ABSTRACT

This user's guide, the third of four training modules for similar benefits usage, is the result of a project of the University of Michigan Rehabilitation Research Institute in conjunction with the Virginia Department of Rehabilitative Services. (DRS) model program evaluation unit to examine the issue of similar benefits in the state-federal rehabilitation program. The introduction reviews the goals and objectives of the similar benefits project and briefly describes each module. Preceding the text of the volume is a list of frequently asked questions about similar benefits presented in major topic areas. The third volume/contains recommendations and usage examples for additions to the existing Virginia Similar Benefits Directory, a Similar Benefits Checklist, √and a discussion of alternative approaches for similar benefits reporting systems. Two identification lists are also proposed for the Similar Benefits Directory to aid counselors using these materials. In addition, the appendix contains the Virginia DRS Similar Benefits Directory. ACKNOWLEDGEMENTS

Similar Benefits in Rehabilitation: A User's Guide for Counselors and Administrators was conducted for the Virginia Department of Rehabilitative Services (DRS) Program Evaluation Section. The project was part of the Virginia DRS's model evaluation effort sponsored by the program evaluation section of the Rehabilitation Services Administration (RSA). Appreciation is expressed to Bill Brownfield, Charles Weston, and Dale Hanks of the Virginia DRS for their technical leadership and guidance in the conduct of the project. The following DRS personnel were extremely valuable in providing insight and feedback: David Ziskind, Dennis Hankell, Charles Merritt, John Wade, Stephen Webster, and Bob Howe. The assistance of Rod Pelton, Francoise Hall, and James Taylor of RSA is acknowledged. The general assistance and support of The University of Michigan Rehabilitation Research Institute's research and related activities by Nathan Ed Acree, L. Deno Reed, and Richard Melia is also acknowledged.

PREFACE

The UM-RRI was established in 1976, with funding from the National Institute for Handicapped Research, in response to the mandate of the Rehabilitation Act of 1973 that programs and projects be evaluated in the state-federal program. The UM-RRI efforts are directed toward research and related activities to assist states in evaluating management practices and service delivery systems.

The UM-RRI has been working on several long and short range objectives in rehabilitation program evalution to:

- 1. Develop alternative conceptual models that may be used as a framework for comprehensive program evaluation in the state-federal rehabilitation program.
- .2. Conduct research on existing program evaluation instruments to determine their feasibility for current use and to determine their need for additional development and validation
- 3. Identify, design, test, validate, demonstrate, and disseminate program evaluation instruments, techniques, and methodologies that are consistent with conceptual models for comprehensive program evaluation in rehabilitation
- 4. Develop criteria for designing, developing, testing, and validating new and existing program evaluation instruments, techniques, and methodologies that consider measurement of impact, effectiveness, effort, efficiency and output

This investigation into similar benefits in rehabilitation is viewed as part of the UM-RRI's mandate in program evaluation. Feedback about this report is invited.

Ann Arbor June 1981

Ralph M. Crystal

INTRODUCTION

The purpose of this project, undertaken by The University of Michigan Rehabilitation Research Institute (UM-RRI), in conjunction with the Virginia Department of Rehabilitative Services (DRS) model program evaluation unit, was to examine the issue of similar benefits in the state-federal rehabilitation program. The intent of the project was to (a) identify issues related to similar benefits, (b) develop training materials to assist state rehabilitation agency personnel in the use of similar benefits, and (c) develop evaluation procedures to document the impact of similar benefits on the state rehabilitation agency.

The funding for this project was through the Virginia DRS model program evaluation/management information support unit. The project was supported through the task related to the building of new evaluation capacity which can be generalized to other states. The overall model unit project is sponsored by the Rehabilitation Services Administration (RSA). The Model Evaluation Units (MEU's) were initially funded in six states by RSA in October, 1981. The objectives for the MEU's were to (a) develop a program evaluation model in state rehabilitation agencies in which comprehensive program and policy systems are linked by appropriate evaluation data; (b) field test and evaluate the effectiveness of the revised federal program evaluation Standards and the Facilities Information System for state rehabilitation agency management; (c) build new evaluation capacity which can be generalized to other states; and (d) develop linkages for a within-state agency and between-state

agency network for communication, dissemination, and utilization of evaluation topics, with special emphasis on developing and testing within the Model Evaluation Units.

