IDENTIFIERS

Summarized are responses to questionnaires prepared by the United States General Accounting Office (GAO) and mailed to state-level environmental agency administrators. Also included in this survey are state program directors responsible for administering the Clean Air Act: the Federal Insecticide, Fungicide and Rodenticide Act: the Clean Water Act: the Resource Conservation and Recovery Act: and the Safe Water Drinking Act. Each section of this report contains a copy of the questionnaire together with a compilation of responses. These data are being used as the basis for a GAO report on the managerial obstacles that states face when implementing federal environmental programs. (Author/WB)

SECTION 1

INTRODUCTION

In December 1978, we mailed questionnaires to the State lead environmental agency administrators and program directors responsible for implementing:

- -- the Clean Air Acts
- -- the Clean Water Act;
- --- the Federal Insecticide, Fungicide and Rodenticide Act;
- -- the Resource Conservation and Recovery Act; and,
- '--the Safe Drinking Water Act. '

Nearly all administrators and program directors responded (See Table 1). Each of the following six sections in this volume includes a copy of the questionnaire together with the responses. Some responses (shown as shaded areas on the questionnaires) were not provided since they identified the respondee, repeated previous answers or were too voluminous.

U:S. GENERAL ACCOUNTING OFFICE

Survey Of State Implementation Of Federal Environmental Programs

General Instructions

The U.S. General Accounting Office is studying the problems faced by the States in implementing and administering Federal environmental Programs. The purpose of this questionnaire is to obtain information on your program(s) and to determine the significance of the problems State environmental Program managers face. We are sending similar questionnaires to the directors of the air pollution control, drinking water, pesticides, splid waste and water pollution control programs in all 50 States as well as to the administrator of each State's environmental agency.

While the questions that follow are based largely on our discussions with program officials in seven States, we have attempted to provide a format that will be readily adaptable to all States. If you feel that the format of any question does not fit your situation, please add the necessary explanatory notes. Moreover, feel free to make any additional comments on your program, this questionnaite or related topics.

If you have any questions, Please call Donald Hunter at (617) 223-6536.

After completing the questionnaire please return it in the self-addressed postage paid envelope by January 19, 1979.

MOTE: Throughout this questionnaire, EPA refers to the <u>Federal</u> Environmental Protection

Thank you for your cooperation. A

<u>PROGRAM REORGANIZATÍON</u>

- 4. Has your State had a major reorganization of environmental program and activities during the last five years? (Check one)
 - 1. _____ Yes
 - 2: ______ 1)0 . (CO TO QUESTION 8)
- 5. Was the latest major reorganization part of an overall executive reorganization plan for State government, or did it involve a reorganization of environmental activities only? (Check one)
 - . / Overall executive reorganization
 - 2. /_/ Environmental reorganization only
 - 3. ____ Other (Please specify)_____
- When was this latest major reorganization made of your State's environmental program? (Enter month and year)

--- (Month) (Year)- --- --

- To what extent, if any, did Federal legislation, (Efa regulations and policies) influence the decision to reorganize? (Check one)
 - 1. To little or no extent
 - 2. To some extent
 - 3. / To a moderate extent
 - 4. To a substantial extent
 - 5. _____ To a very great extent
- In your opinion will your State make a <u>major</u> reorganization of environmental programs and activities within the next two years. (Check one)
- 1. / 7 Definitely yes
- 2. / 7 Probably yes
- 3. 17 Uncertain (GO TO QUESTION 11)
- 4. Probably no (CO TO QUESTION 11)
- 15. ____ Definitely no (GO to QUESTION 114

9. Do you feel this reorganization will be part of an overall executive reorganization plan for State government, or will it involve a reorganization of environmental activities only? (Check one)	10. To what extent, if any, would rederal legislation, regulations and policies influence this anticipated reorganization? (Check one) 1
1. Overall executive reorganization	2. Sone extent
2 Environmental reormanization only	3. Moderate extent

Question 13. In your opinion, during the past 5 years, has your State's emphasis on environmental issues increased, decreased or remained the same?

Question 13a. Briefly explain why.

Substantially Increased (13)

- GA Georgia has moved aggressively to keep State daws consistent with Federal and obtain delegations where possible. In addition, Georgia has implemented an environmental resource management concept including allocation of ground and surface waters.
- MS Mississippi had been less environmentally aware than other States, but this started to change in the mid-70's as indicated by increasing State legislative support.
- SC Better public education -- and to some extent, the "chickenlittle syndrome."
- IN Increased requirements of Federal legislation.
- WI In part due to a change in administration and a resultant greater focus on environmental matters.
- AR Economic and population growth has been tremendous.
- LA Very great concern over solid waste incident -- snowball effect.
- MO New State laws.
- ND No response.
- WY Passage of Wyoming's 1973 Environmental Quality Act. Staffing from 19 to 87 persons in this time period. Substantive changes to enhance legislative coverage of environmental issues.
- AZ Much greater emphasis by State legislature and Governor to direct environmental programs by State personnel instead of by EZA.
- HI Primarily in response to Federal legislation.
- AK Change in State administration in 1974 -- emphasis of Governor on environmental quality.

Somewhat Increased (20)

- MA No Response.
- VT The high level of emphasis which existed in the early 70 has moderately increased due to public awareness and fuller knowledge of issues.
- NY Needed legislation has been passed concerning environmental protection and the initiation of regulatory programs.

- DE Federal enactment's mandate greater emphasis, i.e. Clean Air Act of 1977, Clean Water Act of 1977, RCRA, TOSCA
- PA New Federal legislation has stimulated the State to seek primacy for operation of a number of programs.
- AL The public seems to be demanding more environmental controls but this has not been translated into legislative action by increased budget or authority.
- FL Continued support by the executive and legislative branches of State government and continued public support.
- KY Environmental awareness was on the rise.
- NC News coverage of environmental emergencies and education.
- IL Program scope has expanded professional competance improved program coordination between media has started program impacts better understood.
- MI There was a more than substantial increase in the late 60's and early 70's. This began to level off in recent years as public attention focused on other issues.
- OH The emphasis has changed from an adversary to a ccoperative nature.
- NM Mineral extraction activity and public awareness.
- OK Gradual increase in number of people and bills involved in environmental area.
- IA The number of programs, budget and personnel has increased , mainly due to Federal funds.
- CO Air Pollution has been a major public concern of interest to the Governor and legislature. Radiation is a public Essue due to the presence of Rocky Plats Nuclear Weapons Plant in Denver area.
- SD No Response.
- Utah has had strong environmental programs for many years.
 Moderately increased funding and publicity have increased public awareness, but also has generated some negative reaction.
- CA The current administration is far more sympathetic to environmental concerns than the previous one. There has been strong public support since the late 60's, but business and labor groups have become more outspoken in their opposition.
- NV Local political awareness of programs. Rapid growth and limited resources.

No Change (4).

