Evaluation: Student Records

IDENTIFIERS Hawaii: \*Hawaii State Department of Education

# ABSTRACT

The second of two task forces formed to consider the graduation requirements of Hawaii's public education system came to several conclusions and made several recommendations regarding improving the existing program. Amony the task force's concerns were making sure graduation requirements were linked to the state department of education's established Foundation Program objectives: providing adequate access to alternative methods for achieving graduation requirements: and recognizing different types of student achievement through the issuance of appropriate documents, such as diplomas and certificates of program completion. The task force recommended specific changes in the graduation requirements, increasing the number of compulsory and elective course credits necessary and requiring demonstrated mastery of essential competencies related to daily living skills. Use of the Hawaii State Test of Essential Competencies to determine student progress toward these goals was recommended, but the task force recommended development of other methods for student demonstration of mastery since state law prohibits use of any test to deny student promotion or graduation. Extensive appendixes contain background information and preliminary reports considered by the task force in the course of its deliberations. Sample forms, survey results, and program descriptions are included. (Author/PGD)

### ACKNOWLEDGMENT

The reexamination engaged in by the Graduation Requirements Task Force included several features which distinguish it from previous reviews. Among them are:

- 1. The composition of the Task Force membership which reflected a deliberate attempt to include representatives from various sectors of the public.
- 2. The wide involvement of students, teachers, administrators, parents, and other community people as reactors, survey and trial use participants, and interested audiences.
- 3. The comprehensive scope of the effort as indicated by the various issues given attention within the contexts of the four major tasks undertaken.
- 4. The degree of participation by the total staff of the Office of Instructional Services and the valuable services rendered to the Task Force deliberations.
- The many long hours spent in discussing the merits, feasibility, and implications of various proposals on the different issues.
- The numerous ways in which the Task Force members engaged in information dissemination activities on a statewide basis.

As anticipated unanimity was not achieved on many of the issues. However, the recommendations in this report do reflect the agreements reached by a majority of the members.

As Chairman of the Task Force I wish to acknowledge the following:

- The Task Force members for their sincere interest and active participation in the numerous deliberations and for providing differentiated perspectives to reflect the sentiments of various segments of the publics.
- 2. The staff members of the Office of Instructional Services for the dedicated and professional manner in which they performed the necessary staff work to facilitate decision-making by the Task Force.
- The students, teachers, administrators, parents and other members of the public who participated in various ways in this endeavor.

The reexamination of graduation requirements is seen as a continuing need in the Department of Education's efforts to help each student attain the Foundation Program Objectives to the best degree possible: It is our hope that the work completed by this Task Force will contribute to the Department's effort.

#### I. OVERVIEW

# A. Introduction

THE GOAL OF DOE The Department of Education, through its seven district offices and the two-hundred twenty-seven schools throughout the State of Hawaii, is legally charged with the primary responsibility for the education of all youth ages six through eighteen. Overall direction for the total system is provided by the Goal of Public Education revised by the Board of Education in September of 1970. It reads:

The State of Hawaii shall provide a public school system and a public library system with scope in programs from pre-school to high school for children, youth, and adults. Such programs shall be simultaneously intellectual, aesthetic, and practical, with instructional practices which insure the learner the acquisition of knowledge relevant to living in the present, and the arts and skills of knowledge-making for speculating about living in the future. All programs shall derive from a curriculum which must include the areas of knowledge of English, the Sciences, Mathematics, the Social Sciences, the Humanities and the Practical Arts, and all other support services necessary for implementation. 1/

In addition, the Board of Education adopted the Foundation Program in 1970, to further delineate the knowledge, skills, attitudes, and values considered necessary in order for each student to enjoy self-fulfillment and to become a contributing member of society. In it, there are eight objectives toward which students are to be provided opportunities for growth. These are:

- Basic Skills for Learning and Effective Communication with Others
- 2. Positive Self-Concept
- 3. Decision-Making and Problem-Solving Skills at the Students' Proficiency Level
- 4. Independence in Learning
- 5. Physical and Emotional Health

 $<sup>\</sup>frac{1}{DOE}$  Policy 2000.

- Gareer Development as an Integral Part of the Student's Growth and Development
- 7. A Continually Growing Philosophy Such that the Student is Responsible to Self as Well as to Others
- 8. Creative Potential and Aesthetic Sensitivity

THE DELIVERY SYSTEM

Generally, students have been provided experiences for learning mainly through curricular programs and in part through cocurricular activities. Traditionally, teachers develop their own instructional objectives to determine the kinds and levels of learnings which can be reasonably expected of their students. The extent to which students meet the Department's and/or their teachers' expectations is in part measured by standardized tests administered yearly to grades 4, 6, 8, and 10 and by school or teacher-determined instruments and activities.

Because existing activities assess only a portion of student attainment of the Foundation Program Objectives and because there have not been uniform, consistent expectations for students at various grade levels, the Department has begun various improvement activities. These improvement efforts have focused primarily on program and personnel factors which were within the control of the Department.

EXTERNAL FACTORS

In Hawaii, as well as nationally, schools have had to expand their services to include responsibilities such as values education, sex education and providing breakfasts, which were previously not considered to be within their jurisdiction. Moreover, several factors beyond the control of the school system have placed additional demands on it. For example, the compulsory attendance law requiring school attendance until age eighteen has had the effect of keeping a higher percentage of youth in schools than ever before. The collective bargaining law for public employees has necessitated changes in school operations. In addition, widespread and indiscriminate television viewing, the increased rate of mobility among people, and the decreasing correlation between levels of education and employment have all had their effects directly or indirectly on student motivation and achievement.

The public has generally supported the Department's goal. It has, however, exercised various avenues to express skepticism and criticism about the instructional practices or delivery system which is intended to insure attainment of this goal. In light of these concerns, the diversity of students and the external factors

affecting public education, it becomes increasingly necessary that the Department accelerate its efforts to evaluate and improve its programs and develop personnel for more effective delivery thereof.

# B. Statement of the Problem

The effectiveness of our school system is determined by the degree to which it provides students with programs to help them attain the Foundation Program Objectives. Various activities have been attempted to assess this attainment and improve the deficient areas in our delivery system.

Within the context of the current improvement efforts, examination of the existing graduation requirements was seen as a task that required special attention in response to widespread concerns expressed by employers, parents, and the general public that many of our high school graduates have not acquired the skills, knowledge and values needed to become productive and contributing members of society.

# PRESENT REQUIREMENTS

Present requirements reflect the number of credits as well as the kinds of courses which must be completed. Within a four year period a student is expected to complete at least eighteen credits, four in Language Arts, four in Social Studies, one each in Mathematics, Science, and Physical Education, one-half each in Health and Guidance and six credits in elective courses. Credits are earned on the basis of satisfactory completion of courses as signified by passing grades. Students meeting these requirements are awarded high school certificates. However, meeting the existing graduation requirements does not necessarily assure attainment of all of the Foundation Program Objectives nor does it necessarily indicate any basic level of achievement.

To give meaning and worth to high school graduation, the competency standards which students should attain before they graduate need to be established. The real dilemma is the establishment of meaningful standards for all, while accommodating the great diversity which exists among the students.

### C. The Graduation Requirements Task Forces

On the surface the study of graduation requirements appears to be limited to the high school program. However, thoughtful consideration leads to the inevitable conclusion that complex

issues underlie any changes in these requirements and that these changes will affect more than the high school program.

TASK FORCE I The first Task Force on Graduation Requirements engaged in a review of the existing requirements in 1975 "to prepare policy changes to provide for the needs of Hawaii's wide range of students and alternative means to graduation." In its report prepared in December, 1975, Task Force I recommended that the Department of Education consider long-term, large-scale changes through the following means:

- "Obtain agreement on specific changes to be planned, developed and implemented.
- "Obtain decisions on whether or not graduation requirements should include specific minimal competencies.
- "Identify competencies required for graduation from high school (obtain consensus on competencies).
- "Develop a system for evaluation of student competencies, including instrumentation and other technical devices.
  - "Revise policies and regulations in relation to changes.
- "Develop appropriate course requirements and regulations." 2/

TASK FORCE II To follow up on these recommendations and insure that many perspectives were considered, the Superintendent formed a second Task Force on Graduation Requirements in March, 1977.

Task Force II was composed of principals, teachers, counselors, students, parents, and representatives of professional organizations, higher education, independent schools, business, organized labor and Department of Education state and district offices. (See Appendix A.)

An ad hoc group such as this, meeting once a month, could not have accomplished its tasks without the enormous amount of work done by the staff of the Office of Instructional Services through eight work committees and a Steering Committee. (See Appendix B.)

The Task Force limited its deliberations to the following:

 $<sup>\</sup>frac{2}{A}$  Detailed Report on Graduation Requirements (DRAFT), December, 1975.

- Identifying what learnings should be taking place with regard to the Foundation Program.
- 2. Studying existing graduation requirements and making recommendations regarding any possible changes.
- 3. Studying existing alternative ways for students to meet graduation requirements and recommending ways of improving their availability.
- 4. Clarifying the meaning of graduation and recommending graduation document(s) to reflect this.

After wrestling with the various issues over the last fifteen months (See Appendix C.), the Task Force has arrived at a number of recommendations related to each of the above. The deliberations of these issues and the recommendations are presented in Section II of this report.

# II. DELIBERATIONS AND RECOMMENDATIONS

# A. Student Learnings Related to the Foundation Program Objectives

Although the eight Foundation Program Objectives serve as the basis for all curriculum and instruction in the public schools, teachers have had difficulty in linking these objectives to classroom instruction. This difficulty is due to the broadness inherent in the way these objectives are stated. Therefore, performance expectations have been written to assist teachers by specifying competencies expected of students as they progress toward the attainment of the eight Foundation Program Objectives.

# PERFORMANCE EXPECTATIONS

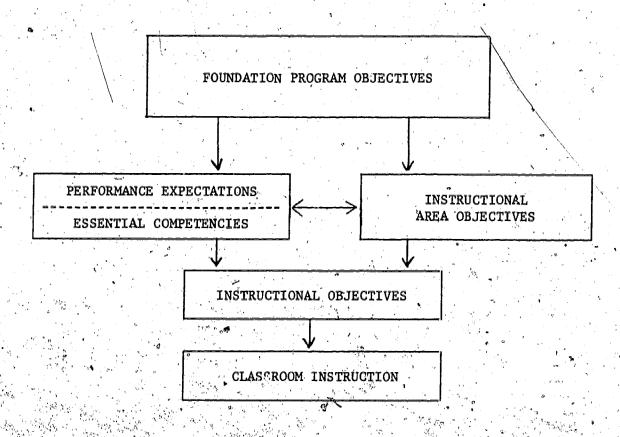

Performance expectations were developed for grades 1, 2, 3, 6; 8, 10 and 12 to guide classroom instruction and set consistent standards against which student progress can be measured and judged. Through this process and other means student needs can be better diagnosed and appropriate educational interventions prescribed. Because of the importance of the performance expectations, they had to be developed using a process that called for involvement of many professional and community persons (See Appendix D.1.). First drafts were disseminated for review and input to all schools in the Department. the summer of 1977, a number of teachers and principals worked with OIS staff to revise the performance expectations, using criteria developed by the Northwest Regional Educational Laboratories (See Appendix D.2). These versions were then printed and sent out for trial use and review to 77 schools (See Appendix D.3). The input from these schools is the basis for final revision prior to statewide dissemination and use.

# ESSENTIAL COMPETENCIES

Essential competencies are derived from performance expectations and are considered to be basic requirements for living in society. In keeping with the premise that general concurrence is necessary for establishing these essential competencies as acceptable basic standards for public school graduates, the identification, review and revision of essential competencies involved the application of criteria, field input, and public validation. These processes are discussed in the following section. Inasmuch as the essential competencies are but a small part of each student's expected development throughout the schooling experience, attainment of the performance expectations and essential competencies will be highly dependent on sequential instructional emphasis within and among instructional (or program) areas. This interrelationship is illustrated in Figure 1.

