IDENTIFIERS ERIC Clearinghouse on Adult Career Vocational Educ

ABSTRACT

This volume consists of resumes of vocational and technical education curriculum products that were selected by the ERIC Clearinghouse on Adult, Career, and Vocational Education (ERIC/ACVE) for inclusion in the July 1981 through June 1982 issues of "Resources in Education." Among the major types of documents abstracted are curriculum guides, research and technical reports, administrator guides, dissertations and theses, conference reports, literature reviews, state-of-the-art papers, journals, legal and regulatory materials, statistical data, position papers, essays, program descriptions, feasibility studies, bibliographies, directories, conference papers, and tests. Each resume contains an ERIC accession number, an author and title listing, information concerning the time and place of publication, a publication type classification code, information concerning the availability of the document, descriptors, identifiers, and an abstract. Three indexes--a subject index, an author index, and an institution index--are provided. Also included in this issue are listings of the six curriculum coordination centers and publications provided by the centers, descriptions of the curriculum centers and labs throughout the country, a listing of curriculum-related organizations at the national level, sources of audiovisual information and materials, and a brief bibliography of curriculum publications available from federal agencies. Foreword

Resources in Vocational Education is produced by the National Center Clearinghouse of the National Center for Research in Vocational Education under a contract with the Office of Vocational and Adult Education, U.S. Department of Education. The National Center is pleased to disseminate this issue that provides abstracts selected from the ERIC Clearinghouse on Adult, Career, and Vocational Education related to vocational and technical education curriculum products. Since this issue represents only selected ERIC abstracts, users are encouraged to refer to *Resources in Education* for a more comprehensive search. The full text of most documents announced in this issue is available from the ERIC Document Reproduction Service (EDRS). Microfiche copies also are available in local ERIC microfiche collections.

Other components of this issue include listings of the six curriculum coordination centers and publications produced by the centers, descriptions of curriculum centers and labs throughout the country, and a listing of curriculum-related organizations at the national level. Also included are a listing of sources of audiovisual information and materials and a brief bibliography of curriculum publications available from federal agencies.

Recognition is given to Clearinghouse staff for their efforts in compiling this publication: Wesley E. Budke, Clearinghouse Director; Shirley A. Chase and Carl F. Oldsen, Research Specialists; and Wallis Harsch, Publication Specialist.

Production services for the publication were provided by Bibliographic Retrieval Services, Inc., 1200 Route 7, Latham, New York 12110.

About This Issue

This issue of *Resources in Vocational Education* consists of resumes selected from the ERIC Clearinghouse on Adult, Career, and Vocational Education (ERIC/ACVE). Selections relating to vocational and technical education curriculum products were made from the July 1981 through June 1982 *Resources in Education*. Since only selected ERIC abstracts appear in this issue, users are encouraged to refer to *Resources in Education* for a more comprehensive search.

Other components of this issue include listings of the six curriculum coordination centers and publications produced by the centers, descriptions of curriculum centers and labs throughout the country, and a listing of curriculum-related organizations at the national level. Also included are a listing of sources of audiovisual information and materials and a brief bibliography of curriculum publications available from federal agencies.

The full text of most documents announced in this issue is available from the ERIC Document Reproduction Service (EDRS). An EDRS order form and ERIC price codes are included. Also, microfiche copies are available in local ERIC microfiche collections.

Two publications related to using ERIC are listed below. They are available on request from the ERIC Processing and Reference Facility, 4833 Rugby Avenue, Suite 303, Bethesda, Maryland 20014 or from ERIC/ACVE, The National Center for Research in Vocational Education, The Ohio State University, 1960 Kenny Road, Columbus, Ohio 43210.

A project was developed to gain more insight into family financial
problems, to identify these problems, and to formulate educational
strategies to deal with and help solve these problems. This project
was conducted in three phases, which included community outreach,
development of educational materials, and evaluation. Three com-
munities with different ethnic blends, similar income levels (middle
to lower-middle), and moderately high unemployment rates were se-
lected as project sites. The outreach program, which reached approx-
imately 2,000 participants with consumer education information, in-
cluded the use of a mobile unit, a home-study course, work-site educa-
tional programs, paraprofessional counselors, and a closed circuit
television network. The following are some of the project objectives
which were achieved to the extent that the majority of those partic-
ipants who responded to the follow-up studies had changed their
practices: (1) participants will spend their money more wisely and
use their new knowledge and skills to extend and increase their
resources to raise their standards of living; (2) participants will learn
to develop a personal money management plan; (3) partici-
pants will understand the concept of consumer credit and its advan-
tages, disadvantages, and wise use; and (4) participants will under-
stand the various types of insurance policies available and know how
an insurance protection program can be adapted to their personal
needs. (BM)

Identifiers - Military Curriculum Project

These instructor and student materials for a postsecondary course in radiography are one of a number of military-developed curriculum packages selected for adaptation to vocational instruction and curriculum development in civilian settings. This course is designed to provide a working knowledge of radiography that will enable students to perform basic radiographic examinations which meet the standards of the American Medical Association and to provide a quality radiograph to aid physicians in diagnosis. The course consists of five areas of instruction covering 388 hours. Instructional areas include (1) Anatomy and Physiology, (2) Radiographic Physics, (3) Radiographic Positioning, (4) Radiographic Positioning Laboratory, and (5) Special Radiographic Procedures and Techniques. Printed instructor materials include lesson plans and plans of instruction detailing the units of instruction, objectives, duration of lessons, and support materials needed. Student materials include two units of programmed instruction and student handouts. (A reference manual for this course - Radiologic Technology AFM 160-30; IM 8-280; NAVMED P-5119 - is available through loan.) (1 RA)

Identifiers - Emerging Occupations, Energy Occupations, Optical Technicians, Tumor Registrars

A study, described in this report, was conducted to provide information to national vocational education policy makers regarding curriculum development needs for selected new and changing occupations. The report also outlines a methodology for identifying new and changing occupations and assessing the need for curriculum development. Information was collected by (1) identifying new and changing occupations through data analysis; monitoring legislative, economic, technologic, and social trends; and communication with professional associations, special interest groups, and knowledgeable persons; (2) collecting occupational information for designated career fields; (3) locating curricula, civilian and military, currently available for training people in the new and changing occupations; and (4) assessing the gaps between training needed for new and changing occupations and the available curricula. New occupations identified by these methods include the following: case manager for the mentally disabled; housing rehabilitation specialists; laser electro-optics technician, tumor registrar; and occupations related to energy and microprocessing. Each of these occupations or occupational areas are analyzed according to functions, duties, and specifications; education and training requirements; employment outlook; employment setting; career advancement opportunities; available curriculum and progress; and implications for curriculum development. Descriptors - *Curriculum Development, *Demand Occupations, *Educational Needs, *Occupational Information, *Vocational Education, Educational Planning, Educational Research, Employment Opportunities, Employment Projections, Labor Needs, Needs Assessment, Occupational Surveys, Postsecondary Education, Secondary Education, Trend Analysis

Identifiers - Emerging Occupations

A study was conducted to determine what occupations nationally are new and changing and if they need curriculum development at the vocational education level. The process used to conduct this study involved four steps - identifying new and changing occupations, collecting information about the occupations, locating available instructional materials, and assessing the need for curriculum development. Fifteen occupations were identified as either new or changing a great deal. Occupations that need curriculum development because very little if any instructional materials exist are catfish farm manager, computer drafting graphics technician, and speech language hearing assistant. Occupations that have a partial need for curriculum development (portions of curricula may be available or a recombining of existing curricula may be needed) are cable television technician and aviation maintenance technician. Occupations that need to be observed closely because of their potential importance in the future include nemerometrics technician, electromyography technician, hydroponic agriculture specialist, fiber optics technician, and personnel and labor relations specialist. Occupations that are changing and that may or may not have adequate curricula, but for which schools seem to need help in implementing programs, are locksmith, word processing specialist, and welder. Identifiers - Adult Performance Level, Life Skills, Limited English Speaking, New Mexico

This curriculum guide contains instructional materials in English as a Second Language to aid instructors in using life managing skills as the basis for building English language skills on both beginning and intermediate levels. The following six units are included in the guide: jobs, community resources, consumer education, health and safety, government and law, and telephone usage. Each unit contains an introduction with directions for getting materials or information needed, objectives for beginning and intermediate levels, pre-posttest, instructional strategy planning, activity suggestions, and resources, building vocabulary and concepts, putting the words and ideas into action, and pictures. The materials are printed in loose leaf form for use in a three ring binder. (KC)

Identifiers - American Sign Language

A project was conducted to develop a curriculum for training interpreters to use American Sign Language (ASL) to serve the deaf. The three phase project involved (1) a task analysis to catalog the skills needed by interpreters and location of existing materials to determine areas where material needed to be developed, (2) development of a model training program that included flexible curricula and comprehensive syllabi, and (3) validation of the curriculum by using part of the materials in an inservice training for nine non-certified interpreters already in the field. Comparison of the pre- and posttests administered during the one-day pilot inservice attested to the project's success by indicating a 50 percent increase in accuracy to questions covering materials in the tested module. Project recommendations called for continued curriculum development, audio visual material development, and further field testing. (Nineteen appendices - 98 per cent of the document - include the following tangible products of the project: a task inventory and analysis, an interpreter training curriculum outline, model program guidelines and design, course syllabi for the curriculum outline, an in-depth instructional module for teaching interpretation skills with format and style developed for all modules, and an annotated bibliography.) Descriptors - *Air Conditioning, *Competency Based Education, *Heating, *Job Analysis, *Refrigeration, *Vocational Education, Community Colleges, Course Descriptions, Curriculum Development, Curriculum Guides, Educational Equipment, Educational Resources, Minimum Competencies, Postsecondary Education, Two Year Colleges

This manual was developed to serve as an aid to administrators and instructors involved with postsecondary air conditioning, heating, and refrigeration programs. The first of six chapters contains general information on program implementation, the curriculum design, facilities and equipment requirements, and textbooks and references. Chapter 2 describes the project procedures utilized in developing the curriculum. Suggested job descriptions and job competencies for air conditioning, heating, and refrigeration are given in the third chapter. Chapter 4 is comprised of the actual curriculum including course outlines for two

air conditioning, heating, and refrigeration mechanic courses. For all other courses, brief topical outlines are provided. A detailed listing of equipment necessary to start an air conditioning, heating, and refrigeration mechanic program for eighteen students is given in the fifth chapter. The final chapter, Resources, lists 279 books and 319 training aids. Appended sections include Air Conditioning, Heating, and Refrigeration Tasks; Response from Industry; Tasks by Job Levels; and Air Conditioning, Heating, and Refrigeration Competencies and Criterion Measures (IRA).

Descriptors *Auto Body Repairers, *Job Analysis, *Minimum Competencies, *Occupational Information, *Painting Industrial Arts, *Vocational Education, Auto Mechanics, Community Colleges, Competency Based Education, Job Performance, Job Skills, Motor Vehicles, Postsecondary Education, Repair, Two Year Colleges.

Designed to provide a model curriculum and guidelines, this manual presents tasks that were identified by employers, employees, and teachers as important in a postsecondary auto body repair curriculum. The tasks are divided into ten major component areas of instruction: metalworking and fiberglass, painting, frame and suspension, glass and trim, estimating, electrical, cooling systems, accessories, servicing, and welding. For each task statement, the task analysis identifies the competency required, the criterion of satisfactory performance, the skills or process the employee must have or follow in performing the task, the knowledge or theory one must know to perform the task effectively, and attitudes and values needed to be successful in carrying out the task. Following the task analyses, a curriculum model provides a curriculum description, courses by quarters, and course descriptions with the suggested tasks to be taught in each course. (The task inventory is appended) (IRA)

Identifiers North Carolina

This business administration curriculum is designed to prepare an individual for entry into middle management occupations in various businesses and industries. The first two chapters in the manual give an overview of business administration in the North Carolina community college system and the competency based curriculum development project from which the curriculum was derived. Chapter 3 comprises the bulk of the manual and presents the actual curriculum. The first part of this chapter describes the purpose and need for a business administration curriculum, then provides basic business functions performed in management, a listing of standard and specific job competencies and criteria measures, a curriculum model, and course descriptions. The final chapter provides general guidelines for program implementation including a discussion of advisory committees, faculty, facilities and equipment, and references. Appended materials include the career opportunity survey instrument and results and the task survey instrument and results. (IRA)

Identifiers North Carolina

The first of three volumes in a postsecondary secretarial science curriculum, this manual provides a systematic approach to analyzing the tasks performed by office workers in designing and developing secretarial science programs. Following an introductory chapter that describes the organization of the manual, chapter 2 outlines the competency based curriculum development project of which the manual is a part. In chapter 3, the North Carolina secondary business and office education program is described. Chapter 4 presents a discussion of curriculum advisory committees and student organizations. Recommendations for qualified faculty and staff and professional organizations are discussed in chapter 5. Suggestions for facilities, equipment, and instructional aids needed to implement a particular secretarial science program are presented in the sixth chapter. In the final chapter, secretarial and general office curricula are described and office and business education competencies are listed. Appended material includes task surveys and results, equipment lists, curriculum models, and the New Office and Business Education Learning System (NOBELS) competencies. (Volume 2, and 3, containing the course syllabi and abstract, are also available) (IRA)

The second of three volumes in a postsecondary secretarial science curriculum, this manual contains course syllabi and abstracts of twenty three courses included in the curriculum. Business and related courses abstracted include Introduction to Business, Business Mathematics, Business Law I, Economics and Survey of Data Processing Systems. General education courses abstracted include Grammar, Composition, Report Writing, Oral Communication, Business Communication, and Interpersonal Relationships and Communications. Each abstract is comprised of the following parts: course description, course hours per week, quarter hours credit, prerequisites, course content outline, and suggested textbooks. Course syllabi are provided for twelve secretarial science technical courses including Accounting, Office Machines 1, 2, and 3, Office Management, Office Procedures, Personal Development, Principles of Supervision, and Records Management. Each course syllabus is comprised of the following parts: (1) course description, (2) course objectives, (3) major divisions of course content; (4) credits, hours, and prerequisites, (5) evaluation, (6) content outline, and (7) a bibliography. The third of three volumes in a postsecondary secretarial science curriculum, this manual contains course syllabi for thirteen secretarial science technical courses. Course titles include Shorthand I, Shorthand Dictation and Transcription, I, Terminology and Vocabulary, Business, Legal, Medical, Typewriting, I, 5, and Word Processing. Each course syllabus is comprised of the following parts: (1) course description, (2) course objectives, (3) major divisions of the course content, (4) credits, hours, and prerequisites, (5) evaluation, (6) content outline, and (7) a bibliography. (Volumes 1 and 2 are also available.) (IRA)

Higher Education, Instructional Materials, Learning Activities, Postsecondary Education, Records Forms, Vocational Education

This instructional unit on farm recordkeeping is intended as a guide for use by teachers in planning and conducting young farmer and/or adult education classes. The unit consists of thirteen problems on the following topics: planning for farm recordkeeping, recording inventories, recording depreciable items, recording farm expenses, recording cash sales, recording resale items bought, recording capital items sold, recording capital items bought, recording resale items sold, recording social security data, recording income and non-farm expenses, recording a farm business summary, and managing taxes. Each problem contains an objective, a statement and an analysis of the problem, suggestions for teaching the lesson, and suggested teaching materials. Individual lessons include a variety of forms, charts, illustrations, and examples of selected tax- and bookkeeping-related computations. Appendices (one-third of the unit) contain a bibliography of supplementary resources, a sample recordkeeping problem involving one year in the operation of an owner-operated farm, a glossary, and an instructional unit evaluation questionnaire for teachers of vocational agriculture. Descriptors — *Adult Education, *Air Conditioning, *Building Design, *Conservation Education, *Energy Conservation, *Heating, Behavioral Objectives, Building Innovation, Community Colleges, Construction Process, Construction Materials, Continuing Education, Course Content, Depleted Resources, Equipment, Fuel Consumption, Fuels, Heat Recovery, Instructional Materials, Learning Modules, Lighting, Lighting Design, Motor Vehicles, Natural Resources, Postsecondary Education, Structural Elements Construction, Technical Education, Underground Facilities, Vocational Education

This curriculum guide contains course content for a series of "mini-courses" that can be presented in an adult continuing education program in area technical vocational schools and community colleges. The program consists of nine modules, each divided into units and including learning objectives and student handouts. The modules cover the following areas: (1) awareness of the energy dilemma — an introduction and prerequisite for the other courses; (2) surveying energy usage — a brief assessment of the energy used in the United States by the various energy-user categories; (3) utility bills and economics of energy conservation — a discussion of energy pricing, the development of power utility rate structure, and natural gas rate fluctuations; (4) how to search for energy conservation opportunities — a presentation of opportunities for the individual and the community to save and to conserve energy in the automobile, the home, and the use of appliances; (5) lighting conservation opportunities — lighting for energy conservation; (6) hot water heating conservation opportunities — techniques for selecting, installing, and operating the domestic hot water heater; (7) appliance energy conservation opportunities — techniques for purchasing, operating, and maintaining appliances; (8) building construction versus energy consumption — factors involved in building an energy-efficient home; and (9) heating, ventilating, and air conditioning conservation — principles of heating and cooling buildings. Lists of printed and audiovisual resources are included. (KC)

 Identifiers — Energy Occupations

This document contains an outline for a curriculum to train solar energy technicians in community colleges. The guide contains eight courses, each of which is divided into one to five modules. Modules, in turn, are divided into units, and units contain student handouts appropriate to the material. The following eight courses are included in this curriculum guide: (1) solar applications and future technology, (courses 2 and 3 missing); (4) introduction to solar energy, with modules on the sun and radiation, solar energy collection, solar energy storage, solar systems, and future outlook for solar; (5) control theory and application, with a module on general control; (6) materials and fabrication, with modules on basic materials, fabrication, and air distribution; (7) collectors and energy storage, with modules on collectors, solar storage, and installation, and (8) solar heating and cooling systems, with modules on system design, retrofitting, and servicing. Prerequisites for persons entering the solar energy technician curriculum and a list of resources are included. (KC)

 Identifiers — Energy Occupations

This curriculum guide contains lecture outlines and handouts for training solar technicians in the installation, maintenance, and repair of solar energy hot water and space heating systems. The curriculum consists of four modular units developed to provide a model through which community colleges and area vocational-technical schools can respond to training requirements and manpower needs as the market for solar systems progresses. The four units can serve as an extension of an existing occupational program or as a short-term intensive training program for individuals engaged in the heating and air conditioning industry. The four units include solar radiation and introduction to solar technology, solar construction techniques and materials, solar domestic hot water systems, and solar space heating systems. Each unit consists of performance objectives, presentation, training aids, and references, and some units contain learning activities. Twenty handouts for students cover the following topics: the earth's orbit, solar energy, heat transfer, Kansas laws concerning energy conservation and solar energy systems, terminology, basic systems, safety, soldering, and brazing, symbols, valves, pumps, availability of solar energy, residential hot water requirements, design calculations, direct heating — thermosiphon system, direct heating — pumped system, indirect heating — pumped system with heat exchanger, active solar heating and cooling, common operating modes, and common problems. This curriculum guide is designed to prepare secondary school students for entry-level and career-level positions in the largest area of employment in distribution and marketing — retail merchandising. Developed for use in the twelfth-grade competency cluster phase of New York State secondary marketing and distributive education program, this module builds on knowledge and skills presented in the "Distribution and Marketing Syllabus" (ED 110 597). Nine units are included: (1) Overview, (2) Merchandising, (3) Handling Goods, (4) Services Offered, (5) Store Operations, (6) Marketing Research, (7) Marketing Management, (8) Recordkeeping, and (9) Business and Government Regulations. Each unit contains a number of major content topics, under which performance objectives, content outlines, and suggested activities are correlated. Materials needed for some activities are provided in the appendixes. A list of references examined and/or used by the authors is also appended. Alternative resources are shown under suggested activities within the units. (Y1 B)

 Identifiers — Military Curriculum Project, Pest Control, Pests

This plan of instruction, lesson plans, and student study guides and workbooks for a secondary postsecondary level course for an entomology specialist are one of a number of military developed curriculum packages selected for adaptation to vocational instruction and curriculum development in a civilian setting. The course includes training on procedures for insect and rodent control, collection and identification of specimens, determination of control measures, identification and use of treatment solutions, and operation and maintenance of insecticide dispersal equipment. Three blocks of instruction cover 155 hours: (1) Entomology Fundamentals, Pesticides, and Equipment (11 lessons, 49 hours); (2) Control of Medically Important Pests (9 lessons, 58 hours); and (3) Control of Economically Important Pests (7 lessons, 48 hours). A Specialty Training Standard for student evaluation is provided. The plan of instruction details the units of instruction, objectives, duration of lessons, and support materials needed. A study guide and a workbook are provided for each block. These materials contain objectives, reading assignments, and review exercises. Military manuals, commercial texts, and audiovisuals are recommended, but not provided. A pictorial reference ("Pictorial Keys") on insects is available from the National Center Clearinghouse — see availability statement (Y1 B)

Identifiers — COBOL Programming Language, Military Curriculum Project

This program of instruction and various instructional materials for a secondary-postsecondary level course for programmer/analysts is one of a number of military-developed curriculum packages selected for adaptation to vocational instruction and curriculum development in a civilian setting. The eight-week, three-section course is designed to provide the skill to program electronic computers structured in COBOL and to code job streams using IBM, DOS, JCL, and utility programs. The program of instruction suggests a time schedule and gives the learning objective and reference(s) for each topic. Section 1, Data Representation, consists of a programmed text covering the binary, octal, and hexadecimal systems. Section 2, Basic COBOL Programming, contains a text and problem exercises with some answers. Topic areas include processing and updating a sequential file, producing an edited report and a report with calculations, processing external and internal tables, and debugging syntax errors. Section 3, Operating Systems, includes a text and programmed text. It focuses on disk operating systems (DOS) organization and operation. Specific topics include coding DOS Job Streams, DOS Librarian Programs, and DOS Utilities and Sorts. (YLB).

Identifiers — Military Curriculum Project, Orthopedics

These military-developed curriculum materials for a course for orthopedic specialists are targeted for students from grades 11 through the adult level. The course is designed to provide a working knowledge of the application of casts, traction, and splints to orthopedic patients and the removal of these devices; a working knowledge of assisting in minor surgical procedures; and a general knowledge of human anatomy and basic orthopedic principles. The course consists of nine academic subject areas covering 183 hours of instruction. The course package consists of a list of instructional objectives, description of the scope of subjects covered in the course, instructional guides, two technical manuals, demonstrations, and sample examinations. Subjects covered in the manuals are anatomy and physiology, care and handling of orthopedic patients, medical terminology, orthopedic conditions, methods

and materials used for orthopedic appliances, supply procedures, patient relationship, and practical aspects of clinical management and application of orthopedic appliances. Demonstrations deal with the application of various types of casts and bandages. A text, Orthopedic Nursing Procedures, is to be used in conjunction with this course — see note. (MN).

A programmed instruction course was developed, consisting of fifteen experiments encompassing eleven separate pieces of equipment operational in a solar and energy conservation lab. The programmed instruction manual for the lab was evaluated and revised during a workshop. This evaluation indicated that both the lab and manual are valuable tools aiding in efforts to conserve fossil fuels. The manual, which is also provided, consists of nine sections and an appendix. The first two sections contain programmed experiments involving a solar cycle trainer and solar schematic trainer. Section 3 provides power solar trainer instructor and trainee manual materials. Section 4, which deals with a heat pipe, contains general characteristics of the heat pipe, a simplified theoretical analysis, an introduction to a heat pipe mini-lab, and suggested experiments for the mini-lab. Computer programs dealing with the cooling and heating modes of a solar-assisted heat pump and an air-to-air solar trainer are contained in sections 5-7. Section 8, which deals with heat pump technology, contains a review of the simulated system and two-practice exercises. Section 9 presents a sample print-out covering a domestic solar hot water heater. An appendix discusses teaching the principles of solar energy in the undergraduate engineering laboratory. (MN).

tion, Instructional Materials, Learning Activities, Postsecondary Education, Pretests Posttests, Self Evaluation Individuals, Units of Study

Identifiers — Entrepreneurs, Small Businesses

This three-part curriculum for entrepreneurship education is primarily for postsecondary level, including four-year colleges and adult education, but it can be adapted for special groups or vocational teacher education. The emphasis of the three instructional units in Part I is understanding businesses. Unit A focuses on defining small business. It provides information on standards used to identify small businesses, different types of small businesses, and their impact on the economic system. Other topics include scope and trends of small business, start-up costs, future outlook, causes of business success and failure, and tasks of the entrepreneur. Material is organized into three levels of learning which progress from simple to complex concepts: Exposure, Exploration, and Preparation/Adaptation. Each level contains preassessment; teaching/learning objectives; substantive information (questions in margins guide the students' reading); activities, including a postassessment; and a self-evaluation. Definitions of important terms are found at the beginning of the unit; a bibliography and listing of sources for further information are appended. The four-page instructor's guide contains the teaching/learning objectives, teaching/learning delivery suggestions, and pre/postassessment suggested responses. (Y1.B).

This three-part curriculum for entrepreneurship education is primarily for postsecondary level, including four-year colleges and adult education, but it can be adapted for special groups or vocational teacher education. The emphasis of the seven instructional units in Part II is establishing a business. Unit C focuses on legal issues that affect the small business owner. It presents the basic concepts and vocabulary that should be understood for successful small business operation. Among the topics covered are contracts and agreements, including sales contracts, leases, and mortgages. The unit also discusses business insurance coverage and liabilities. Material is organized into three levels of learning which progress from simple to complex concepts: Exposure, Exploration, and Preparation/Adaptation. Each level contains preassessment; teaching/learning objectives; substantive information (questions in margins guide the students' reading); activities, including a postassessment; and a self-evaluation. Definitions of important terms are found at the beginning of the unit; a bibliography and listing of sources for further information are appended. The four-page instructor's guide contains the teaching/learning objectives, teaching/learning delivery suggestions, and pre/postassessment suggested responses. (YLB).

This three-part curriculum for entrepreneurship education is primarily for postsecondary level, including four-year colleges and adult education, but it can be adapted for special groups or vocational teacher education. The emphasis of the seven instructional units in Part II is establishing a business. Unit D focuses on business regulations at the local, state, and federal levels affecting the operation of small businesses. It covers basic vocabulary and concepts concerning government rules and regulations and discusses government agencies, legislation, licensing regulations, and tax laws. The "Annotated List of Rules and Regula-

tions; at the end of the unit provides an overview of and reference for government regulations. Material is organized into three levels of learning which progress from simple to complex concepts: Exposure, Exploration, and Preparation/Adaptation. Each level contains preassessment; teaching/learning objectives; substantive information (questions in margins guide the students' reading); activities, including a postassessment; and a self-evaluation. Definitions of important terms are found at the beginning of the unit; a bibliography and listing of sources for further information are appended. The four-page instructor's guide contains the teaching/learning objectives, teaching/learning delivery suggestions, and pre/postassessment suggested responses. (Y1B).

This three-part curriculum for entrepreneurship education is primarily for postsecondary level, including four-year colleges and adult education, but it can be adapted for special groups or vocational teacher education. The emphasis of the seven instructional units in Part II is establishing a business. Unit F focuses on financing the business. It introduces some basic financial concepts and statements and provides help in locating and distributing one's financial resources. Material is organized into three levels of learning which progress from simple to complex concepts: Exposure, Exploration, and Preparation/Adaptation. Each level contains preassessment; teaching/learning objectives; substantive information (questions in margins guide the students' reading); activities, including a postassessment; and a self-evaluation. Identifiers - Entrepreneurs, Small Businesses

This three-part curriculum for entrepreneurship education is primarily for postsecondary level, including four-year colleges and adult education, but it can be adapted for special groups or vocational teacher education. The emphasis of the eight instructional units in Part III is operating a business. Unit A focuses on the management process. It details various management functions, such as planning work, organizing people and resources for work, actuating work, and controlling and evaluating work. Examples illustrate ways in which the quality of work management can "make or break" a small business. Material is organized into three levels of learning which progress from simple to complex concepts: Exposure, Exploration, and Preparation/Adaptation. Each level contains preassessment; teaching-learning objectives; substantive information (questions in margins guide the students' reading); activities, including a postassessment; and a self-evaluation. This Program for Acquiring Competence in Entrepreneurship (PACE) resource guide contains an "Annotated Glossary of Business Terms" and listings of sources of information. The glossary includes approximately 100 terms, of which the instructor should have working knowledge. It may also be used as a handout for students. Sources of information are grouped under these four headings: United States (U.S.) Government Publications, Business and Professional Periodicals, National Trade Associations, and Small Business Administration Publications. U.S. Government Publications and Small Business Administration Publications list specific titles as well as prices and availability. (Small Business Administration office addresses are provided in a final section, where they are listed alphabetically by state.) The listing of business and professional journals cites titles of general business magazines, trade papers, and professional journals that have articles on entrepreneurship and consumer credit. In the section on national trade associations are contained addresses of associations from which information on membership and availability of publications on activities may be obtained. (Y1B)

Identifiers: Oklahoma, Power Line Technicians

These instructional units, developed in Oklahoma, are designed for training power line technicians for rural electric cooperatives. Planned to help current employees advance in knowledge and skill, the instructional materials are divided into seven areas of training: Laborer; Groundworker or Equipment Operator; Power Line Technician, Step 1; Power Line Technician, Step 2; Power Line Technician, Step 3; Power Line Technician Step 4; and Journey Line Technician. Each area includes three to nine instructional units. Each unit contains a unit objective, specific objectives, suggested activities, information sheet test and test answers, and suggested activities. A list of references used in preparing the instructional materials is included. (KC).

