DESCRIPTORS Boards of Education; *Educational Research; Educational Researchers; Financial Support; *Information Dissemination; Instructional Improvement; Private Agencies; *Research and Development Centers; *Research and Instruction Units; State Departments of Education

ABSTRACT

This directory lists the names, addresses, and telephone numbers of 2,418 organizations and organizational units in the United States that perform research activities related to education. The data were collected through the American Registry of Research and Research-Related Organizations in Education project (ARROE). If provided by an organization, additional information is included: (1) position of person to contact; (2) information about the organization's aims and purposes; (3) substantive foci of its research activities; (4) research staffing and professional staff specialties; (5) research funding, sources of support, and application of funds by research function and educational level; (6) means used to disseminate the results of the work; and (7) the availability of publications. The directory includes 684 local, state, and intermediate government units, 1,259 postsecondary education units, and 475 private organizations. Organizations are listed alphabetically by state. Two indexes are provided: Index I lists organizations by 63 substantive areas of work; Index II lists organizations by five educational levels to which their work is directed. (JD)

This project has been supported with federal funds from the National Institute of Education, Department of Education, under Contract No. 400-80-0103. The contents of this publication do not necessarily reflect the views or policies of the Department of Education and the National Institute of Education, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government or the Far West Laboratory.

FOREWORD

The Educational Dissemination Studies Program (EDSP) at the Far West Laboratory for Educational Research and Development collects and publishes qualitative and quantitative information concerning the status, trends, agencies, programs, capabilities, needs, products, services, and accomplishments in the field of educational dissemination and school improvement throughout the United States but especially in the Far West Laboratory region. Responding to a Far West Laboratory Board of Directors request to "map the educational problems and resources of the region," we contacted Rolf Lehming, Senior Associate in the Research and Educational Practice Unit of the National Institute of Education, to inquire about the availability of the data on agencies performing educational research and development that was collected by the American Registry of Research and Research-Related Organizations in Education (ARROE) project. When we discovered that the ARROE data were available only on computer tape files, we offered to publish the data as a printed directory if Rolf Lehming would convert the tape files to camera-ready copy. The extraordinary difficulty of this task will be appreciated fully only by those familiar with the details of the ARROE tape files. Rolf Lehming accepted the challenge and produced not only a complete directory but two indexes that will enhance its usefulness. We thank him, the National Institute of Education, and the many other agencies and persons who helped to create ARROE. EDSP is pleased to make this directory available to others.

Paul D. Hood, Director
Educational Dissemination Studies Program

OVERVIEW

This Directory of Research Organizations in Education is based upon the results of a survey conducted by the Bureau of Social Science Research for the National Institute of Education. The survey attempted to undertake the first census of organizations performing research activities related to education, including research, development, dissemination, evaluation or policy studies. The full survey report, entitled ARROE -- American Registry of Research and Research-Related Organizations in Education, by Joanne Frankel, Laure Sharp and Albert Biderman, is available through the Education Resources Information Center (ERIC). The report discusses the study's aims, methods, findings, and recommendations and contains copies of the survey instruments. A fully documented data tape containing all public survey items may be obtained for a processing fee from the Far West Laboratory/EDSP.

The Directory of Research Organizations in Education lists the names, addresses and telephone numbers of 2,418 organizations and organizational units in the United States that perform research activities related to education. If provided by a responding organization, the following are included as well: A designated contact position; information about the organization's aims and purposes; substantive foci of its research activities; research staffing and professional staff specialties; research funding, sources of support, and application of funds by research function and educational level; means used to disseminate the results of the work; and the availability of publications.

The Directory includes 684 local, state and intermediate governmental units, mostly but not exclusively bodies whose primary mission is education -- school districts, intermediate service agencies, state education agencies; 1,259 postsecondary education units; and 475 private for-profit and nonprofit organizations. Federal agencies conducting in-house research and non-United States institutions are not included.

Organizations are listed alphabetically by state. Within each state, they are further identified by the state code -- its zip code designation -- and numbered consecutively. Thus, AL1 is the first organization listed for Alabama, TX50 the fiftieth for Texas. Organizational units of larger entities, for example the institutional research office of a college, a university center, or a school district's research and evaluation office, have unique identification numbers but are listed under the main heading of the host organization. Multiple subunits are listed alphabetically under the main heading.