RELATIONSHIP AMONG FOUNDATION PROGRAM OBJECTIVES INSTRUCTIONAL AREA OBJECTIVES, PERFORMANCE EXPECTATIONS, ESSENTIAL COMPETENCIES, AND INSTRUCTIONAL OBJECTIVES

TO CLASSROOM INSTRUCTION

STAFF DEVELOPMENT Teachers are the key to attaining the goal of the Department of Education. In order to assure greater student attainment of the Foundation Program Objectives, staff development would need to accompany the dissemination of the performance expectations.

ASSESSMENT

In addition, student achievement would need to be assessed so that timely and appropriate help can be provided for those having difficulty. Although some resources are already available for these students, many of these are restricted to limited target populations.

SUPPLEMENTARY SERVICES Since a variety of external factors often impedes the progress of students, special individualized instructional assistance must be provided. Although this assistance may be currently available within, as well as supplemental to, regular classroom instruction, there exists a group of students whose needs still remain unmet. Every effort must be made to improve the existing services; however, in order to provide sufficient help to students having difficulty, additional resources must be sought to provide essential supplementary services.

RECOMMENDA-TIONS The Task Force believes that the Department should continue its efforts to assess the delivery of the Foundation Program so that all students are provided with opportunities to attain the Foundation Program Objectives. To this end, the Task Force recommends that the Department:

- 1. Disseminate the Performance Expectations starting September, 1978 and assist teachers in using them to identify appropriate teaching objectives and set learning expectations for their students.
- Provide staff development activities correlated with this dissemination to help teachers understand, translate and effectively use the Performance Expectations.
- Continue efforts to develop the means by which student achievement toward these expectations can be assessed so that timely and appropriate help can be provided for those having difficulty.
- 4. Seek resources for providing supplementary services to those who may need special help in attaining the objectives, expectations and competencies.

# B. Graduation Requirements

There is no hard list of educational reasons why most American schools require 16 to 18 credits, specifying some areas of study, for high school graduation. Long-standing requirements have occasionally been changed to meet changing needs and perspectives. For example, the Language Arts and Social Studies course requirements have been restructured over the last three years to better assure that students are given the opportunity to learn the essential components of these areas of study.

# FACTORS CONSIDERED

In the Task Force's reexamination of the existing requirements, due consideration was given to the following factors:

- 1. The standards of the high school accreditation organization;
- College entrance requirements;
- The tradition of high school taking up four years of time;
- Hawaii's law which mandates compulsory school attendance to age 18;
- .5. The Department policy of the 30-hour school week; and
- Current public sentiment.

PUBLIC SENTIMENT

In order to assess public sentiment on credit and course requirements, the Department of Education conducted a survey of teachers, principals, students, parents, unions and business representatives. This survey asked respondents to assess the extent to which Foundation Program Objectives were being met and asked for recommendations regarding credit and course requirements and program improvement (See Appendix E.1 and E.2 for samples of the instruments used.). The number surveyed and percent of returns is displayed in Table 1.

Table 1. Credits/Courses/Program Improvement Survey

3	Teachers	Principals	Students	Parents	Bus./Unions
No. Sent	401	15	464	464	1,400
No. Recurned	383	15	464	384	5 374
% Returned	91%	100%	100%	83%	27%

Respondents favored increasing the total requirements, reinforcing an earlier 1976 survey that showed that 56% favored increasing credit requirements.

Table 2. Credit Recommendations: Required and Elective

Respondents	Teacher (N=383)	Principal (N=15)	Parent (N=384)	Student (N=464)	Bus./Unions (N=331)
Total Credits	20.3	19.3	19.8	19.7	20.0
Required	13.8	12.8	13.7	13.5	16.9
Elective	6.5	6.5-	6.1	6.2	3.1

While the earlier survey favored allowing students to elect courses suited to their needs, the current survey pointed to an increase in the mathematics requirement. It was the only subject area in which teachers, students, parents and business and union representatives recommended an increase of .6 or more credits (See Appendix E.3.). In addition, of the 57 mathematics teachers who were part of the 400 subject area teachers sampled, 75% recommended increasing the mathematics requirement from one to two credits. Further, survey findings indicated that 87% of the students would be graduating with 20 or more credits and 83% would have earned 2 or more credits in math.

Based on the above and on the rationale that 1/2 credit increases do not justify the added effort and cost in programming, registration, record-keeping, modified facilities, added equipment, and staffing, the Task Force approved the use of the survey findings as the major factor in arriving at its final recommendation on credit and course requirements.

# PROGRAM IMPROVEMENT

The survey also solicited suggestions for improving the schools programs. Fifty-six per cent of the respondents made a total of 1,978 suggestions. These suggestions fall into the following categories which are ranked according to frequency of times mentioned:

1. Strengthen program content and delivery (including identifying instructional objectives in view of the Foundation Program Objectives, specifying content, selecting meaningful activities, and conducting program evaluation).

- 2. Improve teaching strategies (including teaching and personal qualifications, attitude towards students and ability to work with them, instructional methodology, and management of instruction). Most of these suggestions came from students and parents.
- 3. Reorganize current school practices (including revising school schedule, eliminating programs and courses, lowering teacher-pupil ratio, hiring personnel to manage co-curricular activities, and providing services not currently provided by schools).
- 4. Assess learner needs (including identifying student strengths and weaknesses, involving students in program development and guiding students into appropriate courses and activities). Students made most of these suggestions.
- 5. Provide more and better equipment and facilities (including textbooks; audio-visual materials and equipment; athletic, vocational-technical, and other facilities; and other support materials).

The scope of the Task Force's activity has not included the development of the details as to how to improve the school programs. Rather, this recommendation is related to ongoing Department of Education efforts to improve programs, as reflected in the 1979-81 budget requests.

# ESSENTIAL COMPETENCIES

In order to obtain a decision on whether or not graduation requirements should include specific competencies, it was necessary to identify those performance expectations that might be considered essential for high school graduation. The original list of essential competencies, selected from among the performance expectations, consisted of 72 items.

The Task Force had no difficulty agreeing that the basic skills of reading, writing, and computation are essential to adult life. The difficult question was whether some competencies from all eight Foundation Program Objectives were also essential. The concern about "measurability" of Foundation Program. Objectives 2 - 8 entered the debate. The Task Force decided to confine its scope to deciding what was essential and to assign the job of measurement to the professional test makers.

The Task Force then decided that the Department of Education efforts to educate the whole child should be measured, and it identified, from the original 72, 27 essential competencies spanning all eight Foundation Program Objectives. Consultants from the Northwest Regional Educational Laboratory (NWREL) provided assistance in reviewing and revising these essential competencies according to criteria established by the NWREL (Appendix F).

# PUBLIC VALIDATION

Using a random sample approach, participants for the public validation of the essential competencies were selected from three major target populations: consumers, professionals, and other publics. (See Appendix G.1.) These participants received a survey containing the 27 essential competencies. (See Appendix G.2.) The reactions received from this survey (See Appendix G.3.) assisted the Task Force in selecting from the 27 competencies those 15 deemed important and necessary for high school graduation.

This final list does not include competencies in the areas of positive self-concept and creative potential and aesthetics. Competencies in these areas have been deleted because, although they are considered to be "highly desirable," the Task Force could not see withholding a diploma from a student who did not possess them.

#### 'INSTRUCTION

Essential competencies as defined by the Task Force are the basic standards of proficiency considered to be essential requirements for becoming productive and contributing members of society. A basic assumption underlying requiring mastery of essential competencies for graduation is that instruction can and will be provided to students.

Attainment of the essential competencies is dependent on sequential instruction beginning in the early schooling experience and continuing throughout. Systematic attention to specified performance expectations would help to ensure that students are provided with the necessary instruction.

Until such time that the students have moved through all grades in which performance expectations and the attendant assessment are used, there is a need to have a measure by which students can demonstrate mastery of the essential competencies.

HAWAII STATE TEST OF ESSENTIAL COMPETENCIES To determine each student's mastery of these competencies, the Hawaii State Test of Essential Competencies was developed. The Educational Testing Service was contracted by the Department of Education to develop test items which would measure the attainment of these competencies. The initial set of multiple-choice test items developed by the Educational Testing Service was reviewed by the Office of Instructional Services to determine the "match" with

the Department's Foundation Program Objectives and the 15 essential competencies. Consideration in this review was given to validity, Clarity, reading level, cultural bias, difficulty level, appropriate response choices, and classification.

A pre-pilot trial of two forms of the Hawaii State Test of Essential Competencies was conducted at two high schools involving 540 twelfth graders and an approximately equal number of tenth graders. As a result of the pre-pilot, test items and test administration procedures were revised as appropriate in preparation for the pilot trial which was conducted in one high school in each district. The selection of the seven schools was based on the Stanford Achievement Test Reading scores, socio-economic status, size of school and geographic distribution.

In addition to the pre-pilot and pilot testing of the Hawaii State Test of Essential Competencies, an analysis of the readibility level was done by staff of the Office of Instructional Services. According to this analysis, the average reading level of both forms of the Hawaii State Test of Essential Competencies is between seventh and eighth grade.

Originally, the <u>Hawaii State Test of Essential Competencies</u> was envisioned to be the tool by which students would demonstrate their mastery of the required essential competencies. However, because of strong opposition voiced by the Citizens Committee on Basic Skills and a legislative provision in the Appropriations Act preventing the Department from using any test to deny promotion or graduation, the Task Force had to examine other ways of using the test and look for other ways to have students demonstrate mastery.

The Hawaii State Test of Essential Competencies can be considered to be a useful tool for identifying students in need of special help in mastering the essential competencies. To do this, test standards must be established. There are basically two types of standard-setting methods: 1) those that require judgments about the questions in the test and 2) those that require judgments about the mastery status of a sample of students taking the test.

The Task Force determined that the methods requiring judgment about the mastery status of students were preferred over methods requiring judgments about test items. However, because of numerous considerations, it was decided that a less preferred method be applied this year with validation of results by the application of the preferred method next year.

The administration of the Hawaii State Test of Essential Competencies in the 1978-79 school year will enable the Department to apply the preferred method and provide students with a general indication of their level of mastery of the competencies. If students were also provided with scores on each competency, these sub-scores may help to indicate any areas of potential weakness. Students could then be counseled into courses which are designed to provide instruction toward strengthening those areas.

In order to maximize the availability of this kind of instructional assistance, the Department must identify existing courses that could accomplish the task and provide necessary support in staff development, instructional materials and possibly even tutorial services.

In order to give students ample time to achieve all competencies not yet mastered, the Task Force recommends that testing be done for all students in Grade 10. Ninth graders who feel ready may take the test on a voluntary basis with the tenth graders.

Although the <u>Hawaii State Test of Essential Competencies</u> is at present the only tool that the <u>Department has for students to demonstrate</u> their mastery of the essential competencies, other options for demonstrating mastery should be identified and made available to students. Possible alternatives include certification through:

- 1. The passing of courses in which competencies are incorporated.
- Completion of specified projects which require demonstration of competencies.
- Adult judgment of daily performance in class or performance in simulated situations according to guidelines which include specific learner outcomes which indicate mastery.
- 4. Completion of individually negotiated contracts containing tasks which demonstrate mastery.