Descriptors - *Adjustment to Environment, *Displaced Homemakers, *Job Search Methods, *Job Skills, *Resource Allocation, *Self Actualization, Adult Development, Adult Education, Adults, Adult Vocational Education, Curriculum Guides, Employment Interviews, Family Environment, Females, Individual Development, Individual Power, Interests, Learning Modules, Money Management, Needs Assessment, Postsecondary Education, Self Evaluation Individuals, Self Help Programs

Identifiers - Arkansas

This curriculum guide, which is a product of an Arkansas project to develop employability services for displaced homemakers and others, is organized in a module format. The first section of the guide contains suggestions for teachers in organizing classes. An introduction to using the module format is given in that section with a topic outline of content. Nineteen modules follow, arranged in two divisions of pre-employment skills and personal resource management offerings. Pre-employment curriculum units cover such topics as needs assessment, interest inventories, assertiveness, responsibility, appearance, locating jobs, job applications and interviews, and managing a job. The personal resources management units cover areas of money and time management, education, skills, creativity, coping with stress, family cooperation, decision making, communication, and personal contact networks. Each module contains instructions to teacher, instructional objectives, evaluation procedures, learning activities, subject matter, and supplementary materials. Appendixes to the document contain a list of participants in the Homemakers in Transition project and samples of an agency information card, a flyer to advertise the program, and a news article. Identifiers - Energy Management, Energy Occupations

This document is the result of an effort to develop a comprehensive curriculum to train community college students as energy management technicians. The main body of the document contains the energy management technician training curriculum and course content for the

proposed courses in the two-year sequence; a report of how the curriculum was developed and evaluated makes up the rest of the document. The curriculum addresses the following needs: updating technical skills for design and review of energy systems; acquiring familiarity with historical approaches and current technologies for energy conversion and use; developing management abilities; and learning how to establish a viable energy management organization. Content areas covered in the curriculum include an introduction to energy issues and policies, materials and design in conservation, solar energy concepts, advanced solar energy concepts, renewable energy systems, fundamentals of heat transfer, energy usage of commercial buildings, energy auditing/calculations, energy control devices, energy building codes, updating seminars, and on-the-job training. Each course description contains student objectives and characteristics, teaching methodology, supplemental instructional materials, and films and reference sources. (KC).

Identifiers - Crime Prevention, Distributive Education Clubs of America, Shoplifting

This supplement is designed to provide motivational ideas for teaching the competencies in the curriculum guide, D.E. II - Course of Study (see note). Effort is made to provide ideas for teaching specific objectives for which there was not already a method recommended. Many of the suggested activities are ready to duplicate, trace, or implement with a few simple procedures or materials. Others may be adapted for another unit or other material. Information provided for each activity includes unit name, unit number, section letter, objective(s) number, name of activity, and directions and materials needed. These types of activities are provided: bulletin boards, puzzles, mobiles, transparency masters, review activities, posters, games, handouts, role playing, and case studies. Unit titles are (1) Introduction to Distributive Occupations; (2) DECA; (3) Handling Money; (4) Shoplifting Prevention; (5) Communication; (6) Human Relations; (7) Pre-Approach, Approach, Determining Need (selling approaches); (8) Presentation; (9) Overcoming Objections, Close, Suggestion, Selling, and Reassurance; (10) Display; (11) Advertising Media; (12) Advertising Layout; (13) Merchandising; (14) Store Organization; and (15) Economics of Free Enterprise. Answers to puzzles are appended. (Y1 B).

Methods, *Vocational Education, Accessibility for Disabled, Definitions, Diseases, Educational Legislation, Educational Resources, Handicap Identification, Hearing Impairments, High Schools, Home Economics, Learning Disabilities, Mental Retardation, Physical Disabilities, Students, Visual Impairments
Identifiers - Education for All Handicapped Children Act.

This supplement is designed to aid vocational home economics teachers teaching handicapped students in the regular classroom. The first three sections provide background information on legislation affecting teaching of handicapped students in regular classrooms (Public Law 94-142), and definitions of terms associated with these laws, an explanation of the assessment/placement procedure, and information on Individualized Educational Programs (IEPs). The fourth section defines various handicaps and suggests ways teachers can adapt lessons to include students with these handicaps. Handicaps included are mental retardation, hearing impairment, orthopedic handicaps, visual impairment, and learning disabilities. Lists of resources for working with each of these groups also are included. The fifth section provides instructions on completing instructional plans, while the sixth section contains classroom management and teaching strategies. A list of resources and annotated bibliographies also is included. (KC)

Identifiers - Meat Cutters

This module on meat grades and classes is the first of three (CF 028 291-293) in the meat cutting course of a bilingual skills training program. The course is designed to furnish theoretical and laboratory experience in the cutting of beef, pork, poultry, lamb, and mutton. Module objectives are for students to develop trade-related Spanish-English

vocabulary; to identify classes and grades of beef, veal, pork (hog), chicken, turkey, mutton, and lamb; to identify methods of preserving poultry and fish and seafood; and to identify forms in which fish and seafood may be marketed. Contents include list of module objectives; pretest; five sections on (1) beef and veal, (2) pork, (3) poultry, (4) lamb and mutton, and (5) fish and seafood; posttest; and English-Spanish vocabulary list. Each section is organized into this format: instructions, vocabulary, and concepts (statements or questions to direct reading) presented in English and Spanish; readings; and worksheets to evaluate comprehension of the trade-related reading material. Worksheets also cover these areas: vocabulary, definitions, word attack skills, writing skills, spelling, and application of terminology to the trade area. (Y1B)

Identifiers - Meat Cutters

This module on identifying and cutting of meat and by products is the third of three (CF 028 291-293) in the meat cutting course of a bilingual skills training program. The course is designed to furnish theoretical and laboratory experience in the cutting of beef, pork, poultry, lamb, and mutton. Module objectives are for students to develop trade-related Spanish-English vocabulary and to identify ways to determine meat freshness and tenderness; bone structures which determine names of cuts; primal and retail cuts of beef, veal, pork, lamb, mutton, and chicken; and edible and inedible by-products. Contents

This module on bacteriology is the first of ten (CE 028 308-318) in the barbering cosmetology course of a bilingual skills training program. (A Vocabulary Development Workbook for modules 6-10 is available as CE 028 313.) The course is designed to furnish theoretical and laboratory experience. Module objectives are for students to develop trade-related Spanish-English vocabulary; to classify and define bacteria as to types; to name and illustrate members of the cocci, spirilla, and bacilli families and name diseases caused by each; and to define and give examples of parasites and saprophytes. Contents include list of module objectives; pretest; five sections on (1) definition of bacteria, (2) classification of bacteria, (3) cocci and spirilla bacteria, (4) bacilli bacteria, and (5) saprophytes and parasites; posttest; and English-Spanish vocabulary list. Each section is organized into this format: instructions, vocabulary, and concepts (statements or questions to direct reading) presented in English and Spanish, readings, and worksheets to evaluate comprehension of the trade-related reading material. (Readings in modules 1-5 are in both English and Spanish.) Worksheets also cover these areas: vocabulary, definitions, word attack skills, writing skills, spelling, and application of terminology to the trade area. (YTB)

Descriptors -- *Auto Mechanics, *Bilingual Education, *Postsecondary Education, *Spanish, *Vocabulary Development, Adult Vocational Education, Individualized Instruction, Language Acquisition, Learning Activities, Motor Vehicles, Second Language Learning, Skilled Occupations, Trade and Industrial Education, Workbooks

This vocabulary language development workbook accompanies modules 1-6 in the auto mechanics course of the Bilingual Skills Training Program (CE-028 296-301). For each module the trade-related vocabulary to be learned and practiced is first presented in both English and Spanish. Various types of activities and exercises using both the English and Spanish vocabulary are then provided, including alphabetizing, unscrambling letters, translation, finding words in puzzles, and matching Spanish to English terms. Directions are generally given in both English and Spanish. (YLB).

This module on safety is the first of six (CE 028 296-301) in the auto mechanics course of a bilingual skills training program. (A Vocabulary Development Workbook is available as CE 028 294.) The course is designed to furnish theoretical and laboratory experience. Module objectives are for students to develop trade-related Spanish/English vocabulary, to define safety, to list rules for fire prevention in the shop and while using lifting devices, and to describe safe work clothing. Contents include list of module objectives; pretest; five sections on (1) definition of safety and maintenance, (2) using tools and equipment, (3) fire prevention, (4) proper clothing, and (5) lifting devices; posttest; and English/Spanish vocabulary list. Each section is organized into this format: instructions in Spanish and English; vocabulary; concepts (statements or questions to direct reading); readings; and worksheets to evaluate comprehension of the trade-related reading material. Worksheets also cover these areas: vocabulary, definitions, word attack skills, spelling, writing skills, and application of terminology to the trade area. (YLB)

Identifiers -- Ignition Systems

This module on ignition systems is the second of six (CE 028 296-301) in the auto mechanics course of a bilingual skills training program. (A Vocabulary Development Workbook is available as CE 028 294.) The course is designed to furnish theoretical and laboratory experience. Module objectives are for students to develop trade-related Spanish/English vocabulary, to name functions and circuits of an ignition system, to explain how voltage is increased by the coil and the spark is delivered by the distributor, and to name common problems caused by a faulty ignition system. Contents include list of module objectives; pretest; five sections on (1) ignition systems, (2) primary and secondary circuits, (3) how voltage is increased, (4) delivery of the spark to the proper cylinder, and (5) problems of the primary and secondary circuits; posttests; and English/Spanish vocabulary list. Each section is organized into this format: instructions in Spanish and English; vocabulary; and concepts (statements or questions to direct reading); readings; and worksheets to evaluate comprehension of the trade-related reading material. Worksheets also cover these areas: vocabulary, definitions, word attack skills, spelling, writing skills, and application of terminology to the trade area. (YLB).

This document is a packet of instructional materials for training secretaries and clerks for the petroleum, mining, and solar energy fields. Developed by Eastern New Mexico University and the New Mexico State Department of Vocational Education, and aimed at New Mexico industry, the curriculum is divided into three units of petroleum, mining, and solar energy secretarial occupations. Each of these divisions contains background information about the industry, information about reports used by that industry with which the secretary may need to work, and a working vocabulary with definitions. Specific occupations covered are land and legal secretary, geologist's secretary, oil company production-secretary, and solar energy research secretary. (KC).

Descriptors — *Advisory Committees, *Educational Facilities, *Educational Planning, *Health Occupations, *Staff Utilization, *Teacher Education, Facilities, Guidelines, Higher Education, Instructional Materials, Learning Modules, Meetings, Organizations Groups, Planning, Professional Continuing Education

These two learning modules are designed to assist both new and experienced instructors and/or administrators in obtaining maximum value from the input of advisory committees. The first module consists of seven sections devoted to the formation and utilization of advisory committees. Topics covered in it are the role of the advisory committee, selecting committee members, appointing the committee (process), preparing for the meeting (mechanics), topics for discussion, suggestions for a successful meeting, and follow-up. The second module, which covers using community facilities, contains sections on locating new facilities and solving scheduling conflicts among facility operators and educators. Twenty appendixes (the bulk of the document) include such items as descriptions from "The Directory of Occupational Titles"; job descriptions for hospitals; allied health professional associations; California state employment projections for 1980-1985; an advisory committee agenda format; checklists for policies and procedures governing committees, appointing and organizing advisory committees, and working with advisory committees; an affiliation agreement; a location and facility use matrix; a facilities scheduling sheet; a committee minutes outline format; and a glossary of terms, health care abbreviations, and trade acronyms. Identifiers — Future Farmers of America, Mississippi, Supervised Occupational Programs

This publication is the first in a series of five designed to be used in teaching basic vocational agriculture courses in secondary schools of Mississippi. The materials are designed to assist teachers in providing training that is directly related to the preparation of a student for employment. As far as possible, the lesson plans are skill oriented, devoted to teaching a student how to do something; however, the lessons also attempt to provide knowledge of basic principles associated with the skills. Each of the lessons consists of an introduction, terminal and specific objectives, instructional procedures, learning activities, supplementary learning activities, and supplementary learning aids. There are seven lessons contained in this Section I of the curriculum materials. They focus on the nature of vocational agriculture and the agriculture/agribusiness industry, supervised occupational experience programs, and the FFA (Future Farmers of America). The seven lessons include the following specific topics: orientation to vocational agriculture education; careers in the agriculture, agribusiness, and natural resources industry; selecting a supervised occupational experience program; planning a supervised occupational experience program; keeping records of supervised experience programs; orientation to the FFA; and instructional activities sponsored by the FFA. Descriptors — *Faculty Advisers, *Program Development, *Public Relations, *Student Organizations, *Trade and Industrial Education, Administrator Guides, Budgets, Fund Raising, Organization, Parliamentary Procedures, Program Descriptions, Publicity, Recordkeeping, Teaching Methods, Vocational Education Identifiers — Virginia, Vocational Industrial Clubs of America

This advisor's handbook is designed to help the trade and industrial instructor develop a strong and meaningful instructional program through the utilization of vocational industrial clubs of America (VICA) as a teaching tool. Materials are organized into ten chapters. Chapter 1 provides general information. Chapter 2 contains information and materials on VICA symbolism and ceremony. Operating a VICA chapter is discussed in Chapter 3, including getting started, membership, management, calendar, and state offices. Checklists, outlines, and sample forms are provided. Chapter 4 focuses on VICA skill and leadership programs. Chapter 5, on finance, provides fund raising ideas and information on planning such activities, budgets, and record keeping. Sample forms are provided. Topics covered in Chapter 6, on working with the community, include public relations and promotion. Sample announcements and news releases appear. The focus of Chapter 7 is club business procedure. Chapter 8 discusses club evaluation and provides forms for chapter meeting evaluation and evaluation of chapter success. The constitution and by-laws are contained in Chapter 9. Chapter 10 is an index. (YLB).

Agricultural Machinery Service. A Curriculum Guide for Agricultural Education. Revised.

Virginia Polytechnic Inst. and State Univ. Blacksburg, Agricultural Education Program, Virginia State Dept. of Education, Richmond, Agricultural Education Service, Virginia State Univ. Petersburg Pub Date — 79

Note — 114p.; The list of agricultural education publications mentioned in the table of contents was not included in the publication Pub Type — Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF01/PC05 Plus Postage

Descriptors — *Agricultural Engineering, *Agricultural Machinery,

*Equipment Maintenance, *Repair, *Work Experience Programs, Agribusiness, Agricultural Education, Agricultural Machinery Occupations, Behavioral Objectives, Business Administration, Careers, Curriculum Guides, Employment Opportunities, Engines, Equipment Utilization, Grade 10, Grade 11, Grade 12, High Schools, Human Relations, Leadership Training, Learning Activities, Salesmanship, Tractors, Vocational Education

This curriculum guide is intended to assist teachers, administrators, and supervisors in organizing and conducting vocational programs which meet the needs of high school students who desire vocational training in the off-farm agribusiness of agricultural machinery service. The three-year course for grades 10, 11, and 12 involves operation, maintenance, set-up, adjustment, repair, reconditioning, and overhaul of agricultural machinery and equipment. It includes dealership organization, management, sales, human relations, and leadership development topics. Study of career opportunities and development of job experience through supervised occupational experiences are also a part of the program. Designed for 1080 hours of in-school instruction (360 per year), the course needs two consecutive periods per day for class instruction. Each of the three years is divided into 8-10 major learning areas which are organized into this format: (1) unit concept, (2) suggested student performance objectives, (3) instructional areas, (4) examples of student learning activities, (5) competencies, (6) instructional materials, and (7) supporting references. A list of 100 references is provided. Other materials include a list of recommended equipment, recommended facility plans, and criteria for quality vocational programs in agricultural education. (YLB).

The Melwood Manual: A Planning and Operations Manual for Horticultural Training and Work Co-op Programs.

Melwood Horticultural Training Center, Inc. Upper Marlboro, Md Spons Agency — Administration on Developmental Disabilities (DHHS), Washington, D. C.

Pub Date — 80

Note — 266p.; Photographs and some appendix pages will not reproduce well

Pub Type — Guides / Methods / Techniques — Non-Classroom Use (055)

EDRS Price — MF01/PC11 Plus Postage

Descriptors — *Disabilities, *Horticulture, *Rehabilitation Programs, *Sheltered Workshops, *Therapy, *Vocational Rehabilitation, Adults, Agricultural Education, Contracts, Cooperative Programs, Greenhouses, Grounds Keepers, Job Training, Models, Nursery Workers Horticulture, Program Administration, Program Descriptions, Program Design, Program Development, Program Guides, Sales Occupations, Vocational Education, Work Experience Programs

This manual is intended as a resource for anyone involved in planning, developing, and/or operating a horticultural training or work co-op program for the handicapped. Following an introductory chapter, the manual is divided into three parts with the greatest weight given to the second part. Part I elaborates on development of the horticulture therapy and rehabilitation field and puts into perspective the breadth of the current horticultural programs. Part II consists of the fundamental building blocks of the program. It includes guidelines for leadership, administration, community assessment, funding, personnel, and federal regulations. General training guidelines pertaining to admission, evaluation, and wage determination are also considered. Four program models are described: greenhouse, plant sales, grounds maintenance, and contracting. The greenhouse and grounds maintenance program models are broken down into prevocational training, vocational training, and work co-op operations, and the requisite needs of planning, management, training, business, facilities, equipment, staff, etc. are discussed. Part III briefly presents a history and overview of the Melwood Horticultural Training Center, Inc. to exemplify the models presented earlier. Appendixes, amounting to approximately one-fourth of the manual, include sample personnel job descriptions, universities with horticultural therapy programs, curricula, and training and evaluation. (YLB).

This foods and nutrition curriculum guide is designed for eleventh and twelfth grade consumer and homemaking students who have had two years of previous vocational home economics. The guide contains four sections and eight instructional units. Section 1, Food-Related Careers, contains one instructional unit on employment in food-related occupations. Section 2, Nutrition, is comprised of one unit on food and good health. The third section, Consumer Food Management, contains four units that focus on food planning, food purchasing, food preparation, and social and entertainment skills. In the final section of the guide, Food Preservation, two units of instruction focus on canning, freezing, and drying. Each instructional unit follows a typical format that includes eight basic components: performance objectives, suggested activities for teacher, information sheets, assignment sheets, job sheets, transparency masters, tests, and answers to tests and assignment sheets. In addition, some units contain transparency masters and job sheets. (LRA).

The units in this curriculum guide are designed for use by state vocational education personnel to train teachers, administrators, and staff in the area of sex bias and sex-role stereotyping. The units are also designed to be used by local classroom teachers to supplement existing materials or supply in-depth information on sex bias and sex-role stereotyping in vocational education. Three units are included in the guide: (1) Classroom Strategies for Promoting Sex-Fair Education, (2) Promoting Sex-Fair Education through Instructional Materials, and (3) Skills for Implementing Sex-Fair Education in the Classroom. Each unit follows a typical format that includes eight components: performance objectives, suggested activities for teacher, information sheets, transparency masters, assignment sheets, job sheets, tests, and answers to tests and assignment sheets. Depending on the specific objectives, transparency masters, assignment sheets, and job sheets may or may not be included in the unit of instruction. (LRA).

Descriptors — *Job Training, *Leadership Training, *Needs Assessment, *Program Development, *Program Evaluation, *Trainers, Adult Education, Behavioral Objectives, Educational Needs, Instructional Materials, Leaders Guides, Learning Activities, Program Design, Program Implementation, Skill Development

Designed for use either as a self-study tool or as the basis for a five-day workshop, this curriculum package provides public sector trainers with an opportunity to develop and improve their skills in the area of assessing training needs, designing and conducting training programs, and evaluating training programs. It contains four leader's guides and four participant's sourcebooks. The first set of guides discusses preparing a workshop, and contains checklists, sample daily schedules, and a bibliography. Examinations of the needs assessment process, learning objectives, schedules of activities for both the session and an on-site

training lab, and a bibliography are included in the second set of guides. Designing and conducting training programs is the subject of the third set of guides, which describe learning theories, models, and practices and how to apply them. The final set of guides, which cover training evaluation, discusses how to assess the reliability and validity of training techniques. Each leader's guide includes step-by-step instructions for conducting the training sessions, and each participant's sourcebook contains exercises and exhibits. (MN).

EDRS Price — MF01 Plus Postage. PC Not Available from EDRS

Descriptors — *Adult Basic Education, *Competency Based Education, *English Second Language, *Learning Modules, *Program Effectiveness, *Reading Difficulties, Behavioral Objectives, Community Resources, Consumer Economics, Daily Living Skills, Government Administrative Body, Health, Interpersonal Relationship, Legal Education, Occupational Information, Program Development, Validated Programs

Identifiers — Adult Performance Level, Life Skills

Project CLASS (Competency-Based Live-Ability Skills) uses a series of 60 modules to teach life survival skills to adults with low-level reading ability — especially Adult Basic Education/English as a Second Language students. Two versions of the modules have been developed: one for use with teacher-directed instruction and another for independent study. Divided equally between Adult Performance Level (APL) level I (reading level grades 0-4) and level II (reading level grades 5-8), the modules cover basic survival competencies in these APL areas: consumer economics, government and law, health, community resources, occupational knowledge, and interpersonal relationships. (Module content and costs are also discussed.) A full-scale field test conducted at four sites found tremendously significant differences between the 728 treatment and 733 control students in percent of students mastering objectives. (YI.B).

Identifiers — Entrepreneurs, Self Employment, Small Businesses

This instructional guide for an entrepreneurship program of study in secondary schools is a teacher's manual combined with the essential learning activities for students. The 13 units — also appropriate for use at postsecondary or adult levels — may be used as a one-semester course, or in part, or in their entirety as supplements and hands-on experiences to accompany an entrepreneurship text. For each unit these materials are provided: unit objectives, sheets containing necessary content and background information, questions for discussion, transparency masters, and student activities. The 13 units are (1) Introduction to Entrepreneurship and Self-Employment; (2) Selection of Effective Legal Form of Business Organization; (3) Selection of Effective Specialized Assistance; (4) Financing the Small Business; (5) Selecting a Location; (6) Building, Equipment, and Layout; (7) Operating Permits, Licenses, and Tax Regulations; (8) Personnel Management for the Entrepreneur; (9) Building a Flexible Advertising Plan; (10) Determine Pricing and

Credit Policies; (11) Inventory and Supplies; (12) Understanding a Basic Accounting System; and (13) Selection of Effective Protective Steps. (YLB).

Mini-Computers and the Building Trades: A Guide for Teachers of Vocational Education. Final Report.

West Chester State Coll. Pa

Spons/Agency — Pennsylvania State Dept. of Education, Harrisburg. Bureau of Research and Evaluation

Pub Date — 80

Contract — 85-9828

Note — 58p.; Some figures will not reproduce well

Pub Type — Guides / Methods / Techniques — Non-Classroom Use (055)

EDRS Price — MF01/PC03 Plus Postage

Descriptors — *Air Conditioning, *Building Trades, *Electricity, *Heating, *Minicomputers, *Vocational Education, Building Design, Building Operation, Computer Assisted Instruction, Computers, Computer Science, Futures of Society, Guidelines, Housing, Instructional Materials, Material Development, Microcomputers, Program Development, State of the Art Reviews, Teacher Education, Trade and Industrial Education

These training materials are designed to help vocational education teachers introduce students to the utilization and installation of mini- and microcomputers in residential and small business buildings. It consists of two chapters. Chapter 1 contains general materials, designed to promote awareness, and chapter 2 contains materials which are specific and designed for teachers of electricity, heating, and air conditioning. Topics discussed in chapter 1 are uses of the computer in the home, physical characteristics of the computerized house, characteristics of the computer, installation, practical implications for living in the home of the future, and selecting system components. Chapter 2 contains specific materials designed to help teachers of electricity and heating and air conditioning develop lesson plans which introduce students to the concept of computerized homes and buildings. It is divided into four sections. Section 1 reviews installation procedures for plans, sensor placement, and the function of the computer in two types of heating/cooling systems. Section 2 covers hardware considerations for input and output devices. Detailed discussion of sensors comprises section 3. Section 4 contains sample problem worksheets for students in electricity and heating and air conditioning classes. (MN).

Identifiers — Delaware, Vocational Education Amendments 1976

The Vocational Education Amendments of 1976 mandate that sex bias and sex stereotyping be eliminated from all vocational education programs. In business and office occupations programs, the problems have been centered around increasing the number of male students in the program, encouraging women to move into management positions and other upper level supervisory jobs, and using sex-fair language in business communications. Responding to the Amendments, the state of Delaware developed a set of five sex equity modules designed (1) to focus on issues which are related to specific clusters of career options as defined in Delaware's competency-based, goal-oriented business and office occupations curriculum; (2) to provide information and materials for one to three days of activities; and (3) to focus the student's attention on those sex equity concerns which will affect her/his experiences as a student in the classroom, on-the-job, and in making career decisions. This module focuses on eliminating sex stereotyping in data processing and related occupations. Instructional activities in the module include a pre-opinion survey, case study, simulation exercise, terms describing men's and women's behavior, a slide-tape presentation, qualifications for employment, and a posttest. (KC).

Identifiers - Project TEAMS NE

These Project TEAMS (Techniques and Education for Achieving Management Skills) instructional materials consist of five units for use in training business and industrial supervisors. Unit 1 is designed to help managers in business or industry increase management skills in

regard to leadership techniques, problem solving and decision making, and time management. Management skills related to hiring and training employees and writing and using job descriptions and performance appraisals are covered in unit 2. The third unit contains material dealing with communications, delegation, public relations, and the role of the new manager. Materials provided in unit 4 discuss motivation, change, personnel management, conflict, and stress management. The final unit is concerned with management skills in the areas of budgeting, use of accounting data, computer awareness, economics, and advertising. Each unit contains a list of objectives, suggested activities, information sheets, transparency masters, assignment sheets, review sheets, and references. (Related Project TEAMS instructional materials for independent business owner/managers, health care administrators, and public administrators are available separately through ERIC - see note.) (MN).

Two-Year Sequential Curriculum Guide for the Related Class to the Cooperative Vocational Education Program.

Normal Community High Schools, Ill

Spons Agency — Illinois State Office of Education, Springfield, Div. of Adult Vocational and Technical Education

Pub Date — 80

Note — 68p

Pub Type — Guides / Methods / Techniques — Classroom use — Teaching Guides (052). Guides / Methods / Techniques — Non-Classroom Use (055)

EDRS Price — MF01/PC03 Plus Postage

Descriptors — *Cooperative Education, *Course Content, *Education Work Relationship, *Employment Qualifications, *School Business Relationship, *Vocational Education, Conservation Education, Curriculum, Entry Workers, High Schools, Human Relations, Job Skills, Mathematical Applications, Safety, Work Environment

Identifiers — Stress Management

The material presented in this guide was developed to serve as a two-year curriculum for classes connected to cooperative education programs. The overall subject of the guide is preparing for employment. The curriculum contains 16 units, arranged in sequential order with a recommended year of presentation shown on the course outline. Each of the units contains objectives, and is broken into several topics, with suggested resources that can be used to cover each topic. The units cover the following material: orientation to vocational education; entering the world of work; safety on the job; understanding business; human relations skills; law; individual potential; coping with stress; adult responsibilities; youth organizations; job-related mathematics; taxes; preparation for future employment; analyzing employment possibilities; the economic system; and resource conservation. In addition, there is an introduction on teaching technical competencies for the teacher, and a list of resources. (KC)

Identifiers — Waste Water Treatment

This instructor's manual provides an outline and guide for teaching Wastewater Treatment 1. It consists of nine sections. An introductory note and a course outline comprise sections 1 and 2. Section 3 (the bulk of the guide) presents lesson outlines for teaching the ten chapters of the manual entitled "Operation of Wastewater Treatment Plants". Topics covered in the lesson outlines are treatment plant operation; reasons for treating wastes; wastewater facilities; racks, screens, and comminutors; grit removal; sedimentation and flotation; trickling filters; rotating biological contactors; activated sludge; waste treatment ponds; and disinfection and chlorination. Each lesson outline contains a list of objectives, discussion of the relative importance of material to be presented, and suggestions for three-hour labs involving fieldtrips to local facilities. Suggested handout materials, transparency masters, and visual aids are included in sections 4-6. The final three sections consist of sample questions and answers for exams and finals, objective tests and answers, and discussion and review questions. (A corresponding student's guide is available separately through ERIC — see note.) (MN)

Student Material for Competency-Based Education Curriculum for Licensed Practical Nurse.

