as mood, feeling and emotion; subject matter, including (1) objects, themes (the general subject of a work, i.e., landscape or battle scene), events and ideas (general presymbolic meanings) and (2) symbols and allegories; and expressive content, which is a unique fusion of the foregoing aspects.

- (2) A. Recognize and describe the subject-matter elements of works of art
- (3) B. Go beyond the recognition of subject-matter to the perception and description of formal qualities and expressive content (the combined effect of the subject matter and the specific visual form that characterizes a particular work of art)
- (28) II. Value Art as an Important Realm of Human Experience
- (6) A. Be affectively oriented toward art

- (4) B. Participate in activities related to art
- (8) C. Express reasonably sophisticated conceptions about and positive attitudes toward art and artists
- (8) Demonstrate an open-mindedness toward different forms and styles of art
- (2) E. Demonstrate an open-mindedness toward artistic exper/imentation
- (0) III. Produce Works of Art (No exercises for this objective are included in this released exercise set.)
 - A. Produce original and imaginative works of art
 - B. Express visual ideas fluently
 - C. Produce works of art with a particular composition, subject matter, expressive character or expressive content
 - D. Produce works of art that contain various visual conceptions
 - E. Demonstrate knowledge and application of media, tools, techniques and forming processes
- (12) IV. Know About Art
- A. Recognize major figures and works in the history of art and understand their significance. (Significance as it is used here refers to such things as works of art that began new styles, markedly influenced subsequent works, changed the direction of art, contained visual and technical discoveries, expressed particularly well the spirit of their age, and those considered to be major works of major artists.)
- (1) B. Recognize styles of art, understand the concept of style and analyze works of art on the basis of style
- (8) C. Know the history of man's art activity and understand the relation of one style or period to other styles and periods
- (0) D. Distinguish between factors of a work of art that relate principally to the personal style of the artist and factors that relate to the stylistic period or the entire age
- (0) E. Know and recognize the relationships that existed between art and the other disciplines of the humanities (literature, music and particularly the history of ideas and philosophy) during a given period

(3) V. Make and Justify Judgments About the Aesthetic Merit and Quality of Works of Art

Statements of aesthetic quality are those that characterize the various aspects of a work of art, while statements of aesthetic merit are assertions about the degree of goodness or badness of the work. Justifications of aesthetic merit are based on criteria such as the degree to which the work is integrated and whether contact with the work results in a vivid and fused experience.

- (0) A. Make and justify judgments about aesthetic merit
- (0) B. Make and justify judgments about aesthetic quality
- (2) C. Apply specific criteria in judging works of art
- (1) D. Know and understand criteria for making aesthetic judgments

Affective Exercises

The exercises measuring the affective domain were generated from the specifications implied in Objective II. An effort was made to include a wide range of artworks as stimuli for these items, combined with positive, neutral and negative statements about the artworks. Thus, both very modern and very traditional works of art were presented with these three types of statements. Data from these items should provide a comprehensive picture of how students in each age group view art in a very global sense.

Exercise Times by Age

Table 1 lists the exercises published in this set by NAEP identification number order. Exercises are presented by NAEP identification number order in Part 3 of this set. The table also shows the ages at which the exercise was administered and the total amount of time allowed at each age level.

Objective: PERCEIVE AND RESPOND TO ASPECTS OF ART

Aspects of art are defined as: sensory qualities of color, line, shape, and texture; compositional elements such as structure, space, design, balance, movement, placement, closure, contrast, and pattern; expressive qualities such as mood, feeling, and emotion; subject matter, including (1) objects, themes (the general subject of a work, i.e., landscape or battle scene), events, and ideas (general presymbolic meanings) and (2) symbols and allegories; and expressive content, which is a unique fusion of the foregoing aspects.

Subobjective: Go beyond the recognition of subject matter to the perception and description of formal qualities and expressive content (the combined effect of the subject matter and the specific visual form that characterizes a particular work of art).

401004-1,2,3

Some works of art are very well-known because pictures of them are printed in books and prints of them are sold to hang on walls. Which one of the four paintings on this and the next page is MOST well-known? Fill in the oval beside only ONE of the four pictures.

401004-1,2,3

☐ I don't know.

NAEP #: R 401004-62A-123

Objective: KNOW ABOUT ART

Subobjective: Recognize major figures and works in the history of art and understand their significance. (Significance as it is used here refers to such things as works of art that began new styles, markedly influenced subsequent works, changed the direction of art, contained visual and technical discoveries, expressed particularly well the spirit of their age, and those considered to be the major works of major artists.)

In Europe, from the fourteenth to the sixteenth century, paintings changed from almost flat, two-dimensional representations of space to representations of volume and depth, giving the illusion of three-dimensional space.

Look at the paintings on the next page. Painting A shows a flatter representation of space than Painting B. What method was used to give Painting B a greater feeling of three-dimensional space?

0	Figures were painted to look rounded instead of flat.
-	Objects in the back were painted higher in the picture and smaller in size to make them look farther away.
0	Figures and objects were painted in a more realistic way to make them look three-dimensional.
0	Shadows and shading were used to show depth in the painting.

☐ I don't know.

MAKE AND JUSTIFY JUDGMENTS ABOUT THE AESTHETIC MERIT Objective:

AND QUALITY OF WORKS OF ART

Statements of aesthetic quality are those that characterize the various aspects of a work of while statements of aesthetic merit are assertions about the degree of goodness or badness of the work. Justifications of aesthetic merit are based on criteria such as the degree to which the work is integrated and whether contact with the work results in a vivid and fused experience.

Subobjective: Apply specific criteria in judging works of art.