RECOMMENDA-TIONS The Task Force believes that changes in graduation requirements are in order and recommends that the Department:

1. Increase the mathematics requirement from 1 credit to 2 and electives from 6 credits to 7 for a total increase in credit requirements from 18 to 20 effective with the Class of 1983. (See Appendix H.) The composite of recommended courses and credit requirements are:

Health ..... ½ credit
Guidance ..... ½ credit

Electives ..... 7 credits

- Require students to demonstrate mastery of the following essential competencies as an additional graduation requirement (See Appendix H.):
  - Read and use printed materials from daily life.
  - b. Complete commonly used forms.
  - Demonstrate writing skills commonly used in daily life.
  - d. Communicate orally in situations common to everyday life.
  - Use computational skills in situations common to everyday life.
  - Read and use scales on standard measuring devices.
  - Interpret common visual symbols.
  - h. Reach reasoned solutions to commonly encountered problems.
  - i. Distinguish fact from opinion in TV and radio news broadcasts, advertising, newspaper and magazine articles, and public speeches.
  - j. Use resources for independent learning.

- k. Identify harmful effects of smoking, drinking, drug abuse, overeating, insufficient sleep, poor personal hygiene, and poor nutrition.
- 1. Identify the training, skill and background requirements of at least one occupation in which the student is interested.
- m. Demonstrate knowledge of the <u>basic</u> structure and functions of national, state and local governments.
- Demonstrate knowledge of the citizen's opportunities to participate in political processes.
- o. Demonstrate knowledge of important citizen rights and responsibilities.

The Task Force recommends that the Department delay implementation of this recommendation until there are at least three methods by which students can demonstrate mastery of these competencies.

- Ensure that students are provided with instruction to master the essential competencies through:
  - a. Emphasizing instruction toward those performance expectations related to the essential competencies at appropriate grades before and at the high school level.
  - Providing related sequential instruction within appropriate programs.
  - Helping teachers develop relevant and diverse strategies to accommodate the range of students
- 4. Administer the <u>Hawaii State Test of Essential</u>

  Competencies statewide beginning with school year
  1978-79 in grade 10 and optionally in grade 9:
  - To provide an optional way of demonstrating mastery of the essential competencies.
  - To help teachers become aware of student needs in relation to the essential competencies.

- c ... To point out to students essential things that need to be learned.
- To make the essential competencies visible d. to the community.
- Provide a minimum of two other methods of demonstrating the mastery of the essential competencies by 1979-80. Examples are: adult judgment of actual or simulated performance, completion of specified school projects and certification through passing of courses in which essential competencies are incorporated or a combination thereof.

# Alternative Ways for Meeting Credit and Course Requirements

Although most of the students will meet all credit and course requirements for graduation through the regular instructional program, it is anticipated that there will be some students who will need special assistance in order to meet these requirements.

# CURRENT SERVICES

A study of current services indicated that alternatives to the high school program are presently available on a limited basis. The current need, therefore, is to improve and expand the available alternatives within the public high schools to help students with special needs.

These students are generally identified as the educationally disadvantaged, the alienated, the limited English speaker, the culturally isolated or the temporarily disabled (students requiring home-hospital instruction). While these students have special needs, many possess average or above average abilities and potentials.

The Task Force felt that for these students and other students with similar characteristics, alternatives or arrangements not normally available must be systematically provided to help students meet graduation requirements.

# DEPARTMENTAL PLAN

It was determined that a departmental plan was needed to guide the development, implementation and evaluation of alternatives.

Analysis of current alternatives used locally and nationally indicated a lack of unified or systematic approaches and procedures for providing and utilizing alternatives, Furthermore, there was no clear delineation of alternatives in relationship with the regular instructional program. The need for a common

definition, criteria for identifying alternatives, and a unified plan was quite evident for designing and developing alternatives.

In developing the plan for helping students meet course and credit requirements for graduation, the Task Force considered the following:

- 1. The Problem
- 2. Goal
- 3. Objective
- 4. Definition/Criteria and Assumptions
- Current Alternatives
- 6. Major Components and Procedures for the Plan

As a result of this deliberation, the Task Force arrived at the Report on Alternatives for Meeting Course and Credit Requirements for Graduation - The Plan (Appendix I). Implementation of a viable plan such as this will:

- 1. Provide a unified and systematic approach which offers students maximum opportunities to meet graduation requirements.
- 2. Provide a framework for developing, implementing, and evaluating new alternatives and options.
- Provide organized procedures to curb the overusage and proliferation of superfluous alternatives and options.

CREDIT BY EXAMINATION Credit by Examination as an alternative to course enrollment is an idea long endorsed by the Department of Education. By adopting new regulations and operational guidelines the idea can become a reality. It is in keeping with the general effort to meet individual needs of students, for it provides an additional avenue for earning credits. It is a formal process of ascertaining student competencies and awarding credit for a course without a student having to enroll in the course. This is in contrast to the usual course credit which is related to time spent in the course.

The proposed revision of regulations was based on the following basic assumptions:

- 1. Credit by Examination provides students the opportunity to obtain course credit by successfully passing the examination and is basically an indication of progress and learning rather than time spent in a course.
- 2. Credit by Examination is another way of certifying student competencies in selected courses offered in grades 9-12.
- Credit by Examination is available to all students enrolled in the public schools in grades 9-12.
- 4. Credit by Examination is an alternative to course work in the classroom and, in keeping with the concept of equal educational opportunity, is to be administered free of charge.
- 5. Credit by Examination is not appropriate for some courses such as those with major focus on the development of interpersonal relationships, attitudes, and other affective outcomes.

A survey form (Appendix J.I) on the proposed Credit by Examination policy, regulations and operational guidelines was sent to districts, high schools, and Department of Education state offices during April, 1978 to solicit reactions. The data from this survey suggest that a vast majority of Department of Education respondents including students and professional staff, favor Credit by Examination.

The survey form was also sent to higher educational institutions, community organizations, state agencies, professional organizations and unions (See Appendix J.2). Returns from non-Department of Education respondents were few. Most of the respondents answered as individuals rather than as official representatives of the organization. In general these responses support Gredit by Examination. The two areas of major disagreement are: 1) early graduation is inevitable and should be allowed, and 2) that a small fee should be charged to defray some of the expenses incurred by the state.

A summary of the survey results on the proposed policy regulations and operational guidelines is in Appendix J.3.

Trial use of the proposed operational guidelines for Credit by Examination is being recommended for spring of school year 1978-79. This will provide the Department with data to project or refine a long-range budget.

RECOMMENDA-TIONS The Task Force believes that in order to maximize opportunities for students to complete course and credit requirements for graduation, it is necessary to provide educational programs and services beyond those generally provided by the regular school program. To this end, the Task Force recommends the following:

- 1. Improve and increase the use of current alternatives and options to help students meet credit and course requirements for graduation.
- 2. Develop new alternatives and options as delineated in the Plan (Appendix I-) beginning September, 1978.
- 3. Expand student opportunities for Crecit by Exam beginning 1978-79 by:
  - a. revising Regulation 4530 to include basic information which provides clear direction and guidance. (See Appendix H.)
  - b. adopting the proposed set of operational guidelines (Appendix J.4), based on the Regulations, to assist all levels--state, district, and school--to coordinate their efforts and to carry out their respective responsibilities.
  - c. piloting Credit by Examination in a few specified subject areas during Spring of School Year 1978-79 to determine the adequacy and practicability of the operational guidelines as well as to obtain a cost data base.
  - d. providing necessary funds for the further development of appropriate measures for various courses considered appropriate for credit by examination and for the administrative cost of carrying out the program.

# D. The Meaning of Graduation

The Task Force recognized a need to establish standards for graduation that would communicate to the public the basis on which the graduation document is awarded.

# CURRENT PRACTICES

The Department of Education's current graduation document is called a certificate. This certificate is issued to students who have completed the course and credit requirements. The same certificate is issued to students who complete the General Education Development Test requirements through Adult Education. Current policy allows for negotiated programs for alienated students or others with unique problems or needs to meet graduation requirements.

These practices have resulted in students being graduated under varying standards, giving rise to questions on the meaning and worth of the graduation document.

#### ISSUES

It became evident that before recommendations could be made regarding the documents, a number of overriding issues needed to be resolved. These included: What does graduation mean? Who should be graduated?; What are the standards for graduation? Should an Essential Competency Test be required for graduation? Should there be an honors document?

#### GRADUATION

After months of discussion, the following were agreed to: graduation from the public schools of Hawaii means successful completion of all graduation requirements as determined by the Board of Education. Proposed graduation requirements are:

a) completion of credit requirements; b) completion of required courses; and c) demonstration of mastery of essential competencies.

# DOCUMENTS

It was also decided that: a) the function of the graduation document is to give meaning, worth, and clarity to graduation; b) those students who meet all graduation requirements will receive a graduation document; and c) one standard graduation document called a High School Diploma shall be issued.

The proposal of an honor code was discussed and rejected. However, Task Force members recommended that individual schools recognize through appropriate means those students who attain a high level of achievement.

At later meetings, there were lengthy discussions of whether to award certificates to recognize partial completion of the graduation requirements. A minority of the Task Force felt that such certificates should constitute graduation.

The final recommendation is to award two diplomas which constitute graduation and one certificate which does not constitute graduation. These recommendations have the following implications:

- a. All students who receive a high school diploma will have met uniform basic standards at least.
- b. Students who do not meet all graduation requirements will not graduate or receive a diploma.
- c. The alternative of graduating through Adult Education is still available.
- d. Recognition through the issuing of a certificate will be given to specified handicapped students upon completion of the individually prescribed program.

#### COMMENCEMENT

The Department of Education's current regulations refer to Graduating Exercises. Since specific handicapped students who receive a Certificate of Completion of an Individually Prescribed Program will participate in the exercises but will not graduate, the term Graduating Exercises is not appropriate. Therefore, it was also suggested that the wording of the current regulation 4540.1 be revised to read Commencement Exercises rather than Graduating Exercises to clarify that participation in the exercises in and of itself does not constitute graduation. This revision will be consistent with the new requirements and principals may give special consideration to students as circumstances warrant.

# RECOMMENDA-TIONS

The Task Force believes that the Department should recognize students who successfully complete specified requirements by issuing appropriate documents and awarding them in ceremonies which enable the community to share in the accomplishment. The recommended requirements and attendant documents are as follows:

- A student who meets all graduation requirements listed in section B of this chapter shall be issued a document which shall be called a High School Diploma.
- 2. A student who meets the requirements of the General Education Development Test through Adult Education shall be issued a High School Equivalency Diploma.

- 3. Specifically identified handicapped students, who due to their handicap are unable to meet graduation requirements, shall work toward an individually prescribed program which stipulates the specific requirements for the handicapped student to complete the program. Upon successful completion of the individually prescribed requirements these students will be issued a document called a Certificate of Completion of an Individually Prescribed Program. Receipt of this document shall not constitute graduation as specified in section B.
- 4. Students in any of the above named categories may participate in Commencement Exercises. This will require the revision of regulation 4540.1 to read Commencement Exercises, rather than Graduating Exercises (Appendix H).

# E. Evaluation

The effectiveness of the proposed recommendations of the Task Force, if adopted and implemented, will be determined by factors such as achievement of students, degree of acceptance, and support and adequacy of procedures. A systematic evaluation plan is needed in order that decision-makers may address the following:

- 1. Do the revised graduation requirements and related improvement activities promote greater student achievement of basic skills, knowledge and attitudes?
- 2. Should the revised graduation requirements be continued as adopted?
- 3. Should these revised graduation requirements be modified in any way?

Development of an evaluation plan was initiated as part of the Task Force activities (See Appendix K.) This plan will require refinement and appropriate revisions of timelines concomitant with adoption and implementation decisions.

RECOMMENDA-TION In order to assess the extent to which its recommendations are effective in ensuring greater student attainment of the Foundation Program Objectives and giving greater meaning and worth to graduation, the Task Force recommends that an evaluation of the adopted changes in graduation requirements be conducted.

### F. Summary

The Task Force's recommendations attempt to provide direction to the Department's efforts for the next few years. They were arrived at after reviewing work done by the Office of Instructional Services staff and much debate between and among the Task Force members who represented many perspectives. Preparation for arriving at the recommendations also included disseminating information about the issues in order to obtain additional input from various audiences. (See Appendix L.)

