ABSTRACT

This model describes how the guidance staff at a hypothetical high school communicated the effectiveness of the quidance program to students, parents, teachers, and administrators. A description of the high school is presented, and guidance services and personnel are described. A conceptual model responding to student needs is outlined along with procedures for implementing the defined needs. Methods and forms necessary for assessing needs, establishing priorities, developing objectives, planning activities, and evaluating the program are included. The classification of information from needs assessment surveys into 17 categories is presented along with a planning and record sheet for each category that outlines categories, objectives, planned activities, staff involvement, timeliness, resources needed, and estimated costs. Listings are provided for activities and evaluation rescurces, and ACT publications for secondary school guidance programs. Appendices list program objectives for educational, career, social, and community domains and provide numerous worksheets for counselors. (NRB)

INTRODUCTION

Counselors have a great deal of difficulty communicating the effectiveness of guidance programs to students, parents, teachers, and administrators. Although this difficulty is due in part to the nature of the counseling process, a better job can and must be done.

This workbook is a model which describes how the guidance staff at a hypothetical high school—River City—confronted the problem of effective communication through program accountability. Program accountability is a concept of increasing importance to guidance counselors. Employing accountability techniques and terms will result in improved planning and implementation, and in improved guidance programs.

Guidance by objectives is becoming or has become a fact of life for most guidance counselors. And this is good! It will cause everyone involved in the important task of helping students to ask the questions.

What am I doing?

Who am I doing it for?

What should I be doing?

Do I have the competence to do it?

is what I am doing working?

The process will both strengthen the guidance profession and result in better guidance services for the students we serve together.

As with any model, the concepts and activities described here will probably have to be altered to meet the unique needs of individual students and schools. The model is intended to be a flexible guide that can be used by the single guidance counselor practicing in a small school, by a staff in a large school, by a system or district, or by an entire state. The services and materials of The American College Testing Program are an integral component of several of the activities described in the model.

ACKNOWLEDGMENTS

The American College Testing Program is indebted to the following individuals and agencies who contributed to the workbook format, the needs assessment design and survey, the student need categories, the accountability process, and many of the non-ACT-related examples of program activities

Orville Schmieding, PhD, Supervisor, Counselor Education and Alan Lindstrom, EdD, Associate Professor, Counselor Education, both of South Dakota State University

Richard Parker, EdD, Administrator of Guidance and Counseling, Department of Education, State of South Dakota

Doug Herzog, Assistant Administrator, Office of Children and Youth, Pierre, South Dakota

These contributions were formatted in South Dakota in a needs assessment model. This activity was made possible by a grant funded by the U.S. Office of Education (OEG-0-71-4663) through the Career Guidance—Counseling and Placement Project. University of Missouri, Columbia, Charles G. Foster, Director of Guidance Services, Missouri Department of Elementary and Secondary Education, and the Division of Elementary and Secondary Education, Department of Educational and Cultural Affairs, State of South Dakota.

The American College Testing Program is indebted to the Texas Education Agency, Division of Guidance Services, for the information contained in its document, "Accountability in Guidance Services, A Guide for the Development of a Competency-Based, Outcome-Stated Guidance Plan," Austin, Texas, 1973, and to the Iowa State Department of Public Instruction and The University of Iowa, for the guidance objectives developed in the project, "Programmatic Development, Focus" (Appendix 1).

ACT is also indebted to the many secondary school counselors who, during workshop sessions, contributed many excellent suggestions and ideas for this revised edition.

ENDORSEMENTS

ą,

0

£

The River City model was first presented, on a trial basis, at workshops during the 1975-76 school year. The positive and supportive reception of the model by the guidance community has been most gratifying. The following responses are representative of many ACT has received from counselors and counselor educators.

The guidance and counseling profession must now prove to the public that we are worth the financial investment. We must demonstrate our unique contribution to education and show that counselors are sensitive to the needs of the school and the community. The River City model is an effective response to this accountability process.

—Francis P. Larkin
Director of Counseling
Middle Township High School
Cape May Court House
New Jersey

The River city model is a long overdue guide to helping those responsible for guidance programs "to get it all together." Properly adapted to local situations, the workbook process can guide program development to accomplish the task of serving students. As a counselor educator, I welcome this systematic approach. The workbook is a valuable resource and an excellent senice to the profession.

-Dr. W. D. Martinson, Head Counseling and Personnel Department Western Michigan University Kalamazoo Michigan

The University of West Virginia Counselor Education Program, under the direction of Dr. Jeff Messing, is offering for the summer of 1976 a special topics credit course for Marion County counselors. The course will be based on the River City model. We plan to upgrade our guidance activities based on data obtained from the River City Needs Assessment.

-Mrs. Evelyn Black, Guidance Director Marion County Schools Fairmont, West Virginia

The Guidance Services Section of the lowa Department of Public Instruction has, in cooperation with the lowa Personnel and Guidance Association, conducted 15 workshops this past school year. These workshops were devoted to the River City conceptual model. Every geographic area of the state was covered and we are very pleased to indicate that 780 counselors viere in attendance. This represents approximately 95 percent of all secondary school counselors in lowa. The evaluations received at the conclusion of each session and the feedback we have received from counselors who participated indicate much interest in implementing the concept at the local level.

—Giles J. Smith Chief of Guidance Service Section Iowa Department of Public Instruction

River City High School Guidance Services is guidance and counseling by objectives. I am pleased to endorse this model for several reasons. First, it is a well-developed conceptual model that structures a guidance program for both the student and the counselor. The model begins with needs assessment of both the guidance services and each individual student.

Second, the model is quite inclusive in terms of student needs, i.e., students assess themselves on most of their basic needs, such as understanding of self and others, values clarification, decision making, and career awareness.

Third, the Needs Assessment Survey data are systematically analyzed so that high and low priorities for a given student as well as for a given school or school district can be determined. This allows for a focused intervention rather than some global strategies which are intended to be all things to all people, but often are too little and too late.

Fourth, specific exercises, strategies, and references are cited for each basic objective. Most models lack these kinds of specifics. Dr. Cal Catterall and I are currently completing a test that contains specific individual and group strategies of a preventative and remedial nature that would serve as a sourcebook for the activities (interventions) available to counselors.

Finally, the faiver City model contains several recording forms that allow for continuous data collection on each student and school—a built-in progressive evaluation tool so necessary and yet so often missing in most guidance programs.

Laturpleased to endorse ACT's River City High School Guidance Services. A Conceptual Model.

-G. M. Gazda
Professor of Education
University of Georgia
and Consulting Professor. Department of Psychiatry
Medical College of Georgia
Athens, Georgia

The American College Testing Program is committed to the advancement of the guidance profession. We trust the revised edition of the River City model will continue to contribute to the mission of guidance programs.

Guidance Services - A Statement of Purpose

The guidance department in River City High School exists to help students integrate academic and personal development. It is an integral part of the instructional program of the school.

Some of the primary activities of the school counselors are counseling with students, consulting with "significant others," and coordinating guidance functions with other aspects of the instructional program.

Counseling is done both individually and in groups. The "significant others" who are involved include teachers, administrators, parents and other family members, a wide variety of school and community resource people, and others important in the life of an individual student.

The goal of the guidance department is the enhancement of each student's self/career development within the student's total environment.

U

THE CONCEPTUAL MODEL

The Director of Guidance at River City High School was charged by the administration to develop a planning, implementation, and evaluation system for the guidance services. After examining traditional guidance programs organized around service areas, the Guidance Committee decided that a conceptual model which responded directly to the identified needs of a particular constituency, primarily students, was needed. Such a model would provide data to help River City staff evaluate the effectiveness of guidance activities. Accordingly, the conceptual model which follows was introduced

IMPLEMENTING THE NEEDS CONCEPT

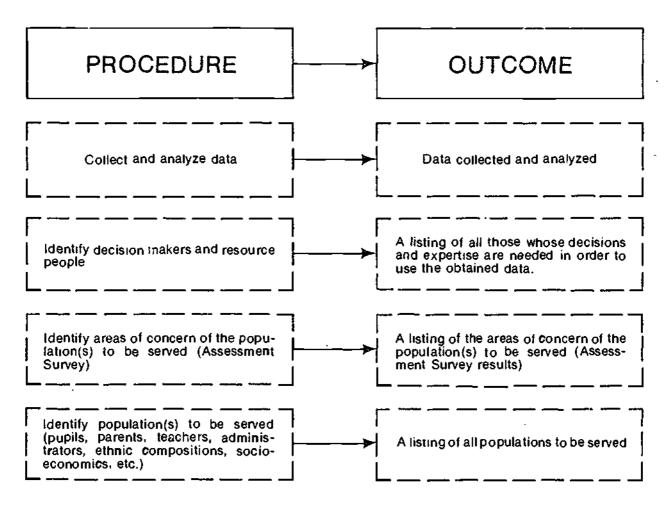

Assessment of Needs

Needs assessment is a data-gathering technique useful in establishing priorities and program objectives. It can be used to identify the unique needs of students at a particular school.

The technique can help the counselor answer the question, "What are the most important needs of students to be satisfied by a guidance program?" In addition, it can help identify needs which may be met more adequately by other school programs or by a combination of school and community programs Ideally, as a result of a student needs assessment, all relevant school and community resources will join to meet the identified needs of students.

The Needs Assessment Survey adapted for use at River City is offered only as an example of this technique. The survey format, item content, response format, and scoring technique may be altered to fit local situations.