- CT No response.
- RI No response.
- Nj Major programs have been in place.
- WA We have been in this area for many years. Much work had already been done.

Somewhat Decreased (8)

- ME We have joined the establishment and have to fit our programs and goals in with all others unlike the peak periods of enthusiasm in the early 70's.
- TN Because of public's concept of priorities; inflation, energy and other considerations have been given priority. Their concern for toxics in the environment and their effect on health has remained high but they are confused about them because of a lack of knowledge in this area by the Federal EPA itself and the information (sometimes incorrect).
- MN. The basic regulatory programs are "in place" and environmental regulation is no longer a "cause celebre".
- KS Disillusioned by procedural requirements costly programs without logical benefits.
- NE Because job is being done quietly and is perceived by people to be reasonable and in balance with other needs. Emphasis is on "voluntary compliance" and working with the people.
- MT The job should have been done, but delay in enforcement, inadequate field work and poor implementation caused by the vast amount of Federal red tape, duplication and indecision.
- ID Backlash to environmental overkill 4 years ago general concern about economics.
- OR Emphasis has shifted from water to air because of water clean-up success. Apparent loss of State control is decreasing State approval of initiatives.

Substantially Decreased (0)

Question 14. Overall, do you feel that during the next 2 years the emphasis your State places on environmental issues will increase, decreased or remain the <u>same?</u>

Question 14a. Briefly explain why,

<u>Substan</u>ti<u>ally</u> Increase <u>(1</u>) 🕏

Governor wishes the State to control all environmental programs and keep EPA and Federal programs out: effect of environmental issues on State growth is unders tood .

Somewhat Indrease (20)

- Air problems and Solid waste problems will reach critical proportions during this period.

 Public avareness of the bazardous chemical problem.

 It's an inevitable outgrowth of increased Federal re-
- NĴ
- PA Involvement in a number of Federal law primacy programs will stimulate increased regulatory and planning efforts.
- New administration seems to be more positive in its approach at this time to environmental issues. However, there are severe budget problems at the State level.
- Governor's budget request supports a moderate increase in staffing for FY 1980-81.
- Strong interest in multi-media impacts of pollution control decisions.
- Changes to Air Act, RCRA, SDWA, CWA, TSCA, etc.
- Emphasis on multi-media coordination trade off is necessary to accomplish other social objectives.
- State needs to increase overall services to its people.
- AR whore population and economic growth expected. LA No response.
- NM Continued emphasis in extraction of minerals will increase problems associated with that extraction.
- OK Will eventually level off. Will continue for a period of time.
- Objective concern over toxics, Impetus of existing EPA programs will carry forward. New laws and possible available Federal funding.
- Coal development, oil development.
- This State is just becoming aware of some of the hazards SD and is starting to worry - hazardous and toxic substances is rather new to us, therefore interest can be generated.

UT Prospects for more enabling legislation are somewhat improved but budget increases will probably be negli-

Amendments to Federal environmental pollution control acts and recent State issues will probably result in an increase in emphasis on environmental issues.

No Change (17)

- Maine has a continuing interest in environmental protection but there are "no" hot issues.
- The current effort is considered to be in balance when considering all other functions of State grants.
- ΝY No substantial new legislation is anticipated.
- Georgia's program is already consolidated in one agency with most Federal programs, NPDES, 205 (g), PSD, etc. delegated to State. The "hold-the-line" growth policy of government will minimize change.
- Proposition 13 fever will impact all State programs.
- NC Have reached a Plateau.
- No Response.
- Believe that energy considerations will prevent further increase.
- Retention of Governor and Director. ÔН
- Budget process underway, Governor recommends status quo for next two years.
- I think we are reaching a level of equilibrium in environmental programs, with activity being geared at a level people have come to expect and accept. Increased inflationary pressure could be harmful.
- CO No response.
- Present legislative candidates were elected on platforms dedicated to limiting general governmental growth and specific regulatory programs.
- Government spending will be the big issue.
- Federal intervention in Alaska on \$\P2 land issues and .
- whales wi'' generate a negative reaction among populace. Programs static at State level still much concern about economics.
- Much of the important work is done. We are now responding to Pederal initiatives.

Somewhat Decrease (7)

- The economy and development of activities that will produce jobs or attract industry are major social and political issues.
- Public concern for reducing spending. Public losing faith with changing restrictions imposed by Federal regulations and EPA's.

- Public support is diminishing for all government especially regulatory programs which are perceived to have a negative economic impact.
- More conservative mood currently after a few years of considerable activity (in both legislature and executive branches).
- We plan and plan as required by EPA but do little.
- · CA State Senate Committee assignments were recently stacked
 - against environmental concerns.

 OR Greater Federal intervention will further decrease State willingness to operate programs without ability to adapt to State conditions.

Substantially Decrease (0)

- Question 15. How long does it usually take your State to accept an EPA grant which supports program administration costs but does not require additional State.funds?
- Question 16: How long does it usually take your State to accept an EPA grant which supports program administration costs and requires some level of State funding?

Acceptance of EPA Grants (Months)

U.S. GENERAL ACCOUNTING OFFICE

Survey of State Implementation of The Clean Air Act

General Instructions

The U.S. General Accounting Office is studying the problems faced by the States in implementing and administering Federal environmental programs. The purpose of this questionnaire is to obtain information on your program(s) and to determine the significance of the problems State environmental program managers face. We are sending similar questionnaires to the directors of the air pollution control, drinking water, pesticides, solid waste and water pollution control programs in all 50 States as well as to the administrator of each State's environmental agency.

While the questions that follow are based largely on our discussions with program officials in seven States, we have attempted to provide a format that will be readily adaptable to all States. If you feel that the format of any question does not fit your situation, please add the necessary explanatory notes. Moreover, feel free to make any additional comments on your program, this questionnaire or related topics.

If you have any questions, please call Donald Hunter at (617) 223-6536.

After completing the questionnaire please return it in the self-addressed postage paid envelope by January 19, 1979.

NOTE: Throughout this questionnaire, EPA refers
i the <u>federal</u> Environmental Protection
Agency.

Thank you for your cooperation.

Question 11. In your opinion, what has been the major barrier, if any, to passage of needed State laws?

ME Failure to see need for air pollution control.

NH Session frequency (biennial).

RI General resistance to any environmental legislation.

VT Legislature does not want to earmark funds and require source to pay twice (taxes and fee).

NJ Vested interest opposition.

NY Political differences between Governor and Legislature on I&M.

DE Not applicable.

MD Premature - legislation to be considered this session.

PA Program funding.

VA Cost to taxpayers on program of questionable long term benefits.

AL Transition between administrations.

FL Multitude of changes required for adoption of Federal requirements based on State laws, statutes and administrative codes—all part of legislative required changes.

KY Philosophical differences, lack of supportive data.

MS Uncertainties as to needs.

NC .Philosophical differences.