Following are the recommendations presented in the preceding discussion of deliberations:

RECOMMENDA- • TION

The Task Force believes that the Department should continue its efforts to assess the delivery of the Foundation Program so that all students are provided with opportunities to attain the Foundation Program Objectives. To this end, the Task Force recommends that the Department:

- 1. Disseminate the Performance Expectations starting September, 1978 and assist teachers in using them to identify appropriate teaching objectives and set learning expectations for their students.
- Provide staff development activities correlated with this dissemination to help teachers understand, translate and effectively use the Performance Expectations.
- 3. Continue efforts to develop the means by which student achievement toward these expectations can be assessed so that timely and appropriate help can be provided for those having difficulty.
- 4. Seek resources for providing supplementary services to those who may need special help in attaining the objectives, expectations and competencies.

RECOMMENDA- The Task Force believes that changes in graduation requirements TION are in order and recommends that the Department:

 Increase the mathematics requirement from 1 credit to 2 and electives from 6 credits to 7 for a total increase in credit requirements from 18 to 20 effective with the Class of 1983. (See Appendix H.)

The composite of recommended courses and credit requirements are:

- Require students to demonstrate mastery of the following essential competencies as an additional graduation requirement (See Appendix H.):
  - a. Read and use printed materials from daily life.
  - b. Complete commonly used forms.
  - Demonstrate writing skills commonly used in daily life.
  - d. Communicate orally in situations common to everyday life.
  - e. Use computational skills in situations common to everyday life.
  - Read and use scales on standard measuring devices.
  - g. Interpret common visual symbols...
  - h. Reach reasoned solutions to commonly encountered problems.
  - Distinguish fact from opinion in TV and radio news broadcasts, advertising, newspaper and magazine articles, and public speeches.
  - j. Use resources for independent learning.

- k. Identify harmful effects of smoking, drinking, drug abuse, overeating, insufficient sleep, poor personal hygiene, and poor nutrition.
- Identify the training, skill and background requirements of at least one occupation in which the student is interested.
- m. Demonstrate knowledge of the <u>basic</u> structure and functions of national, state and local governments.
- n. Demonstrate knowledge of the citizen's opportunities to participate in political processes.
- o. Demonstrate knowledge of important citizen rights and responsibilities.

The Task Force recommends that the Department delay implementation of this recommendation until there are at least three methods by which students can demonstrate mastery of these competencies.

- 3. Ensure that students are provided with instruction to master the essential competencies through:
  - s. Emphasizing instruction toward those performance expectations related to the essential competencies at appropriate grades before and at the high school level.
  - Providing related sequential instruction within appropriate programs.
  - Helping teachers develop relevant and diverse strategies to accommodate the range of students.
- 4. Administer the <u>Hawaii State Test of Essential</u>

  <u>Competencies</u> statewide beginning with school year

  1978-79 in grade 10 and optionally in grade 9:
  - a. To provide an optional way of demonstrating mastery of the essential competencies.
  - b. To help teachers become aware of student needs in relation to the essential competencies.

- c. To point out to students essential things that need to be learned.
- d. To make the essential competencies visible to the community.
- 5. Provide a minimum of two methods of demonstrating the mastery of the essential competencies by 1979-80. Examples are: adult judgment of actual or simulated performance, completion of specified school projects and certification through passing of courses in which essential competencies are incorporated or a combination thereof.

# RECOMMENDA- (

- The Task Force believes that in order to maximize opportunities for students to complete course and credit requirements for graduation, it is necessary to provide educational programs and services beyond those generally provided by the regular school program. To this end, the Task Force recommends the following:
  - Improve and increase the use of current alternatives and options to help students meet credit and course requirements for graduation.
  - Develop new alternatives and options as delineated in the Plan (Appendix I) beginning September, 1978.
  - 3. Expand student opportunities for Credit by Exam beginning 1978-79 by:
    - a. revising Regulation 4530 to include basic information which provides clear direction and guidance. (See Appendix H.)
    - b. adopting the proposed set of operational guidelines (Appendix J.4), based on the Regulations, to assist all levels-- state, district, and school--to coordinate their efforts and to carry out their respective responsibilities.
    - c. piloting Credit by Examination in a few specified subject areas during Spring of School Year 1978-79 to determine the adequacy and practicability of the operational guidelines as well as to obtain a cost data base.

d. providing necessary funds for the further development of appropriate measures for various courses considered appropriate for credit by examination and for the administrative cost of carrying out the program.

# RECOMMENDA ••

The Task Force believes that the Department should recognize students who successfully complete specified requirements by issuing appropriate documents and awarding them in ceremonies which enable the community to share in the accomplishment. The recommended requirements and artendant documents are as follows:

- 1. A student who meets all graduation requirements listed in section B of this chapter shall be issued a document which shall be called a High School Diploma.
- 2. A student who meets the requirements of the General Education Development Test through Adult Education shall be issued a High School Equivalency Diploma.
- 3. Specifically identified handicapped students, who due to their handicap are unable to meet graduation requirements, shall work toward an individually prescribed program which stipulates the specific requirements for the handicapped student to complete the program. Upon successful completion of the individually prescribed requirements these students will be issued a document called a Certificate of Completion of an Individually Prescribed Program. Receipt of this document shall not constitute graduation as specified in section B.
- 4. Students in any of the above-named categories may participate in Commencement Exercises. This will require the revision of regulation 4540.1 to read Commencement Exercises, rather than Graduating Exercises (Appendix H).

# RECOMMENDA- • TION

In order to assess the extent to which its recommendations are effective in ensuring greater student attainment of the Foundation Program Objectives and giving greater meaning and worth to graduation, the Task Force recommends that an evaluation of the adopted changes in graduation requirements be conducted.

The Task Force strongly believes that implementation of the recommendations, summarized above, will contribute to greater attainment of the goal of the Department of Education.

#### .Appendix D.2

# CRITERIA FOR REVIEWING PERFORMANCE EXPECTATIONS

#### TEACHABILITY

- 1. Is it possible for the schools to teach the knowledge, skills, and attitudes described in the Performance Expectations?
- 2. Is there curriculum available related to the individual Performance Expectations?
- 3. Are the Performance Expectations designed to allow all teachers with "normal" academic preparation to use them?
- 4. Can programs be made available to support remediation now or in the near future?

#### ACCEPTABILITY

- 1. Are the Performance Expectations free of statements that suggest that some social, occupational or life roles should be valued more than other acceptable roles?
- 2. Are the Performance Expectations universally applicable across lines of sex, socioeconomic status, race, rural and urban settings, and religious persuasions?
- 3. Are the Performance Expectations reasonable, appropriate, and important outcomes of the total educational experience?

#### GENERALIZABILITY

- Are the Performance Expectations achievable regardless of students' sex, socioeconomic status, race, rural and urban settings, and religious persuasions?
- Will all students for whom a particular Performance Expectation is applicable be exposed to sufficient instruction to achieve the knowledge, skill or attitude?
- 3. Do the Performance Expectations avoid implying endorsement of curriculum approaches which are not common to all schools?
- 4. Are the Performance Expectations appropriate for those students who transfer within the state, from the mainland or to the mainland?

#### LEVOIDIFFII

- 1. Can adequate educational resources, e.g., time, staff, money, books and materials, be made available to support the implementation of the Performance Expectations now or in the near future?
- 2. Are the Performance Expectations free of specifications which would require special equipment or facilities which are not available to most students?
- 3. Are there few enough Performance Expectations within the program area and grade level to be manageable by educators in the state?

#### CONSISTENCY

- 1. Do the Performance Expectations directly relate in content and difficulty level to the Performance Expectations in the grade below and above, within a particular foundation objective and program area?
- 2. Are the high-medium-low levels written in a logical progression; that is, if students perform adequately at the high level will they be likely to perform those skills at the two lower levels?

# SPECIFICITY

- 1. Are the Performance Expectations worded specifically enough so that it is clear what skills are and are not included in the Performance Expectations?
- 2. Are the Performance Expectations appropriate for the particular grade level and students' abilities?
- 3. Is there a sufficient number of Performance Expectations by grade, objective and program area to provide adequate information for decision making?
- 4. Are the Performance Expectations prescriptive so as to specify student inadequacies?
- 5. Are Performance Expectations written at a level of specificity roughly equivalent to level 3 (e.g. "The student will select textual evidence of the author's attitude toward a subject.")

#### CLARITY

- 1. Are the Performance Expectations free from educational jargon or other unusual word uses?
- Are the Performance Expectations stated clearly and succinctly?
- 3. Are the Performance Expectations written so they communicate effectively to students, parents, community members, teachers, administrators and other interested individuals?

#### COMPREHENSIVENESS

- 1. Is there consistency among Performance Expectations across programs such that vertical and horizontal continuity of competencies can be noted?
- 2. Do the Performance Expectations for 21 program areas attend appropriately to all eight Foundation Program Objectives?
- 3. Are the Performance Expectations generally written at a similar level of specificity?
- 4. Do the Performance Expectations across programs constitute a set of desirable competencies for the total educational development of each student?

#### Appendix D.3

# General Procedures for Reviewing Performance Expectations

The professional staff in all participating schools will receive a copy of the document: User's Guide for Performance Expectations of the Foundation Program Objectives for trial use between February and May, 1978.

Feedback about Performance Expectations. Based on this trial use, a statewide review of performance expectations is sought from the professional staff in selected schools. Forty-seven elementary, 15 intermediate, and 15 high schools were randomly selected by grade and socio-economic status to provide feedback about the trial use of performance expectations. See Attachment I for sample schools.

Purpose of Feedback. A comprehensive review of performance expectations by school personnel is necessary for revision of performance expectations. Feedback is sought about the usefulness of performance expectations toward developing instructional plans and judging the adequacy of existing curriculum.

School Reviews. As much as possible, all professional staff at a school should be considered for participation in the review of performance expectations. In addition to regular classroom teachers and school administrators, special education teachers, counselors and librarians should review performance expectations. It is suggested that school reviews be conducted in the following manner:

#### 1. Elementary

- a. All professional staff meet by grade levels (K-6).
- b. Each grade level group completes one survey form, reviews 14 instructional areas\* and records comments by consensus ir one User's Guide.
  - 1) The grade level chairperson or another designee can direct the review; and
  - 2) Another teacher from that group can serve as recorder for comments.

<sup>\*</sup>Refer to Table 1 of the <u>User's Guide</u> which lists all the instructional areas by grade levels.\

- c. The comments in the <u>User's Guide</u> by grade levels are to; be consolidated into one document for each school with the school code indicated on the document.
- d. Submittal to the district office by May 15, 1978 should include:
  - 1) Seven survey forms (one for each grade level).
  - 2) One <u>User's Guide</u> with consolidated comments and school code.

## 2. Secondary

- a. The principal selects one professional staff member to direct the review of each instructional area.
  - 1) For grades 7 and 8, there are 16 areas\*
  - 2) For grades 9-12, there are 20 areas\*.
- b. Each person designated to direct the review is to involve all staff in a department or anyone else qualified to assist in the review of an instructional area:
  - 1) To complete one survey form reflecting the group's reactions.
  - 2) To record comments into a User's Guide.
- c. Comments from all review groups should be consolidated in one copy of the <u>User's Guide</u> for Parts I, II and III. For Part IV, the school has the option to consolidate comments from all review groups in one copy of the guide or submit individual copies for each instructional area.
- d. Submittal from the school to the district office by May 15, 1978 should include:
  - 1) Survey forms for each instructional area.
  - 2) One User's Guide for all instructional areas for Parts I, II and III of the guide.

<sup>\*</sup>Refer to Table 1 of the <u>User's Guide</u> which lists all the instructional areas by grade levels.

3) One User's Guide for all instructional areas for Part IV unless the schools prefer to send individual copies for each instructional area.