Similar Benefits Project

A major goal of similar benefits is to enable the state rehabilitation agency to maintain the quality and quantity of client services, in spite of financial fluctuations and uncertainties, by obtaining services from sources other than the state rehabilitation agency to meet, in whole or in part, the cost of client services. It is anticipated that through the utilization of similar benefits, additional clients will be served. The overall goal of this project was to develop a conceptual model for utilization of similar benefits within a state rehabilitation agency. The specific objectives of the project were:

- 1. To help insure that resources other than the state rehabilitation agency are utilized to meet the service needs of clients
- 2. To identify similar benefits resources and refine the existing similar benefits directory
- 3. To examine the nature of interagency linkages
- 4. To explore the development of a system for monitoring and tracking clients who are eligible and/or receiving similar benefits
- 5. To develop a training program for counselors and agency administrators in the use of similar benefits
- 6. To implement a similar benefits system in the state rehabilitation agency

To document through the program evaluation process the effectiveness and impact of the similar benefits program on clients, counseloss, administrators, the community, and the rehabilitation agency

As the project progressed, issues were defined and the objectives of the project modified in light of the needs of the Virginia DRS in this area. As a result of the redefinition of issues, the final product (training materials for similar benefit usage) prepared by the UM-RRI has been incorporated into four modules. Each can be used separately or in conjunction with one another. The titles of each are:

Volume I: Background, History, and Issues

Volume II: Definitions, Policies, and Procedures

Volume III: Directory, Checklist, and Reporting Systems

Volume IV: Incentives for Counselors and Administrators

The following is a brief description of each of these sections:

Volume I: Background, History and Issues

This volume provides an introduction to the nature of similar benefits in the state-federal rehabilitation program. The background and legislative history of similar benefits are presented. Issues related to the use of similar benefits are described and discussed.

Volume II: Definition Policies and Procedures

Volume II: Definition, Policies, and Procedures

A working definition of similar benefits is provided in this volume.

Based on federal legislation, state mandates, and other information,

policies and procedures relating to similar benefits are described.

Volume III: Directory, Checklist, and Reporting Systems

This volume contains directories, checklists, and reporting systems for use in the similar benefits program. Many of these have been revised

from existing Virginia DRS documents. Explanations for each, with usage examples, are provided.

Volume IV: Incentives for Counselors and Administrators

This final volume discusses utilization incentive issues. Procedures for evaluation and monitoring, along with the description of the role of counselors and administrators in the area of similar benefits are also presented.

FREQUENTLY ASKED QUESTIONS ABOUT SIMILAR BENEFITS

The following are questions frequently asked about similar benefits. The questions are presented in major topic areas. They are not listed a according to any priority or degree of improtance. Volume and page numbers are provided for readers interested in further discussion on

SIMTLAR BENEFITS

DIRECTORY, CHECKLIST, "AND REPORTING SYSTEMS

This Volume of The University of Michigan Rehabilitation Research
Institute's materials on similar benefits includes recommendations for
additions to the existing Virginia Similar Benefits Directory, a

Similar Benefits Checklist, and a discussion of alternative approaches
for similar benefit, reporting systems. Extra copies of all figures are
contained at the end of this volume.

Similar Benefit Directory Identification Lists

For reference purposes, a copy of the Virginia DRS Similar Benefits
Director (SBD) is in Appendix A of this Volume. The UM-RRI has developed
two additional forms for use with the SBD. These are presented in this
section. These forms were developed to help counselors identify similar
benefits for which their clients may be eligible. The Similar Benefits
Directory Identification Lists (SBDIL) facilitate the identification of
potential similar benefits available to clients based on type of service
(please refer to Figure 1) and by client eligibility (please refer to
Figure 2). The SBDIL, for Type of Service, helps the counselor to
identify potential similar benefit resources by category of rehabilitation

ERIC

Similar Benefits by Client Eligibility

19

20

service. For example, a counselor who wants to know what similar benefit resources are available for training would look under that column. The potential similar benefit resources for training services include:

Insurance, Title XX, Veterans Administration, Workers' Compensation,
Welfare (Public Assistance), National Association for Retarded Citizens,
and CETA. The page numbers listed refer to the page in the Similar Benefits Directory on which the similar benefit is described.