SC Credibility gap.

TN EPA (Congress) forces game plan.

IL No required legislation has yet been considered. Major barriers during current (Spring '79) session will be the Proposition 13 reaction and general negative attitude toward Federal environmental programs.

IN No public support. High cost to consumer. Unclear

benefit.

MI New requirements haven't been considered by legislature yet.

MN · Rural legislators feel program unnecessary.

- OH Anticipate public opposition to Inspection/Maintenance.
- WI Inadequate time to educate on all aspects of CAA and its State impacts.
- AR Concern by legislators as to appropriate administration.
- LA State resources required to implement and administer the program.
- NM Legislature-meets to consider non-budget matters only once every two years.

OK Lack of public support.

TX State philosophical differences with intent and potential effectiveness of Federal legislation--I&M, Non-compliance penalty.

- Philosophy of the Legislature and the people of Iowa. IA If these laws are passed, it will be entirely due to federal blackmail.
- State legislature does not share environmental control KS enthusiasm" evidenced by Congress in 1977 CAA amendments.
- MO Lack of manpower.
- State Legislature slightly negative toward environ-NE mental legislation.
- ∞ .Credibility.
- ND Lack of continued funds. .
- SD Federal inflexibility.
- UT Resultant cost to the State and private sector. WY
- Philosophical objection to any program growth.
- ΆZ Who defines "needed".
- Anti-government attitudes on the part of elected officials plus concern that any new regulations will have adverse economic or public impacts.
- ΗI Resources required to implement and administer the program.
- The law was passed between Legislative session-(odd NV year).
- Department does not need nor intends to set up an ex-AK pensive permit fee system.
- General anti-environment attitude among State legisla-ID
- OR State versus Federal control.
- Lack of confidence by Governor, public and the State agency as to how much pollution reduction will occur WA due to an I&M program.

Question 20. In your opinion, what has been the major barrier, if any, to preparation of your revised SIP?

- ME Lack of firm standards and concise guidance.
- NB Qualified personnel to devote time and attention to requirements.
- RI Change in ozone standards and economic factors associated with RACT requirements.
- VT Timing -- if the State had 6-9 months more, a more complete plan with greater public participation could have been developed.
- NJ Resources, short deadline.
- NY Not enough time to fulfill public participation process.
- DE EPA moving targets -- ozone standard, Stage II, etc. Evaluating public hearing comments.
- Evaluating public hearing comments.

 MD Manpower' -- technical information regarding non-traditional sources.
- PA Lack of staff resources and time.
- VA Lack of timely guidelines from EPA.
- AL Fluctuating EPA guidance on the criteria to be used in evaluating the SIP.
- FL EPA continued changes to basic criteria and educating MPOs on the air quality problems.
- KY Lack of personnel to meet time restrictions.
- MS General feeling all requirements not necessary to protect public health. Don't have broad base of support.
- NC Available State resources (staff).
- SC Lack of any real belief by Governor and SC air staff, that the revisions are necessary or will result in improvement.
- TN Lack of resources to do this and carry on day-to-day responsibilities.
- Required adoption of new State regulations and delays in issuing new and revised regulations by EPA.
- IN Resources (staff and money)
- MI Lack of staff and time. Late and changing guidance from EPA.
- MN Lack of qualified personnel,
- OH Experienced personnel; untimely Federal guidance; and unreasonable deadlines.
- WI Inadequate experienced technical staff and unreasonable deadlines.
- AR Lack of necessary preparation time.
- LA Lack of correct, clear or specific guidance by EPA -non-uniformity of guidance from EPA region to region,
 confusion over announced changing O standard not promulgated until after SIP due.

- NM Unrealistic deadlines set by Congress. Problems in obtaining feedback from EPA Regional Office on proposed regulations, etc., on a timely basis.
- OK Public has not believed that this is a real problem in Oklahoma.
- TX Changing EPA requirements, State/EPA difference of opinion on requirements for an approvable plan.
- IA State legislation. Resources. Local opposition to the Act.
- KS Lack and lateness of provision of EPA specific guidance on requirements, lack of staff for timeframes provided.
- MO Adequate manpower.
- NE EPA contractual assistance not completed.
- CO Lack of resources. Lack of EPA support.
- ND Manhours required to draft and finalize a revised SIP for Cost/Benefits of effort.
- SD None.
- UT Short timeframe and lack of adequate staff.
- WY Available State resources.
- A2 Resources and time constraints.
- CA Poor organization of air program (inadequate state/local coordination).
- HI Confusion over what CAA Amendments meant.
- NV Time and resources.
- AK Lack of public concern and lack of auto emission control data to characterize CO problems.
- ID Available resources.
- OR Need to gather more data. Lateness of EPA guidance. Public participation process.
- WA Late and changing guidelines. Inadequate time. Too much detail in law.

Question 21. Will your State be required to submit a nonattainment plan?

Question 22. Do you feel your State will have adequate resources (financial and staff) to effectively manage that plan?

Key:

DY - Definitely Yes PY - Probably Yes PN - Probably No DN - Definitely No U - Uncertain

Not Currently Administering Program and Do Not Plan To (8)

MM	WY
OK	N۷
IA	AR
KS	IE

Question 28. Briefly explain the major reason why your State does not plan to administer the program.

- NM We have no non-Federal sources subject to NESHAPS within our area of jurisdiction.
- OK Federal guidance and standards not acceptable to State.
- (A No enabling legislation.
- KS Cannot provide resources needed to effectively administer.
- WY No major NESHAPS sources in the State.
- NV Another resource intensive program with little benefit. EPA regulations inadequate.
- AK Regulations are of questionable relevancy; no problem in State.
- ID Resources, especially for asbestos inspections of demolition projects.

Question 29. Which of the following best describes the situation in your State regarding the administration of a non-compliance penalty program under Section 120 of the CAA?

Currently Administering the Program (6)

KY MN CO ND SO CA

, Not Currently Administering Program But Plan To (21)

ME AL . NC MO ΗI DΕ ΜI MD FL TN AR NE NV NJ NY VA IN KS UT ΙĐ MS .

Three States -- PA, IL, and WI -- stated they do not know whether they will administry the program.

Not Currently Administering Program and Do Not Plan To (15)

NH RI VT SC OH LA NM OK TX IA WY AZ AK OR WA Question 30. Briefly explain why your State will not administer the program.

NH Commission recommendation.

RI Unnecessary. Major sources in compliance. .

VT Will relook at program in future.

PA Do not yet know what we will do.

