ABSTRACT

A follow-up study of 1981 graduates of Howard Community College (HCC) was conducted to obtain demographic data, determine students' employment and educational status 6 months after graduation, and to assess graduates' satisfaction with HCC's classroom instruction and preparation for transfer/employment. Study findings, based on survey responses from 61% of the 231 students who received a degree in 1981 and a survey of the employers of working graduates, included the following: (1) in 1981, 42 certificates and 189 associate degrees were awarded; (2) the majority of these awards (66%) were in occupational programs, followed by transfer programs (18%) and general studies awards (16%); (3) 91% of the employed graduates were satisfied with HCC preparation for employment, and 77% found jobs related to their HCC major; (4) over 96% of the transfer students reported satisfaction with their preparation, and over 86% indicated that their HCC and transfer programs were related; (5) 87% of the graduates whose primary goal was to prepare for career entry were employed, and 84% of the sample of their employers rated their training as good or very good; and (6) 83% of the graduates whose initial goal was to transfer achieved that goal and most reported a high degree of success at the senior institution. The bulk of the report consists of data tables showing survey responses for all graduates, employed graduates, and transfer graduates. Student comments and the questionnaires are appended. (AYC)

1981 GRADUATE FOLLOW-UP

BRIEF SUMMARY OF FINDINGS
RESEARCH REPORT 33

- TITLE:** Follow-Up of 1981 Graduates
- AUTHORS:** Lawrence A. Nespoli, Executive Assistant to the President and Susan K. Radcliffe, Research Specialist
- PURPOSE:** To provide descriptive data on 1981 graduates of Howard Community College including demographic characteristics as well as employment and transfer status six months after graduation. Information on graduates' satisfaction with HCC classroom instruction and HCC preparation for transfer and/or employment is also provided.
- METHODOLOGY:** A survey instrument was developed jointly by members of the Maryland Community College Research Group for the 1980 Graduate Follow-Up. The HCC Office of Research and Planning used the same instrument for the 1981 Graduate Follow-Up conducted locally. Of 231 graduates, 141 (61 percent) completed the survey. The respondents are similar to the total population of graduates by sex and race.
- FINDINGS:** Two hundred thirty-one awards were presented: 42 certificates and 189 A.A. degrees. The majority of these awards were in occupational programs -- 154 or 66 percent. Forty-one (18 percent) were in transfer programs, and 36 (16 percent) were General Studies awards. Both occupational program and transfer program graduates reported a high level of satisfaction with the preparation received at HCC. Over 85 percent reported that they had achieved their goals. Ninety-one percent of the employed graduates were satisfied with HCC preparation for employment, and 77 percent found jobs directly or somewhat related to HCC programs. Over 96 percent of the graduates who had transferred reported satisfaction with their preparation, and over 86 percent reported their HCC program directly or somewhat related to the transfer program.
- Eighty-seven percent of graduates whose primary goal in attending HCC was to prepare for career entry were employed (33 employed out of 38 with the goal of career entry). A total of 95 graduates were employed overall, regardless of initial goal. Eighty-four percent of the sample of employers of these graduates rated HCC's vocational training as good or very good. Ninety-seven percent of the employers sampled would hire another HCC graduate.
- Of the 36 graduates whose initial goal was to transfer, 83 percent (or 30) were successful in reaching that goal. However, a total of 55 graduates actually transferred, regardless of goal. Transfer students, as in the past, reported a high degree of success at the transfer institution. Twenty-five percent had transfer GPA's of 3.5 or above; 50 percent had GPA's of 3.0 or above. All but 5 percent had averages over 2.0. Eighty-one percent had all but six (or fewer) of their community college credits accepted for transfer.

APPENDIX A

COMMENTS BY HCC GRADUATES

Miscellaneous comments by the graduates of 1981 on changes that could be made at Howard Community College to improve graduates' employment and/or transfer performance:

TRANSFER

Arts and Sciences

"The Science Department is great! The teachers stressed all the important points used in the upper level courses."

Business Administration

"Make school a four-year school."

"I would add a sociology course and a second composition course to the Business Administration Program to facilitate a smoother transfer and the completion of required lower level courses."

"I feel that HCC should offer more writing courses than it currently offers students. T. S. U. places a strong emphasis on writing skills."

"More guidance!"

"Work very closely with the University of Maryland."

Teacher Education

"Emphasize and expand your computer science program and make it more accessible to the high schools."

"Make sure what a person takes is transferable to the University."

"I think you need to have more cumulative mid-term exams and finals. Otherwise, I think that the College is the best and wished it were a four-year College. The teachers are excellent."

"It could have work-study programs with industries around Howard County and give credit for actual work done relating to major or minor."*

OCCUPATIONAL

Accounting

"Offer more evening classes for the benefit of those who wish to work full-time. More interaction with transfer schools."

* HCC does have a cooperative education program.

Biomedical Engineering

"More input from past students as well as present students."

"For the BMET program, drop some health care and add more electronics."

"For BMET there should be a course on trouble shooting."

Business Management

"One of the changes that could be made is to fully prepare the graduate students for the four-year college. I think Howard is still lacking in that area."

Data Processing

"Program was adequate. I had no trouble finding employment as a full-time programmer."

"COBOL is going out of style. Offer another programming course in place of it. I couldn't find a job where they used COBOL."

Nursing

"Just maintain the information you are already providing and keep up the support for students."

"I feel the audio visual aides were good, but that there was too much of them and not enough human classroom contact. More could have been learned with less confusion if a teacher had been teaching instead of a machine."

"The nursing program needs to provide more clinical ~~experience~~ and have less students per clinical instructor." (three comments on this).

"Nursing program needs a crash cart to assure student first-hand knowledge of usage instead of the paper handed out with description of cart usage."

"Learning through more lectures; less self study; more field trips. More demonstrations, more small group projects, more small group discussions, more small group lectures, and more clinical work."

"Drop the Integrated Science in the Nursing Program and replace it with Microbiology. Integrated Science won't transfer to a B.S. program and Microbiology would be very useful in the hospital setting."

Secretarial Science

"None, excellent staff."

"I got what I needed in my community college; I can't complain."

"Need to go in more depth on job conflicts between co-workers, supervisors, and subordinates (ways of resolving)."

"Improve job placement services."

"Add a few more courses on assisting the physician (general fields)."

"My program included a Field Related Experience Course. This should be applied to all program if community could arrange."

"The Secretarial Science Program at HCC is very thorough and the training excellent. I received a Word Processing Certificate and feel this program could be extended to a two-year course with more time spent on the word processor to gain more knowledge of the machine."

Vision Care

"The skills and background material taught in the VC program were informative and interesting, but not necessarily needed for my job. The eye care field is not ready, nor willing to pay for the skills and education we've received. I'd shorten the program, eliminate some of the scientific material (VS121), combine clinical data collection with VS101, and also eliminate current topics which are in reality a vision training course. I'd also present a course that offers more on-the-job experience than classroom theory."

Carpentry

"I request that the College place a high priority on developing a first class Vo-Tech program and facility."

"I feel that making the Carpentry Program into an associate degree program would enhance the quality of the construction field."

"Need to work closer with other colleges and employers."

"To me the program is wonderful."

Housing Management

"More counseling in finding employment."

GENERAL STUDIES

"Good counseling from the very beginning."

"Somehow try to prepare students for the extreme size difference in HCC and any other huge university."

"Seminars could be offered with specific and correct information requirements for transfer programs."

"A continual updating of materials relating to transferring."

"Offer more courses in the communications department and make sure that all credits have transfer status."

"Encourage students to declare a satisfactory major ASAP."