Associated Educational Consultants, Inc. Pittsburgh, Pa. West Virginia State Vocational Curriculum Lab, Cedar Lakes

Spons Agency — West Virginia State Dept. of Education, Charleston. Bureau of Vocational, Technical, and Adult Education

Pub Date — 79

Note — 426p.; For a related document see CE 028 938

Available from — West Virginia Vocational Curriculum Laboratory, Cedar Lakes Conference Center, Ripley, WV 25271

Pub Type — Guides / Methods / Techniques — Classroom use — Instructional Materials (051)

EDRS Price — MF01/PC18 Plus Postage

Descriptors — *Competency Based Education, *Job Skills, *Medical Services, *Nursing Education, *Practical Nursing, Check Lists, Employment Opportunities, Human Relations, Learning Activities, Nurses, Postsecondary Education, Recordkeeping, Skills, Task Analysis, Work Sample Tests

This curriculum for licensed practical nurse contains 18 units. Each unit is divided into modules comprised of task or job-related competencies. A student competency sheet (SCS) provided for each task is organized into this format: unit number and name, module letter and name of the group of related tasks, and number and name of task; performance checklist; test portion listing items needed, task, and standard; and learning activities. Following some SCSs are information sheets, self-check tests, and/or performance checks. The first three units (A, B, C), which deal with employment opportunities, human relations, and charting, reporting, and recording contain no modules, only tasks. The units cover such nursing skills as maintaining a clean, safe environment; caring for personal, nutrition, and elimination needs of patients; assisting with treatments and procedures; coordinating and communicating; medical and surgical asepsis; caring for the terminal patient; administering emergency treatments; establishing sterile areas; preparing patients for examinations or surgery; administering medication; caring for respiratory tract and urinary, gastro-intestinal, and reproductive systems; and performing supervised management procedures. A teacher's guide is available separately — see note. (YLB)

Competence, Course Content, Curriculum Guides, Drafting, Electric Motors, Electronic Technicians, Equipment, Foundries, Graphic Arts, Machinists, Metal Working, Photography, Printing, Refrigeration Mechanics, Secondary Education, Sheet Metal Work, Television Radio Repairers, Vocational Education, Warehouses, Welding

Identifiers — Coal Mining, Compositors (Printing and Publishing), Custodians, West Virginia

This publication is the teacher's guide for the competency-based Prevocational Manufacturing Exploration curriculum for secondary students in West Virginia. The guide is intended to help instructors give students career exploration activities in the various fields and job categories of manufacturing. The guide is organized into 18 learning modules. In each module is a career information sheet that includes a unit of study, occupational category, occupational division, occupational group, occupational overview, and representative job title within the occupational group. Included within the guide are listings of audiovisual aids, references, equipment, and supplies for presenting the various areas of manufacturing. Also included are the answers to all of the questions from the worksheets contained in most lessons. The following occupations are represented by the learning modules: wrought iron worker, foundry worker, printer, electricity/electronics technician, artist, compositor, photographer, drafter, sheet metal worker, machinist, welder, motor repairer, radio and television repairer, air conditioner mechanic, custodian, coal miner, and warehouse operator. This publication contains the student materials for the competency-based curriculum in agribusiness management for high school students in West Virginia. The purpose of the competency-based education curriculum is to provide a set of West Virginia-validated agribusiness tasks, along with the steps needed to perform each task, the evaluation standards, and suggested learning activities. These student materials consist of a student competency sheet for each of the 54 competencies (arranged in 12 learning modules), of the agribusiness management curriculum. (The 12 competencies encompassing the Agribusiness Management curriculum include the following: occupational knowledge, selling principles, sale closing, mathematics, related mathematics, advertising, special sales, stock, accounting and bookkeeping, pricing, inventory, and shipping and receiving.) Each competency sheet contains the competency, a performance guide, learning activities, and an evaluation to be performed or completed by the student. (The materials are suitable to be distributed to students, or may be used as part of the teacher's lesson plan.) Additional student handouts are also provided for some of the competencies. (KC)

This publication is the Teacher's Guide for the competency based curriculum in agribusiness management for high school students in West Virginia. The purpose of the competency based education curriculum is to provide a set of West Virginia-validated agribusiness tasks, along with the steps needed to perform each task, the evaluation standards, and suggested learning activities. The first six sections of the guide provide background information and suggestions for use of the curriculum. Topics include an introduction, identification and validation of job titles and competencies, functions of developmental committee, program organizations, bibliography of resources, and an equipment list. Section 7, the main body of the guide, deals with implementation of the curriculum. For each of the 12 modules, encompassing 54 competencies, the guide provides a competency sheet summarizing equipment needed, instructor's responsibilities, and a summary and/or answers to the criterion evaluation included with each competency. The 12 modules encompassing the agribusiness management curriculum include the following: occupational knowledge, selling principles, sale closing, mathematics, related mathematics, advertising, special sales, stock, accounting and bookkeeping, pricing, inventory, and shipping and receiving. A student grade card for the agribusiness management curriculum completes the publication. (KC)

Identifiers — West Virginia

This publication is a curriculum and teaching guide for preparing real estate agents in the state of West Virginia. The guide contains 30 units, or lessons. Each lesson is designed to cover three to five hours of instruction time. Competencies provided for each lesson are stated in terms of what the student should be able to do as a result of the instruction. Each lesson plan is constructed in a T-form, which sets out the content of the course or the lesson on the left-hand side of the format with teaching references and recommendations to the instructor on how to present the material placed on the right side of the format. Printable handout sheets and illustrations are located at the end of the lesson to which they relate. Included with the lesson plan for each topic is a checkup quiz and an application commitment plan for students to indicate activities that he/she agrees to carry out. Each lesson is designed to be presented by an experienced, practicing real estate broker. Topics covered by the lessons in the course include orientation to real estate and legal considerations; residential construction and design considerations; residential appraising; real estate finance; overview of selling; preparing to list; prospecting for listings; obtaining listings; marketing and listing; preparing yourself for successful selling; qualifying the purchaser and the property; obtaining prospective purchasers; closing the sale; and sales and marketing roundtable (KC).

Identifiers — West Virginia

This teacher's guide is designed to accompany the machine shop competency-based education curriculum for secondary students in West Virginia. It has been developed to facilitate use of the curriculum by instructors of machine shop programs. The teacher's guide contains the following material: an explanation of the curriculum and suggested usage; a list of competencies, by job title; job sheets; suggested tests; and a list of references to accompany the curriculum. The appendixes contain data and information on tasks currently performed and equipment used, as determined from a validation survey. There are also lists of additional tools and equipment used and tasks performed by respondents to the survey. The material is keyed to the 16 units of the student materials for the machine shop curriculum. Job titles covered by the competencies include machinist, electrical discharge machine set-up operator, numerical control machine operator, and machine shop supervisor (tool). (KC)

Identifiers — West Virginia

This publication contains the student material for the machine shop competency-based education curriculum for secondary students in West Virginia. It has been developed to facilitate the learning of skills necessary for a career as a machinist. The tasks in the curriculum are those actually performed on the job. The materials are intended for use by students and/or the instructor. The student material is made up of 16 units, divided into modules. Each module is made up of several tasks (job-related competencies). For each task there is a student competency sheet that requires performance of five or more steps in order to accomplish the task. Each student competency sheet contains a performance checklist, a "test" — items needed, task to be done, and standard (how well the task must be done) — and learning activities. Some student competency sheets have extra information sheets, a self-check test, or an instructor check sheet. Job titles covered by the tasks in the modules include machinist, electrical discharge machine set-up operator, numerical control machine operator, and machine shop supervisor (tool). (KC)

Identifiers — Interstate Distributive Educ Curriculum Consortium

This research-based curriculum guide for a secondary marketing and distributive education program covers 12 institutional areas. They are advertising, communications, display, human relations, management, mathematics, merchandising, operations, product/service technology, sales, economics of marketing, and employability skills. A content outline is followed by 12 sections, each devoted to one of the instructional areas/duties, in which are contained task statements, achievement indicators, criteria, and related IDECC (Interstate Distributive Education Curriculum Consortium) competencies. Student achievement records in the next section include a form for recording student skill performance, suggested school year training plan, and class achievement record. A suggested cooperative education student-training agreement is then provided. Another section includes several suggestions for a school store. The final section contains learning activities related to the tasks under the various instructional areas/duties. The resources needed are indicated. (YLB).

This module is one of a set of seven prepared in conjunction with the Title I "Project to Train Volunteer Leaders to Conduct Consumer Education Courses". It is designed to serve as a volunteer leader guide in the development of leadership and teaching skills. Part 1 contains the text of "Leadership and Teaching Skills". Topics include the important differences between children and adults as learners, major characteristics of adults as learners, the most important principles of adult learning, and the essential stages of presenting an effective consumer education program. Part 2 includes materials on planning, conducting, and evaluating presentations. Materials in this section include planning tools (such as needs assessment, learning objectives, aids inventory), methods and techniques of conducting learning activities (such as brainstorming, case study, interview, and role playing), and evaluation instruments (questionnaires and self-assessment). A slide set, keyed to the text, accompanies this module. (An illustration of or instruction for each slide is provided.) An essay by Paul English on making a presentation is appended. (CT).

Competency-Based Education Curriculum for Firefighter Training. West Virginia State Dept. of Education, Charleston. Bureau of Vocational, Technical, and Adult Education. West Virginia State Vocational Curriculum Lab. Cedar Lakes

Pub Date — 81

Note — 319p

Available from — Vocational Curriculum Laboratory, Cedar Lakes Conference Center, Ripley, WV 25271

Pub Type — Guides / Methods / Techniques — Non-Classroom Use (055)

EDRS Price — MF01/PC13 Plus Postage

Descriptors — *Competency Based Education, *Equipment Utilization, *Fire Fighters, *Fire Protection, *Job Skills, *Vocational Education, Alarm Systems, Behavioral Objectives, Competence, Curriculum Guides, Equipment, Fire Science Education, First Aid, Learning Activities, Rescue, Safety Education

Identifiers — West Virginia

This competency-based/education curriculum, developed by firefighters and educators in West Virginia, is designed for use as a resource for the development of improved firefighter training programs. It consists of an introductory note to the instructor and 140 competency sheets. These sheets deal with tasks in the following areas: general information; forcible entry; protective breathing apparatus; first aid; ropes; salvage; fire hoses, nozzles, and appliances; fire streams; ladders; ventilation; inspection; rescue; sprinklers; fire alarm and communications; and the chemistry of fire. The competency sheets generally contain a title and task statement (cross-referenced to the performance objectives in the National Fire Protection Association standards), a listing of necessary tools and equipment, a description of learning steps, resources, suggested learning activities, the required performance standard, and one or more information sheets containing illustrations and/or additional explanatory material. (MN).

Available from — Vocational Curriculum Laboratory, Cedar Lakes Conference Center, Ripley, WV 25271

Pub Type — Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF01/PC09 Plus Postage

Descriptors — *Competency Based Education, *Equipment Utilization, *Job Skills, *Metal Working, *Trade and Industrial Education, *Welding, Answer Keys, Blueprints, Certification, Competence, Cost Estimates, Employment Opportunities, Equipment, Equipment Maintenance, Human Relations, Job Training, Mathematics, Measurement, Mechanical Skills, Safety, Supervisory Methods, Tests, Vocational Education

This teacher's guide is designed to accompany the competency-based education student material for welding (available separately through ERIC — see note.) It consists of five sections and three appendixes. Section 1 discusses the uses of the welding competency-based curriculum along with its purpose and design. Definitions of terms used in the guide are provided in section 2. The third section contains a listing of the use of competencies by job title. Section 4 outlines the welding curriculum table of contents. The fifth section (the bulk of the guide) consists of teacher evaluation aids (task tests, module tests, and unit tests and answer keys to both the tests and the exercises included in the stu-

dent curriculum package). The first appendix contains data and information on tasks currently performed and equipment used, as determined from the validation survey. The second and third appendixes include lists of additional tools and equipment used and tasks performed by respondents to the survey. (MN).

This student welding competency-based education curriculum consists of six units dealing with general areas related to trade occupations and nine units covering specific aspects of working with welding equipment and performing welding operations. Topics covered in the first six units are welding opportunities, human relations, safety, basic mathematics, measuring, and reading blueprints. The remaining nine units deal with the following areas: (1) operating shield metallic arc welding equipment; (2) operating gas welding equipment; (3) operating metallic and tungsten inert gas equipment; (4) set up, tack, and weld metal processing projects; (5) cleaning, testing, and classifying metals; (6) operating auxiliary equipment and tools; (7) performing structural or equipment welding and cutting operations; (8) welder certification tests; and (9) supervision, training, and job estimating. A total of 100 competencies are addressed in the student competency sheets constituting these units. Each student competency sheet contains a task statement, a performance checklist, a list of materials needed, a performance standard, and learning activities. (MN).

Identifiers — Proofreading, Word Processing

This introductory word processing, competency-based education curriculum consists of seven learning modules. These are (1) introduction to word processing (with sections on the definition of word processing, the word processing cycle, parts of the word processing system, word processing vocabulary, and positions available in word processing); (2) English/proofreading (punctuation, grammar, spelling, and proofreading); (3) typing (with sections on typing techniques and various forms of business writing); (4) office machines (printing calculation, reprographic, machine transcription); (5) job techniques (application letters, personal data sheets, job interviews); (6) office procedures (telephone techniques, human relations, filing, and decision making); and (7) operation of word processing equipment (with sections on use and maintenance of equipment). Each module consists of several job sheets containing related tasks. A total of 118 tasks are covered in the job sheets. Each job sheet contains a task statement, a list of materials needed, suggested learning activities, and a task performance standard. Pretests, tests, problem sheets, and information sheets containing such items as exercises and word lists are provided throughout the modules. (MN).

Foods and Nutrition Curriculum Guide for Junior High, Secondary, and Adult Vocational Home Economics Programs. Bulletin 1595.
Louisiana State Dept. of Education. Baton Rouge. Div. of Vocational Education

Pub Date — 80

Note — 562p

Pub Type — Guides / Methods / Techniques — Classroom use — Instructional Materials (051). Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF02/PC23 Plus Postage

Descriptors — *Food Service, *Foods Instruction, *Nutrition Instruction, *Occupational Home Economics, Adult Vocational Education, Behavioral Objectives, Consumer Education, Continuing Education, Curriculum Guides, Home Economics, Resource Units, Safety, Sanitation, Secondary Education, Vocational Education

Identifiers — Louisiana

This comprehensive curriculum guide for junior high through adult levels presents foods and nutrition as they relate to quality living, career orientation, and occupational training. The first section is a conceptual outline of core material in foods and nutrition. Five instructional levels are I (grades 7-9), II (9-10), III (10-11), IV (11-12), and V (12-adult). Levels at which each concept is taught are indicated as well as location of the concepts in the units by page number. Nine concepts are included: nutrition, consumer practices, meal planning, kitchen equipment, sanitation and safety, management, food preparation, food preservation, and food related occupations. Resource units follow. Materials in five units for the five levels include overall and behavioral objectives,

unit outline, and detailed outline incorporating behavioral objectives and learning and evaluation experiences. Guides for seven semester courses follow the same format. The next section contains five mini-units or modules for adult education. Concepts, behavioral objectives, and learning experiences are identified. The final section is a guide for promoting and teaching occupational food service to grade 11-12 home economics students or out-of-school youth and adults. Appendixes, amounting to approximately one-third of the guide, include (1) teaching suggestions; (2) puzzles, games, and display ideas; (3) laboratory suggestions; (4) test items; and (5) bibliography and resources. Identifiers — Illinois

This curriculum guide is designed to provide the curriculum coordinator with a basis for planning a comprehensive program in the field of marketing. It also provides marketing and distributive education teachers with maximum flexibility in planning an automotive and petroleum curriculum. The essential common and specialized competen-

cies are identified and listed based upon structured interviews with employees in first-, second-, and third-level positions. These competencies are classified into 11 instructional areas: advertising, communications, display, human relations, marketing/economics, management, mathematics, merchandising, operations, product and/or service technology, and selling. For each competency those jobs to which the competency is common, suggested learning activities, and references are suggested. Supplementary materials provided include information on careers in automotive and petroleum, career ladder, and competency curriculum planning grid. (YLB).

Identifiers — Diversified Cooperative Training, Interstate Distributive Educ Curriculum Consortium, West Virginia

This document contains separate core curricula for Distributive Education and Diversified Cooperative Training programs designed to aid the teacher in using available competency-based instructional materials. Each core curriculum is composed of four parts: marketing, economics, career exploration, and employability skills. Marketing, the largest part, is further divided into 10 instructional areas. Each instructional area is comprised of units of instruction with each unit having

one or more instructional topics, each topic supported by competencies. The number of behavioral objectives that the Interstate Distributive Education Curriculum Consortium has for each competency is given as well as suggested resources. All learning within each unit is presented in its most learnable sequence. Selected topics (indicated by an asterisk) are recommended for inclusion in a training plan at a training station. A bibliography is also provided. (YLB).

Identifiers — Alternative Energy Sources, Arkansas

This document is one of five learning packets on alternative energy developed as part of a descriptive curriculum research project in Arkansas (see note). The overall objectives of the learning packets are to improve the level of instruction in the alternative energies by vocational exploration teachers, and to facilitate the integration of new content on energy into existing vocational programs. Each learning packet contains unit objectives, information, transparency masters, lecture outline, suggested activities, student assignment sheets, tests, and answers to the tests. This unit on energy conservation covers the following topics: energy conservation through passive solar design; building small to conserve energy; insulation; the Arkansas Energy Conservation Home; conservation for existing construction, including weather stripping and caulking, insulation, heating and cooling equipment, and appliances; and a home energy check list. A glossary and a bibliography also are included. (KC).

Identifiers — Emerging Occupations

This publication describes the developmental process and the modules and achievement tests developed by the project, Family and Community Services — Preparation for New and Emerging Occupational Roles. It also offers suggestions for use of the secondary-level occupational education modules designed to help home economics teachers in developing a course or parts of a course to prepare para-professionals and/or aides and to provide a base for more advanced careers in the Family and Community Services cluster of occupations. A summary is provided of the 14 modules, which are intended as resources for curriculum development, not for use in their entirety. (Module 1, Securing Employment, is available only from the Government Printing Office.) A cumulative bibliography lists resources located by the project through its four years of operation (1977-81). (Y1B).

This second of 14 curriculum modules in the Family and Community Services Occupational Education Modules series deals with self-development, respect, and understanding. It contains experiences to help students have some concept about cooperative employment situations in relationship to in-class work and to analyze their own characteristics in relationship to employment and to clients. It also provides for exploration of career and work possibilities in family and community services. Each of the five competencies covered in this module encompasses a number of objectives, suggested strategies for student experiences, and references and resources. Supplemental material for strategies, such as handouts, self-evaluation devices, and case studies, are found in the appendix. A listing of additional references for the teacher is also provided. Other materials include an achievement test with answer key and matrix indicating competencies tested with Bloom's taxonomy level for items. (Y1B).

Identifiers — Resource Utilization

This fourth of 14 curriculum modules in the Family and Community Services Occupational Education Modules series deals with understanding and utilizing resources, facilities, and personnel in family and community services. It is designed to help students examine resources used to help and serve clients and to become familiar with the variety of resources that institutions and communities utilize to serve people. It helps students evaluate their own talents and skills for helping people in relation to specific client groups. Each of the five competencies covered in this module encompasses a number of objectives, suggested strategies for student experiences, and references and resources. Supplemental material for strategies, such as handouts, self-evaluation devices, and case studies, are found in the appendix. Other materials include an achievement test with answer key and matrix indicating competencies tested with Bloom's taxonomy level for items. (Y1B).

Identifiers — Helping Behavior

This fifth of 14 curriculum modules in the Family and Community Services Occupational Education Modules series deals with the helping process. It explores the social concept of helping and provides student experiences to enable them to practice certain helping skills, including problem identification, diagnosis, prognosis, treatment planning, implementation of treatment, and evaluation. An important focus is value analysis. Each of the five competencies covered in this module encompasses a number of objectives, suggested strategies for student experiences, and references and resources. Supplemental material for strategies, such as handouts, self-evaluation devices, and case studies, are found in the appendix. Other materials include an achievement test with answer key and matrix indicating competencies tested with Bloom's taxonomy level for items. (YLB).

Identifiers — Helping Behavior, Sensitivity

This sixth of 14 curriculum modules in the Family and Community Services Occupational Education Modules series deals with many aspects of client needs and sensitivity of helpers. It is intended to aid students in (1) understanding physical, psycho-social, and intellectual human development for various age groups; (2) developing understanding of and sensitivity to the physical and psycho-social characteristics and needs of target groups; (3) understanding economic needs of target groups; (4) analyzing human physical, psycho-social, intellectual, and economic needs; and (5) analyzing the relationship of social, emotional, physical, and intellectual growth and well-being in relation to recreational activities. The module can be modified to coincide with actual cooperative work activities. Each of the five competencies covered in this module encompasses a number of objectives, suggested strategies for student experiences, and references and resources. Supplemental material for strategies, such as handouts, self-evaluation devices, and case studies, are found in the appendix. Other materials include an achievement test with answer key and matrix indicating competencies tested with Bloom's taxonomy level for items. (YLB).

Identifiers — Helping Behavior

This seventh of 14 curriculum Modules in the Family and Community

Services Occupational Education Modules series deals with care services to meet needs of the client. It is intended to help students determine needs of clients and to be able to perform care services which are needed. Environment, including economic aspects, is explored in relationship to client well-being. Helping people to develop responsibility for their own health and care is emphasized. Each of the six competencies covered in this module encompasses a number of objectives, suggested strategies for student experiences, and references and resources. Supplemental material for strategies, such as handouts, self-evaluation devices, and casestudies, are found in the appendix. Other materials include an achievement test with answer key and matrix indicating competencies tested with Bloom's taxonomy level for items. (YLB).

Identifiers — Family Crises

This tenth of 14 curriculum modules in the Family and Community Services Occupational Education Modules series deals with crisis and emergency situations. It helps students to recognize crises and emergencies and to accept their own resources and experiences as a basis for understanding experiences of others. First steps, such as information gathering and basic first aid procedures, are included. Crisis prevention is also explored. Each of the four competencies covered in this module encompasses a number of objectives, suggested strategies for student experiences, and references and resources. Supplemental material for strategies, such as handouts, self-evaluation devices, and case studies, are found in the appendix. Other materials include an achievement test with answer key and matrix indicating competencies tested with Bloom's taxonomy level for items. (YLB).

This eleventh of 14 curriculum modules in the Family and Community Services Occupational Education Modules series deals with chemical dependence. It is intended to make students aware that chemical dependence takes many forms for all age groups. Basic knowledge of drugs and the effect of use is included, and students are encouraged to examine their values in relationship to drug use. Referral and assistance methods for chemically dependent clients are discussed. Each of the three competencies covered in this module encompasses a number of objectives, suggested strategies for student experiences, and references and resources. Supplemental material for strategies, such as handouts, self-evaluation devices, and case studies, are found in the appendix. A listing of additional references for the teacher is also provided. Other materials include an achievement test with answer key and matrix indicating competencies tested with Bloom's taxonomy level for items. (YLB).

This twelfth of 14 curriculum modules in the Family and Community Services Occupational Education Modules series deals with functions and structure of the family. Definitions of the family are compared, and students are helped to understand various forms, functions, and structures of families. The developmental stages of the family life cycle and life styles are explored. Awareness of the aspects of family conflict and the paraprofessional's role in conflict situations are stressed. The relationship of families to other social institutions is also discussed. Each of the six competencies covered in this module encompasses a number of objectives, suggested strategies for student experiences, and references and resources. Supplemental material for strategies, such as handouts, self-evaluation devices, and case studies, are found in the appendix. Other materials include an achievement test with answer key and matrix indicating competencies tested with Bloom's taxonomy level for items. (YLB).

Identifiers — Helping Behavior

This thirteenth of 14 curriculum modules in the Family and Community Services Occupational Education Modules series deals with death and dying. It helps the student to be aware of different kinds of death, stages of emotion, and attitudes toward death. Students have opportunities also to express their own feelings. The role of community institutions related to death and bereavement is included. The relationship of the professional to families and individuals coping with death and/or bereavement is approached in both a programmatic and affective manner. Each of the six competencies covered in this module encompasses a number of objectives, suggested strategies for student experiences, and references and resources. Supplemental material for strategies, such as handouts, self-evaluation devices, and case studies, are found in the appendix. A listing of additional references for the teacher is also provided. Other materials include an achievement test with answer key and matrix indicating competencies tested with Bloom's taxonomy level for items. (YLB).

This fourteenth of 14 curriculum modules in the Family and Com-
 munity Services Occupational Education Modules series deals with the
 identification and resolution of morally confusing situations which arise
 in service occupations. A suggested Code of Ethics for Family and Com-
 munity Services is included. Discussion of case stories and other ex-
 periences are designed to help students be prepared to make decisions
 based on their own values and rationality rather than on the expediency
 of the moment. Each of the three competencies covered in this module
 encompasses a number of objectives, suggested strategies for student
 experiences, and references and resources. Supplemental material for
 strategies, such as handouts, self-evaluation devices, and case studies,
 are found in the appendix. A listing of additional references for the
 teacher is also provided. (Y1.B).

This Rate Training Manual (textbook) and Nonresident Career Course
 form a correspondence self-study package to teach the theoretical
 knowledge and mental skills needed by the Machinery Repairman Third
 Class and Second Class. The 15 chapters in the textbook are (1) Scope
 of the Machinery Repairman Rating; (2) Toolrooms and Tools; (3)
 Layout and Benchwork; (4) Metals and Plastics; (5) Power Saws and
 Drilling Machines; (6) Offhand Grinding of Tools; (7) Lathes and At-
 tachments; (8) Basic Engine Lathe Operations; (9) Advanced Engine
 Lathe Operations; (10) Turret Lathes and Turret Lathe Operations; (11)
 Milling Machines and Milling Operations; (12) Shapers, Planers, and
 Engravers; (13) Precision Grinding Machines; (14) Metal Buildup; and
 (15) The (Shipboard) Repair Department and Repair Work. Appen-
 dixes include Tabular Information of Benefit to Machinery Repairman
 (23 tables), Formulas for Spur Gearing, Formulas for Diametral Pitch
 System, and Glossary. The Nonresident Career Course follows the in-
 dex. It contains 11 assignments, which are organized into the follow-
 ing format: textbook assignment and learning objectives with related
 sets of teaching items to be answered. (Y1.B).

 Learning Activities, Learning Modules, Pacing, Secondary Educa-
 tion, Self Evaluation Individuals, Skilled Occupations, Vocational
 Education

This document is a curriculum guide for instructors teaching voca-
 tional preparation for electrical wiring to special needs students. The
 purpose of the curriculum guide is to provide minimum skills for disad-
 vantaged and handicapped students entering the mainstream; to sup-
 plement vocational skills of those students already in a regular train-
 ing program (mainstream); and to provide vocational instructional
 materials for the modified classroom. Ten units of self-paced and self-
 contained instructional materials are contained within the electrical wir-
 ing curriculum. Units are illustrated and simplified to more easily aid
 a student in class activities or on an individual basis. The separate sec-
 tions of each unit are color coded and consist of the following: objec-
 tive and student assessment (presents the unit objectives and provides
 self-assessment statements for students); introduction (contains a brief
 motivational statement describing the theme of the unit); tools,
 materials, and equipment needed to complete the exercise; steps of the
 procedure, with illustrations; and student evaluation, to be used by the
 instructor. Topics covered in the 10 units include jobs related to elec-
 trical wiring, electrical wiring tools and their uses, wires and wiring
 materials, safety rules in electrical wiring, splicing electrical wires, solder-
 ing and taping electrical wire splices, installing a single-pole switch, in-
 stallation series wiring, installing and wiring outlets in parallel, and in-
 stallation cable in house framing. (KC).

 Workbooks

Designed for use in carpentry apprenticeship classes, this workbook
 contains nine units on carpentry skills in the area of interior finish, lists
 of recommended and required instructional materials, and nine unit
 tests. Each instructional unit includes a listing of performance statements
 and text covering skills addressed in individual performance statements.
 Topics covered in the units are design, blueprints, and specifications;
 tools used for interior finish work; finish interior wall coverings;
 installation of jambs in interior door openings; fitting and hanging in-
 terior doors; wood molding used in interior trim; plastics and plastic
 laminates used as wall coverings; installation of built-in cabinets and
 closets; and hardware used in interior finish. A multiple-choice test is
 provided for each unit. (MN).