- A. Competency required: The guidance staff must be able to assess the needs and expectations of the population(s) to be served.
- B. Outcome-stated objective:
 Obtain data indicating the needs and expectations of the population(s) to be served

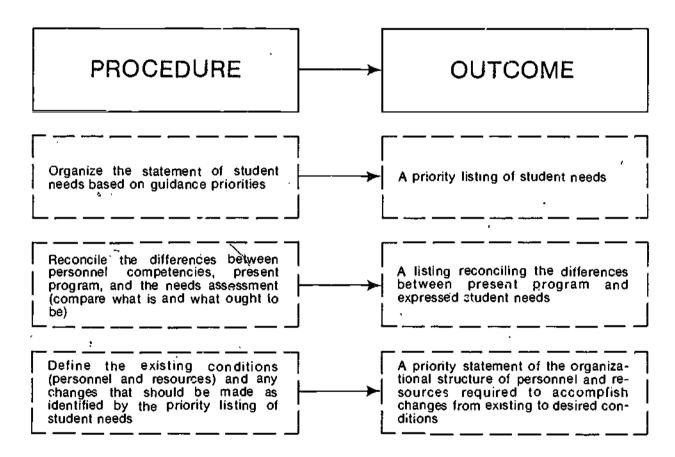

Establishing Priorities

The data obtailed from a needs assessment will very likely identify more needs than can realistically be met with the limited staff, time, budget, facilities, etc., available. Therefore, the second step is implementing the needs concept is to establish a priority listing of student needs as a focus for guidance objectives.

- A. Competency required: The counselor must be able to determine guidance priorities based on identified needs.
- B. Outcome-stated objective:
 Establish priorities for identified student needs of the populations to be served based on the optimum use of available personnel and resources.

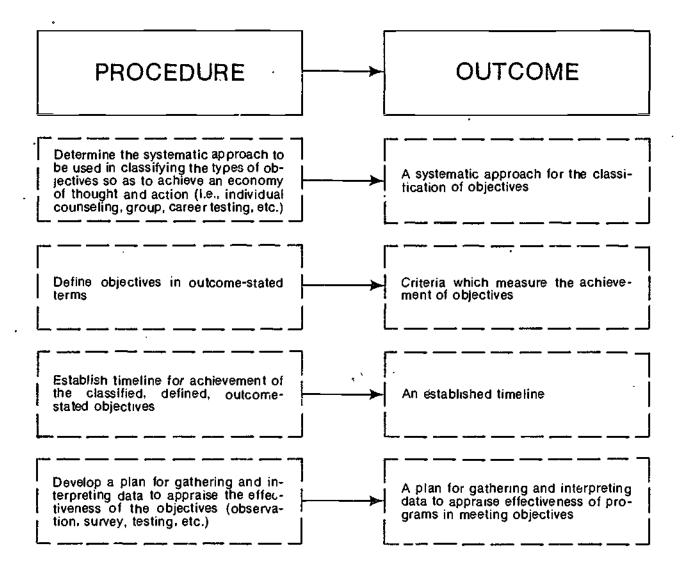

Developing Objectives

An objective is a statement of a measurable, desired outcome. Developing objectives is an important but difficult task. When completed the objectives should communicate what the guidance program intends to accomplish.

Most current guidance programs are excellent sources of unwritten objectives. For each guidance activity or set of activities an objective can be derived. However, the staff should carefully evaluate present guidance activities or sets of activities in terms of the priority listing of student needs to determine which objectives should be retained in the new objective-based guidance program.

- A. Competency required:

 The counselor must be able to formulate measurable objectives from identified needs and priorities.
- B. Outcome-stated objective: Priority student needs will be used to formulate measurable statements of purpose.

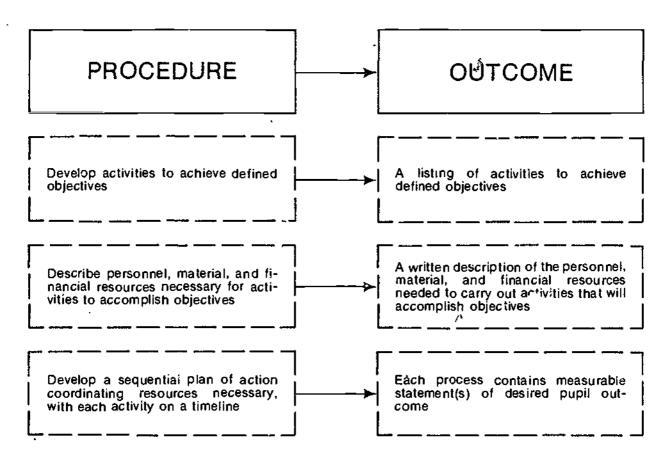

Planning Activities

Activities are the things guidance counselors do to bring about the outcomes stated in the objectives. Activities should be specific, include a timeline, and identify the resources and costs necessary to complete the activity. Specific responsibility for an activity should be assigned to an individual staff member.

Activities which have proven successful in the past will be retained, innovations will be added, other resources contacted, and professional inservice planned. New activities may need to be preceded by public relations efforts and by the involvement of counselor, staff, and community resources.

- A. Competency required: The guidance staff must be able to formulate specific activities designed to achieve objectives.
- B. Outcome-stated objective: Specific activities relevant to achieving objectives will be formulated.

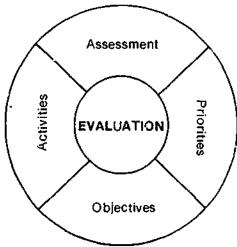

Evaluating the Program

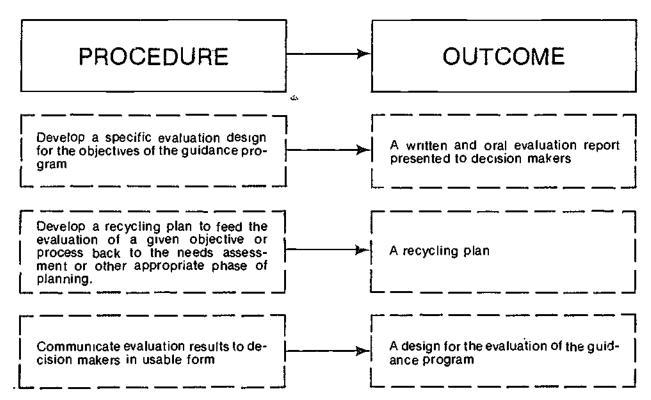

The importance of evaluation can hardly be overstated. Evaluation of each activity determines the degree to which the stated objective has been achieved. Evaluation may involve no more than determining the frequency with which an activity occurred, or it may include sophisticated statistical analysis.

In developing methods of evaluation, it is important to look at the student behaviors, performance, or participation that demonstrate an objective has been achieved. Evaluation should be ongoing and will inevitably suggest amendments or changes in objectives and activities.

- A. Competency required: The counselor must be able to coordinate continuing evaluation.
- B. Outcome-stated objective:

 The evaluation will provide indicators of program progress and the need for modification.

ASSESSMENT OF NEEDS—ESTABLISHING PRIORITIES

Data Collection

River City High School administers the Needs Assessment Survey to all students each February in order to facilitate planning for the following year.

Classroom teachers, primarily in the language arts department, are the key people involved in the collection of data. During a meeting with the Director of Guidance prior to each administration, the teachers review administration techniques and procedures.

In addition to the annual school-wide collection of data, selected items are administered to specific groups following certain activities. Data from these specific groups are key elements in the evaluation of those activities.

By comparing data obtained in a controlled trial administration, the Guidance Committee determined that students would be asked to identify themselves on the Needs Assessment Survey. The trial administration demonstrated no response differences between a group who identified themselves and an anonymous group. With identification, counselors may find the individual response sheets helpful in counseling situations

Modifications of the Needs Assessment items could be developed for administration to seniors prior to graduation to obtain evaluation data.

Other modifications could be made to the Needs Assessment items for administration to teachers, parents, employers, or other community groups. The nature of needs assessment items can enhance faculty, parent, and community awareness of student needs and the functions of a guidance program. The needs assessment gives students a chance to influence the development of their guidance program. These group data can also be invaluable in demonstrating differences between students' perceptions of their own needs compared to the perceptions of others.

The Needs Assessment Survey adápted by River City is an example of one instrument. Preliminary reliability and validity studies on a similar instrument may be obtained from Dr. Alian Lindstrom, South Dakota State University, Brookings, South Dakota. Other similar kinds of needs assessment surveys have been developed by local schools, state departments, and a variety of publishers. (See Appendix for examples.)

Category Classification

The second step in establishing the priority of student needs is to translate the Needs Assessment Survey items and data into meaningful and manageable categories. Seventeen such categories were identified by the River City Guidance Committee. Individual Needs Survey items were assigned on a logical basis to each category and the response data were translated to determine categorical, as well as item, priority. Some items were used in more than one category because of the overlapping characteristics of the items.

The 17 categories and the support items were classified and tabulated.

Classification

Category 1: UNDERSTANDING AND ACCEPTING SELF

1. To know more about my abilities, interests, and other characteristics.

To understand, accept, and like myself better.

3: To develop more confidence in myself. lte m

4. To understand how my feelings affect mythehavior. Item 5: To be more accepting of my physical appearance.

DEVELOPING RESPONSIBILITY FOR SELF Category 2:

Item 6: To set goals in life.
Item 7: To learn better to tell others how I feel.

Item 8: To be a better listener and respond better to others.

Item 9. To state my own views.

UNDERSTANDING OTHERS Category 3:

Item 19: To better understand teachers.

Item 11: Fo better understand people older than me. Item 12: To become more accepting of others.

Item 13: To build trusting relationships with others.

Item 8: To be a better listener and respond better to others.

BEING UNDERSTOOD BY OTHERS Category 4:

Item 14: To have someone listen to me when I have problems.

Item 15: To know how to get along better with my family. Item 7: To learn better to tell others how I feel.

