ABSTRACT

Activities of the Corporation for Public Broadcasting (CPB) in its fiscal year ending September 30, 1979, are described in terms of telecommunications activities, planning and research, human resources development, satellite technology, and general financing of public broadcasting. Other information includes a CPB assessment of its goals and policy, services for public broadcasting and the general public, activities of the board of directors and officers, and detailed financial accounting for the fiscal year. ## Challenge and Response- Overview 1979

### Introduction

**T**he Corporation for Public Broadcasting (CPB) is the private, nonprofit corporation described in the Public Broadcasting Act of 1967. By means of a broad range of activities, CPB pursues programs and policies that will most effectively make non-commercial radio and television services available to all citizens of the United States.

A major role for the Corporation is to underwrite the costs of program production—with an emphasis on innovative and quality programs—for public broadcasting in the United States. In addition, CPB supports public broadcasting by a major funding of the interconnection services for radio and television; providing financial support to the operations of local television and radio stations and other public broadcasting entities; assisting public

broadcasters through such activities as audience research, professional training and development grants; and assisting applications of new telecommunications technologies.

The Corporation is committed to continued leadership in the public broadcasting community. The challenge of continued growth and development is being met in these and a number of related areas. The past year was pivotal to the Corporation in its efforts to meet the growing needs of public broadcasting.

### Background

A major development affecting all of public broadcasting occurred early in the fiscal year, when the Public Telecommunications Financing Act of 1978 was signed into law by President Carter. This legislation, which is a series of amendments to the Public Broadcasting Act of 1967, will have far-reaching effects on the ways in which the Corporation, the public

broadcasting stations and related public telecommunications entities will conduct their future activities.

Notably, the Act encourages greater participation by the public in the activities of public broadcasting. For example, as a condition for receipt of Corporation funding, public broadcasting licensees must increase citizen involvement in their activities to ensure public accountability and access, by holding open meetings of station governing bodies; creating advisory boards to those bodies; and opening their financial records for public examination. By May 1979, all public television and radio licensees certified to CPB their compliance with these requirements.

This new legislation was enacted in the context of a number of proposals designed to alter the structure

*Submitted to the President, the White House, for transmittal to the Congress February 15, 1980, under the requirements of the Public Telecommunications Financing Act of 1978, P. L. 95-567, 95th Congress.*

Washington, D.C. 20036

*An Equal Opportunity Employer M/F*

*Robben W. Fleming, President of the Corporation for Public Broadcasting, elected September 1978 effective January 1979.*

of public broadcasting and its mechanisms for financial support at the national level. The Corporation for Public Broadcasting recognized the need for in-depth analysis of the structure and functions of public broadcasting at the national level. Consequently, the Board of Directors and CPB management were early supporters of a reappraisal of public broadcasting undertaken by means of a study by the Carnegie Commission.

In January 1979, this private-sector group of distinguished participants published the report of its study, *A Public Trust: The Report of the Carnegie Commission on the Future of Public Broadcasting*. Briefly, its recommendations called for a massive restructuring of public broadcasting and the creation of an endowment for program production support services, which would exist as an autonomous entity within what would have been a Public Telecommunications Trust.

This trust would have replaced CPB.

While the Carnegie Commission was conducting its study, a major rewrite of the Communications Act of 1934, of which the Public Broadcasting Act of 1967 is a part, was introduced in the U.S. House of Representatives. The bill proposed, in part, to create an endowment to support production of programs for public broadcasting. The endowment would have supplanted the Corporation's functions in this area and would have been completely separate from all other activities in support of public broadcasting. Although extensive hearings were held on the rewrite, the bill was not reported out of committee.

#### Response to the Challenge

Within this context of new legislation and proposals for

change, the Corporation's president, Robben W. Fleming, early in his term initiated a study of the structure and funding mechanism within public broadcasting. On March 21, 1979, the CPB Board directed management to discuss his proposal and other alternatives with interested parties inside and outside public broadcasting. The results will bring significant changes in the present organization within the next year, including a reemphasis on program production support as the Corporation's top priority.

In this report of activities of the Corporation for Fiscal Year 1979—October 1, 1978 through September 30, 1979—the far-reaching changes occurring within CPB are discussed within the context of the Corporation's day-to-day activities. In addition, where it is helpful to do so, responses to challenges for change and their expected effects on the continuing role

of the Corporation are described. Highlights of these actions include the following:

□ At its August 1979 meeting, the CPB Board of Directors adopted a plan submitted by management that will lead to the restructuring of the Corporation. The plan, which calls for the creation of a Program Fund unit and a Management Services division within CPB, is effective January 1980.

□ At the outset, the Program Fund will deal only with the selection and funding of television programs. Experimental in nature, it will be reviewed for possible modification at the end of two years. The Fund will be independent in matters of individual program decisions, but will rely on the CPB Board for guidance in areas of programming policies and priorities.

*Dr. James R. Killian, Jr. Honorary Chairman of the Board, appointed as a member of the original Board in March 1968 and served a six-year term. He was elected Chairman of the Board in May 1973 and served in that capacity until his resignation in December 1974. He was named Honorary Chairman in 1975.*

*Robert S. Benjamin, Chairman Emeritus of the Board, was appointed a member of the original Board in 1966, reappointed in 1975 for a term that expired in 1976. Mr. Benjamin served as Vice Chairman from 1973 and was elected Chairman in December 1974 and served until 1977. Upon his retirement, he was named Chairman Emeritus of the Board and served until his death in October 1979.*

□ A new position, vice president for planning and research, was created early in the year to bring together CPB's research and planning activities. This was in partial response to a key provision of the Public Telecommunications Financing Act of 1978 that requires the Corporation to create, in consultation with interested parties, a five-year plan for the development of public telecommunications services.

□ Another major emphasis of the new legislation—and an area the Corporation is making strenuous efforts to address—is the funding of program production by independent producers.

□ In a related response to an additional emphasis of the Public Telecommunications Financing Act of 1978 for meeting the needs of minorities and women, CPB created

a key position: special assistant to the CPB president. This position reports directly to the president on matters of Human Resources Development. Positions for a coordinator of minority affairs and a coordinator of women's activities also were created to assist with these activities. In conjunction with the increased emphasis on equitable representation for minorities and women, the CPB grants programs were substantially increased last year—by as much as 40 per cent—in the areas of training and development for individuals and for minority control of public radio and television stations.

Tasks accomplished in the past fiscal year are reported in detail in the following pages, and anticipated activities and plans for future growth and development are discussed in specific areas.