This unit is one of several modules designed for instruction at the eleventh and twelfth grade levels in a course on family relationships and parenting education. Included within the unit is information concerning the structure of communities, the many community resources that are ready to assist individuals and groups, procedures for becoming more informed about community agencies, and strategies for evaluating the quality of community outreach programs. It is intended that the knowledge students gain from dealing with the "community outreach" concept will enable them to develop a fuller understanding of the community's role in our daily lives. In addition, it is hoped that students will be better equipped to participate as responsible citizens in community action programs. The instructional unit contains overall goals and specific objectives, suggested activities, information sheets, assignment sheets, job sheets, transparency masters, a test, and answers to the test. Identifiers — Consumer Skills, Personal Finance Training

This guide is intended to assist curriculum planners and classroom teachers in designing and implementing personal finance instruction to meet a variety of student needs, interests, and abilities. It is organized under five concept areas: employment and income, money management, credit, purchase of goods and services, and rights and responsibilities in the marketplace. Each concept area contains several subconcepts. Under each subconcept the goals are listed at three levels of progressively greater complexity along with sample indicators of student performance. Classroom activities are accompanied by an outline of program content. Topics covered in the five concept areas include obtaining a job; meeting responsibilities for job success; employment law; financial security and employment; financial planning; banking and recordkeeping; savings; investments; legal documents; insurance; taxation; credit availability, use, selection, and problems; consumer credit laws; factors affecting consumer purchases; role of advertising; guidelines for shoppers; the U.S. economic system; rights and responsibilities of consumers and sellers; fraudulent and deceptive practices; sources of consumer assistance; and consumer legislation. Identifiers — Dictionary of Occupational Titles, Oregon

This guide is intended to assist the vocational teacher in designing and implementing a child care occupations vocational program. The guide is divided into four sections: organization and implementation, instructional emphasis areas, assessment, and appendix. The organization and implementation section describes goal-based planning, and includes a proposed program curriculum, a suggested curriculum schedule, allied support courses, information about individualized instruction, and current Oregon manpower data. The instructional emphasis areas section contains suggested course goals and learning activities and resources in growth and development, patterns of behavior, planning play activities, health and safety, and employment. Section three explains why assessment is needed and is followed by the appendix, which contains (1) job descriptions from the Dictionary of Occupational Titles, (2) instructional analysis of the skills and knowledge common to the key occupations, (3) rules and laws governing child care in Oregon, (4) bibliography, and (5) assessment instrument for child care services programs. *Identifiers — Navy

This Rate Training Manual (Textbook) and Nonresident Career Course form a correspondence, self-study package to provide information related to tasks assigned to the Electrician's Mate Third and Second Class. Focus is on operating and maintaining power and lighting systems and associated equipment. The 16 chapters in the text are (1) The Electrician's Mate, (2) Safety Precautions, (3) Test Equipment, (4) Electrical Installations, (5) A-C Power Distribution Systems, (6) D-C Power Distribution Systems, (7) Motor Controllers, (8) Maintenance and Repair of Motors and Generators, (9) Shipboard Lighting, (10) Degaussing, (11) Electrical Propulsion and Controls, (12) Central Operations System, (13) Basic Electronic Components and Circuits, (14) Logic Systems, (15) Electrical Auxiliaries, and (16) Sound Motion Picture Systems. Appendixes include a glossary; information on workbenches, ground requirements, and safety matting; and a chart of electronic symbols. The Nonresident Career Course follows the index. It contains 11 assignments that are organized in this format: textbook assignment and learning objective with related sets of teaching items to be answered. Learning objectives and items are based on subject matter or study material in the textbook. (YLB)

Williamson, Linda, Ed

Consumer Education: A Guide for Teachers to Motivate Students Toward Improved Consumer Education.

Oklahoma State Dept. of Education, Oklahoma City

Pub Date — 81

Note — 242p

Pub Type — Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF01/PC10 Plus Postage

Descriptors — *Career Choice, *Consumer Economics, *Consumer Education, *Consumer Protection, *Money Management, Behavioral Objectives, Career Awareness, Course Descriptions, Credit Finance, Economics, Elementary Secondary Education, Health, Influences, Instructional Materials, Insurance, Learning Activities, Leisure Time, Lesson Plans, Purchasing, Resource Materials, Student Evaluation, Teaching Guides

This guide contains information to facilitate the teaching of consumer education at all levels. It focuses on making students more aware of how the economic structure functions and the forces that help shape the free enterprise system. Materials are divided into three sections by educational level: K-3, 4-6, and 7-12. Concepts covered include the economic system; roles, rights, and responsibilities; consumer influences; money management; insurance; credit; purchasing; quackery, fraud, and deception; consumer assistance and protection; health, education, and leisure; and career decisions. The section for grades 7-12 includes all the above topics; the other two sections cover selected topics. Information on each concept is organized into this format: goal, outline of content with corresponding student objectives, activities, evaluation, and resources. (YLB)

Educational Resources, Equipment Maintenance, Equipment Utilization, Fertilizers, Floriculture, Guidelines, Instructional Materials, Landscaping, Learning Activities, Ornamental Horticulture Occupations, Personnel Management, Pesticides, Postsecondary Education, Secondary Education, Soil Science, Trees, Turf Management

This competency-based horticulture curriculum guide is designed to provide secondary and postsecondary horticulture teachers with a task-oriented program in gardening/groundskeeping. It contains a master resource list, a listing of gardening/groundskeeping resources available from various states, and 87 competency task sheets organized into 10 competency areas. These areas are equipment operation and maintenance; equipment and supplies; soils; fertilizers; lawns; trees, shrubs, annuals, and perennials; pesticides; maintenance of facilities; management/job actions; and personnel management. A task statement, a performance objective, suggested learning activities, evaluation procedures, selected resources, and a performance guide are provided in each competency task sheet. Instructor check lists designed to help instructors determine acceptable levels of student performance are also included in the units. (Related competency-based horticulture curriculum guides in the areas of floriculture and turfgrass maintenance are available separately through ERIC — see note.) (MN).

Descriptors — *Agricultural Education, *Agricultural Occupations, *Career Awareness, *Program Development, *Vocational Education, Career Education, Career Exploration, Curriculum Development, Curriculum Guides, High Schools, Legislation, Models, Off Farm Agricultural Occupations

Identifiers — Illinois Core Curriculum Project

The major program objectives of agricultural occupations courses are (1) to develop agricultural competencies needed by individuals engaged in or preparing to engage in production agriculture, and in agricultural occupations other than production agriculture; (2) to develop an understanding of the career opportunities in agriculture; (3) to develop the ability to advance in agricultural occupations through continuing education; (4) to develop human relations abilities needed in agriculture; and (5) to develop the abilities needed to exercise and follow effective leadership. This planning guide has been designed as an aid to teachers and administrators who wish to plan or replan an agricultural occupations program at the secondary school level. A suggested procedure and sample forms are included to assist the teacher in developing courses of study using the Illinois Core Curriculum Project materials. The guide includes an introduction to agricultural occupations as a field of study, including the background legislation which precipitated it; suggested procedures for program development; program models; the Illinois Core Curriculum and its use in program development; program objectives; and course planning aids, including course planning forms and directions for their use. Descriptors — *Agricultural Education, *Off Farm Agricultural Occupations, *Program Development, *Urban Areas, *Vocational Education, Agricultural Occupations, Curriculum Development, Curriculum Guides, High Schools, Models, Resources, Urban Population, Urban Schools

Identifiers — Illinois Core Curriculum Project

Urban agriculture may be defined as those areas of agriculture that are practiced in metropolitan settings, plus knowledge and skills in agricultural subject areas which lead to vocational proficiency and improved quality of life or effective citizenship. Agriculture areas that are especially significant in urban settings include ornamental horticulture, companion animals, food processing, conservation and ecology, agricultural marketing, and gardening. This planning guide has been designed as an aid to teachers and administrators who wish to plan or replan an urban agriculture program at the secondary school level. A suggested procedure and sample forms are included to assist the teacher in developing courses of study using the Illinois Core Curriculum Project materials. The guide includes an introduction to urban agriculture, which explains the functions of agricultural education in urban areas, federal legislative provisions, and the Illinois Core Curriculum for agricultural education; instructions for planning an urban program, including program objectives; five program models; course planning aids, such as course planning sheets and instructions for their use; and a list of resources for program planning. Validation of Auto Mechanics I Curriculum Manual.

Oklahoma State Dept. of Vocational and Technical Education, Stillwater

Pub Date — 81

Note — 58p

Pub Type — Reports — Evaluative / Feasibilit. (142)

EDRS Price — MF01/PC03 Plus Postage

Descriptors — *Auto Mechanics, *Curriculum Evaluation, *Field Tests, *Program Effectiveness, *Program Validation, *Textbook Evaluation, Curriculum, Curriculum Development, Program Evaluation, Secondary Education, Vocational Education

Identifiers — Oklahoma

A field test evaluated "Auto Mechanics I" curriculum materials developed and published by the Curriculum and Instructional Materials Center, Oklahoma State Department of Vocational and Technical Education. The results and conclusions reported relate to student achievement and teacher evaluation and comments for each of the 23 units of the manual. In general, the evaluation and comments were favorable. The total for all schools indicates that on only six of the 23 units that were analyzed did students fail to reach the arbitrarily set 80 percent success level. This analysis is useful in the total evaluation of the curriculum manual as a whole; however, it fails to take into account the concepts being learned — how important they were in relation to the performance, and how difficult they were to grasp. The major conclusion of the research unit is that the curriculum meets the needs of most of the instructors. It is recommended that future studies be done in regard to student achievement as related to performance skills. (Because of the lack of response concerning the use of many of the job sheets and assignment sheets in the manual, no conclusions can be drawn from the students' achievement on the cognitive tests to determine their ability to perform the skills themselves.) Identifiers — Resource Management

This curriculum guide contains four units for a secondary consumer and homemaking education course in dynamics of living. Unit titles include (1) Understanding Ourselves (Personality, Human Needs, Value Clarification), (2) Interpersonal Relationship (Developing Relationships, Communication, Accepting Responsibility, Conflict and Change), (3) Decision Making, and (4) Managing Resources. Each unit is organized around a broad goal and a number of more specific sub-goals related to a single topic covered in the unit. A five-column format is used to present content, student objectives, teacher/learner activities, method of evaluation, and teaching/learning aids. Content information, student objectives, and learning activities are suggestions only. The "Method of Evaluation" column is left blank, so that the teacher can choose the technique most appropriate for the learning activity chosen. An appendix contains Guidelines to Insure Sex Fairness in Education Division Communications and Products. (YLB)

Descriptors — *Curriculum Development, *Food Service, *Occupational Home Economics, *Program Development, *Student Experience, *Work Experience Programs, Behavioral Objectives, Course Content, Course Descriptions, Job Training, Program Descriptions, Program Implementation, Rural Education, Rural Schools, Secondary Education

This guide shows teachers how to offer successfully a food service program as part of the home economics curriculum. It describes a rural, secondary-level food service program — a bakery service offered to the community — and gives step-by-step instructions for starting the program as well as guidelines for developing it each year. The first section discusses establishing the program, including facilities and equipment, scheduling and enrollment, teacher organization, and financial requirements. The second section provides a concept outline and general calendar as the basic framework for a two-year food service curriculum. Student objectives are listed. Operating the food service program is the focus of the third section. Topics covered include ordering supplies and groceries, safety and sanitation, cleaning and maintenance, student job assignment, menu planning, shortcuts to production, recordkeeping, selling procedures and policies, profits, and public relations. A section of selected resources lists some sources of technical assistance, textbooks, reference books, and suppliers of instructional materials, food service, equipment, and groceries. Appendixes include sample menus and job assignments, and recordkeeping, order, and student employee evaluation forms. (YLB)

EDRS Price — MF01/PC05 Plus Postage

Descriptors — *Home Economics, *Inservice Teacher Education, *Role Perception, *Sex Fairness, *Sex Stereotypes, *Values Clarification, Independent Study, Instructional Materials, Learning Activities, Role Conflict, Secondary Education, Self Evaluation Individuals, Sex Bias, Values, Values Education

This sourcebook is designed to help home economics teachers clarify their values regarding changing roles of women and men and sex stereotyping and to be able to present values clarification to their students. The sourcebook is designed first as a self-study for home economics teachers, and second, as a source for teaching ideas/techniques. The first section presents a rationale for why teachers should educate for changing roles. In the second section, the negative effects of stereotyping are discussed; an attempt is made to increase the teacher's awareness level with regard to his/her own stereotypical biases and attitudes; and ways are suggested to eliminate implicit and explicit sex-role stereotyping from the classroom. The third section contains a collection of teaching ideas to try in each of the content areas of home economics. Exercises and self-assessment sheets for both teacher and students are included. Also included is the report of sex stereotyping in a sample of home economics textbooks. (KC)

Identifiers — Alaska

This guide suggests teaching topics, activities, and resources for rural home economics teachers in Alaska. It is divided into seven chapters. Six are devoted to each of the main teaching areas in consumer and homemaking education: personal/family relationships, foods/nutrition, housing/home management, consumer education/resource management, child development/parenting, and clothing/textiles. The last chapter includes a variety of resources, especially some unique to Alaska. Each of the first six chapters is further divided into these sections: Teaching Topics (in outline form with major and subconcepts), Teaching Activities (brief descriptions), and Teaching Resources. The resources are grouped according to each of the major concepts. If available and/or necessary, a brief description of the resource, as well as the price, is provided. Sources are given for ordering the materials; addresses are found in the Resources chapter. Chapters on foods/nutrition and clothing/textiles also include a number of miscellaneous helps. The Resources chapter is divided into three sections: Student Texts/Reference Books (by area), Addresses (for ordering instructional materials), and Miscellaneous, which contains information about Alaskan resources, including the Rural Student Vocational Program, Alaska Knowledge Base, and Vocational Education Curriculum Resource Center. Identifiers — Job Cards, Resumes

This workbook is intended to teach disadvantaged, handicapped, or "hard-core" unemployed persons to find their own jobs. Although the book is designed for a self-study approach, it is important that a trainer/instructor/vocational counselor be available for assistance. The eight chapters cover (1) Employer Expectations (appearance, attendance/punctuality, skills/abilities/interests), (2) Data Sheets, (3) Application, (4) Job Card, (5) Telephone Contact, (6) Interview, (7) Job Leads, and (8) Resume. Each section begins with the instructor's guide, providing this information: goals and objectives, physical set-up and equipment, time required and relation of material to group size, role of trainer, verbal instructions, suggestions for individualizing training techniques, and closing the session. The job seeker's section contains informational materials, exercises, learning activities, sample forms, and examples. (YLB).

Identifiers — Georgia, Work Activity Centers

This program guide examines a comprehensive occupational preparation program for the handicapped that is fiscally responsible, in concert with current practice, and has practical application possibilities. Section 1 is a position statement for the guide. Section 2 is a diagram showing program goals and objectives. The purpose of section 3 is to examine occupational preparation for the handicapped individual within existing service delivery models in Georgia. It centers around the four major service delivery models that currently exist: work activity center, self-contained class setting, resource class setting, and regular class setting. Each is examined in regard to four component areas (identification, assessment, individual program plan/individual education program development, instructional alternatives), and each component area is addressed in terms of basic concepts, strategies, role definitions, and recommendations. Section 4 regards additional factors for consideration in program development, including job placement, program evaluation, financing, teacher education, vocational education youth club organizations, career counseling, and advisory groups. Section 5 contains program guide implementation strategies. A directory of interagency contact persons throughout Georgia is presented in section 6. (YLB).

Secondary School Guidance Curriculum, Grades 7-12.

Georgia State Dept. of Education, Atlanta

Pub Date — 81

Note — 354p

Pub Type — Guides / Methods / Techniques — Non-Classroom Use (055)

EDRS Price — MF01/PC15 Plus Postage

Descriptors — *Career Development, *Career Guidance, *Competency Based Education, *Curriculum Development, *Guidance Programs, *Program Development, Behavioral Objectives, Competence, Models, Secondary Education, Secondary Schools, Skills

Identifiers — Georgia, Georgia Comprehensive Guidance Model

This manual provides a framework for guidance curriculum development for use by planners involved in creating or improving a guidance program in secondary schools. These materials represent a competency-based approach based on the Georgia Comprehensive Guidance Model and provide a comprehensive structure of the knowledge, skills, and attitudes that students can derive from a developmental guidance program. (A summary of the Model is appended.) Guidance curricula are presented separately for each of grades 7-12. They are organized in this format: content, role, goal, objective as defined in the Model; competency; performance indicators; and suggested performance level. Forms for secondary school guidance progress reports, grades 7-12, are provided. The manual concludes with an overview of grade level competencies for Grades K-12 for each of the eight principal content areas. (YLB).

Descriptors — *Administrator Education, *Competency Based Education, *Curriculum Development, *Educational Administration, *Job Skills, *Vocational Education, Administrator Role, Articulation Education, Behavioral Objectives, Case Studies, Competence, Experiential Learning, Higher Education, Inservice Teacher Education, Learning Activities, Learning Modules, Management Development, Preservice Teacher Education, Staff Utilization

Designed to provide pre- and inservice vocational education administrators with the skills necessary to direct the curriculum development process, this competency-based module contains an introduction and three sequential learning experiences. Each learning experience consists of an overview, required and optional learning activities, a self-check section, and a series of model answers for use with the self-check section. Topics covered in the first learning experience include directing curriculum development, staff involvement, the need for articulation in curriculum development, and steps in the curriculum development process. Critiquing administrator performance in a case study of a curriculum development project is dealt with next. The final learning experience involves directing the curriculum development process in an actual administrative situation. (Related competency-based vocational education administrator modules covering direct program evaluation, improving instruction, program promotion, staff development, and student recruitment and admissions are available separately through ERIC — see note.) (MN).

Designed to provide pre- and inservice vocational education administrators with the skills necessary to guide the development and improvement of instruction, this competency-based learning module consists of an introduction and three sequential learning experiences. Each learning experience contains an overview, required and optional learn-

ing activities, a self-check section, and a series of model answers for use with the self-check section. Topics covered in the first learning experience include the scope of the administrator's responsibility in developing and improving instruction, facilitating the conventional approach to instruction, assessing instruction, and facilitating the competency-based approach to instruction. Evaluating the performance of an administrator in a given case study in guiding staff in selecting and using a new instructional strategy and creating a climate for improving instruction are discussed. The final learning experience involves guiding the development and improvement of instruction in an actual administrative situation. (Related competency-based vocational education administrator modules covering program evaluation, curriculum development, program promotion, staff development, and student recruitment and admissions are available separately through ERIC — see note.) Identifiers — Educational Brokerage

Designed to provide pre- and inservice administrators with the skills necessary to select appropriate program development and implementation, and monitor and evaluate their success, this competency-based learning module consists of an introduction and four sequential learning experiences. Each learning experience contains an overview, required and optional learning activities, a self-check section, and a series of model answers for use with the self-check section. Topics covered in the first learning experience include procedures for promoting vocational education programs (needs assessment, determining the audience, setting goals, and planning the program) and the role of the administrator in the program promotion process. Alternative promotional techniques, planning an open house, audience, and school/community relations are among the areas examined in the second learning experience. Also discussed are developing plans for publicizing and promoting a hypothetical vocational education program. The final learning experience entails promotion of a vocational education program in an actual administrative situation. (Related competency-based vocational education administrator modules covering curriculum development, program evaluation, improving instruction, staff development, and student recruitment and admissions are available separately through ERIC — see note.) Designed to provide pre- and inservice vocational education administrators with background information and hands-on experiences for acquiring the skills necessary to direct a program evaluation, this competency-based learning module contains an introduction and four sequential learning experiences. Each learning experience consists of an overview, required and optional learning activities, a self-check section, and a series of model answers for use with the self-check section. Topics covered in the first learning experience are the purpose of program evaluation, evaluation methods, and cost effectiveness/benefit analysis of postsecondary vocational programs. Developing evaluation plans, preparing to implement an evaluation plan, and program evaluation skills for administrators are among the areas examined in the second learning experience. Discussed next are using evaluation data, presenting evaluation reports, and developing and evaluating conclusions and recommendations. The final learning experience involves actually directing a program evaluation. Descriptors — *Career Education, *Career Planning, *Daily Living Skills, *Disabilities, *Exceptional Persons, *Special Education, Behavioral Objectives, Career Exploration, Citizenship Responsibility, Communication Skills, Consumer Education, Course Content, Curriculum, Curriculum Guides, Educational Resources, Individualized Education Programs, Individualized Instruction, Job Skills, Labor Relations, Leisure Time, Money Management, Safety, Secondary Education, Self Care Skills, Unions

Identifiers — Coordinated Career Education Curriculum Project, Life Skills

This document is a suggested course of study for a secondary coordinated career education program. It is designed to meet many of the life-skill needs of special needs learners. The course of study is designed in three levels. These levels correspond to an individual's amount of knowledge attained, level of skill developed, or awareness and insight cultivated. Mastery of one level makes it possible to proceed to the next level of work in a given area. These do not correspond to a given grade or age. The learning may be repeated in as many variations as is necessary in order to assure that the level has been reached and that the student is ready to progress to the next level or the next section. Level 1 of the guide contains four sections, encompassing eighteen units. Material covered includes introduction to the coordinated career education program, personal care and responsibilities, career exploration and planning, and pre-employment readiness. Level 2's seven sections (20 units) cover the following material: personal management, pre-employment skills, effective communications, employment safety, job readiness, personal finance, and Individualized Educational Programs in specific skills. The five sections of level 3 (15 units) cover adult living, labor relations, consumer education, citizenship responsibilities, and management of leisure time. Each unit contains learning objectives and resources. (KC)

Identifiers — Distributive Education Clubs of America, Illinois State Board of Education

This curriculum guide has been designed to provide the curriculum coordinator with a basis for planning a comprehensive program in the field of business marketing, as well as to provide the marketing and distributive education teacher-coordinator with maximum flexibility. The essential common and specialized competencies have been identified and listed in 11 instructional areas based upon structured interviews with personnel in various types of business and personal service firms and associations in the state of Illinois. Competencies were organized into instructional clusters and an objective written for each cluster to facilitate the organization of instruction for the teacher-coordinator. A number of learning activities are suggested for each competency to

enable teachers to determine which one(s) would best serve their teaching methods and their students' learning styles. Instructional materials are listed in the reference column of each competency and in the bibliography of instructional materials. The competencies cover the following instructional areas: advertising, communications, display, human relations, marketing/economics, management, mathematics, merchandising, operations, product/service technology, and selling. (These instructional areas are the same ones that are used by the Distributive Education Clubs of America for their competency-based competitive events program and for other curriculum projects.) Home Economics Special Needs Activity Guide.

South Carolina State Dept. of Education, Columbia Home Economics Education Section

Pub Date — 81

Note — 202p.

Pub Type — Guides / Methods / Techniques — Classroom use — Teaching Guides (052); Guides / Methods / Techniques — Non-Classroom Use (055)

EDRS Price — MF01/PC09 Plus Postage

Descriptors — *Disabilities, *Home Economics, *Home Economics Skills, *Individualized Education Programs, *Learning Activities, *Mainstreaming, Curriculum Development, Hearing Impairments, Job Skills, Learning Disabilities, Mental Retardation, Normaliza-

tion Handicapped, Physical Disabilities, Resources, Special Education, Speech Handicaps, Visual Impairments
Identifiers — South Carolina

The purpose of this activity guide is to aid the home economics teacher to teach more successfully life and employment skills to special needs students. It offers suggestions for the home economics teacher with handicapped students to use to adapt teaching materials and/or facilities sufficiently to meet the goals of these special students. The guide is divided into four parts. The first part generalizes considerations for special needs students, delineates the objectives of the South Carolina Department of Education, and suggests strategies for development of Individualized Educational Plans. The second section describes the characteristics of various handicapping conditions (visual impairments; hearing impairments; speech impairments; learning disabilities; physical handicaps; educable, trainable, and profound mental handicaps; and emotional handicaps) and teaching/learning strategies to be used with students with these conditions. In the third section, activities are suggested for teaching special needs students skills in the following areas: child development, consumer education, clothing, grooming, nutrition and food use, self-concept, and careers. The fourth section lists resource persons, agencies, companies, and resource books. (KC).

Identifiers — Floral Designers

This document consists of the student manual for a course in retail flower shop sales and floral design for use in vocational education courses in high schools in South Carolina. The guide consists of 22 learning modules that incorporate the subject matter needed by workers in these jobs. Each learning module consists of an introduction, directions, objective, learning activities, instruction sheets, student self-check, check-out activities to demonstrate proficiency in the tasks to be learned, and a teacher's final checklist. The lessons are illustrated with line drawings, and audiovisual presentations are available for teacher use with some modules. Topics covered by the learning modules include the following: maintaining designer's tools; sharpening knives; conditioning cut flowers; fertilizing and watering plants; wiring flowers; tying bows for corsages and potted plants; boxing cut flowers; explaining the care of cut flowers to customers; designing corsages; writing enclosure cards; boxing corsages; designing terrariums; explaining terrarium construction and care; explaining how to plant planters; dressing potted plants; explaining care of potted plants to customers; telephoning orders to wholesalers; unpacking boxes and receiving incoming merchandise; wrapping floral merchandise; routing deliveries; writing customers' monthly statements; and designing bud vases. (KC).

Descriptors — *Crime, *Investigations, *Law Enforcement, *Police Action, *Police Education, Behavioral Objectives, Curriculum, Curriculum Guides, Police, Postsecondary Education, Teaching Guides

Identifiers — Fraud, White Collar Crime

This model curriculum is addressed to the training needs of personnel working in general white-collar crime assignments located in state and local police or prosecutors' offices. It is designed intentionally to orient personnel to the requirements of building a case as it moves along the enforcement process. Materials on trainer use and modification of the model curriculum appear first. They cover adaptation to meet specific needs, recruiting and orienting instructors, selecting participants, and obtaining instructional materials. The comprehensive curriculum is organized into 14 enforcement issues, including orientation (introduction, relationship of white-collar crime to other crime problems), investigative planning, detection (conducting searches for violations, intelligence collection and analysis, handling of complaints), detection and investigation (locating sources of documentary information, employing financial investigation tools), investigation (interviewing victims and witnesses, interviewing suspects, computer-related fraud, using the computer as an investigative aid), and post-investigation (presentation of completed investigation to prosecutor, use of civil and administrative remedies). For each issue this information is provided: instructional goal, rationale, training objectives, and resource materials. (YLB).

Identifiers — Heat Pumps, Heat Transfer, Oregon

This module on heat transfer is one of six in a series intended for use as supplements to currently available materials on solar energy and energy conservation. Together with the recommended texts and references (sources are identified), these modules provide an effective introduction to energy conservation and solar energy technologies. The

Module is divided into these sections: (1) set of objectives; (2) programed instructional material, consisting of short readings describing ideas and techniques one step at a time, and a question or problem on each reading; (3) review questions and answers at intervals; and (4) posttest. Objectives for this module are for the student to be able to describe heat transfer and compute heat transfer rates. (YLB).

This module on solar system design fundamentals is one of six in a series intended for use as supplements to currently available materials on solar energy and energy conservation. Together with the recommended texts and references (sources are identified), these modules provide an effective introduction to energy conservation and solar energy technologies. The module is divided into these sections: (1) set of objectives; (2) programed instructional material, consisting of short readings describing ideas and techniques one step at a time, and a question or problem on each reading; (3) review questions and answers at intervals; and (4) posttest. Objectives for this module are for the student to be able to describe examples of basic types of solar heating systems, outline three major steps in design of a solar heating system, and perform each of those three major steps. (YLB).

This guide is intended to aid teachers in the instruction of radio and television repair by creating competencies that have been identified by the Electronics Service Industry and structuring them into progressive learning blocks. These competencies aid students on the job and also facilitate transferability of students between programs in different colleges and from high school to community college. The guide is meant to be used in any order and in any amount the teacher wishes. The guide contains building blocks for learning, objectives for functional analysis, competencies, vocational skills record, television-radio curriculum, suggested textbooks, sample texts, and lists of audiovisual aids. A task inventory for television service and repair and radio repair is included to be used by the teacher to record completion of competency requirements for various tasks by the students. (KG)

This curriculum guide provides topic outlines and objectives for units in a three-level/course Power Technology program. Introductory materials are objectives for industrial education and for power technology and list of general safety rules. Units contained in Level I, Power Technology, are History of Power, Basic Machines, Forms of Power, Power Resources, Basics of Electricity, Measuring Energy, The Energy of Motion, Hydraulics, Pneumatics, Types of Engines, and Small Gasoline Engines. Level II, Introduction to the Automobile, has these units: Introduction to the Course, Engine Operation, Cooling System, Brakes, Electrical System, Lubrication, Fuel System, Ignition System, Introduction to Shop Activities, Manual Transmission, and Clutches. Units in Level III, Advanced Automotive Mechanics, are Introduction to the Course, Cooling System, Ignition, Emissions, Fuels, Engines, Suspension, Steering, Alignment, Charging Systems, Starting Systems, Differentials, and Air Conditioning. These two student workbooks with texts for a secondary-postsecondary level course in painting comprise one of a number of military-developed curriculum packages selected for adaptation to vocational instruction and curriculum development in a civilian setting. The two-part self-study course is designed to provide the student with basic information on safety, equipment, and procedures in painting. Painting I contains four lessons dealing with materials and equipment: Safety, Protective Coating Materials, Protective Coating Equipment, and Ladders, Scaffold, and Metal Corrosion. Painting II contains four lessons dealing with application procedures: Painting Wood Surfaces, Painting Masonry Surfaces, Painting Metal Surfaces, and Inspection of Surfaces. Each lesson is organized in this format: text assignment, objective, review exercises, and answers keyed to the coded text for self-evaluation. The text follows the lessons in each part. Thirty-question final examinations are provided for each unit, but no answers are available. (YLB).

