#### ABSTRACT

Data on concentrations of Hispanic populations in the United States, Hispanic enrollments in two-year, four-year, and graduate programs, and Hispanic-related awards by the Fund for the Improvement of Postsecondary Education (PIPSE) by category of institution are presented. Included are: the distribution of the total Hispanic population of the United States: full-time Hispanic enrollment in higher education, 1974-1978; total earned degrees in higher education by Hispanics: funding of Hispanic-related proposals by FIPSE 1973-1980: and Minority Institutions Science Improvement Program (MISIP) funding for Hispanic programs, 1975-1980. Appendices include: a description of Hispanic-related grants awarded by FIPSE and MISIP: minority institutions eligible for MISIP awards; supplementary tables; and the legislative history of FIPSE and MISIP. Among the recommendations are t...t (1) FIPSE define and target "Hispanic" as one of the populations to be served in providing equal opportunity (to fulfill subsection (1) of Sec 1001 of Title X) and (2) FIPSE solicit proposals targeting retention and matriculation of Hispanics at the masters and doctoral levels. A list of tables, definitions, and references are provided. (LC)

#### FOREWORD

"Analysis of Hispanic-Related Grants" presents a great wealth
of data on concentrations of Hispanic populations in the United States,
Hispanic enrollments in two-year, four-year, and graduate programs,
and Hispanic-related awards by the Fund for the Improvement of Postsecondary Education (FIPSE) by category of institution. This study was undertaken by Julia Maestas at FIPSE during 1981.

Dr. Maestas' study is timely, as both various units of government and postsecondary educational institutions are seeking to improve Hispanic-American access to, and retention in, colleges and universities. The implications of her findings are especially salient for policy-makers in those regions of the country having high concentrations of Hispanic-Americans, and particularly for four-year institutions in those areas.

Sven Groennings, Philo.
Director
Fund for the Improvement
of Postsecondary Education

1

#### Abstract

The 1980 census has reported a total of 17,793,453
Hispanics in the United States. This represents an increase in excess of 5,500,000 over the 1970 census. Hispanics are present in large numbers throughout the United States. The states with the largest Hispanic populations are California (4,543,770), Texas (2,985,64?), New York (1,659,245), Florida (857,898), and Illinois (635,525). In terms of proportionate representation, Hispanics constitute 36.6% of the population of New Mexico, 21.0% of Texas, and 19.2% of California.

Full time Hispanic undergraduate enrollment, not including Puerto Rico, increased 24.7% from 1974 to 1978, where in general the national enrollment increased 2.6%. Full time Hispanic graduate enrollment increased 36.3% during the same period, while the total full time national graduate enrollment declined 6.3%. The number of Hispanic receiving bachelors degrees increased 11.5%, masters increased by 4.6% and doctorates increased by 10.9% from 1975-76 to 1978-79. For the nation as a whole during the same period, the total number of bachelor's degrees increased 0.1%, the number of masters degrees decreased 3.0%, and the number of doctorates decreased 3.3%

From 1973 to 1980 the Fund for the Improvement of Postsecondary Education-figures for Puerto Rico were not available for 1974-supported 107 Hispanic related projects for a total

A. Cal

of \$7,699,298. Consistent with general trends at FIPSE, the number of awards increased over time but the verage amount of support per grant decreased. In general, the majority of FIPSE grants were awarded to Universities and four-year colleges. This pattern did not hold for Hispanic related grants. The greatest difference was support for community based organizations, which received 30% of Hispanic grants and only 9% of FIPSE grants over all.

The Minority Institutions Science Improvement Programs has provided a relatively small number of grants, 27, but the support per grant has been substantial, averaging more than \$225,000 per award. Geographic distribution of the recipients has been limited to Puerto Rico and four states: Texas, New York, New Morico, and California. Puerto Rico accounted for more than half of the grants, followed by Texas and New York, with five grants each.

#### Acknowledgements

This research paper was undertaken at the request of Dr. Arturo Madrid, Director, and Carol Stoel, Deputy Director of the Fund for the Improvement of Postsecondary Education (FIPSE).

Sections II and III are the result of a collaborative effort with Manuel Gomez, Program Officer, FIPSE.

Section IV is the result of a working relationship with Dr. Argelia Velez-Rodriguez, Program Director, and Dr. Arlene Maclin, Program Manager, Minority Institutions Science Improvement Program (MISIP).

Section VI is projected to be a collaborative effort with the full FIPSE staff and Advisory Committee.

Acknowledgements are made to the Tollowing past PIPSE/MISIP staff: Dr. Ciria Sanchez-Baca, Dr. Rene Cardenas, Dr. Isa Infante.

Additional acknowledgements to the present FIPSE/MISIP staff are made to Lynn DeMeester, Joy Burgess, Aileen Rogers, Vicki Riffe, Jackie O'Neal, Ophelia Waller, Steve Erhmann, and Dorothy Stanley.

Acknowledgements are extended to the National Advisory Committee and to members of the Reagan administration for their interest, suggestions and support.

#### Definitions

"Hispanic-related" grants for the Fund for the Improvement of Postsecondary Education (FIPSE) were identified as such from the indexes of Resources for Change, a yearly publication by FIPSE. Additional inputs were gained from two past program officers, current program officers, and members of Hispanic advocacy groups. Hispanic-related grants for the Minority Institutions Science Improvement Programs (MISIP) were identified by Argelia Velez-Rodriguez, Program Director, and a publication entitled ist of Predominantly Minority Institutions by Race/Ethnicity and by State/Type by the National Science Foundation, 1980.

"Types of Institutions" were categorized as such by past Program Officer Manuel Gomez, and current program officers.

Individual institutions were contacted for additional verification of categorizations.

#### Recommendations: FIPSE

ment of a new Title X of the Higher Education Act of 1965,

Fund for the Improvement of Postsecondary Education, which

reads "Encouraging the reform, innovation and improvement of

postsecondary education and providing equal educational

opportunity for all (emphasis added), implies that the popula
tions to be served are identified and that a mechanism of

accountability be established.

"Hispanic" has historically been treated as "minority" by the Fund for Improvement of Postsecondary Education (FIPSE).

Preliminary investigation (Maestas, June 1981)
suggested that over time, 1973-1980, FIPSE had funded 107
"Hispanic related" projects as identified by a yearly FIPSE publication, Resources for Change. Additional input from two past program officers, two current program officers, and members of the Hispanic community indicate discrepancies in the identification of "Hispanic-related projects ranging from approximately 20% to 50%. Some gran(s identified as "Hispanic" may not have reached the stated population or reached them to a negligible degree.

#### Recommendation I:

That FIPSE define and target "Hispanic" as one of the populations to be served in providing equal opportunity for all to fulfill Subsection (1) of SEC 1001 of Title X.

#### Recommendation II:

That FIPSE establish an accountability system whereby statistical information is provided on the numbers of Hispanics actually served through FIPSE grants.

Subsection (6) of SEC 1001 of Title X provides the mechanism "to introduce institutional opportunities for entering institutions" and

Subsection (4) provides for "changes in the internal structure and operations designed to clarify institutional priorities and purposes."

In the United States and District of Columbia, 64% of all students are enrolled in four-year institutions of higher education. In Puerto Rico, where the majority of ctudents are Hispanic, 71.3% of students are enrolled in four-year, institutions. However, only 45.6% of Hispanic students in the 50 states and D.C. are enrolled in four-year institutions. A small proportion of students in Puerto Rico (28.7%) and in the general population of the United States and D.C. (..8%) are in two-year institutions of higher education whereas 54.4% of the Hispanics in the U.S. and D.C. are envolled in two-year institutions. Therefore, the

distribution of the Hispanic student pollutation of the U.S. and D.C. is skewed in the direction of the two-year institutions.

Furthermore, within-state analysis in loates that 46.7% '105,975 f 226,918) of all Hispanius in the United States and D.C. are enrolled in two-year institutions of higher education in California.

#### Recommendation III:

That FIPSE solicit proposals to rectify the disproportionate representation of Hispanics in two-year institutions of higher education.

#### Recommendation IV:

That FIPSE solicit proposals specific to California to restiny the disproportionate representation of Hispanics in two-year institutions of higher education within that state.

Subsection.(7) of Title X provides for the introduction of reforms in graduate education. . . and

Subsection (8° provides for the examining and awarding of credentials to individuals . . .

Statistical information has been provided at the national level that Hispanic earned degrees have decreased 8.7% at the masters level and decreased 15.7% at the doctoral level in 1978.

· Recommer Lation V:

That FIPSE solicit proposals targeting retention and matriculation of Hispanics at the masters and doctoral levels. A general recommendation is that FIPSE develop interagency/ intergovernment linkage whereby data may be collected which will help conceptualize educational issues faced by the Hispanic community. 1 IPSE may then solicit proposals in specific, targeted areas of need. For example, an interagency linkage with the National Center for Education Statistics would provide c rrent uplated information on the participation of Hispanics in postsecondary institutions of higher education. An interagency linkage with the Office of Civil Rights would help target specific issues confronting the Hispanic population. An intergovernmental linkage with the Census Bureau would provide current updated information regarding various aspects of the Hispanic community, from financial standing A linkage with the Equal to distribution of age range. Employment Opportunity Common would help to conceptualize Staff/facility needs within the Hispanic community that may be addressed by FIPSE.

#### Recommendations: MISIP

Final regulations cited in 34C FR Part 735 state that one of the MISIP objectives is to "effect long-range improvement (emphasis added) in science education.