Item 59: To talk about personal concerns with a counselor.

RELATING TO OTHERS Category 5:

Item 16: To have better relationships with teachers.

Item 17: To have better relationships with other students.

Item 18. To know how to get along better with members of the other sex. Item 19: To develop more friendships with both sexes.

Item 15: To know how to get along better with my family

Category 6: CLARIFYING VALUES

Item 20. To understand my religious beliefs more clearly. Item 21. To understand more about sex and love.

Item 22. To understand my values and the use/abuse of drugs, including alcohol.

Item 23. To become more tolerant of persons whose views differ from mine.

Item 43. To know how the things that are important to me affect my career choice

Category 7: ASSESSING SELF

Item 24: To know more about my strengths and weaknesses. Item 25: To better understand my standardized test scores.

Item 26: To understand what I can realistically achieve.

Item 1. To know more about my abilities, interests, and other characteristics

Category 8: UNDERSTANDING SEXUAL IDENTITY

Item 30 Fo understand the impact of my sex on my career choice.

Item 31. To understand the changing roles and expectations of men and women.

Item 18. To know how to get along better with members of the other sex.

Item 19: To develop more friendships with both sexes. Item 21. To understand more about sex and love.

Category 9: UNDERSTANDING OTHER STUDENTS' (DENTITIES

Item 2' To understand, accept, and like myself better.

item 3: To develop more confidence in myself.

Item 7: To learn better to tell others how I feel.

Item 12: To become more accepting of others. Item 13: To build trusting relationships with others.

Item 1. To know more about my abilities, interests, and other characteristics.

Category 10: MAKING DECISIONS

Item 27: To know how to assess and evaluate my goals.

Item 28: To learn how to make decisions.

Item 29: To learn ways to adapt to a changing world. Item 6. To set goals in life.

Category 11: **DEVELOPING CAREER AWARENESS**

Item 42: To understand the impact of work on my life.

Item 43. To know how the things that are important to me affect my career choice.

Item 44: To know more about possible careers and the world of work.

Item 40. To become more aware of educational alternatives after graduation. Item 41. To become aware of career training offered in my high interest areas.

Category 12: EXPLORING CAREERS

Item 45: To talk with people employed in my high interest areas.

Item 46: To get some on-the-job experiences in my high interest areas.

Item 47: To do an in-depth exploration of jobs which relate to my interests and abilities.

Item 48. To have actual on-the-job experience to know what it is like to be employed.

Category 13. SELECTING COURSES AND MAKING EDUCATIONAL PLANS

Item 32: To select more school courses by myself.

Item 33: To know more about graduation requirements.

Item 34: To find more courses relevant to my future.

Item 35: To receive more help in selecting courses.

Item 36: To find courses which are appropriate to my educational needs.

MAKING PLANS BEYOND GRADUATION Category 14:

Item 37: To know how to prepare for careers in which I am interested

Item 38: To know how the courses I am taking relate to my career plans.

Item 39. To know about financial aids for continuing education beyond graduation.

Item 40 To become more aware of educational alternatives after graduation.

Item 41. To become aware of career training offered in my high interest areas.

PLANNING CAREERS Category 15:

Item 49: To know how important people influence my career choice.

Item 50: To develop career plans and goals.

Item 51: To talk to a counselor about career plans.

Item 52. To have my parents involved in my career plans and to talk more with my

parents about my career plans.

Item 37: To know how to prepare for careers in which I am interested.

Category 16: FINDING JOBS AND CAREERS

Item 53: To know what jobs are available locally.

Item 54: To know where and how to start looking for a job.

Item 55: To know how to appty and interview for jobs.

Item 56: To have help to obtain part-time and/or summer work.
Item 57: To know more about job opportunities in my high interest areas.

Category 17: UNDERSTANDING THE GUIDANCE PROGRAM

Item 58: To get to know my counselor/advisor better.

Item 59; To talk about personal concerns with a counselor.

Item 60. To become more fully aware of the guidance and counseling services.

River City High School Guidance Services NEEDS ASSESSMENT SURVEY

By participating in this needs assessment survey, you can help us plan school and community activities that will better serve you. What is a need? Needs are requirements we all have for a full, happy, and meaningful life. They range from needs for food and sleep to needs for social, educational, and personal development. Our needs differ from each other in the degree is which we feel them, some freeds are strong. others weak Some of our needs are being met, totally or partially, in a variety of ways at home, or through school, church, or friends. Other needs are perhaps not being met at all

Please read the directions before responding to the survey items, if you have any quastions, ask your counselor Thank you for your assistance

DIRECTIONS

- First read the item and consider it carefully
- If you decide you have no need, check the box beside the item in the column no need and proceed to
- the next item Do not check any other boxes for that item

 If you decide you have a need, leave the no need box empty and check the box of your choice in the column under NEED RESPONSE. If you check a box under NEED RESPONSE, be sure to also check a box under the SATISFACTION RESPONSE choices

TABULATING AND ANALYZING THE DATA

The procedure which naturally follows data collection is systematic tabulation and analysis of the data so they can be understood and applied. Data analysis is simplified when data are organized to answer specific questions and analysis techniques are adapted to the abilities and resources of the analyzer.

The River City Guidance Staff wanted three questions answered by their data:

- 1. What do students at River City identify as their strongest needs?
- 2. How well do these students think these needs are being met?
- 3. Can we do a better job of allocating our resources to meet unmet needs?

To answer these questions, River City elected to use a double scoring technique to establish item and category priorities. This double scoring technique is described in detail. Alternate scoring options are discussed later.

The Double Scoring or Ratlo Method of Tabulation

First, tally each item. If "no need" is marked, disregard and move on to the next form.

EXAMPLE

In the example above, 73 students marked a need response box for item 1. To compute the Need Index, the "weak," "moderate," and "strong" responses are totalled to become the equation denominator.

$$W(30) + M(26) + S(20) = N(76)$$

At this point in developing the Need Index, the "weak need" responses are eliminated and only the "moderate" and "strong" need responses are combined to produce the equation numerator.

$$M(26) + S(20) = N(46)$$

The Need Index now becomes $\frac{46}{76}$ = .61, or by moving the decimal two places to the right, 61.

In determining the Satisfaction or Not Met Index, only the "moderate" and "strong" responses (N-46) from the need responses are tallied.

SATISFACTION RESPONSE

Noed Being Met	Need Partially Being Met	Need Not Being Met
###	HH 1H	## ## ## ##
10	16	20

The Satisfaction or Not Met denominator becomes:

$$NM(10) + NPM(16) + NNM(20) = N(46)$$

The numerator is obtained by eliminating the "need met" responses and combining the "need partially met" and the "need not met" responses.

$$NPM(16) + NNM(20) = N(36)$$

The Satisfaction or Not Met Index equation now becomes:

 $\frac{36}{46}$ and the Index .75 or 75.

These two ratio indices, 61 and 75, are now plotted on the Priority Quadrant Chart on page 24 to determine the priority of the item.

Method for Determining a Need Response Index and a Satisfaction Response or Not Met Index for Each Category

The technique used to determine category indices is essentially the same as that used to determine item indices. Using the Needs Assessment Data Summary Sheet, simply add the column entries for each item and compute the resulting equation. This procedure is demonstrated in the following illustration.

Establishing Priorities

The Need Index and the Satisfaction (Not Met) Index are essential data for establishing priorities. Several techniques can be used to convert these index numbers to a priority classification. One method would be to make a direct ratio comparison and on an a priori basis, establish a ranking for each item within a category and for each category. When the Need Index and the Satisfaction (Not Met) Index have been computed for each item and category, it is a relatively simple matter to determine the order of items and categories in priority rank.

NEEDS ASSESSMENT DATA SUMMARY SHEET

	RE	NEED SPON:		NEED INDEX		ISFACT SPONS		SATISFACTION (NOT MET) INDEX		
Itern No.	Weak Need	Moder- ate Ne ed	Strong Need		Need Being Met	Need Partially Being Met	Need Not Being Met			
1	30	26	20	46 = . 61	10	16	.20	$\frac{36}{46}$ = .78		
2	20	30	15	45 65 [∓] .69	12	23	10	33 ⁻ .73		
3	5	38	24	62 = .93	8	35	18	53 - .85		
4	37	15	10	25/62 = .40	19	3	3	6/25 = .24		
5	28	20	20	40 = .59	15	5	25	$\frac{30}{40}$ = .75		
Cat 1	X	129	89	21864	X	82	76	158 = . 72		

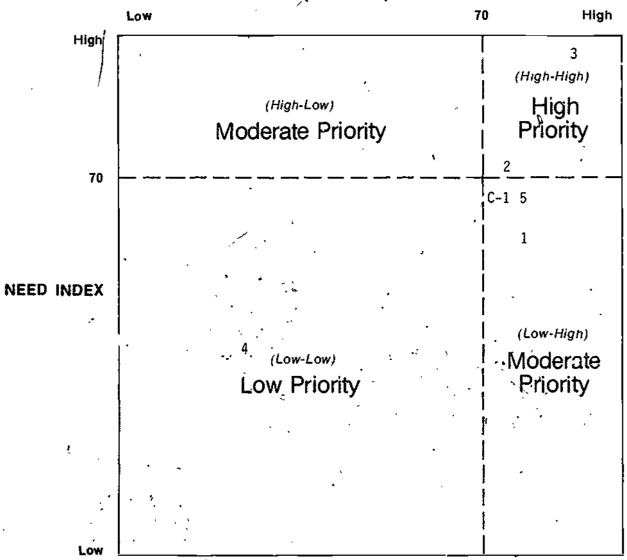

2.j

Another technique to establish priorities would be to locate the Need Index number and Satisfaction (Not Met) Index number in a quadrant as illustrated below.