Identifiers — Iowa, Mopeds.

Intended for present and future operators of mopeds, this curriculum guide is designed to aid in the instruction of safe moped operation and control. Its objective is for these operators to increase their understanding of the various knowledge, skills, and performance factors that affect their safety as well as the safety of other street and highway users. Introductory materials include an overview of course contents, legal considerations (specific to Iowa), need for a moped education course, and information on various aspects of program development and operation, such as financing, insurance, facilities, equipment, program guidelines, teacher qualifications, scheduling guidelines, program evaluation, and instructional objectives. The course is composed of these five units: (1) Operator and Moped Preparation, (2) Basic Control Skills, (3) Safe Riding Practices, (4) Complex Situations, and (5) Moped Care. Each unit has a stated purpose and contains a number of functions (instructional components), each of which has performance, knowledge, skill, and/or attitude objectives. Appendixes include listings of audiovisual and printed materials, list of moped concepts by unit and function, and brief description of some moped skill exercises. (YLB)

This instructional guide contains guidelines and course outlines for two- and three-year course in agricultural science and mechanics for students in grades 8, 9, and 10. Provided in the first 4 sections are course outlines for Agricultural Science and Mechanics I and II and references for use in each course. Each course outline contains an analysis Grade 8; Grade 9; Grade 10; Course Descriptions; Instructional Materials; mechanics, principles of soil science, principles of plant science, rural and urban living, leadership training, and resource conservation. Topics covered in the individual analyses include unit concepts, suggested student performance objectives, examples of student learning activities, competencies, career guidance, and exploring opportunities on on- and off-farm agricultural occupations. The remaining five sections of the guide present suggested instructional materials and references for the course outline, recommended facility plans, lists of recommended equipment and tools, criteria for quality vocational programs in agricultural education, and a list of agricultural education publications. This document is a guide to aid teachers in incorporating the use of calculators in the high school Accounting Curriculum. The guide contains four learning modules. Each module consists of an introductory explanation, student performance objectives, content of the module, and teaching suggestions for using calculators in each application of course content. The four modules cover the following topics: bookkeeping/accounting cycle for a service business; bookkeeping/accounting cycle for a merchandising business; multi-bookkeeper system; and simulation of a bookkeeping/accounting system for merchandising business. Methods of evaluation and a time frame for using this material are included. A chart of flowcharting symbols, flowcharting methods for solving problems on calculators, a list of audiovisual aids, and a bibliography are also contained in the guide. (KC)

This document is a guide to aid teachers in incorporating the use of calculators in the high school Accounting II curriculum. The guide contains 16 learning modules. Each module consists of an introductory explanation, student performance objectives, content of the module, and teaching suggestions for using calculators in each application of course content. The modules cover the following topics: review of basic accounting principles and procedures; departmental accounting; payroll accounting, bad debts, depreciation and accruals; partnership; voucher system, inventory control, and budgetary control; taxes; notes receivable, notes payable, drafts, and trade acceptances; corporations; the stock market; income tax; automated accounting; cost accounting; special sales; and management use of accounting data. The final module is a review for the New York State Regent's Exam, including a review of two years of accounting. A chart of flowcharting symbols, flowcharting methods for solving problems on calculators, a list of visual aids, and a bibliography are also contained in the guide. (KC)

Descriptors — *Audiovisual Aids, *Competency Based Education, *Distributive Education, *Instructional Materials, *Marketing, *Occupational Information, Abstracts, Advertising, Annotated Bibliographies, Behavioral Objectives, Business Administration, Communication Thought Transfer, Educational Resources, Elementary Secondary Education, Fashion Industry, Human Relations, In-

structional Innovation, Job Skills, Mathematics, Merchandising, Periodicals, Postsecondary Education, Professional Associations, Resource Materials, Salesmanship, Sales Workers, Supervisory Training, Tests, Unions

This resource guide for classroom teachers contains annotations of resources representing recent instructional development in competency-based education for distributive education. It is also intended to assist curriculum specialists, administrators, and supervisors in development of performance-based instructional programs. The guide is divided into three sections. The first provides occupational information for use as reference material in developing instructional materials, student career information, and guidance information. Section 2 contains descriptions of two categories of curriculum resources — print and nonprint materials. Printed instructional materials include curriculum guides, course outlines, learning activity packages, task analyses, occupational inventories, student manuals, performance objectives, and tests. Non-print materials include 16mm films, filmstrips, filmloops, slides, and transparencies. Each of the two sections is divided into ten subject areas: Selling, Human Relations, Advertising, Mathematics, Communications, Display, Merchandising/Marketing/Distribution, Management, Fashion, and General. Each reference provides the following information: title, publisher or source with address, annotation, number of pages or length, and cost. A listing and description of periodicals related to health occupations is also provided. The guide's third section lists names and addresses of trade and professional organizations. (YLB)

EDRS Price — MF01/PC11 Plus Postage

Descriptors — *Career Counseling, *Career Guidance, *Counseling Techniques, *English Second Language, *Hispanic Americans, *Spanish Speaking, Annotated Bibliographies, Community Colleges, Community Resources, Counselor Role, Dropout Prevention, Educational Legislation, Educational Resources, Education Work Relationship, Ethnic Stereotypes, Job Search Methods, Literature Reviews, Non-English Speaking, Secondary Education, Self Concept, Student Evaluation, Student Recruitment, Two Year Colleges, Vocational Education, Work Experience Programs

Identifiers — Bilingual Materials, Limited English Speaking

This resource guide provides help for the counselor attempting to give career advice to Spanish-speaking and Chicano students in high schools and community colleges. The guide is presented in nine sections. The first section provides an overview and general information about Hispanics, along with a review of the literature and an annotated bibliography. Sections 2-4 concern student assessment, language program placement, and affective considerations (such as self-image and decision making) of the student. Section 5 concentrates on techniques for retaining students in school and counseling those who are leaving school. Section 6 describes the education-work relationship and suggests such strategies as cooperative work experience programs, vocational programs, and career guidance. In section 7, job search and interview techniques to be taught to students are presented. Section 8 is an annotated bibliography of Spanish language materials for students; while section 9 suggests additional program development resources, including vocational education law as it applies to minorities, student recruitment strategies, and evaluation of counseling programs. This document is a teacher's guide for a unit in the college animal science curriculum. It is intended to be used for 20 hours of instruction for freshmen as an introduction to animal science. It explores the livestock industry and builds a foundation for livestock selection. The unit's objectives are to help the student develop an understanding of the history, importance, and functions of the livestock industry, and the ability to identify animal parts, select livestock, and to identify breeds of livestock. The unit is divided into material for six jobs, as follows: (1) examining the history of the livestock industry; (2) recognizing the importance of the livestock industry; (3) understanding the functioning of the livestock industry; (4) identifying animal parts; (5) selecting livestock and giving reasons for the selection; and (6) identifying breeds of livestock. Each of the jobs includes objectives, guide questions, references, an approach to interest students, key facts about the content of the material, student learning activities, and transparency masters. A list of the names and addresses of breeding associations for beef, swine, sheep, dairy cattle, and horses is included as part of job six. (KC)

This document is a teacher's guide for a unit in the college metalworking curriculum. It is intended to be used for four weeks of instruction for freshmen as an introductory course in metalworking. The unit is designed to give the student basic knowledge, fundamentals, and skills in metalworking. The unit's objectives are to develop in students the abilities to identify various types of metals and their uses, to interpret plans used in cold metalworking, to identify and use metalworking tools, and the ability to solder. The unit is divided into material for four jobs, as follows: (1) identifying types of metal; (2) interpreting plans; (3) identifying and using metalworking hand tools; and (4) soldering. Each of the jobs includes objectives, guide questions, references, an approach to interest students, key facts about the content of the material, student learning activities, worksheets, and transparency masters. This document is a teacher's guide for a unit in tractor and machinery safety for college freshmen. It is intended to be used for 10 hours of instruction for freshmen who are intending to work on or around machinery. Safety hazards directly and indirectly related to many types of machinery are covered in addition to tractors. The objectives of the unit are to help students to develop an understanding of farm accident prevention and the ability to identify types of tractors and machinery and the use of each, to operate a tractor safely, and to perform basic tractor and truck maintenance. The unit is divided into material for four jobs, as follows: (1) identifying types of tractors and machinery; (2) understanding farm accident prevention; (3) operating a tractor safely; and (4) maintaining tractors and trucks. Each of the jobs includes objectives, guide questions, references, an approach to interest students, key facts about the content of the material, and transparency masters. The material can be used to fulfill student requirements for the Tractor Operator's Training Certificate if certain provisions are met. (A student manual coordinated to the unit is available.) (KC)

This document is a teacher's guide for a unit in vocational agriculture for college freshmen. It is intended to be used for 20 hours of instruction as an introductory course on the crop industry. It provides a broad background of the industry, including production, marketing, processing, and transportation, with emphasis on identifying major crops and their uses. It also covers the first phases of the production cycle. (Subsequent units in plant science and crop production build upon this unit.) The objectives of the unit are to help students to develop an understanding of the functioning of the crop industry; an ability to identify primary plant parts, major North Dakota crops and their uses, and prohibited and restricted noxious weeds; in addition to the ability to determine seed quality and to prepare seed for planting. The unit is divided into material for six jobs, as follows: (1) examining the crop industry; (2) identifying plant parts; (3) identifying major North Dakota crops and their uses; (4) identifying weeds; (5) determining seed quality; and (6) preparing seed for planting. Each of the jobs includes objectives, guide questions, references, an approach to interest students, key facts about the content of the material, worksheets, and transparency masters. (KC).

EDRS Price — MF01/PC02 Plus Postage

Descriptors — *Computer Graphics, *Computer Oriented Programs, *Computers, *Drafting, *Industrial Education, *Workshops, In-service Teacher Education, Postsecondary Education, Program Implementation, Surveys, Two Year Colleges

Identifiers — Computer Assisted Drafting

This mini-course and article are presentations from a workshop on computer-aided drafting. The purpose of the mini-course is to assist drafting instructors in updating their occupational knowledge to include computer-aided drafting (CAD). Topics covered in the course include general computer information, the computer in drafting, CAD terminology, CAD hardware, CAD software, CAD benefits, CAD drawbacks and limitations, and approaches for implementing CAD instruction in the classroom. The article reports on a survey of drafting instructors in Florida to determine their specific questions about computer drafting. Questions identified by the instructors as being of concern to them and the answers that were provided for them by sources in business, industry, and education are presented. These 18 questions include: What is computer drafting? What types of drafting can be done with a computer? Who develops the programs? What specific computer-related skills will drafters need? What topics should be included in a computer drafting course? How can the drafting instructor best update skills to prepare to teach CAD? and How can funding be acquired to cover the cost of purchasing a computer drafting system? Four sample drawings are provided. (YLB).

Identifiers — Bilingual Materials, Combustion, Soldering

Designed for use in bilingual education programs, this industrial arts safety guide presents guidelines for developing a student safety program and three sections of shop safety practices in both English and Chinese. Safety program format, safety committees, safety inspection, and student-accident investigation are discussed in the section on developing a student safety program. Set forth in the section on general safety practices are safety instructions for all areas of industrial arts; safety rules for machine tools, hand tools, and portable electric hand tools; housekeeping; back strains and proper lifting; safe lifting; materials handling; personal practices and conduct; and fire control. Safety procedures relating to automotive and power mechanics; compressed gas; drafting room; dusts, fumes, and combustible materials; foundry prac-

tices; flammable and combustible liquids; electricity/electronics; graphic arts; soldering; and storage batteries are covered. Specific machines examined in the section on safety procedures for machines include buffers, drill presses, forges, grinders, jointers, lathes, milling machines; planer-surfacers, presses, sanders, saws, metal shapers, shears, sheet metal machines, and welders. (Corresponding bilingual guides containing material in Korean, Thai, Cambodian, Japanese, and Ilokano are available separately through ERIC — seenote.) (MN).

Identifiers — Entrepreneurs, Small Businesses

Entrepreneurship is a career option through which home economics teachers can challenge their students who have the independence, skills, and self-discipline necessary to succeed as small business owners. This unit was developed to assist home economics teachers in incorporating an entrepreneurial dimension into their programs. The unit contains 15 lessons with objectives, generalizations, and classroom activities. Each lesson is designed for a 50-minute class period; hence, about three weeks of class time are necessary to implement the unit. The lessons contain background information for teachers, in addition to student worksheets, student reference sheets, guest speaker guidesheets, vocabulary lists, and achievement tests. The materials may be duplicated for classroom use. Activities include case studies, field trips, readings, guest speakers, and class discussions. A small group format is suggested. The 15 units cover the following topics: nature of small business; goal setting; product determination; advertising; business location; business expenses and capital; banker visit; types of business organizations; financial management; business recordkeeping; customer and employee relations; small business owner visit; and self-evaluation of small business ownership. The last unit is an achievement test; possible assignments for make-up work also are given. (KC).

CE Programmer's Manual.

British Columbia Univ. Vancouver, Center for Continuing Education

Spons Agency — British Columbia Dept. of Education, Victoria, Continuing Education Div

Pub Date — 81

Note — 155p.; Best copy available

Pub Type — Guides / Methods / Techniques — Non-Classroom Use (055)

EDRS Price — MF01/PC07 Plus Postage

Descriptors — *Communication Thought Transfer, *Continuing Education, *Educational Planning, *Personnel Management, *Program Development, *Program Evaluation, Course Evaluation, Curriculum Development, Job Skills, Needs Assessment, Program Administration, Program Guides, Program Implementation, Publicity, Public Relations, Self Evaluation Individuals

Designed as a reference guide for continuing education planners, this manual provides basic information about the process of developing and delivering programs and courses. Material is organized to match job skills described in the systematic approach called DACUM — Designing a Curriculum — which reflects all skills required to be a continuing education programmer or coordinator. (A DACUM chart is provided.) Seven chapters correspond to the seven general areas of competence programmers are expected to perform: assess community needs, plan courses and programs, promote and market courses and programs, manage courses and programs, manage personnel, practice communication skills, and conduct evaluation. Each chapter is organized by the enabling skills making up the area of competence. Basic information is provided about each area. Case studies are sometimes provided as examples and explanations of incidents that may be encountered. Other materials provided include checklists or lists of guidelines to organize activities and samples of program materials and resources. An annotated list of sources for further reading appears at the end of each chapter. An index is provided. A final section contains a copy of the Ministry of Education's "Continuing Education Mini-Resource Library" catalog listing available reports and curriculum resources. (YLB).

Identifiers — Future Farmers of America, Oregon

This curriculum package was developed to be used as a guide for high school vocational agriculture teachers in Oregon preparing a curriculum to meet local community/regional needs. A second goal of this curriculum is to eliminate sex-bias or sex-role stereotyping in vocational agriculture classes. The curriculum contains 20 units. Topics covered in the units include an introduction to the vocational agriculture curriculum, including the problem of sex bias, and a four-year unit outline; orientation; tractor operation and safety; Future Farmers of America; small gasoline engine maintenance; beef breeds, selection, and management; supervised occupational experience programs; records; parliamentary procedure; sheep breeds, selection, and management; dairy, poultry, rabbits, horses, and goats; swine breeds, selection, and management; agricultural mechanization; plant science; ornamental horticulture; alfalfa production and hay quality testing; and livestock showing and fitting. Units contain a variety of materials, such as teaching suggestions, content outlines, student worksheets, suggested learning activities, and transparency masters. (KC).

Descriptors — *Consumer Education, *English Curriculum, *Mathematics Curriculum, *Science Curriculum, *Social Studies, Advertising, Banking, Behavioral Objectives, Budgeting, Conservation Environment, Consumer Economics, Consumer Protection, Credit Finance, Curriculum Guides, Gifted, Insurance, Learning Activities, Secondary Education, Slow Learners, Student Evaluation, Taxes

These four consumer citizenship curriculum guides for social studies, English, science, and mathematics incorporate consumer education into these subject matter areas in grades 8-12. Each guide is organized around 10 main component/goals. They are basic economics in the marketplace, credit, consumer law/protection, banking skills, comparison shopping for goods and services, advertising and our society, responsible budgeting, insurance, taxes, and conservation of energy and resources. Each specific objective under the goals lists performance indicators and suggested evaluation for each one. A taxonomy provides the teacher with consumer knowledge related to the performance indicator. Suggested learning experiences provide activities directly or indirectly related to the specific objectives. Learning experiences for the gifted and slow learner follow the social studies, English, and science guides. A section for the gifted in mathematics follows the mathematics guide. Appendixes include the Consumer Citizenship Curriculum Guide Grid, descriptions of the slow learner and gifted child, and a partially annotated list of selected resources. (YLB)

This document, one of eight in a multi-cultural competency-based vocational/technical curricula series, is on auto body repair. This program is designed to run 40 weeks and cover 7 instructional areas: use of basic repair tools; metal bumping (theory and practice); metal refinishing (theory and practice); panel replacement; glass work; spot welding; and basic frame straightening. A duty-task index lists competencies in each instructional area that the student should be able to perform at the end of the program. For example, in the glass work section, a student should be able to (1) adjust or align windows in doors; (2) remove damaged glass and install replacement; and (3) seal leaks around the windshield and rear window. In section 1, each instructional

Guidelines, Hand Tools, Lifting, Machine Tools, Metal Working, Power Technology, Safety, Safety Education, School Accidents, Secondary Education, Welding, Woodworking

This student section of a South Carolina industrial arts safety guide includes guidelines for developing a student-safety program and three sections of shop safety practices. Safety program format, safety committees, safety inspection, and student accident investigation are discussed in the section on developing a student safety program. Set forth in the section on general safety practices are safety instructions for all areas of industrial arts; safety rules for machine tools, hand tools, and portable electric hand tools; housekeeping; back strains and proper lifting; safe lifting materials handling; personal practices and conduct; and fire control. Section 4, on specific processes and operations, covers safety procedures relating to automotive and power mechanics; compressed gas; drafting rooms; dusts, fumes, and combustible materials; foundry practices; flammable and combustible liquids; electricity/electronics; graphic arts; soldering; and storage batteries. Examined in the section on safety procedures for machines are buffers, drill presses, forges, grinders, jointers, lathes, milling machines, presses, saws, sanders, megal shapers, shears, sheet metal machines, planer-surfacers, and welders. (A corresponding administrator and teacher guide is available separately through ERIC — see note.) (MN).

Identifiers — Noise (Sound)

This administrator and instructor section of a South Carolina industrial arts safety guide includes sections on responsibility for school safety, safety programming for the teacher, emergency action, suggested forms and outlines, and facility design and layout. School board and superintendent, administrator, and teacher responsibilities for school safety are outlined. Discussed in a section on safety programming for the teacher are instructional techniques, safety inspections, accident reporting and analysis, safe practices in the care and operation of equipment, housekeeping practices, electrical safety, fire safety, first aid planning, personal practices, and eye protection. Emergency communications and first aid procedures are described in section 4. Presented next are suggested forms and outlines, including forms for recording emergency telephone numbers and parent permission and acknowledgement slips, master checklists, hazardous conditions reports, and first aid and emergency procedures. Space allocation, lighting, ventilation, personal facilities, selection of machine tools, special hazards, and noise control are examined in a section on facility design and layout. Competency-Based Curriculum Guide for Laser Technology. September 1980-June 1981.

College of DuPage, Glen Ellyn, Ill

Spons Agency — Illinois State Office of Education, Springfield Div. of Adult Vocational and Technical Education

Pub Date — 81

Note — 182p

Pub Type — Guides / Methods / Techniques — Classroom use — Teaching Guides (052) Reports / Descriptive (141)

EDRS Price — MF01/PC08 Plus Postage

Descriptors — *Electronics, *Job Skills, *Lasers, *Mathematics, *Technical Education, *Technical Occupations, Algebra, Behavioral Objectives, Career Ladders, Competency Based Education, Course Objectives, Curriculum Guides, Electricity, Material Development, Optics, Resource Materials, Safety, Telecommunications, Trigonometry, Two Year Colleges

This document contains materials developed by a project to provide a competency-based curriculum guide for laser technology at the community college level. An abstract of the final report is included. Next, the 17 job competencies determined as-necessary to meet the job description of laser technician are listed. A career ladder and qualifications for each career are also provided. The three-part curriculum guide is divided into 16 units: Mathematics — 2 units (Algebra, Trigonometry); Electronics — 6 units (Basic Electricity I-III, Basic Electronics I-II, Electronic Communication); and Laser — 8 units (Laser Safety, Introduction to Lasers, General Optics I-II, Laser Optics, Laser Operation, Laser Measurements, Laser Applications). Each unit is divided into objectives, for each of which this information is provided: specifics (topics or concepts), proficiencies/specific objectives, evaluation, and references. A brief summary of teaching and evaluation strategies follows. The final section of the document contains instructional resources, including a list of lab equipment (item, manufacturer, model); bibliographic listings for laser and optics, electronics, physics, and mathematics (publishers addresses are provided); list of journals that have published laser-related articles; and a list of audiovisual resources. Identifiers — Bilingual Materials, Limited English Speaking, Project Mainstream, Vocational English as a Second Language

Intended for limited-English Spanish-speaking adult students, this manual contains an eight-chapter course in accounting. It is written in Spanish with key terms/concepts (and occupation-related vocabulary) translated into English appearing immediately following the Spanish in parentheses. Examples are provided in English only. The informa-

tion provided in the eight chapters covers (1) introduction to concepts of accounting, auditing, and balance sheet; (2) recording transactions and business papers; (3) adjusting accounts, preparing statements, and classification of balance sheet items; (4) worksheet and closing of accounts; (5) accounting for a merchandising concern; (6) accounting systems, purchase of assets used in the business, automated data processing, and input/output; (7) accounting for cash, voucher, and petty cash fund; and (8) payroll accounting, the Federal Security, and state unemployment insurance programs. (A companion teacher's manual is available as CE 029 940.) (YLB).

Identifiers — Time Management

Written for displaced homemaker programs in vocational-technical schools, this curriculum contains material designed so that instructors can prepare student manuals appropriate to almost any educational support situation for displaced homemakers. An overview provides information on special needs groups, curriculum use, and resources and sample publicity materials and intake form. Materials are divided into three categories, which are organized into units. Section and unit titles include Orientation (Preliminaries, History and Role of Women in the Work World), Self-Image (Self-Appreciation, Values Clarification, Decision Making and Practical Problem Solving, Communications), and Training (Assertiveness Training I, Managing Resources — Time and

Money, Job Readiness, Assertiveness Training II, Peer Counseling). The unit, Preliminaries, contains a get-acquainted exercise and assessment form. Each of the other units follows this format: unit objective, specific objectives, suggested activities, list of necessary instructional materials, references, information sheet, assignment sheets, unit test with answers, and survey (unit evaluation). Except for Assertiveness Training II, each unit is self-contained and can be used without reference to other units. (YLB).

Identifiers — Contests, Health Occupations Students of America, Hospitality Education

Designed for use by instructors and advisors of handicapped students, this guide presents guidelines for judging the performance of special needs students in Health Occupations Students of America (HOSA) competitive events in eight allied health occupations education areas. These areas are dietetics, first aid, hospitality, housekeeping, job seeking skills, laundry service, nursing assistants, and terminology/abbreviation. Discussed in the individual sections are the purpose of the competition, eligibility, dress, rules, equipment and materials, contest format, rating sheets, and suggestions for implementing the competition. Lists of suggestions to help teachers involve special needs students in HOSA competitive events and general suggestions for conducting contests are provided. Included among contest events are such activities as naming basic food groups, setting tables, executing first aid procedures, performing various housekeeping tasks, writing a resume, taking an interview, identifying laundry marks, sorting and folding clothes, making a bed, and explaining abbreviations. Identifiers — Alcohol Fuels

In order to help bring about the potential for alcohol production by the farming community, Navarro College (Texas) has developed this curriculum for secondary and postsecondary levels in alcohol fuel production. The alcohol fuel curriculum consists of five modules for use in practical hands-on vocational programs. The curriculum is designed to equip students to manage the alcohol production process. The modules contain a comprehensive bibliography, graphs, charts, and suggested resources for additional supportive documentation. Each unit also contains an introduction, objectives, a list of instructional materials needed, terms and definitions, information on the module topic, and

a summary of the module. In addition, examples of suppliers of raw materials are included. Subjects covered in the five modules include alcohol fuel production economics, chemistry, microbiology, engineering, and agricultural production. (KC).

Descriptors — *Correspondence Study, *Medical Assistants, *Medical Services, *Military Training, *Programed Instructional Materials, Allied Health Personnel, Behavioral Objectives, Enlisted Personnel, Health Occupations, Hospital Personnel, Independent Study, Inservice Education, Medical Evaluation, Postsecondary Education, Preventive Medicine, Primary Health Care

Identifiers — Navy

This Rate Training Manual (RTM) and Nonresident Career Course (NRCC) form a self-study package that will enable Navy senior hospital corps personnel to fulfill the requirements of their rating. While primarily developed around the requirements for personnel serving on independent duty, the information contained within it is applicable to all HM I & C personnel. Among the requirements discussed are the abilities to supervise and conduct sick call, including history taking, examination, diagnosing, and treating of sick call and emergency patients; recognizing and treating emergency dental conditions; performing health care inspections; performing and interpreting the results of elementary laboratory procedures; discharging environmental and preventive medicine functions such as sewage and refuse disposal, sexually transmitted disease contact interviewing and reporting, and food service sanitation procedures; ordering, receiving, and issuing supplies and maintaining the associated accounting records; administering mass immunizations; preparation and maintenance of medical and personnel records; executing the various aspects of the Decedent Affairs Program; ensuring compliance with rules and regulations for security practices and procedures; and performing the general duties connected with the administration of medical departments ashore and afloat. Designed for individual study and not formal classroom instruction, this RTM provides subject matter directly related to the occupational qualifications of the HM I & C rating. The NRCC provides the usual way of satisfying the requirements for completion of this RTM. The set of assignments in the NRCC includes learning objectives and supporting items designed to lead students through the RTM. (KC).