## Telecommunications Activities

### Public Radio Support

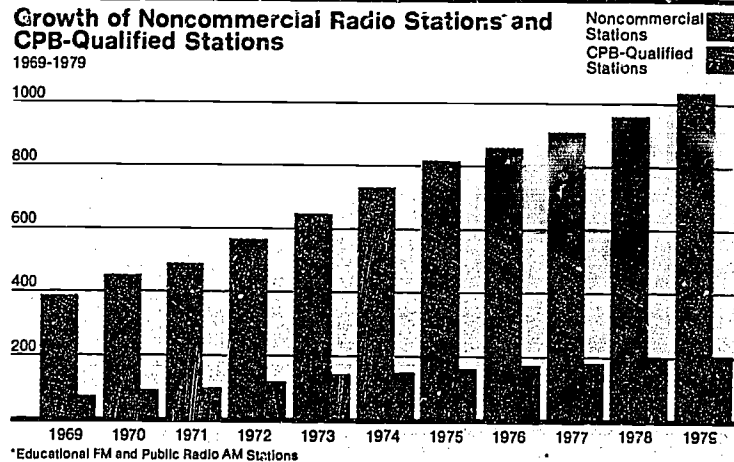

By the end of FY 1979, there were 211 CPB-qualified public radio stations serving approximately 65 per cent of the nation's potential listening audience. This was a year of change and growth for the Office of Radio Activities typified by its expansion program; stations successfully completing the expansion period also become eligible for Community Service Grant (CSG) support.

Priorities for grants are based on the eventual goal that public radio reach at least 90 per cent of the nation—with an emphasis on increased participation in management and other positions of responsibility by minorities and women. Other priorities include assistance to rural stations and providing multiple services in markets where a single station is unable to serve all the needs of the community.

Lillie E. Herndon, Chairman, was nominated to the Board by President Ford and has served since 1975. She was elected Chairman in September 1978 and reelected in 1979. A Republican, her term expires in 1980.

### Growth of Noncommercial Radio Stations and CPB-Qualified Stations 1969-1979

In 1979, CPB continued to support 18 expansion stations and two major market upgrade projects; the 1979 grant competition added nine new stations to the expansion rolls and two station improvement grants. Total expansion support for public radio was \$2,189,400. In addition, there were nine new grants to new stations; two were for bilingual, minority-controlled organizations—in Fresno, California and San Antonio, Texas.

Of the 27 expansion stations, 12 have achieved qualification status—meeting the CPB criteria for service responsive to the needs and interests of their communities.

The Corporation continued to provide public radio with funds for program production or acquisition through National Public Radio. During 1979, the Corporation funded \$6.4 million to NPR for program production and acquisition.

This resulted in more than 2,500 hours of national public radio programming. Among these were the series: *All Things Considered*, *Jazz Alive!*, *Options in Education*, *EARPLAY* and *Enfoque Nacional*, as well as individual music, drama and informational programs.

During the year, CPB began a series of informal regional workshops for expansion stations and potential grantees to provide basic information about building and operating a public radio station. The workshops also provided a means of working directly with minority and women's groups in each region.

Last year, over 350 station development personnel attended Radio Development Workshops. An experimental Program Guide Project made available \$100,000 in demon-

stration grants to 11 recipients to test specific station ideas and upgrade selected local program guides. A 300-page Radio Development Handbook was distributed. The department published *i.e. development*, a monthly public radio newsletter and information exchange; three national joint station on-the-air fundraising campaigns were coordinated by CPB; and the CPB Radio Advisory Service provided practical advice to approximately 70 stations on request.

Four stations became CPB-qualified under the CSG project in FY 1979, one in Alaska, California, Washington, D.C. and Oregon.

In FY 1979, 192 public radio stations received a total of \$9 million in Community Service Grants. Each eligible station received a base grant of \$26,550 plus an incentive grant based on the station's nonfederal financial support. The stations also received

a total of \$731,000 in supplemental funds which were added to the FY 1978 Community Service Grants. The CSGs assist stations in meeting local needs and priorities, developing and producing local programs, hiring and training personnel, undertaking additional minority-oriented projects, purchasing equipment and encouraging community support.

Radio station income from all sources was \$44 million, an increase of 26 per cent over the previous fiscal year. Ninety-six per cent or all but eight stations, are now involved in activities designed to promote increased financial growth, community involvement and public radio awareness.

**CPB Direct Support to Qualified Public Radio Stations**  
FY 1979

Lucius P. Gregg, Jr., Vice Chairman, was nominated to the Board by President Ford and has served since 1974. He was elected Vice Chairman in September 1978 and reelected in 1979. An Independent, his term expires in 1980.

### Television Activities

**D**uring FY 1979, CPB awarded \$65.898 million (approximately half of the total federal appropriation to the Corporation) in Community Service Grants to local public television stations. Last year, licensees allocated approximately 60 per cent of their CSGs to some form of programming expenses.

During FY 1979, CPB committed a total of \$16 million for television program production and acquisition. This included continued support for some of the most popular public television programs. In addition, the Corporation funded a variety of new series and specials which provided viewers with a broad selection of public affairs, performance, cultural and children's programs.

Public affairs funding included *Media Probes*, a series exploring the influence of

various media on our lives; second-season support of Ben Wattenberg's *In Search of the Real America*, which examines facets of American life and culture; and *Views of Asia*, an examination of several Asian nations and cities, their cultures, customs, politics and economies. Support continued for the series *World*, providing documentary coverage of international issues, and the Federal City Project, covering national events from Washington.

Public affairs specials supported by CPB included the award-winning *Race War in Rhodesia*; *Palestine*, a mini-series examining the events leading up to the creation of the Israeli state; *The Life and Times of Lord Mountbatten*;

and *Inflation*, a look at an important contemporary subject.

In the area of minority affairs, CPB provided \$196,025 for a pilot, *The Righteous Apples* and committed \$1.3 million for the series production. *Oye Willie*, funded in FY 1978 by the Corporation, has a \$1.7 million FY 1980 series commitment. Both of these minority productions are contracted to independent producers.

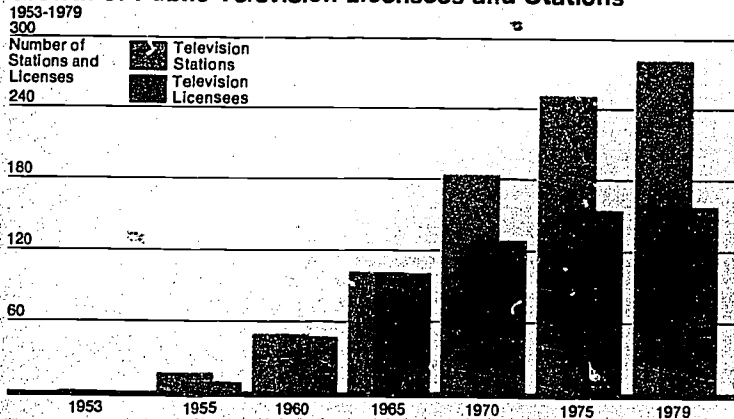

The Corporation funded *Were You There?*, a series of oral history documentaries tracing significant events in the development of black American history and culture from the perspectives of people who witnessed them.