#### Recommendation I:

The general population of Puerto Rico is approximately that of the state of Texas, which comprises approximately 20% of the Hispanic population in the United States and D.C. Hispanic students in Puerco Rico comprise a significant proportion of all Hispanic students graduating at the bachelor's level in biosciences (39.2%), engineering (27.5%), mathematics (32.4%), physical sciences (31.1%), psychology (30.3%), and social sciences (25.0%) (Supplement Table 2). It is suggested that avenues be explored whereby Hispanics in the United States and D.C. can replicate the apparent success of students graduating with bachelors degrees in Puerto Rico (Supplement Tables 4, 6). Interestingly the success at the undergraduate level, e.g., in biosciences, appears to have a "spill over effect" onto the master's level (which comprises 40.8% of all Hispanics earning degrees in that discipline), and, furthermore, onto the doctoral level.

Pub.L 36-374 1303 (1980) states that "entities other than minority institutions are eligible in certain types of projects conducted as part of MISIP."

#### Recommendation II:

That MISIP solicit proposals from four-year institutions to increase Hispanic earned degrees at the master's and doctoral levels (Supplementary Tables 5 and 7).

#### .Recommendation III:

That MISIP target specific scientific disciplines with

general haspanic underrepresentation, e.g., mathematics, physical sciences, engineering and solicit proposals in these scientific disciplines (Supplement Table 3).

#### Recommendation IV:

Hispanic underrepresentation by scientific discipline, e.g.,
Arizona - biosciences, engineering, mathematics, physical
sciences, psychology, social sciences; California - biosciences,
engineering, mathematics, physical sciences; Texas - physical
sciences; New York - engineering; Florida - mathematics;
Illinois - engineering; New Mexico - social sciences, and
solicit proposals from those states by scientific discipline
(Supplement Table 3).

interagency agreements be established with the National Center for Education Statistics to provide updated statistical information of minority institutions eligible for FIPSE funding. A second general recommendation is that cooperative interagency agreements be established with the Office of Civil Rights for updated statistical information on Hispanic representation by state and discipline. A third general recommendation is that cooperative intergovernmental agreements be established with the Census Bureau to provide updated information regarding the Hispanic population in general.

## The Distribution of the Hispanic Population of the United States

During the 1970's the United States became increasingly aware of the presence and impact of its Hispanic population. The 1980 census (Table 1) reported a count of 14,605,883 Hispanics, not including the island of Puerto Rico with a current population of 3,187,570. This represents an increase of 5,037,440 Hispanics in he states and the District of Columbia and an increase of 475,537 in Puerto Rico over the 1970 census report. The enumeration, then, in the United States from 1970 to 1980 increased more than 60%, or from 4.6% to 6.5% of the population.

A note of caution should be sounded in discussing the growth of the Hispanic population. Although it is clear that there have been significant increases from 1970 to 1980, the extent of the increase is not clear. First, it is obvious that there were major undercounts in the 1970 census. According to the Bureau of the Census, improvements in the 1980 census, better coverage of the population, improved question design, and an effective public relations campaign by national and community relations groups resulted in a more efficient enumeration of Hispanics than in 1970. Still it is probable that undercounts of Hispanics in the 1980 census were proportionately greater than undercounts of the general population. Therefore the reported Hispanic 1980 total of 14,605,883 must be considered an underenumeration of undetermined size.

Examination of Table 1, which presents information on Hispanic population by state, roveals some interesting data. The size of the population and the large increases are most noticeable in California, with an increase of 2,000,000 Hispanics, Texas with over 1,000,000, Florida with almost a half million and New York, Illinois and New Jersey with increases of from 200,000 to 300,000. Eight of the 11 states with the largest numbers of Hispanics increased more than 50% with Florida (111.0%), California (91.7%), and New Jersey (70.2%) recording the greatest percentage increase. Eleven states had an enumeration of over 650,000 Hispanics. A twelfth state, Massachusetts, had a 113% increase from 1970 to 1980 and probably now has gone over 150,000 Hispanics since the 1980 census.

In terms of the general population, New Mexico had the largest Hispanic representation, with 36.6% of the state's population, followed by Texas with 21% and California with 19.2%.

Another noticeable factor is the geographic diversity of the Hispanic population. Five of the twelve most populous Hispanic states (California, Texas, New Mexico, Arizona, Colorado) are in a southwestern cluster; four (New York, New Jersey, Pennsylvania) are in the northeast; two (Illinois and Michigan) are in the midwest and one (Florida) is in the southeast.

Examination of Table 1 reveals that the five most populous Hispanic states—California, Texas, New York, Florida and Illinois —accounted for the greatest growth between 1970 and 1980. These first states account for over 10,000,000 according to the 1980

had equal or greater proportional growth and that Hispanics constitute a significant presence across the nation. As Jhown in Table 2, the number of Hispanics enumerated more than doubled in 13 states from 1970 to 1980. Only one of the most populous states, Florida, was in this category. States which more than doubled their Hispanic population ranged from Hawaii to the northwest (Washington, Oregon, Nevada, Idaho) to the northeast (Massachusetts, Rhode Island, Vermont, Maine, New Hampshire).

It should be noted that not all states reported an increase in Hispanic population from 1970 to 1980. Nine states, in fact, had decreases with Tennessee, Kentucky, Arkansas and Indiana showing drops of 20% or more.

than the nation as a whole. The average age of Hispanics is approximately 21, with the exception of the older Cuban contingent or about 10 years younger than the average non-Hispanic American. Thus, although the 14½ million Hispanics comprise 6.4% of the United States population, the distribution in various age groups varies. Hill (1980) reported that Hispanics account for 4.4% of the population 16 and older. Contrasted to this, in an analysis of the 1978 Civil Rights Survey data Killelea Associates (1980) reported that of a total elementary and secondary school enrollment of 41,856,257 students, 6.8% or 2,825,229 were Hispanic. The Hispanic preschool population is even greater. A U.S. Eureau of

the Census Current Population Report (1980) found that almost 10% of all students in the United States under 5 years of age were Hispanic in origin.

It should be noted that in spite of the tendency of some to think of Hispanics as recent arrivals, Puerto Rico had a Spanish settlement before the year 1500. St. Augustine, Florida is the only mainland American city to celebrate the 400th anniversary of its founding. Espanola, New Mexico was settled by the Spanish in 1598. The extent of the Hispani presence in the United States may be illustrated by the fact that most of the lands in the contiguous 48 states at one time or another had Spanish settlements. This includes Florida, the Louisiana territory, Texas, New Mexico, Arizona, Colorado and California. Thus, Texas and California have had an Hispanic presence for 200 years, New Mexico and Florida for 400 years and Puerto Rico for almost 500 years. Hispanic roots in present day United States, then, are ancient and run deep.

## Full Time Hispanic Enrollment in Higher Education 1974-1978

Hispanics in higher education from 1970 to 1980 and compare this to changes in 1970 and 1980 census figures. However, it was not until 1974 that racial/ethnic data for the States and D.C. were gathered by the Office of Civil Rights (OCR) on Hispanic higher education enrollment. Since then, the National Center for Educational Research (NCES) has gathered and reported information for OCR concerning Hispanic enrollments in 1976 and 1975 for the States and D.C. plus Puerto Rico and the outlying areas. The present section contains enrollment data, then, for 1974, 1976 and 1978 and does not encompass the entire decade. However, the data should provide information on trends in higher education as they relate to Hispanic strents.

As may be seen in T. le 4, the full-time undergraduate enrollment in the United States increased from 5,617,617 in 1974 to 5,831,421
in 1976 and then dropped to 5,761,619 for an increase of 2.6% over
the four years. During the same period Hispanic undergraduate enrollment in the States and D.C. increased from 157,572 in 1974 to 191,065
in 1976 to 196,452 in 1978. This accounts for an overall increase
of 24.7. Put another way, Hispanics accounted for 2.8% of all fulltime undergraduates in 1974, 3.2% in 1976, and 3.4% in 1978. California (53,951 undergraduates), Texas (43,831), New York (30,421)
and Florida (11,979), the four most populous Hispanic states all
reported more than 10,000 full-time undergraduates. New Mexico
(7,984) and New Jersey (6,734) had more undergraduate students

than Illinois (6,349), although the 1980 Illinois Hispanic population was approximately 150,000 greater than the other two.

Trends for full-time graduate enrollment for Hispanics show the same pattern, although the enrollment figures reveal a lower base. Hispanic full-time graduate enrollment (Table 5) increased from 6,110 in 1974 to 8,045 in 1976 to 8,325 for an overall growth of 36.3% from 1974 to 1978. General full-time graduate enrollment dropped 6.3% during the same period from 398,045 in 1974 to 382,491 in 1976 to 372,793 in 1978. Hispanics accounted for 1.5% of the full-time graduate students in 1974, 2.1% in 1976, and 2.2% in 1978. This is below the percentage of undergraduate students, 2.8% in 1974. As might be expected, California (2,059), Texas (1,093), New York (1,146 and Florida (520) had the largest numbers of full-time graduate students. The state with the fifth largest number of Hispanics, Illinois, had relatively few graduate students (311). Massachusetts, the state with the 12th largest Hispanic population and New Mexico, the 7th largest had 337 and 331 Hispanic full-time graduate students respectively.