Identifiers — Employability Development

Written for Adult Basic Education teachers of developmentally disabled adults reading at or below a second grade level, this resource

curriculum contains materials in the employability behaviors area. The curriculum is divided into the four domains sections of Communication, Intra/Interpersonal, Worker Habits, and Appearance. Under these four major sections are 10 goals followed by specific objectives. Within each objective there is a standard organization consisting of (1) an assessment made up of skill criteria to determine client proficiency in that objective; (2) instructional strategies at three levels of functioning/abstraction: manipulate (simplest), model (representational), and integrate (symbolic); and (3) graphics. Introductory materials list goals and objectives and give suggestions for use of the resource curriculum. An index is provided. Appendixes include listings — some citations are annotated — of addresses of suppliers cited, general resources, nonprint resources, and publishers of nonprint resources; group assessment sheets; and preferred activities and potential reinforcers checklist. This document is a course of study to provide high school students with an introduction to television production skills and techniques and to provide a framework for developing critical television viewing skills. The nine units of the course introduce students to storyboards, camera operations, lighting, audio, video recording, graphics, scripting, commercials, and news gathering. Each unit's goal for student learning is broken down into objectives, with suggested learning activities, resources, and assessment procedures included for each objective. A variety of instructional materials and resource sheets are provided; some are suitable for reproduction and handout to students, while others provide information for the teacher. Glossaries for each unit and a bibliography also are included in the package. A list of expected competencies for the student is supplied in the appendix. It is expected that a student who accomplishes the tasks and objectives will be able to serve in an internship program at a local cable television studio. The activities and competencies gained through the course also will provide students with an insight into careers in television production and give them a foundation for entrance into post-high school production courses. This teaching package presents information and materials for use by special and industrial arts educators in teaching learning-disabled

students. It may also be of use to guidance counselors and administrators for student counseling and placement. The package is comprised of two primary units. Unit 1 overviews the field of learning disabilities to familiarize industrial arts instructors with the nature and needs of special students. It includes student characteristics, related vocabulary, descriptions of diagnostic tests, role of the secondary learning disability resource room teacher, classroom strategies, hints for cooperation between special and vocational instructors, and sample forms. The second unit provides the special education resource teacher with an overview of and information related to six industrial arts areas: drafting, electricity, graphic arts, metalworking, power mechanics, and woodworking. The format for each shop area includes brief introduction, general goals, areas covered, safety procedures, texts and supplements with readability level indicated, key word vocabulary list with definitions, tools, equipment and machines, outline of math skills, math pretest, related teaching aids, list of related occupational opportunities, and skills checklist. Appendixes include lists of additional selected resources and trade schools in Connecticut. (Y1 B)

These units of instructional materials and teaching aids are the first three of a series of eight designed for use in rural agriculture programs for students in grades 9 and 10. Covered in the unit on agricultural occupations are school, the agricultural program, and the Future Farmers of America (FFA); agriculture and society; and careers in agriculture. Understanding and participating in the FFA, duties and responsibilities of FFA members, developing parliamentary procedure skills, and developing public speaking skills are examined in the unit on leadership and citizenship. Discussed next are supervised occupational experience programs (SOEP), planning an individual SOEP, and starting and keeping SOEP records. Each of these units or problem area packets includes some or all of the following components: suggestions to the teacher, a content outline, a teacher's guide, information sheets, student worksheets or assignment sheets and keys, demonstrations, job sheets, transparencies, a discussion guide for transparencies, and sample test questions and a teacher's key. (The remaining units are available separately - see note.) (MN)

Identifiers — Navy

This Rate Training Manual and Nonresident Career Course (RTM/NRCC) form a self-study package that will enable Hospital Corps personnel to help themselves fulfill the requirements of their rating. Among these requirements are the abilities to perform duties as assistants in the prevention, recognition, and treatment of disease and injuries, and in the administration of medical departments ashore, afloat, and in the field with the Marine Corps; perform first aid; assist in the transportation of the sick and injured; assist with physical examinations; give nursing care to patients, including the administration of medicines and parenteral solutions; collect laboratory specimens and perform simple laboratory procedures; instruct in personal hygiene, first aid, and self-aid; assist in the preparation and maintenance of medical records; assist in the maintenance of approved sanitary standards; and assist in the prevention and treatment of chemical, biological, and radiological casualties. Designed for individual study and not formal classroom instruction, the RTM provides subject matter that relates directly to the occupational qualifications of the Hospital Corpsman rating. The NRCC provides the usual way of satisfying the requirements for completing the RTM. The set of assignments in the NRCC includes learning objectives and supporting items designed to lead students through the RTM. The book covers the material needed by hospital corpsmen to pass the rating in 12 units. A list of commonly used abbreviations and a glossary are contained in the appendix. (KC).

Identifiers — Iowa

This curriculum guide, updated from the Iowa 1973 version, is geared to vocational and technical agriculture instructors, to meet their needs in planning and conducting instructional programs for their students. Students completing instruction in agricultural supplies and services should have (1) explored the field of agricultural supplies and services occupations and made tentative career choices; and (2) developed attitudes, competencies, and job skills needed for successful job entry or employment in these fields. The guide is organized into seven units, covering the following subjects: opportunities in agricultural supplies and services, human relations, sales, business records and procedures, organization and operation of agricultural businesses, product knowledge of agricultural supplies, and laws and regulations affecting agricultural businesses. The units are organized around a problem-solving approach to lesson planning. Each unit is divided into a series of problems, and each problem area features study questions, reference materials, interest approach, learning activities, conclusion, evaluation criteria, and optional learning activities. Keys, information sheets, and transparency masters are included for use in conducting the learning activities suggested. A list of occupational titles and tips on evaluating progress in the course also are included in the publication. (KC).

Identifiers — Illinois, Resumes

This curriculum guide offers a complete program for teaching pre-employment job-seeking skills that can be implemented in the secondary or postsecondary school. It contains 15 units on job search methods and job survival skills, divided into 40 lesson plans that teachers can use in the classroom. The material is intended to be integrated into regular vocational education courses, or used as a self-contained one-fourth credit course. Subjects covered in the units include an introduction to the course of study, sources of employment, data sheets and resumes, initial contact with employers, application forms, employment tests, job interviews, rejection shock, being hired, job survival, job advancement, termination of employment, equal employment opportunity,

opportunity, and evaluation. The final unit is a student handbook for the course, and a bibliography also is included. Many of the pages in the guide can be reproduced and given to students for worksheets or may be used to make transparencies for use with an overhead projector. (KC).

Why Me? Every Teacher's Handbook for Alcohol Education.

Regional Council on Alcoholism of Cuyahoga, Geauga, Lake, and Lorain Counties, Cleveland, Ohio

Spons Agency — Ohio State Dept. of Health, Columbus

Pub Date — 79

Note — 276p

Pub Type — Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF01/PC12 Plus Postage

Descriptors — *Alcohol Education, *Elementary Secondary Education, *Integrated Curriculum, Art Education, Behavioral Objectives, Language Arts, Learning Activities, Mathematics Education, Music Education, Physical Education, Reading Instruction, Resource Materials, Science Education, Social Studies, Spelling Instruction, Teaching Guides, Writing Instruction

This teaching guide provides materials for teachers in any subject area to incorporate alcohol education into their classes. The first chapter presents information on goals of alcohol education, using the guide, and teacher's own attitudes about drinking. Chapters 2-4 are directed at teachers at the elementary, junior high, and senior high school levels. Each chapter contains student objectives and a number of activities. Information provided for each activity includes topic, grade level, objective, goals, resources, activity description, evaluation, comments or suggested changes, suggested ways to incorporate the activity into other subject areas, and necessary materials. Chapter 4 also contains a survey of student knowledge and opinions about alcohol use. Chapter 5, a special subject supplement, presents projects for these areas: art, chemistry, English, history, home economics/family living, human sexuality/family living, mathematics, and speech and journalism. Guidelines for helping students with drinking problems are found in chapter 6. Chapter 7 contains annotated bibliographies for teachers and students and a list of materials recommended for purchase. A final resource chapter suggests resource persons, presents annotations of available films, and includes evaluation forms (YLB).

Descriptors — *Adult Education, *Adult Programs, *Guidelines, *Program Development, *Teacher Education, Adult Educators, Audioinstructional Aids, Behavioral Objectives, Continuing Education, Correspondence Study, Learning Activities, Learning Modules

This module on guidelines for teachers of adults is the first of 11 modules in the set, Introduction to Teaching Adults. Designed to meet the learning needs of part-time continuing education instructors, these modules can be used as resource materials for local workshops or study-discussion groups, as self-instruction (each module takes approximately two hours), and as a correspondence course. (Source information on correspondence study is cited in module 1.) All modules except the first are designed to be used in part in conjunction with an audiotape. This module is intended to provide a quick overview of the series. It first compares an adult education program with the human life cycle, since similarities provide a way of organizing the concerns of the beginning

adult educator into three phases of an adult education program. These three phases serve as the topics for the next three chapters. The chapters treat the preparation, meeting, and ending phases. (YLB).

Identifiers — Brainstorming

This module on effective use of instructional techniques is the second of 11 modules in the set, *Introduction to Teaching Adults*. Designed to meet the learning needs of part-time continuing education instructors, these modules can be used as resource materials for local workshops or study-discussion-groups, as self-instruction (each module takes approximately two hours), and as a correspondence course. (Source information on correspondence study is cited in module 1.) All modules except the first are designed to be used in part in conjunction with an audiotape. The first part of the booklet contains several exercises for use with the tape. The major part of the booklet is a detailed guide for using 12 instructional techniques: lecture panel, debate, demonstration, field trip, case study, buzz groups, group discussion, brainstorming, role play, simulation, and practice and drill. Each technique is briefly described and the role of the instructor and participant outlined. An assignment to use a new technique is followed by a checklist for evaluating its use. (YLB).

This module on using available media resources to enrich instruction is the third of 11 modules in the set, *Introduction to Teaching Adults*. Designed to meet the learning needs of part-time continuing education instructors, these modules can be used as resource materials for local workshops or study-discussion groups, as self-instruction (each module takes approximately two hours), and as a correspondence course. (Source information on correspondence study is cited in module 1.) All

modules except the first are designed to be used in part in conjunction with an audiotape. The objective of the module is for educators to be able to prepare a plan for using media in the classroom. Topics covered include nature of instructional media, properties common to all media, when to use media, and description of 12 basic types of media, including advantages, limitations, and estimated cost. A six-step procedure for planning and using media is presented. A list of sources of media and annotated listing of books helpful in developing skill in producing instructional materials are provided. (YLB).

This module on elements and procedures involved in planning instruction is the fifth of 11 modules in the set, *Introduction to Teaching Adults*. Designed to meet the learning needs of part-time continuing education instructors, these modules can be used as resource materials

for local workshops or study-discussion groups, as self-instruction (each module takes approximately two hours), and as a correspondence course. (Source information on correspondence study is cited in module 1.) All modules except the first are to be used in part in conjunction with an audiotape. The objective of the module is for the teacher to be able to identify content for a course, arrange it in a logical order, and prepare lesson plans for use in teaching adults. The booklet first discusses some factors that affect decisions about what to teach and how to teach it. It then suggests a procedure to follow in designing instruction; that includes four basic phases: specifying objectives, identifying and arranging learning tasks, selecting techniques and devices, and developing evaluation instruments. A case study is presented to show how the process is applied. (YLB).

Descriptors — *Adult Education, *Adult Educators, *Learning Motivation, *Motivation Techniques, *Student Motivation, *Teacher Education, Adult Learning, Autoinstructional Aids, Behavioral Objectives, Classroom Techniques, Continuing Education, Correspondence Study, Educational Administration, Learning Activities, Learning Modules, Participation

This module on enhancing motivation is the eighth of 11 modules in the set, Introduction to Teaching Adults. Designed to meet the learning needs of part-time continuing education instructors, these modules can be used as resource materials for local workshops or study-discussion groups, as self-instruction (each module takes approximately two hours), and as a correspondence course. (Source information on correspondence study is cited in module 1.) All modules except the first one are designed to be used in part in conjunction with an audiotape. Focus of the module is on teaching techniques useful in managing adult learners individually and in groups. The booklet provides the basic information and exercises with answers on these topics: nature of motivation, motives for participation, motives for learning, and enhancing motivation. (YLB).

This module on characteristics of adults as learners is the ninth of 11 modules in the set, Introduction to Teaching Adults. Designed to

meet the learning needs of part-time continuing education instructors, these modules can be used as resource materials for local workshops or study-discussion groups, as self-instruction (each module takes approximately two hours), and as a correspondence course. (Source information on correspondence study is cited in module 1.) All modules except the first are designed to be used in part in conjunction with an audiotape. The purpose of the module is to identify six key characteristics of adults as learners and to suggest ways of taking them into account when teaching. Information is provided on these six characteristics: (1) adult life cycle, (2) immediate time orientation, (3) broad base of experience, (4) independent self-concept, (5) gradual state of physical decline, and (6) a number of social roles to be fulfilled. (YLB).

Grain Grading and Handling.*

Southern Illinois Univ. Carbondale. Dept. of Agricultural Education and Mechanization

Spons Agency — Illinois State Board of Education, Springfield. Dept. of Adult, Vocational and Technical Education

Pub Date — 81

Contract — R-33-41-D-0542-102

Note — 37p

Pub Type — Guides / Methods / Techniques — Classroom use — Instructional Materials (051)

EDRS Price — MF01/PC02 Plus Postage

Descriptors — *Crop Processing Occupations, *Evaluation Criteria, *Evaluation Methods, *Grains Food, *Inspection, *Learning Activities, Adult Education, Instructional Materials, Postsecondary Education, Storage, Vocational Education
Identifiers — Illinois

This publication provides an introduction to grain grading and handling for adult students in vocational and technical education programs. Organized in five chapters, the booklet provides a brief overview of the jobs performed at a grain elevator and of the techniques used to grade grain. The first chapter introduces the grain industry and explains the types of jobs available in grain elevators. A field trip is suggested. Chapter 2 explains how grain is priced, while chapter 3 discusses how grain is sampled for storability and value. In chapter 4, the technical method of grading corn is described, while chapter 5 explains grading wheat and soybeans and how such grading differs from corn grading. Several sample problems are provided in the last three chapters, and each chapter contains review questions. An appended booklet provides illustrations of various kinds of corn kernel damage. (KC).

Identifiers — Illinois

This publication provides an introduction to meat processing for adult students in vocational and technical education programs. Organized in four chapters, the booklet provides a brief overview of the meat processing industry and the techniques of meat processing and butchering. The first chapter introduces the meat processing industry and addresses concerns about the need for meat processors in the future and techniques used in the slaughterhouse, as well as providing diagrams of meat cuts. Chapter 2 describes what happens to meat after it reaches the retail market and explains necessary hygiene procedures. Chapters 3 and 4 cover the evaluation and grading of beef and pork, with illustrative photos. Each chapter contains evaluation questions at the end. The final pages of the publication contain a photo essay on the behind-

the-counter activities of a retail meat market. (KC).

Universal Teller Curriculum Guide.

DuPage Area Vocational Education Authority, Addison, Ill
Spons Agency — Illinois State Board of Education, Springfield, Dept. of Adult, Vocational and Technical Education

Pub Date — 81

Contract — R-33-21-X-0542-330

Note — 93p

Pub Type — Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF01/PC04 Plus Postage

Descriptors — *Competency Based Education, *Finance Occupations, *Job Training, *Learning Activities, *Office Occupations Education, Business Education, Clerical Occupations, Competence, Curriculum Guides, Educational Resources, Learning Modules, Office Machines, Postsecondary Education, Secondary Education, Vocational Education

Identifiers — Illinois, Universal Tellers

This curriculum guide has been designed to provide the teacher with a basis for planning a comprehensive program in the career field of universal teller, and to allow the teacher and learner maximum flexibility. The teaching or instruction, in both educational and financial institutions, can be accomplished through large formal groups, small groups, or individual instruction. The competency-based guide is intended to serve persons of diverse abilities, aptitudes, interests, and cultural backgrounds. The curriculum guide is a vocationally oriented system designed to meet the needs of persons who have entered or are preparing to enter finance and credit careers requiring competencies as a universal teller, including the following: mathematics, business English, machine skills, promotion of services, filing, and management. Each skill/task is developed into a goal format with a stated objective, resources identified, and an evaluation procedure to determine competence. Goals are not sequenced, and learning/instruction format can be varied to meet individual or group needs. The eight sections of the curriculum guide cover general skills, communications, human relations/customer relations, mathematics/drawer transactions, machine skills, security and prevention, and resources. Each section contains numerous performance objectives, coordinated with suggested teaching methods and suggested resources. (KC).

Identifiers — Military Curriculum Project

Adapted from military service training materials, this publication contains course materials for teaching finish carpentry, both in the classroom and through practical experience. Students completing this short course will be able to finish carpentry projects involving wallboard, plywood panel, composition floor tile, and acoustical ceiling tile. Both theory and shop assignments are provided with the course materials. The first unit contains an introduction to the course, stressing safety, while the second unit covers the following topics: wallboard, plywood paneling, composition floor tile, and acoustical ceiling tile. Instructor's guides are prepared for each section describing instructional materials, aids, terminal and enabling objectives, criterion tests, and homework assignments. Each section includes an outline of instruction, instructor activities, and student activities. To help the student, five job sheets and one information sheet are provided, along with a copy of a chapter of a Navy text on building. (The military-developed curriculum materials in this course package were selected by the National Center for Research in Vocational Education Military Curriculum Project, acquired, evaluated, adapted, and disseminated to the six regional Curriculum Coordination Centers and other instructional materials agencies.) Identifiers — Military Curriculum Project

Adapted from military service training materials, this publication contains course materials for teaching roofing, both in the classroom and through practical experience. Students completing this short course will be able to use common tools for laying out, building and maintaining wood and composition shingles, roll roof coverings, and built-up roofing coverings. Shop and theory assignments are provided in the course. The materials are divided into an introductory class on safety and then four sections covering built-up roofing, composition shingle roof covering, wood shingle roof covering, and a course summarization section. The teacher's instruction guide offers information about class objectives, references, instructional materials, aids, homework assignments, tools, and materials. Criterion tests are provided where applicable. The teacher's guide contains a three-column format for teaching the material, with an outline of subject matter, and suggested teacher activity and student activity. Four job sheets are provided for students, and photos and line drawings are used where applicable. (The military-developed curriculum materials in this course package were selected by the National Center for Research in Vocational Education Military Curriculum Project, acquired, evaluated, adapted, and disseminated to the six regional Curriculum Coordination Centers and other instructional materials agencies.) EDRS Price — MF01/PC08 Plus Postage

Descriptors — *Competency Based Education, *Curriculum Development, *Learning Modules, *Solar Radiation, *Technical Education, *Technical Occupations, Air Conditioning, Competence, Course Content, Curriculum Guides, Curriculum Research, Heating, Learning Activities, Plumbing, Postsecondary Education, Teaching Guides, Teaching Methods, Ventilation, Vocational Education

This publication is a curriculum guide for the installation of solar equipment. It is divided into the three major areas of general knowledge, technical design, and installation/maintenance. Associated is a list of relevant and prerequisite competencies identified as appropriate toward student interest groups of technician, installer, avocationist, and consumer. The step-by-step guide is designed to provide the teacher and/or curriculum developer with a comprehensive program in the technology of solar energy that can be used to train persons who wish to be service persons in the comfort industry. The guide was developed from analysis of job tasks required of heating, ventilating, air conditioning, and solar service workers. The guide consists of 11 units covering the following: introduction and theory (solar history, introduction to active solar, and the sun); engineering (the solar system); design (the collector, storage, and the electrical system); and installation and maintenance (whole house, solar application, and servicing solar installations). Unit guides for each unit contain instructional objectives, reference materials, visual aids, method performance conditions required of instructors, an outline showing a step-by-step breakdown of all subject matter to be covered, student evaluation criteria to meet competencies, and a sequence of instruction. Unit tests are provided. (The final project report describing the activities conducted to develop the curriculum guide is included in this package.) (KC)

Descriptors — *Equal Education, *High School Students, *Learning Activities, *Nontraditional Occupations, *Sex Fairness, *Vocational Education, Assertiveness, Civil Rights Legislation, Definitions, Equal Opportunities Jobs, Federal Legislation, Group Activities, Group Units, Guidelines, Publicity, Sex Bias, Sex Stereotypes

Identifiers — Sexual Harassment, Support Groups

Designed for use by vocational education students in nontraditional programs, this handbook contains support group activities pertaining to group cohesion, understanding the nature of sex bias, assertiveness, group projects, sexual harassment, and laws governing sex fairness. Group cohesion activities designed to help group members get to know themselves and other members of the group are described. Discussed next are general activities to provide an understanding of the nature of sex bias, sex stereotyping, and other related concepts. A series of assertiveness activities and a number of group projects designed to help

the already-active and stable support group strengthen and publicize itself are explained. Listed next are strategies for coping with sexual harassment and professional services to help students and employees deal with it successfully. The major laws guaranteeing students and workers equal opportunity in education and employment are summarized. Appended to the handbook are lists of sources for further information. (Related handbooks of strategies for facilitating a peer support group for vocational students in nontraditional programs and laws guaranteeing equal education and employment opportunities are available separately — see note.) Descriptors — *Competency Based Teacher Education, *Job Analysis,

*Validity, *Vocational Education, *Vocational Education Teachers, Behavioral Objectives, Individualized Instruction, Learning Activities, Learning Modules, Program Administration, Program Implementation

This module is one in a series of seven focused on skills vocational teachers need to develop and manage programs that are performance-based and fully individualized. Designed to allow for individualization of a teacher education program, these modules supplement those prepared by the National Center for Research in Vocational Education for professional development of vocational teachers. The objective of this module is to help develop skill in validating existing occupational analyses. (Analysis is a process through which the skills, knowledge, and attitudes needed for successful employment are identified.) Focuses are on the process used to establish a program's scope, development of skills needed to revise existing analyses, and verification of a revised occupational analysis. Contents include three learning experiences based on three enabling objectives that provide background information, practice experiences, or a combination. Completion of these experiences should lead to achievement of the terminal objective in the fourth and final learning experience with teacher performance assessment form. Each learning experience includes a learning activity (activities) with information sheets, case studies, and self-checks with model answer (as feedback). Optional activities may also be provided. Descriptors — *Competency Based Teacher Education, *Individualized Instruction, *Material Development, *Vocational Education, *Vocational Education Teachers, Behavioral Objectives, Learning Activities, Learning Modules, Program Administration, Program Implementation, Teacher Developed Materials, Tests

This module is one in a series of seven focused on skills vocational teachers need to develop and manage programs that are performance-based and fully individualized. Designed to allow for individualization of a teacher education program, these modules supplement those prepared by the National Center for Research in Vocational Education for professional development of vocational teachers. The objective of this module is to help develop skill in developing modules for individualized instruction. Focuses are components considered essential to include a module and the process to follow to develop an effective module. Contents include four learning experiences based on four enabling objectives that provide background information, practice experiences, or a combination. Completion of these experiences should lead to achievement of the terminal objective in the fifth and final learning experience with teacher performance assessment form. Each learning experience includes a learning activity (activities) with information sheets, case studies, and self-checks with model answer (as feedback). Optional activities may also be provided. (Y1 B).

Identifiers — Outcome Oriented Grading

This module is one in a series of seven focused on skills vocational teachers need to develop and manage programs that are performance-based and fully individualized. Designed to allow for individualization of a teacher education program, these modules supplement those prepared by the National Center for Research in Vocational Education for professional development of vocational teachers. The objective of this module is to help develop skill in establishing a rational grading system, one that has an outcomes orientation. Focuses are the difference between norm-referenced grading and criterion-referenced grading and development of a grading system that compares students to an absolute criterion when determining their grades. Contents include two learning experiences based on two enabling objectives that provide background information, practice experiences, or a combination. Completion of these experiences should lead to achievement of the terminal objective in the third and final learning experience with teacher performance assessment form. Each learning experience includes a learning activity (activities) with information sheets, case studies, and self-checks with model answer (as feedback). Optional activities may also be provided. Identifiers — Instructional Support System Occupational Educ

Intended for instructors in occupational education programs, this catalog identifies instructional materials found to be successful for teaching specific occupational competencies identified in the Instructional Support System for Occupational Education (ISSOE) in the area

of business and office education. Contents include 151 materials reporting forms for materials used in various program areas of business and office education. Forms are organized first by program area and then by ISSOE task numbers arranged sequentially. (A separate form is provided for each task for which the material is used.) Program areas/units include communication skills, filing and retrieval, adding and calculating machines, financial and recordkeeping systems, and data processing. The materials reporting form provides this information: course, unit, and module titles; task title and number; school name and address, instructor, and phone number; ISSOE region; V-TECS number; type of instruction materials best suited for; instructional, grade, and ability levels; type of materials used; title of material, author, edition, copyright, date, publisher, cost, and pages used; comments; and written teacher comments. Identifiers - Cement, Missouri

This guide to a curriculum unit in agricultural structures is designed to expand the curriculum materials available in vocational agriculture in Missouri. It and Agricultural Structures I (see note) provide reference materials to systematize the curriculum. The six units cover working with concrete (19 lessons, 2 laboratory exercises), drawing and plan reading (6 lessons), planning grain-feed handling (6 lessons), electrical work on the farm (14 lessons), plumbing on the farm (5 lessons, 1 laboratory exercise), and alternate energy systems (6 lessons). Each lesson may contain some or all of the following: an objective, study questions, references; teaching procedure with assignment; discussion; and answer key to examination, examination; transparency masters; assignment sheets, and handouts. Laboratory exercises may contain some or all of the following: objective, tools and materials needed, procedures, transparency masters, and handouts. A bibliography is found at the beginning of the guide. Appendixes include a listing of additional supplementary sources and cross indexing of the electrical work unit to the revised version of "Practical Farming Wiring Demonstrations," by Curtis Weston. Identifiers - Missouri

Intended for instructors serving the occupational needs of disadvantaged and handicapped students, this curriculum guide contains nine units for a carpentry program. Its purposes are to provide minimum skills for students entering the mainstream, supplement vocational skills of students already mainstreamed, and provide vocational instructional materials for the modified classroom. Teachers should adapt these self-paced and self-contained instructional materials to suit teaching learning situations. These nine units are included: Job Opportunities in Carpentry, Reading and Measuring with Rulers, Lumber Selection and Measurement, Cutting with Hand Saws, Uses of Nails and Hammers, Using a Hand Plane, and Using a Wood Chisel. Each unit contains these sections: (1) unit objectives and self-assessment statements; (2) introduction (motivational statement); (3) description of tools, materials, and equipment; (4) steps of procedure (explanation and illustration of given skill); and (5) student evaluation (true/false, identification, or steps of procedure). Identifiers - Electrical Wiring, North Dakota

This course guide for an electrical/electronic technology course is one of four developed for the energy/power area in the North Dakota senior high industrial arts education program. (Eight other guides are available for two other areas of Industrial Arts - graphic communications and production.) Part 1 provides such introductory information as a definition and instructional objectives for Industrial Arts. Part 2 contains the course rationale and objectives; guidelines for implemen-

tation; taxonomic structure; course description including length, credit, prerequisites, and student competencies; suggested instructional units with required number of class periods; and 19 units. Each unit includes some or all of the following material: unit objective(s), topic outline, and selected student competencies to be developed through sample coordinated learning activities. Unit titles are Introduction to Electrical/Electronic Technology; Electronics Industry Definitions; Measurements and Instruments; Symbols, Components, Ratings; Circuit Arrangements; Electrical Relationships; Alternating Current Fundamentals; Capacitive Circuits; Magnetism and Magnetic Circuits; Frequency Selective Circuits; Motors and Generators; Residential Electrical Wiring; Careers in Electrical Industry; Introduction to Electrical Applications and Careers; Discrete Semiconductor Devices and Circuits; Introduction to Digital Electronics; Basic Arithmetic Devices; Basic Support Devices; Microprocessor Basics and Applications; and Electronic Assembly Methods. Identifiers — Emergency Medical, Oregon

Intended to assist the vocational teacher in designing and implementing a cluster program in health occupations, this guide suggests ideas for teaching the specific knowledge and skills that qualify students for entry-level employment in the health occupations field. The knowledge and skills are applicable to 12 occupations: dental assistant; dental hygienist; dental lab technician; emergency medical technician; medical assistant; medical lab assistant; nursing assistant; nurse, general duty;

occupational therapy assistant; physical therapy assistant; respiratory therapist; and surgical technician. The guide is also suitable for preparing students to enter advanced training programs. Section 1, Cluster Organization and Implementation, addresses goal-based planning and provides a proposed cluster curriculum, sample curriculum schedule, descriptions of course content, and current Oregon manpower data. In section 2, Instructional Emphasis Areas, are contained course goals and learning activities for six allied support courses: Human Body Structure and Function, Microbes and Disease, Health Team Relations, Patient Relations, and Health Care Skills I and II. Section 3, Assessment, briefly discusses group and individual approaches. The appendix includes lists of equipment and supplies, resources, and career opportunities; information on Health Occupations Students of America; clinical experience checklist; and occupational analysis data. Part of a five-part package (see note) of training materials to teach interviewing skills to human services personnel, this participant's workbook contains all the forms and training aids that would typically be distributed to the participants during the training session. It includes material needed for the various training exercises that are done during the training session and self-assessment checklists for the material covered. The training program defines the skills that interviewers need to ensure that as much relevant information as possible is exchanged during interviews, and it helps turn these skills into lasting habits. Major topics covered in the first six sections of the workbook include how to motivate clients to show up for interviews, how to prepare for initial interviews, how to listen actively and use body language effectively, and how to use different types of verbal responses to achieve objectives and to encourage self-exploration. The last section of the workbook contains forms for self-assessment on the various interview techniques covered in the training session. (KC).

Pub Date — 80

Note — 122p.; For a related document see CE 030 653

Pub Type — Guides / Methods / Techniques — Classroom use — Instructional Materials (051). Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF01/PC05 Plus Postage

Descriptors — *Agricultural Education, *Energy, *Energy Conservation, *Fuels, *Grains Food, *Tractors, Behavioral Objectives, Conservation Education, Core Curriculum, Efficiency, Equipment Utilization, Fuel Consumption, Harvesting, Instructional Materials, Learning Activities, Secondary Education, Storage, Vocational Education

This core curriculum contains five units of material for teaching energy to vocational agriculture students. Energy uses and the benefits of energy conservation are covered in a unit on the impact of energy on agriculture. Discussed next are tractor performance and Nebraska tractor test data for selecting and evaluating tractors for maximum fuel efficiency. Proper ballasting of a tractor as well as operational procedures such as proper matching of tillage equipment to the tractor, gearing up and throttling down, and minimized idling are covered in a unit dealing with tractor operation for maximum fuel efficiency. Addressed next are the following topics: terms related to petrochemical energy use in agriculture, recognizing the amounts of energy these represent, various practices in the use of petrochemicals, and alternatives to their use in farming. Grain production, harvesting, handling, and storage practices that save energy are examined. Included in each unit are a terminal objective; specific objectives; suggested activities; instructional materials (objectives, information sheets, and transparency masters); a unit test; and test answers. (A related core curriculum for teaching metrics to vocational students is available separately — see note.) (MN).

