ABSTRACT

With its companion report, the Annual Test Report, Statistical Profiles provides comprehensive information about Montgomery County Public Schools (MCPS) for use by the Board of Education, school system staff, county government, and interested public. Statistical Profiles reports general information and statistical data about schools and their staffs and enrollment, as well as staff data concerning MCPS administrative offices. The report is organized into: (1) the purpose and organization of the reports; (2) selected data about the county and the school system, including county planning projections for population, income, and housing for 1980 and 1985 and distributions of selected data elements reported in the school profiles; (3) five summaries of school profiles; (4) administrative area summary profiles and school level summary profiles within area analagous to those summaries at the county level, and individual school profiles; (5) alternative center profiles and a summary profile for the nine centers; (6) profiles for the school system administrative offices and departments; and (7) a list of specialized statistical reports about MCPS. ## ACKNOWLEDGEMENTS

The accuracy, timeliness, and visual appeal of this report are due largely to the efforts of the following staff members:

Ginger McLelland whose proficiency with word processing equipment enabled her to accurately and efficiently type the data for the 1981 - 82 Profiles

Constance Mitchell who supplied much of the data from reports she has prepared for MCPS

David Stream who designed the cover and prepared the graphics for identification of the report sections

George Williams who developed the computer programs required to generate the staffing data, and those staff members of the Area Offices and the Department of Personnel for their efforts to verify and update that data

## I. INTRODUCTION

This report is one of two companion reports, the Annual Test Report and the Statistical Profiles, issued by the Department of Educational Accountability. Together they provide comprehensive information about Montgomery County Public Schools (MCPS) for use by the Board of Education, school system staff, county government, and interested public. The Annual Test Report documents and analyzes systemwide testing results on a school-by-school basis. The Statistical Profiles reports general information and statistical data about schools and their staffs and enrollment, as well as staff data concerning MCPS administrative offices.

Virtually all of the data elements reported in the Statistical Profiles are available to the general public in other official school system reports. A list of these specialized statistical reports is included in Section VII. Providing the data in a single document, however, serves three important purposes:

- o It reduces the response burden formerly required of school personnel by including much of the data commonly requested of schools in one document.
- o It assures standard definitions, standard formats, and sound statistical procedures to generate the data uniformly across all schools and administrative units.
- o It provides a ready reference for MCPS staff, members of the Board of Education, the County Council, and other government agencies which need accurate consolidated data to conduct their ongoing planning and decision-making activities.

To facilitate location of data for a particular school, the Table\* of Contents lists the schools alphabetically within administrative areas. An alphabetical listing of all schools with page references follows the Table of Contents. It will enable the reader to locate a school if its administrative area is not known. The Administrative Areas 1, 2, and 3, alternative centers "A", and offices "O" are tabbed in the margins of the profiles so that reference to a particular section can be made quickly by flipping the page edges. Administrative area summaries report data only for the 1981-82 school year since the 1980-81 data are compiled for that year's MCPS organization which at that time had five areas, not three as is the case in the current MCPS organizational structure.

### ORGANIZATION OF THE REPORT

The report is organized into seven sections:

- Section I. Purpose and organization of the reports; definitions of terms and data elements
- Section II. Selected data about the county and the school system, including county planning projections for population, income, and housing 1980 and 1985 and distributions of selected data elements reported in the school profiles
- Section III. Five summaries of school profiles, including one summary of all schools in the entire county (including the alternative centers) and four summaries by school level--senior high schools, junior high schools, middle schools, elementary schools

- Section IV. Administrative area summary profiles and school level summary profiles within area analogous to those summaries at the county level and individual school profiles
- Section V. Alternative center profiles and a summary profile for the nine centers
- Section VI. Profiles for the school system administrative offices and departments
- Section VII. List of specialized statistical reports about MCPS

#### TYPES OF DATA REPORTED

The data in this report were generated from existing computer files and educational service center reports and required no additional data acquisition directly from schools. Individual schools, through area offices, updated the data regarding their staff. Though there are many advantages in drawing the data from existing files, there are disadvantages as well. Each of the data sources was designed to serve specific purposes, generally unrelated to publication of the Statistical Profiles. When all of these sources were pulled together, the differences among them led to apparent discrepancies. The selection of the data categories, the form of the statistics reported, and "as of" dates for data are examples of areas where differences occur.