The enrollment data for Hispanic undergraduate full-time students suggests an increase from 1974-1976, from 2.8 to 3.2%, and a more moderate increase from 1976-1978, from 3.2% to 3.4%. The overall increase for Hispanic full-time undergraduate enrollment over the 4-year period from 1974-1978 was 24.7%. The enrollment data for Hispanic graduate full-time students follow the same pattern—an increase from 1974-1976, from 1.5% to 2.1% and a more moderate increase from 1976-1978, from 2.1% to 2.2%. The overall increase for : panic full-time graduate enrollment over the 4-year period from 19.4-1978 was 36.3%.

## Total Earned Degrees in Higher Education by Hispanics

The National Center for Euccational Statistics has gathered data for degrees earned during the 1975-76, 1976-77, and 1978-79 academic years, with no data gathering reported for 1977-78.

Although the periods are not the same as the 1974, 1976 and 1973 reports of enrollment in institutions of higher education, they do provide somewhat comparable information.

degrees earned remained constant (Table 6), increasing 0.1% over the period. The number of Hispanics --ceiving bachelor's degrees increased 11.5% from 17,964 in 1975-76 to 20,029 in 1978-79. This represents 1.9% of bachelors degrees in 1975-76 and 2.2% in 1978-79. Given previously cited data that Hispanics accounted for 2.8% of undergraduate enrollment in 1974, 3.2% in 1976 and 3.4% in 1978, the previous appear low. Data are needed for 1980 and 1981 to ascertain whether the number of graduating Hispanics have indeed increased.

In terms of graduate degrees, NCES has reported masters and trate degrees earned in 1975-76, 1976-77, and 1978-79 whereas the enrollment data for 1974, 1976, and 1978 refers only to graduate students and does not distinguish master and doctoral level enrollment separately. Therefore, the graduate enrollment data and the graduate degree data are not comparable.

As may be seen in Table 7, the number of Hispanic earned masters

degrees increased 4.6%, from 5,299 in 1975-76 to 5,544 in 1978-79. However, the letter figure represents an 8.7% decrease from 6,069 masters degrees earned by Hispanics in 1976-77. Of particular concern is the fact that the numbers of earned masters degrees decreased from 1976-77 to 1978-79 in the three states in the United States with more than 1,000,000 Hispanic residents: California, Texas, and New York. California and New York also showed a decrease from 1975-76 to 1978-79.

Table 8 indicates a similar pattern in earned doctorates. The number of Hispanics earning doctorates increased 10.9%, from 396 in 1975-76 to 439 in 1978-79. However, like the situation for earned masters, the latter figure is 15.9% lower than the 522 earned doctorates by Hispanics in 1976-77. The data on earned masters and doctorates are difficult to incerpret in the light of previously presented graduate enrollment. Table 5 indicates that Hispanic graduate enrollment increased 31.7% from 1974 to 1976 and 3.4% from 1976-78. Yet the numbers of doctorate degrees and masters degrees decrease for Hispanics from 1976-77 to 1978-79. The trend in earned graduate degrees for Hispanics does not show the same consistent growth as enrollment data at all levels or as undergraduate earned degrees.

#### Funding of "Hispanic" Related Proposals by the Fund for the Improvement of Secondary Education (FIPSE) 1973-1980

has increased its total program support approximately 50%, from \$9,300,000 in 1973 to \$13,500,000 in 1980 (Table 9). During the same period, the number of proposals funded increased over 160%, from 89 in 1973 to 233 in 1980. This reflects a trend to support a greater number of proposals at a lower average rate. For example, the average grant in 1973 was for more than \$100,000 (\$9,300,000 for 89 proposals), whereas in 1980 the average was less than \$60,000 (\$13,500,000 for 233 programs). If inflation were taken into account, the average 1980 grant might be equivalent to \$30,000 in 1973 dollars.

Funding for "Hispanic" proposals followed the same pattern (Table 10), increasing from \$755,717 for eight grants in 1973 to \$1,827,759 for 29 grants in 1980. The average Hispanic award was approximately \$94,000 in 1973 and \$63,000 in 1980. Although there was variation from year to year, the average Hispanic grant of \$71,000 for 107 grants was similar to that of \$70,000 for the total number of 1301 awards made by FIPSE over the period.

Table 10 lists the amounts of the total Hispanic awards. In each year (Table 11) there is a wide range with the smallest single grant being \$15,250 in 1977 and the largest \$102,055 in 1976. The largest grants over time were received by Boricua (5545,817), Experiential and Bilingual Institute (\$602,686), the

Questionable Hispanic thrust.

Clearinghouse for Community Based Free Standing Educational Institutions (\$517,455), and East Harlem Block Nurseries (\$358,822) (Table 12).

There appear to be some differences in the types of institutions receiving awards. Table 13 illustrates that 39.3% of the total funding was awarded to community based organizations, followed by 22.4% to 4-year institutions, 13,0% to universities, and 13.1% to 2-year institutions. In a study of a sample of 443 FIPSE grantees from 1973 to 1979, Pelavin (1979) (Table 14) found that 240 or 54% of recipients were universities or 4-year colleges; 12% were to two-year colleges and 9% were to community based organizations. Analysis of HEW News sources reveal that from 1973 to 1980 Hispanic grants consisted of 41% to universities and 4-year colleges and 13% to 2-year colleges. The greatest discrepancy is in grants to community based organizations, which received 30% of Hispanic grants and only 9% of grants reported in the Pelavin study. Although the sources of data are not exactly comparable -- the Hispanic data extend for a longer period of time and the Pelavin study includes an unknown number of Hispanic newards -- it is clear that community based organizations play a more significant role in mispanic related projects than in other projects funded by FIPSE. Table 15 illustrates recipients of Hispanic awards each year from 1973 to 1980. The pattern of funding for university and four-year colleges, two-year instit. ons and university based organizations appear to be relatively c istent over the years (Table 16). Tables 17 and 18 expand

Note: Three of the largest Hispanic states -- Arizona, Pennsylvania and Illinois -- have received no Hispanic grants.

on the material presented in Tables 15 and 16, and list the recipients in each category for each year from 1973 to 1980.

Table 18 presents the awards by state and year from 1973 to 1980: New York, with 25 grants for approximately \$1,500,000 or 26.7% of the total; the District of Columbia received \$1,100,000 for nine grants, a larger average than any state—followed by Texas with 12 grants and less than \$700,000 and Puerto Rico with 7 grants and a little more than \$400,000. Arizona, Illinois and Fennsylvania, all among the states with more than 150,000 Hispanics enumerated in the 1980 census have received no FIPSE grants.

## Mincrity Institutions Science Improvement Programs Funding for Hispanic Programs

#### 1975-1980

During the six year period from 1975 to 1980 inclusive,
27 of 213, or approximately 13% of the proposals funded by MISIP
have been related to the training of Hispanics in science (Table 19).
In terms of the amount of funding, the Hispanic programs have
received \$6,167,666 of \$26,754,314 awarded, or 23% of the total.
The Hispanic awards (23 for \$6,167,666) have averaged more than
\$125,000 compared to an average of approximately \$125,000 for
MISIP grants in general.

grants. Table 20). The largest number of awards (10) were granted in 1977 but in 1980, with only six awards, the largest total funding \$1,433,260 was awarded. 1979 was the low point both in the number (3) and amount (\$516,299) of awards.

been awarded across 25 different institutions but tend to be restricted in geographic distribution. Puerto Rico has accounted for a rajority of the grants for the entire period, receiving more than the rest of the United States combined. Texas and New York follow, with five grants each over the six year period, New Mexico trants in 1978 and 1980, and California with one grant in 1977 are to only states to receive any funding.

ADDENOTY A

#### APPENDIX A.

## Description of Hispanic-Related Grants Awarded by FIPSE

HTW News, 1973-1980 Source:

Boston Community School

Boston, Massachusetts

1978 \$34,100

Delivers adult education to the Hispanic community via educational T.V., sponsored workshops, and referral to other agencies.

Central Coast Counties Development Corporation

Aptos, California 1974 \$52,510

1975 \$56,000 Integrates practical experience and academic work in a program designed to develop required skills for the emerging field of rural community development.

Citizens Policy Center Santa Barbara, California

\$102,055 1976

Provid s career counseling for young people engaged in pilot apprenticeship programs in four California counties. The programs are designed not simply as jobs, but as career exploration experiences which may lead to further work in the same field or additional formal education.

CUNY - Brooklyn College

Bronx, New York

Expands a clearinghouse which disseminates information and 1978 provides technical assistance to teachers, counselors, and administrators dealing with the problems of under-prepared students.

CUNY - Lehman College

Bronx, New York

Teaches Spanish-speaking students college level English through 1980 \$63,089 the Dartmouth method of Intensive Language Instruction as well as through intensive work in writing in Spanish and English. The project will attempt to curb attrition and "mainstream" non-native speakers of English.

Clearinghouse for Community Based Free-Standing Postsecondary

Institutions Epes, Alabama

Provides shared information, dissemination, technical assistance, 1976 \$107.855 ning and evaluation services to community-based, free standing in tutions. The program enhances the capacity of participating inst. utions to serve their non-traditional clientele.

110 Source: MCES Earned Degree Data, 1975-1979

Corrections Clearinghouse Olympia, Washington

1977 \$79,945

Enhances a career awareness program for eighty inmates by offering a variety of opportunities to minority and women offenders in correctional facilities and court diversionary referral programs The program serves as an information, referral and counseling agency for both occupational and educational training, working closely with related agencies.

Council for Opportunity in Graduate Management Education, Inc. Cambridge, Massachusetts

\$70,000

1980 Focuses on the under representation of minorities in graduate schools of management. The project establishes COGME as a resource for students, undergraduate administrators, and other graduate schools in addressing the problem of minimal minority representation in graduate management education.