Performance series receiving CPB support included *Summerfest*, a series of live performances developed by a consortium of public television stations; a made-for-television series adaptation of

Muriel Sparks' *The Prime of Miss Jean Brodie*; and a series profiling and dramatizing the works of author *Edith Wharton*. Public television audiences went to the White House to see ballet superstar Mikhail Baryshnikov, classical guitarist Andres Segovia, and conductor and cellist Mstislav Rostropovich.

The Corporation and the Station Independence Program (SIP) made possible *Live at the Grand Ole Opry*, *That Good Old Gospel Sound* with Della Reese and Tennessee Ernie Ford and a retrospective on *The Singing Fifties*. In addition, *Master Class* with Metropolitan Opera star Luciano Pavarotti and *Conversations About the Dance* with Agnes de Mille were funded by CPB.

**Growth of Public Television Licensees and Stations**

Geoffrey Cowan was nominated to the Board in 1979 by President Carter. A Democrat, Mr. Cowan's term expires in 1984.

Programs funded in the development stage during FY 1979 included *The Life and Times of James Boswell*; *Musical Comedy Tonight* with Sylvia Fine Kaye; and *Winslow House*, which dramatizes the problems and concerns of a group of elderly people living in a small boarding house. Funds were provided for research and development of a series based on the works of Eugene O'Neill, making use of the talents of José Quintero and Jason Robards, two of the foremost interpreters of O'Neill's work.

Through its step-up and acquisition fund, the Corporation continued to make available to national public television audiences locally and independently produced single programs.

In an increased effort to promote the development of regional and consortium pro-

gramming, CPB provided \$50,000 in matching funds to each of the four regional networks — Eastern Educational Television Network (EEN), Central Educational Network (CEN), Pacific Mountain Network (PMN) and Southern Educational Communications Association (SECA). *Farm Digest*, a CEN-produced, consumer-oriented agri-business program focusing on the effects of farming issues on the economy, is now aired in many parts of the country.

The Corporation continued support of public television's activity in captioned television programming for the hearing-impaired. Under a \$188,314 grant from CPB, seven series were distributed to public television stations with open or visible captions for viewing during the current PBS season.

Programs premiering with captions during the year included *James Michener's World*, *The Long Search* and *Freestyle* (KCET-TV, Los Angeles); "Dominic," "The Secret Garden" and "John Halifax, Gentleman" from the *Once Upon a Classic* series (WQED-TV, Pittsburgh); and "The Duchess of Duke Street" on *Masterpiece Theatre* (WGBH-TV, Boston).

With CPB financial support and in cooperation with the HEW Bureau for the Education of the Handicapped, PBS has developed a system of closed or hidden captioning. By sending encoded subtitles on line 21 of the television vertical blanking interval (that portion of the screen which does not ordinarily contain a picture), a viewer can see the captions on the home television set with a special decoding device.

In response to the Public Telecommunications Financing Act of 1978 and directives by the Corporation's Board of Directors, advisory panels of outside experts will be used as an integral part of the program proposal evaluation process. The first test of the advisory panel mechanism was instituted for children's programming for in-school classroom use. Review of proposals for this Children's Program Project was completed at the close of the fiscal year and series development is anticipated early in 1980.

**CPB Direct Support to Public Television**  
FY 1979

Diana Lady Dougan has been a member of the Board since 1976. A registered Republican, she was nominated by President Ford. Her term expires in 1980.

### Program Fund Unit

**A** Program Fund unit and a Management Services division were created as part of the reorganization of CPB. At the outset, the Program Fund will deal only with the selection and funding of television programs. Experimental in nature, it will be reviewed for possible modification at the end of two years. The Fund will be independent in matters of individual program decisions, but will rely on the CPB Board for guidance in areas of program policies and priorities.

The restructuring is designed to make maximum use of the portion of CPB resources available for television, radio and non-broadcast programs with the ultimate goal of 25 per cent of CPB's appropriations being used for this purpose.

The Program Fund will rely on the Management Services division for administration

and support services. The division will include planning and research functions, non-programming grants, system capacity building, station services, training, financial management, budget, development, audit and accounting functions, public affairs, government relations, education, personnel, legal and Board services and other related activities.

The Fund is headed by a director (award-winning television producer and programming executive Lewis Freedman was appointed to the post at the Board's December 1979 meeting), who will make use of panels of experts to review program proposals as mandated by the Public Telecommunications Financing Act of 1978.

### Educational Activities

**E**arly in the fiscal year, CPB funded \$1.2 million for production support, with the Agency for Instructional Television (AIT), of an in-school series *ThinkAbout*. The sixty, 15-minute programs and related instructional materials will aid fifth and sixth graders in further developing language arts, mathematics and study skills. In addition, CPB is co-funding an extensive evaluation of this series.

The Corporation's \$750,000 in support of the Children's Television Workshop's *3-2-1 Contact* (a new science series for 8-12 year olds, designed for at-home and in-school use) ensured the availability of unlimited off-air recording rights. This action enables every school in the country to record and retain this series for classroom use throughout its three-year standard broadcast life. The series is designed to make science and technology

more understandable and interesting to children, especially female and minority youngsters.

To accompany *The Shakespeare Plays, Seasons I and II*, the Corporation co-funded adult viewer materials and secondary school kits, consisting of records, viewing guides, teachers' guides and posters. The kits were distributed at no charge to school libraries across the country.

To facilitate offerings of college courses designed around the plays, CPB and the series underwriters financed the University of California, San Diego and the Coast Community College District to develop college-level materials to accompany the series.

Lewis Freedman was named to the position of Director of the Program Fund for the Corporation, effective January 1980.

Paul S. Friedlander was nominated to the Board in 1979 by President Carter. A Democrat, Mr. Friedlander's term expires in 1984.

The Corporation funded the development of a 64-page magazine to accompany *Odyssey*, the first American-produced series on anthropology and archeology; 215,000 copies were made available to libraries, museums and anthropology/social studies faculties at secondary schools and colleges.

The Corporation funded a project with National Public Radio which made possible a preliminary assessment of the educational value of NPR's tape library. To test the educational acceptance and usefulness of prepackaged library tapes, prototype instructional materials using NPR's gavel-to-gavel coverage of the U.S. Senate debates on the Panama Canal Treaty were developed.

The Corporation continued its support of the TV for Learning Project with \$265,000 during FY 1979. Since 1975, CPB has funded more than \$700,000 for increasing awareness of public

television's services to education. Among the activities of the joint CPB/PBS project this year were the first system-wide seminars on instructional television strategic marketing and management.

The Corporation's Office of Educational Activities initiated and supported several projects designed to increase formal and informal learning opportunities via public television and radio stations for adults. A \$36,000 CPB grant to the Central Educational Network made possible the creation of public television's first Post-Secondary Educational Council. The Council will acquire, schedule and distribute post-secondary programming — college courses and informal adult education series — for broadcast use; provide region-wide screenings of

materials available for acquisition; negotiate group rentals; and establish a regional post-secondary program library.