PRIORITY QUADRANT MATRIX

SATISFACTION (NOT MET) INDEX

River City elected to use .70 as the cutting line for the cell divisions. However, these divisional lines could be arbitrarily determined at different points.

In the illustration, Item 1, which has a Need Index of 61 and a Satisfaction Index of 75, has been located in the low-high cell, thus it is classified as a moderate priority item. Items 2 and 3 would be in the high high cell and be classified high priority. Item 4, with indices of 40-24, would be a low priority item. Item 5 falls in the moderate priority cell.

The indices for the category C-1, which are 65-72, place it in the moderate cell.

ERIC

ALTERNATE SCORING OPTIONS

The advantage of using the double scoring or ratio method is obvious. It permits a differential comparison through the two indices. The disadvantage is that, without data processing equipment, it is time consuming to score. Regardless of the scoring option used, large schools should consider scoring only a sample of the responses from a total population. Other scoring techniques to consider include.

- Count only the responses to the items in the "strong need" column. Priority rank ordering
 would then be accomplished by going from the item with the highest number of "strong
 need" responses to the lowest.
- 2. A variation of the above, yet simple to core, would be to combine the "strong need" and "moderate need" responses and rank order as above.
- 3. Still another technique would be to reword the response sets in a manner such as:

Response Key:

- A. Strong or moderate need being met
- B. Strong or moderate need being partially met
- C. Strong or moderate need not being met
- D. Need not being met
- E. No need

Scoring would follow a rank order of the responses with the highest count to the lowest.

- 4. Some schools may have access to a computer. If so, the counselor will have to explain to the programmer how the data are to be treated. Student responses could be collected on a mark sense answer sheet or keypunched to cards from a regular answer sheet. Data can be obtained for each item and each category by sex, class, grade point average, or other subgroup classification. The counselor might want to work with a math or data processing class in generating data from the Student Need Assessment Survey. Scoring services might also be arranged through a local postsecondary institution's data processing center, a district educational resource center, or the state department of education.
- 5. For 1976-77, The American College Testing Program will offer scoring services as described in Appendix 5.

S.C.

DEVELOPING OBJECTIVES AND PLANNING ACTIVITIES

Following the priority classification of the data, the River City staff was ready to plan the guidance program for the coming year. They held a 1-week in-service workshop to develop objectives, plan activities, and determine their evaluation techniques.

First they developed a Planning and Record Worksheet. One or more of these worksheets for each objective were next assembled into a master record book which became, in effect, the staff's contract with students, administration, and parents. It was used for periodic communication as well as for the end-of-year report.

As the examples in this model show, the individual worksheets were designed to identify each of the 17 categories and their priority classification. The worksheet also shows an example of an objective the staff developed for that category and the activities they planned to meet that objective. Additional space was provided for staff assignments, an activity time frame, resource references, and cost estimate. All entries were coded for easy reference in staff and administrative reporting and for budget requests. The final entry on the planning record sheets is for evaluation summary statements of methods and actual performance.

As the objectives and activities were developed, the staff operated from the following guidelines.

Objectives

- 1. Statements of desired outcomes
- 2. Identify what is to be accomplished
- 3. Identify for whom it is to be accomplished
- 4. Must be measurable in terms of whether they were achieved and, if possible, degree of achievement. This qualitative measure may be within the specific activities

Activities

- 1. The things counselors do with and for students
- 2. Must be specific
- 3. Include a timeline
- 4. Identify resources necessary to complete the activity
- 5. Must be measurable in terms of outcome

≵∶

EVALUATION

Evaluation is necessary for several reasons. Evaluation data provide the basis for responses to the question of accountability and lead to an understanding of the kinds of activities which contribute most effectively to reaching stated objectives. Evaluation also provides for a reassessment of student needs on a regular basis. A variety of methods can be used to generate evaluative data. Published instruments are available and local instruments can be created.

The guidance committee at River City High School decided to focus on three aspects of evaluation.

- A. Activity participation accounting
- B. Activity-related performance ratings
- C. Reassessment of student needs

A-Activity Participation Accounting

For River City High School, simple accounting was achieved by answering the following questions for each planned activity:

Was the activity completed according to the planned schedule?

What activities were added to the program? Why?

What activities were deleted from the program? Why?

What activities were planned and initiated, but not completed? Why?

What was the number of students, parents, teachers, and community resource people participating in each activity?

B—Activity-Related Performance Ratings

The measurement of the ...ue of each of the planned activities in terms of performance ratings behavior change, or attitude evaluation is a more difficult task. Several methods are suggested.

- PRE- AND POST-ACTIVITY QUESTIONNAIRES, SURVEYS, AND INVENTORIES
 These techniques can be used to obtain a measure of the growth of students
 involved in a specific activity. As a part of the post-activity assessment,
 the same instrument could be administered to a group of students who did not
 participate in the activity. This kind of treatment/control comparison will
 provide data which set the planned activity apart from the total school program
 as a factor in the lives of students.
- 2. THEN-NOW TECHNIQUE (see Appendix 6)
 This method can be used at the completion of an activity. For example, a selected number of specifically written items, probably no more than 15, could be given to parents and/or students following a 2-hour evening session on the topic, "understanding postsecondary financial aid programs and procedures." Typical items might be "I understand the package concept"; "I understand how to complete the Family Financial Statement."
- 3. TESTIMONIALS

A testimonial questionnaire might ask such questions as:
Was the group counseling a valuable activity for you?
Would you like to participate again in the future?
Do you feel you now have a greater understanding of yourself?
Do you feel you now have a greater acceptance of yourself?
Would you recommend group guidance activities to your friends or others in your family?

Other questions might be added to the questionnaire if an activity related to niore than one student need. For example:

Do you now have a greater understanding of other students?

Do you feel that others now understand you better?

With simple changes in the wording, the questionnaire could be administered to parents or teaching faculty to determine their perceptions of the activity.

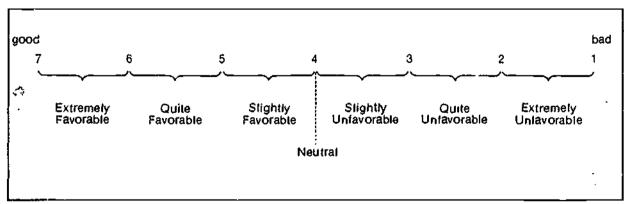

4. SEMANTIC DIFFERENTIAL METHOD

The semantic differential (SD) method, developed by Charles Osgood, is another method of observing and measuring the psychological meaning of things, usually concepts. It has been used by the National Association of College Admission Counselors to evaluate the nationwide College Fair programs.

The method is described in detail in the April 1976 issue of The National ACAC Journal. "The method consists of a number of scales, each having a bipolar adjective pair chosen from a large number of such scales for a particular research purpose, together with the concepts to be rated with the scales. The following SD bipolar adjective scales indicate the various degrees of attitude expressions possible.

good	:	:	:	:	:	 :	bad
complete		:	:	:	:	 :	incomplete
timely	:	:	:	:	:	 :	untimely
graceful	:	 :	:	:	:	 ·	awkward
unsuccessful	:	:	:	:	:	 :	successful
meaningful		·	:	:	:	 	meaningless
positive	 :	:	:	:	:	 :	negative
aisreputable	 :	:	<u> </u>	:		 	reputable
						A	

The intensity of a respondent's attitude was indexed by how far away from the origin the score lay. A score which fell in the middle of a scale or at the origin ('4') was taken as an index of neutrality of attitude. There were only three levels of favorable or unfavorable intensity. The three levels of favorablity were 'stightly' 4.1-4.9, 'quite' 5.0-5.9, and 'extremely' 6.0-7.0. Any respondent who scored less than 4.0 would have viewed the College Fair in a negative manner."

Note. ReProduced by Permission of the editor

5. APL SURVEY

The Adult Performance Level Program is a multiple-purpose assessment system designed to measure the proficiency of adults and high school students in the functional competencies that must be applied in daily life. Based on H.E.W. research at the University of Texas, the 40-item APL Survey assesses the ability to apply five basic skills—reading, writing, computation, problem-solving, and vocabulary identification—to commonly encountered tasks in five knowledge areas: consumer economics, occupational knowledge, health, community resources, and government and law. A more detailed APL knowledge area test for each of the five areas is now in preparation.

C-Reassessment of Student Needs

Finally, for overall evaluation of the guidance program, administration of the needs assessment survey in April will yield important information which may be used to demonstrate the effectiveness of this year's program and to provide new baseline data for planning the next year's activities. Planning questions might include:

Is the difference between stated needs and the degree to which these needs are being met decreasing, increasing, or remaining the same?

Are there differences between sophomores and seniors? Males and femules?

Time and Task Record System

To facilitate effective time management and activity responsibilities, the River City staff developed a Time/Task Record System. Forms developed included:

1. Planning and Record Sheet

2. Time/Task Summary Sheet (Staff)

3. Program Checklist

They found that by adhering to this system, they avoided overload periods. They also used the system during staff meetings for activity status reporting. The system was also found to be helpful in professional competency evaluations.