- SC It is pointless, since EPA will review and second-guess every decision. Wasteful.
- OH Legal nightmare. Serves no useful purpose. Manpower intensive.
- WI A determination has not been completed concerning State attitude on the assumption of this program.
- LA Lack legislative authority. Such penalties not needed to achieve compliance.
- NM Our State air pollution program is based upon attempting to obtain voluntary compliance prior to imposition of penalties.
- OK State laws not compatible with this philosophy. Not beneficial to State. Too big of an administrative burden.
- TX TACB philosophy is contradictory to concept. Question effectiveness.
- IA No enabling legislation.
- WY Politically unpopular. Better to work through courts for penalties.
- AZ Against policy. Administration would be expensive, complex and resource intensive.
- NV Additional Legislation is needed.
- AK Not relevant -- would be a very sensitive program to implement and would take more resources than it would be worth.
- OR Little need; wait to see what is required and extent of EPA oversight.
- WA Don't agree with concept, too much detail in law, too much EPA override.

Question 31. Please provide the following information regarding the number of professional positions in your program as of January 1, 1979. (Enter numbers in space provided. If none, enter 0).

Question 32. In total, how many authorized professional positions do you expect your program to have by October 1, 1979?

Rey:

PA Positions Authorized
PF Positions Filled
NR No Response

Note: All numbers have been rounded.

Question 35. In your opinion, what has been the major barrier to filling positions?

- ME (a) Governor had to approve each refill of position.

 * He took his time.
- NH (a) Salary scales established: (b) Positions structure in State government: (c) Priority established for new positions.
- VT (á) It is not the number of vacancies as it is we cannot find middle managers with some experience.
- NJ (a) Civil Service.
- NY (a) State Salary Structure.
- DE (a) Availability of needed disciplines.
- MD (a) State Salaries: (b) Shortage of trained personnel, i.e. engineers, meteorologists with diffusion modeling backgrounds.
- PA (a) Salary Structure: (b) Lack of qualified candidates.
- AL (a) State Civil Service Procedures.
- KY (a) Salaries; (b) Lack of qualified applicants.
- MS (a) Lack of trained personnel.
- NC (a) Available applicants lacking the minimum experience and educational requirements.
- SC (a) Salary Structure: (b) State personnel procedures:
- (c) Competition with water programs.
- TN (a) Inadequate Salaries.
- IL (a) Cumbersome State procedures; (b) Inadequate salary structure.
- IN (a) Salary structure: (b) Availability: (c) Hiring procedures.
- MI (a) Difficulty in finding experienced people to work . for low State salary.
- MN (a) Lack of qualified personnel on civil service lists;
 - (b) Extremely slow State Civil Service procedures. .
- OH (a) State Salary Structure.
- WI (a) Availability; (b) Salary; (c) Procedures.
- AR (a) Lack of qualified applicants; (b) Lack of adequate, salary structure.
- LA (a) Low salary.
- NM (a) Length of time required under State personnel procedures to establish positions, request lists of eligibles, and hire personnel; (b) Inability to attract qualified engineers at State salaries for engineering job classes.
- OK (a) State funding limitation.
- TX (a) State salary structure and competition with industry; (b) Highly technical requirements.
- IA (a) Salary; (b) Temporary Federal funding of positions.

- 'KS (a) Poor salary structure tied into Civil Service requirements have made it impossible to employ and retain needed engineering staff.
 - MO (a) Salary; (b) Personnel requirements.
 - NB (a) Salary; (b) Lack of available trained people.
 - CO (a) Civil Service procedures; (b) Salary limitations.
 - ND (a) Available funds -- PSD Administration and implementation has been and continues to be a severe drain upon program funds.
 - SD (a) State salary structure; (b) Location of state capitol.
 - UT (a) Lack of timely awarding of Federal funds.
 - WY (a) Availability of applicants with applicable experience who would accept State salary level.
 - AZ (a) The salary structure versus responsibility and stress ratio as compared with private industry. Technical people are currently enjoying a sellers market.
 - CA (a) (Short-term) hiring freeze; (b) State Civil Service system; (c) State salary structure.
 - HI (a) Salary structure.
 - NV (a) Salary structure; (b) Temporary nature of Federally supported positions in a high employment State.
 - AK (a) State reluctance to create new positions; (b) Remoteness of Alaska to potential candidates.
 - ID (a) State salaries for engineers and senior technical positions.
 - OR (a) State salary structure and fringe benefits; (b)
 Availlability of qualified people; (c) State Civil
 Service procedures and policies.
 - WA (a) Difficult to find qualified candidates; (b) Registers not kept up to date.

Question 36. For the two year period ending December 31, 1978, please enter below: a. the approximate number of professional staff that have left your program voluntarily to take employment elsewhere, and b. the approximate number of those who left who had three or more years of experience.

Question 37. If you have had professional staff leave during the past two years, what are the major reasons most often cited for leaving?

NR - No Response

	Ouestion 36			Question 37
<u>State</u>	Number Who Left	With 3 Years Experience		Reasons Cited for Leaving
ME	5	4	(a)	Pay: (b) Reorganization forced them to move.

Question 41. Overall how would you characterize your relationship with EPA regional staff?

Number of States Responding

Very Good	7
Good	24
Neither Good Nor Bad	9
Poor	5
Very Poor	O

Question 42. To what extent, if at all, do you feel the EPA headquarters staff understands the problems you face as a State program director in administering your program?

Number of States Responding

Very Large Extent	O
Substantial Extent	ž
	2
Moderate Extent	4
Some Extent	17
Little or No Extent	22

Question 43. Overall, how does the current level of EPA headquarters staff understanding of your problems impact on the effectivenes of your program?

Number of States Responding

Significant Positive Impact		0
Positive Impact	•	5
Little or No Impact		6
Negative Impact		24
Significant Negative Impact		10

Question 44. To what extent, if any, has EPA monitoring of your performance under CAA assisted you in improving program performance?

Number of States Responding

Very Large Extent	` 0
Substantial Extent	3
Moderate Extent	4
Some Extent	16
Little or No Extent	22

Question 45. To what extent if any, do your feel your viewpoint as a State program director is given adequate consideration in the following EPA processes?

•	Regulation Making	Policy Making
	Process	Frocess
Very Great Extent	0	0
Substantial or Great Extent	: 1	1
Moderate Extent	7	5
Some Extent	17	1 1
Little or No Extent	2 0	28

Question 46. Please enter the names of the organizations that you feel best represent your views to:

a. the U.S. Congress; and b. the EPA.

Organization)	Number of States U.S. Congress	Responding EPA
State and Territorial Air Pollution Program		
Administrators (STAPPA)	23	26
None .	11	10
National Governor's Association (NGA) 6	4
Governor's Office	· 3	0
Other (Organizations named only or	nce: 8	10

Note: Responses not additive because of multiple State responses.

Question 47. Please enter below the name of the organizaortion(s) you are most likely to contact when you need information or assistance to carry out your program responsibilities.