The Office of Educational Activities joined with other organizations in activities designed to improve and expand educational opportunities for adults. In September 1979, CPB's educational office joined the American Association of Community and Junior Colleges and the College Entrance Examination Board in sponsoring a National Assembly on the use of telecommunications by two-year colleges.

Flexible use of a major program resource will be guaranteed by another CPB project. Through an agreement with the co-producer, KCET-TV, Los Angeles, the science series *Cosmos* will be available for off-air recording by schools, colleges and universities for a five-year period from first

broadcast. A simple and inexpensive licensing procedure has been established by KCET for CPB to permit monitoring of the value and use of off-air recording rights. This will provide a model for future off-air recording rights arrangements to ensure maximum educational use of public television programming.

During 1979, CPB's Station-College Executive Project in Adult Learning collected data on telecourses and successful working arrangements between broadcast licensees and higher education institutions. Four workshops were held for college administrators and public television station personnel to assist them in expanding and improving educational programming and support services to adults in their viewing areas.

*Michael A. Gammino, a member of the original Board, nominated in 1968 by President Johnson; was reappointed in 1972 by President Nixon and again in 1979 by President Carter. A Democrat, his current term expires in 1984.*

*Dr. Michael R. Kelley has been a member of the Board since 1979. An Independent, he was nominated to the Board by President Carter. His term expires in 1982.*

In cooperation with the National Center for Education Statistics, CPB initiated the first nationwide survey of television's uses by all accredited two and four-year colleges and universities. This study found that 2,129 colleges (seven out of ten) used television in 1978-79, and 735 colleges offered television courses and enrolled approximately a half-million students. Two-year colleges, especially, relied heavily on their local television stations for instructional programming.

The final report was published of the nation's first study of the use of television in elementary and secondary schools, *Instructional Uses of Television, 1976-77*. This report documented regular use of television for instruction by 727,000 teachers and approximately 15 million students.

### Children's Program Project

As part of an overall assessment and review of its program funding process, the Corporation initiated the Children's Program Project. A major CPB priority is the development of new children's programming. The project designed procedures to serve as a model for future CPB program funding processes. In the research stage, 44 agencies were contacted and 120 reports, surveys and interviews on the current state of children's public television programming were analyzed. A 200-page reference book was prepared for CPB staff and advisory panelists, and copies made available to public broadcasters and other interested parties.

A report documenting various methods used by seven federal agencies to solicit and evaluate television program proposals was provided the CPB program project staff. An advisory

committee, with representatives from the education community, independent producers, public broadcasters and social agencies met and suggested broad goals and directions for CPB in the area of children's programming. The committee identified both in-school and at-home programming as areas of need. The March 1979 Board-approved plan for meeting the advisory committee's goals and directives resulted in development and review of guidelines and solicitation of proposals.

Initially, proposals were sought for in-school programming and efforts made to seek funding sources beyond CPB for additional support of at-home children's programming. A CPB proposal review panel process

was outlined and reviewed and nominees were solicited from independent producer organizations, public broadcasting stations, regional networks and the educational community. By the end of the fiscal year, a panel of nine reviewers had been selected.

Early in FY 1980, the panel reviewed 21 program proposals, screened sample tapes and ranked the final choices by priority. At its December 1979 meeting, the CPB Board authorized up to \$1 million to support three program proposals — a health series for senior high school students; a television viewing skills series for children at the middle school level; and a life science series for junior high school students.

*Kathleen Nolan has been a member of the Board since 1979. A Democrat, she was nominated by President Carter, and her term expires in 1984.*

*Clyde M. Reed has served on the Board since 1976, when he was nominated by President Ford. A registered Republican, his term expires in 1982.*

## Planning and Research

**A** major provision of the Public Telecommunications Financing Act of 1978 required the Corporation to create, in consultation with interested parties, a five-year plan for the development of public telecommunications services. The position of vice president for planning and research was created to consolidate the Corporation's research and planning activities and a Department of Planning and Analysis was established to provide analytic capability in support of these activities.

A Programming Goals and Policies Task Force reviewed legislative and Board history of television program funding, analyzed past CPB funding practices — especially in comparison with those of other funders of television programming — and summarized the research results of the public television audience.

An ad hoc committee of the Board was appointed late in the year to assume responsibility for guiding the five-year planning effort. The committee is working with the public telecommunications community and the CPB staff to develop the industry's first five-year plan.

In August, a Computing and Telecommunications Planning Task Force was created to respond to information-handling problems within the public telecommunications industry. The Task Force — with members from CPB, PBS, NPR and NTIA — is investigating and recommending ways that computer and data communications systems might be developed and supported by the industry in the next five years and beyond.

The Office of Planning and Analysis also began a study to inventory the variety and extent of federal funding support for public telecom-

munications. This inventory will provide detailed information for the Congress on federal funding for public telecommunications services such as noncommercial radio and television programs, related noncommercial instructional or informational materials and funding of facilities for production, interconnection, captioning, broadcast or other means of program distribution. Data will be available for future funding programs, as well as authorization and appropriation amounts for programs funded during FY 1979. A final report is scheduled for early 1980.

*José A. Rivera has served on the Board since 1979. A Democrat, he was nominated to the Board by President Carter and his term expires in 1984.*

*Sharon Percy Rockefeller has been a member of the Board since 1977. A registered Democrat, nominated by President Carter, her term expires in 1982.*

### Communication Research

**D**uring FY 1979, the Corporation provided continued and increasing research support for both National Public Radio and individual CPB-qualified public radio stations. As an example, for the second consecutive year, public reactions to on-air radio fundraising were measured nationally and documented in the annual Statistical Research, Inc. report series funded by CPB. The collection of pledge statistics from public radio stations (beginning in May 1978) was continued in 1979 at an increased frequency with three data collection periods. This data will be useful to radio station management in designing future pledging activities.

National measures — by Roper, Statistical Research, Inc. and Arbitron — of public radio awareness and listening during 1979 commissioned by CPB documented marginal growth over the pre-

vious year. Awareness of National Public Radio remained at about 27 per cent of those surveyed and the average weekly tune-in of public radio was measured at 4.4 million, up five per cent from the 1978 estimate. These statistics emphasized the need for a national awareness and listening campaign.

During 1979, radio research workshops were sponsored by CPB for the first time. Five workshops were conducted at regional locations and were attended by some 120 radio station managers.

The Corporation and NPR jointly funded the Public Radio Audience Profile computer system to provide in 1980 both CPB and NPR with specific program listening

estimates and audience flow information previously unavailable by program time periods.

Public television audience growth continued. Based on CPB research data, the number and percentage of homes viewing public television increased. During March 1979, a record 65.9 per cent of U.S. television households (49.1 million) watched public television. Viewing levels for the average of the four weeks in March also were at a new high for the total weekly cume (45.3 per cent) and the prime time weekly cume (25.7 per cent).