Two indexes are provided. Index I lists organizations by sixty-three substantive areas or work; Index II, by five educational levels to which their work is directed. In the indexes, organizations are identified by state code and identification number. Entries in Index I are hierarchical. Major categories are: (1) Administration, Planning, Policy; (2) Curriculum Development and Related; (3) Instruction, Teaching, Training; (4) Guidance and Counseling; (5) Psychological Aspects of Education; and (6) Social Aspects of Education. Under the main headings appear varying numbers of subcategories and, for Curriculum and Instruction, second-level subcategories. An entry in any subcategory results in the organization's being listed under any higher-order entry as well. For Index II, the headings are: (1) Preprimary; (2) Elementary; (3) Secondary; (4) Postsecondary; and (5) Adult, Continuing and Career Education.

The Directory's organization by state, together with its indexes, permits flexible use of this resource. A reader requiring an overview of organizations and their activities in a given state or region can scan the pertinent listings. Someone interested in a particular type of activity can first use the topical index to locate organizations active in the topic area in question, then narrow the search by selecting only organizations in the state or states of interest, active in one or more education levels, or a combination of both. Since the indexes were generated from precoded questionnaire items that were not filled in by all organizations, skimming of names, purpose descriptions, and other available items should accompany use of the indexes for best search results.

Like all reference works of its kind, especially in view of its later-than-expected publication date, this Directory will contain some out-of-date entries, reflecting changes in organizational mission and work, name, location, etc. On the other hand, the volume contains a breadth of information unavailable from any other source. The reader is reminded to treat the information items presented here, particularly data on funding and staff, as broad indicators rather than precise depictions of an organization's current status and work. When employed in this manner, the Directory promises to retain its utility for some time to come.

ACKNOWLEDGEMENTS

The information contained in this Directory derives from a survey conducted by the Bureau of Social Science Research under the direction of Laure Sharp and Albert Biderman, with the assistance of Joanne Frankel and the Bureau's able survey staff. The survey team's exceptional expertise contributed to a highly successful effort. The overall design for the survey project, developed by the editor, benefited greatly from the support of Ward Mason, head of the National Institute of Education unit that commissioned the work.

Survey staff were assisted by advisors representing a diversity of interests and perspectives: practicing educators, education researchers and scholars of research organizations and research management. Their many valuable contributions defy individual acknowledgement; thus, advisors are listed here as a group, with the names of the organizations that had designated them.

Clark Abt (Council for Applied Social Research); Milton Bins (The Council of Great City Schools); Oliver Bown (R&D Center for Teacher Education); Ronald Corwin (American Sociological Association); Ann Covill (The Council of Chief State School Officers); David Darland (National Education Association); John Herzog (Council on Anthropology and Education); Jack Hughes (American Council on Education); James Kirkpatrick (American Association of School Administrators); John Logsdon (American Association for the Advancement of Science); Harriet Lundgaard (Educational Media Council); Christine McGuire (American Psychiatric Association); Bernard McKenna (National Education Association); James Mecklenburger (National School Boards Association); Harold Orlans (Society for Social Studies of Science); Ellis Page (American Educational Research Association); Marilyn Rauth (American Federation of Teachers); William Russell (American Educational Research Association); Joseph Scandura (American Psychological Association); Richard Schutz (American Educational Research Association); William Wallace (Operations Research Society of America); and Joanna Williams (American Psychological Association). Much valuable assistance was rendered by members of the Committee on Evaluation and Information Systems of the Council of Chief State School Officers: John Allan; Donald Anderson; and Stephen Daeschner.

Without the interest and support of Paul Hood, there might be no Directory of Research Organizations in Education.

CA154 STANFORD UNIVERSITY
INSTITUTE FOR RESEARCH ON
EDUCATIONAL FINANCE AND
GOVERNANCE
Stanford CA 94305

Tel: 415-497-0791
Contact: Director

Purpose: The Center's mission focuses on the origins, implementation, and consequences of different finance and governance arrangements

in the educational sector. Work includes basic and applied research on the fiscal, political, legal and organizational processes of elementary, secondary and postsecondary education in the public and private sectors. Equity and efficiency implications of various finance and governance arrangements are examined through programs on categorical grants in education, alternative structures of governance, and law and education. The Center provides information to a wide audience of federal, state and local practitioners and policymakers, on topics that include the financing of special education, the impacts of tax and expenditure limitations on educational services, the consolidation of federal education grants, bilingual education programs, tuition tax credits, and others.