Continues to focus on the under representation of minorities in graduate schools of management, as in 1979 above.

East Harlem Block Nurseries, Inc.

New York, New York

1975 \$50,000 Develops a program of in-service training for para-professionals who work in community supported schools. Training relates to subject matter competencies and skills that are unique to the community being served.

\$75,892 1976

Same as 1975, above.

\$88,000

Solidifies BA/MA program, secures permanent funding, challenges funding barriers for community groups, and disseminates program results.

East Harlem Block Schools

New York, New York

1978 \$144,930

Disseminates a program of technical assistance to other comrunity education centers which train paraprofessionals. The competency-based program for staff and parents leads to a B.A. degree offered in conjunction with a local college.

Educational Broadcasting Corporation (WNET)

New York, New York

\$15,250

Develops in cooperation with the Tri-State College Consortium (17 two- and four-year institutions in New York, New Jersey and nnecticut), the capacity to deliver educational programming to grved adults in supportive settings such as community centers, la unions and businesses.

Educational Systems Associates

Austin, Texas 1974 \$52,775

El Paso Community College

El Paso, Texas 1973 \$149,334

For the development of faculty competencies in multi-cultural education and individualized instruction.

1974 \$118.599

Provides Spanish-speaking students with curricular materials 1975 and instructional approaches stressing lilingual and bi-cultural activities. These approaches are also geared to the individual student's unique educational needs and goals.

### Experimental and Bilingual Institute

New York, New York

1973 \$182,534 For support of a community-based college feeder program serving Spanish-speaking adults and other learners.

1974 \$180,000

1975 \$156,067

Provides bilingual education in a community-based institution for disadvantaged urban Spanish-speaking adult learners. Credit from established four-year institutions is available to students at the Institute.

1978 \$84,085

Renews and redefines the articulation agreements and relationships between EBI and those colleges and universities which its adult students attend after successful work in this community-bared institution.

## Florida International University

Miami, Florida

1979 \$129,486

Works with agencies and educational institutions to help them respond to migrant educational needs and interests. The project uses a community organizing approach to raising consciousness about educational opportunity among rural migrant workers.

\$140,961

Continues to work as in 1979, above.

## Graduate School for Urban Resources and Social Policy

San Diego, California

1980 \$97,692

Trains minority researchers by placing them in community organizations. The project aims to further local community developont activities by helping administrators of community-based mizations evaluate and improve their services.

Greater New Orleans Educational Television Foundation (WYES) 2 New Orleans, Loui.

\$100,000

Provides aducational and career counseling through a monthly, live, 60-minute television program aimed at women learners. Spanish-speaking viewers can hear a simultaneous translation of the program on the radio.

Harvard University Cambridge, Massachusetts

1979 \$50,495 Addresses the problem of under-representation of Blacks, Puerto Ricans, Chicanos, and Native Americans in graduate programs leading to a Ph.D. Project refines, expands, and sponsors a series of innovative and successful 2-day information workshops on graduate study in the arts, sciences, and engineering for minority students and counselors of minority students.

Hispanic Higher Education Coalition

Washington, D.C. 1980 \$60,000

Expands efforts to improve educational opportunities for Hispanics. Activities include providing technical assistance, disseminating critical funding information, facilitating transfers between two-year and four-year institutions and establishing a resume bank.

Holy Name College Oakland, California

Adapts the philosophy and pedagogy of Paulo Freire to the educational needs of urban older adults at two walk-in health clinics in Oakland and Berkeley. The project trains some older adults as peer teachers to enable them to assist others in the community in subjects such as physical and mental health, nutrition, financial management (personal), culture, and oral history.

Hood College Frederick, Maryland

Establishes a program to recruit Hispanic women. The project also implements an academic program and support system for these women and begins a process of institutional "biculturalization."

Hudson County Community College

Jersey City, New Jersey

Develops a Middle College, a cooperative effort between the 1976 \$34,778 Sudson Area Vocational-Technical Schools and the community college. Middle College combines the last two years of high school with first two years of college and acts as a single coordinating ac. 'to improve cooperation with business, industry, manpower training programs, and other community and educational organizations. Incarnate Word College

San Antonio, Texas

\$37,246 1978

\$22,767 . 1979

Establishes an outreach program to serve older, single and bilingu-1980 al women in San Antonio. The project will assist them in making transitions into postsecondary institutions through skills analysis remdiation and counseling in a milieu familiar and supportive of the women.

Intercultural Resources Development, Inc.

Hispanic American Career Education Resources, Inc.

New York, New York 1979 \$69,650

Establishes and continues an Hispanic Women's Learning Resource 1980 Center, which serves the educational and career needs of Hispanic women in New York City. All services are designed with the adult Hispanic women's needs and style in mind and include two campus learning sites for 275 students and widely offered financial counseling and self growth sessions.

Institutional Development and Economic Affairs Service (IDEAS)

Nederland, Colorado

\$79,000 1979

Adapts the successful Foxfire Learning process involving migrant 1980 youth in a postsecondary learning experience. Youth enroll in area community colleges and participate in a curriculum design that includes writing and publishing a series of community and career awareness profiles.

Latino Inscitute Research Division

Reston, Virginia 1980 \$67,214

Establishes an Information and Reference Center for "Educacion Liberadora" in order to develop a national network of projects based on the approaches of Paolo Freire. Relevant project information will be compiled and indexed, and educational materials will be published.

LaGuardia, New York, New York

1973 \$48,690

To establish a middle college encompassing students from the 10th 1974 to 14th year. This approach seeks to eliminate duplication between college and high school programs, and to allow for earlier entry into college level career programs.

LULAC National Educational Service Center, Inc.

Washington, D.C.

\$60,397 1979

1980

Conducts research and evaluation activities designed to explore t: relationship between counseling and financial aid services and the per rtance of Hispanic students in college.

Mexican American Cultural Center

San Antonio, Texas

\$20,000 1980

Educates young Mexican-American community leaders in basic administration and community organizing. The program will encourage instructive local change.

Mexican American Legal Defense and Education Fund (MALDEF)

San Francisco, California

\$70,000 1978

1979 \$48,380

Develops alternative models of admissions criteria for use in public and private law schools in California. The project will collect data on current admissions procedures and test other methods with a view to increasing the number of minorities enrolled in law school.

1980 \$100,372

Creates an institute to increase access to the legal profession for minority individuals. The project completes a study and develops models for admissions criteria, recruitment, retention and bar passage.

North Hudson Community Action Corporation

Union City, New Jersey \$1973 \$50,000

To establish a pilot learning center offering a variety of educational services (particularly to the Spanish-speaking), in conjunction with the Hudson Consortium Colleges.

Our Lady of the Lake

San Antonio, Texas

\$87,959 1974

\$55,000 1975

Specifies levels of knowledge and performance to be met by all freshmen and sophomores. The project is also revising administrative procedures to permit individualization of instruction.

#### Polytechnic Institute of New York

Brocklyn, New York

\$44,980 1978

\$46,860 1979

Increases the participation of minority women in management and management related fields through a collaborative AAS/BS/MS program involving graduates of N.Y. City Community College.

#### Puerto Rico Junior College

Rio Piedras

1979 \$88,716

Establishes study centers throughout the island so that students t. 'led in courses crried on cable TV can take examinations, receive tut. al and remedia: assistance, attend workshops and orientations, and a gract with other students on an informal basis.

Raza Center for Al Prnative Education

Los Angeles, California

Creates a labor school using a bilingual/bicultural approach 1980 to provide progressive education for East Los Angeles workers.

#### St. Edward's University

Austin, Texas 1977 \$7,600

Provides support services, such as peer counseling, financial aid and academic "refresher" courses, to migrant students. The University belongs to the College Assistant Migrant Program, which gives migrant workers "the opportunity to obtain postsecondary educational experiences and credentials that can enable them to leave the migrant track."

Continues to implement a listening-skills training program for \$40,597 1980 underprepared freshmen. The program also tests the effect of improved listening on other language skills.

#### San Piego Community College

San Diego, California

1979

Teaches non-English speaking adults to read, write, speak, and understand English by means of a phonics model coupled with peer instruction. Materials such as a 2000 word dictionary are prepared by native speakers of the eight most common languages found in Southern California and by the project personnel.

# San Diego State University - Imperial Valley Campus

Calexico, California

Continues to establish an Institute for Small Business Manage-1979 ment on the California/Mexican border to focus on the needs of small businessmen. It develops a degree program for students entering the field.

#### San Jose City College San Jose, California

For a program of services designed to facilitate the re-entry of minority women into postsecondary education.

## San Jose Community College District

San Jose, California

Prepares inner-city women (many of whom are Spanish speaking) 1974 to re-enter public community colleges through skill development and counseling. Students pursue regular arademic programs in a tually re-inforcing group.

"stablishes a Women's Re-Entry to Education Program, which 'es counseling and instruction to inner-city and minority women prolled in regular credit programs.

Society of Hispanic Professional Engineers

Los Angeles, California

\$32,610

Pursues multiple strategies aimed at increasing the number of Hispanic students pursuing engineering studies. Expands on past efforts of organizing student chapters by providing peer support and tutoring, and developing a directory of Mexican-American engineers.

Solidaridad Humana New York, New York

\$85,000 1978

\$115,577 1979

Establishes itself as a comprehensive educational institution 1980 providing independent study, contract learning, vocational education, and an effective path to postsecondary education for Hispanics .