The SBDIL for Client Eligibility helps the counselor identify potential similar benefits by factors which may characterize different individuals. For example, a client with a low income may be eligible for services from Medicaid, state and local hospitalization, Hill-Burton Uncompensated Care, Title XX, Welfare, National Association for Retarded Citizens, local health department clinics, CETA, and Supplemental Security Income.

Similar Benefits Checklist

The Similar Benefits Checklist is a form developed by the UM-RRI for counselors to use at the time of intake or when the Individualized Written Rehabilitation Plan (IWRP) is completed. The purpose of this form is to enable counselors to quickly identify potential similar benefit resources for their clients. The Similar Benefits Checklist can be used in conjunction with the Similar Benefits Directory Identification Lists previously described.

The Checklist (please refer to Figure 3) is comprised of a list of rehabilitation services and potential similar benefit resources that provide a particular rehabilitation service. Thus, the similar benefits

6

available for Maintenance services are SSDI, SSI, Veterans Administration, local mental health clinics, insurance, Title XX, and Welfare.

To use this checklist, counselors should either check or cross out the similar benefit resources they are going to pursue for their clients.

The following case history will provide an example as to how the checklist may be used.

John Doe, a 35-year-old man, married with three children, was in a car accident resulting in an above-the-knee amputation ten or eleven inches below the hip joint. He has not been able to be fitted with a prosthesis because of complications with the stump healing. He has been unemployed for the last year, and his family's resources have been drastically depleted. Previous employment as a steamfitter does not appear feasible for the client to return to because of ladder climbing, prolonged standing, and extensive walking (occasionally on rough surfaces) required on the job. The client has expressed an interest in accounting.

Based upon this case history, a counselor may decide the client is in need of the following services: vocational evaluation to determine the client's interest and skills in different occupational categories; physical restoration for fitting of the prosthesis; training, if needed for a new occupation; and maintenance services. The case history indicates that the client's income may be low enough for him to qualify for CETA or Welfare services. Since the major disability is the result of a car accident, the client may be eligible for services paid for by the insurance company. The client is a veteran which makes him eligible for Veterans Administration services. Please refer to Figure 4

for an example of how the Similar Benefit's Checklist would look filled out for this individual.

Reporting Systems

The UM-RRI has prepared several reporting systems for documenting similar benefit utilization. The forms contained in this section can be used as internal management tools to indicate how effective the similar benefits program is in meeting established agency goals. For further elaboration on the importance of documenting similar benefit utilization, please refer to Similar Benefits in Rehabilitation, Volume IV: Incentives for Counselors and Administrators.

The UM-RRI is proposing the following revisions of the similar benefit reporting format in Virginia:

1. Revision of the Case Cost Report VR-97. The VR-97 is a monthly printout for providing information about funds authorized for services, funds cancelled, paid, or still outstanding. The VR-97 assists counselors in managing funds allotted to their caseload. The UM-RRI recommends that similar benefit information be added to the VR-97. This will enable counselors to monitor and track clients receiving similar benefits. Two options will be presented to collect the data for the VR-97 revision.

The purpose for this recommendation is to provide counselors with monthly information concerning clients who are a receiving similar benefit services, the type of service being received, and the similar benefit agency or resource providing the service. This recommendation will provide counselors with a written record of similar benefits received and the amount of funds sayed by similar benefit trilization. This information will be used in filling out the Similar Benefit Record RS-4e(2) at closure

- Revision of the RS-4e(2) to report the actual dollar value of similar benefits, instead of the estimated dollar value.

 This will provide the VR agency with an accurate dollar amount of agency funds saved through similar benefit utilization. In addition, this approach provides a standardized base for comparison of monies saved through use of similar benefits.
- 3. Revision of the similar benefit report format to utilize the Individualized Written Rehabilitation Plan (IWRP) as the primary source for similar benefit data collection.