NEEDS ASSESSMENT EVALUATION SUMMARY

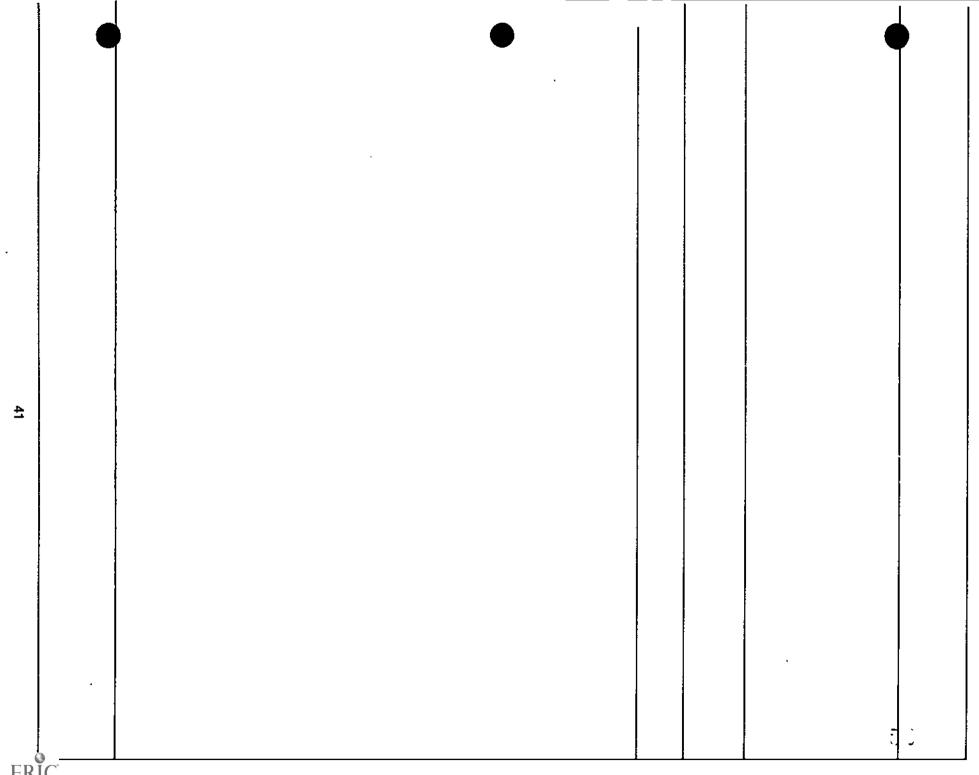

ACTIVITY COOE	CATEGORY:	
¢	OBJECTIVE:	
	EVALUATION METHODS: A. ACTIVITY-PARTICIPATION ACCOUNTING B. ACTIVITY-RELATED PERFORMANCE C. REASSESSMENT OF NEEDS	
1.1.1	A. Sixty students participated. B. Evaluation responses from students were generally very positive. A typical response said, "I really understand myself better." However, two students said the activity was a waste of time, ten students requested individual counseling.	
1.1.2	A. All students in English II participated. About half discussed with teacher or counselor.	
1.1.3	A. Mr. Prown made twenty presentations during September to all English classes.	
171.4	A2. Accomplished. B. Many good comments from parents. Some mailed thank-you notes.	
1.1.4	A4. Three cosmetologists from community gave six demonstrations. Teachers report enthusiastic reception by students. Teachers observed improved appearances and self-awareness. SD evaluation quite favorable (Average SD score 5.9).	
1.1.5	A. Counselors conducted three student sessions; one parents session. Ninety students attended; forty-seven parents.	
	B. Evaluation form prepared and presented using items (see illustration). Data from evaluations clearly show students and parents gained from participation in this activity.	
1.1.6	ACT STUDENT PROFILE REPORT INTERPRETATION SESSION-EVALUATION FORM (ILLUSTRATION)	4
C.	Please put an X along each of the spaced lines that indicates your reaction to the interpretation session. For example, if you thought the program was bad, put your X on the line next to BAD. If you thought the program was good, put your X next to GOOD. If you thought it was somewhere been GOOD-BAD, put your X in the space of your choice. Average SD responses.	4.; ●

3.1.4 Pipeline Committee

- A. Made up of Adm.-Faculty-Students.
- B. Objective: To build better understanding of how decisions are made.
- C. Sponsored periodic open forums. Topics to be determined by committee and to include panel members relative to the topic; i.e. Campus Security Force; custodians and lunchroom staff; intramural sponsors; etc.

3.1.5 Other Local Activities

4.1.4	Establish Worry Clinic	"Self-Enhancing Education" Values Clarification "Causal Behavior"
4.1.4	A. Fresh/soph. meet for 2 hours with a panel composed of drug/alcohol specialists, County Health Dept., teacher, parent, social worker, etc. B. Juniors/seniors same as above. Meetings to be separate. C. Questions to be submitted in advance. Panel to respond during session with open discussion to follow.	Community Specialists
4.1.5	Study Hall Option A. Small group 8-10 of behavior problem girls. Members have option of attending once a day for nine weeks or going to study hall. Attendance rules to be set by group. B. Group to write own goal for the week on Monday. Evaluation of Friday to see if goal was met. C. Group objectives to include behavior modification techniques and experiences.

- H. Arrange visit from postsecondary institutions to discuss use of ACT at each institution.
- I. Develop scattergram of ACT scores and College Freshman grades of former s. 'ents (See Appendix 11.1).
- J. Have small group counseling sessions with students who indicated need for help in:
 - 1. Educational/Vocational Planning
 - 2. Writing
 - 3. Reading
 - 4. Study Skills
 - 5. Mathematiès
 - 6. Personal Counseling
- K. Other group meetings arranged for students with similar interests in specific colleges, majors, etc.

7,1,5

ACT-Career Planning Program

- A. Conduct career planning mini-course (survival workshop)
 - 1. Use of a minimum of six hours in preparation for administration of Career Planning Program. Features of workshop to include:
 - a) develop small groups within larger group.
 - b) explain objectives of the workshop.
 - c) use Blizzard Survival game (see Appendix 13). \
 - d) small groups to develop definition of successcareer. Use Value-Clarification technique.
 - e) use Fantasy Trip activity.
 - f) each individual develops budget to support fantasy career, small groups submit an average budget for all individuals within the group. Demonstrate hourly weekly, monthly wages necessary to achieve fantasy budget (see Appendix 14).
 - g) small groups to develop list of non-measurable factors in career choice decisions; i.e. ambition, responsibility, personality, confidence.
 - h) Explain what C.P.P. is: That it assesses the measurable factors; i.e., interests, abilities, experiences.

ACT List Report Student Profile Report Scattergram (see Appendix 11.2)

Blizzard Survival See Appendix 13

7.1

H. Encourage library to secure pamphless, posters, etc. for display on the students in this lategory.

I. Have a United Nations Day as one of the culminating events and let the students representing the different countries discuss what high schools are like in their home country.

9.1.3 Individual or Small Group

A. For the gifted and handicapped students, identify some of the federal and state programs geared specifically to them. Are there any funds that are available that might be worth discussing as an incentive to encourage these students to continue their education after high school?

B. For the international students, identify some of the federal programs and the post-secondary opportunities available to them. Use this information as a motivating force to encourage their postsecondary educational pursuits.

C. For the racial/ethnic students, identify support agencies (NSSFNS, BIA, LULAC, etc.), potential funding sources, federal programs, and other opportunities for pursuing educational/career opportunities after high school.

ACT PUBLICATIONS FOR SECONDARY SCHOOL-GUIDANCE PROGRAMS

Assessment Program

1. Taking the ACT Assessment

1976-77, Free, Order No. 1-2-2.767 (Eastern Edition), No. 1-2-3.767 (Western Edition)

This comprehensive booklet is part of the ACT Assessment registration packet. It contains all the information a student needs to register for the ACT Assessment, including detailed instructions for completing the four-page registration folder and responding to the ACT Interest Inventory and Student Profile Section. Registration deadline dates and test center, institution, and agency code number listings are provided in the 32page booklet. (The Eastern Region Edition contains a listing of test centers east of the Mississippi and In Canada; the Western Region Edition, a listing of test centers west of the Mississippi and in foreign countries.) Also included are sample test

items designed to introduce students to the types of questions they will encounter on the four timed ability tests.

Registration packets, consisting of a copy of Taking the ACT Assessment, a four-page registration foider, and a preaddressed return envelope, are available in most high school guidance and college admissions offices.

 Your ACT Assessment Results
 Student's Guide, 1976-77, Free, Order No. 1-4-1.767

Each student who has taken the ACT Assessment receives a copy of *Planning for College* and a Student Profile Report (SPR). The booklet helps the student interpret the information on the SPR and contains suggestions for using Assessment results in making educational and career plans and decisions. A list of selected additional resources for college planning is also included.

3. Counselor's Handbook*

1976-77, \$1.00, Order No. 1-4-2.767

This guide for using the ACT Assessment in precollege guidance contains all the basic information the high school counselor needs to help students use the ACT Assessment as they make educational and career plans and decisions. Details about registering for the Assessment and methods for helping studers interpret their Student Profile Reports are provided. There is also a section which contains suggestions for both individual and group counseling uses of Assessment information.

*Routinely sent to high school directors of counseling.

4. List Report

Accompanies ACT Score Reporting Service to high schools having five or more ACT tested students on each of the national test dates. List Report includes name, sex, high school grades, ACT standard scores, college choice codes and GPA probabilities.

5. High School Labels

- Accompanies each student profile report.
 Contains name, high school grades, ACT standardized scores, and college bound percentiles.
- 6. High School Student Profile Report (HSSPR)

Two copies provided to counselor for each ACT tested student from that school. One copy for the counselor, one copy for the student. Contains array of test scores, high school grades, student profile information, interest inventory, and information about college choices.

7. Pre-Test Visuals

Paper copy of visuals that can be made into transparencies for group presentation using the overhead projector. Visuals are designed to prepare students for taking the ACT Assessment. The set also suggests many postsecondary discussion questions for group review.

8. Post-Test Visuals

Designed to be made into transparencies for use with the overhead projector in a group interpretation session.