## South Oklahôma City Junior College

Oklahoma City, Oklahoma 1976 \$59,937

Cooperates with the County Library System to provide more effective delivery of educational services to an inner-city area with a high concentration of Mexican-Americans and Native Americans. A new center located in a library facility increases the coordination among adult basic education, CETA training programs, career and educational counseling, community college programs and cultural programs.

## State University of New York - Geneseo Migrant Center

Geneseo, New York

\$46,399 1979

1980

Extends educational opportunities to interstate migrant youth. Validates and refines the earlier program in an attempt to move toward a national model.

## Student National Medical Association, Inc.

A REAL PROPERTY OF THE PARTY OF

Washington, D.C. 1980 \$69,132

Establishes a tutorial program to improve the performance of Black and Hispanic students on the New Medical College Admissions Test. Activities also include identifying minority pre-med students and preparing a diagnostic test.

#### University of Albuquerque

Albuquerque, New Mexico

\$27,115 1973

To implement a bachelor's degree program for minority adults on the basis of levels of competency rather than accumulated credits.

-----

Universidad Boricua

Washington, D. C. \$196,263

1973 For the planning and pilot development of an educational approach and curriculum for Puerto Ricans seeking careers in teaching and related fields.

1974 \$172,000

Designs and implements educational program targeted for the Spanish-speaking community in New York City. The bilingual curriculum emphasizes standards of success based on job and classroom performance and utilizating student input in the determination of standards.

\$82,500 1975

Provides support for this community based educational institution serving urban Spanish-speaking students.

Boricus College

New York, New York

1978 \$65.018

Extends a pilot internship by developing paid internships for Hispanic students. Articulates the internship and formal curricula.

\$65,018 Develops field internships for Puerto Rican students which combine practical and theoretical learning and provide financial resources for low income students to attend college.

\$65,018 1980

Continues to develop program above.

University of California - Santa Barbara

Santa Farbara, California

\$38,472 1980

Creates a program to support recruitment and retention of adult Chicanos. The project includes a conference, a summer orientation program, child care, and other support.

#### University of California - Irvine

Irvine, California 1976 \$35,350

£67.060 Assesses the information needs of prospective low-income and 1977 minority students in a cooperative project with the eight other University of California campuses. The project is developing a model system-wide prospective for these learners.

Universidad de Campesinos Librés, Ir C.

Fresno, California 1974 \$51,457

Provides higher education opportunities to the San Joaquin 'alley farmworkers community. This project utilizes input from the experiences of students in the development of academic -ams as well as a bilingual approach to the study of agronomy ementary education.

University of Connecticut

Storrs, Connecticut

\$51,300

Expands a program which identifies, motivates, and educates 1980 disadvantaged high school and pre-freshman students interested in pursuing careers in the allied health professions.

University of Michigan

Ann Arbor, Michigar. 1977 \$96,058 Establishes the National Chicano Scholars Network to offer training and support programs for Chicano graduate students and early-career faculty in the social sciences. The project seeks to increase Chicano presence in the academic and scholarly mainstream. \$84,924

Continue program above.

University of Puerto Rico

Rio Piedras, Puerto Rico

1973 \$50,000

To develop plans for the implementation of a system of credential validation through the cooperative efforts of the Caguas Sub-Regional Hospital and the University of Puerto Rico.

\$35,987 1976

Individualizes the freshman chemistry program through a bi-\$27,439 1977 lingual, Personalized System of Instruction (PSI) format, in order to reduce attrition and increase effectiveness in an essential sequence of courses. A workshop on the design and implementation of the PSI approval will be offered to other departments and to representatives from other campuses.

University of Southern California

Los Angeles, California

\$110,758 1976

Extends to the health and Spanish departments an innovative 1977 program which engages undergraduate students in community service projects that are related to their disciplines and credited by the University.

University of Southern California Chicano Studies Research Center Los Angeles, California

Develops and publishes material related to Chicano Studies. The project will disseminate a reader series on Chicano history, literature, education, and political science.

'niversity of Washington

1980 \$73,251

. Develops a training program for community outreach workers at health facilities serving Spanish-speaking migrant farmworkers. Students earn 70 credits toward the Associate degree.

Western Interstate Commission for Higher Education

Boulder, Colorado 1980 \$53,756

Circulates the names of minority students for recruitment into graduate schools under the aegis of WICHE. The project will expand membership of the Western Name Exchange, improve recruiting techniques, evaluate services, and increase information dissemination to students.

Women's Community, Inc. Los Angeles, California

Establishes a Feminist Graphics Workshop at the Women's Building, 1979 a women's art school in Los Angeles. Teaches third-world and career-transition women along with others to learn a new skill and make womens' voices public by producing multiple copies of their urt.

Women, Inc. Dorchester, Massachusetts

1980 Implements a self-education and pre-vocational program for \$58,090 minority women focusing on social, economic, and political institutions and their relation to individual identity. The project also strengthens basic analytical and writing skills, and prepares students for a vocational program.

APPENDIX

#### Hispanic-Related Grants Awarded by MISIP

Source Project Summaries, 1975-1980

#### UNITED STATES

Bronx Community College, NY

Bronx, New York \$241,500 1977

In order to improve the quality of its chemistry courses, reduce the attrition in chemistry and increase the numbers of students successfully undertaking careers in chemistry and chemistry related fields, the institution proposes: (1) to develop modules for individualized instruction; (2) to prepare teaching materials using a multimedia format reduced to tape and including computer assisted instruction to supplement classroom activities; and (3) to equip ten stations in an existing learning center to handle this system. Specifically, course revisions will be undertaken using these approaches.

East Los Angeles College Monterey Park, California

1977 \$138,600

To decrease the student attrition in science and mathematics courses, the institution has developed a three-year plan for the establishment of a science study center which will provide science media materials, computer assistance and tutoring in support of the department's regular instructional program. It is expected that the p oject will result in decreased student attrition in science courses faid an increased number of students entering and succeeding in the science programs.

#### El Paso Community College,

El Paso, Texas 1975 \$230,000

To assist E' Paso Community College in its efforts to: (1) strengthen the faculty in the natural sciences by the addition of four staff; (2) create a Learning Rescurce Center through the procurement of audio-visual equipment and student carrells; (3) strengthen its laboratory offerings in the sciences through the procurement of essential scientific instructional equipment; and (4) introduce personalized instructional materials in the natural sciences through both the development of modules and procurement of materials appropriate to the needs of its students.

Hertos Community College, CUNY

Brc , New York 1976 \$103,270

1980 \$269,252 To establish a science resource center in order to develop alternate modes of instruction involving the use of audio-tutorial materials, programmed instruction, and computer aided instruction.

LaGuardia Community College, CUNY

Long Island City, N & York

\$150,700 1977 \$265,1 )4 1980

To provide a comprehensive program for students interested in pursuing a career in the sciences and to upgrade its science curricula. The project has as its objectives the strengthening of the basic science curriculum by introducing the following strategies: (1) set up two additional courses in services to include "in laboratory" video monitors for improved access and (3) incorporate computer assisted instruction (CAI) into introductory courses in mathematics, biology, chemistry and physics.

New Mexico Highlands University

Las Vegas, New Mexico

1978 \$175,882

In order to enhance the programs in these disciplines, the institution proposes a three-year plan which includes: (1) strengthening laboratory programs in chemistry, (2) restructuring of course offerings in biology, (3) improvement of course offerings through the development and use of video- and audio-tapes for each of the disciplines and (4) improving the quality of preparation of students in vertebrate and field biology.

Northern New Mexico Community College

Espanola, New Mexico

1980 \$259,200

The proposed project is to strengthen offerings in the basic sciences -- biology, chemistry, mathematics and physics -- through major curricular changes, new design of laboratory courses and by enlarging the library and audio-visual resources.

Our Lady of the Lake University

San Antonio, Texas

1975 \$163,000

The science improvement plan prese and by this institution proposes to strengthen its educational proced. . . nd resources so as to make its programs in natural sciences (b:ology, ...emistry, mathematics) and in the social sciences (economics, political science, psychology, sociology) more appealing and accessible to the minority students who constitute 67% of the Colleges' undergraduate enrollment. The science improvement plan is built on a new competency-based undergraduate curriculum, a new Media Learning Center, and an expansion of computer capabilities. 1979 \$261,571

The main goal of this project is the establishment of basic computer science courses and computer assisted instruction in the natural and social sciences. Specific instructional packages will be developed for teaching biology, chemistry, mathematics, psychology and economics.

Pan American University

Edinburg, Texas 1976 .\$247,091

University will conduct a Minority Institutions Science Improvement Project designed to attract minority students to careers in science. This objective will be accomplished through the development of improved

A CONTRACTOR OF THE PROPERTY O

(Pan American University - continued)

courses in biology, chemistry, mathematics and physical science.

1980 \$236,635

The project proposed is to develop the social science offerings to a point of comparability with other institutions through the following strategies: (1) development of a social science computational facility, (2) development of social science laboratory facilities, and (3) revision of courses to take advantage of the above improvement.

#### PUERTO RICO

Bayamon Central University Bayamon, Puerto Rico

1977 \$117,600

In order to increase the number of students choosing majors in science and to decrease the attrition rate of students in science courses, the institution has proposed a two-year plan of science instructional improvement in biology, chemistry, physics and mathematics. The plan includes: (1) development of a general science course to be required of all first year students, (2) strengthening the laboratory components of science courses through laboratory renovation and equipment acquisition, and (3) enhancing science instruction through use of audio-visual materials.