Case Cost Report VR-97

The VR-97 Case Cost Report (please refer to Figure 5), with a few modifications, can be used by counselors to monitor and track clients receiving similar benefit services. The client's name (column 1) and case number (column 2) would appear in the same position as they do now. The first change would be in the authorization number (column 3). Instead of an authorization number, the letters SB would identify that service as being obtained through a similar benefit agency. Vendor number and name (columns 4a and 4b) and service code (column 5) would remain the same. The date (column 6) is in the same position and should reflect the date that the similar benefit service goes into

29 igure 5: Revisions to Case Cost Report - VR-97

 30°

effect. Voucher number (column 7) remains the same. The description (column 8) should indicate the name of the service, the similar benefit agency program identification number, and the name of the similar benefit agency. Agency fund (column 9) would remain blank unless the VR agency is sharing the cost with the similar benefit resource. If the VR agency is sharing the cost, then column 9 would reflect the agency funds used to pay for the VR portion of the service. Amount (column 10) should only be used when the VR agency is sharing the cost with the similar benefit agency. The dollar amount of agency funds used to pay the VR portion of the service would be recorded in column 10. report the dollar value of the similar benefit, a new column needs to be added. Column 11, Similar Benefit Amount, would report the amount of money the rehabilitation agency would have spent on that service. Thus, the dollar value reflects the amount of VR Tands saved through similar benefit utilization. (See Figure 5 for an example of how the similar benefit information would look on the revised VR-97.)

The information for the Case Cost Report WR-97 is obtained on a monthly basis from authorizations, invoices, and cancellations. To obtain information concerning similar benefits, the UM-RRI proposes two options. The first option is the development of a new form to be completed by the counselor at the time the similar benefit is arranged. This form would be sent to the state VR office along with the authorizations, invoices, and cancellations (please refer to Figure 6). The section option is to modify the existing authorization form (RS-6) (please refer to Figure 7). The second option requires more training in order to be properly completed.

OPTION 1 (Figure 6)

Instructions for completing the Report of Similar Benefit Form is as follows:

- Left top of form

Case Number------Record case number of client as shown on current VR-1 card.

Similar Benefit Resource---Record full name and mailing address of agency or resource that is providing the funding and/or service for the client.

- Right top of form

Date-----Record the date on which the similar benefit is arranged.

Program Identification
Number------Record the similar benefit agency/
resource program identification
number.

- Left middle of form

Client------Record name of client as shown on current VR-1 card

Address-----Record full mailing address of client.

Caseload Number-----Enter the counselor's caseload number as it is on Master List, VR-99.

- Right middle of form

Effective Date------Record the date on which the service is to begin.

Status------Record the status that the client will enter when the authorized service is provided. (This will not change the status of the client on the Master List.)

Case Service Code--------Record the appropriate code number for service to be provided.

Cost of Service----------Record the actual amount of funds the state agency would have spent if VR provided the service. (Please refer to Figure 8 for an example of a completed form. The information on the completed form corresponds to the example on the VR-97, Figure 5.)

OPTION 2 (Figure 7)

Instructions for completing a revised authorization of services (RS-6) are as follows:

- Left top of form

Client------Record name of client as shown on current VR-1 card.

Address------Record full mailing address of client.

Caseload Number-----Enter the counselor's caseload number as it is on the Master List, VR-99.

- Middle top of form

Authorization Number-----Record SB to indicate this service is being provided by a similar benefit resource.

- Right top of form

Date------Record the date on which the similar benefit is arranged.

Similar Benefit Record - RS-4e(2)

The UM-RRI recommends revision of the VR-4e(2) to report the actual VR dollar value for each similar benefit. The purpose for using similar benefits is to save VR agency funds. Thus, reporting the actual cost of the similar benefit will provide an accurate dollar figure regarding the amount of money VR saved through similar benefit utilization.

The only recommended change to the RS-4e(2) form is the heading for reporting the dollar value of the similar benefit. (Please refer to Figure 10 for the suggested change.)