Organization	Number of States
EPA Regions	18
EPA	12
Other States	8
State Organizations	8
Local Agencies and Governments	3
State Legislature and their staffs	2
Numerous trade and technical organizations	2
None	3
Public Interest Groups '	2

U.S. GENERAL ACCOUNTING OFFICE SURVET OF STATE IMPLEMENTATION OF THE CLEAN. WATER ACT

General Instructions

The U.S. General Accounting Office is Studying the problems faced by the States in implementing and administering Federal environmental programs. The purpose of this questionnaire is to obtain information on your program(s) and to determine the significance of the problems State environmental program managers face. We are sending similar questionnaires to the directors of the air pollution control, drinking water, pesticides, solid waste and water pollution control programs in all 50 States as well as to the administrator of each State's environmental agency.

While the questions that follow are based largely on our discussions with program officials in seven States, we have attempted to provide a format that will be readily adaptable to all States. If you feel that the format of any question does not fit your situation, please add the necessary explanatory notes. Moreover, feel free to make any additional comments on your program, this questionnaire or related topics.

If you have any questions, please call Donald Hunter at (617) 223-6536.

After completing the questionnaire, please return it in the self-addressed postage paid envelope by January 19, 1979.

NOTE: Throughout this questionnaire, EPA refers to the Federal Environmental Protection Agency.

Thank you for your cooperation.

Question 11. In your opinion, what has been the major barrier, if any, to passage of State enabling legislation?

None. ME NH None. RI Required State resources. VT Reliability of Federal funding. N.T Resource committment without Federal funds. NY Not applicable. DE No resp Probability of cont MD have to bear cost of the program if Federal support is removed. PΆ Lack of constituency within and outside State legislature willing to support the need for such legislation. VA Opposition to Federal mandated programs without Federal monies: WV Not applicable; have not had any problems in getting enabling legislation. AL, No response. FĹ No new program and personnel (government growth). Lack of education on part of legislature. ΚY MS Inability of EPA legal staff to define concretely needed changes in State law. NC Philosophical differences. SC None. TN The experience gained by the St dollars (too late) demands (2x) service and the best result that can be achieved is (1/2 x). ΙL No response. ,IN State resources required to implement and administer the program: ' 'MI No response. MN Unaware of Federal requirements and lack of tr Federal support for Federally inspired programs. OH Other priorities. WI National uniformity and State desire to impose no stricter requirements than to protect local industries. LΑ Meeds for enabling legislation is unclear. State philosophical differences. NM OK Fear Federal funds. ΤX No response. ľA Lack of State commitment and Federal definition of program,

Poor communications at a political level on the concept of complimentary State/Federal efforts. States are con-

cerned by costs of Federally mandated efforts.

KS

- MO Fear of requirement for State to fully fund an environmental program that was Federally initiated.
- NE Legislators with little environmental interest fear that agricultural and rural constituents will be impacted.
- CO Legislature feets Federal legislation should be implemented by the Feds.
- MT Too much State and Federal control.
- ND No response.
- UT Reaction to EPA imposed, legislative and regulatory requirements.
- WY No response.
- AZ Water rights issue.
- CA Not Applicable.
- HI Necessary financial structure to implement the legislartion (budgetary constraints).
- NV The major question in passage of existing Act was cost to State. The only substantial needed legislation is for non-point source control. The two main questions relative to NPS legislation is cost and fear of providing for additional Pederal intervention.
- AK State unwilling to accept parts of the package not useful (in fact not in best environmental interests) for Alash.
- ID Leg: lature doesn't see the need and lack of available resources.
- OR Lack of flexibility blind pursuit of a national mediocracy.
- We have not had a major problem. Enabling legislation was passed so that the State could carry out primary role.

Question 12. Please provide the following information regarding the number of pr your CWA pro

Question 13. In total, how many autho do you expect your program to have by October 1, 1979.

Question 16. In your opinion, what has been the major barrier to filling positions?

ME (a) Salary structure.

:IY

NH (a) Perceived temporary nature of Federally supported positions: (b) Availability of disciplines needed;

(c) State salary structure.

RI (a) Lack of qualified persons available with residency requirement.

VT (a) Low salary paid by the State.

NJ (a) Low salaries; (b) Civil Service System.

- (a) Availability of qualified personnel because of inadequate salary.
- DE (a) Salary levels in professional ranks; (b) Lack of necessary experience.
- MD (a) State requires contractual employment, no benefits; (b) State ceiling on new positions including federal.
- PA (a) Existing State Civil Service procedures; (b) New lack of authority to increase complement.
- VA (a) State salary structure not competitive for engineers and experienced persons.
- WV (a) State salary structure; (b) Civil Service procedures; (c) Perceived temporary nature of Federally supported positions.
- AL (a) Salary structure for engineers; (b) Personnel procedures.
- FL (a) Salary; (b) Regulatory nature of organization; (c)
 Civil Service procedures; (d) Lack of career ladder;
 (e) Adversary atmosphere.

KY (a) Starting salaries of professional staff.

S (a) Salary structures.

- NC (a) Lack of available applicants with required experience and education.
- SC (a) Inadequate State salary; cannot compete with Federal and private salary; (b) Lack of trained personnel in this specialized field.

TN (a) State salary.

- IL (a) Lack of competitive salary structure relative to Federal and private.
- IN (a) Shortage of trained personnel; (b) Federal pay scales generally much above State scales; (c) Ability of consultants to pay above market prices for personnel.

MI (a) Availability of experienced engineers.

MN (a) Inability of EPA to provide funds at the time planned for; this affects existing positions with end dates as well as new positions.

- ЮH (a) Withholding of Federal share of program funds. WI (a) High salary offerings by consultants competing for
- limited supply of engineers. LA (a) Salary offering: (b) Availability of (lack) of some professional disciplines.
- NM (a) State personnel office.
- QK. (a) No response.
- TΧ (a) Graduate engineers are in short supply. This slows hiring process but has not had a major impact on the 'program.
- ľΑ (a) Lack of sufficient long-term funding;(b) Difficulty in finding engineering and planning expertise at State salaries.
- KS (a) Şalary.
- (a) \$tate merit system administrative process; (b) Ar-MO chaic and low salaries.
- NE (a) Salary levels for engineer positions; (b) Lack of potential for upward mobility in other positions.
- ∞ (a) Bad press on government employees;(b) Availability of disciplines in professional fields: (c) Slowness of personnel system.
- MT (a) Unavailability of personnel with qualifications needed;
- (b) Salary.,
 (a) Level of salaries in environmental engineer cate-WY gories established by State Personnel Division.
- AZ (a) State personnel procedures
- CA (a) Competitive salary structure with Federal and local governments and private firms; (b) State hiring freeze; (c) Uncertainty regarding level and availability of Federal funding.
- (a) State of Hawaii Civil Service hiring procedures.
- NV (a) Salary;(b) Availability of qualified personnel in the State.
- AΚ (a) Getting approval of personnel through State system;
 - (b) State hiring procedures.
- (a) State salary structure. ID
- (a) EPA pays substantially more money for comparable OR positions than States do.
- WA (a) Salary for engineer classes too low.