#### Catholic University of Puerto Rico

1977 \$122,700

In order to reduce the attrition rate in general chemistry courses which affects all natural science majors and to enhance the delivery of instruction to its predominantly Spanish-speaking student body, the Chemistry Department proposes to develop a new instructional system for these courses.

#### Calegio Universitario del Turabo Caguas, Puerto Rico

1977 \$121,000

In order to increase the number of students entering and succeeding in science fields and to better prepare students for careers in science the institution proposes a three year project that focuses on (1) improving mathematics preparation and (2) enriching chemistry laboratory experiences for its students.

#### College of the Sacred Heart

Santurce, Puerto Rico

1976 \$164,530

Accomplishment of a short range goal of making the natural sciences more attractive and responsive to students' needs while simultaneously strengthening the sciences for the accomplishment of a long range goal of training a significant number of persons with scientific and technical skills required by society.

### Inter American University of Puerto Rico

San Juan, Puerto Rico

1978 \$125,000

The goal of this project is to introduce the use of the computer in the teaching of undergraduate mathematics and science.

## Inter American University of Puerto Rico

San German, Puerto Rico

1975 \$313,300

Description not available.

Inter American University of Puerto Rico

San Juan and San German, Puerto Rico

1977 \$129,300

The institution proposes a program of major curriculum change, including development and or enhancement of the laboratory components in its courses in psychology, anthropology, economics and geography.

Guayama Regional College-Inter American University

San Juan, Puerto Rico

1977 \$115,252

To significantly strengthen its resources and expand its natural sciences program by establishing curricula in environmental and industrial chemistry.

Inter American University San German, Puerto Rico

1978 \$110.B18

Designed to upgrade the Department of Natural Sciences at the San German Campus of Inter American University of Puerto Rico. The principal activities of this project consist of the renovation of existing facilities, the construction of new laboratories and the purchase of equipment.

Puerto Rica Junior College Rio Piedras, Puerto Rico

1977 \$67,200

In order to meet increasing student demand for and better prepare students to participate in careers in science and reduce the attrition in science courses, the institution established as priorities (1) the improvement of laboratory equipment and facilities in the physical sciences, (2) the improvement of student mathematical skills, (3) the diversification of course offerings, and (4) major modification in biology (including the laboratory) with the introduction of new instructional techniques including individualized instruction.

#### University of Puerto Rico System Humacao University Collage

1979 \$127,600

In order to prepare students for emerging careers in science, the institution proposes to strengthen and develop curricular materials, courses and laboratory offerings in chemistry and marine biology.

1980 \$268,800

The proposed project focuses, on the introduction of the computer into the institution's science curriculum in the form of basic computer science courses and computer-assisted instruction (CAI). Specific project objectives are to: (1) establish an introductory computer science course for all beginning students, (2) introduce CAI in introductory physics, chemistry, mathematics, biology, and social science, (3) make available to students and faculty, computer resources for problem-solving and simulation in science courses and (4) to maintain a core-group of advanced students and professors trained in computer language programming, system r gramming and computer operation.

. 78

University of Puerto Rico Cayey, Puerto Rico

1977 \$120,400

In order to better prepare students for an increasing variety of science careers, the institution has proposed a two-year plan of science instructional improvement. Specifically, the institution proposes to establish and staff a science autotutorial laboratory and to initiate laboratories in Instrumental Analysis and Bio-chemistry.

University of Puerto Rico

Mayaguez, Puerto Rico

1976 \$229,605

A science improvement plan designed to address the high attrition rate of students enrolled in science between entry into college and graduation. This high rate is believed to be caused in part by poor study habits and weak science background of students upon entering the University and by inadequate laboratory experiences in science courses offered by the University. The plan is designed to provide improvements in vital basic science courses serving the maximum number of students and which are also required courses in several departments. 1975 \$350,000

The grant provides funds to: (1) Improve course offerings in engineering through the development of audio-visual materials and multi media instructional technology; (2) Develop a Learning Resource Center for its students; and (3) Substantially improve the laboratory instructional process through the addition of essential hardware.

University of Puerto Rico

Rio Piedras, Puerto Rico

1975 \$227,300

To develop a curriculum leading to a Bachelor of Science degree with a concentration in Environmental Management which will be realized through the interdisciplinary efforts of faculty from the College of Natural Sciences and the College of Social Sciences.

1976 \$251,513

A major expansion of the use of the University of Puerto Rico computer system in the instruction of undergraduate students in physical sciences and mathematics.

University of the Sacred Heart
Santurce, Puerto Rico

1978 \$250,000

The main goal of this project is the establishment of computer science courses and computer assisted instruction in the undergraduate curriculum.

World University

Hato Rey, Puerto Rico

1979 \$139474

In order to improve basic courses in mathematics, physics, chemistry and biology the institution has proposed a science improve-

The state of the s

(World University - continued)

ment plan which involves strengthening present courses and facelty.

1980 \$134,269

To strengthen its Behavioral Science Division through the establishment of a Psychology Laboratory Program (PLP) and upgrading of faculty members. The PLP will afford the students with the opportunity to establish a reciprocal relationship between experimental psychology and all other psychology fields.

1 (1)

### PUBLIC LAW 96-874---OCT. 2, 1980

94 STAT, 1489

### TITLE X—ESTABLISHMENT OF A NEW TITLE X OF THE HIGHER EDUCATION ACT OF 1965

### FINED FOR THE IMPROVEMENT OF POSTSECOMBARY EDUCATION

SEC. 1001. (a) Title X of the Act is amended by striking out everything preceding part C and inserting in lieu thereof the following

### "TITLE X—FUND FOR THE IMPROVEMENT OF POSTSECONDARY EDUCATION

#### "Part A-Establishment and Operation of Fund

### "AUTHORITATION OF PROGRAM

"SEC. 1001. Subject to the provisions of section 1002, the Secretary is authorized to make grants to, and contracts with, institutions of postsecondary education (including combinations of principal institutions) and other public and private educational inst. In an end agencies (except that no grant shall be made to an encational institution or agency other than a nonprofit institution or agency) to institution or agency other than a nonprofit institution or agency) to improve postsecondary educational opportunities by providing as ance to such educational institutions and agencies for

"(1) encouraging the reform, innovation, and improvement of orisecondary education, and providing equal aducational opporunity for all

"(2) the creation of institutions and programs involving new paths to career and professional training, and new combinations of academic and experiential learning.

"(3) the establishment of institutions and programs based on

the technology of communications;

"(4) the carrying out in postsecondary educational institutions of changes in internal structure and operations designed to clarify institutional priorities and purposes;

"(5) the design and introduction of cost-effective methods of

instruction and operation;
"(6) the introduction of institutional reforms designed to expand individual opportunities for entering and reentering institutions and pursuing programs of study tailored to indi-

"(7) the introduction of reforms in graduate education, in the structure of academic professions, and in the recruitment and retention of faculties: an

"(8) the creation of new institutions and programs for examining and awarding credentials to individuals, and the introduction of reforms in current institutional practices related thereto.

### "COMMUNICATION

"SEC. 1002. No grant shall be made or contract entered into under section 1001 for a project or program with any institution of postsecondary education unless it has been submitted to the appropriate State entity having an agreement under section 1203, and an opportunity has been already entity to submit its comments and commandations to the Secretary.

94 STAT, 1490

## PUBLIC LAW 96-874--OCT. 8, 1980

# "MATIONAL BOARD OF THE FUND FOR THE IMPROVEMENT OF . POSTSECONDARY EDUCATION

Establishment. 20 USC 1125s-1. "SEC. 1003. (a) There is established a National Board of the Fund for the Improvement of Postsecondary Education. The Board shall consist of fifteen members appointed by the Secretary for overlapping three-year terms. A majority of the Board shall constitute a quorum. Any member of the Board who has served for six consecutive years shall thereafter be ineligible for appointment to the Board during a two-year period following the expiration of such sixth year.

Manhambla

"(b) The Scaretary shall designate one of the members as Chairman. A majority of the members of the Board shall be public interest representatives, including students, and a minority shall be educational represents aves. All members selected shall be individuals able to contribute an important perspective on priorities for improvement in postsecondary education and strategies of educational and institutional change.

Deties.

"(c) The Board shall—
"(1) advise the Secretary and the Director of the Fund for the Improvement of Postsecondary Education on priorities for the improvement of postsecondary education and make such recommendations as it may deem appropriate for the improvement of postsecondary education and for the evaluation dissemination, and adaptation of demonstrated improvements in postsecondary educational practice;

"(2) advise the Secretary and the Director of the Fund on the development of programs to be carried out by the Fund and on the selection of projects under consideration for support by the

Fund in its competitions;

"(3) advise the Secretary and the Director of the Fund on the operation of the Fund, including advice on planning documents, guidelines, and procedures for grant competitions prepared by the Fund; and

"(4) meet at the call of the Chairman, except that it shall meet

## TITLE XI—ESTABLISHMENT OF A NEW TITLE XI OF THE HIGHER EDUCATION ACT OF 1965

### PROGRAM AUTHORIES

SEC. 1101. Title XI of the Act is amended to read as follows:

## TITLE XI-URBAN GRANT UNIVERSITY PROGRAM

### "FUIDDIOS AND PURPOSE

"Rxc. 1101. (a) The Congress finds and declares

· 90 USC 11M

"(1) that there exists within the Nation's urban universities an underutilized reservoir of skills, talents, and knowledge applicable toward the amelioration of the multitude of problems that face the Nation's urban centers:

"(2) that the skills, telents, and knowledge of urban universi-ties must be applied in a systematic and sustained manner to make a significant contribution toward the solution of these probleme

"(3) that the application of the skills, talents, and knowledge of urban universities is hindered by the limited funds available to gustain their commitment; and

"(4) that it is the policy of the United States to encourage and facilitate the application of the skills, talents, and knowledge of urban universities toward serving the needs of urban centers of the Nation.