A variety of research sources verified that the composition of the public television audience is broad and diversified. Roper data for July 1979, for example, shows that more than half (56 per cent) of the respondents who watched

public television during the week had a high school education or less, while 43 per cent had some college. About one quarter (24 per cent) held blue collar jobs, while 17 per cent were executive or professionals and 20 per cent held white collar jobs.

During July 16-22, Nielsen National Public Television Estimates found that more than half (60 per cent) of the public television households were headed by someone with a high school or lesser education; 35 per cent of the public television heads of household were in skilled or semiskilled positions; and 25 per cent were in professional, owner or managerial jobs.

*Charles W. Roll, Jr. has served as a member of the Board since 1976. A registered Republican, he was nominated to the Board by President Ford. His term expires in 1982.*

*Donald E. Santarelli has been a member of the Board since 1975, when he was nominated by President Ford. A Republican, his term expires in 1980.*

**Engineering Research**

Corporate technological assistance was successful in improving the efficiency of the FM educational radio band. The FCC accepted several Corporation proposals and published for further comments CPB's proposed Table of Allocations for the educational radio band. In response to CPB's suggestions, the FCC froze further 10-watt station activations, created a new Channel 201 and permitted Class D stations access to "holes" in the commercial radio band, thus easing congestion in the educational band.

During the year, the Corporation helped to bring about an FCC reduction in UHF receiver noise figures. Together with other broadcasting representatives, CPB petitioned the FCC to improve UHF broadcasting through a multifaceted plan that included improved television receivers, more

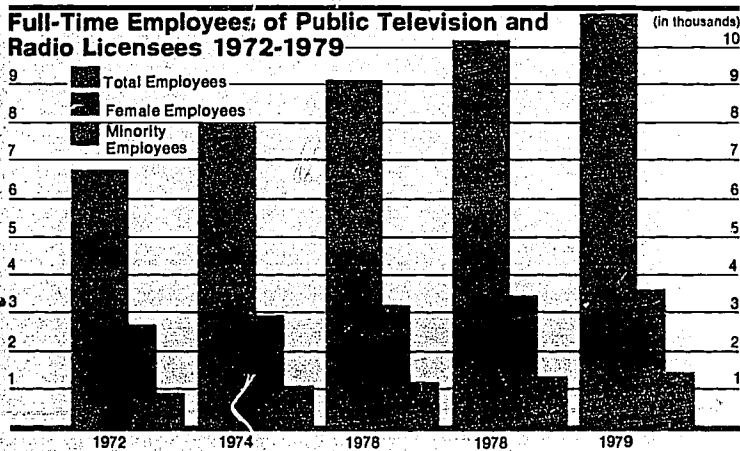

efficient transmitters, better antennas and consumer education on installation and tuning.

The Corporation supported a new effort in the field of transmission of written material over the broadcast channel by using the vertical blanking interval of the television screen. This is teletext technology, now in operation in several countries, and in various stages of technical domestic experimentation. The Corporation's proposed experiment with WETA-TV, Washington, D.C. and the Alternate Media Center at New York University will consist of a two-year demonstration to determine what services teletext can provide: how they can be supported; and how useful and acceptable they are to the community.

For the third year, CPB continued its support of a videodisc experiment being conducted by the Nebraska ETV Network. Four pilot programs were produced on disc and will be tested at evaluation centers around the country. The videodisc offers new and different means for providing instructional television and for permitting viewer comment. In cooperation with HEW's Bureau for the Education of the Handicapped, the joint CPB/Nebraska project is seeking ways in which video-disc technology can be used to assist the hearing-impaired. Last year, two discs were captioned.

The Corporation also supported station and system efforts to expand alternate methods of delivering programs and services. Public stations in Lincoln, Neb.; Wichita, Kan.; Seattle, Wash.; Knoxville,

Tenn.; and Massachusetts Educational Television, Boston, are experimenting with cable television, video cassettes and instructional television fixed service to establish new ways to serve their communities through alternative delivery technologies. By disseminating the results of these and other experiments and demonstrations, it is hoped that every public broadcasting station will have a model to assist in long-range planning. Other experiments are planned for 1980 to identify a full pattern of possible alternative technologies.

## Human Resources Development

### Minority Affairs

In November 1978, following 18 months of study, the Task Force on Minorities in Public Broadcasting, funded by CPB, published *A Formula for Change*. The report provided CPB and the public broadcasting community with extensive recommendations for improving public broadcasting policies and their impact on minorities; training programs and career development of minorities; programming by and about minorities; minority access through control and ownership of public broadcasting facilities; and minority audience research in public broadcasting.

The Corporation supported and participated in a Native American Telecommunications Conference in Tucson, Arizona, designed to provide information and workshops to enable Native Americans to establish public broadcast stations on Indian reservations.

A research study called *Black Participation in Public Television: Awareness and Audience Development* was completed. The major purpose of the demonstration project, funded by CPB, was to test selected strategies designed to increase black awareness of participation in public television.

Minority ownership assistance was provided to KZLN-TV, Harlingen, Texas. The station, when operational, will be among the first minority operated and controlled public television facilities in the country.

The Corporation helped fund a Minority Writers Conference to encourage and assist minority writers in developing scripts for public television. The conference, conducted by WNET, New York, brought together minority writers, including women, to focus on the

structure, organization and format of the development of scripts for television production.

The Corporation also continued its financial support of the Latino Program and Native American Consortia. Both are designed to fill the programming void experienced by minority communities in major markets due to lack of available productions for public television stations. The Consortia's major goals are to provide quality programs by and about a given ethnic group for its own audience as well as a general audience.

The Corporation committed \$180,000 to support the creation of a National Black Programming Consortium early in 1980. The Consortium's goals are to develop, encourage and preserve high quality public broadcast and other mass communications programs originating from and reflecting the black experience.

Gillian Martin Sorensen has served on the Board since 1977, when she was nominated by President Carter. A Democrat, her term expires in 1982.

Howard A. White has been a member of the Board since 1979. A registered Democrat, he was nominated by President Carter. His term expires in 1980.

### Women's Activities

The CPB Office of Women's Activities developed and supported Communications Skills Seminars held in five cities across the country and one in conjunction with the Public Radio Conference in Washington, D.C. The seminar workshops addressed management and communications skills, including decision-making, public speaking, nonverbal communications, assertiveness, organizational communications and formal and informal networking.

The Corporation helped underwrite the first conference on Feminism and Radio sponsored by the Feminist Radio Network, Washington, D.C., September 28-30. The conference focused on women's programming and, through workshops, on radio production.

During 1979, a CPB/KCET-TV, Los Angeles, joint venture sponsored a women writers workshop tele-conference, funded in large part by the Corporation. With the coordinating efforts of CPB's Office of Women's Activities and the KCET staff, the conference was transmitted live from KCET studios by satellite to ten closed-circuit sites around the country. Close to 700 women writers around the country had the opportunity to participate in the conference covering information on scripts, markets, agents and other basics. Participants in New York, Dallas and Columbia, S.C. called in questions. On hand for response at KCET were 50 successful writers, producers, executives and agents — nearly all women.