It is acknowledged that reviews of performance expectations are valuable and will require a long period of time; it is suggested, therefore, that adequate time be set aside for the school staff to complete their reviews to avoid hasty and cursory reviews.

The district offices will route all feedback materials on performance expectations by May 22 to Nora Hubbard, Room 1006, 1270 Queen Emma Street, Honolulu, Hawaii, 96813

# STATE OF HAWAII

P. O. BOX 2360 HONOLULU, HAWAII 96804

SPRICE OF THE SUPERINTENDENT

January 23, 1978

Dear Teacher:

Survey on Programs as Related to Graduation Requirements

The Department of Education is reviewing current graduation requirements and programs to insure that our students receive an education that will help them to attain the eight Foundation Program Objectives. In our study, we are soliciting responses from as many sources as possible. As a teacher, your input is very important in arriving at decisions affecting the education of the youth of Hawaii.

The items on the attached survey form were developed cooperatively by representatives of teachers, principals, students, parents and community members. The questionnaires will be administered to sample groups of teachers, principals, students and parents.

Sincerely,

CHARLES G. CLARK

Heen

CHARLES G. CLARK SUPERINTENDENT

#### **PART I: OBJECTIVES**

Appendix F

Criteria for Reviewing Hawaii Essential Competencies

#### Appendix F

# CRITERIA FOR REVIEWING HAWAII ESSENTIAL COMPETENCIES

# Teachability

- 1. Is it possible for the schools to teach the knowledge, attitudes and skills described in the Essential Competencies?
- 2. Is there curriculum available related to the individual Essential Competencies?
- 3. Are the Essential Competencies designed to allow all teachers to teach them?
- 4. Will programs be made available to support remediation now or in the near future?

## Acceptability

- 1. Do the Essential Competencies represent reasonable standards of proficiency to be required of all students who have completed other requirements for graduation (attendance and credits) from the public schools of Hawaii?
- 2. Are the Essential Competencies free of statements that suggest that some social, occupational or life roles should be valued more than other acceptable roles?
- 3. Are the Essential Competencies universally applicable across lines of sex, socioeconomic status, race, rural and urban settings, and religious beliefs?
- 4. Are the Essential Competencies reasonable, appropriate, and important outcomes of the total educational experience?

## <u>Importance</u>

- Are the Essential Competencies generally agreed to be necessary outcomes for successful adult life?
- 2. Do the Essential Competencies represent levels of student proficiency and accomplishment of sufficient importance to satisfy their use as a basis for the award of the high school certificate?

58− ° Ö.

# <u>Generalizability</u>

- Are the Essential Competencies achievable regardless of students' sex, socioeconomic status, race, rural and urban settings, and religious beliefs?
- Will all students for whom a particular Essential Competency is applicable be exposed to sufficient instruction to achieve the Essential Competency?
- Do the Essential Competencies avoid implying endorsement of curriculum approaches which are not common to all schools?
- 4. Are the Essential Competencies appropriate for those students who transfer within the state, from the mainland or to the mainland?

# <u>Feasibility</u>

- 1. Are the outcomes specified by the Essential Competencies quantifiable through some acceptable operational measures?
- Can the Essential Competencies be measured within the schools time constraints and resources?
- 3. Can adequate educational resources, e.g., time, staff, money, books and materials, be made available to support the implementation of the Essential Competencies now or in the near future?
- 4. Are the Essential Competencies free of specifications.which would require special equipment or facilities which are not available to most students?

# Specificity

- Are the Essential Competencies worded specifically enough so that it is clear what skills are and are not included in the Essential Competencies?
- Are the Essential Competencies prescriptive so as to specify student inadequacies?

Appendix G. Public Validation of Essential Competencies

- 1. Summary of Survey Returns by Population Categories

#### Appendix G.2

Minimum Competencies for High School Graduation

Directions: Please rate the competencies in one of the three categories defined below:

- ESSENTIAL Means\_that this skill, knowledge or attitude is important\_and necessary. The student should not be allowed to graduate from high school without this competency.
- 2. <u>DESIRABLE</u> Means that this skill, knowledge or attitude is important, but the student should be allowed to graduate even without this competency.
- 3. UNSURE Means that you are not sure whether this skill, knowledge or attitude is essential or desirable.

At the end of this survey, space is available for you to comment or add to the list. Should you make, any addition, please indicate whether it is essential or desirable.

CHECK ONLY ONE ESSENTIAL DESIRABLE UNSURE Read and use printed materials from daily life. These are newspapers, telephone books, road maps, charts and graphs commonly used in public media, and household product instructions. product instructions. Distinguish fact from opinion in TV and radio news broadcasts, advertising, newspaper and magazine articles, and " public speeches. 3. Eite examples of ways individual learning will be continued beyond high school graduation. Identify symptoms of common illnesses. These common illnesses are colds, measles, chicken pox, mumps, and venereal diseases. 5. Cite contributions that can be made to society by individuals in different occupations. Recognize that family, culture, community, school, and church all contribute toward each individual's beliefs and values.

TAC 77-4194-A

,		CHECK ONLY ONE
		ESSENTIAL DESTRABLE UNSURE
7.	Recognize that a given piece of art can affect people differently.	
8.	Recognize that art forms (visual arts, music, drama, dance, literature) communicate ideas and feelings.	
9.	Demonstrate knowledge of important citizen rights and responsibilities. This includes the rights guaranteed by the Constitution and knowledge of traffic laws and major criminal offenses.	
10.	Identify the training, skill and background requirements of at least one occupation in which the student is interested.	
11.	Identify physical activities which may be valuable throughout life.	
12.	Use resources for independent learning. These resources are the library, informed persons, and public and private agencies.	
13.	Select, from sets of possible alternatives, the best solutions to simple commonly encountered adult problems.	
14.	Recognize that an individual's strengths can be used to compensate for the individual's weaknesses.	
15.	Interpret common visual symbols. These include traffic signs and road markings, directions to public facilities, and caution and warning labels and signs.	
16.	Complete commonly used forms. These are personal checks, job applications, charge account applications and other similar forms.	
17.	Recognize that every person is a unique indi- vidual with strengths and weaknesses.	
	Identify the harmful effects of smoking, drinking, drug abuse, overeating, insufficient sleep, and poor personal hygiene.

CREDITS

POLICÝ

The Department of Education's philosophy is that credit should basically be an expression of progress and learning rather than merely time spent. All approved courses in grades 9-12 shall have credit designations. Credits may be granted other courses and programs as designated by Department regulations.

Credit by Examination may be awarded in accordance with the regulations established by the Department.

J. Ben

#### CREDITS

#### REGULATIONS

- 1. [All structured courses in grades 9-12 shall have credit designations. The normal practice is to award] One credit is awarded [for] each course meeting formally for approximately 200 minutes per week, and successfully completed by the student during the period of one year. However, satisfactory completion of the content of a course in a period of time either shorter or longer than that normally required may be permitted. [This is in keeping with the philosophy that credit should basically be an expression of progress and learning rather than merely time spent.]
- [2. Where appropriate measures are available, credit by examination shall be permitted.]
- [3] 2. Schools providing for planned programs of independent [learning] study may grant credit for satisfactory performance on administered proficiency examinations or for successful completion of the planned program of study. (Independent study is being defined as a situation in which the student works on his or her own and/or with a small group on a self-directed pursuit with teachers serving as resources. This method may be used for a portion of a course or for the complete course.)
  - 3. The principal shall be responsible for evaluating individual students' claim to credits by determining equivalency to authorized courses and for granting credits as appropriate. This includes evaluation of credits earned from out-of-state schools, community colleges, and university experiences.
  - [4. Programmed instruction may be utilized as a mode of learning for which appropriate credit may be granted.]
  - 4. Credit may be granted for successful completion of special experimental programs or courses which have been approved by the District Superintendent.
  - [5. Credit claims for instruction received through tutoring and/or correspondence shall be judged against Department policy.
  - 6. Credit may be granted for successful completion of special experimental programs which have been approved.]

- [7] 5. Schools desiring to utilize one or more [of the] alternative procedures to the formalized course program shall [secure prior approval by submitting a plan of implementation to] submit an implementation plan to the District Superintendent for approval. [His recommendation] Approval shall be [submitted to] granted in consultation with the Office of Instructional Services for [review. Proposals should be] well conceived and carefully planned proposals [in order] that [they] have built-in safeguards for the integrity of the academic program.
- [8] <u>6</u>. Credit awarded by any public school or licensed private school in Hawaii shall be accepted at full value by all public schools.
  - [9. The principal shall assume responsibility for evaluating credits earned from out-of-state schools.
  - 10. Credits may be granted for approved work-study, community college, and university experiences.]

#### Appendix H.3

4530.2

#### CREDIT BY EXAMINATION

#### REGULATIONS

- 1. Credit by Examination, a formal process for ascertaining student competencies and awarding credit for a course without a student having to enroll in the course, shall be permitted where appropriate measures are available.
- 2. Appropriate measures are paper and pencil tests, oral examinations, skill demonstrations or a combination of these. The examination must be consistent with course/program content and objectives as described in the Authorized Course and Code Numbers (ACCN).
- 3. Examinations will be offered at the same time once annually throughout the State to students in grades 9-12, as well as the 8th graders in the semester prior to entering 9th grade.
- 4. Students failing an examination shall be permitted to repeat the examination for the same course in ensuing years.
- 5. Students passing a course by Credit by Examination shall be granted Credit but no letter grade for the course based upon their examination scores.
- 6. Students may take as many examinations as the testing schedule will permit.
- 7. Credit by Examination will be administered free of charge.
- 8. Procedures for Credit by Examination are:
  - a. The school shall annually notify students and parents in writing that students have the opportunity to take Credit by Examination.
  - b. A list of courses for which Credit by Examination may be taken shall be made available to all students.
  - c. Written parental consent shall be required on student's application form CbE-1.
  - d. Students shall be notified by the school of the time and place for the examinations.

#### GRADUATION AND RELATED

POLICY

Requirements for Graduation. The Department of Education shall set the requirements for graduation from high school. In order to be eligible for graduation, each student is to complete all specified requirements. These requirements are deemed to be basic for all graduates, but opportunities are planned and provided for student development beyond the basic requirements.

Baccalaureate Exercises. See Rule 34.

[Graduating] Commencement Exercises. [Graduation] Commencement exercises may [not] be [held] scheduled [prior to] any time after the last day of school [, except with the written approval of the District Superintendent.] for seniors. The last day of school for seniors will be set by the Department.

#### GRADUATION AND RELATED

#### REGULATIONS

#### 1. Graduation from High School:

- [a. Graduation from high school for students enrolled in the regular program shall require a total of 18 credits, earned in grades 9-12.
- b. Graduation requirements for students enrolled in Special Education may be modified to serve the best interests of the students.]
- a. The minimum requirements for high school graduation, grades 9-12, are
  - 1) Twenty (20) credits comprised of the following courses:
    - a) Required--13 credits

<u>English</u>	4	credits
Social Studies	4	credits
<u>Mathematics</u>	2	credits
Science	1	credit
-Physical Education	1	credit
<u>Health</u>	15	credit
Guidance	1/2	credit

- b) Elective (any course) -- 7 credits
- 2) Demonstrated mastery of essential competencies
  - a) Competencies are the basic standards of proficiency required of students who have completed the course and credit requirements.