The current report is the fourth annual issue. All issues have a similar format; there is little format change from the 1980-81 to the 1981-82 publication. Efforts have been made to improve each successive publication through improved data collection and storage, fewer manual calculations, and better explanation of differences where they appear.

The data elements reported in the school and alternative center profiles may be categorized as student characteristics and enrollment data, staff characteristics and positions, and general information. The school profiles report two years of data, 1980-81 and 1981-82, for both students and staff.

The student data include enrollment totals and minority group membership distributions as of September 30, 1981. Proportions of students by sex are not included because they were predictably close to 50 percent in all schools. This data element is included for the alternative centers' student population where this generality did not apply.

The staff data include the number of positions in full-time-equivalents (FTE) as well as the number of persons (N) occupying those positions as of December 15, 1981. Staff characteristics reported are the highest degree attained, years of experience, ethnic background, and sex.

The general information data elements reported for each school are percent of average daily attendance, percent of students transported, mobility rate of students, student/professional staff ratio, length of the marking period, hours in the school day, school enrollment capacity, the number of rooms, the cost of property destruction, and the feeder-receiving school patterns for September, 1981. Average class size is reported for the elementary schools only.

Profiles for the administrative offices and departments include staff information analogous to that reported for the schools and alternative centers. Each profile names the department director or the office associate superintendent and states to whom this person reports in the administrative organization.

Six tables of planning projections and distributions of selected socioeconomic, staff and student related variables are presented in Section II.

Table 1 summarizes MCPS enrollment for the five-year period FY 1978--FY 1982 and shows the projection for FY 1983. Table 2 lists county planning projections for population, income, and housing units for the calendar years 1980 and 1985. Since the FY 1983 MCPS Operating Budget is not final at the time of publication of this year's Statistical Profiles, that information is not reported here.

Tables 3-6 show the county's range and distribution of values for a selected set of the data elements for elementary, middle, junior, and senior high schools. Comparing the data elements for any one school with these distributions will enable the reader to note differences among schools and whether a particular school is high, average, or low within that distribution.

#### DEFINITIONS OF TERMS AND DATA ELEMENTS

ALTERNATIVE CENTER      Definition:      An MCPS school providing programs for children with special education needs. Statistical profiles are included for those centers that report their enrollment and attendance as independent units and are, therefore, listed in the MCPS Official Enrollment Report for September 30, 1981.

Source:              MCPS (Interim) Directory (1981-82) Central and Area Offices (July 1981)

AVERAGE CLASS SIZE      Definition:      A ratio calculated for the elementary school only using the formula:

$$ACS = \frac{\text{regular student enrollment (K-6)}}{\text{number of attendance sections}}$$

No special education or Head Start pupils are included.

STAFF CHARACTERISTICS Definition: Four characteristics of staff as listed in the Personnel Master File are reported for 1980-81 and 1981-82. These characteristics are:

Highest Degree Status: The highest degree, or degree equivalent, recorded for the staff. This data element is recorded and kept up to date for professional staff but not for supporting services. For this reason it is not reported for supporting services staff and is indicated by DATA NOT AVAILABLE notations.

Years of Experience: The total number of years of experience credited to staff members according to the Personnel Master File. For supporting services staff this reflects number of years of experience in MCPS. For professional staff, this reflects the number of years of creditable experience prior to working with MCPS plus years of experience with MCPS.

Sex: The sex of staff members as recorded in the Personnel Master File

Ethnic Background: The race/ethnic group membership of staff members as recorded in the Personnel Master File

Source: A computer run, based on the Personnel Master File and Position Control File as of December 15, 1981.

STUDENT PROFESSIONAL STAFF  
RATIO

Definition:

The student professional staff ratio =

weighted enrollment (11/30/81)\*

Number of professional staff (12/15/81)\*\*

\*1/2 X (half-day kindergarten enrollment + 1 X (full-day kindergarten enrollment) + (regular enrollment in Grades 1-12) + 0 (special education and Head Start enrollment). The following schools have full-day kindergarten: East Silver Spring, Montgomery Knolls, New Hampshire Estates, Rock Creek Forest, Rosemary Hills, and Woodlin.

\*\*Teaching staff excluded are those classified as special education, Head Start, resource room, or special needs teachers.