### Training and Development

#### Training Grant Program

In a major step that provided a response to the Minority Task Force report and a demonstration to the public broadcasting community and the Congress that it was committed to the training and employment of minorities and women, the Corporation doubled the amount of funds available for training grants for FY 1979. This doubling of funds, a one-time experimental grant administered through CPB's Office of Training and Development, provided public radio and television stations with additional grants for training and employing minorities and women.

The Corporation took steps to respond to the concerns and recommendations contained in the Minority Task Force report. For example, more than \$520,000 in CPB funds supported several efforts that include an additional women's and minority training grant round; support of

*Jill H. Garrett is a Minority Training Grant recipient who is a frequent contributor to public affairs programs with WVIA-TV-WVIA-FM Pittston, Pa.*

*Sheryl Cohen received a candidate grant segment of the Women's Training Grant, Round Eight from CPB. She is development manager with WTVP-TV, Peoria, Ill.*

\$2,500 for the Feminist Radio Network Conference; support of a series of radio production skills seminars and program director training workshops; support of a professional development satellite conference to familiarize women and minority producers with basic facts about producing local and national public television programming; support to Community Information Network, an independent production center for minority radio and television producers; support to the National Federation of Community Broadcasters to underwrite a minority ownership workshop and a conference for minority radio producers; support of two minority television writers conferences; support of a series of communications skills seminars for women; support for college and high school student counseling about careers in communications; support of a proposal to produce training tapes designed to increase awareness between broadcasters and their communities; and to

enhance cooperation between producers and community groups.

During FY 1979, CPB awarded 115 women's and minority training grants in excess of \$1 million. The 59 women's training grants were funded for \$577,000, and CPB funded \$491,000 for 56 minority training grants. The grants, designed to expand the range of employment opportunities and to upgrade and improve the skills of women and minorities as public broadcasting officials, managers, technicians and professionals, are awarded to CPB-qualified public television and radio stations, production centers and other public telecommunications entities. Recipients must agree to pay at least half of a trainee's salary, benefits and training costs for one to two years.

The Corporation also awarded 128 in-service training grants. The in-service

training grant project is designed to encourage professional development of individuals already employed in public broadcasting through short-term career development and training opportunities. In-service training costs are shared by CPB and the sponsoring station or public telecommunications entity.

Eight public broadcasting fellowships, totaling \$68,345, were awarded during the year to assist highly qualified professionals in broadening their skills in particular areas of public broadcasting.

The following fellowships have been awarded: Deborah S. Amos, associate producer, *All Things Considered*, National Public Radio — \$1,130; Carlos de Jesus, freelance director, WGBY-TV, Springfield, Mass., and WNET-TV, New York — \$9,980; Adi Gevins, program producer, KPFA-FM, Berkeley, Calif. — \$5,750; Kathy McAnally, program producer, KPFA-FM, Berkeley, Calif.

— \$5,750; Larry Josephson, independent producer — \$5,750; Peter Sutheim, director of operations and production, KPFK-FM, Los Angeles — \$9,400; Robert Morris, staff director, WNET-TV, New York — \$5,425; and Lawrence C. Watkins, former assistant general manager, WETV-TV/WABE-FM, Atlanta, Ga. — \$10,000.

With a grant of \$100,000 in 1979, CPB continued support for People and Careers in Telecommunications (PACT), the central public telecommunications job opportunity clearinghouse managed by the National Association of Educational Broadcasters. With a high proportion of women and minorities included, PACT maintains an ongoing file of qualified professionals interested in job placements and career opportunities in public television, radio and broadcast education.

*Dr. Gloria Anderson, former vice Chairman, served on the Board from 1972 to 1979. A Democrat, she was nominated by President Nixon. Her term expired in March and she was replaced in July by Mr. Friedlander.*

*Virginia Duncan, a registered Democrat, was nominated by President Nixon in 1975. Her term expired in 1976 but she continued to serve as a member of the Board until July 1979, when Dr. Kelley replaced her.*

# Satellite Technology

## Satellite for Radio

**S**atellite service for the CPB-qualified public radio stations got underway early in the fiscal year. The Corporation's Satellite Interconnection System Project Office (SISPO) site analysts completed visits to each of the 189 public radio stations to determine if the station owned or had access to a suitable site for the proposed earth station terminal, and to consider environmental conditions. Later in the year, 15 new stations were added to the project and were surveyed for a total of 204.

By January, the FCC approved the lead application for the radio satellite project and authorized Western Union Telegraph Company to provide the necessary channels of satellite communication for the public radio service by means of its WESTAR domestic satellite system. The CPB Board authorized implementation of the radio contract for the construction of the radio

satellite terminals and related facilities — equipment to be added to the Main Origination Terminal (MOT) for National Public Radio and the Main Origination Terminal Interconnection Link between the NPR Technical Center in downtown Washington, D.C. and the MOT in suburban Virginia.

Simultaneous ground-breaking ceremonies were held May 14 at two public radio stations to initiate the satellite project construction. Live coverage of the events in Eugene, Oregon, and Logan, Utah, was offered by NPR to all stations.

By late August, antenna foundations were being constructed across the upper northern states to complete this critical work before winter. Meanwhile, the subcontractor was erecting antennas at sites where foundations were already installed. By the end of the

month, 30 antennas were in place, and equipment teams were placing receivers and making final cable connections to test the first completed terminals.

On October 1, 1979, full-period protected program channel service on the WESTAR I satellite was initiated from National Public Radio studios in Washington, D.C. The first eight receive-only stations in Oregon, Washington, Utah and Montana were completed, tested and accepted as capable of using the two-channel service.

At the end of the fiscal year, 82 (53 per cent) of the satellite terminal foundations had been erected, and 40 (26 per cent) of the antennas had been erected.

Construction and installation of ground terminals for public radio continue, with completion of the \$18 million project expected by May 1980.

*Amos B. Hostetter, Jr., an Independent, was nominated to the Board by President Ford in 1975. He served until July 1979, when he was replaced by Ms. Nolan.*

*Joseph D. Hughes, a registered Republican, was nominated to the Board in 1968 by President Johnson and in 1972 by President Nixon. He served until July 1979, and was replaced by Mr. Cowan.*

## Financing Public Broadcasting

The Public Telecommunications Financing Act of 1978 called for a number of procedures that affect the financial structure and reporting operations of public telecommunications entities.

In some areas, the Corporation is well underway with the new procedures; in others, the procedures are being defined for early implementation.

□ The Act directed CPB to develop accounting principles to be used uniformly by all public broadcasting stations and other public telecommunications entities that receive funds from the Corporation. The new law also requires that station financial statements, prepared in accordance with these principles, be submitted to an annual audit by independent auditors.

To aid in preparation of these accounting principles, CPB initiated a competitive bidding process which culminated in the engagement of the independent public accounting firm of Arthur Andersen & Company. At the same time, the Corporation formed a Financial Management Advisory Committee (FMAC) to provide public broadcasting industry assistance and perspective in implementing the project.