- b) Mastery shall be determined in accordance with established Department procedures.
- [c.] b. Negotiated programs for alienated students or other students with unique problems or needs may be structured with the approval of the principal and the district superintendent. Such programs [may include credit for part time work experience] shall be designed to be equal or comparable to the requirements of the authorized courses.
- [d. The minimum graduation requirements for students in the regular program shall include the following requirements:
  - (1) COMMUNICATIONS

English													
	٠.	• "	•	. •	٠	•	ě	٠	•	٠	•	4	credits
Mathemati	CS						•,	•	•	• ,		. 1	credit

(2) ENVIRONMENTAL STUDIES

	a 11					,
Science			 		1	credit
Physical	Education	1	 		1	credit
Health						credit.
Guidance				•	_	credit

(3) HUMANITIES

Social Studies . . . . . 4 credits

(4) ELECTIVES (any area) . . . . . 6 credits]

- [e.] c. Schools shall offer a variety of courses in both required and elective areas in order that students [may meet personal goals and satisfy personal interests] can meet the graduation requirements.
  - d. Students transferred from out-of-state shall meet the graduation requirements, or shall show evidence of equivalency in meeting the requirements.
  - [f. Students shall be advised as to special requirements for college entrance, future vocational training, or vocational placement.
  - g. A student who transfers from out-of-state shall not be penalized in meeting Hawaii's requirements for graduation.]

#### 2. [Forwarding Records of Graduates:

a. Transcripts of student records should be forwarded to other educational institutions, the military, and employers upon request of the student.]

#### Requirements for Individually Prescribed Program:

The requirements for the individually prescribed program, grades 9-12, shall be individually determined for specific handicapped students at meetings with parent(s), teacher, representative of the Department, and when appropriate for the student. Completion of this program does not constitute graduation.

#### .\ [Retention of Permanent Records of Graduates

a. All records of high school graduates are to be kept either by the high school or by the district office.]

#### Participation in Commencement Exercises:

a. Seniors who meet the requirements for a diploma or a certificate may participate in commencement exercises.

Participation in commencement exercises in itself does not constitute graduation from high school.

Principals may give special consideration to other students should circumstances so warrant.

b. Students completing requirements for a diploma or a certificate, but who choose not to participate in commencement exercises, shall be granted the certificate or diploma on the first regular school day following commencement exercises.

#### 4. .. [Withholding Certificates:

a. A certificate may be withheld by a principal until a high school student has met all of his financial obligations to the school.

#### Awarding of High School Diplomas:

The high school diploma shall be issued to students who have met all graduation requirements.

- 5. [Participation in Graduation Exercises:
  - a. All students who have fully met credit requirements will be permitted to participate in graduation exercises. Principals may give special consideration for such participation to other students should circumstances so warrant.
  - b. A student who has completed requirements for graduation, but who chooses not to participate in graduation exercises, shall be granted his certificate on the first regular school day following graduation exercises.

#### Awarding of Certificates:

A certificate of completion of an individually prescribed program shall be issued to specifically identified handicapped students who complete all the requirements set by the program. This certificate shall not constitute graduation from high school.

6. Withholding Diplomas:

A diploma may be withheld by a principal until a high school student has cleared all required financial obligations to the school.

[6] 7. Notification of Parents-When the Student Does Not Meet Graduation Requirements:

Parents are to be notified as early as possible if their child is not going to graduate. Such notification should be in writing and delivery should be by such means as to assure receipt by the parents.

#### REPORT ON ALTERNATIVES FOR MEETING CREDIT AND COURSE REQUIREMENTS

#### FOR GRADUATION

THE PLAN

#### I. STATEMENT OF THE PROBLEM

Although it is anticipated that the great majority of the students will be able to meet all credit, course and essential competency requirements for graduation through the regular instructional program, there will be a limited number of students, for numerous reasons, who will need special assistance in order to meet these requirements. While these students have special needs, many possess average or above average abilities and potentials.

For these students alternatives or arrangements not normally available must be provided. Inasmuch as individual differences exist in abilities, modes of learning and needs, these alternatives must of necessity be diverse and appropriate and result in effective learning experiences. A departmental plan is needed to guide the development, implementation and evaluation of alternatives for neeting credit and course requirements for graduation.

#### II. GOAL -

To provide help for students who are experiencing difficulty in meeting graduation requirements.

#### III. OBJECTIVE

To develop a plan to provide alternatives for helping students meet credit and course requirements for graduation.

#### IV. DEFINITION/CRITERIA AND ASSUMPTIONS OF ALTERNATIVES

#### A. DEFINITION/CRITERIA

Alternatives to help students meet course and credit requirements for graduation are educational arrangements established for students whose needs cannot be met by the regular arrangements available to all students.

Alternatives must meet all of the following criteria:

Are not regularly used by all or most students.

- Accommodate special needs of students which cannot be met by the options available to all students.
- 3. Encompass valid\* means for acquiring one or more of the following:
  - ·course requirements
  - ·credits «
- Differing from the regular school setup in one or more of the following:
  - · time
  - ·setting
  - approaches
  - ·instructional emphasis
  - ·administrative jurisdiction (

#### B. ASSUMPTIONS

- 1. The alternatives will support the Foundation Program objectives.
- 2. The alternatives will meet the established graduation requirements of course and credit for grades 9 through 12.
- The alternatives will serve all students with special needs for meeting graduation requirements.
- 4. The alternatives serve the special needs of selected students which are treatable and can be evaluated.
- 5. The planning, implementing and evaluation of alternatives will involve school, district and state personnel, parents and community.

#### V ENT ALTERNATIVES

requirements for graduation include seven (7) different types (See appendix for details). All of the seven alternatives and options within these alternatives meet criteria 1 to 3 in Section IV A of this document. They also meet one or more of of the characteristics of Criterion 4 of the same section; these differentiating factors are indicated on the table following: "Differentiating Factors of Current Alternatives".

\* Embodies the elements of sound developmental and intervention strategies

#### DIFFERENTIATING FACTORS OF CURRENT ALTERNATIVES

\ 					

NOTE: X indicates the differentiating factor(s) from the regular school program.

- VI. TASKS FOR USE OF CURRENT ALTERNATIVES AND OPTIONS AND DEVELOPMENT OF NEW ALTERNATIVES AND OPTIONS
  - A. TASKS FOR MAKING MAXIMUM USE OF CURRENT ALTERNATIVES AND OPTIONS

#### School Level

- a. Translate graduation requirements of credits, courses and essential competencies to school program offerings for students with special needs.
- Review school structure for assisting in data development.
- Review data and suggested strategies; indicate possible actions.
- d. Suggest specific framework for articulation and cooperation between regular and alternative services.
- e. Review school level implementation of guidelines and suggest changes needed.
- f. Promote and recommend strategies for improvement and expansion of services to target students.
- g. Take other actions appropriate for maximum use of current alternatives.
- h. Prepare and submit budget request as needed for use of current alternatives and options.

#### 2. District Level

- Review graduation requirements and school capabilities to meet same.
- b. Review the district structure for assisting in data development.
- c. Review data or analysis of data for district implications and suggest some strategies to meet needs.

#### B. TASKS FOR DEVELOPING NEW ALTERNATIVES AND OPTIONS

#### 1. School Level

- Identify need for new alternatives and/or options.
- b. Further analyze current alternatives and their options to see if needs can be met.
- c. If needs cannot be met through current alnatives and/or options, make request to state via district for new alternatives.
- d. Try out and evaluate new alternatives and/or options.
- e. Prepare and submit budget request for developing and implementing new alternatives and options.

#### 2. District Level

- a. Review and analyze district use of current alternatives and options.
- b. Analyze and identify need for new alternatives.
- Request state level to research and develop new alternatives.
- Assist and coordinate development of new alternatives.
- Assist and coordinate implementation and evaluation of new alternatives and/or options.
- f. Prepare and submit budget request as needed for developing and implementing new alternatives and options.

#### 3. State Level

- Review and analyze statewide use of current alternatives and options
- b. Identify need for new alternatives and options.

- d. Suggest specific strategies to encourage articulation and cooperation at the district and school levels.
- e. Review guidelines for implementation and suggest changes as needed.
- f. Promote and suggest strategies for the improvement and expansion of services to target schools.
- g. Take other actions appropriate for maximum use of current alternatives.
- h. Prepare and submit budget request as needed for use of current alternatives and options.

#### 3. State Level

- a. Review graduation requirements and their implications for student and institutional development.
- b. Suggest strategies for the coordination/development of meaningful data (including evaluation) on special student needs and on the alternatives/ options which attempt to meet those needs.
- c. Review the data or the analysis of the data and comment on statewide implications.
- d. Devise strategies for systematic articulation between regular education and alternatives/ option staffs.
- e. Promote refinement of guidelines, particularly on student selection, student services and staff development. (Object: to promote efficiency of services.)
- f. Promote improvement and expansion of services to target students.
- g. Take other actions appropriate for maximum use of current alternatives.
- h. Prepare and submit budget request as needed for use of current alternatives and options.

- Research and develop new alternatives based on needs assessment.
- d. Test and validate new alternatives and options.
- e. Develop guidelines for implementation and evaluation of alternatives and/or options.
- f. Implement and evaluate effectiveness of new alternatives and options.
- g. Prepare and submit budget request as needed for developing and implementing new alternatives and options.

#### VII. ORGANIZATION/PROCEDURES FOR CARRYING OUT TASKS

The formation of standing committees in the Foundation Program Assessment and Improvement System (FPAIS) at the state, district and school level is recommended to carry out the tasks for use of current alternatives and options, and for the development of new alternatives as needed. The suggested compositions are as follows:

Committee Level	Suggested Composition
STATE (Advising the Assist- and Superintendent of the Office of Instruc- tional Services	3 Reg. Ed. Specialists 3 Sp. Needs Specialists 1 Curr. Dev. Specialist   (from CSS Branch) 3 District Specialists 3 School Admin. 1 Rep./OS 1 Rep./OBS 1 Rep./OPS 2 Community Reps.   or Existing Committee
	Post Control of the C
DISTRICT (Advising the District Super- intendent)	2 Sec. Principals 2 Elem. Principals 2 Dist. Specialists (1 responsible for reg. programs, 1 for special needs programs) 2 Sec. Teachers 2 Elem. Teachers 2 Comm. Representatives or Existing Committee

Committee Level	Suggested Composition
HIGH SCHOOL (Advising the Principal)	6-8 Teachers (two per grade level) 2 Administrators 1-4 Counselors

#### VIII. EVALUATION OF PLAN

The plan should be evaluated in answer to the following questions:

#### A. Formative Evaluation

- 1. To what extent are current alternatives and options helping students meet credit and course requirements for graduation?
- 2. If current alternatives are not meeting the needs of students, how successful are the State, District and School level standing committees in generating and implementing additional alternatives?

#### B. Summative Evaluation

- 1. Is there a decrease in the percent of students needing special help in meeting graduation requirements?
- 2. Is there a decrease in the percent of students not able to meet the requirements for graduation?

# ALTERNATIVES FOR MEETING COURSE & CREDIT REQUIREMENTS FOR GRADUATION

- 1. Tutorial Program
- 2. Alternative Setting Program
- 3. Negotiated Program
- 4. Work Experience Program
- 5. Summer School Program
- 6. Adult Education Program
- 7. Credits from Other Institutions

#### ATIVE 1. TUTORIAL PROGRAM

scription: This program offers an alternative method of delivering the educational program, using tutors, generally on an hourly basis, to provide one-to-one or small group instruction to students with special educational problems.

The following are currently existing options in the tutorial program:

- a. Home-Hospital Instruction Services which enable the continuation of a health impaired student's educational program in a home or hospital setting while he/she is unable to attend school. The impairment and the approximate length of a student's disability (not less than 2 weeks) must be determined by a physician. Instructions include regular high school academic subjects only, i.e., language arts, math, science, etc. (See DOE Home-Hospital Instruction Guide TAC 73-6194, also Regulation 2150.2.2.5).
- b. Private Tutorial Instruction which, if approved by the Superintendent, enables students in special cases to receive instruction in a setting other than the public school. Cost of private tutorial services for credit must be borne by the individual. (See Regulation 4530.5).
- Special Tutorial Services which enable schools to provide services to student who require special individual tutorial assistance generally in the school setting. Existing options include but are not limited to:
  - 1) Assistance to non-native speakers of English (See Compensatory Education Conspectus)
    - a) TESOL (Teaching English to Speakers of Other Languages)
    - b) Indochinese Refugee
    - c) Blementary and Secondary Education. Act, 1965, Title VII (Bilingual)
    - d) Emergency School Aid Act, 1972, Title VII (Bilingual)

# 

#### ALTERNATIVE 1. TUTORIAL PROGRAM (Page 2)

- 2) Assistance to educationally disadvantaged students (See Compensatory Education Conspectus)
  - a) Elementary and Secondary Education Act, 1965, Title I
  - b) Emergency School Aid Act, 1972, Title VII
- 3) Assistance to alienated students (See Comprehensive Alienation Program)

(Note: See attachment for instructions and requirements)

1. Description: This alternative provides comprehensive education services to the severely alienated students in settings outside of the regular school. Regular and special courses and support services, such as counseling and tutorial services, are provided to meet the needs of the target students.