Metrics. A Basic Core Curriculum for Teaching Metrics to Vocational Students.

Kansas State Univ. Manhattan. Dept. of Adult and Occupational Education

Spons Agency — Kansas State Dept. of Education, Topeka. Div. of Vocational Education

Pub Date — 80

Note — 74p.; For a related document see CE 030 652

Pub Type — Guides / Methods / Techniques — Classroom use — Instructional Materials (051). Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF01/PC03 Plus Postage

Descriptors — *Distance, *Mathematics Education, *Measurement, *Metric System, *Vocational Education, *Weight Mass, Behavioral Objectives, Core Curriculum, Definitions, Glossaries, Instructional Materials, Learning Activities, Secondary Education, Secondary School Mathematics, Temperature

Identifiers — Liquids, Solids, Velocity, Volume (Mathematics)

This core curriculum contains five units for use in teaching metrics to vocational students. Included in the first unit are a series of learning activities to familiarize students with the terminology of metrics, including the prefixes and their values. Measures of distance and speed are covered. Discussed next are measures of volume used with solids and liquids. Terminology of metric weight and mass measurement as well as conversion to the metric system from the American standard system are addressed in a series of activities. The final unit consists of exercises to enable students to relate temperature scales to one another. Included in each unit are a terminal objective, specific objectives, suggested activities, a listing of instructional materials provided, references, information sheets, student handouts, unit tests, and test answers. (A related basic core curriculum for teaching energy to vocational agriculture students is available separately — see note.) (MN).

Pub Date — 80

Note — 50p.; For related documents see CE 030 479-489

Pub Type — Guides / Methods / Techniques — Classroom use — Instructional Materials (051)

EDRS Price — MF01/PC02 Plus Postage

Descriptors — *Competency Based Education, *Engineering Drawing, *Safety, *Technical Education, Behavioral Objectives, Blueprints, Drafting, Individualized Instruction, Learning Activities, Learning Modules, Performance Tests, Secondary Education, Vocational Education

Identifiers — Ellipses, Figure Drawing, Florida, Polygons

These four learning guides are self-instructional packets for four tasks identified as essential for performance on an entry-level job in mechanical drafting. Each guide is based on a terminal performance objective (task) and 2-4 enabling objectives. For each enabling objective, some or all of these materials may be presented: learning steps (outline of student activities) with necessary resources/materials cited, instruction sheet(s), and self-check with answer key. A performance test and/or a written test (with answer key) concludes each guide. Tasks covered in these guides include recognizing safe practices, constructing regular polygons and ellipses, and developing drawings for the pattern shop and the machine shop. (YI.B).

Descriptors — *Course Descriptions, *Course Objectives, *Industrial Arts, *Learning Activities, *Middle Schools, Behavioral Objectives, Building Trades, Course Content, Curriculum Guides, Energy, Graphic Arts, Instructional Materials, Manufacturing, Student

Evaluation, Teaching Guides, Teaching Methods, Transportation, Visual Aids

This guide contains information needed for teaching the required seventh and eighth grade industrial arts exploration course in the middle schools of Prince George's County Public Schools, Upper Marlboro, Maryland. Introductory activities are included for the four broad high school areas of graphic communications, manufacturing, energy and transportation, and construction. The curriculum guide is organized into four sections. The first section describes the mission of industrial arts in the middle school program. Section 2 provides suggestions for using the middle school schedule effectively, and for accommodating all students in a required course. The remaining two sections present the information used by teachers in implementing the seventh and eighth grade courses. For each level, course descriptions, course objectives, instructional strategies and resources, plans for teacher direction and student participation, and student evaluation information are included. Appendixes to each grade level course contain worksheets, quizzes, handouts, transparency masters, learning activity packages, and evaluation record sheets. (KC).

Identifiers — Supervised Occupational Programs

This guide provides the agriculture teacher or cooperative coordinator with an overview of and information on planning and operating cooperative agricultural education programs. Introductory materials discuss supervised occupational experience (SOE) in general and cooperative agricultural education in particular and compare components of three types of SOE in agriculture. The section on program planning considers these topics: role of work experience coordinator and teacher, initiating a program (guidelines, registration requirements, program planning), jobs in agriculture, and determining agricultural employment needs. Areas covered in the section on program operation include recruiting students, locating agricultural employers, providing related instruction, hazardous occupations, unique characteristics of agricultural employment, minimum wage standards, agriculture skills and competencies, training plans, training agreements, evaluation, agricultural experience records, and youth leadership opportunities. Appendixes contain these sample forms: training plan, training agreements (work experience and business enterprise), employer rating form, and employability profile. (YI.B).

Identifiers — Canada

To help improve English as a Second Language (ESL) programs for adult learners, this curriculum guide provides informative materials for the teacher and 30 sections of lessons suitable for adaptation by the teacher. Teacher information includes materials on language teaching and learning, use of the guide, needs assessment, adapting lesson plans, getting started with beginners, special problems in ESL classes, assessment for placement, resources, and an excerpt on language functions. Each of the 30 sections is developed around a language function (asking, clarifying and correcting, identifying, reporting). In each section six units outline realistic situations in which the functions operate and which relate to each of the six different adult roles for which the learners need English (consumer, citizen, community member, worker, learner, family member). Each section contains a unit outline for one adult role, sample lesson for the unit (objectives, skills, process, and devices), five unit outlines (one for each of the other roles), and a summary of the situation with the accompanying language and cultural components. Representative unit titles are "It Was a 20" Colour T.V.," "I Had an Operation for Appendicitis in 1972," "So, Never on an Empty Stomach," and "Whose Crew Were You On?" (YL B).

This curriculum guide is intended to aid community colleges, area vocational technical schools, and other institutions that provide mid-management educational programs in the state of Kansas to eliminate duplication between various institutions and to provide standard titles and standard content from institution to institution. Following an introduction, the curriculum guide is divided into the following parts: (1) an overall mid-management common core curriculum as the basis for all mid-management programs; (2) the mid-management-related competency core — competencies essential to mid-management that are not necessarily management courses: communication, mathematics, and human relations; (3) the overall mid-management curriculum, including the summary of the core curricula, the specialized courses, and the general education requirements for a two-year maximum program of 62 credit hours; (4) the mid-management specialized core, in three general areas — production and manufacturing, marketing and retailing, and service; (5) a sample curriculum for one- and two-year programs; (6) suggested course descriptions for the core curricula courses and for at least part of the marketing and retailing specialized cores. Course descriptions contain the course names, the typical length of the course, alternate titles, examples of course content, prerequisites, and the typical level offered — either freshman or sophomore. Identifiers — Alabama

This publication is a guide for teachers who conduct parenthood education classes as part of the secondary consumer and home economics program in Alabama. The parenthood education program guide is divided into four units covering the following competencies: understanding the family; developing maturity and independence; developing parenting knowledge and skills; and special concerns of parenthood. Subjects discussed within the units include a broad range of marriage, family life and parenting topics, such as life cycles, family roles, community responsibilities, establishing an independent family unit, decision making, parenting options, parenting readiness, finances, life goals,

pregnancy and childbirth, birth defects, nutrition, baby care, child development, special needs children, and child abuse and neglect. For each of the four competencies, the unit contains enabling objectives that should be attained by the students and an outline of the content to be taught, correlated with suggested learning experiences and resources. An annotated resource list completes the package. (KC).

Identifiers — Arkansas, Entrepreneurship, Small Business Management

This curriculum guide is designed to help teachers conduct courses on small business management and entrepreneurship to high school seniors in Arkansas. The program focuses upon the managerial process, examining the functions of, planning, organization, staffing, direct-

ing, and controlling as related to the activities and responsibilities of the supervisor or administrator. Instruction in accounting procedures can be included, and leadership development, positive self-image, and attitudinal training are components of the curriculum. In addition, data processing concepts and microcomputer training are included. Because of the need for better management skills for small business owners, the management component of the program emphasizes small business ownership. Units include advantages and disadvantages of ownership of different types of business, how to start a business, internal organization, financial records, managerial functions, personnel selection and supervision, government regulations, and taxes. The content of the guide is divided into six major parts, organized in 19 units. Each unit contains a unit objective and specific objectives; learning activities and teaching suggestions; and references to books, films, free handout materials, and other resources. A special section contains enrichment projects and special projects including computerized business games and an "establish your own business" project. Appendixes to the guide contain a checklist for organizing and operating a small business, and lists of materials available from the Small Business Administration. (KC).

*Drabek, Jane***Developing a Reading Sequential Competency System. A Guide for ABE Instructors.**

Walla Walla Community Coll. Wash

Spons Agency — Washington State Office of the State Superintendent of Public Instruction, Olympia, Div. of Adult Education and Community Schools

Pub Date — 80

Note — 298p.; Some pages may not reproduce clearly because of faint or small print

Available from — Director of Adult Education, Superintendent of Public Instruction, 7510 Armstrong St. S.W. M/S FG-11, Tumwater, WA 98504

Pub Type — Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF01/PC12 Plus Postage

Descriptors — *Adult Basic Education, *Adult Reading Programs, *Individualized Instruction, *Program Implementation, *Reading Diagnosis, *Reading Skills, Adult Literacy, Behavioral Objectives, Check Lists, Competence, Instructional Materials, Learning Activities, Phonics, Program Content, Program Descriptions, Reading Instruction, Reading Tests, Recordkeeping

Identifiers — ABE Reading Sequential Competency System, Reading Management

Intended for use by adult basic education (ABE) instructors who are organizing or reorganizing their reading programs for individualized instruction, this guide outlines the ABE Reading Sequential Competency System (SCS). The main benefits of this particular system for reading are that it delineates a sequence of reading skills, allows the illiterate or functionally illiterate adult the flexibility of having instruction on an individualized basis with open-entry open-exit options, and provides for accountability in reading instruction. Described in the guide are the following aspects of the SCS system: (1) the assessment process (initial assessment, continuous assessment, assessment of growth) (2) program components (Checklist of reading skills, student competencies, pretests, the prescription form, cross references of materials, mastery checks); and (3) organizational and recordkeeping features. Commercial student materials used in the program and addresses of publishers of these materials are listed. Appended to the report are a complete collection of the student competencies, pretests, and mastery checks as well as all the components for two selected skills (long and short vowels) and worksheets designed for SCS. (MN).

Identifiers — Chemical Calculations, Chemical Structure

This course in chemistry for energy technology is one of 16 courses in the Energy Technology Series developed for an Energy Conservation-and-Use Technology curriculum. Intended for use in two-year postsecondary technical institutions to prepare technicians for employment, the courses are also useful in industry for updating employees in company-sponsored training programs. Comprised of five modules, the course is designed with a special emphasis on all aspects of chemistry as it relates to the work of an energy technician. Basic chemical information and techniques are presented. (Chemistry for Energy Technology II is available separately as CE 030 777.) Written by a technical expert and approved by industry representatives, each module contains the following elements: introduction, prerequisites, objectives, subject matter, exercises, laboratory materials, laboratory procedures (experiment section for hands-on portion), data tables (included in most basic courses to help students learn to collect or organize data), references, and glossary. Module titles are Safety in Chemical Operations; Structure of Matter; Chemical Equations and Calculations; Refrigeration, Gases, and Air Pollution; and Solutions. (YI B).

Identifiers — Energy Audits, Energy Consumption

This course in fundamentals of energy technology is one of 16 courses in the Energy Technology Series developed for an Energy Conservation-and-Use Technology curriculum. Intended for use in two-year postsecondary technical institutions to prepare technicians for employment, the courses are also useful in industry for updating employees in company-sponsored training programs. Comprised of seven modules, the course is designed as an overview of the entire energy field. It discusses energy fuels, production schemes, area of utilization, environmental considerations, and conservation/audit principles. Geared more to the seminar approach, the course also provides career visibility and rationale for including each course in the curriculum. Written by a technical expert and approved by industry representatives, each module contains the following elements: introduction, prerequisites, objectives, subject matter, exercises, laboratory materials, laboratory procedures (experiment section for hands-on portion), data tables (included in most basic courses to help students learn to collect or organize data), references, and glossary. Module titles are Energy Technology, Sources of Energy: I and II, Uses of Energy, Energy Analysis, and Energy and the Environ-

ment. The last module is an Energy Resource Guide that includes an annotated bibliography of print and non-print resources, explanation of the curriculum, examples of projects, and a glossary. (YLB).

Identifiers — Energy Consumption

This course in energy production systems is one of 15 courses in the Energy Technology Series developed for an Energy Conservation-and-Use Technology curriculum. Intended for use in two-year postsecondary technical institutions to prepare technicians for employment, the courses are also useful in industry for updating employees in company-sponsored training programs. Comprised of seven modules, the course is an in-depth technical study of the processes and equipment used to convert fuels and energy resources into useful energy forms (electricity, heat, motion). The first four modules emphasize fuels and energy sources, examine their properties, and describe how they are used to produce steam and hot water. The final three modules emphasize how energy is used. Written by a technical expert and approved by industry, each module contains the following elements: introduction, prerequisites, objectives, subject matter, exercises, laboratory materials, laboratory procedures (experiment section for hands-on portion), data tables (included in most basic courses to help students learn to collect or organize data), references, and glossary. Module titles are Generation of Steam and Hot Water Using Solid Fuels; Generation of Steam and Hot Water Using Liquid and Gaseous Fuels; Generation of Steam, Hot Water, and Hot Air Using Solar Collectors; Generation of Steam and Hot Water Using Nuclear and Experimental Power Sources; Combustion Engines; Turbines; and Production of Electricity. tion, Power Transmission, Troubleshooting, Valves

This course in mechanical devices and systems is one of 16 courses
in the Energy Technology Series developed for an Energy Conservation-
and-Use Technology curriculum. Intended for use in two-year postsec-
ondary technical institutions to prepare technicians for employment, the
courses are also useful in industry for updating employees in company-
sponsored training programs. Comprised of eight modules, the course
is an in-depth study of the principles, concepts, and applications of
various mechanisms that may be encountered in industrial application
of energy use and conservation. Operational procedures, uses,
maintenance, troubleshooting; and repair and replacement procedures
are covered. The application portions of the modules emphasize prac-
tical maintenance and installation of equipment and specification of
proper replacement components for manufacturers' catalogs. Written
by a technical expert and approved by industry representatives, each
module contains the following elements: introduction, prerequisites,
objectives, subject matter, exercises, laboratory materials, laboratory
procedures (experiment section for hands-on portion), data tables (in-
cluded in most basic courses to help students learn to collect or organize
data), references, and glossary. Module titles are Belt Drives, Chain
Drives, Gear Drives, Drive Train Components I and II, Linkages, Fans
and Blowers, and Valves. (YLB).

This course in technical communications is one of 16 courses in the Energy Technology Series developed for an Energy Conservation and Use Technology curriculum. Intended for use in two-year postsecondary technical institutions to prepare technicians for employment, the courses

are also useful in industry for updating employees in company-sponsored training programs. Comprised of eight modules, the course shows the technician how to develop ideas in a clear, organized fashion. The exercises provided help the student practice writing and speaking skills that will not only aid him/her in the transfer of information, but also have an effect on his/her advancement. Written by a technical expert and approved by industry representatives, each module contains the following elements: introduction, prerequisites, objectives, subject matter, exercises, laboratory materials, laboratory procedures (experiment section for hands-on portion), data tables (included in most basic courses to help students learn to collect or organize data), references and glossary. Module titles are Introducing Technical Communications, Conducting and Reporting Research, Writing Outlines and Abstracts, Writing Definitions, Describing Mechanisms, Describing a Process, Performing Oral and Visual Presentations, and Putting Skills Into Practice: Formal Report and Presentation. (YLB).

This unit of instruction on general energy concepts was designed for use by agribusiness and natural resources teachers in Florida high schools and by agricultural extension agents as they work with students and adults. It is one of a series of 11 instructional units (see note) written to help teachers and agents to educate their students and clients about the problems of energy shortages and strategies for energy conservation and management. This unit is organized into three modules: (1) What is Energy?; (2) Energy Consumption; and (3) Energy Problems and Conflicts. Topics covered in the unit include defining energy; sources of energy; conversion of energy into usable forms; advantages and disadvantages of different sources of energy; most widely used sources of energy; worldwide and Florida energy consumption and sources; and energy problems and solutions. The unit contains student performance objectives, content information, teaching-learning activities, student handouts, transparency masters, and evaluation instruments. (KC).

This Rate Training Manual and Nonresident Career Course
(RTM/NRCC) form a self-study package that will enable aviationsup-
port equipment personnel to help themselves fulfill the requirements
for advancement. Designed for individual study and not formal
classroom instruction, the RTM provides subject matter that relates
directly to the occupational standards of the Aviation Support (AS)
Equipment Technician. The NRCC provides a way of satisfying the
requirements for completing the RTM. Assignments in the NRCC in-
clude learning objectives and supporting items designed to lead the stu-
dent through the RTM. Volume 1 is the basic manual for the AS rating.
It provides the beginner with fundamental ground support equipment
shop organization and shop procedures. It includes the rate structure,
with a short history of the AS rate, supply publications, Naval Avia-
tion Maintenance Program, and ground support equipment, tools, test
equipment, materials, and hardware also are discussed; and the appendix
contains a list of acronyms and definitions of terms used in the course.
(The Aviation Support Equipment Series, of which this document is
the first volume, replaces chapters of the three service ratings, Avia-
tion Support Equipment Technician's E (Electrical), M (Mechanical),
and H (Hydraulic). (KC).

This Rate Training Manual and Nonresident Career Course (RTM/NRCC) form a self-study package that will enable Aviation Electrician's (AE) Mates to help themselves fulfill the requirements of their rating. Designed for individual study and not formal classroom instruction, the RTM provides subject matter that relates directly to the occupational standards for the AE3 and AE2. Topics covered in the course include Navy publications and supplies; elementary physics; electrical maintenance and troubleshooting; aircraft electrical power systems; aircraft electrical and associated systems; instruments; and compass, inertial navigation, automatic flight control, and stabilization systems. A glossary and list of symbols are also included in the package. The NRCC provides the usual method for satisfying the requirements for the RTM. The set of assignments in the NRCC includes learning objectives and supporting items designed to lead students through the RTM. The occupational standards used as minimum guidelines in the preparation of the manual are found in the "Manual of Navy Enlisted Manpower and Personnel Classifications and Occupational Standards". Automotive Mechanics Curriculum Outline for Secondary Schools. Vocational Education Curriculum Guide.

Louisiana State Dept. of Education, Baton Rouge. Div. of Vocational Education

Spons Agency — Department of Education, Washington, D.C.

Report No. — Bull-1637

Pub Date — 81

Note — 25p

Pub Type — Guides / Methods / Techniques — Non-Classroom Use (055)

EDRS Price — MF01/PC01 Plus Postage

Descriptors — *Auto Mechanics, *Course Descriptions, *Vocational Education, Articulation Education, Curriculum, Educational Resources, Secondary Education, State Curriculum Guides, Textbooks

Identifiers — Louisiana

This curriculum outline for secondary automotive mechanics is structured around Louisiana's Vocational-Technical Automotive Mechanics Curriculum. The curriculum is composed of 16 units of instruction, covering the following topics: benchwork, fundamentals of automotive engines, preventive maintenance, automotive brakes, steering and front suspension, drive train and rear suspension, manual transmissions, automatic transmissions, fuel systems, accessories, complete automotive service, welding, and mathematics. The outline lists the instructional units to be taught for each year of a four-year secondary automotive mechanics program for either two-hour block or three-hour block courses. The curriculum outline also describes the curriculum and lists related study assignments and job sheets that are to be used with each unit. In addition, a list of required texts and resource materials is included. The curriculum outline was prepared to provide continuity between the secondary automotive mechanics program and automotive mechanics programs on the postsecondary levels. (KC).

Available from — Wisconsin Vocational Studies Center, 964 Educational Sciences Bldg. Madison, WI 53706 (Order No. ETC100A. \$3.00. 25% discount on 100 or more of same title. Complete set — ETC100 — \$200.00)

Pub Type — Guides / Methods / Techniques — Non-Classroom Use (055)

EDRS Price — MF01/PC03 Plus Postage

Descriptors — *Business Education, *Learning Modules, *Program Design, *Program Implementation, *Teacher Role, Formative Evaluation, Program Development, Program Evaluation, Teaching Methods

Identifiers — Entrepreneurship, Small Businesses

This handbook for using the Entrepreneurship Training Components is divided into six sections. The entrepreneurship project overview discusses the background and purpose of the project, how the modules are organized, what makes these materials unique, module format, and purpose of the handbook. The section on training components examines the module development process, module titles and elements, module content summaries, and purpose and use of the resource guide. Advantages of these components to the administrator, instructor, and student are explored in the third section. Administrative considerations such as need, compatibility, key support, initial planning, and program implementation are examined in the fourth section. Section 5 lists instructor considerations and recommendations. These include instructional strategies, options for use of the modules, recommended planning, and daily management of the program. And finally, in the last section, evaluation of the implementation is discussed, including instructional evaluation and student outcome information. A list of references concludes the handbook. (CT).

Descriptors — *Business, *Educational Resources, *Information Sources, Abstracts, Annotated Bibliographies, Indexes, Literature Reviews, Organizations Groups

Identifiers — Entrepreneurship, Small Businesses

This resource guide is a product of a research project whose goal was to create entrepreneurship training components for use in vocational instructional programs at the secondary level. Designed to accompany the 36 instructional modules, this resource guide lists all entrepreneurship materials identified during the literature review phase of the project. The guide includes both materials that were used specifically in writing modules and those that provided general background information. This guide is divided into five sections. The introduction explains the purpose of the literature review, describes search procedures and the review process, and describes the organization of the resource guide. The annotated references section includes abstracts of individual general entrepreneurship materials and describes small business series — large collections of pamphlets or manuals developed by entrepreneurship-oriented organizations. The additional references section gives citations for general entrepreneurship (followed by a brief phrase giving the type of material and target population) and entrepreneurship applied to specific businesses (followed by the names of the specific businesses).

discussed). The institutions section lists mailing addresses for organizations involved in entrepreneurship. The index to business-specific reference lists specific businesses for which existing entrepreneurship materials have been identified. (CT).

Descriptors — *Drafting, *Learning Activities, *Learning Modules, *Technical Occupations, Architectural Drafting, Carpentry, Electrical Occupations, Engineering Drawing, Metric System, Orthographic Projection, Plumbing, Postsecondary Education, Secondary Education, Sheet Metal Work, Vocational Education, Welding, Workbooks

This material for student use presents the basic principles and techniques of drafting and provides experiences in the application of these skills to a wide variety of occupational areas, including carpentry, plumbing, welding, electrical, and sheet metal trades. The workbook contains 20 units, organized into seven sections. Sections cover introduction to drawing equipment and supplies, basic instrumental drawing, dimensioning and notes, orthographic projections, pictorial drawings, sectional representatives, and metric applications. The text is illustrated, and each unit contains explanatory material and student assignments. An appendix to the materials contains tables of standard measurements, standard sizes, and equivalents. Chemistry-Materials Laboratory Project Book, 1979-80.
Connecticut State Dept. of Education, Hartford. Bureau of Vocational-Technical Schools

Report No. — VT-228-CHEM-IAB

Pub Date — 80

Note — 272p.; For a related document see CE 031 112

Pub Type — Guides / Methods / Techniques — Classroom use — Instructional Materials (051). Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF01/PC11 Plus Postage

Descriptors — *Chemistry, *Laboratory Experiments, *Laboratory Procedures, *Science Experiments, *Science Instruction, *Science Laboratories, *Technical Education, Laboratory Equipment, Laboratory Manuals, Laboratory Safety, Postsecondary Education, Secondary Education, Skilled Occupations, Technical Occupations, Vocational Education, Workbooks

Identifiers — Connecticut

This Chemistry-Materials Laboratory Project Book, assembled through a survey of science instructors in vocational-technical schools in Connecticut, is intended to meet a variety of needs. It can serve as an idea book, with the instructor taking from it as needed and adding or substituting material related to class interests; as a guide book for starting or upgrading a laboratory program; or as a laboratory workbook for students. Projects in the book are related to various trades or vocational areas. Some of the laboratories are totally oriented toward chemistry; others are related to the physical aspects of materials. All laboratory experiments require the use of safety equipment. The first four sections of this project book are directed toward the instructor and contain an introduction, suggestions for having a successful laboratory exercise and for managing laboratory materials, and a suggested laboratory report format. The 14 sections following provide materials for student use and are organized into 17 laboratory experiences. The units cover laboratory orientation; laboratory techniques; elements, compounds, and mixtures; acids, bases, and salts; home chemistry; building materials; fuels; molecular oxygen; water; metals; plastics; adhesives; paints; and lists of chemicals used. Each laboratory experience contains an explanation of its purpose, materials required, information, procedures, and notes for the instructor. Charts and diagrams are included where needed. (KC).

Descriptors — *Laboratory Experiments, *Laboratory Procedures, *Physics, *Science Experiments, *Science Laboratories, *Technical Education, Laboratory Equipment, Laboratory Manuals, Laboratory Safety, Postsecondary Education, Science Instruction, Secondary Education, Skilled Occupations, Technical Occupations, Vocational Education, Workbooks

Identifiers — Connecticut

This Physics Laboratory Project Book, assembled through a survey of science instructors in vocational-technical schools in Connecticut, is an extension of the Chemistry-Materials Laboratory Project Book (see note) and is intended to meet a variety of needs. It can serve as an idea book, with the instructor taking from it as needed and adding or substituting material related to class interests; as a guide book for starting or upgrading a laboratory program; or as a laboratory workbook for students. Projects in the book are related to various trades or vocational areas. Some of the laboratories are totally oriented toward physics. Some may be very basic and general in nature and may apply to all students and trades; others are more specific and apply only to selected students and trades. Unlike the Chemistry-Materials laboratories, not all exercises here require the use of safety equipment. The first four sections of this project book are directed toward the instructor, and contain an introduction, suggestions for having a successful laboratory exercise and for managing laboratory materials, and a suggested laboratory report format. The following six sections provide materials for student use, and are organized into 82 laboratory experiences. The units cover laboratory orientation, mechanics, heat, sound, light, and electricity. Each laboratory experience contains an explanation of its purpose, materials required, information, procedures, and notes for the instructor. Charts and diagrams are included where needed. (KC).

ED 211 828 CE 031 150

Employability Skills: For Special Needs Students.
Carroll County Public Schools, Westminster, Md. Special Education Div

Spons Agency — Maryland State Dept. of Education, Baltimore. Div. of Vocational-Technical Education

Pub Date — 80

Note — 396p

Pub Type — Guides / Methods / Techniques — Classroom use — Teaching Guides (052)

EDRS Price — MF01/PC16 Plus Postage

Descriptors — *Career Education, *Educationally Disadvantaged, *Employment Potential, *Job Skills, Behavioral Objectives, Career Choice, Career Guidance, Communicative-Competence Languages, Curriculum Guides, Decision Making Skills, Educational Resources, Employment Interviews, Employment Qualifications, Individual Needs, Interpersonal Competence, Job Application, Job Search Methods, Learning Activities, Learning Modules, Money Management, Occupational Clusters, Secondary Education, Self Evaluation Individuals, Tests, Values Clarification, Vocational Education

Identifiers — Special Needs Students

Growing from mobile career libraries established for special needs secondary students in Carroll County, Maryland, this curriculum contains 10 units designed to aid educationally handicapped students to understand themselves and the world of work. Topics covered in the units include the following: self-awareness and appraisal, interpersonal relationships, values and decision making, the job search, applications and other forms, interviewing, career clusters, behavior on the job, job communication skills, and the paycheck. Each unit contains specific instructional objectives, a variety of activities to help students attain the objectives, evaluation measures to determine if the student attained the objective, and specific suggested resources for each objective.

Corresponding to each unit is an evaluation exercise to assess the students' understanding of the information contained within each unit. A comprehensive bibliography of career materials for the educationally handicapped secondary student is also included in the curriculum guide. (The curriculum units were field tested in Carroll County in secondary work-study classrooms for two years, with students' gains in knowledge assessed using the evaluation exercises included in the guide. For every unit, significant gains in knowledge were obtained by the students.) (KC).

Identifiers — CUBE System, Curriculum Management

Designed for use by teachers who are implementing the adult basic education teaching/learning management system called CUBE (Continuity and Unity in Basic Education), this manual covers the contents of the CUBE system, its philosophy, and its six goals. An inventory sheet listing all materials included in the system, a materials request form, and a form to record errors found in the materials are provided. In a section on the philosophy underlying the CUBE system various areas are mentioned, including basic objectives of the system, major components of the system, the program's flexibility, the role of the teacher in implementing the system, and the system's major goals (as they are called) or content areas (new student orientation, math placement, reading assessment and placement, English placement, vocabulary placement, and learning disabilities). Also listed are the individual materials provided in and procedures for using the individual volumes. (A project report outlining the development of these materials, as well as related instructional materials and program manuals are available separately — see note.) (MN).