Question 17. For the two year period ending December 31, 1978, please enter below: a. the approximate number of professional staff that have left your program voluntarily to take employment elsewhere; and b. the approximate number of those who left who had three or more years of experience.

Question 18. If you have had professional staff leave during the past two years what are the major reasons most often cited for leaving?

Key: NR - No Responsè

Question 17

Question 21. If the funding level is not sufficient or you are unsure, what program(s) will be underfunded?

- VT Full workload not known until experience gained as to bow much EPA will require.
- NJ NPDES and Dredge and Fill (proposing to charge fees for permits).
- NY Permit administration, particularly related to toxic substances control; water quality monitoring; 208 areawide planning; 115 in-place pollutants.
- DE Almost all programs suffer to some extent compromises are made.
- MD Pretreatment Wasteload allocation; 208.
- PA State input into program not kept pace with inflation plus rumblings that OMB wants to eliminate 106 funding.

 'If Feds drop funds, State will drop programs.
- WV Section 106.
- KY NPDES permitting; monitoring.
- SC Pretreatment; extensive work on toxic controls; analytical work; facility monitoring; environmental analysis; model verification; cause and effect analysis.
- TN À11.
- IL 106 permits/enforcement.
- IN Unable to determine what, if any, 205(g) funds may be available. Without these, definitely no.
- MI New pretreatment program under NPDES, no additional funds for this.
- OH Pretreatment and toxics.
- WI Pretreatment and compliance monitoring.
- OK "Gut feeling"--EPA always demands more of us than we have the resources to provide.
- IA. 106 is clearly underfunded, 205(g) will diminish with grants drop, but staffing can't fluctuate as easily.
- KS Difficult to forecast either the cost of program administration, or the amount available through Section 205.
- CO Enforcement and planning.
- UT Possibly NPDES, pretreatment, operations and maintenance.
- WY All except 265(g) CMAG Program.
- CA Wastewater facility construction program, NPDES permits, clean lakes, underground injection control, dredge and fill, surveillance and monitoring and pretreatment.
- AK NPDES; and D/F; if we take it on. Also 205 is only for limited time.
- ID Effluent limitations development, a rveillance, operator training, non-point source control, compliance monitoring.

U.S. GENERAL ACCOUNTING OFFICE

Survey Of State Implementation Of The Federal Insecticide, Fungicide And Rodenticide Act

General Instructions

The U.S. Ceneral Accounting Office is studying the problems faced by the States in implementing and administering *Federal environmental programs. The purpose of this questionnaire is to obtain information on your program(s) and to determine the significance of the problems State environmental program ranagers face. We are sending Similar questionnaires to the directors of the air pollution control, drinking water, pesticides, solid waste and water poliution control programs in all 50 States as well as to the administrator of each State's environmental agency.

While the questions that follow are based largely on our discussions with program officials in seven States, we have attempted to provide a format that will be readily adaptable to ail States. If you feel that the format of any question does not fit your situation, please add the necessary explanatory notes. Moreover, feel free to make any additional comments on your program, this questionnaire, or related topics.

If you have any questions, please call Donald Runter at (617) 223-6536.

After completing the questionnaire please return it in the self-addressed postage paid envelope by January 19, 1979.

NUTE: Throughout this questionnaire PA refers to the <u>Federal</u> Environmental Protection Agency.

Thank you for your cooperation.

Question 10. In your opinion, what has been the major barrier, if any, to passage of State enabling legislation?

CT ' The usual politics. ME None. MA Power struggle within State government. NH No barriers. RΙ None. , VT No response. NJ Not applicable. NY None. DΕ None MD Not applicable. PA No response. Continued Federal intervention with States' rights. VÀ Pressure brought to avoid one more area of governmental interference. AL Don't like feds. dictating programs for State to carry out. FL Concern over reactive regulation and attendant costs. GA Federally mandated program which was lacking in definition by EPA. KY Probability of continued Federal funding support. MŞ Federal requirement. Knowledge that it's a federally mandated program with NC insufficient federal funding. Apprehension/regarding over-regulation. SC The Legislators attitude toward EPA in general which ·TN is purely negative. ΙL Not applicable. IN Perceived misdirection of Federal pesticide programs. MI None. M Not applicable. ΟĤ Invasion of State authority -- Philosophical differences. Legislature wanted a list of restricted use pesticides WI prior to enactment to know who would actually be effected by the legislation. Other federal programs, i.e. OSHA and their inability to be implemented. AR Not applicable. LA None. NM Loss of State control over pesticide usage within State boundaries. OK Resistance to apparent Federal take over and threats of funding withdrawal. TX Legislature didn't appreciate Federal law mandating State actions.

ΙA We have adequate legislation.

KS None.

MO Another Federal program started and dropped on States.

MT Not applicable.

ND Philosophical differences between State and Federal.

SD Not applicable.

Uncertainty of EPA programs. Legislation passed 1973. UT

WY

CA State already has a comprehensive pesticide regulatory program.

ΗI No response.

NV Confinued Federal funding.

AΚ No response.

OR. Philosophical differences between State & Federal needs.

WA A small percentage of people not wanting new legislation which would increase regulatory authority.

Question 11. Does your State have an approved State plan under Section 4 of FIFRA?

<u>Yes (44</u>	<u>)</u>						•,
ME.	ŊĴ	AL	sc	HO	ΩX	SD	OR

CT	CA						

Question 12. To what extent, if any, has each of the following impeded your preparation and submission of a plan to EPA for approval?

Key:

1.

- l Very Great Extent ·
- 2 Substantial or Great Extent
- 3 Moderate Extent
- 4 Some Extent
- 5 Little or No Extent

<u>State</u>	Amount Federal	Probability Continued Federal Funding	Regul	ent EPA ations & delines	State Philosophical Differences With Intent of Federal Legislation	State Resources Required To Implement and Administer the Program
СŦ	· 5	4		5	5	5
CA	5	5	-	3	٠2	5

Question 13. In your opinion, what has been the primary reason your State has not submitted a State plan to EPA for approval?

- CT Procrastination on formulating regulations (State). Will submit final regs. on 1/31/79.
- CA EPA attention to minutiae and failure to meet review deadlines.

Question 14. Which of the following best describes your situation in entering into a cooperative enforcement agreement with EPA?

Currently Have A Cooperative Enforcement Agreement (32)

СŤ.	NJ	VA .	NC	MN	OK	MT	ΗI

UT	3	2	3	2	η· <u>3</u>
WY	5	5	1	1	5
AK.	5	5 .	. 5	4	5

Question 19. In your opinion, what is the primary reason your State did not enter into a cooperative enforcement agreement?