> Built-in safeguards for the integrity of the academic program are obligatory. However, special attention is focused on flexibility, relevance and application in curriculum content, learning styles and instructional strategies.

Extension of this alternative to serve other target individuals experiencing severe and multiple adjustment/learning problems requires exploration. Potential targets are the handicapped, the non-native speaker of English, or the severely educationally disadvantaged.

#### ALTERNATIVE 3. NEGOTIATED PROGRAMS

l. Description: This alternative, offered within the school setting, is designed to meet the needs of students who exhibit marked problems of adjustment with conventional curricula.

Negotiable are modifications in strategy, scheduling and event content, if built-in safeguards for the integrity of the academic program is incorporated.

Common options existing under this alternative include:

- a. Individualized Modified Curriculum which permits curriculum modification for individuals who are in need of special educational assistance generally in single subject areas.
- b. Modified Curriculum Class which provides for curriculum modification and other alternatives to assist alienated students inmultiple subject areas, usually staffed by a teacher and an aide and supported by part-time outreach counselor services.
- c. School-Within-a-School which provides multiple alternatives in multiple subject areas for students who are in need of special educational assistance involving a special team of teachers and support personnel.

#### ALTERNATIVE 3. NEGOTIATED PROGRAMS (Page 2)

## 2. Procedures/Responsibilities for Student Participation in this Alternative:

### ERNATIVE 4. WORK EXPERIENCE

Description: This alternative is an in-school or out-school alternative which provides students opportunities to apply acquired skills to conduct firsthand exploration of community services.

The arranged work experiences may be with or without credit, with or without pay, or both.

Examples of existing work experience program options are:

- a. <u>Cooperative Vocational Educational Program</u> which is a cooperative option between the school and private and public agencies for vocational education students who earn both credit and pay.
- b. Vocational-Technical Work-Study Program which provides part-time employment to students who are in need of earnings to continue their vocational education program.
- c. Comprehensive School Alfenation Program (CSAP) which provides in-school or out-school work experience stations for economically disadvantaged and allenated students who earn pay or credit or both.

Procedures/Responsibilities for Student Participation in this Alternative:

Initiation	Facilitation	Approval
STUDENTS/PARENTS/ TEACHERS/COUNSELORS Submits application	PRINCIPAL'S DESIGNEE  Reviews application & considers students' needs and/or credits  Records credit, if any  Facilitates & coordinates implementation of work-study component	PRINCIPAL  Reviews application  Approves/disapproves  Provides appropriate instructions for followup to designee
120	Submits application to principal with recommendations  Ensure appropriate followup services

COMMENTS:

1. Description: This alternative provides school courses in the summer, with or without credit, ranging from remediation to acceleration courses.

The following are existing options in summer school programs:

- a. Remedial Courses to gain the skills required for success at the next level. Credit shall be granted to high school students upon completion of courses.
- b. Enrichment Courses to meet their special interest and needs. Priority is given to academic offerings.
- c. Review Courses to review subject areas. No additional credit is granted for previously received passing of repeat courses; however, the summer school grade is recorded as part of student's permanent record.
- d. Preparatory Courses to satisfy prerequisites or acquire background in subject areas.
- e. Acceleration Courses to meet curriculum requirements which may be applied toward graduation requirements.
- 2. Procedures/Responsibilities for Student Participation in this Alternative

Initiation	Facilitation	Approval
STUDENT/PARENT	SUMMER SCHOOL DIRECTOR'S DESIGNEE	SUMMER SCHOOL DIRECTOR
Submits completed registration form to specific summer school  After completion of course, submit verification of completion to home school principal	Verifies course and credit in different options  Verifies and records grade and credits	Determines whether summer school classes will be conducted and determines enrollment size and other requisites as required for special funded summer classes

ERIC

Initiation	Facilitation	Approval
Students pay tultion costs in regular summer school program	Notifies schools of successful comple- tion and credit as required	DISTRICT CURRICULUM SPECIALIST FOR SPECIAL EDUCATION
Students pay tuition costs or, if eligible, receive tuition waiver for special education summer school program		Is responsible for district funding requests for Special Education only. (State appropriated funds are made available
		to defray part of the cost of operations.)

# APPLICATION FORM FOR SPECIAL EDUCATION SUMMER PROGRAM and SPECIAL EDUCATION SUMMER PROGRAM TUITION WAIVER

	SchoolDate
	To: Parent or Guardian:
	Special education summer School classes will again be held at designated schools this summer. The half-day summer program will begin on June 16, 1977 and end on July 28, 1977.
•	There will be a single tuition rate of \$48 for all summer school students. Funds provided for summer programs will assist in subsidizing the additional cost of operating special education summer classes beyond the studentuition.
ı	If you wish to enroll your child for the 1977 special education summer program, please complete Par I of this form and sign your name in Part III.
•	If you wish to register your child but may have financial difficulty with the tuition fee and can qualify for a waiver of payment, please fill in Parts I, II, and III.
	In order for your child to be assured of enrollment in the summer education summer program, please complete this form and return it to the school office by May 27, 1977.
	Unless otherwise notified, by returning this form by May 27, 1977, your child is accepted in the program. Additional information on the summer school location, the date of tuition payment, and other instructions regarding the special education summer program will be sent to you by June 9, 1977. If you should change your plans on summer school attendance, please inform the school office as soon as possible.
,	Part I. APPLICATION FOR SPECIAL EDUCATION SUMMER PROGRAM
	Please enroll my child for the 1977 program. Handicapping Condition: (To be completed by student' teacher)
	Name of Student Last First MI (EMR, SLD, Deaf, etc.)
	•
	Street Address Town/Subdivision receiving transportation:
	Yes No
	Home Phone Emergency Phone
	Part II. APPLICATION FOR TUITION WAIVER-CONFIDENTIAL (Complete this part ONLY if required and qualified)
	Please waive my special education summer program tuition. I qualify under the following condition. (CHECK ONE)
	My child received free lunch or milk during the 1976 school year by reason of income or hardship criteria.

1. Description: This alternative provides high school students opportunities to earn credits applicable toward graduation through evening classes conducted by Community Schools for Adults (Adult Education).

Although adult education schools are primarily intended to serve people 18 years and over, the existing statutes allow high school students to earn credits from adult schools under certain extentuating circumstances.

Options for credit include courses conducted:

- a. To develop basic skills and knowledge
- b. To make up deficiencies
- c. To enrich or develop advanced skills

These courses may be conducted as regular classroom or independent study type courses. Examples of courses include but are not limited to:

### Option "a"

- (1) English (Composition, Literature, Reading, etc.)
- (2) Social Studies (Civics, History, etc.)
- (3) Math (General Math, Algebra I, II, III & IV, Geometry, Trignometry)
  - (4) Science (General Science, Chemistry, Biology, Health and Hygiene)

### Option "b"

- (1) High School Math and English Review
- (2) English Grammar

### IVE 6. ADULT EDUCATION PROGRAM (Page 2)

(3) Basic English.

>various levels

(4) Basic Math

### Option "c"

- (1) Business subjects (Typing, Shorthand, Accounting, Clerical and Civil Service, Business Law)
- (2) Speed Reading
- (3) Languages
- (4) Industrial and fine arts

Procedures/Responsibilities for Student Participation in this Alternative:

e forms may be duplicated and uselor other similar forms developed.

Initiation	Facilitation	Approval
CONTRIBUTION  Contacts counselor  Completes and submits standard  Corms for review and approval  See Attachment 6A)*  Provides adult school with high  chool transcript (See Attach—  lent 6B)*	PRINCIPAL'S DESIGNEE  Reviews application  Recommends approval and/or disapproval  For approval, secures parental approval and processes application	PRINCIPAL  Reviews and takes appropriate action (approve/disapprove and process application)  Confers with adult school administrator for approval and arrangements  Provides appropriate instructions
	For disapproval, responds and advises originator of other solutions	to designee

Dear Sir:

This is to inform you that \_\_\_\_\_\_\_\_has successfully completed all the requirements for a high school certificate as specified by the Adult Education Section of the Department of Education, State of Hawaii.

He or she will be issued a High School Certificate as soon as his or her papers are processed.

Very truly yours,

1. Description: This alternative provides the option for students to enroll in another high school, a community college, university, or any other accredited institution and obtain high school credits for meeting graduation requirements.

Common options existing under this alternative include:

### a. Early Admissions Program

Students, while still in high school, may be permitted to enroll at a college or university and be granted both high school as well as college credits.

#### b. Advanced Placement Program

Advanced Placement (AP) courses are college level courses taught by high school teachers on the high school campuses. Students who take such courses take standardized examinations and earn college credits and high school credits.

c. Other Programs (Including Correspondence Schools)

All high school credits earned from courses in licensed public or private high school will be accepted for graduation requirements.

2. Procedures/Responsibilities for Student Participation in this Alternative

Initiation	Facilitation	Approval
STUDENT/PARENT  Enrolls and completes course in other institution  Fills out appropriate forms	PRINCIPAL'S DESIGNEE  Reviews the notice of successful completion and assesses course content and equivale recommends credit/no credi	PRINCIPAL  Reviews individual  notification  Approves/disapproves
to notify own school of successful completion	Monday Ozdazy, 10 dzidaz	Returns notification to designee

# STATE OF HAWAII

----

OFFICE OF THE SUPERINTENGENT

March 23, 1973

END TO: District Superintendents and High School Principals

FROM: Charles G. Clark, Superintendent
Department of Education

SUBJECT: Credit by Examination

A review of Credit by Examination had been conducted in 1975 and avain, more recently, in conjunction with the Department's major efforts in assessing and examining the various issues related to graduation requirements. The work of the subcommittee on Credit by Examination relates to the tasks addressed by the Committee on Alternatives for Meeting Graduation Requirements. The Committee on Credit by Examination has been charged with 1) examining the issues, 2) resolving any resultant concerns, and 3) expanding and operationalizing Credit by Examination.

Based on some informal feedback received from students, principals and teachers, the Committee has drafted a proposed policy statement, a more detailed set of regulations in place of the one statement regulation currently in existence, and a set of operational guidelines for the administration of Credit by Examination. The intent of the proposed policy statement, revised regulations, and set of operational guidelines was to provide greater clarification, details, and guidance to implementers heretofore lacking.

Your assistance is requested in soliciting input to these documents from your high school principals, teachers and students and district personnel. Their reactions and suggestions are vital and will be greatly appreciated.

In a box being mailed to the district office, there will be envelopes for each of your high schools with 50 copies of each deciment including the Response Forms. Input can be done individually or by groups.

Because the report of the results of the Tesponse Forms is scheduled for presentation to the Cruduation Requirements Task Force on April 23, 1978, we would appreciate the return of these Response Forms by or before April 23, 1978.

District Superintendents Page 2 March 23, 1978 Please have these Response Forms returned to Mr. Moboru Higa at the following address: Mr. Noboru Higa Office of Instructional Services 1270 Queen Emma St/reet Room 1006 Honolulu, Hawaii /96813 Should you have any questions, please call Mr. Higa at 548/5758. # Appendix J.4.

