ABSTRACT

This graphical and textual summary of the state funding claims paid by the Illinois Community College Board during fiscal year (FY) 1980 provides information about three grant categories: credit hour grants; equalization grants; and disadvantaged student grants. The report first details total payments, which amounted to \$103,252,400 for credit hour grants, \$17,200,000 for equalization grants, and \$4,700,000 for disadvantaged student grants. None of these funds were lapsed. The number of full-time equivalent (FTE) students served under each of the three categories is then detailed, as are the grant payments made to each of the state's 38 community college districts. An analysis is then presented of the credit hour and FTE student counts upon which state credit hour grants were determined. This analysis includes: (1) a list of rates per credit hour utilized for payment of grants; (2) a delineation of credit hours generated in five instructional areas at each of the college districts; (3) an assessment of the average grant per credit hour at each district; and (4) a breakdown of credit hours and grants paid at each district during each of the four academic terms. The report concludes with a summary of the equalization grants paid to 17 of the districts and a delineation of the FY 1980 disadvantaged student grant payments per district, which were based on the number of remedial credit hours generated during FY 1979.

Summary Total of Appropriations, Payments, and Amounts Lapsed
for Credit Hour, Equalization, and Disadvantaged Student
Grants for Fiscal Year 1980

The purpose of the introductory section is to provide a brief summary of the appropriations, payments, and amounts lapsed during Fiscal Year 1980 of state aid payments for the public community colleges of Illinois. Further detail of payments can be found in Tables 1 through 11.

Table 1 below, shows that a total of \$125,152,400 was appropriated from the General Revenue Fund for the Illinois public community colleges for FY 1980. Due to a substantial increase in credit hours produced in FY 1980, no funds were lapsed in FY 1980. Enrollment in Illinois public community colleges increased from 161,599 full-time equivalent (FTE) students in FY 1979 to 174,080 in FY 1980. The original budget for the public community college system was based upon 167,000 full-time equivalent students. Pro-ration of funds was not necessary because most of the growth was in the lowest payment rate category. (See Table 4.)

Illinois Public Community Colleges in FY 1980

Table 2 below, summarizes the state aid payments by the three major grant categories and identifies the total number of full-time equivalent students served for each type of grant.

	<u>\$125,152,400</u>	100.0%	

Table 3, on the next page, identifies the state aid apportionment payments paid to each community college district in FY 1979 for each of the three Illinois Community College Board (ICCB) state aid grant categories. All districts except State Community College of East St. Louis (which is funded through regular line item appropriation) received grants because their equalized assessed valuation per FTE in-district student was below the state average.

It should be noted in Table 3 that the state aid apportionment payments (excluding State Community College of East St. Louis) ranged from a low of \$741,864.62 (Richland Community College) to a high of \$36,758,390.02 (City Colleges of Chicago).

*FY 1976-1980 credit hour grants were paid based upon a multiple rate funding
plan. The rate figures shown are averages of all rates paid for that fiscal
year.

The total credit hours paid for each instructional program funding category for each district are shown in Table 6. Table 6 also shows, by district, the total FTE students for FY 1980 in addition to the average credit hour grant amounts. Table 7 shows FY 1980 credit hours by term.

Table 6 shows the state aid dollar amounts paid to each of the districts by term as determined by the number of credit hours (shown in Table 5) and the rates shown previously by each term of the year. Table 6 also shows the average grant per credit hour received by each district during FY 1980. The state average was \$19.77 with the low being \$13.42 (City Colleges of Chicago) and high being \$25.45 (Kaskaskia College).

The variability in the range and the difference among districts, for the most part, is due to the difference in enrollment mix at the various colleges; and little can be theorized from these figures as to managerial effectiveness and/or efficiency. For example, if a district offers a great many lower cost programs and, therefore, receives a lower grant per credit hour, its overall average grant will be lower. The converse is true for higher grants per credit hour and higher costs.

It must be remembered that the funding formula for credit hour grants is based on programs approved by the ICCB and offered to many and varied populations by a great many more instructional methods. The strength of the entire system is the ability of the districts to meet local demands, and the rationale of the funding formula is to attempt to meet those demands with an appropriate state share of the costs.

Should any comparisons of credit hour grants by district be needed, it is requested that the ICCB staff be contacted prior to such attempt in this area in order that all possible variables (many more than shown in this document) be considered. Anything else would be a disservice to both the community colleges and the State of Illinois.

Table 9 is a summary of the Special Assistance (Equalization) Grants paid from State General Revenue Funds for Fiscal Year 1980. These grants are designed to supplement the revenue for those districts whose equalized assessed valuation per full-time equivalent student is below a standard amount determined by the Illinois Community College Board and the Illinois Board of Higher Education. These grants are given on all in-district students and are in addition to the other credit hour grants. Each district has a different rate as computed by the ICCB formula and listed in the appropriation bill for FY 1980. These rates, by district, are shown in Table 9.

FY 1980 State Funding Claims Processed and Paid by the ICCB

Final Report on State Aid for Disadvantaged Student Grants
Paid to Illinois Public Community Colleges in FY 1980

During FY 1980, special grant projects for the disadvantaged students reached over 85,000 individuals (see Table 10 below) as the special grant projects moved through their seventh year of operation. Disadvantaged student grants were first made available to the Illinois community colleges during FY 1973.

Disadvantaged student projects continued to focus upon: (a) new instructional approaches; (b) special study materials and tutorial assistance to students; (c) experimental education to enhance the capacity of the community college system to effectively educate disadvantaged people; (d) special efforts at counseling and job placement; and (e) in-service education for faculty and staff in working with disadvantaged students.

All the state's public community college campuses except State Community College of East St. Louis participated in FY 1980 in disadvantaged student projects as Table 11 indicates.

In addition to delivering education and related services to the disadvantaged in new and different ways, these grant projects also focus upon special problems in recruiting and training drop-outs from the public schools; special problems of Spanish-speaking migrants and black minority people; training of incarcerated people and citizens with previous criminal records; and the training and job placement of public aid recipients.

For FY 1980, Disadvantaged Student Grants were based upon the number of remedial/developmental credit hours generated in FY 1979.