- MA New State law not implemented to point where this is possible. Power struggle noted in 10 above will have to be resolved before enforcement agreements are possible.
- RI Negotiating now; didn't have the time before.
- AL We do not believe a viable State Pesticide Program can be undertaken and run under rigid requirements mandated from EPA Headquarters, Washington. We do believe a program of cooperation can be undertaken where the State enforces its laws, the feds. enforce their law, on a cooperative basis, toward a common objective of a national pesticide program of responsible pesticide usage. Not all knowledge is housed in D.C. Some has been deposited in other parts of the country.
- FL Philosophical differences. EPA's first action is to enforce. Florida prefers to give the violator an opportunity to correct before taking an enforcement action.
- SC Could foresee no real benefit at present time. Too much red tape. Can continue to do the job with State funds. Too much federal interference. Federal guidelines would result in inefficient use of manpower and equipment and require extra paperwork.
- The early philosophy of EPA regarding enforcement seemed aimed at effecting punitive action rather than securing compliance. It also seemed that the agreement would be designed to have the State work for EPA not cooperate with EPA.
- OH Philosophical differences with EPA enforcement policy.

 Some of the requirements placed on the State by EPA.

 We have an effective program implemented at the present time and do not feel that it is necessary to always accept someone else's standards in order to accomplish the job. We would rather contract to accomplish the job than be burdened with establishing standards and/or systems to conform to EPA guidelines when those required circumstances are no more effective in the management of the required tasks. Decided to take On enforcement grant because the State is willing to endure the problems mentioned above for addi-

tional resources upon which to draw.

- MO Unknown requirements for auditing by Federal agency and new interpretations and requirements by EPA as you progress into program.
- UT. We don't believe in the philosophy of enforcement agreements.
- WY Don't want to be told what's good for us if we take their money.
- AK Have not seen advantages of doing so. To do so would create a reporting system without any tangible gains.

Y

Question 20. Under the 1978 FIFRA amendments, will your State assume primary enforcement responsibility for pesticide use violations?

Key:

DY Definitely Yes
PY Probably Yes
U Unsure
PN Probably No
DN Definitely No

NJ		AL	WY	NA
DE	-	SC	OR	

Other - Please Explain (2)

IL Uncertain.

MN Continue State licensing program which was in place before FIFRA.

Question 33. Overall, how would you characterize your relationship with EPA regional staff?

Number of States Responding

Very Good	•	32
Good	e	14
Neither Good nor Bad		0
Poor		0
Very Poor		0

Question 34. To what extent, if at all, do you feel the SPA headquarters' staff understands the problems you face as a State program director in administering your program?'

Number of States Responding

6	
Very Large Extent	3
Substantial Extent	4
Moderate Extent >	13
Some Extent	19
Little or No Extent	7

Question 35. Overall, how does the current level of EPA headquarters' staff understanding of your problems impact on the effectiveness of your program?

Number of States Responding

Significant Positive Impact	2
Positive Impact	5
Little or No Impact	19
Negative Impact	15
Significant Negative Impact	5

Question 36. To what extent, if any, has EPA monitoring of your performance under FIFRA assisted you in improving program performance?

Number of States Responding

Very Large Extent	1
Substantial Extent	3
Moderate Extent	10
Some Extent	16
Little or No Extent	16

Question 37. To what extent, if any, do you feel your view-point as a State program director is given adequate consideration in the following EPA processes?

·	Regulation Making Process	Policy Making Process
Very Great Extent	1	1
Substantial or Great Exte	ent 3	1
Moderate Extent	* 8	7
Some Extent	21	25
Little or No Extent `	13	12

Question 38. Please enter the names of the organizations that you feel best represent your views to: a. the U.S. Congress and, b. the EPA.

Organization	U.S. Congress	EPA
American Association of Pesticide Control Officers (AAPCO)	27	20
National Association of State Directors of Agriculture (NASDA)	17	11
State FIFRA Issues Research and Evaluation Group (SFIREG)	2	. 11

U.S. GENERAL ACCOUNTING OFFICE

Survey Of State Laplementation Of The Resource Conservation and Recovery Act ,

General Instructions

The U.S. General Accounting Office is studying the problems faced by the States in implementing and administering Federal environmental programs. The purpose of this questionnaire is to obtain information on your program(s) and to determine the significance of the problems State environmental program managers face. We are sending similar questionnaires to the directors of the air pollution control, drinking water, pesticides, solid waste and water pollution control programs in all 50 States as well as to the administrator of each State's environmental agency.

While the quentions that follow are based largely on our discussions with program officials in seven States, we have attempted to provide a format that will be readily adaptable to all States. If you feel that the format of any question does not fit your situation, please add the necessary explanatory notes. Moreover, feel fire to make any additional comments on your program, this questionnaire or related topics.

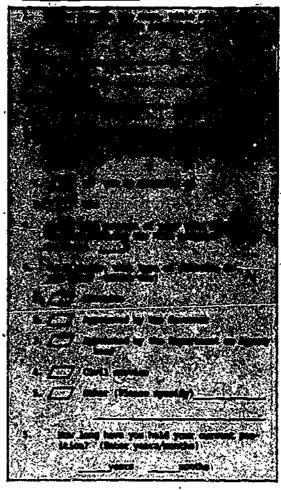

If you have any questions, please call Donald Hunter at (617) 223-6536.

After completing the questionnaire please return it in the self-addressed postage paid envelope by January 19, 1979.

NOTE: Throughout this questionnaire, EPA refers to the <u>Federal</u> Environmental Protection Agency.

Thank you for your cooperation.

RESPONDENT INFORMATION:

Question 20. In your opinion, what has been the major barrier to filling positions?

- CT (a) Low salary for qualified professionals; (b) Statewide freeze (temporary).
- ME (a) Non-competitive state salaries--3 Federal positions have been vacant for an average of 7 months because State cannot find people willing to accept low salary.
- MA (a) State Civil Service procedures; (b) State salary structure.
- NH (a) Temporary status of job.
- RI (a) Availability of disciplines.
- VT (a) Some difficulty in filling middle management positions.
- NY (a) Delays in obtaining EPA program grant with subsequent delay in establishing positions.
- MD (a) State salary structure; (b) State Civil Service procedures.
- PA (a) Freeze policies.
- VA (a) State salary structure; (b) Availability of professional skills.
- WV (a) Salaries; (b) Civil Service procedures.
- AL (a) Salary; (b) State funding availability.
- FL (a) State Civil Service procedures.
- KY (a) Low salaries; (b) Undependable Federal funding.
- MS (a) Our State Classification Commission; (b) Budget Commission.
- NC (a) Delays in receiving EPA award notice coupled with the State's inability to respond quickly to personnel needs.
- SC (a) Lack of time on the part of existing staff to recruit and evaluate applicants.
- TN (a) Salaries.
- 1L (a) Qualified personnel willing to work at present salary rate.
- IN (a) Salary; (b) Availability of specific disciplines; (c) State personnel procedures and assistance.
- MI (a) State Civil Service--regulatory requirements; (b) Qualifications of applicants.
- OH (a) State salary structure.
- WI (a) Tedious procedures that must be followed.
- AR (a) State salary structure; (b) Ceilings on staff levels.
- LA (a) Low State salaries.
- NM (a) Internal red tape: (b) State personnel regulations.
- OK (a) Inadequate salaries; (b) Lack of individuals with
- expertise.