In filling out this form, counselors sould report the actual dollar value that the agency would have spent if VR provided the service. If the VR agency has a range of cost for a specific service, or if the counselor is unable to determine the actual cost, the counselor could report an average VR dollar cost for the service. The agency could establish a scale to reflect costs for various services.

Individual Written Rehabilitation Plan-

The Individualized Written Rehabilitation Plan (IWRP) contains the formalized program of services to be provided to the client: It is developed jointly by the counselor and the client. The IWRP includes information about the vocational goal and the justification of that goal; intermediate objectives with a time frame for this achievement; dates and methods to be used for evaluation; services to be provided (including the dates services are to be provided and the vendor(s) to be used); estimated cost of each service and sponsor of the cost; anticipated date for completion of the program; and arrangements made for coordination of effort between the counselor, sponsors, vendors, and other involved persons

RS-4e(2). (Rev. 2/78)

-	·

or agencies (please refer to Figure 11 for an example of an IWRP).

Amendments are made to the IWRP when a new service is scheduled, a previously scheduled service is deleted, or a current service is extneded. When a new service is added to the program, the service, vendor, initiation date, duration, sponsor, and cost are added to the IWRP (VR-5) following the last service entry. Two copies are made. One copy of the revised IWRP is sent to the state VR office and the other to the client. The reason for the addition of the service is recorded on the Continuation Sheet (VR-4-0). If a service not involving VR agency funds is deleted, the reason for the deletion is recorded on the Continuation Sheet (VR-4-0).

With minor modifications to the current data collection procudures, the IWRP can be used to provide an estimate figure of projected similar benefit usage. Two additional columns would be added to the second page of the IWRP (VR-5). The first column would be labeled Similar Benefits (SB) and would be checked by the counselor if a service is being provided by a similar benefit resource. The second additional column would be labeled Program Identification Number (PIN). This column would report the similar benefit agency/resource identification number. (Please refer to Figure 11 for an example of placement of the two add ional columns.)

Similar benefit information would be collected at the same time the other parts of the IWRP are keypunched. Data on similar benefits, using the IWRP, would provide information about projected similar benefit utilization and demonstrate that the counselor has identified potential similar benefit resources. This would aid in case management. However, using the IWRP as the sole source of data concerning similar benefit utilization does have drawbacks. First, the IWRP would only record planned services

from status 12 to case closure. All previous similar benefits obtained and used before status 12 would not be included. Second, the similar benefit data include only estamated figures, and many of those services may be provided some time after completion of the IWRP.

On the plus side, the information provided by the IWRP would only provide data concerning the major types of similar benefits considered and the estimated value of those services. As a case management supervisory and evaluation tool, these changes to the IWRP would serve several useful purposes.

Summary

This volume was devoted to recommendations to modify existing forms to reflect similar benefit utilization. Two identification lists were proposed for the Similar Benefits Directory. These should aid counselors using the directory. A checklist was presented to use with the identification lists. Revisions to the VR-97, RS-4e(2), and IWRP were also presented. The recommendations should facilitate documentation of similar benefit usage.

Appendix A

Vírginia DRS Similar Benefits

Directory

SIMILAR BENEFITS DIRECTORY

PREPARED BY

THE VIRGINIA DEPARTMENT OF REHABILITATIVE SERVICES

SPECIAL PROJECTS DIVISION

REVISED: OCTOBER, 1979

This is a statewide directory of frequently used Similar Benefits which includes programs, general eligibility criteria, services, and the name of a contact person. The benefits (services) in this directory are comparable to those that are or can be offered by DRS.

The Department is mandated to use Similar Benefits from other resources prior to using RS funds. The Similar Benefits listed in this Directory are primarily offered on a statewide basis. It is not feasible for the Department to develop a directory of all Similar Benefits offered at the local level. However, please become aware of and use all local Similar Benefits that would support the clients 'rehabilitation program.

The program eligibility criteria found in this directory are not allinclusive. Many services have eligibility waivers, exceptions, and restrictions based on certain given conditions; and the counselor should contact the appropriate liaison person to discover those given conditions.