This Committee represents a cross section of the public broadcasting community with membership composed of various public television and radio station licensees, the Public Broadcasting Service, National Public Radio, the National Association of Educational Broadcasters, the National Association of

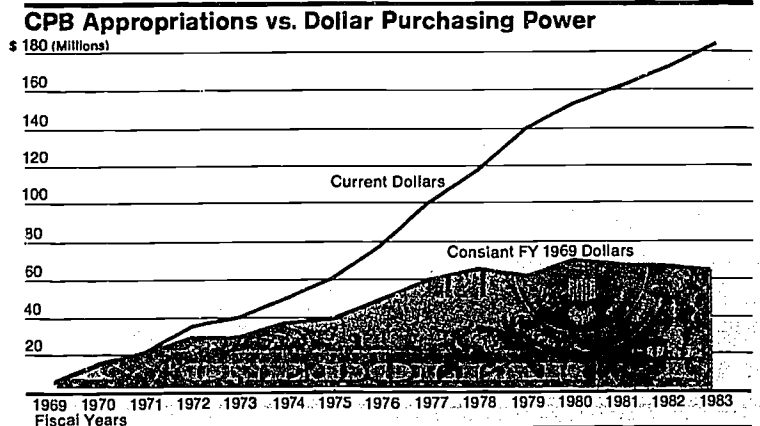

College and University Business Officers and the General Accounting Office. The group met throughout the year to review the project's status and provide advice and counsel to the Corporation and the contractor. A final version of the accounting principles will be ready for distribution to the stations early in 1980.

□ The Act also required CPB to conduct a study, completed in FY 1979, to determine how personal services of volunteers might be assigned a "fair market value" and counted as part of a station's nonfederal financial support (up to five per cent) for each licensee.

In February, CPB contracted Arthur Andersen & Company to undertake this study with the advice and counsel of the FMAC. The study, submitted to the General Accounting Office in May, was approved in early June.

Louis P. Terrazas, a registered Republican, was nominated to the Board by President Ford in 1976. He served until July 1979, when he was replaced by Mr. Rivera.

The study describes the base methodology for counting, reporting and valuing work hours contributed to public stations by volunteers. Hay Associates was awarded a contract to develop specific "fair market value" for various rates and categories of volunteer jobs in different areas of the country. Following completion of this phase of the study, instructions for the valuation of volunteer services will be issued to all stations. The value of volunteer services then may be applied to nonfederal financial support reported for the stations' fiscal year 1981.

□ The Act places a high priority on increasing public telecommunications services and facilities available to and operated and owned by

minorities and women. Recognizing this priority, the Corporation, through its Office of Human Resources Development, has coordinated activities with the National Telecommunications and Information Administration (NTIA) to make grants in support of minority ownership in public radio and television.

□ During the course of Congressional hearings on the renewal of CPB's authorizing legislation, concern was expressed over the financial accountability of CPB-qualified television and radio stations.

The Corporation, during FY 1979, sponsored a series of financial seminars to provide guidance to the stations and to ensure a financial management that complies with both statutory requirements and generally accepted accounting principles.

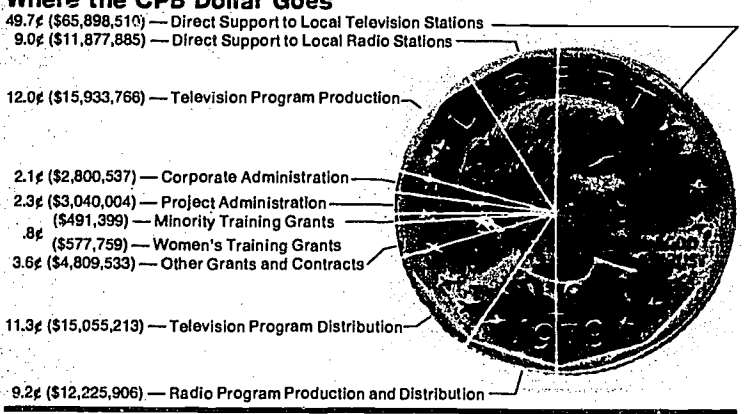

More than 300 chief financial officers, bookkeepers, licensee representatives and auditors from major auditing firms attended the four regional financial seminars sponsored by CPB.

As a further effort to strengthen financial management in public broadcasting, CPB provided a \$20,000 grant to assist in establishing a new professional group, the Public Telecommunications Financial Management Association.

□ During fiscal year 1979, federal appropriations to CPB for FY 1981 and FY 1982 were considered by the Congress. The Corporation requested appropriations for each of these years up to the fully authorized ceilings of

\$180 million and \$200 million respectively; CPB further requested a supplemental appropriation for FY 1979 over the previously established federal appropriation to match the total nonfederal financial support received by the industry. The Corporation's request for the 1979 supplemental appropriation was rejected. Both the Congress and the Administration recommended \$172 million, which was eventually adopted by both the House and Senate Appropriations Committees. The bill containing CPB's FY 1982 appropriation was delayed due to disagreement relating to House and Senate language pertaining to other legislation. In its stead, the Congress passed a bill enabling continuing appropriations until such time as agreement is reached.

**Where the CPB Dollar Goes**

To the Board of Directors of  
Corporation for Public Broadcasting:

We have examined the statement of net assets of CORPORATION FOR PUBLIC BROADCASTING (a District of Columbia nonprofit corporation) as of September 30, 1979 and 1978, and the related statements of revenues, expenses and changes in net assets and changes in financial position for the years then ended. Our examinations were made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the financial statements referred to above present fairly the financial position of Corporation for Public Broadcasting as of September 30, 1979 and 1978, and its revenues, expenses, changes in net assets and changes in its financial position for the years then ended, in conformity with generally accepted accounting principles applied on a consistent basis after giving retroactive effect to the change (with which we concur) to capitalization and depreciation of property and equipment as explained in Note 1 to the financial statements.

*The accompanying notes are an integral part of these statements.*

**NOTES TO FINANCIAL STATEMENTS  
SEPTEMBER 30, 1979**

**(1) Significant Accounting Policies**

The Corporation, a District of Columbia nonprofit corporation authorized to receive Federal appropriations under Title II of the Public Broadcasting Act of 1967, as amended, is exempt from income taxes as an organization described in Section 501(c)(3) of the Internal Revenue Code and from excise taxes as an organization that is not a private foundation as defined in Section 509(a) thereof.

In 1979, the Corporation has accounted for furniture and equipment and leasehold improvements by capitalizing and depreciating these assets using the straight-line method over an 8 to 10 year life, whereas in prior years, these items were expensed when purchased. The new method of accounting for furniture and equipment and leasehold improvements was adopted to give recognition to those assets which will benefit more than one accounting period. The financial statements for 1978 have been restated to apply the new method of accounting for property and equipment on a retroactive basis. The effect of the accounting change is to increase total expenses by \$34,237 in 1979 and decrease total expenses previously reported for 1978 by \$31,788.

