ABSTRACT

This brief document, produced by the Alaska
Department of Education, presents criteria designed to be used by
school administrators, professional staff and community
representatives to assess mathematics programs and provide a basis
for establishing goals in teaching mathematics. Criteria cover
staffing, leadership, professional development, diagnosing and
describing, scope and sequence, resources, program, and program
evaluation. Additional possible uses for the criteria include: (1)
validation of exemplary programs and promising practices; (2)
self-appraisal by building district, or community level; (3)
development of long range goals; (4) planning for staff development,
inservice, and training activities; and (5) disseminating information
and improving public relations. (MP)

Mathematics

Criteria for Excellence MATHEMATICS

These criteria were designed to be used by school administrators, professional staff and community representatives to assess mathematics programs and to provide a basis for establishing goals in teaching mathematics. Other possible uses for information generated by these criteria include:

- Self-appraisal (by building, district, community level)
 - "Development of long range goals
 - Planning for staff development, inservice and training activities
 - Disseminating information and improving public relations.

CRITERIA OF EXCELLENCE FOR MATHEMATICS

STAFFING

1.	Classroom	Teachers

· A .	Are all math teachers graduates of an approved Teacher Education program, and do they possess Type A Alaska Teachers Certificates	ı :?		· · .		
•	program, and do they possess Typo 11 11 assure Todos of Colonial C	•	Yes	į	'No	
B.	Do all elementary teachers have a minimum of nine semester hour	·s	· •.			
مر	in mathematics for elementary teachers including a course in methods of teaching elementary math?	. 1	, × ²	3	4 '	5 .
c.	Do all secondary math teachers have a minimum of a college:minor in mathematics for secondary wachers including a course in method		,	, , 43	۶ ۱	,
.,` ,	of teaching secondary math?	• I	2	~3	4	٠ ,
Par	aprofessionals and Volunteers	١.	-		•	
A;	Is there an organized program of recruitment of paraprofessionals and volunteers?)· 1	2 .	3	.4,	5.
В.	Is an appropriate training program provided for those assisting in math instruction, including training in:	- 1	2'	3`	4	5
:	1. Instructional techniques appropriate to the duties of the paraprofessional or volunteer?	v	,			•
	2. Record keeping?	•	•	:		
•	3. Administrative framework?				′	
، ر	4. Physical plant?	,	•		-	·
سبهم	5. Materials?	}			J	•
	6. Competencies being developed at each level?				v, =	
	7. Operation of equipment?	•	•			
Č.	Is there a continuing inservice based on assessed needs?	. 1	2 ·	3	4	5
EADE	RSHIP *	•			•	` \ 1 90
3. Ha	s a qualified individual(s) been identified-and-given the authority,	- .	•			•
					**	

- responsibility and time to develop and coordinate the mathematics program as follows:
 - A. Does the coordinator understand the components of the total mathematics program and is he/she sensitive to the needs of students and teachers?

Rating Scale:

(1) not started (2) started/little progress (3) some progress (4) almost achieved (5) achieved

•	B.	Does the coordinator provide the leadership and resources to foster the development, review and updating of an excellent mathematics program?	1	, ,2	. 3	4	5 `
	C.	Does the coordinator hire well qualified personnel, or recommend for hiring, if not in a hiring position?	, 1	2	.3 \	٠ 4	5.
-	D.	Does the coordinator insist on inservice teacher education in math?	į i	2	3	4	5
	E. ·	Does the coordinator demonstrate a commitment to the mathematic program by presenting a strong case for budgetary support to the school board, the central administration, and the community?	es . Î	.2	• 3	4	5
	F.	Does the coordinator provide encouragement and resources for teachers to attend professional meetings?	1,	2.	3	4	5
PRO	FE:	SSIONAL DEVELOPMENT	•		`	·	
4.	Do	those involved in the teaching of mathematics receive continuing ervice education in the application of mathematical skills as follows:		•		· .	•
ر *	À,	Are inservice programs based on the ongoing assessment of program needs in mathematics instruction?	. 1	2	·*3	4	2 5
·	В.	Are provisions made for participants to be involved in professional development activities?	1	2	3	· 4	5
•		OSING AND PRESCRIBING	•		· 5	Ŋ	
5.		an ongoing comprehensive system of evaluation designed to include:	•	2	_	4	e
		Proficiency evaluation for each student upon entry?	1	2	3	4	
1	B.	Ongoing assessment of skills?	. 1	2	3 .	4.	. 5
	C.	Assessment of degree to which local goals have been met?	' 1	·2	3	- 4	5
`6.	Ha	ve personalized programs.been developed to meet identified needs?	1	2	3	4	5.
. 7.	Is pe	the learner informed of progress, and does learner help to plan rsonal goals and objectives?	7.1	2	3	4	5
8.	In	addition to the regular program, has provision been made for:	•	;		,	
,	A.	Gifted and talented students?	. 1	2	. 3	4	5
	В.	Remediation of students?	;1	2	3	4	5
	C.	Special interests of students?	1	2	3	4	5

Rating Scale:
(1) not started (2) started/little progress (3) some progress (4) almost achieved (5) achieved

SCO	PÉ AND SEQUENCE				_	-
9.	Is the mathematics program developmental, based on a scope and sequence of skills K-12 as follows:			2	•	`
* ***.	A. Scope-and sequence of skills have been adopted and are used in instruction and evaluation?	1 .	2	3.	4	5
الميد ي	B. Horizontal and vertical articulation procedures have been established and are being followed?	1	2	3	41.	. 5
RES	OURCES		,	÷	•	
10.	Are resource materials and activities available and chosen in accordance with the competency of each student?	1 -	2	3	4	
11.,	Is there a continual review and inspection of new materials?	1	2.	3	4	5
12.	Is ordering of materials carefully coordinated to meet program objectives?	1	2	3 .	4	.4
°13.	Is a resource materials center accessible to users?	1	2	3 ्	4	
14.	'Does each center have a collection which contains current publications relating to mathematics education?	1	2	3 ·	4	
15.	Are written guides provided the teachers for effective use of resources?	1	2	3	4	
16.	Are services of specialized personnel available as an integral part of the mathematics program?	1	2 °	3	4	4
PRO	OGRAM •	•	٠, .	•		
	Do some components of the mathematics program include development of: Algebraic concepts? Computer and calculator awareness? Development of mathematics? Geometric concepts? Graphs, making and reading? Measurement skills? Metric system awareness? Number theory? Numeration system? Operations involving: Decimals? Fractions? Integers?	Y	es'.	/	No	
	Whole numbers? Place value concepts? Probability and statistics? Ratio, proportions, percents? Reading mathematics: Comprehension? Directions? Word problems? Reasoning: Logic? Problem-solving?					- · · - · · ·

Recreational math?