"(b) The Secretary shall carry out programs in accordance with the provisions of this title, for the purpose of aiding urban universities to help find answers to urban problems, and aiding such universities to make their resources more readily and effectively available to the urban communities in which they are located.

### "APPROPRIATIONS AUTHORISES

"SEC. 1102. (a) For the purpose of carrying out the provisions of this title there is authorized to be appropriated \$15,000,000 for fiscal year 1981, \$25,000,000 for fiscal year 1982, \$35,000,000 for fiscal year 1983, \$45,000,000 for fiscal year 1984, and \$55,000,000 for fiscal year 1985.

"(b) In the event of a multiple-year grant to any urban university under this title, the Secretary shall make funds available for such grant from funds appropriated for this title for the fiscal year in which such funds are to be used by the recipient.

### Se CFX Part 735

Minority Institutions Science Improvement Program (MISIP)

AGENCY: Department of Education. ACTION: Final regulations.

SUMMARY: The Secretary leaves regulations to implement the Min-city Institutions Science Improvement Program.

These regulations will allow accredited two- and four-year institutions of higher education whose enrollments are predominantly (more than 50 percent) American Indian; Aleskan Native; Black, not of Hispanic Origin; Hispanic (including persons of Mexican, Puerto Rican, Cuban, and Central or South American origin): Pacific Islander or any combination of these or other disadvantaged ethnic minorities who are underrepresented in science to become eligible to participate in the program. The program provides support to these minority institutions and certain other nonprofit groups to effect long-range improvement in science education at predominantly minority institutions and to increase the flow of underrepresented ethnic minorities into scientific and engineering aurours.

are expected to take effect 45 days after they are transmitted to Congress.

Regulations are usually transmitted to Congress several days before they are published in the Federal Register. The effective date is changed if Congress takes certain adjournments. If you want to know the effective date of these final regulations, call or write the Department of Education contact person.

R PURTNER REFERMATION CONTACT: Dr. Argelia Vales-Rodriguez, Telephone: M) #3-7780.

BUT PLEMENTARY BEFORMATION The authority to administer the Minority Institutions Science Improvement Program (MISIP) is firmly rooted in Congressional action. Prior to its transfer to the Department of Education. MISIP was edministered by the National Science Foundation ander the authority of section 3(a) of the National Science Foundation Act 42 U.S.C. 1862. When the Department . I Education was established, MISIP was specifically transferred to it by Congress. (Section 204 of the Department of Education Organization Act and 20 U.S.C. 3444; S. Rep. No. 96-49, 96th Cong., 1st Sess. 80-81) (1979). S. Rep. No. 96-326, 96th Cong. 1st Sess. 50 (1979). These references incicate that Congress recognized the respose of the program to assist institutions with predominantly minority enrollments and that Congress intended that the Department of Education administer the program in a minner consistent with this purpose.

Finally, section 1303 of the Education Amendments of 1930 specifically amends the General Education Provisions Act to authorize appropriations to carry out the MISIP program during fiscal year 1961. Pub. L. 45-374, £ 1303 (450i)

The objectives of hard are two-fold: (1) to effect long range improvement in science education at predominantly minority institutions, and (4) to increase the flow of underrepresented ethnic minorities into sale and sureers. In institutions lack the extensive financial resources needed to plan for and implement improved programs of science instruction. The students at these institut one represent a large, relatively untapped, reservoir of ecientific telent. In addition, many of these students have suffered the periorive offers of years of disadvantage and interior academic preparation, that have not yet been are dicated by the Civil Rights Act of 1964 and other remedial measures.

For these reasons, students are often party prepared for the rigors of science eduration opportunities at the postsecondary level. With Improved ecience education opportunity these int ...... to redress the

- 1, ~ precentation of certain the scientific and large contr. . . to the Netion's need for trained prof. . 'coals in these fields.

It should also be emphesized that all students that attend predominantly minority institutions—whether or not they belong to a disadvantaged ethnic group currently underrepresented in eclence and engineering—are expected to benefit from the improved educational opportunities that result from this program. In addition, although the purpose of MISIP is to improve these apportunities et predominantly minority institutions, entitles or er than minority institutions are eligible to receive a grant and participate in certain types of projects conducted as part of MISIP.

The provisions of these final regulations are substantially the same as the provisions of the notice of proposed rulemaking (NPRM) published in the Federal Register on November & 1980, 45 FR 73514. Interested persons were given 30 days in which to comment on the NPRM. No comments were received during the comment period which ended December & 1980.

### Assessment of Educational Impact

On November 14, 1980, the Secretary published a notice in the Federal Register of the Department's intent to publish regulations necessary to implement the Education Amendments of 1980. In that notice, the Department kisted the existing regulations affected by the new law and requested comments whether those regulations required information that is already being gathered by or is available from any other agency or authority of the United States. The regulations in this document are based on regulations listed in the November 14 notice. Based on any comments received and the Department's eve review, it has been determined the, the regulations in this document do not require information that is already being gathered by or is evailable from any other agency or authority of the United States.

### Citation of Logal Authority

The reader will find a citation of statutory or other legal authority in perentheses on the line following each substantive provision.

Pre College level" means middle or

escondary school. "Science" means, for the purposes of this program, the biological, engineering. mathematical, physical and social sciences, and the history and philosophy of science; also included are Interdisciplinary fields which are comprised of overlapping areas among two or more sciences.

Underrepresented in science and engineering" means a minority group whose number of scientists and engineers per 10,000 population of that group is substantially below the comparable figure for scientists and engineers who are white and not of Hispanic erigin.

(C USC 1981)

Subpart B-What Kinds of Projects Does the Department of Education Assist Under This Program?

§ 735.10 What binds of projects are supported by this program?

The Secretary awards grants under this program for all or some of the following categories of projects:

(a) institutional projects for implementing a comprehensive science improvement plar as described in

(b) Design projects for developing a long-range science improvement plan as described in § 735.12.

(c) Special projects to support a single activity as des. ibed in \$ 735.13.

(d) Cooperative projects to share facilities and personnel and disseminate information as described in § 735.14. (42 U.S.C. 1962)

§ 735.11 What are institutional projects?

(a) institutional project grants support the implementation of a comprehensive ecience improvement plan, which may include any combination of activities for improving the preparation of minority students for careers in science.

(b) The length of the project period is maximum of 36 months.

(c) Activities that the Secretary may essist under an institutional project include but are not limited to the following:

(1) Faculty development programs; or (2) Development of curriculum

(d) Eligible applicants for institutional projects are minority institutions.

EUUSC 1982 § 735.12 What are decign projecte?

(a) Design project grants assist minority institutions that do not have their own appropriate resources or

personnal to plan and develop longsange science improvement programs.

(b) The length of the project period is a meximum of 12 months.

(c) Activities that the Secretary may essist under a design project include but are not limited to the following:

(1) Development of planning. management, and evaluation systems;

(2) Improvement of institutional sesearch or development offices.

(d) Eligible applicants for design rojects are minority institutions that have not received support under this program in prior years. (42 U.S.C. 1982)

§ 735.13 What are special projects?

(a) Special project grants support a single activity to-

(1) Improve quality training in acience and engineering at minority institutions;
(2) Enhance the minority institutions

general scientific research capabilities; (3) Provide a needed service to a

group of eligible minority institutions; or (4) Provide in-service training for

project directors, scientists, and engineers from eligible minority futitutions.

(b) The length of the project period is a maximum of 24 months.

(c) Activities that the Secretary may assist under a special project include. but are not limited to, the following:

(1) Advanced science seminars; (2) Science faculty workshops;

(3) Faculty training to develop specific science research or education skills;

(4) Research in science education: (5) Programs for visiting scientists: (6) Preparation of file.

e audio-visual materials in science;

(7, Development of learning experiences in science beyond those normally evailable to minority undergraduate students;

(8) Development of pre-college enrichment activities in science; and

(9) Any other activities designed to address specific barriers to the entry of . minorities into science.

(d) Eligible applicants for special rojects of the type listed in paragraphs (a) (1) and (2) of this section are minority institutions. Eligible applicants for special projects of the type listed in paragraphs (a) (3) and (4) of this section are all applicants eligible for assistance under this program.

KI VIC 1987

§ 73E.14 What are ecoperative projects?

(a) Cooperative project grants assist groups of nonprofit secredited colleges and universities with common problems to work together to conduct a science improvement project.

(b) The length of the project period is a maximum of 36 months.

(c) Activities that the Secretary may fund under cooperative projects include. but are not limited to, the following:

(1) Assisting institutions in sharing

facilities and personnel:

(2) Disseminating information about established programs in science and angineering:

(3) Supporting cooperative efforts to atrengthen t'e institutions' science and engineering programs; and

(4) Carrying out a combination of any of the activities in paragraphs (c)(1)-(3) of this section.

(d) Eligible applicants for cooperative projects are groups of nonprofit accredited colleges and universities whose primary fiscal agent is an eligible minority institution as defined in 1 733.5(d). (42 U.S.C. 1802)

Subpart C-How Does One Apply for a

One applies for a grant under the procedures of EDGAR \$\$ 75.100 through

Supplied Des the Secretary Make a Grant?

free on How does the Secretary evaluate an application?