Restricted grant income is deferred until expended for the purpose of the grant.

Unexpended balances of grants awarded by the Corporation are required to be returned to the Corporation. Grant refunds to the Corporation are recorded when the amount of refund due the Corporation becomes known, normally when a final accounting by the grantee is submitted.

Contributions to employee defined contribution retirement plans are made as the costs accrue (\$320,917 and \$324,802 for the years ended September 30, 1979 and 1978, respectively).

Costs incurred for feasibility studies, testing, design, etc., of the satellite interconnection system projects prior to approval have been expensed. After approval, construction and related project administration costs (see Notes 2 and 3) are deferred during the construction period. The deferred charges for the TV satellite interconnection system are being amortized over ten years. Upon completion of construction of the radio satellite interconnection system, which is expected to occur in 1980, the deferred costs will be amortized over the ten-year estimated useful life of that system.

**(2) Television Satellite Interconnection**

The Corporation has constructed a satellite interconnection system to serve public television stations in the United States,

Puerto Rico and the Virgin Islands. It consists of leased satellite transponders, a main origination terminal near Washington, D.C., four regional transmit-receive terminals within the continental United States and 163 receive-only earth terminals. Also, the facilities at the Public Broadcasting Service's Technical Center in Washington, D.C., have been augmented for use in the system and a microwave link was established between the Technical Center and the Main Origination Terminal. The construction was substantially completed in fiscal 1979. Title to all facilities and equipment is held by Public Broadcasting Service (PBS) and individual licensees.

Construction and related project administration costs were budgeted at approximately \$40,000,000. The Corporation is planning to finance approximately \$36,000,000 of the total estimated cost. The remaining costs were financed through direct contributions by PBS, noncommercial broadcasting licensees and other interested parties.

Costs incurred are being deferred and amortized over a ten-year period (see Note 1). The deferred charges at September 30, 1979, are analyzed as follows.

Total construction and related project administration costs incurred as of September 30, 1979 .....	\$37,993,080
Less—Contributions to the cost of the system received from Public Broadcasting Service, noncommercial broadcasting licensees and other interested parties through September 30, 1979 .....	(3,740,000)
	<u>34,253,080</u>
Less—Costs incurred prior to final approval to construct the system, which were charged to expense before June 30, 1976, net of \$426,323 contributed by others .....	(881,050)
Current year amortization .....	(3,337,200)
Deferred cost at September 30, 1979 .....	<u>\$30,034,830</u>

**(3) Radio Satellite Interconnection**

In 1979, the Corporation commenced the construction of a radio interconnection system similar to the TV satellite project. The system will consist of 15 transmit-receive terminals and 188 receive-only terminals. It will utilize the same Main Origination Terminal as the television satellite interconnection. This project, which is expected to be completed during fiscal 1980, will cost approximately \$18,000,000. Title to all facilities and equipment will be held by National Public Radio and individual licensees.

Costs incurred are being deferred until completion of the system (see Note 1), consistent with the accounting treatment accorded the TV satellite project. The deferred charges at September 30, 1979, are analyzed as follows.

Total construction and related project administration costs incurred as of September 30, 1979 .....	\$ 9,075,209
Less—Costs incurred prior to final approval to construct the system, which were charged to expense before September 30, 1978 .....	<u>(2,210,980)</u>
Amount deferred .....	<u>\$ 6,864,229</u>

**(4) Revolving Line of Credit and Compensating Balance Requirements**

In May 1977, the Corporation entered into a loan agreement with a syndicate of commercial banks. The initial purpose of the loan agreement was to finance the cost of the satellite interconnection system described in Note 2. The loan agreement provided for a revolving line of credit in an initial amount of \$32,500,000, which will be reduced by one-ninth each year commencing October 1, 1979. On October 1, 1979, the line of credit was \$14,444,445. The line of credit automatically returns to the full scheduled amount for fiscal 1980 (\$28,888,889) when Congress enacts the Corporation's appropriations for fiscal 1982. Authorizations for appropriations have been made through fiscal year 1983.

Interest is payable on any amounts outstanding under the agreement at the prime rate through September 30, 1981. The interest rate will increase to 1/4 % and 1/2 % above the prime rate on October 1, 1981 and 1984, respectively. The agreement also requires payment each quarter of a commitment fee equal to 1/2 % per annum of the unused available credit. The Corporation has the right to reduce the line of credit at any time without penalty.

Pursuant to the agreement, the Corporation must maintain compensating balance deposits with the lenders at an average of 10% of the total amount available under the line of credit plus 10% of amounts borrowed thereunder. At September 30, 1979, all compensating balance requirements had been met.

As of September 30, 1979, no amounts had been borrowed under this loan agreement. It is management's intention to utilize funds of the Corporation to finance the remaining construction costs of the satellite interconnection system (described in Notes 2 and 3) to the extent necessary.

**(5) Expenses**

Other grants and projects include expenses for minority and

women's training grants, engineering research and development projects, communications research projects, grants and projects to enhance the use of public broadcasting materials in education, development and publication of Corporation reports and pamphlets, contract and related costs incident to statistical gathering and dissemination and similar expenses.

Project administration costs include expenses for Corporation staff and related logistical costs (travel, consultants, professional services, etc.) for administering grants, projects and activities in all program areas: television, radio, communications research, educational activities, management information systems, long-range planning, public affairs and similar activities. Project administration costs for the fiscal years ended September 30, 1979 and 1978, are summarized as follows.

	1979	1978
Personnel and related costs .....	\$2,174,280	\$2,393,773
Other expenses .....	<u>865,724</u>	<u>898,967</u>
	<u>\$3,040,004</u>	<u>\$3,292,740</u>

Corporate direction and administration expenses for the fiscal years ended September 30, 1979 and 1978, are summarized as follows.

	1979	1978
Personnel and related costs .....	\$1,673,428	\$1,681,809
Occupancy costs, net .....	385,510	464,133
Professional services .....	159,306	297,980
Other expenses .....	<u>582,293</u>	<u>546,921</u>
	<u>\$2,800,537</u>	<u>\$2,990,843</u>

**(6) Litigation**

In 1979, the previously reported Network Project suit was settled. This suit sought, among other things, to restrain the Corporation and other defendants from activities influencing noncommercial programming decisions alleged to be in violation of the Public Broadcasting Act of 1967 and the Constitution of the United States. This settlement did not have a material impact on the Corporation's financial statements.

Also in 1979, the Corporation and the principal television satellite contractor negotiated a settlement of certain claims asserted by the contractor. The additional costs resulting from the settlement, which did not materially increase the total satellite interconnection costs, have been included in the total construction and related project administration costs at September 30, 1979.

**CORPORATION FOR PUBLIC BROADCASTING**

**Year Ended September 30, 1979**

**Grants, Contracts and Awards**