9. High School Class Profile

A composite report of selected information from the text section and student profile section. This report is generated each year on a no cost basis for each high school having 50 or more ACT tested students. Also ACT generates district-wide and state-wide profile reports on a special arrangement basis.

10. High School Profile Visuals

Paper copies of graphically illustrated data taken from above report. Designed for presenting information, using the overhead projector, to faculty, administration, etc. Visuals accompany each high school profile report.

11. Your College-Bound Students

Booklet contents describe the above composite report and suggestrinterpretation techniques and information.

Career Planning Programs

The ACT CPP is a guidance-oriented program designed to give students and their counselors information useful for the transition from high school to career-related postsecondary training. Intended for use with students considering less than 4 years of postsecondary work, the program stresses both educational and vocational planning, and may also be appropriate for students planning to transfer to 4-year institutions.

1. ACT CPP Brochure

1975, Free, Order No. 3-4-1.767

This brochure provides basic information about the ACT Career Planning Program.

2. Planning: Your Post-High School Career

ACT CPP Student's Booklet, 1976, \$1.00. Order No. 3-4-2

This illustrated booklet helps students interpret their CPP Student Reports and

12.

shows them how to use the information in exploring careers and making decisions. Included are descriptions of 25 Job Families, grouped according to 8 career areas, along with information about related educational programs. An important purpose of the booklet is to increase students' understanding of themselves in relation to the world of work.

3. ACT CPP Counselor's Manual 1976, \$1.00, Order No. 3-4-3

Questions frequently asked about the ACT CPP are answered in this manual, which also contains sections on decision making and the interpretation of tests. Suggestions for using the ACT CPP in counseling, guidance, and placement are provided, as well as a comprehensive list of career planning references and exercises for use with students.

4. CPP Pre-Planning and Post Assessment Interpretive Visuals

The CPP pre-planning visuals are designed to assist counselors in helping students prepare to participate in the Career Planning Program. They focus on the first stages of the postsecondary career/educational planning process.

The CPP post assessment interpretive visuals present counselors a vehicle for interpreting CPP results for students in a group guidance setting.

Either or both of these sets of visuals are available in paper copy form upon request.

Student Assistance Programs

1. Family Financial Statement

Packet containing preaddressed return envelope, family financial statement form, and postsecondary institution code list. Packets are available through secondary school guidance offices and most postsecondary institution financial aid offices.

2. Financial Aid Visuals

Set of paper copy graphics designed to be converted to visuals for use on the overhead projector. These visuals portray basic concepts of need analysis and financial package sources. Single sets available to counselors at no cost.

3. Financial Aid Tabloid

Small newsprint handout for distribution to parents and students. Keyed to above visuals. Quantities available at no cost to school counselors.

4. Financial Aid Video Tape

Thirty minute video tape explains financial aid processes and programs. Tape is available in 1/2" b/w or 3/4" color cassette on a one day loan basis to schools by special arrangement. Tape is also available on a special loan basis for state or regional beaming. For further information on the video tapes, contact the ACT Regional Director serving your area.

The lowa State Department of Public Instruction and the University of Iowa have developed a project publication, *Programmatic Development*. *Refocus*. One of the purposes of the publication is to help counselors identify objectives for programs in their schools. The objectives, which have been classified within four domains—social, community, education and career—are listed below.

EDUCATIONAL DOMAIN

Objectives

Identify those general objectives which are appropriate given the needs of your school.
☐ Students will be aware of the school's physical plant and locations of service functions.
☐ Students will be aware of graduation requirements.
☐ Students will be aware of the curriculum alternatives.
☐ Students will be aware of the abilities needed for effective functioning in each curriculum afternative.
□ Students will be aware of elective courses and extracurricular activities that are available.
☐ Students will be aware of expected behavior in the school setting.
☐ Students will be aware of their academic abilities and particular limitations.
☐ Students will be aware of their educational interests.
☐ Students will be aware of a curriculum that is consistent with their ability and interests.
☐ Parents will formulate educational expectations for their children that are consistent with their ability and interests.
☐ Students will decide on electives that are consistent with their ability, interests and future goals.
☐ Students will decide on extracurricular activities that are consistent with their interests and abilities.
☐ Students will develop an attitude to achieve their maximum potential.
☐ Students will become competent in skills needed for achievement consistent with their ability
☐ Students will identify with and conform to the organized structure of the school community.
☐ Students will take responsibility in meeting the demands (i.e., assignments, regulations) of school.
☐ Students will effectively handle school frustrations.
☐ Students will be able to express independent views in an acceptable fashion.
☐ Students will demonstrate confidence in their educational goals.
☐ Students will complete their chosen curriculum.
□ Students pursuing further education will be consistent with their measured abilities, past achievement and interests.
☐ Students will be aware of how they are progressing in each class and how they could improve their work.

CAREER DOMAIN

Objectives

Identify those general objectives which are appropriate given the needs of your school.

☐ Students will become aware of the training requirements and needed skills of occupations.
□ Students will become aware of the economic and social rewards of different occupations.
☐ Students will become aware of the work and social roles expected of different occupations.
☐ Students will become aware of the differences between necessary skills and expected role behaviors of different occupation levels.
☐ Students will become aware of the concept of work in our society, the occupational structure and significant trends.
☐ Students will become aware of their particular occupational abilities, interests and potentialities.
☐ Students will become aware of their attitudes and emerging values toward various social roles and work roles required of different occupations.
☐ Students will make tentative choices of an occupational area that are consistent with their interests and abilities.
☐ Parents will formulate occupational expectations for their children that are consistent with their abilities and interests.
☐ Students will identify occupational alternatives that are consistent with their abilities and stated interests.
☐ Students will become competent in skills needed for their occupational choice and appropriate to their present developmental levels of ability.
☐ Students will develop an attitude that maximum effort on work tasks is important.
☐ Students will participate in a training/educational program that is necessary for entrance into their chosen occupation.
☐ Students will participate in activities that are related to and expected in their chosen occupations.
☐ Students will make the adjustments necessary to maintain consistent progress toward the achievement of career goals.
☐ Students will have congruence between their chosen careers and their measured abilities and interests.
☐ Students will acquire feelings of competence and adequacy in the performance of their chosen career.
☐ Students will gain employment in a career which they have chosen.
☐ Students will feel success in their employment.
☐ Students will be judged competent by supervisors.

SOCIAL DOMAIN

Objectives

Identify those general objectives which are appropriate given the needs of your school.
☐ Students will be aware of the social groups that are available or imposed upon them.
☐ Students will be aware of the need to identify and affiliate with basic social groups.
☐ Students will be aware of the need to have friends th; are accepted by their parents and significant others.
☐ Students will be aware of their responsibilities in the home.
☐ Students will be aware of the grooming and other personal expectations of the social groups with which they are affiliated.
☐ Students will be aware of attitudes and values of social groups with which they affiliate or which may be open to them.
☐ Students will become aware of the skills needed for effective functioning in their social group such as cooperation, compromise, and respect for others.
☐ Students will be aware of the differences in skills needed for effective functioning with each of their social groups.
☐ Students will be aware of their ability to function within their social groups.
☐ Students will be aware of their limitations in functioning in specific social groups.
☐ Students will become aware of their personal characteristics that are related to social acceptance and harmonious interpersonal relationships.
☐ Students will be aware of and differentiate among social roles appropriate to their sex.
☐ Students will evaluate opportunities for social affiliation and choose social groups that are acceptable in their society.
☐ Students will develop personal characteristics consistent with the expectations of their social groups.
□ Students will choose social activ: ies with an understanding of various life styles.
☐ Students will become competent in skills that are needed for effective functioning in their social groups (family, peers and significant others).
☐ Students will be aware of how to carry out responsibilities as a family member.
☐ Students will affiliate and participate constructively in acceptable social groups that are satisfying to them.
☐ Students will take initiative in handling their roles as family members.
☐ Students will take responsibility in adhering to the standards of their social groups (family, peers, and significant others).
☐ Students will be able to express independent social views in an acceptable fashion.
□ Students will have congruence between their personal values and the values of the groups with

	Students will place high priority on recognition and esteem by socially acceptable groups.
	Students will demonstrate self-confidence in their social relationships.
	Students will make contributions (consistent with ability) to social groups of which they are a part.
	Students will actively seek new social experiences and adequately cope with them.
	COMMUNITY DOMAIN
	Objectives
Id	entify those general objectives which are appropriate given the needs of your school.
	Staff members will know various social and business agencies within the community.
	Staff members will know the appropriate referral procedures required by social service or business agencies.
	Staff members will be aware of various community and service groups, and how these groups can assist students and staff members.
	The community will be aware of student services available within the educational setting itself.
	The community will be aware of those educational services which are also available to nonstudents.
	The staff members will know about significant attitude and value formations held by the general community.
	The community and staff members will understand concepts of students' rights within the educational and community setting.
	Staff members will be aware of agencies and businesses which provide citizen and governmental services.
	Community members will understand the specifics of educational and career opportunities.
	The community will have an integral understanding of guidance functions within the larger educational setting.
♂	The staff and community members will have an understanding of the developmental and preventative nature of a guidance program.
	Staff and community members will understand specific counseling services available such as consulting and coordinating of relevant activities.
	The staff and community will understand specific phases of the total guidance program such as orientation, appraisal, placement, followup, follow through, referral, and information services.
	The staff and significant community members will be involved with the systematic planning, implementation and evolution of the comprehensive guidance program.
	Staff and community members will understand the guidance programs as community oriented, serving graduates, preschoolers, dropouts and other community members.
	The staff members will understand specific counseling services available in the development of guidance related curriculum in values clarification, decision making, life style analysis and others.
	Community members, particularly parents, will understand what services exist for school age and preschool children and how they can be effect; wely utilized.
	Staff, students and community members will understand goals of the guidance program as focusing on an understanding of self and others, mutual respect, decision making, and increased responsibility for one's education, career and social choices.