(a) The Secretary evaluates an application on the basis of the criteria in § 735.31.

(b) The Secretary awards up to 100 points for these criteria.

(c) The maximum possible score for each criterion is indicated in parentheses.

(d) For applications of substantially equal quality, the Secretary gives priority to projects that contribute to achie ing balance among projects funded by this program within each of the following categories:

(1) Past history of participation in the program;

(2) Geographic location;

(3) Academic discipline; and

[4] Project type.

§ 735.31 What selection criteria lices the Secretary use?

The Secretary evaluates applications time the following criterie:

(a) Plan of operation. (10 points)

(1) The Secretary reviews each reglication for information that shows quality of the plan of operation for th: --oject

(2, The Secretary looks for on that showsinform

(i) Hig', quality in the design of the

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective; and

(v) Methods of coordination. (See

**EDGAR 34 CFR 75.581)** 

(b) Quality of key personnel. (10 points)

(1) The Secretary reviews each application for information that shows the quality of the key personnel the applicant plans to use on the project.

(2) The Secretary looks for information that shows-

(i) The qualifications of the project director (if one is to be used);

(ii) The qualifications of each of the other key personnel to be used in tha project;

(iii) The time that each person referred to in paragraphs (b)(2) (i) and (ii) of this section plans to commit to the project

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as members of a racial or ethnic minority groups, women, handicapped persons, and the elderly.

(3) To determine the qualifications of a person, the Secretary considers evidence of past experience and training, in fields related to the objectives of the project, as well as other information that the applicant provides.

(c) Budget and cost effectiveness. (5 pointsì

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(d) Evaluation plan. (10 points)

(1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project. (See EDGAR 34, CFR 75.500-Evaluation by the grantee; where applicable)

(2) The Secretary looks for information that show: methods evaluation that are appropriat for the project and, to the extent possible, are objective and produce data that are quantifiable.

(e) Adequacy of resources. (5 points)

(1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows-

(i) The facilities that the applicant plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate (20 U.S.C. 1221(e)-3(a)(1))

(1) Identification of need for the project. (10 points)

(1) The Secretary reviews each application for information that shows the identification of need for the project.

(2) The Secretary looks for information that shows-

(i) An adequate needs assessment:

(ii) An identification of specific necus in science; and

(iii) An involvement of appropriate individuals, especially science faculty, in identifying the institutional needs.

(g) Potential institutional impact of the project. (15 points)

(1) The Secretary reviews each application to determine the extent to which the proposed project gives evidence of potential for enhancing the institution's especity for improving and maintaining quality science education for its minority atudents.

(2) The Secretary looks for information that shows—

 (i) For an institutional or cooperative project, the extent to which both the established science education program(s) and the proposed project will expand or strengthen the established program(s) in relation to the identified necds: or

(ii) For a design project, the extent to which realistic long-range science education improvement plans will be developed with the technical assistance provided under the project; or

(iii) For a special project, the extent to which it addresses needs that have not been adequately addressed by any existing institutional science program or takes a particularly new and exemplant approach that has not been taken by any existing institutional science program.

(h) Institutional commitment to the project (15 points)

(1) The Secretary reviews each application for information that shows that the applicant plans to continue the project activities when funding ceases.

(2) The Secretary looks for information that shows--

Adequate institutional commitment a absorb any after-the-grant burden stated by the project

situated by the project

(ii) Adequate plans for continuation of
project activities when funding ceases:

fiii) Clear evidence of past
settutional commitment to the
sevision of quality science programs
is in minority students; and

(iv) A local review statement signed by the chief executive officer of the estitution endorsing the project and adicating how the project will excelerate the attainment of the autuntional goals in science.

fi) Expected outcomes. (10 points)
(1) The Secretary reviews each
explication to determine the extent to
which minority students will benefit
from the project.

(2) The Secretary looks for aformation that shows

(i) Expected outcomes likely to result to the accomplishment of the program

(h) Educational value for science students; and

(iii) Possibility of long-term benefits to shority students, faculty, or the activation.

Scientific and educational value of
the proposed project. (14 points)

(i) The Secretary reviews each application for information that shows is potential for contributions to science effection.

(2) The Secretary looks for stormation that shows—

(i) The relationship of the proposed project to the present state of science election:

[5] The use or development of elective techniques and approaches in misson education; and

(iii) Potential use of some aspects of the project at other institutions.

Subpart E-What Conditions Must a Grantee Most?

[73.40 What are the restrictions on the type of costs a grant may support?

Finds may not be used for—
[6] Undergraduate scholarships;
[6] Augmenting the salary rate for faulty members pursuing regularly satisfied duties:

(c) Full support of faculty members

and employed by the institutions

(c) Support for a project director or for

members beyond the extent of

uniportion in project activities.

ents no more than fifty ecademic year salaries sy b: ,

(e) Sun - faculty members
express in process of two-months of a

faculty member's current academic year salary for full-time involvement for an 8week period:

(f) Fees and expenses for consultants in excess of the established applicant's

(g) Support for student assistants not involved in project activities or in excess of the approved work-study rates in operation at the institution:

(h) Support of any other co-going.

(i) Staff benefits, if they are treated as an item of indirect cost in the aegotiation of the institution's indirect cost rate; and

(j) Major renovations of existing physical facilities.

(42 U.S.C. 1982) FR Dec 81-488 Fliel 1-48-48: 848 onl MLLBG 0004 488-41-48 and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to the Congress; and

(C) Conduct independent evaluations of programs carried out under this title and publish and distribute the results hereof.

The meeting of the Council is open to he public, and the proposed agenda neludes:

Einority.Institutions Science improvement Program (MISIP); Applications for New Awards for Fiscal fear 1981

AGENCY: Department of Education. ACTION: Application notice for receipt of applications for new awards for fiscal year 1981.

Applications are invited for new awards under the Minority Institutions being the Improvement Program which is administratively part of the Fund for the improvement of Postsecondary Education in the Department of Education.

Authority for this program is contained in the Department of Education Organization Act (20 U.S.C. 164) which provides for the transfer of the Minority Institutions Science improvement Program, established ander the National Science Foundation Act (42 1862), from the National Science Foundation (NSF) to the Education Import.

# Closing Date for -smittel of Applications

-lications for in. Honal, Design and rative Project. and must be faile. and-delivered January 30.

1961. Applications for Special Project Awards must be mailed or handdelivered by March 2, 1981.

## Applications Delivered by Mail

An application sent by mail must be addressed to the Minority Institutions Science Improvement Program, Attention: 84.120, Fund for the Improvement of Postsecondary Education, Department of Education, 400 Maryland Avenue SW., Room 3123, Washington, D.C. 20202.

To establish proof of mailing, an applicant must show one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary.

If an application is sent through the U.S. Postal Service, the Secretary does not accept a private metered postmark or a mail receipt that is not dated by the U.S. Postal Service as proof of mailing.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should specifically request that a dated postmark be affixed by its local post affice.

An applicant is encourged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

### Applications Delivered by Hand

An application that is hand-delivered must be taken to the Minority Institutions Science Improvement Program, Attention: 84.120, Fund for the Improvement of Postsecondary Education, Department of Education, 400 Maryland Avenue SW., Room 3123, Washington, D.C.

The Secretary will accept hand-delivered applications betwen 8:00 a.m., and 4:30 p.m. (Washington, D.C. time) daily, except Seturdays, Sundays, and Federal holidays. Applications for Institutional Design or Cooperative Project Awards that are hand-delivered will not be accepted after 4:30 p.m. on January 30, 1981. Applications for Special Project Awards that are hand-delivered will not be accepted after 4:30 p.m. on March 2, 1981.

### Program Information

The Secretary solicits applications from predominantly minority institutions and certain other eligible institutions which propose to enhance a minority

institution's capacity for developing and maintaining a quality science education program for all of its students and to augment the institution's capability for increasing the flow of underrepresented ethnic minorities into scientific careers.

Support under this program is provided to eligible institutions in four ways: (1) Design grants to minority institutions without formal planning capabilities to provide assistance in developing long-range science improvement plans; (2) grants to individual minority institutions to support the implmentation of comprehensive science improvement plens; (3) grants to nonprofit, accredited colleges and universities to support cooperative efforts designed to strengthen their science and engineering programs; and (4) grants to eligible institutions or organizations in support of special projects designed to implement Program goals.

The Secretary considers making a grant to an eligible institution only if an application has been prepared and submitted according to—

(a) The regulations in Part 34 CFR 735;

(b) The applicable provisions in EDGAR; and

(c) The instructions and forms included in the Guide for Preparation of Proposals for the Minority Institutions Science Improvement Program.

Publication No. ED 0007.

#### Available Funds

Approximately \$4.0 million is estimated to be available for Institutional and Cooperative Project Awards in fiscal year 1961. It is estimated that these funds will support approximately 20 awards. The maximum amount for an Institutional or Cooperative Project Award is \$300,000 for a 36-month period. Approximately \$1.0 million is estimated to be available for Special Project and Design Awards in fiscal year 1981. It is estimated that these funds will support approximately 20 Special Project and Design Project Awards. The maximum amount for a Special Project Award is \$150,000 for a 24-month project period. The maximum amount for a Design Project Award is \$20,000 for a 12-month period.

However, these estimates do not bind the Secretary to a specific number of grants or to the amount of any grant unless the amount is otherwise specified by statute and regulations.

#### Application Forms

Application forms and program information packages may be obtained from Minority Institutions Science Improvement Program, Attention: 84.120, Fund for the Improvement of