 TX (a) Lack of qualified applicants; (b) Non-availability of disciplines needed.

(a) Ceilings on authorized staff; (b) Federal Funding; IA

(c) Salary structure.

(a) State salary structure; .(b) The availability of dis- . KS ciplines needed.

OM (a) Low State salary.

NE (a) Available disciplines.

- MT. (a) Statewide freeze; (b) Temporary nature of Federally supported positions; (c) Ceilings on authorized staff
 levels; (d) Statewide personnel reduction.
 (a) Lack of competitive salary; (b) Location of job.
- SD UT (a) Funding stability; (b) RCRA funds; (c) State tax
- WY (a) Salary; (b) Finding qualified, experienced people.
- CA (a) Statewide freeze on all hirings.
- (a) State Civil Service procedures.(a) Salary; (b) Disciplines needed. HI
- ID
- OR (a) Cumbersome Civil Service procedures; (b) Lack of good applicants willing to work at State salaries and for "government" in general.

Question 21. For the two year period ending December 31, 1978, please enter below: (a) the approximate number of professional staff that have left your program voluntarily to take employment elsewhere, and (b) the approximate number of those who left who had three or more years of experience.

Question 22. If you have had professional staff leave during the past two years, what are the major reasons most often cited for leaving?

Question 21

Question 22

	Mho Who	With 3 Years		-
<u>State</u>	Left	Experience		Reasons Cited for Leaving
CT	6	5	(a)	More challenging opportunities in energy field; (b) Head spe- cific sections of other States' programs; (c) Higher salaries.

U.S. GENERAL ACCOUNTING OFFICE

Survey Of State Implementation Of The Safe Drinking Water Act

General Instructions

The U.S. General Accounting Office is .
studying the problems faced by the States in implementing and administering Federal environmental programs. The purpose of this questionnaire is to obtain information on your program(s) and to determine the significance of the problems state environmental program managers face. We are sending similar questionnaires to the directors of the air pollution control, drinking water, pesticides, solid waste and water pollution control programs in all 50 states as well as to the administrator of each State's environmental agency.

While the questions that follow are based largely on our discussions with program officials in seven States, we have attempted to provide a format that will be readily adaptable to all States. If you feel that the format of any question does not fit your situation, please add the necessary explanatory notes. Moreover, feel free to make any additional comments on your program, this questionnaire or related topics.

If you have any questions, please call Donald Hunter at (617) 223-6536.

After completing the questionnaire please return it in the self-addressed postage paid envelope by January 19, 1979.

NOTE: Throughout this questionnaire, EPA refers to the <u>Federal</u> Environmental Protection Agency.

Thank you for your cooperation.

RESPONDENT INFORMATION:

1.	Please provide the name, title and telephone number of the person completing this quest- ionnaire.
NAM	E:
TIT	te:
TEL	EPHONE:
	(Area Code) Mumber

Question 8. To what extent, if at all, is each of the factors listed below an obstacle to managing your program to meet the Objectives of the Safe Drinking Water Act?

Total Response: Deadlines imposed
 by Federal legislation
 Availability of technology to support Federal legislation 3. Obtaining State enabling legislation 4. Time it takes to issue EPA regulations and ouidelines

5. Amount of flexibility in current EPA
regulations and quidelines

6. Clarity of current EPA regulations and quidelines
7. Tire it takes EPA to respond to technical questions and interpret its regulations and ₿ В guidelines

8. Quality of EPA response to technical questions and interpretation of its regulations and quidelines 9. Extent of controls imposed on the State by 10. Philosophical differences between PA and the State on program priorities and objectives 11. Amount of Federal funding to 8 114 support program administration costs 12. Timing of Federal funding to support program administration costs

13. Knowledge of the the amount of future Federal funds to support State programs administration W. Existing State policies to limit all program growth

15. Amount of State funding you regains to
support program administration costs

16. Current level of Federal funds for
sunicipalities to meet Federal environ-£ В ы sental requirements 17. Member of staff in State program 15. Losses of experienced personnel

19. Ability to fill
personnel vacancies

20. Current training programs available
for State Personnel 21. Split responsibility for environmental programs within State covernment

22. Ourrent level of public support for
environmental programs

23. Ourrent level of Gubernatorial and q ho State Legislative support for environrental programs

Question 10. Consider all provisions of the SDWA that are applicable to your program. To date, has your State enacted the necessary laws to implement all of those provisions?

Yes (38	<u>)</u>

Question 13. In your opinion, what has been the <u>major</u> barrier, if any, to passage of State enabling legislation?

CT Nothing.

ME Attitude of State Legislature.

NH Probability of continuing Federal funding.

RI No response.

- VT Cost of improving water systems (\$50 million in VT) and Federal timetable to be in compliance.
- NJ Initially some question as to whether the State should assume primacy.
- NY No legislative changes were required for New York State to accept primacy.
- DF Enabling legislation existing prior to Safe Drinking Water Act.
- MD Not applicable--legislation passed.

VA No response.

- WV Justification for additional regulations and assurance of federal funding.
- -FL That it would require the State to spend more money for the program in the long run.

KY None

MS Enabling legislation has been passed.

- NC Requirement that State amend its laws and regulations to conform to federal laws and regs. in almost every detail. This does not allow a State to respond to its particular circumstances and conditions.
- SC Many State legislators, in reading the public mood, are opposed to any new federal regulation or control.
- IL Difficulty in having a minor change in legislation introduced and acted upon when major legislation is being considered.
- MI Concern for what will happen to program-financially and EPA program requirements.

MN Probability of continued Federal support.

- OH Efforts by public interest group, supported by USEPA, to eliminate any flexibility on part of Ohio EPA in dealing with USEPA. Where will money come from to pay for total expanded program.
- WI Legislators concern over taking on another Federal program.
- AR Adequate public health laws were existing prior to p.L. 93-523.
- LA Not applicable.

NM Punding.

OK No response.

TX None, really.

IA None.

KS It passed in Kansas.

MO The fact that it is another Federally mandated program.

NE Resistance to Federal incentive assistance when Program need is not locally recognized.

CO No barrier.

MT EPA regulations.

ND None.

AZ People are opposed to Federal control

CA Philosophical questions re: should the State partici-

The potential impact and financial responsibility on the agricultural industry in the State.

NV Continuing Federal funding.

AK Impact of program on small groups of people.

ID Feelings that government should be cut, not increased.

WA Legislation was not required. If it were necessary, the major problem would be reaction (rejection) of OSHA-type legislation, with the State being a pawn in the game.

7-16