OTHER NEEDS ASSESSMENT ITEMS NOT INCLUDED IN RIVER CITY SET

(WORKSHEET FOR COUNSELORS)

Examples:

- 1. Need to improve my writing skills
- 2. Need to improve my reading skills
- 3. Need to improve my math skills
- 4. Need to know more about how to get references
- 5. Need to know more about how to write a job resume
- 6. Need to better understand people of other races
- 7. Need to better understand people of different cultural backgrounds
- 8. Need to know where to go to rectify an injustice
- 9. Need to know more about consumerism
- 10. Need to budget my time better
- 11. Need to know how to earn college credit without taking a course (credit by examination)

THE RIVER CITY NEEDS ASSESSMENT SCORING SERVICE OFFERED BY THE AMERICAN COLLEGE TESTING PROGRAM

The needs assessment instrument used by River City has not been researched by the American College Testing Program, nor has ACT developed normative data. Although ACT, in developing the River City model, did not intend to offer, and does not intend to promote, a scoring service, many requests have been received to do so. In response to these requests, ACT will provide on an at-cost basis the scoring and reporting service described below. The scoring technique used will be the basic procedure described in this model.

- 1. Only forms predesigned by ACT will be used.
- 2. Up to 10 local items may be added.
- 3. Scoring will be done only four times during the year. October 1, 1976, December 1, 1976, February 1, 1977, and April 1, 1977.
- 4. A minimum of 100 answer sheets is required for any one school or scoring code number.
- 5. Cost. There will be a \$25.00 set-up charge for each scoring code number. Answer sheets: 1-500 @ .45; 509-1,000 @ .40; over 1,000 @ .35.
- 6. Turnaround time will be three weeks.
- 7. Reports will include data for total group plus reports by sex, high school grade average, and class, plus an option for local selection of subgroup population, i.e., educational level of aspiration, race, special needs, etc.
- 8. For further information, contact the ACT Regional Director in your state or:

Dr. James Maxey Research Services ACT Program P.O. Box 168 Iowa City, Iowa 52240 (319) 356-3866

RESEARCH AND DATA COLLECTION PROJECTS MAY BE ARRANGED ON A CONTRACTUAL BASIS WITH THE AMERICAN COLLEGE TESTING PROGRAM. EXAMPLES OF THESE PROJECTS INCLUDE: THE NORTH DAKOTA POSTHIGH SCHOOL INFORMATION SURVEY; THE OHIO STUDENT SURVEY; THE HOUSTON COMMUNITY COLLEGE SYSTEM SURVEY, ETC. FOR FURTHER INFORMATION REGARDING THESE KINDS OF CONTRACTUAL SERVICES CONTACT YOUR ACT REGIONAL DIRECTOR OR DR. MAXEY.

THE SCATTERGRAM

The scattergram is a technique used to compare the relationship of one variable with another (correlation) Preparing a scattergram for a group of test scores (ACT) with a criterion (course grade) has two distinct advantages. One, it will give at a glance a feeling for the degree of relationship between the scores and the grades, second, it will show a graphic isolation of those individuals falling away from a straight line relationship.

A similar technique can be performed using grades from a specific course (predictor) in the local school against course grades in a related or higher level course as the criterion. The same procedure could be applied using scores from a standardized test as the predictor against grades in a specific course, i.e., DAT Numerical Reasoning (predictor) against Algebra I grades (criterion).

Students thus identified can be evaluated in a more thorough manner, with such evaluation leading to a more helpful counseling relationship and assistance in college planning or high school course selection.

BLIZZARD SURVIVAL-LOST AT SEA

"Blizzard Survival" and "Lost at Sea" are activities to be used to emphasize certain survival needs and priorities. These activities are designed to lead students to an understanding of the need for certain career survival skills. These skills can be described as measurable and nonmeasurable. Students can build their own list of nonmeasurable skill needs. The overriding objective in these activities is to prepare students to understand why the measured factors in the Career Planning Program are important.

BLIZZARD SURVIVAL

The Highway Patrol has listed fifteen blizzard survival items. Rate in order of Importance the following fifteen items that should be found in the trunk of a car in case it is caught in a blizzard.

 (1)	First aid kit
 (2)	Highway map
 (3)	Two wool blankets
 (4)	Battery jumper cables
 (5)	Compass
 (6)	Steel shovel or hoe
 (7)	Metal coffee pot
 (8)	Thermos of coffee
 (9)	Flashlight
 (10)	Box of facial tissues
 (11)	Box of candy bars
 (12)	Book of matches
 (13)	Gift-wrapped candles
 (14)	Transistor radio
 (15)	Two empty coffee cans

LOST AT SEA GROUP WORKSHEET

Group ___

·
Instructions. This is an exercise in group decision-making. Your group is to employ the group consensus method in reaching its decision. This means that the prediction for each of the fiftee survival items must be agreed upon by each group member before it becomes a part of the group decision. Consensus is difficult to reach. Therefore, not every ranking will meet with everyone complete approval. As a group, try to make each ranking one with which all group members can at least partially agree. Here are some guides to use in reaching consensus.

- 1. Avoid arguing for your own individual judgments. Approach the task on the basis of logic.
- 2. Avoid changing your mind if it is only to reach agreement and avoid conflict. Support only solutions with which you are able to agree at least somewhat.
- 3. Avoid "conflict-reducing" techniques such as majority vote, averaging, or trading in reaching your decision.
- 4. View differences of opinion as a help rather than a hindrance in decision-making.

 Sextant

 Shaving mirror

 Five-gallon can of water

 Mosquito netting

 One case of U.S. Army C rations

 Maps of the Pacific Ocean

 Seat cushion (flotation device approved by the Ccast Guard)

 Two-gallon can of oil-gas mixture

 Small transistor radio

 Shark repellent

 Twenty square feet of opaque plastic

One quart of 160-proof Puerto Rican rum

Fifteen feet of nylon rope

____ Fishing kit

Two boxes of chocolate bars

LOST AT SEA ANSWER AND RATIONALE SHEET!

According to the "experts," the basic supplies needed when a person is stranded in mid ocean are articles to attract attention and articles to aid survival until rescuers arrive. Articles for navigation are of little importance. Even if a small life raft were capable of reaching land, it would be impossible to store enough food and water to subsist during that period of time. Therefore, of primary importance are the shaving mirror and the two-gallon can of oil-gas mixture. These items could be used for signaling air-sea rescue. Of secondary importance are items such as water and food, e.g., the case of Army C rations.

A brief rationale is provided for the ranking of each item. These brief explanations obviously do not represent all of the potential uses for the specified items but, rather, the primary importance of each.

1—Shaving mirror

Critical for signating air-sea rescue.

2-Two-gallon can of oil-gas mixture

Critical for signaling—the oil-gas mixture will float on the water and could be ignited with a dollar bill and a match (obviously, outside the raft).

3-Five-gallon can of water

Necessary to replenish loss by perspiring, etc.

4-One case of U.S. Army C rations

Provides basic food intake.

5—Twenty square feet of opaque plastic

Utilized to collect rain water, provide shelter from the elements.

6-Two boxes of chocolate bars

A reserve food supply.

7-Fishing kit

Ranked lower wan the candy bars because "one bird in the hand is worth two in the bush." There is no assurance that you will catch any fish.

8-Fifteen feet of nylon rope

May be used to lash equipment together to prevent it from falling overboard.

9—Floating seat cushion

If someone fell overboard, it could function as a life preserver.

10-Shark repellent

Obvious.

11-One quart of 160-proof Puerto Rican rum

Contains 80 percent alcohol—enough to use as a potential antiseptic for any injuries incurred, of little value otherwise; will cause dehydration if ingested.

12-Small transistor radio

Of little value since there is no transmitter (unfortunately, you are out of range of your favorite AM radio stations).

13-Maps of the Pacific Ocean

Worthless without additional navigational equipment—it does not really matter where you are but where the rescuers are.

14—Mosquito netting

There are no mosquitoes in the mid Pacific.

15—Sextant

Without tables and a chronometer, relatively useless.

The basic rationale for ranking signaling devices above life-sustaining items (food and water) is that without signaling devices there is almost no chance of being spotted and rescued. Furthermore, most rescues occur during the first thirty-six hours, and one can survive without food and water during this period.

[&]quot;Officers of the United States Merchant Marines ranked the fifteen items and provided the correct solution to the lask

184

BUDGET AND INCOME FORM

Budget information such as shown here can be used in a variety of ways in group activities. One example would be to have the group build a budget that would support its fantasy life style or ideal job. That budget could then be translated to the need for a job that would pay so much per hour, per day, etc.

AN INDIVIDUAL'S BUDGET OUTLINE: What percent of your net income goes where—If you follow this outline, you will have fewer money problems.

\$	HOUSE: Rent or mortgage payment, plus taxes and repairs. (20%)
\$	FOOD: Just food, not your non-food items. They should be assigned to other budget categories. (20%)
\$	CLOTHES: Varies from month to month. Includes dry cleaning bills. (12%)
\$ <u></u> _	SAVINGS: Includes life insurance and any investments. (7%)
\$	MEDICAL: Doctor, dentist, medicine, hospitalization insurance, etc. (3%)
\$	EXTRAS: Everything not covered in other categories, such as car payments, gas, oil,

This pamphlet was prepared to help you quickly figure your net income. Rates are computed hourly, daily, weekly, monthly and annually. Gross and net income are figured, so that you can estimate what your actual take-home pay will be.

maintenance, entertainment, home furnishings, gifts, personal allowances, etc. (28%)

^{&#}x27;Although it is not a true picture in each instance, the overall average deductions from salaries will be about 1.3 of gross income. This is the percentage used to figure this chart. Deductions include social security, federal income tax, state income tax, sales tax, personal tax, gasoline tax, automobile tags, property tax, health plan, etc.