# OPERATIONAL GUIDELINES FOR THE ADMINISTRATION OF CREDIT BY EXAMINATION

### A. General

1. Eligibility

Credit by Examination shall be available to all students in grades 9-12, as well as 3th graders in the semester prior to entering 9th grade.

2. Courses

Courses for which Credit by Examination is possible are those where appropriate measures are available.

- 3. Testing Fee: None
- 4. Testing Schedule

Paper and pencil examinations shall be scheduled once a year at designated locations. For courses requiring skill demonstrations and oral examinations, arrangements may require negotiating with districts for dates to have specialists scheduled to do the testing.

3. Responsibilities

The administration of credit by examination shall be the cooperative effort of the state/district/school levels.

- 1. State Level\*
  - a. Determines, with district and school input, courses for which credit may be awarded through examination. These courses must be listed in the Authorized Courses and Code Numbers (ACCN) and shall be reviewed annually, and the districts and schools so notified.

    A list of courses offered for credit by examination shall be distributed through proper channels to the schools.

- b. Determines appropriate measures for identified courses. These measures may be either commercially prepared ests, tests developed by other state Departments of Education adapted for local use or locally prepared tests. Guidelines for test administration and scoring shall accompany each examination.
- c. Prepares, publishes, or procures and distributes appropriate examinations and Credit by Examination Application Form (CbyE-1) for student and school use.
- d. Establishes standards for credit/no credit. The passing score required to obtain credit shall be clearly identified for each course's examination. This score shall be a statewide standard.
- e. Monitors administration and implementation of testing procedures.

  The operations of credit by examination will be reviewed at least once a year to ensure compliance with the terms of (the policy and) these regulations.
- f. Prepares and administers budget for Credit by Examination.
- g. Gathers data, and prepares an annual report.
- h. Provides districts with standard directions for administering and scoring the tests.
- Establishes guidelines for the selection and responsibilities of test administrators and proctors.
- j. Establishes guidelines for security measures and procedures.

### District Level

- a. Keeps schools informed of: course listing, plans, and schedules for credit by exam.
- Supervises, coordinates and directs the administration of examinations.

- examination as determined by the number of student requests received at the school level. This information will be submitted to the State 65 calendar days prior to the administration of the examination.
- (2) Selects testing centers. These centers shall be created according to number or students to be tested and shall be conveniently located to accommodate all students registered.
- (3) Establishes application, interview and selection procedures and selects test administrators and proctors. The employment and payroll forms shall be processed as required.
- (4) Plans and supervises the scoring of the tests. The test results will be transmitted to the State Student Information Services Branch.
- c. Takes precautions necessary to maintain adequate security measures.
  - (1) Arranges for safe storage of tests until the day of the test.
  - (2) Requires examinees to present an official pass to the proctor for admission and proper identification.
  - (3) Exercises care in distributing the examination.
  - (4) Sees that the examinations with the completed answer sheets are collected from the examinee before he/she leaves the examination room.
- A. Compiles district data and submits appropriate report(s) to State.
- 3. School Level
  - a. Notifies all students and parents in writing about courses that are available for Credit by Examination. The means by which this is accomplished will be determined by the schools.

- b. Registers students who apply for Credit by Examination, using State Form CbyE-1 (Request for Credit by Examination) and ensures that each student is provided with a copy of the form to be used for identification purpose at the time of the test. Parental/ guardian consent on this form is required.
- c. Provides pre- and post-test counseling services to enable students to make realistic decisions in requesting Credit by Examination.

  An explanation of the grading system of C/NC (Credit/No Credit) will be given the student.
- d. Informs students of the time, place, date of credit by examination and where necessary, about particular examinations which require tools, equipment or special materials.
- e. Submits to the District Superintendent or designee the list of students requesting to take each examination.
- Notifies students upon receipt of the examination results.
- g. Establishes and maintains appropriate student records.
  - (1) Uses C or NC (Credit or No Credit) as the standard marking symbols.
  - (2) Records number of credit(s) and the title of the course(s) taken through Credit by Examination in student's form 14. Course credits obtained through credit by examination should be so noted on student record forms.
- i. Gathers data and submits appropriate report(s) to District.

# 4. Student

Submits completed credit by examination application form by a specified deadline to the principal or personnel designated by the principal.

- b. Reports to testing center as instructed.
- c. Presents appropriate I.D. at the testing center.
- d. Returns all test booklets, answer sheets, and scratch paper to the examiner before leaving the test center.

The Evaluation of the Revised Graduation Requirements, 1978-1985

# Appendix K

# The Evaluation of the Revised Graduation Requirements, 1978-1985

### I. Introduction

The completion of courses and credit requirements has to date been an important determinant for high school graduation. However, there has been a growing general dissatisfaction with using courses and credit requirements as the primary basis for graduation. In response to this concern, the Department is considering some changes to graduation requirements so that the high school diploma or certificate of graduation will reflect not only an accumulation of courses and credits but also achievement of some basic skills, knowledge and attitudes.

The Foundation Program Objectives were used as the basis for developing more specific performance expectations and essential competencies.

Performance expectations provide "benchmarks" of competencies to be achieved by students at specified grade level intervals. These expectations specify demonstrable behaviors which require the application of knowledge, skills or attitude.

Essential competencies are learnings that students must have in order to function and cope with life as effective and contributing members of society. These competencies were validated as essential for graduation by the public.

For students whose needs are not fully mat in the regular education program, alternative ways for meeting graduation requirements are being identified.

Alternatives to the present practice of issuing one kind of graduation certificate are being explored.

-154.

## II. Evaluation

# Evaluation for Decision-Making

Decisions to be made as the result of the evaluation should be identified at the outset so that relevant data can be collected. Decision alternatives identified are:

- 1. Should the revised graduation requirements be continued to be implemented as they were adopted in 1973?
- Should those revised graduation requirements be modified in any way?

# The Evaluation Plan

This evaluation is delimited to grades 9-12 and to the achievement of essential competencies by students in meeting graduation requirements as student outcome data. The scope of this evaluation includes the examination of the implementation of revised graduation requirements over a period of time. Such requirements include the trend of student achievement of essential competencies and successful completion of courses and credits. In addition, emphasis is placed on the availability and use of alternatives at the school level and the one-going need for program improvement.

Two kinds of evaluation will be conducted; these are formative evaluation and summarive evaluation.

The more comprehensive evaluation of student achievement of competencies at specified grades beginning with elementary grades is within the larger scope of the evaluation of the implementation of the Foundation Program which will be undertaken at a later date.

Formative evaluation involves the collection of appropriate evidence during the construction and implementation of procedures in such a way that revisions can be based on this evidence. It focuses on modifications of procedures for more effective implementation. The purpose of formative evaluation is to determine what procedures need to be improved to facilitate implementation of graduation requirements. Specifically, the purposes are:

- a. To determine whether project strategies used in the development of changes in graduation requirements were implemented as a designed and modified as needed.
- 5. To determine whether plans for implementing changes in graduation requirements were implemented as designed and modified as needed. These plans are associated with implementation of graduation requirements at the school level.

Summative evaluation is conducted at a point when the program has stabilized. It focuses on outcomes or results such as student achievement. It provides data leading to decisions about the effectiveness of the revised graduation requirements.

The purpose of summarive evaluation is to determine whether students in grades 9 to 12 will be able to demonstrate competencies in meeting graduation requirements. Specifically, the purpose is to determine the impact of changes in graduation requirements on student achievement as measured by the Hawaii State Test of Essential Competencies and other appropriate measures.

<sup>2</sup>California Program Evaluation Improvement Project, Glossary of Terms Related to Educational Evaluation (San Mateo: San Mateo County Office of Education, 1975). p. 12.

# The Evaluation Design

For both formative and summative evaluation, the efficacy of the revised graduation requirements shall be determined by comparative judgments made about events that occurred before and after the implementation of the revised graduation requirements. Therefore, the specific evaluation design is a time series design. A series of formative and summative evaluation data will be gathered during 1978-1935. This design is depicted in Figure 1 where patterns of achievement of essential competencies by students graduating annually over a period-of time are shown. A performance trend of achievement of essential competencies by four graduating classes beginning with 1981-1982 through 1984-1985 will be examined. In Figure 1 the notations T<sub>1</sub> through T<sub>4</sub> represent the four treatment groups.

1981-1982 1982-1983 1983-1984 1984-1985 T, T<sub>2</sub> T<sub>3</sub> T<sub>4</sub>

A Time Series Design

Fig. 1

# Data Collection

Formative Evaluation. To gather project development information, interviews will be conducted with chairpersons of seven work committees, Task Force and Steering Committee. Questions include:

- pl. Did your committee accomplish what was assigned to it?
- 2. What working procedures were used to accomplish the major tasks of your committee?

- 5. What major problems did your committee encounter in completing its tasks?
- 4. What major modifications were made by your committee?

Feedback about the schools' implementation of the revised graduation requirements, particularly as it relates to credits, courses, alternatives and program improvement will be provided to decision makers. Information for this feedback will be obtained from questionnaires administered to principals and teachers. Opinions and attitudes about the revised graduation requirements will also be sought from parents, students, graduates and the public. The following questions can be asked of school personnel about their implementation of revised graduation requirements:

- 1. Were students offered alequate numbers and kinds of required and elective courses for meeting graduation requirements?
- 2. Are students attaining the kinds of skills, knowledge and attritudes necessary for short and long-range individual goals and plans?
- 3. Are teachers providing alternative teaching-learning strategies to accommodate individual needs, interests and learning styles?
- 4. Are supplementary services provided to those students who need special help in attaining competencies?
- 5. Are alternative ways to meet graduation requirements provided stude to are unable to meet those requirements through the regular instructional programs?
- 6. Are current alternatives and options adequate in helping students meet graduation requirements?

- 7. If current alternatives are not meeting the needs of students how successful are the State, District and School level standing committees in generating and implementing additional alternatives?
- 3. Where difficulties were encountered in your school's implementation of the revised graduation requirements?
- 9. What support or assistance do you need in implementing the revised graduation requirements?

The following quantifiable data will be gathered to obtain trends in the implementation of specific graduation requirements:

1. What is the trend of the percent of seniors graduating during 1978-1985?

Table 1 enjoys Graduating During 1973-1985

- Are more students assisted in meeting credit and course requirements through the use of alternatives after the implementation of revised graduation requirements?
- instruments used for formative evaluation are the following:
  - 1. Student Enrollment Report will be examined to obtain information about the number of seniors graduating.
  - 2. School reports will be examined to obtain information about the percent of seniors who used ilternatives in meeting graduation requirements and about seniors not graduating.
  - students, graduates and the public will be used to obtain information about their attitude toward revised graduation requirements.
  - 4. · Interviews will be used to gather information about the development of the revixed graduation requirements.

Summative Evaluation. To assess student achievement of essential competencies, the following evaluation questions and comparative design are utilized:

- 1. Does the percent of grade 10'students passing the Hawaii State
  Test of Essential Competencies increase or decrease from year
  to year?
- 2. Is the percent of grade 10 students achieving essential competencies higher after the implementation of revised graduation requirements?

Grade 10								

What is the partern of achievement of graduating flasses of 1982, 1983, 1984 and 1985 who took the Hawaii State Test of Essential Competencies?

The instrument used for summarive evaluation is the Hawaii State Test of Essential Competencies which will be administered to students in grades 9, 10, 11 and 12. The percents of students tehieving the essential competencies will be computed each year.

# Analysis of Data

Percents, means and standard deviations will be computed to analyze the data. Other data will be treated according to specific descriptive categories.

Reporting of Information

The initial evaluation plan was reviewed by the Task Force in April, 1978 and the final evaluation plan accepted in June, 1978. Progress reports will be presented as appropriate during 1979 to 1984. In 1985, a summary evaluation report will be completed.

N= Number of students taking the test.

M= Mean

SD= Standard Deviation."