CENTER FOR RESEARCH IN
MANAGEMENT SCIENCE
Berkeley CA 94720

Tel: 415-642-4041

Contact: Center Chair

Purpose: The Center serves faculty
members actively engaged in multi-
disciplinary research problems in
management science and related sub-
jects. Graduate students work with
faculty members in the research ac-
tivities, effort being made to re-
late each student's work to the
areas in which the student is espe-
cially interested. The research
encompasses both a substantive in-
terest in the structure, operation,
and decision processes of economic
organizations and an interest in the
development and application of math-
ematical and quantitative methodolo-
gies to the study of these types of
organizations.

Purpose: Since its founding, AIR has completed more than 1,100 projects in the behavioral and social sciences. AIR's approach to applied research entails the precise definition of desired end-states and of the barriers to their achievement, the formulation of trial solutions that may bring about the desired goals, and the testing and documentation of the effectiveness of these solutions. While the applications of this methodology have been many and diverse, they have had the common purpose of improving the quality of life of all individuals. To better achieve this goal, AIR is channeling an increasing amount of effort into the development of an effective technology for determining and managing the factors that affect life-quality in important social areas.

Purpose: The objectiveness of the PTA
 are: 1) to promote the welfare of
 children and youth in home, school,
 community and place of worship; 2)
 to raise the standards of home life;
 3) to secure adequate laws for the
 care and protection of children and
 youth; 4) to bring into closer rela-
 tion the home and the school, that
 parents and teachers may cooperate
 intelligently in the education of
 children and youth; 5) to develop
 between educators and the general
 public such united efforts as will
 secure for all children and youth
 the highest advantages in physical,
 mental, social, and spiritual educa-
 tion. This is done through operating
 a Washington, DC satellite office to
 bring the national PTA closer to the
 Federal government; a program focus-
 ing on TV violence; and parent
 education and collective bargaining
 programs.

Purpose: The Plato system is a unique, interactive computer-based system developed in the Computer-Based Education Research Laboratory (CERL) at the University of Illinois in Champaign-Urbana. The purpose of the CERL research has been to produce a cost-effective computer-based educational system with the power and flexibility necessary for provision of high quality interaction. To achieve this end, impor-

tant innovations in display technology, terminal design, communication hardware, system software and course ware development have been required. The result of many years of research and field testing is, today, not only an advanced and sophisticated automated educational system, but also a national computer-based information network.

Purpose: The School of Social Work has the overall professional objective of preparing practitioners who are competent to assist individuals, groups and communities in obtaining and maintaining, through appropriate social relationships, adequate standards of health, welfare and

security. To do this, the School provides an educational program that helps the student develop a professional philosophy and a capacity for leadership, as well as acquire knowledge, skills and attitudes in the important areas of: forces shaping public policy, social welfare organizations and the social services they provide; human growth and behavior; and methods and processes comprising the practice of social work.

Contact: Executive Director

Purpose: RBS seeks to apply the results of educational research and development in improving elementary and secondary schools in its region. It works at the state and intermediate levels to provide information and training in the design and implementation of state initiated school improvement programs, assisted by the Regional Exchange program. It works with local schools to build staff skills needed in carrying out improvement programs. In basic skills, the emphasis is on turning research into practical procedures for increasing student achievement. Schools and communities are given assistance in developing their capabilities to help young people decide about careers. Field studies contribute to an understanding of how schools change and can be helped to improve, and assistance is available to agencies desiring to assess the effects of their programs.

Tel: 608-263-4200

Contact: Director

Purpose: The Center's earlier work on individual psychological differences and corresponding individualized-teaching approaches has been redefined to focus on student diversity and the implications it holds for schooling. Research programs deal with differences in: learning and development; student responses to diverse classroom processes and teaching techniques; student differences that require school management and resource allocation decisions to meet the needs of various groups; and student differences that require mandated specialized services. The Center seeks to locate those differences among students that are most important to education, and to explain how local schools can most effectively address those differences.