PAGE - 1

SUMMARY OF COLLEGE-BOUND STUDENTS

OF THIS GROUP OF 000318 STUDENTS, 11% FELT THEIR HS EDUCATION WAS EXCELLENT, 46% FELT IT WAS GOOD, 29% FELT IT WAS AVERAGE, 06% FELT IT WAS BELOW AVERAGE, AND 08% FELT IT WAS VERY INADEQUATE. FOR VARIOUS ASPECTS OF THEIR HIGH SCHOOL, THE PERCENTAGES OF STUDENTS SATISFIED AND DISSATISFIED, RESPECTIVELY, WERE AS FOLLOWS: INSTRUCTION - 54%, 16%; COURSE OFFERINGS - 54%, 29%; GRADING - 47%, 21%; TESTS - 47%, 13%; GUIDANCE - 51%, 23%; SCHOOL POLICIES - 34%, 40%; LIBRARY FACILITIES - 51%, 23%; LABORATORIES - 40%, 20%; SPECIAL NEED ASSISTANCE - 24%, 26%; GIFTED STUDENT ASSISTANCE - 35%, 23%; AND ADEQUACY OF PROGRAMS IN CAREER EDUCATION AND PLANNING - 33%, 30%.

THE TYPICAL STUDENT IN THIS GROUP HAD AN ACT COMPOSITE SCORE OF 18.8 (GROUP MEAN) AND AN HSA OF 3.0. THESE COMPARE TO NATIONAL AVERAGES FOR COLLEGE-BOUND STUDENTS OF 18.3 AND 2.9, RESPECTIVELY. AT THE TIME OF TESTING, THE STUDENT THOUGHT HE OR SHE WOULD OBTAIN A FIRSTY YEAR COLLEGE GPA OF ABOUT 2.8.

THIS GROUP CONSISTED OF 000140 MEN AND 000178 WOMEN. A TOTAL OF 30% WERE "VERY SURE" OF THEIR EDUCATIONAL MAJOR, WHILE 47% WERE "FAIR-LY SURE." A TOTAL OF 44% ASPIRED TO A BACHELOR'S DEGREE WHILE 32% ASPIRED TO AT LEAST SOME GRADUATE SCHOOL OR A PROFESSIONAL DEGREE. THE MOST TYPICALLY PLANNED EDUC MAJOR AND FIRST VOCATIONAL CHOICE WERE BUSINESS & COMMERCE AND HEALTH PROFESSIONS, RESPECTIVELY.

THE WITHIN-STATE INSTITUTION WHERE THE LARGEST NUMBER OF YOUR STUDENTS SENT ACT SCORES WAS MIDSTATE UNIVERSITY. CONCERNING THE SEVEN COLLEGE-CHOICE FACTORS, THE PERCENTAGE OF TIME EACH WAS CHOSEN AS "MOST IMPORTANT" WAS: INSTITUTIONAL TYPE - 10%, STUDENT-BODY COM-POSITION - 02%, LOCATION - 18%, COST - 17%, SIZE - 01%, FIELD OF STUDY - 49%, AND OTHER - 05%. 15% OF THE STUDENTS PLANNED TO GO TO AN OUT-OF-STATE COLLEGE.

NEED FOR SPECIAL HELP IN COLLEGE WAS EXPRESSED AS FOLLOWS: EDUC AND VOC PLANS - 51%, WRITING - 29%, READING - 33%, STUDY SKILLS - 40%, MATH - 49%, AND PERSONAL COUNSELING - 32%. A TOTAL OF 39% EXPRESSED INTEREST IN INDEPENDENT STUDY, 21% IN HONORS COURSES, 25% IN FOREIGN STUDY, AND 47% IN SOME KIND OF ADVANCED PLACEMENT. EXPECTATIONS OF WORKING AT A JOB DURING THE SCHOOL YEAR AND EXPRESSING NEED FOR HELP 1N FINDING A SCHOOL-YEAR JOB WERE HELD BY 64% OF THE STUDENTS. ALSO 67% EXPECTED TO APPLY FOR FINANCIAL AID.

THE EXTRACURRICULAR AREA WHERE THE MOST STUDENTS (31%) PARTICIPATED IN HIGH SCHOOL AND ALSO HAD SIMILAR PLANS FOR COLLEGE WAS INTRAMURAL ATHLETICS. THE AREA WHERE THE MOST STJDENTS (24%) PARTICIPATED IN HIGH SCHOOL BUT HAD NO SIMILAR PLANS FOR COLLEGE WAS VARSITY ATHLETICS. THE AVERAGE NUMBER OF HIGH SCHOOL OUT-OF-CLASS ACCOMPLISHMENTS, OUT OF SEVEN LISTED FOR EACH OF NINE AREAS WAS: LEADERSHIP - 1.9, MUSIC - 2.2, SPEECH - 1.1, ART - 1.0, WRITING - 1.1, SCIENCE - 0.4, ATHLETICS - 3.0, COMMUNITY SERVICE - 1.3, AND WORK EXPERIENCE - 2.3.

1977-78 EDITION

THE College Planning/Search Book

DO YOU NEED HELP WITH COLLEGE PLANS?

The College Planning/Search Book is a comprehensive up-to-date guide containing detailed information about more than 2,700 2-year and 4-year colleges. It combines a sensible step-by-step approach to the college planning process with practical, easy to use admissions and scholarship information.

The College Planning/Search Book helps students work through the key steps in choosing a college. Lists of basic facts about different kinds of colleges enable students to identify their needs and preferences. Checklists and work-sheets are provided so that students may organize their ideas while they search for colleges that meet their needs.

The College Planning/Search Book contains two "college search" sections—for 2-year and 4-year institutions—which allow students to investigate and compare specific facts about more than 2,700 colleges. These search sections include the following kinds of information:

- 1.Admissions Information
 - Degree of selectivity
 - Application deadlines
 - Early and deferred admissions
 - Tests recommended or required
- 2. Cost and Financial Aid Information
 - Resident and nonresident tuition, fees, room, and board
 - · Financial aid deadlines
- 3. Institutional Characteristics
 - Size
 - Public or private
 - Religious affiliation
 - Size of community
 - Degrees offered
 - ROTC

a guide for students, parents, and counselors

- 4. Characteristics of the Student Body
- Majors Available and Percent of Students in 12 Areas of Study at 4-Year Colleges
- College Transfer and Career Programs Available at 2-Year Colleges

The College Planning/Search Book also provides a convenient log for students to keep track of each step in the college admissions process.

TO ORDER THE COLLEGE PLANNING/SEARCH BOOK

Send your name and address with a check or money order for \$5.00 payable to ACT to.

STEPS IN COLLEGE PLANNING

Where are you in your college planning process? Just beginning to think about college? Ready to make some decisions? Wherever you are now, the steps listed below can help you organize and review your thinking.

Read through the steps. Check off the ones you've completed, circle those that still need attention. You'll find information, suggestions, and worksheets in this book to help with each step. The suggestions about when to begin can help you keep an eye on the calendar.

What to do

Stage 1: Identifying What You Want Irom College

Step 1 Map out your own reasons and goals for going to college. What do you hope to gain? What factors are influencing you—family? friends? your own goals? What learning opportunities do you want? What are your ideas about your life and career directions? How is college related to your goals?

Step 2 Identify factors important to you in deciding which college to attend. Two year or 4-year? Size? Cost? Location? Financial aid? What kind of academic standards do you prefer? What kind of campus atmosphere? What areas of study interest you?

Stage 2: Finding Colleges That Have What You Want

Step 3 Develop a list of colleges that may meet your needs. Zero in on colleges that fit your key factors.

Stage 3: Comparing Colleges

Step 4 Collect information about colleges on your "premising list." What information do you need? How can you get it?

Step 5 Compare the colleges, weighing the pros and cons for each. Which ones look best in the areas most important to you?

General guide to when to begin

September-March of junior year. Talk with your parents, teachers, and friends. Meet with your counselor.

January-March of junior year. Learn about your state aid plan and other sources of financial aid.

March-May of junior year. Take the ACT or SAT now? Identify promising colleges. Note deadlines.

April-August of junior year. Read, talk, listen, visit.

August-December of senior year. Organize information so you can make useful comparisons.

Follow-through

Step 6 Apply to your "choice" colleges. How many? What application materials and forms do you need? What are the deadlines?

Step 7 Apply for financial aid. Are you likely to be eligible? Where should you apply? What materials and forms are necessary? What are the deadlines?

Step 8 Keep rethinking your goals and plans and weighing your options as you follow through to making a final choice. Get yourself ready for your college.

September-November of senior year. Visit and apply to colleges. Watch deadlines carefully.

October-February of senior year.

Determine when you should submit
BEOG application and need analysis
forms. Get everything in on time.

November-August of senior year. Make decisions and complete final steps.

Don't wait until your senior year to begin making plans; on the other hand, don't make your decisions before you've considered all the options. This schedule will help you search carefully for the best college opportunities. It should also help you stay ahead of key deadlines. If you find you are behind schedule, talk with your counselor and try to accelarate your work on some of the steps. A year of careful thinking.

MISSOURI STUDENT NEEDS SURVEY TEACHER SECTION

Name of School

DIRECTIONS: Considering the programs within your school respond to each item by marking the appropriate space in the columns provided.

			••		
l. Do you assist pupils to review and interpret their own records periodically?	Yes	No O	14. Do you personally talk with students about careers in your area of specialization?	Yes	No O