Identifiers — Adult Basic Learning Examination, CUBE System, Possessives

A part of the adult basic education teaching/learning management system called CUBE (Continuity and Unity in Basic Education), this manual is designed to help those teaching students with "splinter skills" to piece together the students' deficient skills and develop an individualized reading program. It consists of three sections. Addressed in section I are means for determining reading level of materials; reading skills to be taught between the primer and 6.9 grade levels; words commonly found in level I reading materials; definitions and examples of the various reading skills; and rules governing consonants, vowels, plurals, inflected endings, possessives, and syllabication. The second section contains seven series of inventories, student answer sheets, and oral reading checklists, each of which contains reading exercises and materials geared to the various levels between and including primer and 6.9. Included in the final section are similarly organized steps containing activities for grades 8-10 reading levels; a specific skills series, including material on abbreviations, poetry, and possessives; and lists of published materials organized by reading skills covered in the manual. (A project report describing the development of these materials as well as the other CUBE system instructional materials and manuals are available separately — see note.) (MN).

Identifiers — Cambridge English Examinations, CUBE System, Mott Basic Language Skills Program, Possessives

A part of the adult basic education (ABE) teaching/learning management system called CUBE (Continuity and Unity in Basic Education), this manual consists of a series of tests and guides for use in teaching English and vocabulary skills to ABE students. Among the tests provided in the manual are the Mott 1600 and Mott 1900 pretests and posttests, various Cambridge language tests, a vocabulary pretest, and base vocabulary mastery tests. Guidelines for using verbs, the verb "be", and possessives are set forth. Also provided are guide sheets for use with the program's two vocabulary texts. Topics addressed in the various tests include recognition of parts of speech, tense, subject-verb agreement, punctuation, capitalization, parts of a sentence, style and clarity, sentence structure, and prefixes and suffixes. (A project report describing the development of these materials as well as the other CUBE system instructional materials and manuals are available separately — see note.) (MN).

Identifiers — Navy, Steel Construction

This Rate Training Manual and Nonresident Career Course (RTM/NRCC) form a self-study package that will enable Steelworkers First and Chief to help themselves fulfill the requirements of their rating. (These positions direct and coordinate efforts of individuals and crews in cutting, welding, placing and erecting rigid frame and other pre-engineered buildings, structures, and tanks; lay out, cut, bend, and place reinforcing steel; maintain records and reports on job progress and material estimates; and supervise and coordinate all tasks assigned to a unit.) Designed for individual study and not formal classroom instruction, the RTM provides subject matter that relates directly to the occupational standards of the Steelworker rating. Topics covered in the eight chapters of the RTM include administration; supervision; shop and construction site organization; construction inspections and quality control; advanced base planning, embarkation, and project turnover; planning, estimating, and scheduling; metals identification and testing; and company chief. An appendix contains an illustrated list of hand signals used in this occupation. The NRCC provides a way of satisfying the requirements for completing the RTM. Assignments in the NRCC include learning objectives and supporting items designed to lead the student through the RTM. (KC).

Learning Activities, Occupations, Secondary Education, Trees, Vocational Education
Identifiers — Gardening, Shrubs

Intended to provide about 10 hours of instruction to first-year vocational agriculture students, this instructional unit introduces students to the horticulture industry, provides a broad background of horticultural practices, and covers many skills that can be directly applied by students in their projects. Topics of the individual sections of the unit are examining the field of horticulture; establishing and maintaining lawns; planting, pruning, and maintaining trees and shrubs; planting and growing a garden; and beautifying homes and farms. Included in each section are the objectives of the section, guide questions, references, an interest approach, key facts, and student learning activities. Transparency masters are included in each section. Among the activities suggested are projects involving guest speakers, field trips, actual hands-on experiences, and participation in a student farmer's market cooperative. (Other units in this series are available separately — see note.) (MN).

Identifiers — California, Tile Occupations

This workbook is designed for classroom use by apprentices in four-year union tilesetting programs in California. The workbook is composed of five units covering all aspects of the tilesetting process. Unit 1 introduces the tilesetting trade, including history and scope of the trade, safe working practices, and trade organizations. Unit 2 describes the tiles, materials, and tools used in tilesetting, while unit 3 explains how to read blueprints and specifications. The fourth unit describes tilesetting job processes, and the fifth unit details specialized jobs such as tile floors, steam rooms, ceilings, mosaics, curved arches, swimming pools, and stairs. A list of acronyms, a glossary of terms used in the tilesetting trade, and a list of instructional materials needed by students and for the classroom is also included in the workbook. The workbook is illustrated with black-and-white drawings and full-color photos. (KC).

Descriptors — *Career Education, *Job Search Methods, *Job Skills,

*Learning Activities, *Work Experience Programs, Career Development, Job Training, Learning Modules, Money Management, School Business Relationship, Secondary Education, Self Evaluation Individuals, Taxes, Teaching Guides, Values Clarification, Vocational Education, Workbooks

Identifiers — California

This instructional guide is designed to provide work experience education coordinators with a series of topical items which can be incorporated into the related instruction portion of a high school student's work experience education program. The activities in this instructional guide represent a common core of concepts and understandings essential to the total education of the student; they can be used for individual instruction or in a group instructional setting. A total of 94 instructional activities are included in the guide, organized under a work experience education activity matrix which links learning objectives and developmental processes (knowledges, attitudes, self-awareness, and skills) with the various activities. The activities are grouped in six subject areas: input activities (to provide the instructor with baseline data about the students), career development activities, how to get a job, how to keep a job, how to leave a job, and the economics of worklife (such as paychecks, savings accounts, taxes and establishing credit). For each activity, a rationale is given, and methods, resources, time, the main idea, employer participation and coordinator notes are included. Each of the activities also include content information and student worksheets. Although the guide was developed for use in work experience programs in California, it can be used in any location with a few modifications. (KC).

Indexes

Subject Index

This index lists titles of documents under the major subject terms assigned to characterize their contents. The terms are taken from the *Thesaurus of ERIC Descriptors* and are in alphabetical order. As shown in the example, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service nor in the ERIC microfiche collection.

Author Index

This index lists titles of documents alphabetically by the author's last name. As shown in the example, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service nor in the ERIC microfiche collection.

Institution Index

This index lists titles of documents under the institution responsible for them alphabetically by the name of the university, agency, association, etc. As shown in the example, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service nor in the ERIC microfiche collection.

Institution — Rutgers, The State Univ., New Brunswick,
N.J. Cooperative Extension Service.
Document Title — Helping Families Adjust to Economic
Change. A Project Report. Accession Number
ED 181 239

Air Force Training Command, Sheppard AFB, Tex.

Military Curricula for Vocational & Technical Education. Entomology Specialist 1-5.

ED 198 374

Alabama State Dept. of Education, Montgomery. Home Economics Service.

Parenthood Education.

ED 210 461

Alaska State Dept. of Education, Juneau.

Home Economics in Rural Alaska. A Teacher's Resource.

ED 203 183

American Institutes for Research in the Behavioral Sciences, Palo Alto, Calif.

A Handbook on Utilization of the Entrepreneurship Training Components for Vocational Education. Entrepreneurship Training Components.

ED 211 744

Resource Guide of Existing Entrepreneurship Materials. Entrepreneurship Training Components.

ED 211 745

American National Metric Council, Washington, D.C.

Metric Planning Guide for Vocational Education.

ED 209 532

American Vocational Association, Inc. Arlington, Va.

Energy Awareness Guide. A Resource Book for Vocational Educators.

ED 209 533

Metric Planning Guide for Vocational Education.

ED 209 532

American Water Works Association, Denver, Colo. California — Nevada Section.

Wastewater Treatment I. Instructor's Manual.

ED 201 839

American Water Works Association, Denver, Colo. California — Nevada Section.

Wastewater Treatment I. Student's Guide.

ED 201 840

Arizona State Univ. Tempe. Coll. of Business Administration.

Preparing for Entrepreneurship.

ED 201 751

Arkansas State Dept. of Education, Little Rock. Div. of Vocational, Technical and Adult Education.

Arkansas' Junior Executive Training Curriculum Guide.

ED 210 492

Coordinated Career Education Curriculum Guide.

ED 204 498

Enrichment Materials in Home Economics for Gifted and Talented Students.

ED 204 621

Arkansas Univ. Fayetteville. Dept. of Vocational Education.

Arkansas' Junior Executive Training Curriculum Guide.

ED 210 492

Curriculum Guide for (Displaced) Homemakers in Transition. Partial Report of Project: Developing and Providing Multipurpose Employability Services and a Supportive Environment for Displaced Homemakers and Related Groups. February 1979-June 1980.

ED 199 461

Arkansas Univ. Fayetteville. Rehabilitation Research and Training Center.

Systematic Interviewing Skills. Participant's Workbook.

ED 209 523

Systematic Interviewing Skills. Trainer's Guide.

ED 209 524

Systematic Interviewing Skills. Typescript Manual.

ED 209 525

Army Engineer School, Fort Belvoir, Va.

Military Curricula for Vocational & Technical Education. Painting I, II. 3-6.

ED 204 633

Army Quartermaster School, Ft. Lee, Va.

Military Curricula for Vocational & Technical Education. Club Restaurant Operations, Part II, 9-10.

ED 200 825

Army Quartermaster School, Ft. Lee, Va.

Military Curricula for Vocational & Technical Education. Club Restaurant Operations, Part I, 9-9.

ED 200 824

Army Quartermaster School, Ft. Lee, Va.

Military Curricula for Vocational & Technical Education. Introduction to Club Management, 9-8.

ED 200 823

Army Quartermaster School, Ft. Lee, Va.

Military Curricula for Vocational & Technical Education. Club Food Service, 9-7.

ED 200 822

CURRICULUM COORDINATION CENTERS

Six curriculum coordination centers are part of the National Network for Curriculum Coordination in Vocational and Technical Education (NNCCVTE), which was established in 1972. In addition to the six curriculum coordination centers, NNCCVTE consists of six interstate curriculum networks and a national council of curriculum center directors. It is designed to provide an orderly system for sharing curriculum development products and services. The centers receive federal funds through competitive contracts awarded by the U.S. Department of Education.

Each of the six curriculum coordination centers operates separately but upholds the objectives of the national network. The major function of each center is to provide leadership in curriculum information resources. While center services vary according to regional needs, common functions include the following: evaluation of curriculum needs, coordination of curriculum development activities, field testing and evaluation, collection and dissemination of information on new and developing materials, response to requests for materials and information, curriculum inservice training, and provisions for technical assistance.

CURRICULUM CENTERS/LABS

Materials in this section were adapted from the *Resource Directory of Curriculum Centers/Labs*, June 1981, a product of the Vocational Instructional Materials Section of the American Vocational Association and the National Network for Curriculum Coordination in Vocational and Technical Education (NCCVTE). Special recognition is extended to the project staff of the Midwest Curriculum Coordination Center in Stillwater, Oklahoma and to the other curriculum coordination centers, project directors, and state liaison representatives of the NCCVTE.

CURRICULUM CENTERS/LABS

State	Name and Address of Center/Lab	Description of Activities	Contact
Alabama (Southeast)	Vocational Curriculum Development Unit Room 802 State Office Building Montgomery, AL 36130	Produces and disseminates Vocational Technical Education Consortium of States (V-TECS) catalogs, performance-based instruction, inservice training packages. Develops performance-based instruction teacher manuals and student study guides. Material available out of state: Yes	James Kendrick, Coordinator (205) 832-3473
Alabama (Southeast)	Instructional Materials Trade & Industrial Education 202-B Skyland Boulevard Tuscafoosa, AL 35405	Produces and disseminates Vocational Technical Education Consortium of States (V-TECS) catalogs, performance-based instruction, inservice training packages. Develops performance-based instruction teacher manuals and student study guides. Material available out of state: Yes	Grady Elmore, Coordinator (205) 759-5448
Alabama (Southeast)	Instructional Materials Agribusiness Education 101 Petrie Hall Auburn, AL 36849	Produces and disseminates Vocational Technical Education Consortium of States (V-TECS) catalogs, performance-based instruction, inservice training packages. Develops performance-based instruction teacher manuals and student study guides. Material available out of state: Yes	A. H. Halcomb, Coordinator (205) 826-4000
Alaska (Northwest)	Southeast Regional Resource Center 538 Willoughby Juneau, AK 99801	Provides curriculum materials and guides, audiovisual presentations, and exemplary projects for schools. Material available out of state: Yes	Allan Barnes, Director (907) 586-6806

State	Name and Address of Center/Lab	Description of Activities	Contact
Alaska (Northwest)	Northern Institute 650 West International Airport Road Anchorage, AK 99503	Develops curriculum materials, guides, and audiovisual materials. Performs research and trains staff. Material available out of state: No	Ron Daugherty, Director (907) 274-3691
Arizona (Western)	Arizona Center for Vocational Education P.O. Box 15095 Northern Arizona University Flagstaff, AZ 86011	Serves program needs (personnel, cur- riculum, facilities, equipment, flexi- bility), business and industry needs (e.g., new and existing job markets), and student needs (e.g., job interests) by providing research studies, curricu- lum materials, and leadership training. Material available out of state: Yes	Robert Kerwood, Director (602) 523-5442
Arkansas (Midwest)	Media Implementation Center 7701½ Scott Hamilton Drive Little Rock, AR 72209	Provides slide-tape presentations, transparencies, and filmstrips. Material available out of state: Yes	Bob Verboon (501) 371-1154
Arkansas (Midwest)	Arkansas Curriculum Dissemina- tion Center University of Arkansas Graduate Education Building, Room 115 Fayetteville, AR 72701	Acquires, classifies, and stores curricu- lum materials for retrieval in response to practitioner requests. Announces availability of new materials and con- ducts training sessions on skills needed by teachers to identify and use mate- rials. Material available out of state: No	Dean Clayton, Director (501) 575-4758
California (Western)	Vocational and Occupational Information Center for Educators (VOICE) State Department of Education 721 Capitol Mall Sacramento, CA 95814	As a computerized resource center, provides hard copy materials on request, conducts or receives searches of other data bases through NNCCVTE and the National Center for Research in Vocational Education. Material available out of state: No	Nona Verloo, Consultant Vocational Education (916) 445-0404

State	Name and Address of Center/Lab	Description of Activities	Contact
Colorado (Northwest)	Curriculum Materials Service Vocational Education Building 116 Colorado State University Fort Collins, CO 80523	Provides occupational analysis and performance objectives on a cost recovery basis. Material available out of state: Yes	Wiley Lewis, Coordinator (303) 491-5273
Connecticut (Northeast)	Connecticut State Department of Education Division of Vocational-Technical Education State Office Building P.O. Box 2219 Hartford, CT 06115	Develops curriculum materials and guides in the fields of industry, health, and service trades; adult and apprentice curriculum materials also are available. Material available out of state: Yes	Angelo J. Tedesco, Associate Commissioner Division of Vocational-Technical Schools (203) 566-3664
District of Columbia (East Central)	Professional and Curriculum Development Unit Browne Junior High School 24th Street and Benning Road NE Washington, DC 20002	Conducts professional and staff development activities for the career development division of District of Columbia public schools. Supervises curriculum writing for vocational areas. Prints and disseminates materials developed. Disseminates NNCCVTE materials. Material available out of state: Yes	Sylvia Liggins, Director (202) 724-4547
Florida (Southeast)	Center for Studies in Vocational Education Florida State University 600 West College Avenue Tallahassee, FL 32306	Researches and adapts materials developed by other states and organizations. Material available out of state: Yes	Robert Lathrop, Director (904) 644-2440

State	Name and Address of Center/Lab	Description of Activities	Contact
Georgia (Southeast)	Vocational Curriculum Center 3417 Oakcliff Drive Atlanta, GA 30340	Provides technical assistance for development of curriculum written and audiovisual materials, duplicates and mounts slides, duplicates and edits cassette and videotape recordings, stores and disseminates composite curriculum programs, and maintains quality control for above activities. Material available out of state: No	John Lloyd, Director, Division Program Development (404) 656-2547
Georgia (Southeast)	American Association for Vocational Instructional Materials (AAVIM) 120 Engineering Center, Athens, GA 30602	Provides resource material for agricultural education, trade and industrial education, industrial arts, and vocational-technical education including manuals, teacher guides, student workbooks, audiovisual aids, transparency masters, and slide sets. Also provides a performance-based teacher education program. Material available out of state: Yes	W. Harold Parady, Executive Director (404) 542-2586
Guam (Western)	The Library Guam Community College P.O. Box 23069 Guam, Main Facility Agana, GU 96921	Provides curriculum materials, curriculum guides, and audiovisual presentations and disseminates curriculum materials information. Material available out of state: No	Tuffy Pillette, Head Librarian 734-4311
Hawaii (Western)	Western Curriculum Coordination Center University of Hawaii Wist Hall 216 1776 University Avenue Honolulu, HI 96822	Collects curriculum materials and serves as a resource center for the Western states and territories. Material available out of state: Yes	Lawrence Zane, Director (808) 948-7834

State	Name and Address of Center/Lab	Description of Activities	Contact
Hawaii (Western)	Career Information Center University of Hawaii 2327 Dole Street Honolulu, HI 96822	Collects, synthesizes, develops, and distributes career information materials to teachers and counselors. Loans films, filmstrips, and other materials. Material available out of state: Yes	Helene Shibata
Idaho (Northwest)	Idaho Curriculum Dissemination Center 216 College of Education University of Idaho Moscow, ID 83843	Collects and distributes Idaho curriculum materials. Collects and previews out-of-state materials. Serves as American Association for Vocational Instructional Materials distributor for Idaho. Material available out of state: Yes	Cleve Taylor, Co-director (208) 885-6556
Illinois (East Central)	Curriculum Publication Clearinghouse 46 Horrabin Hall Western Illinois University Macomb, IL 61455	Provides state-developed curriculum materials on a cost-recovery basis. Material available out of state: Yes	F. Gene Miller, Director (309) 298-1917 (800) 322-3905 (Illinois only)
Illinois (East Central)	East Central Network for Curriculum Coordination Sangamon State University, E-22 Springfield, IL 62708	Eliminates duplication of effort through exchanging curriculum information and developing products and services in a twelve-state region. Material available out of state: Yes	Rebecca S. Douglass, Director (217) 786-6375
Illinois (East Central)	Illinois Vocational Curriculum Center Sangamon State University Springfield, IL 62708	Serves as a library of vocational materials and resources for free loan and use throughout Illinois and the East Central Network for Curriculum Coordination. Material available out of state: Yes	Rebecca S. Douglass, Director (217) 786-6375

State	Name and Address of Center/Lab	Description of Activities	Contact
Indiana (East Central)	Vocational Education Services 840 State Road 46 Bypass, Room 111 Indiana University Bloomington, IN 47405	Provides loan of print and audiovisual materials for Indiana vocational educators. Modifies existing curriculum for special populations. Prints Indiana produced curriculum materials. Consults on developing, producing, and using curriculum. Material available out of state: Yes	JoAnn Brooks, Information Specialist (812) 337-6711
Iowa (Midwest)	Iowa Vocational Curriculum Management System College of Education N008 Quad Iowa State University Ames, IA 50011	By September 1982, activities for this new system will include collection of curriculum materials and information. By June 1983, activities will include the above and dissemination, preservice, and inservice. By June 1984, activities will include the above and development of curriculum materials. Material available out of state: Will be	John Van Ast (515) 294-8919
Kansas (Midwest)	Kansas Vocational Curriculum Dissemination Center Pittsburg State University Pittsburg, KS 66762	Duplicates and distributes horticulture and agriculture curriculum guides. Stocks and ships materials from Mid-America Vocational Curriculum Consortium (MAVCC), American Association for Vocational Instructional Materials (AAVIM), and other instructional products for dissemination in Kansas. Material available out of state: Yes	Frank Slapar, Director (316) 231-7000

State	Name and Address of Center/Lab	Description of Activities	Contact
Kentucky (Southeast)	Curriculum Lab Division of Materials and Curriculum 19th Floor, Capital Plaza Tower Frankfort, KY 40601	Prepares, distributes, and utilizes curriculum materials and educational resources such as competency-based vocational education modules, V-TECS catalogs, ERIC searches, microfiche on various subjects, and other related educational materials. Material available out of state: Yes	Melissa S. Briscoe, Director (502) 564-2000
Louisiana (Midwest)	Vocational Curriculum Development and Research Center 823 College Avenue P.O. Box 1159 Natchitoches, LA 71457	Develops, prints, and disseminates vocational-technical instructional materials; also is a member of the Mid-America Vocational Curriculum Consortium. Material available out of state: Yes	David Poston, Assistant Director (318) 352-5348
Maryland (East Central)	Maryland Vocational Curriculum R&D Center Industrial Education Department University of Maryland College Park, MD 20742	Provides resources and support services for vocational curriculum research and development. Includes research, collection, evaluation, modification, development, field testing, responding to requests for materials and information, and maintaining a free-loan resource collection. Material available out of state: Yes	James Woodhull, Director (301) 454-2260

State	Name and Address of Center/Lab	Description of Activities	Contact
Maryland (East Central)	Maryland Vocational Curriculum Product Project Western Maryland Vocational Resource Center P.O. Box 5448, McMullen Highway Cresaptown, MD 21502	Serves as a statewide center for the reproduction, production, and dissemination of vocational curriculum materials. Functions include printing, producing media, dissemination, maintaining a media loan system, and providing graphics support to curriculum development. Material available out of state: Yes	Edgar Reynolds, Director (301) 729-8950
Massachusetts (Northeast)	Massachusetts Vocational Curriculum Center Minuteman Regional Vocational-Technical School 758 Marrett Road Lexington, MA 02173	Collects and disseminates vocational curriculum materials. Operates free loan of materials. Material available out of state: No	Carol Laughlin, Director (617) 863-1863
Michigan (East Central)	Michigan Vocational Education Resource Center 133 Erickson Hall Michigan State University East Lansing, MI 48824	Serves as a search, retrieval, and housing facility for curriculum materials for Michigan. Material available out of state: Yes	Gloria Kielbaso, Assistant Director (517) 353-4397
Michigan (East Central)	Curriculum Resource Team 100 Wills House Michigan State University East Lansing, MI 48824	Produces curriculum guides as specified by, and at the request of, the Michigan Department of Education, Vocational-Technical Education Service. Format and processes are determined by the Michigan Curriculum Management System. Assist in dissemination activities. Material available out of state: Yes	Chris Olson, Coordinator (517) 353-0661

State	Name and Address of Center/Lab	Description of Activities	Contact
Minnesota (East Central)	Minnesota Curriculum Services Center 3554 White Bear Avenue White Bear Lake, MN 55110	Loans materials from the resource library, disseminates materials on free and cost-recovery basis. Develops program area task lists, student performance objectives, competency records, and instructional resource listings. Material available out of state: Yes, cost-recovery items; only state developed items are available for loan out of state.	Cost-Recovery Items: Barb Moss, Cost Accounts Clerk (612) 770-3943 Loan Items: Roz Mesnik, Librarian (612) 770-3943
Mississippi (Southeast)	Research and Curriculum Unit Drawer DX Mississippi State, MS 39762	Provides teacher curriculum guides and resource units. Material available out of state: Yes	James F. Shill, RCU Director (601) 325-2510
Missouri (Midwest)	Instructional Materials Laboratory 10 Industrial Education Building University of Missouri-Columbia Columbia, MO 65211	Produces and distributes competency-based instructional materials and teaching aids in nine areas: agriculture, business and office education, home economics, distributive education, cooperative education, industrial education, industrial arts, sex equity, and special needs. Material available out of state: Yes	Harley Schlichting, Director (314) 882-2883
Nebraska (Midwest)	Nebraska Vocational Curriculum Resource Center Kearney State College, West Campus Kearney, NE 68847	Collects and disseminates vocational curriculum materials. Material available out of state: Yes	Beverly J. Nelson, Director (308) 236-4351

State	Name and Address of Center/Lab	Description of Activities	Contact

SOURCES OF AUDIOVISUAL INFORMATION AND MATERIALS

National Information Center for Educational Media (NICEM)
University of Southern California
University Park
Los Angeles, CA 90007
(213) 743-6681

The NICEM data base offers comprehensive coverage of nonprint educational media (16mm films, 35mm filmstrips, overhead transparencies, audiotapes, videotapes, phonograph records, motion picture cartridges, and slides) from preschool to professional and graduate school levels.

National Audiovisual Center
National Archives and Records Service
General Services Administration
Washington, D.C. 20409
(301) 763-1896

Audiovisual materials (16mm and 8mm films, audiocassettes, audiotapes, filmstrips, kits, slide sets, and videocassettes) are available through sales, rental, and loan referrals, including vocational and technical areas of auto mechanics; carpentry and wood working; construction; drafting; electricity and electronics; photography; heating, air conditioning, and refrigeration; metal work, welding, machine shop, and benchwork; plumbing and pipefitting; and safety. Center staff members respond to telephone and written requests, publish catalogs and selected listings of current titles available for sale or rent, produce brochures and filmographies on specialized subjects and on materials produced by individual federal agencies, and maintain a master catalog file on audiovisual materials produced by the federal government. Preview prior to purchase is available for selected 16mm motion pictures.

BIBLIOGRAPHY OF CURRICULUM PUBLICATIONS AVAILABLE FROM FEDERAL AGENCIES

Curriculum Materials in Vocational and Technical Education—1981.

U.S. Department of Education, Office of Vocational and Adult Education, Washington, DC, 20 pp.

Listings of vocational instructional materials available from federal agencies: a set of eight annotated bibliographies of curriculum and instructional materials compiled by the U.S. Department of Education, Office of Vocational and Adult Education, Curriculum Development Branch, Washington, DC, 1980.

- *Vocational Instructional Materials for Agriculture and Agribusiness Available from Federal Agencies.* 48 pp. ED 190 909.
- *Vocational Instructional Materials for Business and Office Education Available from Federal Agencies.* 32 pp. ED 190 916.
- *Vocational Instructional Materials for Vocational Home Economics Education Available from Federal Agencies.* 45 pp. ED 190 911.
- *Vocational Instructional Materials for Marketing and Distributive Education Available from Federal Agencies.* 31 pp. ED 190 910.
- *Vocational Instructional Materials for Allied Health Education Available from Federal Agencies.* 45 pp. ED 190 912.
- *Vocational Instructional Materials for Technical Education Available from Federal Agencies.* 67 pp. ED 190 913.
- *Vocational Instructional Materials for Trade and Industrial Education Available from Federal Agencies.* 44 pp. ED 190 914.
- *Vocational Instructional Materials for Special Needs Groups—Handicapped Disadvantaged, Older Americans, Youth Employment, Displaced Homemakers—Available from Federal Agencies.* 41 pp. ED 190 915.

A Reference List of Audiovisual Materials Produced by the United States Government: Supplement 1980. National Audiovisual Center, National Archives and Records Service, General Services Administration, Washington, DC. 54 pp.

Vocational-Technical: A Select List of U.S. Government Produced Audiovisual Materials—1982. National Audiovisual Center, National Archives and Records Service, General Services Administration, Washington, DC. 17 pp.

How to Submit Documents to ERIC

The Educational Information Resources Center (ERIC) of the National Institute of Education is a vehicle for communicating the written results of professional activities.

The ERIC Clearinghouse on Adult, Career, and Vocational Education (ERIC/ACVE) collects, abstracts, and indexes educational documents in the areas of adult and continuing education, career education, vocational-technical education, and education and work.

Documents selected for ERIC are announced with an abstract and availability statement in the monthly journal, *Resources in Education* (RIE). The types of materials ERIC/ACVE is looking for include

- research reports
- conference papers
- program descriptions
- monographs
- evaluation studies
- annotated bibliographies
- measurement instruments
- literature reviews
- position papers
- curriculum guides
- instructional materials
- teaching guides
- resource guides
- handbooks

To ensure quality reproduction and readability of your materials, paper should be white or a light tint, of the usual typing paper weight, and 8 1/2" by 11" in size. Very small type does not reproduce well. Appendix materials, tables, and charts should be legible and generally meet the same requirements as those for the text.

Because most documents are protected under the revised copyright law, including a statement granting ERIC permission for microfiche and/or paper copy reproduction when submitting materials will speed processing. Granting reproduction release of a document allows its inclusion in the ERIC data base without affecting copyright status.

If the document includes materials reprinted by permission, include the name and address of the copyright holder. If the document is available from the original source, include the publisher's name, address, and document price to be cited in the abstract.

To submit materials for possible inclusion in the ERIC system, send one clearly typed or duplicated copy (two if possible) to

Acquisitions Coordinator
